In fact, as I look at the figures, the President will have to veto any appropriation bill that is a nickle over and any authorization bill that does not reform entitlements contained in it, and will probably have to look very hard at new authorizations in areas that are sacred cow programs.

So I say to my colleague, in response to his concern that we have been overly generous in this first year, that the truth is that with a $180 billion cap and a 7-percent trigger, we will, between now and November 1, go through an excruciatingly painful process that will involve more vetoes than Ronald Reagan has used in the last 5 years combined, to try to prevent this trigger from being pulled.

Quite frankly, I think it would be the height of folly to set up a trigger that would pull, no matter what the President did, and therefore produce the potential that we could be irresponsible, knowing the automatic cutback was coming.

Mr. MOYNIHAN. Mr. President, will the Senator yield?

Mr. GRAMM. I will be glad to yield when I have finished.

I would like to see us set up a target that is going to be difficult to attain but not impossible. Quite frankly, I believe that if we adopt this proposal and if we work with the President on every spending bill, every authorization bill, and on the continuing resolution—is we have one, and I think it is clear that we will—it will take our complete effort to prevent pulling the trigger in November. But I think it should be possible to prevent the trigger from being pulled by being responsible; and I for one, intend to do everything within my power to see that we live within this limit.

So I am asking us, as are my cosponsors, to put on a new coat in this budget process. It will be a coat a lot tighter than the one we wore in the past. A lot of the flair we carried will not be in this coat. I thought it was important that we get it fully unbuttoned and get it on; because in the first year it will be difficult to go from a period where we spent as if there were no tomorrow to where we are forced to reduce the deficit by $36 billion a year.

I yield to the Senator.

Mr. MOYNIHAN. I thank the Senator from Texas.

First of all, slightly outside the rules for a question, I do not disagree with what he has just said in terms of the difficulty we will have with a deficit of $171 billion in the current fiscal year. But I correctly understand that he agrees with the following proposition: that the budget resolution calls for a deficit of $172 billion. The Gramm-Rudman amendment sets a goal of $180 billion but allows——

Mr. GRAMM. If the Senator will yield, it does not set a goal of $180 billion. It does not change the goal. It sets a maximum allowable amount of $180 billion.

Mr. MOYNIHAN. That is right. Plus a margin of 7 percent.

Mr. GRAMM. But I remind my colleague that if OMB and CBO jointly project, on the basis of what we have done to that point, on November 1 of this year, that the projected deficit is $192 billion and 1 cent, we will sequester $12 billion and 1 cent, to move us back to 1980.

Mr. MOYNIHAN. Then, may I ask my colleague this: Did he not just use the figure $192 billion?

Mr. GRAMM. The $192 billion would trigger the sequester. The trig-

ger of 7 percent is a measure of statistical significance above $180 billion. This is the first year in trying to make the thing work, and perhaps my colleague would like to join me in trying to do better in the process. I voted for this different budget on the floor, and my colleague voted against it. So if someone would like to help me control spending more, I am willing.

Mr. CHILES. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I should like to respond.

Mr. GRAMM. I yield.

Mr. MOYNIHAN. I did vote against it. I thought there were no revenues, and, absent that, I saw no possibility of even meeting this goal.

I do not disagree with my learned and distinguished friend that getting to $192 billion—I think we come out with $193 billion; it is a matter of arithmetic—will be difficult in itself. But the Senator has allowed that under the provisions of the Gramm-Rudman amendment, the budget deficit for fiscal 1986, which we have just entered, the allowable deficit rises from $172 billion to $192 billion or, as I calculate, $193 billion, a difference of $20 billion to $21 billion in the allowable deficit under the deficit reduction proposal.

Mr. GRAMM. Mr. President, reclaiming my time, let me make it clear to my distinguished colleague that I have not allowed it through this bill to do anything. What I have said, however, is that across-the-board sequesters shall go into effect if, in fact, it is more than 7 percent above $180 billion.

Under the Budget Act, spending bills will not be in order in the aggregate above $171.9 billion. So if this budget which we developed with the House—which I called phony and which my colleague voted against—is worth the paper it is written on, which in reality it is not, we will never approach $180 billion.

The truth is that we are already sitting on an almost $190 billion deficit under that budget, because that budget was full of phony savings. If we are going to go from phony budgeting to realistic budgeting, you have to look at things as they are, not as you wish they were.

Mr. President, I suggest the absence of a quorum.

Mr. EXON. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. The Senate will be in order.

Mr. GRAMM addressed the Chair.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MOYNIHAN addressed the Chair.

Mr. GRAMM. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. MOYNIHAN. Mr. President, since no request was made, I do not know what he is objecting to.

The PRESIDING OFFICER. The quorum call. The Chair will announce the quorum call is in progress. Perhaps the Senator anticipated unanimous consent would be made.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CHAFEE). Without objection, it is so ordered.

THE FISCAL YEAR 1986 DEFICIT UNDER THE GRAMM-RUDMAN AMENDMENT

Mr. MOYNIHAN. Mr. President, in my exchange this afternoon with Senator GRAMM, I asserted that the Balanced Budget and Emergency Deficit Control Act of 1985 proposed by the junior Senators from Texas and New Hampshire would permit an increase in the deficit for the current fiscal year, fiscal year 1986, of $21 billion.

Senator GRAMM spoke of a $20 billion gap between the deficit permitted under the budget resolution passed by the Congress last August 1, and the deficit level which would trigger the automatic spending cuts of the Gramm-Rudman proposal.

We agree; the seeming inconsistency arises from rounding.

The Gramm-Rudman amendment establishes a deficit ceiling of $180 billion for fiscal year 1986;

The Gramm-Rudman amendment declares that automatic spending cuts will be triggered only if the deficit is expected to exceed the ceiling by at least 7 percent;

Seven percent of $180 billion is $12.6 billion;

The trigger deficit level for fiscal year 1986, therefore would be $180 billion plus $12.6 billion, or $192.6 billion;

The budget resolution contained a maximum deficit for fiscal year 1986 of $171.9 billion;

The trigger deficit level under the Gramm-Rudman proposal, therefore, exceeds the maximum deficit approved by the Congress in the budget resolution by $20.7 billion: $192.6 billion minus $171.9 billion equals $20.7 billion.

I rounded $20.7 billion to $21 billion.

I thank Senator GRAMM for his courteous agreement to my earlier exposition.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

BALANCED BUDGET AMENDMENTS

Mr. DOLE. Mr. President, while we are waiting for the distinguished minority leader, let me indicate to my colleagues we are going to be here quite a while tonight. We have not done anything for 2 days. We ought to decide whether we are going to do something or do nothing. There will not be any extensions of the debt ceiling even for 1 day until we start moving on the major amendments.

I have a couple of options. One is to table the motion to recommit, which would take with it the cloture petition. Then we start voting because of the request made by the Senator from Connecticut to have 19 votes, one on each division of the Gramm-Rudman-Hollings amendment. As I understand it there are about 19 divisions on which we could have rollcall votes—or those who oppose the Gramm-Rudman-Hollings amendment will have to talk. We have had about 2½ days of filibuster.

It seems to me we have reached that point.

We have also checked with Treasury in the past hour. They are getting a little nervous, particularly when nothing is happening in the Congress.

We understand that the House is waiting for the Senate to send them a short extension. We believe we have a vehicle upon which to put a short extension, but I could not get unanimous consent, even if I wanted to get unanimous consent, to do that without acting on the Gramm-Rudman-Hollings proposal.

I would hope that we could agree that we would dispose of the four or five amendments. I have looked at the counter proposal of the distinguished minority leader, in which Members on that side would like to lay down the so-called leadership amendment on that side, and then have a vote tomorrow morning or whenever the time for debate is expended. I guess it is one-half hour each on that side. Hopefully, we would dispose of that amendment and then immediately turn to the Gramm-Rudman-Hollings amendment. We should be able to finish that no later than 1 o'clock.

When we turn to the Gramm-Rudman-Hollings amendment we will not use much time on this side. Then there are five or six other amendments which Members would like to offer, some on each side, following disposition of the Gramm-Rudman-Hollings amendment. Hopefully we could conclude action on that by early tomorrow evening, maybe 5 or 6 o'clock.

At that time, or even before, after disposition of the Gramm-Rudman-Hollings amendment, I believe I can then obtain consent to at least take up a short extension of the debt ceiling, maybe until the 17th of October. The Senate and House could act on it tomorrow night and get it to the President before midnight. Otherwise, I understand there is real trouble. Again, I do not know who finally decides they are in real trouble, but somebody must

decide those things. So we are in real trouble.

My point is we have not concentrated here in the last couple of days. If there is any trouble, I think we have to accept part of the blame in the Congress.

I would hope that we might now——

Mr. BOREN. Will the distinguished majority leader yield for a question?

Mr. DOLE. Yes.

Mr. BOREN. I have a very brief amendment on minimal tax. I am prepared to offer it at this time. It is one of those that has been under negotiation. We might be able to begin to get some action. I agree with the majority leader, I would like to get on with all of this, if we can. I offer that to try to move on.

Mr. BUMPERS. Will the majority leader yield for a question?

Mr. DOLE. Yes.

Mr. BUMPERS. I am not clear on the parliamentary situation or the procedure. Is it the leader's intention to proceed with amendments to the Gramm-Rudman-Hollings amendment and then at some later time allow the Chiles-Byrd-Johnston proposal to be offered and voted on tomorrow?

Mr. DOLE. That is not my request. That was the request of the distinguished minority leader, that we would take up the Gramm-Rudman-Hollings amendment now, then lay down the leadership amendment, and then to vote on the so-called Democratic leadership amendment tomorrow. It was then further suggested that we vote on the Gramm-Rudman-Hollings amendment on Thursday. But it would seem to me that we could get that by 6 o'clock tomorrow evening and move on to reconciliation on Thursday.

There is another reason why I urge my colleagues, if they can, to cooperate. We would like to appoint conferees tomorrow. They will come from the Finance Committee, the Budget Committee, and maybe others on this side. We would like to have the conferees appointed while the House is still in session. They may be going out Thursday. Then they are going to say, "Well, the Senate did not complete its work and we could not go to conference."

Then we will be right up against it sometime next week when the extension runs out.

We want to, in fairness, give the Speaker and the Republican leader in the House a fair opportunity for a short conference. We would like to go to conference this week.

Mr. RUDMAN. Will the majority leader yield for a question?

Mr. DOLE. The minority leader has a question.

Mr. BYRD. Mr. President, the distinguished majority leader has made every effort, I am convinced, to try to reach an agreement which will let us complete action on the few amendments which we want to call up on this side, and I think even fewer amendments on the other side.

Mr. DOLE. Two.

Mr. BYRD. And then act on the Gramm amendment.

In the meantime, we would extend this debt ceiling until the 18th.

We talked with the Speaker, I believe yesterday—anyhow, I talked to him again today—at which time he talked about sending over a short-term debt limit extension. "I personally prefer," he said, "to have the following Wednesday. But at the minimum, we would like to have it ready the 18th."

The House would come back Wednesday, the 16th, and the short-term extension would put us through until Friday.

But all this clamor downtown about money running out, the checks are going to bounce, all of that, all of that could be taken care of by a short-term debt limit extension. That is what I have been urging since last week.

The majority leader has problems, I know. I have problems, too. I can very much appreciate the problems that the majority leader has. If he could say, "Well, we will do it this way," that would resolve it. If I could say, "We will do it this way," that would resolve it.

But we do have to represent our respective conferences.

The Government cannot borrow, that is correct—the Government cannot borrow.

It has been going along on cash reserves. But we do not have to continue to work with a cocked gun at our temples. Let us get a short-term debt limit extension adopted. That can be done in 30 seconds, as far as I am concerned, if we get unanimous consent. I know therein hangs a tale, as Shakespeare would say. But I hope that Senators on both sides would be willing to extend the debt limit until the 18th, so that we do away with people lying on their pillows at night unable to go to sleep for fear their checks are going to bounce. We can alleviate all of that right now.

Why do we not do that? Or is there some political reasons for not wanting to give a short-term debt limit extension?

We had two Democratic leadership proposals yesterday. We have agreed to drop one of them, so we only have one left. If we could get that laid down tomorrow and vote sometime tomorrow on it and, in the meantime, we will lay down—Senator BOREN is ready to call up one of his amendments. Then we have other amendments which are in the package which we propose; then on Thursday, vote on the Gramm proposition. And there may be some amendments following that.

In any event, we have offered to complete action on the House resolution, House Joint Resolution 372, before the close of business on Thursday, so the whole thing is finished.

Reference has been made to the House appointing conferees. If we send it over there tomorrow, Mr. President, does any Senator believe that the House is going to appoint conferees tomorrow before they go out? Why, of course they won't.

But we can send the package over there on Thursday and they can approve the short-term extension and then they can later go to work on the long-term measure.

I want to work with the distinguished majority leader. I realize the problem and he is doing the very best he can with it. But we do not have to continue to go through this scenario of scaring people who are afraid they are not going to get checks, making the people in the Federal agencies believe the doors are going to be locked, the agency is going to be shut down. All we have to do is give a short-term extension until the 18th and that fear is out of the way.

I hope we can go ahead with the Boren amendment, get the short-term extension, get the Democratic leadership package, I shall use the same words as the majority leader, the "so-called Democratic leadership package," and get the debate going. Nobody knows what is in it yet. [Laughter.]

I have heard those kinds of giggles before. I have been around here listening to them for a long time. The reason is, the Gramm amendment is a second-degree amendment and the only way an amendment can be offered is by unanimous consent. That is the only way we can do it, as the majority leader and I know. So heh, heh, heh, OK? Good! [Laughter.]

I thank the distinguished majority leader for yielding.

Mr. DOLE. Mr. President, I thank the minority leader.

Well, therein lies the problem. [Laughter.]

Mr. BOREN. Mr. President, while everybody is in such a good mood, I suggest we act on my amendment.

Mr. DOLE. Does the Senator need to offer it? We can just take it.

TIME LIMITATION AGREEMENT

Mr. DOLE. Mr. President, I ask unanimous consent that we may proceed to the Boren amendment under a time agreement not to exceed 40 minutes—20 minutes on a side—the time to be equally divided between the distinguished author of the amendment, Mr. BOREN, and the distinguished chairman of the Finance Committee, Mr. PACKWOOD.

Is there objection to that request?

Mr. BYRD. Mr. President, reserving the right to object, will the distin-

guished Senator, for his own protection as well as others, add that there would be no amendment in order to that, which there will not be without unanimous consent anyhow, but for our own protection, I do not think it will hurt to say it again.

Mr. DOLE. Right. And that there be no amendment in order to that amendment.

The PRESIDING OFFICER. Is there objection? Hearing none, it is so ordered.

(Mr. PRESSLER assumed the chair.)

Mr. DOLE. Mr. President, let me indicate this: There are about five amendments in this category. The distinguished Senator from Michigan has an amendment which we can accept. It is going to appear in the modification, as I understand it, that they have been working on. The distinguished Senator from Florida [Mrs. HAWKINS] has a similar amendment. The distinguished Presiding Officer [Mr. PRESSLER], has a similar amendment. There may be an inclination to accept the proposed amendment by Senator DODD, Senator KERRY, and others, which I have discussed with the distinguished Senator from Connecticut.

That would leave an amendment by the distinguished Senator from Montana [Mr. MELCHER], a tax amendment. That would also leave the Exon amendment, which would change the trigger. As far as I know, at least in the last proposal I received from the distinguished minority leader, that would take care of all the amendments with the exception of the leadership amendment. What I hope to do is take care of all the amendments except the leadership amendment to be offered at this time. There would be other amendments to be offered after we have acted on Gramm-Rudman.

It seems to me in rather quick order, we ought to be able to dispose of those amendments and lay down the Democratic leadership amendment—I previously used the reference "so-called" only because I knew there were some Democrats supporting the other package. But it is a Democratic leadership amendment. We can dispose of that tomorrow and when we have disposed of it, there would be no reason we could not go to the Gramm-Rudman-Hollings amendment. There is nothing left. Depending on what happens to Gramm-Rudman-Hollings, there would be some amendments to that.

Mr. President, I ask unanimous consent that none of this time come out of the time of the distinguished Senator from Oklahoma.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RUDMAN. Will the Senator yield for a question?

Mr. DOLE. Yes, Mr. President.

Mr. RUDMAN. Because the procedural situation is as complex as it is, I want to say this so all those involved may understand precisely what is going on. Because, as the Democratic leader referred to, of the way the amendment is, we should be correct in our understanding that what we are about to do is act upon a series of amendments to the bill managed by the Senator from Oregon [Mr. PACKWOOD], the chairman of the Finance Committee. They are not amendments to the so-called Gramm-Rudman-Hollings amendment. Is my understanding correct, I ask the majority leader?

Mr. DOLE. This is correct. It could be done the other way, but then if something happened and there were a modification, it would disappear.

Mr. BOREN. Mr. President, I have this phrase "notwithstanding any other provision of this act," so it would be to the bill.

Mr. KERRY. Mr. President, do I understand correctly from the leader—perhaps Senator GRAMM can help answer this—that my amendment with respect to the CBO compliance study is included in that request?

Mr. DOLE. That is my understanding. Your amendment is a CBO study on tax compliance. Whatever it takes, we will preserve your right to offer it.

Mr. KERRY. I thank the leader.

Mr. MATTINGLY. Will the majority leader yield for a question?

Mr. DOLE. First, I yield to the Senator from Connecticut [Mr. DODD].

Mr. DODD. Mr. President, I did not raise any objection to the unanimous-consent request, but is my understanding correct that on any of these amendments, there would be no tabling motion; they would be voted up or down?

Mr. DOLE. I am not prepared to do that. I think I have to use some judgment. We have a time agreement. I am not certain it makes that much difference. Sooner or later, we have to face up to the issue. Some people would rather vote on a motion to table. I will try to work it out on most of the amendments.

Mr. MATTINGLY. Will the majority leader yield?

Mr. DOLE. Yes, I yield.

Mr. MATTINGLY. Let me ask a question: Could the majority leader try to compound some kind of agreement between himself and the minority leader to get all these out that are on the bill and then the Gramm amendment and try to have passage by 5 or 6 tomorrow afternoon?

Mr. DOLE. That is what I am going to suggest to the distinguished minority leader. He made an offer which I appreciate very much. He got the ball rolling. We came back with a counter-proposal. He in turn is giving me a little fine tuning of that.

I want to try to find tune it a bit more, but we are not talking about any vast differences. We are talking about whether we complete action tomorrow or Thursday and very honestly we would like to at least move to the reconciliation bill on Thursday. And, also, I would say to the distinguished minority leader that if I ask unanimous consent to bring up a bill to attach a temporary debt ceiling extension, it would be objected to on this side. I have been advised not to make any move of that kind without notifiying at least three Members. They think this current situation is the best thing that has happened since sliced bread—that we will have a balanced budget if we do not do anything.

Mr. BYRD. They are right about that, we will have a balanced budget fast. We will be operating on the basis of the estimated $770 billion in revenues. We can spend that.

AMENDMENT NO. 739

Mr. BOREN. Mr. President, on behalf of myself, Mr. EXON, Mr. BENTSEN, Mr. PRYOR, Mr. BUMPERS, and Mr. LEVIN, I send an amedment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Oklahoma [Mr. BOREN], for himself and Mr. Exon, Mr. Bentsen, Mr. Pryor, Mr. Bumpers, and Mr. Levin, proposes an amendment numbered 739.

Mr. BOREN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the joint resolution, insert a new section as follows:

SEC. . Notwithstanding any other provision of the Act, the Senate Committee on Finance is directed to report to the Senate by July 1, 1986 legislation providing for payment of an alternative minimum corporate tax by corporations on the broadest feasible definition of income to assure that all of those with economic income pay their fair share of taxes provided further that said alternative minimum corporate tax shall take effect for corporate tax years commencing on or after October 1, 1986. The revenue raised by this tax shall be applied to reduce the federal deficit.

Mr. BOREN. Mr. President, this particular amendment which is to the bill directs the Finance Committee to report an alternative corporate minimum tax no later than July 1, 1986. This tax would take effect on October 1, 1986 and it would apply to corporate taxpayers beginning on or after October 1, 1986. It also provides further that revenues raised from the alternative corporate minimum tax would be applied toward reduction of the deficit.

Mr. President, I think all of us are aware that we are dealing with a very important proposal to reduce the deficit. It is a proposal which I embrace enthusiastically. It is time for us to

have across-the-board sacrifice to bring down the deficits which are facing this country.

Mr. President, while there is a sufficient number of Senators on the floor, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BOREN. Mr. President, it is important that all of us do our part to bring down these budget deficits. I will not repeat remarks I made last week on the Senate floor, but I am convinced that our economy stands on the edge of a cliff. Massive damage has already been done to the economy by the huge Federal budget deficits.

We are acutely aware of it in areas like my home State where agriculture has been decimated by the overvalued dollar brought about by our high budget deficits. Our manufacturing sectors, which depend upon exports, have had to lay off hundreds of thousands of workers already across the country. And sadly, many of these companies may find themselves in a situation where they can never recover to again be an important factor in terms of international competition to contribute to the standard of living of the American people.

So it is fair for us to ask an across-the-board sacrifice in order to reduce these deficits. The main thrust of the amendment that has been referred to as the Gramm amendment, which I am proud to cosponsor, does exactly that. However, we should ask ourselves this question: When we have some of the largest corporations in this Nation with huge profits paying no taxes at all, how can we justify setting in place a mechanism which will require across-the-board cuts of other programs and benefits for those who in many cases are least able to absorb those cuts, when we allow to stand in place a tax system which imposes no tax burden at all on some of those who are most able to pay?

I quote from an article which appeared in the Washington Post on August 30 of this year by Dale Russakoff. It is headed, "Fifty Major Firms Paid No Income Tax From 1980 to 1984." The subheading says, "Forty-eight had refunds totaling nearly $2.4 billion, the study showed."

I read for the benefit of my colleagues—and I think these are facts and figures that are well known by the Members of this body and they are well known by the American people. That is why, when those on both sides of the aisle go out to the public and talk about the unfairness of the Tax Code and the need to make changes in it, there is the positive response on the part of the people, because the average working men and women in this country, who struggle to pay their fair share of the taxes due, at great personal sacrifice, are well aware that some of the most profitable corporations in the country are paying nothing at all.

Let me read the first couple of paragraphs. "Fifty of the Nation's largest corporations with combined profits of more than $56 billion paid no net Federal tax from 1981 to 1984 and 48 had enough extra tax breaks to receive refunds totaling almost $2.4 billion, according to a new study. The study by Citizens for Tax Justice found that among major corporations those most often escaping tax liability included large defense corporations, Boeing Co., General Dynamics, Northrop Corp.," and others.

I will go down the list from a chart that appeared in the Washington Post at that same time and cite a few examples. And again I am citing the figures that were presented in the Washington Post using the Citizens for Tax Justice as the source of that newspaper article.

The Boeing Co., from 1981 to 1984, had $2.99 billion in profits. They paid no tax. They received $285 million in refunds; the Dow Chemical Co., $972 million in profits, a tax refund, not a tax paid but a tax refund, of $180 million; ITT, $815 million in profits, $177.7 million in refunds; General Electric Corp.—and this is indeed staggering—$9.577 billion in profits, no taxes paid—in fact, a refund of $98 million. We could go down the list and name others—General Dynamics, $1,579.5 billion; $5 million in profits, a refund of $103.8 million. There are others.

Mr. President, how in the world can we ask others in the American public to make sacrifice, the sacrifices that will be required of all of us, to reduce these budget deficits until we make sure that all are making a fair contribution? I am not against tax incentives. As a member of the Finance Committee, having looked at the Tax Code since I came to this body 7 years ago, I realize that tax incentives, tax credits, tax deductions can be valuable tools for bringing about a desired result.

We want to encourage domestic energy production, for example, and energy independence. There are incentives that are necessary if we do that. Those incentives are good and they are valid. We want to encourage people to make charitable contributions and support worthwhile public endeavors, and it is good that we have deductions that encourage people to make those charitable contributions. We want to see the cities of this country rebuilt so that they are more livable with adequate housing for all of our people, and I for one am glad that we put incentives in the Tax Code for the private sector to do that, for the private sector to rehabilitate historic buildings, for example, instead of creating huge bureaucracies at HUD or someplace else to do the job at greater cost and far less effective than can be done by the private sector.

So I am not among those who believe it is wrong to have incentives in the Tax Code. In fact, I am very disturbed by some of the proposals made by the Treasury Department and the administration to remove some of the most valuable incentives in the Tax Code with the kinds of economic activities that we need. We need savings. We need capital formation. We need investment. Those things should be encouraged by the tax credit.

On the other hand, while there is a legitimate place for deductions and incentives and tax credits, we must also be careful that we maintain fairness and balance in the tax system; that when, through some odd combination of forces, these incentives and credits and deductions come together in a way that allows a very profitable corporation to avoid paying any tax whatsoever, that strikes at the very basic concept of fairness in our Tax Code.

It also undermines the support of the public for the Tax Code which brings about voluntary compliance. We must have a Tax Code that is fair and it is perceived as being fair by the American people, so that they will continue to comply with it voluntarily. If the code is viewed by the public as being unfair to the degree that they no longer voluntarily comply with it, there are not enough inspectors, auditors, or law-enforcement personnel to make certain that the taxes due and owing will be paid.

When he introduced a proposal for a minimum tax earlier this year, Senator BENTSEN said that we cannot have a situation in which a person who waxes the floors at large corporate offices pays more tax to support the vital services, national defense, education, and other programs of this country than does the corporation for which that person works, at perhaps a meager salary, a corporation that may be reaping billions of dollars of profit without paying any tax at all.

So I believe that the time has come for us to act on the deficit. The time has come for us to adopt a proposal like the Gramm proposal, which will require an across-the-board sacrifice.

At the same time, I believe that the American people will be much more willing to make that sacrifice if they know that those who have made billions of dollars of profit, while escaping paying any tax at all, are going to be asked to step up to the plate first.

I think this is a fair way to move forward on this proposal. I hope we will have an overwhelming vote for it, so that the Finance Committee will receive this instruction by an overwhelming vote. I hope it will be a

unanimous vote, or nearly unanimous, so that we can get on with the work.

This is a reasonable time to vote. I have consulted with the chairman of the committee, and I think he agrees that we should be able to complete work on some kind of minimum tax proposal by the first of July. I could have said the first of January or the first of February, but I want to be realistic, because I want to see the Finance Committee approve a good bill, one which will be enacted by the Senate. So I want the committee to have time to deliberate on its contents.

Then I think it is imperative that, before we do anything else, we use the funds that are raised by this corporate minimum tax to apply to reduce the deficit in this country. That is why I have it targeted to take effect on the 1st of October 1986. That is when we will have the first deficit reduction automatic trigger under the Gramm amendment, if it is adopted.

The revenues we raise from the corporate minimum tax, we could say, would be applied at the front end of any deficit reduction, so that before we reduce deficits on the part of others—before we reduce vital programs in other areas, before we reduce the national defense effort—we will make certain that those corporations that are paying no tax will have paid their fair share.

I believe it is a balanced proposal. I hope my colleagues will join me in supporting it, and I hope the Senate, by an overwhelming majority, will go on record in instructing the Finance Committee to act on it with all deliberate speed.

Mr. President, I reserve the remainder of my time.

Mr. PACKWOOD. Mr. President, I congratulate my good friend from Oklahoma on offering the minimum tax amendment. It is one that I support.

About 2 months ago, when we were considering the budget resolution, we adopted a sense-of-the-Senate resolution calling upon the enactment of a minimum tax, both corporate and individual.

The minimum tax amendment of the Senator from Oklahoma applies only to corporations, and I hope we will adopt one.

I hope we will also adopt a minimum tax on individuals, so that not only corporations but also individuals who have profits or are wealthy will be paying some tax. We cannot have a situation any longer in which wealthy individuals or profitable corporations—through legal deductions, I might add—pay no tax.

When those stories come out about General Electric or General Dynamics paying no taxes, or millionaires paying no taxes, the public is convinced that the tax code is unfair.

So we will pass a minimum tax, but let everyone understand some of the problems we may face in doing it, in terms of what some people might call fairness.

Let us take General Electric—although I know that since we have abolished safe harbor leasing, they are paying taxes. How did General Electric get to a place where it paid no tax? What it did was to take advantage of the laws that Congress had enacted—legally. They basically did it through the investment of tax credits in the following manner:

We passed a law in 1981 that said that you may buy a machine and get a 10-percent tax credit. The business pays $1,000 for a machine and gets a $100 tax credit.

That tax credit is money that you can offset against taxes that you owe. So you buy the machine for $1,000 and get a 10-percent tax credit. If you owe $400 in taxes, you pay only $300. That tax credit, however, is for a company that makes no profit, and therefore owes no taxes, because the tax credit can only be deducted from taxes owed.

Let us assume that corporation X buys a machine for $1,000. It has its $100, 10 percent tax credit. It has done what we wanted the company to do. We wanted them to purchase machines, to invest, to become more productive. But, for whatever reason, company X is losing money and pays no tax; and the tax credit, therefore, is worthless to the company.

Along comes General Electric and says to company X: "We will make a deal. We will buy from you the machine for which you have paid $1,000." In the purchasing of it from the company, General Electric gets the 10-percent tax credit that goes with the machine. In essence they have bought the credit. There is nothing illegal about that.

General Electric then leases the machine back to company X. The machine never leaves the property of company X. It is a paper transaction. They buy the machine for slightly less than the machine was worth, but they give company X money which that company would otherwise not have, and General Electric now has a $100 tax credit, which it would not have had, and they offset it against taxes they owe.

What they simply did was to buy enough of these machines from enough companies and leased them back, all over this country, so that they had more credits that they owed tax, and they deducted the credits from the tax, along with other deductions they had, unrelated to this. Not only did they not pay taxes; they got money back.

The same thing could happen with individuals. We think that all wealthy individuals should pay some tax. But one of the provisions in the law is that if you buy municipal bonds, school district bonds, Oklahoma bonds, Butte, MT, bonds, the interest on those bonds is not taxable to the individual who buy them. We do this so that school districts, highway districts, park districts, and other municipal governments can sell their bonds for a slightly lower rate of interest than they would have to sell them if those who purchased the bonds had to be taxed on the interest.

They can sell their bonds perhaps on the average at 3 percent or 2.5 percent less than they would otherwise have to pay if the bond interest were taxed.

Now the higher the interest the higher the real property taxes are to pay off the bonds of local school districts.

We have thought for years it was a good policy to not tax the interest on municipal bonds, local schools bonds, city bonds, so they could be sold for this lower rate of interest. But what that does mean, however, is that some wealthy individuals in this country get most or all of their income by purchasing municipal bonds and the interest is not taxable, so they may be very, very wealthy, they may have hundreds of thousands of dollars in interest income from municipal bonds but by law it is tax exempt because we thought the policy was a good policy to make it tax exempt so the bonds brought a lower rate of interest and the property taxes stayed down.

If we are going to require that General Electric and the wealthy individuals pay tax—and I think we should—what we are going to have to say is no matter what deductions you take, no matter what credits you take, no matter that you got interest from municipal bonds that is tax free, no matter what kind of a gift you have given to Yale University, no matter what charities you donated to, no matter all these deductions add up to having no taxable income and you have done good civic things that we want to encourage, no matter that you bought machines from a failing company and have given them cash so they can keep going and take their credit against your income tax, no matter that you did what the law said we wanted you to do, we are still going to tax you. It does not matter that all your credits add up to more than your tax, we are still going to tax you.

That is the dilemma we face. We encourage people to do things. They go out and do things and we say, "Just because you did the things we wanted you to do, we are now going to tax you," even though the things that they did led to no tax.

But I come back again to the perception of fairness. If the public does not perceive the Tax Code as fair, then that does not bode well for this country or for this Congress. Consequently,

we will enact a minimum tax taxing corporations, taxing wealthy individuals, and somehow requiring that they must pay some tax, no matter how legitimate their deductions, no matter how worthy the social purposes that they support, because we cannot have those stories appear somehow they have evaded, avoided taxation because the impression given is that they have done it immorally, unethically, illegally. They have not. They have undertaken deliberate actions which the tax law encouraged them to undertake.

So there is a down side. But I think on balance it is more important that they pay some tax no matter how honest, legitimate, decent their deductions may be than they pay no tax and the public thinks that the Tax Code is unfair or immoral or unethical.

I am delighted to support the Senator from Oklahoma. I hope that he will get a unanimous vote when we have the yeas and nays on his amendment.

Mr. President, I yield the floor.

Mr. MOYNIHAN. Mr. President, will the distinguished chairman yield for a question?

Mr. PACKWOOD. I will.

First, may I ask what the time situation is?

The PRESIDING OFFICER. The Senator from Oregon has 11 minutes and 17 seconds.

Mr. PACKWOOD. And the Senator from Oklahoma has how much?

The PRESIDING OFFICER. The Senator from Oklahoma has 6½ minutes.

Mr. PACKWOOD. I have how much?

The PRESIDING OFFICER. Eleven and a half minutes.

Mr. PACKWOOD. I am happy to yield to the Senator from New York.

Mr. MOYNIHAN. Mr. President, just for the record, the distinguished chairman of the Finance Committee is aware that in April I introduced for myself and Mr. CHAFEE a minimum tax for both individuals and corporations. This minimum tax bill is conceptually different from the current law minimum tax for individuals where you start with adjusted gross income and add back so-called tax preference items.

I understand that the chairman expects to hold hearings on this legislation.

Mr. PACKWOOD. I expect to hold hearings on this whether or not we have a tax reform bill this year. I hope we have one. But I do not know if we are going to have one. But I think frankly we should have a minimum tax whether or not we have an overall tax reform bill.

Mr. MOYNIHAN. The Senator does recall that in the previous Congress I had a comparable measure which lost by only a vote of 10 to 9 in our committee. Our committee has shown itself disposed to adopt something like this.

Mr. PACKWOOD. I might say to my good friend from New York there is a hearing in the Finance Committee, and the subject of a minimum tax is one of the items for the hearing.

Mr. MOYNIHAN. As usual, the chairman is well up on the calendar and I shall be there. I thank him for his comments.

Mr. PACKWOOD. I thank my good friend from New York.

I yield the floor.

Mr. MELCHER. Mr. President, will the Senator from Oklahoma yield to me?

Mr. BOREN. I will yield to the Senator. But the Senator from Arkansas asked that I yield. I only have 6 minutes remaining.

Mr. MOYNIHAN. Mr. President, will the Senator yield 1 minute to the Senator from New York?

Mr. BOREN. Mr. President, I yield 2 minutes to the Senator from Montana, 1 minute to the Senator from New York, 2 minutes to the Senator from Arkansas, and then I reserve 1 minute at the end.

Mr. MELCHER. I thank my good friend from Oklahoma for yielding to me.

Mr. President, naturally, this amendment should pass by unanimous vote. Instructing the committee is a fine idea. But perhaps a more pertinent point can be addressed later.

I wish to offer an amendment that would just tax corporations that are profitable, making good money, and start collecting the revenue.

I guess I could read from the RECORD of the past several days describing how serious the situation is and how necessary it is to start getting some money in the till to start offsetting the deficit.

This is one area where I do not think we should be hung up on. We should start collection of that revenue immediately.

I do not want to impose a burden on those basic industries that are already hampered by going close to liquidation. But I do want to address the problem of those corporations that are in the black, making outstanding profits, and do escape paying any Federal income tax. Mostly it is in accelerated depreciation allowances and in the investment tax credit.

My amendment later on, if I am recognized and would be able to offer it, would place that minimum tax on those exemptions immediately. If they are going to take the exemption, they are still going to have to pay the 20-percent tax. I think that is reasonable.

I agree with what is going on here. I do not think it really addresses the problem of the immediate deficit reduction.

The PRESIDING OFFICER. The Senator has used his 2 minutes.

Mr. MOYNIHAN. Mr. President, in the 1 minute I have, I wish to ask a question of my distinguished friend from Oklahoma and fellow member of the Finance Committee. His amendment here calls for "legislation providing for payment of an alternative minimum corporate tax by corporations on the broadest feasible definition of income.". . .

Could I ask him, does his term "broadest feasible definition of income" extend to intangible drilling costs in the petroleum industry?

Mr. BOREN. Yes.

Mr. President, the Senator from New York read the proposal I filed on last week and had printed in the RECORD which was at my suggestion the kind of proposal that we might adopt and it did include, indeed, that particular item of preference, and I propose treating it the same way that we do under the minimum tax on individuals which is now in effect. It is very similar to the way that the Senator from Texas [Mr. BENTSEN] treated it and others. So it would include all of those.

Mr. MOYNIHAN. And for individuals as well?

Mr. BOREN. Yes.

Mr. MOYNIHAN. I thank the Senator.

Mr. BUMPERS. Mr. President, let me quote now from a study of the citizens for Tax Justice entitled "Corporate Taxpayers and Corporate Freeloaders." On page 2 it says:

"According to the federal corporate tax code, large corporations supposedly are subject to a 46 percent tax rate on their pretax profits. For most of the 275 major, profitable corporations whose annual reports we examined, however, this was decidely not the case. In fact, 129 of the companies—or almost half—managed to pay absolutely nothing in federal income taxes, or to receive outright tax rebates, in at least one of the four years from 1981 to 1984.

These 129 companies earned $66.5 billion in pretax domestic profits in the years they did not pay federal income taxes. But instead of paying $30.6 billion in income taxes, as the 46% statutory corporate tax rate supposedly requires, they received $6.4 billion in tax rebates—for a "negative" tax rate of 9.6%."

Mr. President, there are many interesting statistics in this study.

I ask unanimous consent to have printed in the RECORD pages 2 down through the top of page 9.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CORPORATE TAXPAYERS AND CORPORATE FREELOADERS (CITIZENS FOR TAX JUSTICE (AUGUST 1985))

I. COMPANIES THAT DON'T PAY TAXES—AND SOME THAT DO

According to the federal corporate tax code, large corporations supposedly are subject to a 46 percent tax rate on their pretax profits. For most of the 275 major, profitable corporations whose annual reports we

examined, however, this was decidedly not the case. In fact, 129 of the companies—or almost half—managed to pay absolutely nothing in federal income taxes, or to receive outright tax rebates, in at least one of the four years from 1981 to 1984.

These 129 companies earned $66.5 billion in pretax domestic profits in the years they did not pay federal income taxes. But instead of paying $30.6 billion in income taxes, as the 46% statutory corporate tax rate supposedly requires, they received $6.4 billion in tax rebates—for a "negative" tax rate of −9.6%.

Of this group of 129 companies:

74 companies had at least two years of paying nothing or less in federal income taxes;

26 companies paid nothing or less in at least three of the four years; and

9 particularly imaginative and aggressive corporate tax avoiders—Boeing Co., ITT, General Dynamics, Transamerica Corp., First Executive Corp., Mitchell Energy & Development Corp., Greyhound Corp., Grumman Corp., and Lockheed—successfully zeroed-out or received outright tax rebates in every single one of the four years we examined.

PROFITS AND TAX REFUNDS FOR COMPANIES PAYING ZERO OR LESS IN FEDERAL INCOME TAXES IN AT LEAST ONE YEAR, 1981 THROUGH 1984

[Based on a sample of 275 major corporations]

[Dollars in millions]

Year	No.	Percent of cos.	Profits	Refunds	Rate (percent)
1984	40	14.5	$10,422.6	($657.4)	−6.3
1983	60	21.8	14,219.7	(1,099.6)	−7.7
1982	84	30.5	27,361.5	(2,784.3)	−10.2
1981	53	19.3	14,490.2	(1,859.0)	−12.8
Totals [1]	129	46.9	66,494.0	(6,400.3)	−9.6

[1] Not counting repeats.

The economic rebound—and sharp rise in corporate profits—in 1984 did not curtail this widespread corporate tax avoidance. In 1984 alone, 40 of the 275 highly profitable corporations either received federal income tax rebates or paid no federal income tax.

In 1984, despite profits totalling more than $10 billion, these 40 companies received net federal income tax rebates of $657 million. AT&T led the way in 1984, with an amazing $241.6 million in tax refunds, on top of its $1.9 billion in pretax profits in the United States.

COMPANIES PAYING NO TAXES—OR LESS—OVER THE FULL FOUR YEAR PERIOD

Totalling up taxes and rebates for the full four years, we found that fifty of the 275 companies paid an overall total of nothing or less in federal income taxes over the entire 1981–84 period. Despite $56.8 billion in pretax domestic profits, these 50 companies received net tax rebates totalling $2.4 billion.

This select group of 50 highly profitable corporations, includes seven companies that enjoyed net tax rebates over the four year period in excess of $100 million each. Sitting at the top of the heap—the champion at making money off the tax system over the past four years—is Boeing Co. Despite profits in excess of $2 billion. Boeing managed to generate income tax refunds from the federal government totalling $285 million between 1981 and 1984.

Joining Boeing in receiving net tax rebates of more than $100 million over the 1981–84 period were: Dow Chemical Co. ($180 million in net refunds); ITT ($177 million in net refunds); Tenneco ($166 million in net refunds); Pepsico ($135.8 million in net refunds); Santa Fe Southern Pacific Corp. ($133.4 million in net refunds and proceeds from selling tax breaks); and General Dynamics ($103.8 million in net refunds and sales of tax credits).

General Electric, the refund champion from 1981 through 1983, actually paid a small amount in federal income taxes in 1984. For the first time in four years, GE sent a check to the federal Treasury, rather than the other way around. On 1984 profits of more than $3 billion, GE paid 1984 federal income taxes of $185 million. That works out to an effective tax rate of 6.1% in 1984—or just about half the federal income tax rate paid by the average American family.

For the full 1981–84 period, however, GE maintained its net position as a non-taxpayer. For the four years, GE's total refunds—net of the amount it paid in taxes in 1984—amounted to $98 million—despite pretax domestic profits of $9.5 billion.

Thus, GE remains King of the Hill in one important respect: From 1981 to 1984, no other corporation managed to avoid paying any net federal income taxes on so large a pretax profit.

Altogether, the ten companies with the largest net tax rebates over the 1981–84 period earned $25.1 billion before federal income taxes, and another $1.4 billion after-tax!

TEN CORPORATIONS WITH THE LARGEST TOTAL TAX REBATES, FROM 1981 THROUGH 1984

[Dollars in millions]

Company	1981–84		
	Profit	Tax rebate	Rate (percent)
Boeing Co	$2099.0	($285.0)	−13.6
Dow Chemical Co	972.0	(180.0)	−18.5
ITT	815.0	(177.7)	−21.8
Tenneco	3,401.0	(166.0)	−4.9
Pepsico	1,798.7	(135.8)	−7.6
Santa Fe Southern Pacific Corp.	2,309.0	(133.4)	−5.8
General Dynamics	1,579.5	(103.8)	−6.6
General Electric	9,577.0	(98.0)	−1.0
Transamerica Corp	748.6	(93.6)	−12.5
Totals, 10 biggest rebates	$25,118.8	($1,441.3)	−5.7

EFFECTIVE TAX RATES FOR ALL 275 COMPANIES

For all 275 companies studied, the overall four-year effective was only 15 percent, less than one-third of the 46 percent tax rate that the tax code purportedly requires major corporations to pay. Had these 275 companies paid the full 46% rate on their $400.6 billion in 1981–84 profits, their taxes would have totalled $184.3 billion—or $124 billion more than they actually paid.

● In 1984, the most recent year, the overall effective rate for the 275 companies was just 16.6 percent. In that year alone, the 275 corporations voided a total of $31.8 billion in federal income taxes through various special tax preferences.

1981–84 Overall effective tax rates for 275 major corporations

Year	*Effective Rate (percent)*
1981	16.5
1982	11.8
1983	14.9
1984	16.6
Total	15.0

A full 126 of the 275 companies we surveyed paid an effective tax rate of less than 12 percent during President Reagan's first term in office—a percentage that is less than the effective tax rate paid by the average individual taxpayer.

275 MAJOR CORPORATIONS BY EFFECTIVE TAX RATE CLASS, 1981–84

[Dollars in millions]

1981–84 effective tax rate class	No. of cos.	Percent of total	Pretax profits	Fed. income taxes	Effective tax rate (percent)
Zero or less percent:	50	18.2	$56,789.7	($2,392.4)	−4.2
0.1 to 12	76	27.6	119,623.4	4,733.1	4.0
12.1 to 20	44	16.0	53,771.9	8,371.7	15.6
20.1 to 30	52	18.9	102,565.3	25,367.2	24.7
30.1 to 40	44	16.0	60,054.9	20,948.6	34.9
Over 40	9	3.3	7,740.9	3,237.6	41.8
Total	275	100.0	400,546.1	60,265.7	15.0

MAJOR DEFENSE CONTRACTORS

Americans rightfully complain when they see their tax dollars going to pay for what appear to be rip-offs by the defense industry. But the tax avoidance engaged in by most of the country's largest defense contractors imposes similar costs on average taxpayers. The nation's top 12 defense contractors [1]—whose profits have boomed as a result of the rapid arms build-up over the past four years—paid a total of only 6.3% of their profits in federal income taxes over the 1981–84 period—on domestic profits totalling $27.7 billion.

Five of these companies—General Dynamics, General Electric, Lockheed, Boeing, and Grumman—paid nothing at all or received outright refunds. Another three—McDonnell Douglas Corp., Martin Marietta, and Westinghouse Electric Corp.—enjoyed effective tax rates of less than one percent.

TAXES PAID BY THE NATION'S TOP TWELVE DEFENSE CONTRACTORS 1981–84

Company	1981–84		
	Profit	Tax	Rate (percent)
Rockwell International	$2,346.9	$423.5	18.0
McDonnell Douglas Corp	1,424.2	5.1	0.4
General Dynamics	1,579.5	(103.8)	−6.6
General Electric	9,577.0	(98.0)	−1.0
Lockheed Corp	1,670.9	0.0	0.0
Boeing Co	2,099.0	(285.0)	−13.6
Martin Marietta Corp	791.1	4.6	0.6
United Technologies	2,117.3	532.4	25.1
Raytheon Co	1,908.2	781.7	41.0
Westinghouse Electric Corp	1,989.2	10.3	0.5
Grumman Corp	653.4	0.0	0.0
Litton Industries	1,583.9	476.9	30.1
Totals	27,740.6	1,747.7	6.3

W.R. GRACE & CO.

One of the low tax companies in our study was W.R. Grace & Co., whose $14.3 million in income taxes in 1984 brought its total payments over the four years—net of the $53.2 million the company received in 1982 in a sale of tax benefits—to $1.6 million, or 0.2% of Grace's $802.7 million in domestic profits.

[1] Actually, the top 8 defense contractors, plus those ranked 10 through 13. Hughes Aircraft, the number nine defense contractor, was privately held during the 1981–84 period. (Hughes was recently acquired by General Motors Corp.) The companies in the table are listed by the size of their defense contracting in fiscal 1984.

Some may wonder how W.R. Grace & Co. can justify such tax-avoidance activities, in light of the "Grace Commission's" much-publicized concerns about the federal budget deficit. The answer, according to J. Peter Grace, Chairman of W.R. Grace & Co. and head of the Grace Commission, is quite straight-forward: The company's nationwide advertisements in which Grace complains about "annual federal deficits approaching $200 billion" and the burden they will create for our children,[2] simply are not an accurate reflection of Grace's position. "We are not concerned about the deficit," wrote J. Peter Grace in response to an inquiry about the company's low tax bills. "We are concerned about the level of spending."

THE GROWTH IN CORPORATE "TAX EXPENDITURES"

The statistics summarized above and the tables that follow later in this report document how widespread and massive corporate tax avoidance has become. Corporate "tax expenditures"—the federal government's official euphemism for loopholes—have grown from a mere $8.3 billion in 1970 to an estimated $119.9 billion in the upcoming fiscal year.

That $119.9 billion in corporate tax subsidies represents well over half the estimated federal budget deficit for fiscal 1986.

In fact, the corporate income tax is now more loophole than tax. The estimated cost of corporate tax breaks in fiscal 1986 amounts to $1.69 for every dollar corporations are expected to pay in federal income taxes.

The $119.9 billion cost of the loopholes adds up to $1,512 for every tax-paying family and single individual in America.

HIGH-TAX CORPORATIONS

Not all companies are good at the corporate tax avoidance game, however. One of the unfair aspects of our current tax system is the way it rewards some companies and penalizes others. While many companies get off scot-free, a few pay a great deal of tax. The shining array of tax breaks, credits, and preferences are not available to—or at least are not utilized by—all corporations.

Our survey found nine companies that paid 1981-84 effective tax rates of 40% or more on the earnings they reported to their shareholders in 1984. On profits of $7.7 billion over the four years, these nine companies paid taxes of more than $3.2 billion.

These nine patriotic corporations paid *more* in total federal income taxes on their $7.7 billion in profits over the four years than did the 126 companies paying less than 12 percent—despite the fact that the 126 low-tax companies earned $176.4 billion pretax profits!

The highest-taxed companies over the four years were VF Corporation and INTERCO, two textile firms that paid 44.7% and 43.7% of their profits in taxes, respectively, followed by Whirlpool Corp. (42.4%) and Ralston Purina Co. (42.1%).

The five other coporations in our study that paid more than 40 percent of the profits in taxes were: PACCAR (42%); Raytheon Co. (41%), Super Valu Stores (40.6%), McGraw-Hill (40.4%), and Brown-Forman Distillers Corp. (40.1%).

It is not at all clear, however, that these highly-taxed companies will remain so patriotic if current policy continues. Many highly-taxed corporations are in the process of revamping their tax strategies to join in the quest for loopholes.

For example, in CTJ's corporate tax study last year, we found that Whirlpool Corp. was the highest taxed corporation we examined over the 1981-83 period. Although Whirlpool remained one of the three highest taxed corporations over the 1981-84 period, it is moving energetically to change its high-tax status. In 1984, it cut its tax rate to 34.9%—down from 45.6% in 1981-83—by purchasing Michigan National Leasing Corp. and setting up a leasing subsidiary, Whirlpool Leasing Services, Inc. Leasing subsidiaries such as Whirlpool's are rapidly becoming a standard practice whereby corporations with a shortage of tax credits and write-offs acquire them from other firms that have an excess.

Whirlpool's entry into the tax shelter market was a direct—and discouraging—response to last year's CTJ corporate tax study. Whirlpool's management has admitted to being embarrassed by the company's "excessive" patriotism compared to competitors such as General Electric (which has been heavily involved in leasing tax shelters). "You'll see an increasing amount of leasing activity," Whirlpool's tax counsel told Craig Stock of Knight-Ridder Newspapers. "It's part of our strategic plan in terms of getting greater tax deferrals."

Similarly, from 1981 to 1983, Coca Cola Co. was—by current standards—a relatively high-tax company, paying 27.9% of its domestic profits in federal income taxes.

In comparison, over the same three years, its competitor, Pepsico, aggressively sought after tax shelters, and enjoyed $147.4 million in tax *refunds*—for a "negative" 1981-83 tax rate of −11.2%. But, unfortunately, in 1984 Coke became more like Pepsi—a change that may leave a flat taste in the mouths of taxpaying Coke drinkers. Last year, Coca Cola Co. managed to cut its tax rate to just 10.5% (while Pepsico's tax rate rose to 2.4%).

And still another example: In 1981, Sara Lee Corp. (then known as Consolidated Foods) paid 42.6% of its profits in federal income taxes. But then the company entered the tax leasing business, and cut its rate for 1982 through 1984 to a mere 5.1%.

Even as companies like Whirlpool and Sara Lee join in the tax-avoidance game, however, they concede that it is not particularly happy about it. "A lot of effort is being put into these special tax subsidies—a lot of wasted time and wasted administrative effort," says a Whirlpool executive.[3] And Sara Lee's Chairman, John H. Bryan Jr., despite his company's currently low taxes, has argued forcefully that the present system of corporate tax loopholes is "indefensible."

Mr. DECONCINI. Mr. President, the condition of the American tax system is critical. Our present system of preferences, deductions, allowances, and exemptions has gotten us to the point where many major American corporations pay no income tax. This is one of the many reasons why I have proposed a flat tax bill. However, I am a realist and am aware that my flat tax bill is not going to pass in the next few weeks or even the next few months. Therefore, I believe that we need to pass a minimum corporate tax, and this is the time and place to do that.

I recently did some research on the issue of those who pay no corporate income tax. Of the top 10 Department of Defense [DOD] contractors for whom data is available for tax year 1983, 5 paid no corporate income tax.

In 1983 General Dynamics received DOD contracts totaling $6.6 billion; they showed a profit that same year of $492.5 million but paid no dollars in corporate income tax to the Federal Government.

General Electric had $4.5 billion of DOD contracts in 1983; they had a profit of $2.4 billion, yet paid no dollars in corporate income tax.

Also in 1983, the Boeing Corp. received $4.4 billion in DOD contracts; their annual statement showed a profit of $475 million; they, too, paid no tax.

A pattern has begun to develop.

In 1983, Lockheed had DOD contracts totaling $4 billion, profits of $461.8 million, and paid no Federal corporate income tax.

And Grumman, receiving $2.3 billion in DOD contracts, showing profits of $182.7 million; also paid no corporate income tax.

Mr. President, this is incredible. Many of the same corporations that are building the systems to defend this country are not paying a cent to contribute to that defense.

But it is not just defense contractors who are getting away scot-free. According to the report prepared by Citizens for Tax Justice, 66 major American corporations paid no tax in 1983. In addition, many of these received a refund check from the Government. Additionally, according to a 1983 study by the Joint Committee on Taxation, certain industries pay an incredibly disproportionate share of their corporate income in Federal taxes. For example, in 1982 the computers and office equipment industry as an industry paid 26.4 percent income tax on U.S. income. At the same time according to study, the aerospace industry had a U.S. tax rate of −0.6 percent. This does not create a fair market atmosphere. Rather, it discriminates in favor of certain industries at the expense of others. This simply is not fair and needs to be corrected.

It is not fair to the rest of corporate America, most of whom do pay their fair share of taxes. It is not fair to the average American citizen who is paying a good bit of his income in taxes, and does not have and cannot afford fancy means of sheltering that income. It is not fair that some industries in America pay little or no tax while others pay extremely high taxes. Mr. President, all these things are not fair and I think the time has come to inject a little equity into the tax system.

I could continue a litany of the outrages present in the corporate income

[2] See, e.g., *Harper's*, June 1985.

[3] *See* C. Stock, "Whirlpool fights to shed high-tax tradition," *Detroit Free Press*, May 26, 1985, p. 13A.

tax system, but I will not take the Senate's time reciting more facts. Suffice it to say that a minimum corporate tax is long overdue and I urge my colleagues to support this amendment.

Mr. BOREN. Mr. President, how much time is remaining to the Senator from Oklahoma?

The PRESIDING OFFICER. One minute and 10 seconds.

Mr. BOREN. Mr. President, let me just conclude briefly. I think all of us know the arguments that are here to be made. This will give us a chance, prior to the first triggering under the Gramm amendment on October 1, 1986, to put a minimum corporate tax in place and to make sure that before we ask the rest of the American people to make the sacrifices necessary to bring down the budget deficits that, among others, we will have those 50 of the Nation's largest corporations who paid no tax at all on $56 billion worth of profits over the period from 1981 through 1984, we will make sure that they pay their fair share before we ask the rest of the American people, most of whom are already paying their share of taxes, to join in an effort to get the budget deficits reduced.

The PRESIDING OFFICER. Who yields time?

Mr. METZENBAUM. Mr. President, what is the time and who has how much time left?

The PRESIDING OFFICER. The Senator from Oklahoma has 10 seconds.

Mr. BOREN. I am happy to yield to the Senator from Ohio.

Mr. METZENBAUM. I just rise to say I support the concept of a minimum tax and I appreciate what my colleague is attempting to do. But, in all honesty, this is not a minimum tax. It will not go into effect this year and it does not provide the amount that should be provided. So I respect him for his efforts, but, having said that, I think if we pass it, it will indeed be nothing more than a nullity.

Mr. BUMPERS. Mr. President, does the Senator from Oregon have additional time?

The PRESIDING OFFICER. The Senator from Oregon has 9 minutes and 15 seconds.

Mr. BUMPERS. Will the Senator from Oregon yield 30 seconds to me?

Mr. PACKWOOD. I am happy to yield to my colleague from Arkansas.

Mr. BUMPERS. Mr. President, I just want to emphasize that every one of these corporations is not only legitimate, they are an indispensible part of the economy of this country. They are not doing anything illegal in claiming tax preferences. They are simply taking advantage of all the deductions and tax credits and loopholes that are available to them under the tax laws.

In 1981, when we cut corporate and personal taxes by $653 billion over a 5-year period, I said two things: No. 1, we are going to create deficits that will choke a mule, which we have done. I was one of the 11 Senators who voted "no" and immediately I received 500 hostile letters a day from then on. No. 2, in addition to creating huge deficits, I said any corporation in this country that pays taxes after 1981 ought to fire its accountant.

Mr. PACKWOOD. Mr. President, I am prepared to yield back the time on this side. I understand the time on the other side is gone. We are ready to vote.

The PRESIDING OFFICER. All time is yielded back. The question is on agreeing to the amendment of the Senator from Oklahoma [Mr. BOREN]. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maryland [Mr. MATHIAS] is necessarily absent.

The PRESIDING OFFICER [Mr. GORTON]. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 88, nays 11, as follows:

[Rollcall Vote No. 205 Leg.]

YEAS—88

Abdnor	Garn	Mitchell
Andrews	Glenn	Moynihan
Armstrong	Goldwater	Murkowski
Baucus	Gore	Nickles
Bentsen	Gorton	Nunn

East	Humphrey	Symms
Gramm	Laxalt	Wallop
Hecht	Lugar	

NOT VOTING—1

Mathias

So the amendment (No. 739) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BOREN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DOLE. Mr. President, first, let me yield to the distinguished senior Senator from North Carolina.

Mr. HELMS. Mr. President, I thank the distinguished majority leader.

Mr. President, I simply want to note the presence in the Chamber of the finest colleague a Senator could ever have, my colleague from North Carolina, Senator EAST.

[Applause, Senators rising.]

Mr. HELMS. Mr. President, that applause says it all. I thank the leader.

Mr. DOLE. Mr. President, I thank the distinguished Senator from North Carolina. Obviously, we are pleased to have Senator EAST back.

We have a number of votes, JOHN, that you can participate in.

Mr. DOLE. Mr. President, let me indicate to my colleagues what we would like to do this evening. We have an amendment now, a Pressler amendment, which I understand is a sense-of-the-Senate amendment to the Gramm-Rudman-Hollings amendment. It is my understanding that the authors have cleared the Pressler amendment. The Senator from Michigan has an amendment which has been cleared, and the Senator from Florida [Mrs. HAWKINS]. We can complete action on those in short order. Then the Exon amendment, which will require a rollcall. It will take a full hour, I guess. So there will be a little bit of an opportunity for people to do whatever they have a commitment for away from the Capitol.

The next order of business would be the Dodd-Kerry amendment if that is to be offered. Then, according to the wishes of the distinguished minority leader, if he could lay down the Democratic leadership amendment, we could have some debate on that.

I think we can dispose of all these amendments that are pending. There is also a Melcher amendment on the minimum tax. I assume that will take a rollcall. So there are probably a couple of rollcalls out of these six, then lay down the leadership amendment and, hopefully, dispose of that tomorrow morning or not later than 1 p.m.

Then there are a number of other amendments that would come after disposition of the Gramm-Rudman-Hollings amendment.

I hope we can reduce the number of amendments. There may be another minimum tax amendment. We just had one, we are going to have another. It seems that two ought to be enough. I hope at that point we would be able to table all the amendments that are duplications.

Mr. President, if there is no objection, I ask unanimous consent as I did earlier that the distinguished Senator from South Dakota [Mr. PRESSLER] be recognized to offer an amendment, that there be 40 minutes of debate

equally divided, and that no amendment be in order.

Mr. HART. If the distinguished majority leader will permit me, I am sure the majority leader did not mean duplicitous.

Mr. DOLE. Duplicative, yes. We will table the others.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 741

The PRESIDING OFFICER. The Senator from South Dakota is recognized.

Mr. PRESSLER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Dakota [Mr. PRESSLER] proposes an amendment numbered 741:

It is the sense of the Senate that any funding reductions or sequestering of controllable expenditures implemented by the various Federal agencies as a result of this act shall be made uniformly and shall not disproportionately be made in the funding of programs targeted for rural and less populated areas.

Mr. PRESSLER. Mr. President, I shall very briefly explain this amendment. I shall not seek a rollcall vote, since both sides appear to have agreed to it.

I am introducing this amendment today which will help to insure that any funding reductions or sequestering of controllable expenditures implemented as a result of the act shall not force programs serving rural and less populated areas of our country to absorb an unfair amount of these cuts.

This is not to say that I do not support attempts to balance the Federal budget. I most certainly do.

I add, Mr. President, that I have kept my voting within a balanced budget during my time in the Congress. I am also not saying that rural and less populated areas should receive more than their fair share. Almost without exception, individuals in my State with whom I have spoken are not looking for special treatment. They are perfectly willing to accept cuts as long as everyone in every economic category and every geographic area share equally in the burden.

Under the deficit reduction plans being discussed, any budget cuts will likely be made by a uniform percentage in an across-the-board fashion. However, this simply applies to each major line item of the budget. After the uniform cuts are made, it will be the responsibility of the various Federal agencies to decide how the mandated savings will be achieved within their particular programs.

Certainly we hope that these agency level cuts would also be made uniformly and fairly. I think that is part of the intent of this body. I think that most Members, on both sides of the aisle, desire this end. However, after 11 years in Congress, I have seen too many instances where agencies miss the intent of Congress in the implementation of legislation unless it is clearly defined.

I am greatly concerned that while the line-item cuts made by the President and Congress will be made uniformly across the board, the bureaucrats who decide where the program cuts are to be made within each line item may have the propensity to find an easy target in the funding of programs which benefit the less populated areas with less voting power.

My amendment is designed to establish a legislative history which will prevent this from happening. I support efforts to bring an end to our budget deficit. However, it must be done in a fair manner. My amendment does not change the scope of our efforts. It merely extends our intent throughout the entire process.

Mr. GRAMM. Will the distinguished Senator yield?

The PRESIDING OFFICER. The Senate is not in order.

Mr. GRAMM. Mr. President, let me say to my distinguished colleague——

The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from Texas?

Mr. PRESSLER. I yield to my colleague from Texas.

Mr. GRAMM. Let me say on behalf of the cosponsors of this amendment, the amendment that is currently the vehicle of debate, that we are happy to accept this amendment. I think it sets out as the sense of the Senate what is the intention of this bill. That is that reductions be across the board within the accounts set out in the appropriations process in the Congress.

I think this amendment is helpful in clarifying the intent of the bill and as the sense of the Senate, I strongly support it. I thank my colleague for yielding and for the amendment.

Mr. PRESSLER. Mr. President, I move the adoption of my amendment.

The PRESIDING OFFICER. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment of the Senator from South Dakota.

The amendment (No. 741) was agreed to.

Mr. DOLE. I move to reconsider the vote by which the amendment was agreed to.

Mr. PRESSLER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, under my rotation plan, the next amendment would be on the Democratic side. I have discussed this with the distinguished Senator from Michigan. The authors of the Gramm-Rudman-Hollings amendment are ready to accept it, but it is my understanding that the amendment is not drafted.

Mr. LEVIN. There is one additional question we are trying to resolve. I also promised Senator RUDMAN that he could be on the floor, that he would have enough notice. He is off the floor at the moment. I also promised Senator GRAMM some kind of notice so he could be here.

The technical change we are working on, Mr. President, we think can be done in 4 or 5 minutes, so I hope, if Senator GRAMM and Senator RUDMAN hear us at this point, they will have that alert. I shall be ready to go as soon as the technical changes are made.

Mr. DOLE. I am ready, if it is satisfactory with the distinguished Senator from Michigan, to move on to other amendments that we think are acceptable to the authors of the Gramm-Rudman-Hollings amendment. They are the ones who would be most involved. That is the amendment of the distinguished Senator from Florida [Mrs. HAWKINS]. Then we shall come back to Senator LEVIN's amendment.

Mr. DOLE. Mr. President, I ask unanimous consent that the Senator from Florida (Mrs. HAWKINS) be permitted to offer an amendment, that there be 40 minutes on the amendment, 20 minutes to a side, and that no amendments to it be in order.

The PRESIDING OFFICER. Is there objection?

Mr. CHILES. I object, Mr. President. I not only object to the time agreement; I have not seen the amendment.

Mr. DOLE. It is an amendment to the Gramm amendment.

Mr. CHILES. A time agreement binds all of us, does it not, Mr. President? It has been modified a number of times and I guess it can be modified again. It seems if we are to enter into time agreements, we should have a chance to look at the amendments. I thought that was our deal yesterday.

Mr. DOLE. As I understand it, we agreed to accept a number of modifications offered primarily by Senators on that side; by modification, instead of modifying them, they wanted to offer them on the floor. That was the agreement with the distinguished Senator from Michigan.

Mr. CHILES. It was made very clear to Senator DOMENICI and others that we wanted to look at any agreement before we agreed on a time limitation.

Mr. DOLE. Mr. President, I shall not make the unanimous-consent request on time, but I ask unanimous consent that the Senator be permitted to offer the amendment.

Mr. CHILES. I object to that. I have not seen the amendment.

Mr. DOLE. Mr. President, while the distinguished Budget chairman is on the floor, there is some question about the amendment that was to be offered by the distinguished Senator from Florida (Mrs. HAWKINS).

Mr. CHILES. I withdraw my objection to the introduction. We have had a chance to look at it. Some people over here might want—I do not know about a time agreement. I will leave that to my colleagues, but I withdraw my objection.

Mr. DOLE. Let me then get consent that the amendment may be offered without a time agreement and there be no amendment in order to the amendment.

The PRESIDING OFFICER. Is there objection? The Chairman hears none, and it is so ordered.

Mr. DOLE. Mr. President, let me address a question to the distinguished chairman of the Budget Committee. I am not fully conversant with the amendment. As I understand, it was in the original Gramm-Rudman-Hollings proposal, and then in the modification it was removed. What this amendment will do is put it back. It is an amendment in the third degree to the pending Gramm-Rudman-Hollings-Boren proposal. Is that correct?

Mr. DOMENICI. The leader is correct. This amendment would with specificity say that any reconciliation bill containing provisions with respect to Social Security would be subject to a point of order. That is what this amendment does. The pending amendment does not have this point of order language. It has all the other language—that it is not on budget, not subject to sequestering. All this says is that inclusion in reconciliation is subject to a point of order.

Mr. METZENBAUM. Will the chairman of the Budget Committee yield for a question?

Mr. DOMENICI. Of course.

Mr. METZENBAUM. Am I not correct in my understanding that the Gramm-Rudman amendment now provides that it shall not be applicable to Social Security benefits and that Social Security benefits are excluded from the Gramm-Rudman amendment?

Mr. DOMENICI. That is correct.

Mr. DOLE. That is correct.

Mr. METZENBAUM. So that this amendment is in the nature of a bookkeeping entry or parliamentary procedure having to do with the raising of a parliamentary point of order. But on the substantive issue, on the matter of protecting the rights of Social Security recipients, that is already provided for as an exception to the Gramm-Rudman amendment.

Mr. DOMENICI. The Senator is absolutely correct.

Mr. METZENBAUM. I thank the Senator.

Mr. SARBANES. Mr. President, will the chairman of the committee yield for a question?

Mr. DOMENICI. I yield.

Mr. SARBANES. Was this provision included in an earlier version of the proposal of the distinguished Senator from New Hampshire and the Senator from Texas?

Mr. DOMENICI. The Senator is correct, it was.

Mr. SARBANES. And then it was removed, do I correctly understand?

Mr. DOMENICI. I do not know if it is removed or if it just is not in it. The point is that there is confusion about the point of order. That has been worked out, with the amendment to be offered by the distinguished junior Senator from Florida, making any reconciliation bill containing Social Security specifically subject to a point of order.

Mr. SARBANES. We have been assured by the sponsors of the Gramm-Rudman proposal that Social Security was exempted.

Mr. DOMENICI. It has always been exempted.

Mr. SARBANES. Is it exempted from the amendment now before us, to which this amendment is being added?

Mr. DOMENICI. It is. Indeed, the amendment to that extent is the same as is pending. All that is added here is that reconciliation is made subject specifically to a point of order.

Mr. SARBANES. So that this is not really an amendment of substance?

Mr. GRAMM. Mr. President, if the Senator will yield, it is an amendment of substance in the following sense: that we have put in the bill that Social Security is permanently taken off the budget and therefore cannot be part of any accounting so far as the budget is concerned in the President's submission and in the action of the Budget Committee.

However, the Senator from Florida wants to add an additional protection, an extraordinary protection, which would basically impose a point of order against any effort to use Social Security as part of the budget process. So it simply is an addition which adds an extra degree of protection by strengthening the rule.

It is substantive in that point of view, in that it carries out the will of the initial bill but does it with an initial hurdle.

Mr. SARBANES. As I understood it from the response earlier, a provision of this sort was included in the original proposal of the distinguished Senator from Texas. Is that correct?

Mr. GRAMM. I am sorry, I did not hear the Senator.

Mr. SARBANES. As I understood from a response given earlier, a proposition of this sort was included in the original proposal of the distinguished Senator from Texas. Is that correct?

Mr. GRAMM. The proposition was included in a draft. The proposition was not included in the amended version that is currently before this body.

Mr. SARBANES. I understand that. But in the prior version—

Mr. GRAMM. It has been discussed. It was discussed with the Senator from Florida. It was felt at one point that that was not necessary. She felt that it was, and her amendment, in essence, puts it in the bill.

Mr. SARBANES. The distinguished Senator from Texas has provided blanket assurances in discussing his amendment about Social Security, at the point when the distinguished Senator from Texas omitted this provision——

Mr. GRAMM. If the Senator will excuse me, we changed the amendment as part of the ongoing consideration. The amendment was modified.

We have had discussion of this bill over a 10-day period, and we have solicited opinions of majority and minority Members.

We have excluded Social Security from the budget process permanently and from sequester and from reconciliation. We have discussed with the distinguished Senator from Florida, on a continuing basis, the Social Security concern.

In fact, she was the first Member of this body to introduce a bill to take Social Security off budget, and she has been a continuing conscience of this body in addressing the issue of Social Security, in removing it from the budget, so that that freestanding trust fund can be dealt with separately.

With respect to the modification and the point of order which was discussed earlier, we felt that once we had complied with her wishes to take it off budget, it was not important to have the specific point of order. The distinguished Senator from Florida feels strongly that it is, and that is the purpose of her amendment, and I support the amendment.

Mr. SARBANES. I am not getting so much at the purpose of the distinguished Senator from Florida as I am about the constant assurances which have been given us by the sponsors of the amendment to which this amendment is being offered that Social Security is not affected.

I think it is another example, another instance, about representations being made about what is in the Gramm-Rudman proposal. We have constantly heard assurances, as proposed by the distinguished Senator from Texas and others, that it does not affect Social Security. Now we are being told that you need this amendment in order to be sure about that. Assurances have been given repeatedly on that issue.

Mr. GRAMM. Mr. President, will the Senator yield?

Mr. SARBANES. I yield.

Mr. GRAMM. The commitment made in the bill, as described by its cosponsors, was to take Social Security off budget and out of the whole process of sequester. The distinguished Senator from Florida wants to insert in the bill a requirement that a specific point of order lie against any effort to bring a bill to the floor that deals with Social Security. She believes that is an important element to be added to the bill. I support it, and I intend to vote for it.

Mr. SARBANES. The only point I want to make is that this provision was in the previous proposal of the distinguished Senator from Texas and either was thought superfluous and was removed or was taken out for some other reason. Yet, assurances have constantly been given that Social Security is going to be protected fully, by the sponsors of the Gramm-Rudman amendment.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader has the floor.

Mr. BYRD. No. I understood——

The PRESIDING OFFICER. The majority leader has had the floor throughout this entire discussion.

Mr. BYRD. I just inquired of the Parliamentarian, and he said that the Senator from Maryland had the floor.

The PRESIDING OFFICER. The Senator from Maryland was never recognized by the Chair, except to ask questions of the Senator from Texas, who in turn had yielded for questions by the majority leader.

Mr. SARBANES. How could he be yielded time? Who has the floor?

The PRESIDING OFFICER. The majority leader has the floor.

Mr. DOLE. Mr. President, all I would like to do is get the amendment before us and move on to other amendments. We have a number of amendments to dispose of. If we are going to play the old 86 game—we know that is happening here—we may start the same process. We may move to table what is up there now and start voting on the Gramm-Rudman amendment. We are not going to extend the debt ceiling until we have a vote on the Gramm-Rudman amendment.

If Members on the other side want to delay, we will delay; but we are going to be here all night delaying and all day tomorrow delaying.

These amendments have been agreed to. We agreed to the Pressler amendment, the Levin amendment, the Hawkins amendment. We are ready to take up the Exon amendment, the Melcher amendment, the Dodd-Kerry amendments. I understood that we could do those this evening.

I just hope we could let the distinguished Senator offer the amendment and then if there is some debate over the amendment we could debate the amendment. If there is a question of someone's integrity we can debate that.

Mr. RIEGLE. Mr. President, will the Senator yield?

Mr. SARBANES. Mr. President, will the Senator yield on that point?

Mr. DOLE. I yield on that point.

Mr. SARBANES. Mr. President, there is no question with respect to anyone's integrity, and I do not know on what basis the majority leader introduces that element into the conversation.

Mr. DOLE. Because I made repeated references how they have been shuffling around the papers and——

Mr. BYRD. Mr. President, I ask for the regular order.

The PRESIDING OFFICER. The regular order is the majority leader has the floor.

Mr. BYRD. The regular order also is that other Senators not be addressed in the second person.

Mr. DOLE. Mr. President, I ask for the yeas and nays on the amendment. It has not been offered yet.

Mr. BYRD. We would like to see the amendment.

Mrs. HAWKINS. The Senator has not offered the amendment.

The PRESIDING OFFICER. The amendment has not been presented.

Mr. SARBANES. We agreed earlier to the offering of the amendment, I say to the Senator.

Mr. DOLE. It is all right if she offers it. Let her offer it.

Mr. SARBANES. Fine.

AMENDMENT NO. 742

(Purpose: To prohibit reconciliation with respect to the old-age, survivors, and disability insurance programs)

Mrs. HAWKINS. Mr. President, I ask unanimous consent that it be in order for me to offer an amendment to the pending amendment in the second degree, Amendment No. 730.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Florida [Mrs. HAWKINS] proposes an amendment numbered 742.

Mrs. HAWKINS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

Mr. BYRD. Mr. President, I object. It is a short amendment. I wish to hear it.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

At the appropriate place, insert the following:

( ) POINT OF ORDER.—Notwithstanding any other provision of law, it shall not be in order in the Senate or House of Representatives to consider any reconciliation bill or reconciliation resolution reported pursuant to a concurrent resolution on the budget agreed to under section 301 or 304 of the Congressional Budget Act of 1974, or any amendment thereto, or conference report thereon that contains any provision with respect to the Federal Old-Age Survivors Trust Fund or the Federal Disability Insurance Trust Fund, with respect to revenues attributable to the taxes imposed under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954, or with respect to the old-age, survivors, and disabilty insurance progam established under title II of the Social Security Act.

Mrs. HAWKINS. Mr. President, the amendment I am introducing is very interesting obviously to many people in the Chamber and is one that I feel is crucial to complete the picture of removing Social Security from the unified budget.

This amendment states that changes in Social Security cannot be made in reconciliation.

Mr. President, unless we include removal of Social Security from the reconciliation process, removal of Social Security in the Gramm amendment is merely cosmetic. The whole idea behind removing Social Security from the unified budget is to make changes in the program based on the needs and constraints of the program itself and not for short-term budgetary reasons. Social Security is self-financed and has long-term goals. It should not be subject to the same constraints of programs competing for scarce general revenue funds.

If my amendment is not adopted, it does not mean that changes in Social Security could never be made. It merely means that if and when changes are made to Social Security, it would not be in the context of the budget.

This amendment is necessary because if this body decides that it does not want Social Security to be tampered with in the budget process, then we ought to carry that out in a meaningful way.

Without my amendment, Members could support the idea of separating Social Security from the unified budget and go home to their States and tell all their elderly people that they no longer need to fear the budget process and its effects on their Social Security payment because we have separated the two. But, then what would happen if we passed a budget resolution with no mention of Social Security, only to find that the Finance Committee had made a substantial cut in Social Security in its reconciliation bill? Would we then have really taken Social Security away from the budget ax? Of course not. We simply would have made an empty promise to our elderly at home. They would still have reason to fear the budget process.

Mr. President, I consider this to be one of the most crucial issues to ever come before this body, an issue of such gravity that it demands immedi-

ate action. Each year, our elderly are terrorized during the budget process as funding for the Social Security Program is kicked about like the proverbial political football of partisan gameplayers. This annual reoccurrence of planned, premeditated terrorism is unconscionable and should be ended immediately.

I urge this body to take action today out of respect for our senior citizens to put their minds at ease, and I urge my colleagues to join me in this effort.

Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. RIEGLE. Mr. President, I have concern that is very strong in this area and I have been involved in a number of actions to protect Social Security in the Budget Committee and in the Chamber over a period of years. So this is of very particular interest to me, and I just want to observe that in the exchange of questions and answers between the Senator from Maryland and the sponsor of the overall package, the Senator from Texas, I do not think we got a straight answer to the question that was being posed, and that was this:

Was this provision in the original Gramm proposal, and was it represented in the discussions which have been very numerous on the floor as being in there in the original proposal so that there was an ironclad protection for Social Security that could not be tampered with. That we could not have back door cuts in Social Security and in some way the Finance Committee or anyone else could not come in and somehow raid the Social Security Fund?

As I understand it, this protection was in the original version and assurances were given over the last several days that that was the case, that there was absolutely no way, shape or form that anyone could take and somehow raid Social Security.

When the Senator from Texas was asked by the Senator from Maryland if in fact somewhere along the way it was dropped out, he really, I felt, got an evasive answer and not a straight answer.

The question in my mind and the reason I will explain why I want the answer, the question that I am asking is this: If it was in the original version why was it dropped out, and if it was dropped out what else has been dropped out? Are there other things where assurances were given and where we were led to understand that certain provisions would work in certain ways that between Gramm I and Gramm II or the subsequent versions of Gramm that there have been other deletions, mysterious or otherwise, that have happened that would in a sense nullify assurances that were given earlier about the protection of certain items. That is the issue.

I am familiar with this language because it is not new or unusual language. But the point is if the assurances were given before on the basis that this was part of the original package and it somehow got lost along the way, dropped out, what else has been dropped out? Was it dropped out and if so why was it dropped out and what else has been dropped out?

That is a question that I think has to be answered, and it was put by the Senator from Maryland and I am putting it myself, and I do not think we got a straight answer from the Senator from Texas.

So if he is within the sound of my voice I would hope that at some point he would return to the Chamber and give us an answer, a direct answer, on that. Was it in the original version? If so why was it dropped out? Second, what other provisions of this kind have also been dropped out that we may not yet know about?

I yield the floor.

Mr. RUDMAN. Mr. President, will the Senator from Michigan yield?

The PRESIDING OFFICER. The Senator from Michigan yielded the floor.

The Senator from New Hampshire is recognized.

Mr. RUDMAN. Mr. President, let me say to the Senator from Michigan, first, the only assurance that was ever given from the beginning was that Social Security COLA's would not be subject to the sequestering. That was true from the beginning and it is true now.

There was never any representation made as to what method might be adopted to make it more difficult for someone at a subsequent date to include those COLA's back in.

As a matter of fact, in an original draft that was not submitted to the Senate there was provision to that effect and during discussions the cosponsors themselves removed it. Senator HAWKINS and others have thought it should be in.

That is the answer to the Senator's second question.

His third question, let me tell him that there has been no representation as to any major substantive part of the operation of this bill that has been changed. As a matter of fact, the only change that will be coming that I will consider to be significant, significant in a sense that the Senator from Michigan, who is a superb lawyer, spotted language which he felt could be improved upon, and we agree with—I am talking about the other Senator from Michigan, although I am sure this Senator from Michigan is a superb lawyer also—that what we have decided was to improve it in that way.

But in terms of the question of the Senator from Michigan as to whether or not there have been other major parts of this bill that we have represented that have been moved in any way, the answer is clearly no. The copy is here for everyone to inspect. And we have not done that.

Mr. RIEGLE. Mr. President, let me say to the Senator from New Hampshire that I did not see him in the Chamber, so I apologize to him, because I would have addressed the question to him.

I appreciate the courtesy of his response.

If I may just ask one other question, and that is, as I understand it, this was in the original draft, it was in the original draft, not in what the Senator said he submitted officially, but the original draft of the proposition that the Senator is a leader in developing. Is that correct?

Mr. RUDMAN. In order to answer the Senator's question precisely—and I try to be kind of careful how I answer questions around here—there was so much negotiations going on, there was a procedure in the original draft that would have made it more difficult for subsequent Congresses to tamper with this COLA exception to the sequestering order. Whether or not it was precisely as the Senator from Florida is now offering, frankly, I do not remember. That was 2 weeks ago.

Mr. RIEGLE. Fair enough.

Mr. RUDMAN. And the Senator from Michigan will agree with former Justice Frankfurter, who said that lawyers become great experts in many things for extraordinarily brief periods of time.

Quite frankly, I had forgotten all about what the draft said.

Mr. HEINZ. Will the Senator yield?

Mr. RIEGLE. I will be happy to yield to the Senator from Pennsylvania in just a moment.

But I just want to say two things first. So there was a protective device in the original draft. It may have been somewhat different than this, but there was a way to tighten it down, to give it an additional measure of protection, and for some reason that was removed.

It would be interesting to me to know why that was removed. Was it removed for reasons of a belief it was not needed? Because if the judgment was that it was not needed then, why is it needed now? That is part of the question I guess I am asking.

Mr. RUDMAN. The answer to the first question is, yes, there was protection; maybe not precisely, but, yes, there was. Was it removed for a reason? Yes, it was removed for a reason. What was the reason? Some people felt that it was unnecessary to further constrict the bill with procedural inhibitions, which it already had

some. The Senator from Florida, obviously, feels differently.

Mr. RIEGLE. I will just say one thing further. In the illustration the Senator from Florida used, she spoke about the possibility of the Finance Committee, in a sense, trying to violate the whole sense of this document; namely, the Finance Committee would somehow, in the hypothetical, propose a cut in Social Security benefits. And I gather that what we are doing here, the thrust of the package and its written language is such that that could not and would not happen; that if the Finance Committee somehow could get loose and, in effect, come back in here and propose cuts in Social Security, that would somehow be protected by this particular amendment.

I gather that that is really a false fear, going to the issue of whether or not we want to alarm people. The Finance Committee would not be in a position where they could do that. Am I wrong in that?

Mr. RUDMAN. Quite frankly, if I could answer that question, I would. I am not on the Finance Committee. I do not know what they can do.

Mr. HEINZ. If the Senator will allow me to answer, without losing his right to the floor.

Mr. RUDMAN. The Senator from Michigan has the floor.

Mr. RIEGLE. I have the floor.

Mr. RUDMAN. I will sit down and you may ask that question.

Mr. HEINZ. Will the Senator yield to a member of the Finance Committee?

Mr. RIEGLE. It is like a tag team wrestling match. Here comes the other half of the team.

Yes, I yield to the Senator from Pennsylvania to respond to the question.

Mr. HEINZ. I will do the best I can.

First, I wish to make a disclaimer to my friend from Michigan that I do not pose as a parliamentary expert who is steeped in 30 years of experience and precedents of the Senate, or an expert in all the intricacies of the Budget Act, which has been with us for some 10 to 11 years.

First, I think we first do agree that the legislation needs language that does what the Senator from Florida suggests this does; namely, to put an extra lock on the door so no one can say that Social Security is going to end up in reconciliation. That is the intent.

This language, whether or not it is identical to some draft that was circulated at some other point in time, as I look at it, it is not identical to some of the other drafts I have seen. But, nonetheless, it does a very important job by making a point of order in order against any reconciliation bill that comes to the floor with Social Security cuts in it.

Now, I take the thrust of the Senator's other question to be what rights and privileges are there remaining to the Finance Committee. We have dealt with the Budget Committee. The Budget Committee cannot do anything to Social Security in reconciliation.

My understanding would be that—and if someone wants to correct me, please do so—the Finance Committee retains jurisdiction over the programs involving the Social Security Act. And were it required, for reasons having to do with the solvency of Social Security, reasons of equity, having to do with either the taxes or the benefits involving Social Security, or any other reason having to do with it that we might see fit, but not having to do with reconciliation and the budget process, we could work our will, as we have in the past, on the Social Security Program. But not as part of the reconciliation.

Mr. RIEGLE. This is an important point and I want to be sure I understand it. Impressions were given, if we pass the Gramm proposition in its present form, that there could be no cuts in Social Security, and that there could be no cuts in the COLA's in Social Security; that there is an absolute protection to be provided by the Gramm package and that no matter what device anybody uses there is no way for somebody to reach in and, basically, take those things away; and that, in fact, you would not need a second or a third or a fourth or a fifth lock on the door. If the Gramm proposition is as it is represented to be, then that money is absolutely safe and beyond reach.

What I am saying is, is that assurance that we have been given then not so? Is it, in fact, such that Social Security can be tampered with and the COLA's could be invaded?

Mr. HEINZ. At this point, you get into a question of judgment. It is my judgment that the original amendment of Senators RUDMAN and GRAMM did a good job that removed Social Security from the budget. It said that on its face and nobody quarreled with that. It comported, therefore, with the spirit of the sense-of-the-Senate resolution that I myself offered and we all voted against.

Mr. RIEGLE. And many of us cosponsored with the Senator.

Mr. HEINZ. And the Senator from Michigan cosponsored that.

I can only say—and I do not wish to prolong the Senator's kindness in yielding to me—that this could only help. This is a positive step forward. I suspect we all could sit down and come up with an even longer version of this amendment, which might or might not be a better version of it. But I am convinced that this is worth doing and we should do it.

Mr. RIEGLE. Let me ask the Senator this: If we did not do this or if this had not been offered, is it fair for me to assume, then, that the Finance Committee would still have the latitude, under the Gramm proposition that is now before us, to go in and make cuts in Social Security or to in any way tamper with the COLA's?

Mr. HEINZ. Well, the Finance Committee always has the latitude, because it is the committee of jurisdiction, to report a bill having to do with Social Security. The key question is, What happens to Social Security in the budget process. It is this Senator's judgment that the language in the bill prior to the Hawkins amendment is clearly indicative of the intent of the authors not to touch Social Security.

The amendment of the Senator from Florida, Senator HAWKINS, in my judgment puts a second lock on the door and makes it in order for anybody to make a point of order against a reconciliation bill. Whether or not that is an extra bonus that other Members of the Senate think is worth having, I cannot speak for other Members of the Senate. I can say for this Senator that I am glad that this amendment does that job.

Mr. RIEGLE. Let me just say two things. One is, if you have the second lock on the door on the assurances that are being made—namely, the Gramm proposition—then that raises a whole new issue, because there are a lot of areas where we may need second locks on the door.

But that leads to a more important point. I thought that what we had here was a proposition that was being put forward as giving an absolute assurance that nobody could reach into and somehow steal away any of this money, not the Finance Committee or anybody else. If what the Senator is saying is that, despite the wording of the Gramm proposition, the Finance Committee could, nevertheless, bring forward cuts in Social Security or reductions in COLA's, then I think that stands very much at odds with all of the assurances that have been given thus far. That is really the heart of my concern.

I yield the floor.

Mr. KERRY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. I ask the Senator from Pennsylvania before he leaves the floor—perhaps the Senator from New Hampshire will assist me on this. There are some of us on this side of the aisle who made a condition of our participation as sponsors on this bill the fact that Social Security was totally protected.

I would like to ask for my benefit as somebody who has been on this bill for these 10 days—someone who has had private conversations with the

Senator from Texas, private conversations with the Senator from South Carolina who is aware of the extent of the private conversations the Senator from South Carolina had with other sponsors of the bill regarding Social Security—and I would like to know whether or not in fact the language that we jointly put into this bill at that point in time did or did not protect Social Security. Perhaps I can get an answer to that. I have the language in front of me. I can certainly assist by reading it.

Mr. RUDMAN. I can say in reply to the Senator from Massachusetts that I am not on the Finance Committee but I have had an opportunity to talk to the staff to understand more fully what I think now is being asked. I think I can answer it. The Senator from Massachusetts is absolutely correct. From the very beginning when he became a cosponsor of this at the time that we offered it publicly, the automatic cost-of-living increases were in fact protected. There is no question about that. That is the only thing that the sequestering pertains to on the first half. It pertains to automatic cost-of-living increases of various kinds. And we exempted Social Security.

The larger question arises which is not addressed by Gramm-Rudman in any particular way. If the unthinkable were to happen, and in a reconciliation action the Finance Committee decided to take a look at some other areas within Social Security—benefit levels and so forth, nothing to do with COLA increases, which is what the Senator from Massachusetts and the Senator from New Hampshire were talking about in the very beginning. This offer by the Senator from Florida would make it more difficult, although I find it inconceivable that the Finance Committee would ever attempt that, but if they ever did the Senator from Florida has been here long enough to know that the inconceivable sometimes happens. If they tried to work at some other base of Social Security, then the procedure set forth in this amendment would make it more difficult. So I guess my answer to the Senator from Massachusetts is his impression and my impression have been exactly and precisely the same since the beginning.

We were talking about the half of Social Security which was included within the so-called COLA's. Social Security is exempt, and will continue to be exempt. And this amendment bears on a different aspect; that is, the base level, if you will, of the Social Security Program.

Mr. KERRY. Again, I would like to come back to the language. On page 35 of the bill, it says pretty clearly, line 20:

> The receipts and disbursements of the Federal Old Age and Survivors Insurance Trust Fund, and the Disability Insurance Trust Fund, and the taxes imposed under sections 1401(a),"—and other sections cited—of the Internal Revenue Code of 1954

That is the enabling legislation raising those taxes.

> shall not be included in the totals of the budget of the United States Government as submitted by the President or of the congressional budget and shall be exempt from any general budget limitation imposed by statute on expenditures and net lending of the United States Government.

Does the language mean what it says or does it not?

Mr. RUDMAN. The language means precisely what it says; that is, the language applies to the budget process itself, and that is exactly what is in there. That is what the Senator from Massachusetts and the Senator from New Hampshire wanted. The additional language refers in fact to subsequent reconciliation action, and this would make it prohibitive for the Finance Committee to get involved in that which that language does not touch nor does it touch any other entitlement whatsoever. This Congress is still free to do anything it wants to with the base program. This does not address those.

Mr. KERRY. The subsequent language in here I think does address that. I would reference page 36, where it continues to say:

> No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund, or for payments from any such Trust Fund to the general fund of the Treasury.".

That seems to make very clear that there can be no touching of those funds at any point in time subsequent—at any point in time subsequent. I would like to know why that language, which I was part of and others were part of, is not adequate to do this.

Mr. RUDMAN. Let me say to the Senator from Massachusetts the language says exactly what it means relating to transfers. I will repeat. I will say the Senator from New Hampshire does not serve on the Finance Committee. I must say this is somewhat uncharted ground. But I am advised—with all of the language that is in the bill—that the language offered by the Senator from Florida has one single effect. That effect is that any reconciliation taken by the Senate Finance Committee would have to survive a point of order if it dealt with anything that had to do with old age assistance. That is my understanding. That is the only purpose of the language. The other language does precisely what it says. From there on, I guess it is a judgment call.

Let us put it this way: From the point of view of the Senator from New Hampshire, if in fact someone believes the present language already does it, is that all this does is reinforce it. I am not so sure the present language does it. If it does not and we accept this language, then certainly we have taken care of the problem.

Mr. KERRY. I thank the Senator for his answer. I have no quarrel with the Senator from New Hampshire. I think he knows that. My concern is that there are those of us who have been convinced since the beginning of this process that the language we have crafted was adequate, that we have been operating on clear assurances that was well spoken for, and in fact I think the language here is very clear. I think it is clear what this current amendment is, and why it is being put in at this point in time.

I want to clarify one other thing very much for the RECORD.

On the morning of the press conference that was held to announce this, I had personal conversations with Senator GRAMM at which time I talked about taking Social Security off the budget. I came to that press conference. I think you will recall that. At the end of that press conference, a question was asked by Mr. Tom Squitieri, "Is Social Security off the budget?" The answer was given not only that it would be off COLA's should the sequester process take place, but the answer was given at that time that it is off the budget. And there was a document issued at that time. I have a copy of that document which clearly says it was off the budget. Later in that afternoon on the subsequent draft it appeared that language had been changed. I personally got on the telephone to a number of people, sponsors of this bill, and we went around the horn on it. That was changed back to make it clear it was off budget. I constantly refused to sign off until I had assurance that we in fact had not only protected the COLA piece of it but we had taken it off budget. For this Senator's recollection, for this Senator's judgment as an attorney, and for this Senator's judgment on the basis of what other Senator's have said to him in the course of this deliberation, I believe the language in this bill today says what it means, which is that Social Security is protected, has been protected, was intended to be protected, and I personally do not believe this is more than a minor piece of frosting on the cake which is not even necessary to give the protection which has been there all along.

I yield, Mr. President.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER (Mr. GRASSLEY). The distinguished majority leader.

Mr. DOLE. Again, it is judgmental. I am not privy to the original conversation. I am wondering if there is any objection to vitiating the yeas and nays on the amendment. There are a number of our colleagues on both sides of the aisle who hoped they might have a small window of opportunity. I know the distinguished Senator from Nebraska is prepared to offer his amendment which will take about an hour which would give our colleagues at least until 8:15 or 8:20.

I ask unanimous consent that the yeas and nays may be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Is the question on the amendment?

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Florida.

The amendment (No. 742) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mrs. HAWKINS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, is the distinguished Senator from Michigan now prepared to go forward?

The PRESIDING OFFICER. There is a pending cloture motion. Unless the majority leader asks unanimous consent that it be temporarily laid aside.

Mr. DOLE. I ask unanimous consent that it be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. If the majority leader will yield, our friend from Texas is here now. I know Senator RUDMAN has signed off on this technical change to accomplish what the intent of this amendment is, but I do not know that Senator GRAMM has had the opportunity to see this. If he has had the chance, I will send it to the desk. If he has not, I will withhold for a moment.

Mr. GRAMM. If the distinguished Senator will withhold for a moment, I would appreciate it.

Mr. RUDMAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I understand the Senator from Massachusetts has an amendment which can be quickly disposed of, a CBO amendment on compliance. Maybe we can dispose of his amendment while Senator GRAMM is conferring.

Mr. BYRD. Mr. President, reserving the right to object, I think we should have some understanding as to whether or not we are going to have a vote on cloture today.

Mr. DOLE. I would hope we would not have a vote on cloture today. If we can proceed with the amendments as we are, I will ask unanimous consent at the appropriate time that the vote on cloture be vitiated.

Mr. BYRD. That would be fine with me, but I think we ought to know whether or not there will be a vote on cloture.

Mr. DOLE. There will be votes on amendments.

Mr. SARBANES. Will there be a vote on the cloture motion today? I gather the cloture motion has been temporarily set aside.

Mr. DOLE. I hope that will not be necessary. I am prepared to go ahead with the amendments, lay down the leadership amendment and vitiate the cloture motion.

Mr. BYRD. Mr. President, may I say to the distinguished majority leader I do not want to make his problems more difficult, but we ought to know whether or not we are going to vote on cloture today. If the majority leader wishes to vitiate the order on cloture, that is fine with me, but I do not want it hanging over our heads as we go from amendment to amendment.

By the way, I think when we ask unanimous consent that an amendment may be called up, notwithstanding the fact that the Rudman amendment is in the second degree, I think we ought to make perfectly clear that included in that request is that rule XXII will be held in abeyance as to the cloture motion. If we are just going to ask that it be in order to call up an amendment, that is not enough, in my judgment, because rule XXII requires that 1 hour after the Senate comes in, on the day after the interim day, the Senate shall proceed to establish a quorum and shall vote on cloture.

The distinguished majority leader has been very understanding all afternoon. He knew that we on our side were meeting, trying to develop some kind of a unanimous-consent agreement. He did not allow the cloture to come down, and we are appreciative of his patience. But I think Senators are entitled to know at this hour of the night whether there is any danger that we may still have to vote on cloture before the day is over.

It could, otherwise, occur at 12:30 in the morning.

Mr. DOLE. Mr. President, what I hope we can do, and again I do not have any strong feelings on whether we take care of that now or later, I think if we can get a unanimous-consent request right now that we would take up the amendments recommended by the distinguished minority leader to be taken up and lay down the leadership package tonight, I would be very pleased to do whatever I need to do to get rid of the cloture motion.

Mr. BYRD. I think we can lay down the leadership amendment any time Mr. CHILES is here.

Mr. DOLE. But there are other amendments. There are Senator EXON's amendment, Senator KERRY's amendment, and Senator LEVIN's amendment. Also, Senator MELCHER has an amendment. We have no amendments. There are four amendments. Two will be accepted and two will require rollcalls. Then it would be my hope that we would lay down the leadership amendment. It seems we could complete all of that by 9 o'clock.

Mr. BYRD. That may be true. I do not know. I will have to object to calling up any other amendments at this point without knowing precisely what is in those amendments.

Mr. DOLE. They are on your side.

Mr. BYRD. I was going to say that on some of the amendments that the distinguished majority leader talked about we know what is in them. But we have just seen an example of an amendment called up by the distinguished junior Senator from Florida, and we gave unanimous consent without really knowing what was in the amendment. I do not think we should operate like that. If we know what the amendment is we might give consent or might not.

I am going to insist that we be told whether we will have a cloture vote this evening or not. It is entirely up to the distinguished majority leader.

Mr. DOLE. As I understand the suggestion is that we not take up any of these amendments until we make a judgment?

Mr. BYRD. Yes.

Mr. DOLE. Than I suggest we have the cloture vote.

CLOTURE MOTION

The PRESIDING OFFICER. The clerk will report the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the pending amendment in the second degree to the motion to recommit with instructions.

Bob Dole, Phil Gramm, Al Simpson, Bill Cohen, Mack Mattingly, Paul Trible, Warren B. Rudman, Slade Gorton, Mark Andrews, Strom Thurmond, Pete Domenici, Daniel J. Evans, Bob Kasten, Steve Symms, Jesse Helms, Ernest F. Hollings, and Jake Garn.

CALL OF THE ROLL

The PRESIDING OFFICER. Pursuant to rule XXII, the Chair now directs the clerk to call the roll to ascertain the presence of a quorum.

The legislative clerk called the roll, and the following Senators answered to their names:

[Quorum No. 18 Leg.]

Byrd	Goldwater	Kennedy
Chiles	Gore	Levin
Dodd	Grassley	Long
Dole	Hawkins	Rudman
Domenici	Hollings	Sarbanes
Garn	Kassebaum	Sasser

The PRESIDING OFFICER. A quorum is not present. The clerk will call the names of the absentees.

The legislative clerk resumed the call of the roll and the following Senators entered the Chamber and answered to their names.

[Quorum No. 18 Leg.]

Abdnor	Gorton	Murkowski
Andrews	Gramm	Nickles
Armstrong	Harkin	Nunn
Baucus	Hart	Packwood
Bentsen	Hatch	Pell
Biden	Hatfield	Pressler
Bingaman	Hecht	Proxmire
Boren	Heflin	Pryor
Boschwitz	Heinz	Quayle
Bradley	Helms	Riegle
Bumpers	Humphrey	Rockefeller
Burdick	Inouye	Roth
Chafee	Johnston	Simon
Cochran	Kasten	Simpson
Cohen	Kerry	Specter
Cranston	Lautenberg	Stafford
D'Amato	Laxalt	Stennis
Danforth	Leahy	Stevens
DeConcini	Lugar	Symms
Denton	Matsunaga	Thurmond
Dixon	Mattingly	Trible
Durenberger	McClure	Wallop
Eagleton	McConnell	Warner
Evans	Melcher	Weicker
Exon	Metzenbaum	Wilson
Ford	Mitchell	Zorinsky
Glenn	Moynihan	

The PRESIDING OFFICER. A quorum is not present.

Mr. DOMENICI. Mr. President, I move that the Sergeant at Arms be instructed to request the attendance of absent Senators. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from New Mexico. The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from Maryland [Mr. MATHIAS] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 92, nays 6, as follows:

[Rollcall Vote No. 206 Leg.]

YEAS—92

Abdnor	Armstrong	Bentsen
Andrews	Baucus	Biden
Bingaman	Grassley	Moynihan
Boren	Harkin	Murkowski
Boschwitz	Hart	Nickles
Bradley	Hatch	Nunn
Bumpers	Hawkins	Packwood
Burdick	Hecht	Pell
Byrd	Heflin	Pressler
Chafee	Heinz	Proxmire
Chiles	Helms	Pryor
Cochran	Hollings	Riegle
Cohen	Humphrey	Rockefeller
Cranston	Inouye	Roth
D'Amato	Kassebaum	Rudman
Danforth	Kasten	Sarbanes
DeConcini	Kennedy	Sasser
Dixon	Kerry	Simon
Dodd	Lautenberg	Simpson
Dole	Laxalt	Specter
Domenici	Leahy	Stafford
Durenberger	Levin	Stennis
Eagleton	Long	Stevens
Evans	Lugar	Symms
Exon	Matsunaga	Thurmond
Ford	Mattingly	Trible
Garn	McClure	Wallop
Glenn	McConnell	Warner
Gore	Melcher	Wilson
Gorton	Metzenbaum	Zorinsky
Gramm	Mitchell	

NAYS—6

Denton	Hatfield	Quayle
Goldwater	Johnston	Weicker

NOT VOTING—2

East	Mathias

So the motion was agreed to.

The PRESIDING OFFICER. A quorum is present.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

Mr. DOLE. Mr. President, I have been asked by a number of my colleagues what we can anticipate for the remainder of the evening.

Let me indicate, as I have tried earlier, that I should like to get unanimous consent to move ahead with the Levin amendments next, because I understand they will be accepted.

Then an amendment by the Senator from Massachusetts, Senator KERRY, which I understand is going to be accepted. I am not privy to everything in the bill. Then the Senator from Nebraska, Senator EXON, has an amendment which will require a rollcall vote; and then I understand there is another minimum tax amendment to be offered by the Senator from Montana which will require a rollcall vote. Then perhaps we would be in a position to lay down the Democratic leadership amendment.

Mr. President, what I would hope we could do is get unanimous consent at this point to vitiate the vote on cloture and to proceed to these amendments and to lay down the Democratic amendment, debate it for a while tonight, go out and come in fairly early in the morning and try to complete action on that amendment by very early afternoon and then move the Gramm-Rudman proposal, vote on that, and then at that point I will be able on this side to get consent for a short extension and then we can finish.

There are approximately seven or eight other amendments, two on this side and six on that side. I might say that some that were suggested are not relevant. There are some trade amendments which we hope would not be offered, but if they are, then there may be nonrelevant amendments to be offered by this side.

So, I would make this request. I would like to propound the following unanimous consent-request: That the vote on cloture be vitiated; that the amendment by the distinguished Senator from Michigan, Senator LEVIN, then be in order; that there be 40 minutes on the amendment equally divided; there be no amendment to the amendment; that that be followed by the amendment of the distinguished Senator from Massachusetts, Senator KERRY; that there be 20 minutes equally divided, 10 minutes per side, and no amendment to the amendment; that to be followed by the amendment of the distinguished Senator from Nebraska, Senator EXON, and that there be 1 hour equally divided on that amendment with no amendment to the amendment; and that be followed by an amendment by the distinguished Senator from Montana, Senator MELCHER, and that there be a time agreement of 1 hour to be equally divided, with no amendment to the amendment.

Following disposition of those amendments that the Democratic leadership amendment be laid down and we have some brief debate this evening and that would be the pending business tomorrow morning.

Mr. DODD. Mr. President, will the Senator yield?

Mr. DOLE. I am happy to yield.

Mr. DODD. Is that unanimous consent propounded?

Mr. DOLE. No, I have not propounded it.

Mr. DODD. I have not made a firm decision whether or not to offer that amendment I raised earlier. I wish to be at least protected if I could.

Mr. DOLE. The Senator would like to be protected if he could.

Mr. DODD. If I could.

Mr. DOLE. I think with reference to the amendment, I might say to my friend from Connecticut, as I understood, he was not prepared or was not certain. We can protect him at a later time if that is satisfactory or I can include it in this request.

Mr. DODD. I prefer to include it in this request if I could.

Mr. DOLE. I ask unanimous consent there be 1 hour on an amendment to be offered by Senators DODD and KERRY to be equally divided, with no amendment to the amendment.

Mr. LONG. Mr. President, reserving the right to object, may I ask what it is?

Mr. DOLE. That is to remove the means-tested programs. That will require a vote.

Mr. GLENN. Mr. President, a final question: This would not in any way freeze out amendments? I have one that is not in the lineup. That would not freeze it out?

Mr. DOLE. What I am doing, in essence, is following the suggestion of the distinguished minority leader that we take care of these amendments before we vote on the Gramm-Rudman amendment and following the disposition of the Gramm-Rudman amendment that there be an amendment from the Senator from Ohio, the Senator from New Jersey, and I think there would be a third minimum tax amendment of the Senator from New York, an amendment from the Senator from Vermont, and there may be others. But so the answer is——

Mr. GLENN. This would preclude, though, any amendment coming in before the vote on the leadership amendment on this side of Gramm; is that right? Any other amendments besides the one the majority leader mentioned would have to come after the vote on the Gramm amendment?

Mr. DOLE. That is correct.

There are amendments on both sides that come after—Senator DURENBERGER, Senator ARMSTRONG, Senator GLENN, Senator SYMMS, Senator BOREN, Senator MATTINGLY, Senator BRADLEY. But again there is no agreement on any of those amendments. What we would like to do is complete action on Gramm-Rudman some time tomorrow. At that point, as I indicated, I would be able to get unanimous consent on this side for a brief extension of the debt ceiling.

Mr. ARMSTRONG. Mr. President, will the Senator yield?

Mr. DOLE. I am happy to yield.

Mr. ARMSTRONG. As I understand it, it would be the plan of the leader to take up this list of amendments prior to laying down the Democratic leadership amendment. I would have no objection to that. But I inquired, whether or not since all of those amendments that would come from that side of the aisle, whether or not it would be agreeable that after the adoption of the Gramm-Rudman amendment the next five or six amendments would come from our side so it sort of evens out.

Mr. DOLE. I would have no objection to that. We have been rotating amendments all evening. It just happens that more amendments come from that side. But certainly I think I believe both sides will agree there should be some balance. We will try to work that out.

Mr. GLENN. Mr. President, I have one question here. I would disagree with that though, because if they want to get it in balance, if Gramm-Rudman passes someone on our side wants to get something in, are we frozen out with six amendments on the other side?

Mr. DOLE. As I count the amendments, there are about three on this side and seven or eight on the other side, even after we dispose of the four pending amendments.

Mr. MOYNIHAN. Mr. President, will the Senator yield for a question?

Mr. DOLE. I am happy to yield.

Mr. MOYNIHAN. Do I understand I will have an opportunity to offer an amendment to Gramm-Rudman before it is moved?

Mr. DOLE. Yes; that is correct.

Mr. BYRD. Will the distinguished majority leader yield?

Mr. DOLE. I yield.

Mr. BYRD. The majority leader is following suggestions that had been made by the minority leader. My suggestions were contained in the overall unanimous-consent agreement proposal that I gave to the distinguished majority leader this afternoon. Those suggestions, however, were all part of the overall unanimous-consent agreement that we proposed.

Some will recall that we discussed these amendments in our conference today. I put the proposal in the hands of the majority leader, and I have not heard anything back as to whether or not the proposal is going to be rejected or accepted.

So, I did not make this suggestion, I do not think, outside the context of the unanmous-consent agreement that I proposed.

I would hope the distinguished majority leader would vitiate the cloture vote so Senators will know that is not going to be brought down on our heads at 11 o'clock or 11:30 p.m. or 12 or 12:30 in the morning. When will the distinguished majority leader propose the unanimous-consent agreement with respect to the matters that are in the agreement?

Mr. DOLE. This would be a portion of it right here. As I read the Democratic counter to the Republican counteroffer, it suggests a vote on the Democratic leadership proposal would take place on Wednesday at 11 a.m. or after a minimum of 5 hours' debate, equally divided, whichever comes later. The vote on the Gramm-Hollings amendment—this is the minority leader's suggestion—would come on Thursday. In my view should do that tomorrow afternoon. The Democratic counter offer proposes to include certain amendments which we plan to do. We have no quarrel with that. In fact, we plan to include the amendment Senator KERRY wishes to offer now in the modified Gramm-Hollings-Boren-Rudman proposal.

Then it was suggested in paragraph 4 that these amendments had to be voted on before the vote on Gramm-Rudman-Hollings. I am trying to suggest that we are prepared to grant that request.

Mr. BYRD. What about the rest of the request?

Mr. LONG. Mr. President, reserving the right to object, I know what some of these proposed amendments would be, but as one of the managers of the bill, I am well aware of the fact that anything other than a constitutional amendment can be offered on this measure.

I would like to know specifically what all those amendments are before I give consent because I do not want to be caught napping. I have the responsibility both to the Finance Committee as well as to myself, and I would like to have some indication of what those amendments are. Some of them I think I do know. Some of them I do not.

Mr. DOLE. Could I indicate that the Melcher amendment is a minimum tax amendment?

Mr. LONG. I know what that is.

Mr. DOLE. The Dodd-Kerry amendment would remove means tested programs, and there is another Kerry amendment which would require a study by CBO on tax compliance; the Exon amendment would move the trigger in the Gramm-Rudman-Hollings-Boren amendment, move it forward as I understand; and the Levin amendments are simply changes that have been worked out that I do not think have any—the distinguished Senator from Michigan is there. Maybe he can explain it.

Mr. LEVIN. Mr. President, we are still working on that very, very hard. There is an important change in this. I think we can work it out but we will know in a few minutes.

Mr. LONG. May I have an indication of what that is?

Mr. DOLE. Can the Senator give us some indication?

Mr. LEVIN. Yes. The bill as it now stands talks about expenditures having to be uniformly cut in the event we do not meet the target. There are literally thousands of programs and activities that under that definition could be moved up and down drastically by the President.

To avoid that vast new authority to the President, we are going to define much more carefully what cannot be cut, or to put it more accurately, what must be cut uniformly.

We are going to make sure that, where we have specific appropriations for programs and activities and projects, they will be uniformly dealt with and that we do not add a whole new power to the President to move one project down 90 percent while he does not touch another project.

Mr. LONG. I have no objection to that. What else do you have?

Mr. DOLE. That would be it. Then as I noted the Dodd-Kerry amend-

ment, which would remove means tested programs from the sequesting process, if I have explained it correctly.

Mr. LONG. I have no objection to voting on that. Is there something else?

Mr. DOLE. The next would be to lay down the Democratic leadership amendment and have some debate this evening and vote on that tomorrow sometime.

Mr. LONG. The Democratic leadership amendment?

Mr. DOLE. Yes.

Mr. LONG. I know what that this is. I thank the majority leader.

Mr. GLENN. Could you get me on that list prior to the vote on the leadership amendment?

Mr. DOLE. What is the amendment of the Senator from Ohio?

Mr. GLENN. It is being prepared right now.

Mr. LONG. Could we have an idea what it is?

Mr. GLENN. Basically, it would be the one I talked about in the caucus today. It would change section 1105(c) of title 31 of the United States Code to require that when the President submits a budget to us he has to submit his plan for a balanced budget and cannot just use a debt increase or increased loans as a method of meeting any deficiencies under the budget.

Mr. LONG. I have no objection to that.

Mr. DOLE. I am following the little outline that was given me by someone in the distinguished minority leader's office and the Glenn amendment was at a later time. We can start playing checkers here. I am going to protect the Senator from Ohio. I am going to give him every opportunity to offer the amendment, because I am not certain that it is not a good amendment.

Mr. GLENN. I think it would be more appropriate that one like this would come up before the vote on Gramm-Rudman than afterward. That is the reason I made the request.

Mr. MELCHER. Would the majority leader yield?

Mr. DOLE. The Senator's amendment is included.

Mr. MELCHER. I heard that. But I did not hear how many we were considering yet tonight.

Mr. DOLE. Hopefully five, two of which would be disposed of very quickly, could have been disposed of earlier.

Mr. MOYNIHAN. Mr. Leader, for purposes of clarification, my amendment would go to the Commodity Credit Corporation, not a minimum tax.

Mr. DOLE. I understand the Senator from Michigan has one that affects the Commodity Credit Corporation, too. He says he does not.

Mr. WALLOP. Will the majority leader yield?

Mr. DOLE. Yes.

Mr. WALLOP. Mr. President, reserving the right to object, and I shall not object, I just find it surprisingly strange that we listened for a couple of days to complaints from the minority side that they did not know what was in this bill, and they are now asking us to reserve time to devote to a minority substitute which is not yet drafted. It is just one of those curious things that happens in the Senate from time ot time.

Mr. DOLE. Mr. President, let me indicate that all I want to do is move this debt ceiling, with an amendment. And I want to assure my colleagues, who have been supportive of what we have been trying to do, that I am prepared to move on amendments all from that side of the aisle and lay down the Democratic leadership amendment. But for those who have another view, I am just making that request and if there is an objection we will do something else.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Reserving the right to object, may we see the request in writing?

Mr. DOLE. I did not write it out. Could we read it back?

Mr. BYRD. If the distinguished majority leader will yield, what will we do about cloture?

Mr. DOLE. That is vitiated, if this request is granted.

Mr. BYRD. May I say to my colleagues, it is perfectly all right with me if we go ahead and vote on amendments late into the night. I think we are entitled to know whether or not the majority leader is prepared to reject the proposal that we made today to him, or whether he is prepared to accept it. If he is not in a position to do that—and he may very well not be—I think we are also justified in asking, in that case, how long will we be here this evening. And if the distinguished leader wishes to keep us in until midnight, personally, that is all right with me. But I do feel we ought to be told whether or not our proposal, which was offered in good faith, is still under consideration, whether it is likely to be accepted, or whether it will be rejected.

Perhaps the majority leader cannot answer the question right now, but we ought to be told how far we are going into the evening.

We have proposed, I believe, 5 hours for the Democratic leadership amendment. That 5 hours is in the event that the whole proposal, the entire agreement, is accepted. We did not propose to take up the amendments piecemeal. If we get the leadership amendment pending, and then the distinguished majority leader may say, "All right, we have handled the amendments up to that time, now we are willing to give you an agreement on your leadership proposal. You proposed 5 hours. We are willing to give you that now."

And if the other side yields back 2½ hours, how much time will Mr. CHILES have had to explain the Democratic leadership proposal? He is not going to have much time to explain it tonight because Senators are going to go home once we stop voting. We all know that. And if we come in, in the morning, at 9 o'clock or 10 o'clock or whatever, then the distinguished majority leader will say, "OK, we have agreed to your proposal on the leadership amendment and you have got 2½ hours to explain it," because I merely want my colleagues to understand that the other side might yield time back, thereby reducing time on the amendment by half.

And I want the majority leader to understand that if we are not going to have the overall time agreement and he wishes to go ahead with the amendments, that is his privilege and his right. He is the leader and he should set the schedule as much as possible. But at least, I will say to the majority leader, that unless this overall proposal is agreed to, with the short-term debt limit extension, then we cannot be faced tomorrow morning with the prospect of taking 5 hours, half of which would be ours and the other half which could be yielded back, on the leadership proposal.

The Democratic leadership proposal is complex and it ought to be debated—everybody ought to know what is in it. That is what we have been saying about the Gramm amendment. So it is all right with me if we want to take it up in the morning. It just may take a little longer to explain. I thank the majority leader.

Mr. DOLE. Mr President, I ask unanimous consent that we move to the Democratic leadership proposal now and take care of the other amendments later and probably dispose of it this evening.

Mr. FORD. It will be a long night.

Mr. DOLE. It is all right with me. We have waited 2 days for this. You all understand the Democratic proposal. You have been working on it for 2 days. We do not need to know a great deal more about what is in it. [Laughter.]

Mr. CHILES. Would the majority leader tell us in what form we would be presenting this, just so we would know how to structure our amendment?

Mr. DOLE. It would be an amendment to the bill. At the appropriate place the amendment would add a new section. Would that be correct, Parliamentarian?

The PRESIDING OFFICER. By unanimous consent?

Mr. DOLE. Yes; I ask unanimous consent that it may be in order.

The PRESIDING OFFICER. The cloture vote will also have to be postponed.

Mr. DOLE. I ask unanimous consent to vitiate the cloture motion.

The PRESIDING OFFICER. Is there objection?

Mr. CHILES. Reserving the right to object——

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The minority leader.

Mr. BYRD. As part of our proposal, the Democratic leadership amendment was to have an up and down vote.

Mr. DOLE. That is correct.

Mr. BYRD. We would want to be assured that it would be an up and down vote.

Mr. DOLE. That is correct.

Mr. GORE. Mr. President, will the majority leader yield for a question?

Mr. DOLE. I yield for that purpose.

Mr. GORE. First of all, so that the record is clear on what offer is outstanding, if I can have the attention of the minority leader, is it not true that the Democratic Conference offered to have a vote on final action with respect to the Gramm-Rudman-Hollings amendment and all amendments thereto by the close of business on Thursday so that there is no delay, no dilatory tactics of any kind, and that as part of the same offer we requested a very short extension of the temporary ceiling so that the other body would not have to vote on a moments notice on a matter that has not been before them so that the procedure can go forward in an orderly way without delay, without dilatory tactic? Is it not true that the officer propounded by the minority leader contained those elements?

Mr. BYRD. The distinguished Senator is correct.

Mr. GORE. If I may ask a further question——

Mr. DOLE. Let me respond. I cannot get that consent on my side for the short delay unless we have first disposed of Gramm-Rudman-Hollings.

Mr. GORE. I thank the RECORD ought to reflect that the reason why we cannot act on the debt limit extension is because the majority leader is unable to get the consent from Members of the majority to go ahead in a reasonable way, have to vote on final action on the Gramm-Rudman-Hollings amendment, avoid this train wreck, let this body work its will, and let the other body consider it in a deliberate and orderly way so that if we are going to make this change in policy, it is at least considered and examined carefully over a short period of time.

If I may ask the majority leader, what is unreasonable——

Mr. DOLE. Mr. President, I yielded for a question. If we are going to debate the bill, let us get on the bill.

Mr. GORE. What is unreasonable about that proposal?

Mr. DOLE. Not very much. But we also have a reasonable proposal. I think it is a question of whether we are going to vote Wednesday or Thursday. We are advised by Treasury—it happens to be our administration—that they have a real problem tomorrow at noon. If we can do it by tomorrow afternoon, the short extension, send it to the House, they might be able to squeak through the day. I do not know if we should take their word for it. Maybe they can squeak through 2 days. I do not know what the magic is about Thursday. We would hope not to keep you here tomorrow evening. We know you have an official conflict. So do some of us on this side.

Mr. GORE. If the majority leader will yield——

Mr. DOLE. We have been out here 8 days trying to vote on Gramm-Rudman. That has been pretty unreasonable. There has been a lot of restraint placed on this side of the aisle.

Mr. GORE. Will the majority leader yield?

Mr. DOLE. I yield for a question.

Mr. GORE. As a premise to the question, let me say——

Mr. DOLE. If the Senator wants to object to the request——

Mr. GORE. The question is——

Mr. DOLE. Mr. President, I renew my request.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD addressed the Chair.

Mr. GORE addressed the Chair.

Mr. METZENBAUM addressed the Chair.

Mr. RUDMAN. Mr. President, regular order.

Mr. KASTEN. Regular order.

The PRESIDING OFFICER. Regular order has been called for. Is there objection?

Mr. BYRD. Mr. President, what is the request?

Mr. METZENBAUM. Mr. President, reserving the right to object, I want to know what the request is.

The PRESIDING OFFICER. The request is to vitiate cloture, and proceed to the Democratic amendment.

Mr. BYRD. Mr. President, there is no objection to that as far as I am concerned.

The PRESIDING OFFICER. Is there objection?

Mr. JOHNSTON. Mr. President, reserving the right to object——

Mr. GLENN. Mr. President, reserving the right to object——

Mr. KASTEN. Regular order.

The PRESIDING OFFICER. Regular order has been called for.

Mr. DOLE. Mr. President, let me reserve the right to object so I can respond to legitimate questions.

Mr. JOHNSTON. Mr. President, did the leader have in mind voting tonight on the Democratic proposal or just laying it down?

Mr. DOLE. No. We want to debate it. We talked about not having the chance to debate, and going until 10 or 11 o'clock on other amendments. Let us sweep aside the other amendments, and debate the leadership amendment.

Mr. JOHNSTON. Is that under a time agreement?

Mr. DOLE. I would like to get a time agreement. That request would be after this one is approved, if it is not objected to.

Mr. GLENN. Mr. President, will the leader yield for a question?

Mr. DOLE. I yield for a question.

Mr. GLENN. Mr. President, the way I heard the Chair propound that was the agreement was moved by the leadership here out of consideration of other amendments. Was that the intent of the majority leader? That is the way it was stated by the Chair.

Mr. DOLE. Mr. President, after disposition of the leadership amendment, I would go back as I have indicated before, and try to accommodate my colleagues on that side of the aisle. There are five amendments.

Mr. GLENN. Would it be possible to have what we are going to agree to restated?

Mr. DOLE. All it amounts to is vitiating the vote on cloture, and moving to the leadership amendment—the Democratic leadership amendment—laying it down, debating it this evening, and hopefully disposing of it with no time agreement.

Mr. BYRD. That is right.

Mr. CHILES. Up or down vote.

Mr. DOLE. Up or down vote. Why not give me one on the time agreement? I will give you an up and down vote. Maybe we can get a time agreement.

Mr. BYRD. Mr. President, we are ready to proceed with an understanding that there will be an up or down vote at such time as both sides are ready to vote on the amendment, and with cloture vitiated.

The PRESIDING OFFICER. Is there objection to the agreement? Without objection, it is so ordered.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DOLE. Mr. President, let me indicate to my colleagues that the dye is cast now. We have the Democratic leadership amendment before us. It deserves to be discussed. It is a serious amendment. It ought to be discussed. It was recommended in the minority leader's proposal that we have a time agreement of 5 hours which I assume would be equally divided. I hope that by 10:30 or so we will be able—unless there is considerable debate on this side—to have some disposition of the amendment.

If that were done tonight, tomorrow morning we can go back, and consider the other amendments. We can take the Levin amendment, the Kerry amendment, and then consider the other amendments we have referred to. Then we can move to the Gramm-Hollings-Rudman-Boren amendment, and hopefully dispose of that tomorrow; then vote the short extension.

I hope we are going to have to complete action on this bill on Wednesday in any event. We would like to have a vote on our major amendment tomorrow.

Mr. STEVENS. Mr. President, will the leader yield? Does the leader intend to try to get a time limit now on the leadership amendment from the other side?

Mr. DOLE. I will try. I do not know how much success I will have.

Mr. President, I ask unanimous consent that that there be a period of 5 hours on the amendment to be equally divided with no amendments to the amendment.

The PRESIDING OFFICER. Is there objection?

Mr. CHILES. Mr. President, reserving the right to object, I think we could work out some time agreement. Five hours, I think, is sufficient time.

I think it would be a good idea if we had some of the debate tonight, and then we can go over to tomorrow and set a time for a vote if we are going to agree to a 5-hour time limit.

Mr. DOLE. We have a debt ceiling crisis. Why do we not do it tonight? We have been here 8 days trying to get something to happen. We cannot get any movement from the other side. Maybe you want to cause the hardship with the widows, orphans, the people that you have accused us of causing——

[Laughter and applause.]

Mr. CHILES. Mr. President, I did not hear that.

Mr. DOLE. I hope we can make an agreement and dispose of the Democratic leadership proposal tonight or agree to vote at 9:30 tomorrow morning. I think that in and of itself would be an indication that we are serious about the crisis.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. The 5-hour agreement is part of the overall proposal that we presented. We have agreed to proceed with the amendment with the understanding that there be an up-or-down vote on it. As to a time limit, let us wait and see how things go. Perhaps the distinguished majority leader will be able to report back to us tomorrow morning that the other side of the aisle is willing to accept the agreement, in which case the 5 hours would be a part of that agreement. Unless it can be a part of the overall agreement. I do not think that at this hour of the night we ought to agree to 5 hours on the leadership proposal. After all, they have had 5 days—Friday, Saturday, Sunday, Monday, and Tuesday—on the Gramm amendment. Now we are going to limit ourselves to 5 hours on this amendment, half of which can be turned back without an overall agreement on all amendments.

Mr. DOLE. Mr. President, if the minority leader will yield, I have a proposal that I would be very happy to submit. It was being typed when we were discussing this subject earlier. We would take a very short time on the Gramm-Rudman-Hollings amendment, a couple of hours at most, then pass a short-term debt ceiling and then consider only the following relevant amendments: Armstrong, Glenn, Durenberger, Leahy, Symms, Armstrong, Boren, Mattingly-Bradley, Bradley, and Moynihan.

We would complete final action on the bill by 6 o'clock Wednesday evening. That is tomorrow.

I think there is a larger question here than how much time we have. I am serious about it. I do not want to get into a quarrel with my friends on the other side. But if, in fact, we have a problem, we ought to try to address it. If we want to simply play games, we can put the vote off until Thursday or even Friday. If we are going to vote Thursday—I am inclined to vote on Friday of this week. Friday is a pretty good day to vote. If it has to be Thursday, maybe it ought to be Friday. However, the amendment is up and I hope we can dispose of it this evening.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The minority leader.

Mr. BYRD. Mr. President, nobody wants to play games. We are interested in getting a serious agreement. We want to see action completed on this measure no later than Thursday evening at the close of business. I hope we all understand that. We have made every effort in good faith to reach a conclusion on this legislation. It is not our fault that it was not brought up until last Thursday. We do not schedule the program here. This was brought up last Thursday. It could have been brought up earlier.

I would hope that we would get on with business with an understanding that the Democratic leadership proposal is a serious proposal. It is entitled to whatever debate is required for a complete understanding of it by Members on both sides. We would want it understood that it is entitled to careful scrutiny. We have been saying all the time, "What is in the Gramm amendment? What is in it? We do not understand what is in it?"

Now we are talking about calling up this amendment and debating it for 5 hours when the other amendment has had 5 days.

Mr. GORE. Will the minority leader yield for a request?

Mr. BYRD. I yield.

Mr. GORE. Is it true that if the unanimous-consent request you proposed to the majority leader was agreed to, then there would not only be final action on the Gramm-Rudman-Hollings amendment on Thursday, but there would also be no ill consequences from the Government running out of money between now and the close of business on Thursday because of the 10-day temporary extension of the debt limit? So we would accomplish both of our objectives: We would have expeditious action on the Gramm-Rudman-Hollings-Boren amendment, and we would avoid any ill effects of this crisis that we are careening toward because of the inability to get consent on the other side. Is that not the effect of the unanimous-consent request?

Mr. BYRD. The Senator is correct.

Mr. GORE. I thank the minority leader.

Mr. DOLE. Mr. President, I ask unanimous consent that at not later than 3 p.m. tomorrow we vote on the Gramm-Rudman-Hollings amendment.

Mr. LEVIN. Reserving the right to object, would the majority leader protect the other amendments prior to that as well as setting forth a time for the leadership amendment so that the leadership can identify when that time will be and then determine whether or not he wants to object?

Mr. DOLE. I will indicate that we are going to protect those who indicated they wanted protection, including the Senator from New Jersey. His amendment would follow a vote on Gramm-Rudman. We are prepared to accept the amendment of Senator LEVIN prior to that vote.

Mr. METZENBAUM. What is the request?

The PRESIDING OFFICER (Mr. BOSCHWITZ). That was a unanimous-consent request——

Mr. METZENBAUM. I cannot hear the Presiding Officer.

The PRESIDING OFFICER. First, there are two unanimous-consent requests before the Senate. First that there be 5 hours of debate equally divided to debate the Democratic leadership package. A second unanimous-consent request is to vote on the Gramm-Rudman package at 3 p.m. tomorrow.

Mr. DOLE. I will withdraw the last half of that request for the time being until we have a ruling on the first half.

The PRESIDING OFFICER. Is there objection?

Mr. RIEGLE. Reserving the right to object, may I pose a question to the majority leader? In order to resolve the problem, getting final disposition of the Democratic package and the

Gramm package, would the majority leader be willing to have as part of the vote on the Gramm package an amendment to it that would at the same time carry with it short-term deficits so that we solve both of those problems simultaneously? Can we do it that way? Frankly, what I am concerned about is that I do not want to see a situation arise where we dispose of all the amendments on this side and send it over to the House where maybe they have a matter of a few hours before the Government runs out of money and they do not have any chance for an orderly consideration.

Could we solve the problem with the short-term debt extension not affecting the final vote on Gramm and, in a sense, having a fairer arrangement which would protect everybody?

Mr. DOLE. Let me indicate to my colleague from Michigan that it would be my intention, and I have just given the distinguished minority leader the Republican counterproposal, that as soon as we complete action on the Gramm-Rudman amendment we would immediately move to the short-term debt extension through October 17, through next Thursday. That can be disposed of subsequently. I do not see why you would have to have it at the same time. It would be immediately following the vote on Gramm-Rudman. It would go to the House tomorrow afternoon. If they are in session tomorrow they could act on the extension. It would take the pressure off around the country. The Federal Reserve would not go to all the banks tomorrow concerning Government checks. I think it would be helpful to all of us.

Mr. RIEGLE. May I ask one more question? Suppose there were not the votes here to pass the short-term extension? There is no guarantee. Why not draft onto the proposal that it is the intent to accomplish both things simultaneously? Why not make that in addition to the Gramm proposition so that when we vote on one we take care of both problems?

Mr. DOLE. It is my own view that that is a distinction I do not totally understand. Let me think about it.

What we have to do is get the extension over there at the earliest possible time. Even if we were to act on Gramm-Rudman at 3 o'clock, there are still nine amendments on the list. We will be lucky to finish tomorrow evening because of previous conflicts. That means finishing it on Thursday morning. In the meantime, we could have sent the short-term extension to the House and they could complete action on it. We would be able to complete action on this final package and move on to reconciliation and probably complete our work for the week on Thursday afternoon.

Mr. President, I will withdraw my second request, but I would like to renew the request that we have some time agreement on the pending amendment. If the minority leader rather I not make that request at this time, I will withhold.

So there is no request pending. Let us get on with the amendment. Let us not filibuster the amendment before it comes up.

The PRESIDING OFFICER. The request is withdrawn.

Mr. EXON. Will the majority leader yield for a very short question?

Mr. DOLE. Yes, Mr. President.

Mr. EXON. Two-and-a-half hours ago, the majority leader asked me if I were prepared to offer my amendment. I have been here for 2½ hours. I have not delayed anything. I hope he would include this Senator's request that I be protected. If not, I shall be here to protect myself.

Mr. DOLE. The Senator from Nebraska can be assured that he will be protected if I have missed something. I compliment him for his demeanor and for having been here all evening.

Mr. EXON. I thank the Senator.

AMENDMENT NO. 743

Purpose: To require a graduated reduction of the Federal budget deficit, to establish emergency procedures to avoid unanticipated deficits, and for other purposes

Mr. CHILES. Mr. President, I send an amendment to the desk on behalf of myself and Senator BYRD, Senator JOHNSTON, Senator EXON, Senator LEVIN, Senator BENTSEN, Senator DIXON, Senator CRANSTON, and others, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Florida [Mr. CHILES] for himself and Mr. BYRD, Mr. JOHNSTON, Mr. EXON, Mr. LEVIN, Mr. BENTSEN, Mr. CRANSTON, and Mr. DIXON, proposes an amendment numbered 743.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The amendment is as follows:

In lieu of the pending amendment to the motion to commit, insert the following new section:

SEC. . DEFICIT REDUCTION PROCEDURES.

(a) CONGRESSIONAL BUDGET PROCESS.—

(1) One concurrent resolution on the budget required annually.—

(A) IN GENERAL.—Section 310 of the Congressional Budget Act of 1974 is amended—

(i) by striking out all beginning with "Sec. 310. (a)" through "necessary—" in the matter preceding paragraph (1) of subsection (a) and inserting in lieu thereof the following:

"SEC. 310. (a) IN GENERAL.—Any concurrent resolution on the budget considered under section 301 or section 304 for a fiscal year shall, to the extent necessary—"; and

(ii) by striking out subsection (b) and redesignating subsection (c) as subsection (b).

(B) CONFORMING CHANGES.—

(i) The table of contents in subsection (b) of subsection 1 of the Congressional Budget and Impoundment Control Act of 1974 is amended—

(I) by striking out "Adoption of first concurrent resolution" in the item relating to section 301 and inserting in lieu thereof "Annual adoption of concurrent resolution";

(II) by striking out "First concurrent resolution" in the item relating to section 303 and inserting in lieu thereof "Concurrent resolution"; and

(III) by striking out "Second required concurrent resolution and reconciliation" in the item relating to section 310 and inserting in lieu thereof "Reconciliation".

(ii) Paragraph (4) of section 3 of such Act is amended—

(I) by adding "and" after the semicolon at the end of subparagraph (A);

(II) by striking out subparagraph (B); and

(III) by striking out "(C) any other" and inserting in lieu thereof "(B) a".

(iii) Section 300 of the Congressional Budget Act of 1974 is amended—

(I) by striking out "first" in the item relating to April 15 and in the second item relating to May 15; and

(II) by striking out the items relating to September 15 and September 25.

(iv)(I) The heading of section 301 of the Congressional Budget Act of 1974 is amended to read as follows:

"ANNUAL ADOPTION OF CONCURRENT RESOLUTION".

(II) Section 301(a) of such Act is amended by striking out "the first concurrent resolution on the budget" in the first sentence and inserting in lieu thereof "a concurrent resolution on the budget".

(III) Section 301(b) of such Act is amended—

(aa) by striking out "first concurrent resolution on the budget" in the matter preceding paragraph (1) and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)"; and

(bb) in paragraph (1) by striking out all beginning with "the concurrent resolution" through "both" the second place it appears and inserting in lieu thereof "the Congress has completed action on any reconciliation bill or reconciliation resolution, or both, required by such concurrent resolution to be reported in accordance with section 310(b)".

(IV) Section 301(d) of such Act is amended by striking out "first" each place it appears.

(V) Section 301(e) of such Act is amended—

(aa) by striking out "set for" in paragraph (1) and inserting in lieu thereof "set forth"; and

(bb) by striking out "first concurrent resolution on the budget" each place it appears and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)".

(v) Section 302(c) of such Act is amended by striking out "or 310".

(vi)(I) The heading of section 303 of such Act is amended by striking out "First".

(II) Section 303(a) of such Act is amended by striking out "first concurrent resolution on the budget" in the matter following paragraph (4) and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(vii) Section 304 of such Act is amended—

(I) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)"; and

(II) by striking out "pursuant to section 301".

(viii)(I) Section 305(a)(3) is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(II) Section 305(b) of such Act is amended—

(aa) in paragraph (1) by striking out ", except that" and all that follows through "15 hours"; and

(bb) in paragraph (3) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(ix) Section 308(a)(2)(A) of such Act is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(x) Paragraph (1) of section 309 of such Act is amended by striking out ", and other than the reconciliation bill for such year, if required to be reported under section 310(c)".

(xi) Section 310(f) of such Act is amended by striking out "subsection (a)" and inserting in lieu thereof "301(a)".

(xii) Section 311(a) of such Act is amended—

(I) by striking out "310(a)" the first place it appears and inserting in lieu thereof "301(a)"; and

(II) by striking out "310(c)" and inserting in lieu thereof "310(b)".

(xiii) Clause 1. of Rule XLIX of the Rules of the House of Representatives is amended by striking out ", 304, or 310" and inserting in lieu thereof "or 304".

(2) MAXIMUM DEFICIT AMOUNTS.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) POINT OF ORDER.—Section 301 of the Congressional Budget Act of 1974 is amended by redesignating subsection (c), (d), and (e) as subsections (d), (e), and (f), respectively, and inserting after subsection (b) the following new subsection:

"(c) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) The provisions of paragraph (1) shall not apply in any fiscal year in which—

"(A) a declaration of war is in effect;

"(B) the Armed Forces of the United States are engaged in combat; or

"(C) the Congressional Budget Office projects there will be a recession.

For purposes of this paragraph, the term 'recession' means a decline in the gross national product or increase in the unemployment rate during any two consecutive fiscal quarters.".

(ii) CONFORMING CHANGE.—Section 301(e) of such Act, as redesignated by clause (i) of this subparagraph, is amended by inserting "; and when so reported such concurrent resolution shall comply with the requirement described in paragraph (1) of subsection (c), unless such paragraph does not apply to such fiscal year by reason of paragraph (2) of such subsection" after "October 1 of such year" in the second sentence thereof.

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—Section 304 of such Act is amended—

(i) by inserting "(a) IN GENERAL.—" after "Sec. 304."; and

(ii) by adding at the end thereof the following new subsection:

"(b) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) The provisions of paragraph (1) shall not apply in any fiscal year in which—

"(A) a declaration of war is in effect;

"(B) the Armed Forces of the United States are engaged in combat; or

"(C) the Congressional Budget Office projects there will be a recession.

For purposes of this paragraph, the term 'recession' means a decline in the gross national product or increase in the unemployment rate during any two consecutive fiscal quarters.".

(C) DEFINITIONS.—Section 3 of the Congressional Budget and Impoundment Control Act of 1974 is amended by adding at the end thereof the following new paragraphs:

"(6) The term 'deficit' means, with respect to any fiscal year, the amount by which total budget outlays for such fiscal year exceed total revenues for such fiscal year.

"(7) The term 'maximum deficit amount' means—

"(A) with respect to the fiscal year beginning October 1, 1985. $170,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1986, $134,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1987, $96,000,000,000;

"(D) with respect to the fiscal year beginning October 1, 1988, $52,000,000,000;

"(E) with respect to the fiscal year beginning October 1, 1989, $000,000,000,000; and

"(F) with respect to the fiscal year beginning October 1, 1990, $000,000,000,000.".

(3) RECONCILIATION.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) DIRECTIONS TO COMMITTEES.—Section 301(b) of the Congressional Budget Act of 1974 (as amendment by paragraph (1)(B)(iv)(III) of this subsection) is further amended—

(I) by striking out "may also require" in the matter preceding paragraph (1) and inserting in lieu thereof "shall also, to the extent necessary to comply with subsection (c)";

(II) by inserting "require" after the paragraph designation in paragraph (1);

(III) by inserting "require" after the paragraph designation in paragraph (2); and

(IV) by redesignating paragraphs (1) and (2) as paragraphs (2) and (3), respectively, and inserting before paragraph (2) (as so redesignated) the following new paragraph:

"(1) specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a);".

(ii) CONFORMING CHANGES.—

(I) Section 310(a) of such Act is amended—

(aa) by inserting "or" at the end of paragraph (2);

(bb) by striking out "; or" at the end of paragraph (3) and inserting in lieu thereof a period; and

(cc) by striking out paragraph (4).

(II) Section 310(d) of such Act is amended by striking out "subsection (c)" and all that follows through "year" and inserting in lieu thereof "subsection (b) with respect to a concurrent resolution on the budget adopted under section 301(a) not later than May 30 of each year".

(III) Subsections (e) and (f) of section 310 of such Act are amended by striking out "subsection (c)" each place it appears and inserting in lieu thereof "subsection (b)".

(IV) Section 300 of such Act is amended by inserting immediately after the second item relating to May 15 the following new item:

"May 30	Congress completes action on reconciliation bill or resolution, or both, implementing first required concurrent resolution.".

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—

(i) IN GENERAL.—Section 304(a) of such Act (as redesignated by paragraph (2)(B)(i) of this subsection) is amended by adding after the period the following new sentence: "Any concurrent resolution adopted under this section shall specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a) to the extent necessary to comply with subsection (b).".

(ii) CONFORMING CHANGE.—Section 310(d) of such Act (as amended by subparagraph (A)(ii)(II) of this paragraph) is further amended by adding at the end thereof the following new sentence: "Congress shall complete action on any reconciliation bill or reconciliation resolution reported under subsection (b) with respect to a concurrent resolution on the budget adopted under section 304(a) not later than 30 days after the adoption of the concurrent resolution.".

(4) ENFORCEMENT.—

(A) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 311(b) of such Act is amended by inserting before the period at the end thereof the following: ", or would otherwise result in a deficit for such fiscal year that exceeds the maximum deficit amount specified for such fiscal year in section 3(7) (except to the extent that paragraph (1) of subsection (b) of section 310 does not apply by reason of paragraph (2) of such subsection)".

(B) REPORTING REQUIREMENT EXTENDED TO CONFERENCE REPORTS.—Section 308(a) of such Act is amended by striking out "the report accompanying that bill or resolution" in the matter preceding paragraph (1) and inserting in lieu thereof the following: "or whenever a conference report is filed in either House, the report accompanying that bill or resolution or the statement of managers accompanying that conference report".

(b) BUDGET SUBMITTED BY THE PRESIDENT.—

(1) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.— Section 1105 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(f)(1) Subject to paragraph (2) of this subsection, the deficit set forth in the budget so transmitted for any fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974, with budget outlays and Federal revenues at such levels as the President may consider most desirable and feasible.

"(2) The provisions of this subsection shall not apply in any fiscal year in which—

"(A) a declaration of war is in effect;

"(B) the Armed Forces of the United States are engaged in combat; or

"(C) the Congressional Budget Office projects there will be a recession.

For purposes of this paragraph, the term 'recession' means a decline in the gross national product or increase in the unemployment rate during any two consecutive fiscal quarters.".

(2) REVISIONS AND SUPPLEMENTAL SUMMARIES.—Section 1106 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) Subsection (f) of section 1105 shall apply to revisions and supplemental summaries submitted under this section to the same extent that such subsection applies to the budget submitted under section 1105(a) to which such revisions and summaries relate.".

(c) DEFICIT REDUCTION PROCEDURES.—

(1) CURRENT SERVICES SUBMISSION BY PRESIDENT.—With the estimated budget outlays and proposed budget authority submitted under section 1109 of title 31, United States Code, the President shall include—

(A) a separate statement specifying—

(i) an estimate of outlays and revenues for the current fiscal year; and

(ii) an estimate of whether the deficit for the current fiscal year will exceed the maximum deficit amount for such fiscal year, the amount of any such excess, and a determination of whether such excess is statistically significant; and

(B) in any case in which the President estimates pursuant to clause (ii) of subparagraph (A) that the deficit for the current fiscal year will exceed the maximum deficit amount for such fiscal year by a statistically significant amount, a deficit control message which complies with paragraph (2).

(2) DEFICIT CONTROL MESSAGE.—A deficit control message for a fiscal year shall—

(A) specify the amount by which the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year; and

(B) contain proposals by the President for increases in revenues and decreases in budget authority and outlays which will result in the reduction of the deficit for such fiscal year to an amount which is less than or equal to the maximum deficit amount for such fiscal year.

(d) BUDGET SUBMISSION BY PRESIDENT.—With the budget submitted to the Congress under section 1105 of title 31, United States Code, for a fiscal year, the President shall include—

(1) a separate statement which—

(A) specifies the matters specified in subparagraph (A) of subsection (c)(1) with respect to the current fiscal year;

(B) specifies an estimate of whether the deficit for the fiscal year for which the budget is submitted will exceed the maximum deficit amount for such fiscal year; and

(2) in any case in which the President estimates that the deficit for the current fiscal year will exceed the maximum deficit amount for such fiscal year, a deficit control message for such fiscal year which complies with paragraph (2) of subsection (c).

(e) INDEPENDENT ESTIMATES.—

(1) REPORT REQUIRED.—Not later than 14 days after the President submits estimates pursuant to section 1109 of title 31, United States Code, and not later than 14 days after the President submits a budget pursuant to section 1105 of such title, the Director of the Congressional Budget Office shall submit a report to the Committees on the Budget of the Senate and the House of Representatives. Each such report shall include—

(A) a statement of the amount (if any) by which the deficits for the current and following fiscal years will exceed the maximum deficit amounts for such fiscal years;

(B) a statement of the amount by which the deficit for the most recently completed fiscal year was reduced under the provisions of this section;

(C) a statement of the amounts by which the budget authority for national defense for the current fiscal year shall be reduced in order to reduce, by a proportionate share, the excess set forth pursuant to subparagraph (A) with respect to such fiscal year;

(D) a statement of the amounts by which—

(i) the budget authority and outlays for inflation adjustments including an identification and quantification of implicit inflation adjustments for non-means-tested nondefense entitlements (other than Social Security) and budget authority for non-means-tested nondefense discretionary programs; and

(ii) amounts made available for a fiscal year to the Secretary of Agriculture or the Commodity Credit Corporation to carry out a program to provide price support to producers of an agricultural commodity (including any program under which payments are made to producers as target price payments or for participation in a reduced acreage, acreage set-aside, or acreage diversion program);

shall be reduced across-the-board for the current fiscal year in order to reduce, by their proportionate share, the amount of the excess set forth in such report pursuant to subparagraph (A) with respect to such fiscal year;

(E) a statement of the extent to which the proposals set forth in the most recent deficit control message submitted by the President pursuant to subsection (c) or (d) would, if enacted, eliminate the amount of the excess for the current fiscal year set forth in such report pursuant to subparagraph (A).

(2) TREATMENT OF EXISTING CONTRACTS.—For purposes of subparagraphs (A) through (F) of paragraph (1), funds for existing contracts shall be included in any reduction unless—

(A) penalty provisions in such contract would produce a net loss to the Government;

(B) reduction of the contract violates legal obligations of the Government; or

(C) reduction would cause a program, project, or activity to be terminated or render such program, project, or activity infeasible.

(3) CONGRESSIONAL ACTIONS TAKEN INTO ACCOUNT.—In determining the amounts by which budget authority and outlays shall be reduced under subparagraphs (C) and (D) of paragraph (1) for a fiscal year, the Director shall take into account actions already taken by the Congress with respect to that fiscal year.

(4) DETAILS REQUIRED.—Any report submitted under this subsection shall specify an equal percentage reduction in budget authority for each appropriation account and for each program, project, or activity within each such account. If it is not administratively feasible to continue any such program, project, or activity at the reduced level, the report shall specify such lesser reduction as will make such program, project, or activity feasible, and shall reduce other programs, projects, or activities in the same amount to compensate for such adjustment.

(f) DEFICIT REDUCTION RESOLUTION.—

(1) IN GENERAL.—Within 30 days after the Congress receives a deficit control message under subsection (c) or (d), the Committee on the Budget of the House and the Committee on the Budget of the Senate shall report to their respective Houses a deficit reduction resolution. A deficit reduction resolution shall specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a) of the Congressional Budget Act of 1974 in a manner which will result in the reduction of the deficit for the current fiscal year to an amount which is less than or equal to the maximum deficit amount for such fiscal year.

(2) COMPLETE ACTION.—The Congress shall complete action on a deficit reduction resolution with respect to a deficit control message within 40 days after receiving such message under subsection (c) or (d).

(3) REPORT TO BUDGET COMMITTEES.—If a deficit reduction resolution is agreed to in accordance with paragraph (2) containing directions to one or more committees to determine and recommend changes in laws, bills, or resolutions, and—

(A) only one committee of the House or the Senate is directed to determine and recommend changes, that committee shall promptly make such determination and recommendations and shall, within 50 days after the deficit reduction message with which such resolution is concerned was received by the Congress under subsection (c) or (d), report to its House a deficit reduction bill containing such recommendations; or

(B) more than one committee of the House or the Senate is directed to determine and recommend changes, each such committee so directed shall promptly make such determination and recommendations, and shall within 50 days after the deficit reduction message with which such resolution is concerned was received by the Congress under subsection (c) or (d), report such recommendations to the Committee on the Budget of its House, which upon receiving all such recommendations, shall report immediately to its House a deficit reduction bill, with such committee amendments as are necessary to eliminate any recommendations not directly related to reducing the excess deficit.

(4) COMPLETE ACTION.—Congress shall complete action on any deficit reduction bill reported under this subsection not later than 60 days after the date on which the deficit reduction message with which such bill is concerned was received by the Congress under subsection (c) or (d).

(5) PROCEDURE.—

(A) Except as provided in subparagraph (B), the provisions of subsections (b) and (c) of section 305 of the Congressional Budget Act of 1974 for the consideration in the Senate of concurrent resolutions on the budget and conference reports thereon shall also apply to the consideration in the Senate of deficit reduction bills and deficit reduction resolutions reported under this subsection and conference reports thereon.

(B) Debate in the Senate on any deficit reduction bill or deficit reduction resolution reported under this subsection, and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to not more than 20 hours.

(g) AUTOMATIC DEFICIT REDUCTION.—

(1) FAILURE TO COMPLETE ACTION.—If the Congress does not complete action on a deficit reduction bill for a fiscal year within 60 days after the Congress receives a deficit reduction message for such fiscal year under subsection (c) or (d), the President shall issue an order which implements the reductions in budget authority and outlays contained in the most recent report of the Director of the Congressional Budget Office under subsection (e). An order of the President under this paragraph shall not provide for the reduction of budget authority and outlays, in any manner which differs from the manner specified by the Director of the Congressional Budget Office in such report. Notwithstanding any other provision of law, amounts made available for a fiscal year to the Secretary of Agriculture or the Commodity Credit Corporation to carry out a program to provide price support to producers of an agricultural commodity (including any program under which payments are made to producers as target price payments or for participation in a reduced acreage, acreage set-aside, or acreage diversion program) shall be reduced by the amounts specified in such report.

(2) INSUFFICIENT DEFICIT REDUCTION.—

(A) REPORT BY THE DIRECTOR OF THE CONGRESSIONAL BUDGET OFFICE.—If the Congress completes action on a deficit reduction bill for a fiscal year within 60 days after the Congress receives a deficit reduction message for such fiscal year, the Director of the Congressional Budget Office shall, within 5 days after such action is completed, prepare and transmit to the President and the Congress a report which determines whether such bill contains sufficient reductions in budget authority and outlays to reduce the deficit for such fiscal year to an amount which is less than or equal to the maximum deficit amount for such fiscal year.

(B) DETERMINATION BY DIRECTOR.—If, in preparing the report required by subparagraph (A), the Director of the Congressional Budget Office determines that a deficit reduction bill for a fiscal year does not make sufficient reductions in budget authority and outlays to reduce the deficit for such fiscal year to an amount which is less than or equal to the maximum deficit amount for such fiscal year, the Director shall include in such report—

(i) a specification of the amount by which the deficit must be reduced for such fiscal year (in addition to the reduction in the deficit that will result from the implementation of such bill) in order to reduce the deficit for such fiscal year to an amount which is less than or equal to the maximum deficit amount for such fiscal year; and

(ii) a statement which revises the most recently completed report under subsection (e) with respect to such fiscal year in order to specify the reductions in budget authority and outlays which are necessary (after the implementation of such bill) to reduce the deficit for such fiscal year to an amount which is less than or equal to the maximum deficit amount for such fiscal year.

(3) IMPLEMENTATION.—If the Director includes in the report required under paragraph (1)(A) the statement described in paragraph (2)(B)(ii), the President shall issue an order implementing the reductions on budget authority and outlays contained in such statement. An order of the President under this paragraph shall not provide for the reduction of budget authority and outlays in any manner which differs from the manner prescribed by the Director in such statement.

(4) AUTOMATIC REDUCTIONS NOT TRIGGERED BY VETO.—The President shall not issue any order under this subsection if the Congress completes action on a deficit reduction bill (that will reduce the deficit to not greater than the maximum deficit amount) within the 60-day period specified in paragraph (1) or paragraph (2)(A) but the President does not approve, or disapproves such bill.

(5) REQUEST FOR SUPPLEMENTAL APPROPRIATIONS.—

(A) If the President determines that the amount of the reductions in budget authority required for national defense for a fiscal year under paragraph (1) or (3) will endanger national security, the President may submit to the Congress a request for supplemental appropriations in an amount not to exceed the amount of such reduction.

(B) Amounts appropriated pursuant to a request under subparagraph (A) may be used only for—

(i) programs, projects, and activities that are within functional category 050 on the date of the enactment of this Act; and

(ii) programs, projects, and activities that the President determines are vital to the national security.

(C) For the 30-day period beginning with the day on which the President submits a request under subparagraph (A), the President is not required to reduce budget authority for national defense by the amount of budget authority requested.

(h) PRESIDENTIAL PROPOSALS FOR DEFICIT REDUCTION.—

(1) IN GENERAL.—If the President disapproves, or does not approve, a deficit reduction bill for a fiscal year, the President shall submit to the Congress, within 15 days after the Congress completes action on such bill, proposals for legislation to reduce the deficit for such fiscal year to an amount which is less than or equal to the maximum deficit amount for such fiscal year.

(2) RECONCILIATION INSTRUCTIONS.—If the President submits proposals for legislation under paragraph (1), the concurrent resolution on the budget required to be reported under section 301(a) of the Congressional Budget Act of 1974 on May 15 of the fiscal year in which such proposals are submitted shall contain specifications and directions described in section 310(a) of such Act which will result in the reduction of the deficit for the current fiscal year to an amount which is equal to or less than the maximum deficit amount for such fiscal year.

(3) AUTOMATIC DEFICIT REDUCTION.—If a concurrent resolution on the budget contains specifications and directions in accordance with paragraph (2), and the Congress does not complete action on a reconciliation bill which implements such specifications amd directions in a manner which will result in the reduction of the deficit for the current fiscal year to an amount which is less than the maximum deficit amount for such fiscal year, the President shall issue an order which implements the most recently completed report of the Director of the Congressional Budget Office under subsection (e) for such fiscal year. An order of the President under this paragraph shall not provide for the reduction of budget authority and outlays in any manner which differs from the manner prescribed by the Director in such report.

(i) FUNDING PRIORITIES.—

(1) PRESIDENTIAL PROPOSALS.—In developing proposals to be included in a deficit control message under subsection (c) or (d), the President shall give priority to funding those programs that constitute an investment in future economic growth, including programs for—

(A) education and job training;

(B) scientific research and development; and

(C) export promotion.

(2) CONGRESSIONAL PROPOSALS.—In developing proposals to be included in a deficit control bill or deficit control resolution under subsection (f), the Congress shall give priority to funding those programs that constitute an investment in future economic growth, including programs for—

(A) education and job training;

(B) scientific research and development; and

(C) export promotion.

(j) APPLICATION.—

(1) IN GENERAL.—The provisions of subsections (c) through (i) shall not apply in any fiscal year in which—

(A) a declaration of war is in effect;

(B) the Armed Forces of the United States are engaged in combat; or

(C) the Congressional Budget Office projects there will be a recession.

For purposes of this subsection, the term "recession" means a decline in the gross national product or increase in the unemployment rate during any two consecutive fiscal quarters.

(2) PAYBACK OF EXCESS.—

(A) IN GENERAL.—If pursuant to paragraph (1), the provisions of subsections (c) through (i) are not in effect for a fiscal year, and the deficit for such fiscal year exceeds the maximum deficit amount for such fiscal year, the maximum deficit amount specified in section 3(7) of the Congressional Budget Act of 1974 for each of the succeeding three fiscal years shall be reduced by an amount equal to the sum of—

(i) one-third of the amount by which the deficit exceeded the maximum deficit amount in such preceding fiscal year; and

(ii) the amount of any interest which will be payable on the public debt as a result of the amount described in subparagraph (A), except as provided in subparagraph (B).

(B) EXCEPTION.—If, pursuant to subparagraph (A), the maximum deficit amount for a fiscal year is required to be reduced, and if the maximum deficit amount specified in section 3(7) of the Congressional Budget Act of 1974 for such fiscal year is zero, the concurrent resolution on the budget under section 301 of the Congressional Budget Act of 1974 for such fiscal year shall set forth, in the aggregate, a recommended level of Federal revenues which exceeds the appropriate level of total budget outlays set forth in such concurrent resolution for such fiscal year by an amount which is at least equal to the amount by which such maximum deficit amount would have been required to be reduced for such fiscal year pursuant to sub-

paragraph (a) but for the operation of this subparagraph.

(k) DEFINITIONS.—For purposes of subsections (c) through (j) of this section:

(1) The term "budget outlays" has the meaning given to such term in section 3(1) of the Congressional Budget and Impoundment Control Act of 1974.

(2) The term "concurrent resolution on the budget" has the meaning given to such term in section 3(4) of the Congressional Budget and Impoundment Control Act of 1974.

(3) The term "deficit" has the meaning given to such term in section 3(6) of the Congressional Budget and Impoundment Control Act of 1974.

(4) The term "maximum deficit amount" has the meaning given to such term in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974.

(5) The amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year shall be treated as "statistically significant" if the amount of such excess is greater than 5 percent of such maximum deficit amount.

(6) The term "non-means-tested nondefense entitlement" shall be defined by the Director of the Director of the Congressional Budget Office, and shall include the following programs: Guaranteed Student Loans, Adoption Assistance, Foster Care, Medicaid, Child Nutrition, Special Milk, Food Stamps, Nutrition Assistance for Puerto Rico, Earned Tax Credit, Aid to Families with Dependent Children, Supplemental Security, Income, Veterans' Pensions, Veterans' Compensation.

(7) The term "non-means-tested nondefense discretionary program" shall be defined by the Director of the Congressional Budget Office, and shall include the following programs: Section 202 Handicapped and Elderly Housing, Chapter 1 of the Education Consolidation and Improvement Act, Head Start, Pell Grants, Education of the Handicapped, Supplemental Feeding (WIC), Subsidized Housing, Low-Income Energy Assistance.

(8) The term "inflation adjustments for non-means-tested entitlements" includes a quantification and identification of implicit inflation adjustments requiring, by law, increased federal expenditures.

(9) The term "proportionate share" means, with respect to defense and nondefense programs for a fiscal year, the ratio (expressed as a percentage) of outlays for defense and nondefense programs, respectively, for the prior fiscal year to all outlays taken into account for purposes of making reductions under this section for such prior fiscal year.

(l) The provisions of subsections (a), (e), (f), (g)(2), and (g)(3) of this section are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

(m) EFFECTIVE DATE.—This section and the amendments made by this section shall become effective on the date of the enactment of this section and shall apply with respect to fiscal years beginning after September 30, 1985, and before October 1, 1990.

Mr. SIMPSON. Mr. President, I ask for the yeas and nays on the pending amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Let there be order in the Senate.

Mr. CHILES. Mr. President, the Gramm-Rudman plan was introduced 5 days ago and already the President has accused some in the Senate of dragging their feet on deficit reduction. It seems to me, Mr. President, the President should be a little embarrassed to say something like that. When you compare 5 days to the past 5 years during which the President has submitted budgets adding $1 trillion to the national debt, it is a little bit hard for him to complain.

Already we see that the Gramm-Rudman plan has been modified to suit the extra military spending desires of the President. Already the allowable deficit figures have been raised to accommodate the White House. And already the goal of a balanced budget has been pushed back a year until 1991.

If the President really wants action, it seems to me we should act now. No more down payments. No more excuses about last year, this year, or next year being a political year. No more layaways for next year. Let us get moving right away, this year.

Along with a number of my colleagues, I have prepared a modification of the Democratic leadership amendment. It would become effective almost at once. It calls for a $10 billion cut in the deficit right now, compared to the $20 billion increase in Gramm-Rudman. It would cut the deficit to zero by 1990. And that is exactly the goal set by the budget plan Senator HOLLINGS joined me in sponsoring this year.

The revised plan would forego revenues as a mandated feature of the automatic reductions in the event the deficit targets are not met. Yet the basic constitutional balance would remain "as is," with the Congress and the President sharing the responsibility for an assault on deficits.

The Democratic leadership plan would not rule out revenues as a means of reaching deficit reduction goals. Congress could still include them. So what we would have is a two-part test of our intentions.

First, if we adopt this modification, we could see who is really serious about deficit reduction. With a $10 billion cut this year we would be on the move rather than stalled in the waiting room. And, second, if Congress chose to add some revenues by asking payment from those who pay nothing now, it would give the President a chance to show how serious he is about cutting deficits.

The President has finally been persuaded by Congress that it is time to cut the deficit. The congressional sentiment for action is strong. The President has been a little late to the service, but we welcome him to the flock. And we all have a strong sense of the choice between salvation and perdition. There is no time like the present to get on with the good works.

Mr. President, it is fitting that we should review a little history tonight. Earlier this year, there was a Democratic proposal. In fact, there were several of them. The majority leader had a proposal. There was a proposal by myself and Senator HOLLINGS. They would have called for balancing the budget by the year 1990. I think six Republicans voted for our proposal. We did not quite have the kind of interest for this 1990 timeframe budget we now are experiencing. But thank goodness, there is progress.

If we explore further the evolution of that plan, we will find that when the Budget Committee went to conference with the House, there was a proposal by Senator GORTON, myself, and others that would have balanced the budget in the year 1990 or 1991. That was a bipartisan proposal.

We no longer had just Democrats on the proposal. Senator HOLLINGS was not out there by himself anymore. SLADE GORTON was on board. I was on it. We had Senator HOLLINGS and others on it. It was a bipartisan plan designed to do the job.

What happened with that plan? We have short memories around here these days; the President is finally talking about all he wants to do on deficit reduction. But earlier this year when he had the chance, the President blinked. The President said he would not go along with our plan. Even though we went to the White House and said, "Mr. President, we know there are some revenues in this plan and you do not like revenues. You said at one time there was a group of Republicans who came down here and you said they bamboozled you because you said they claimed they were going to do more on the spending cut side than on the revenue side."

I reminded him that that was a group of Republicans, because we Democrats did not get invited to that meeting. Anyway, he felt he should have had $3 of spending cuts for every $2 of tax cuts. And he did not make it.

We said, "The offer we are making in the Gorton-Chiles-Hollings proposal is that we will lock in the spending cuts. We will lock them in by law before the revenues go into effect so you will not have to trouble yourself.

We will just make those proposals a part of the law."

Well, the President said no, he would not buy that. He would not accept any revenues.

You know what happened next Mr. President. The President excluded revenues and Speaker O'NEILL excluded COLA restraints. We ended up trying to cut the deficit by focusing on about one-third of the programs.

So we got what amounted to a one-third budget proposal. Yet, with what we had to work on, we got more cuts than anybody imagined we could, some $55 billion in reconciliation spending. It looks like that is on track. We hoped the Appropriations Committee would make about $8 billion in savings. That is not exactly on track, but we hope it will get back on track before this is over. But with what we had to work on, we felt we did pretty well.

Everybody said it would take some sort of outside event to get us moving along. It looks like Gramm-Rudman is that event.

I think that is fine, because Gramm-Rudman forces us to go further. But as we begin to examine it, it has become something of a moving target. It has changed. In the beginning we were supposed to start working on the deficit right away. But the authors of Gramm-Rudman changed their minds. In fact, if you look at the OMB growth numbers—and they are high growth projections—it looks like we will not do anything in 1986 and we will not do anything in 1987. I would rather see CBO numbers. The interesting thing is that the plan we have before us uses CBO numbers.

We know that the Congressional Budget Office is the nonpartisan group. We also know that OMB has never been nonpartisan, whether there was a Democrat as President or a Republican. It has always been an arm and an instrument of the administration. And there is no change during this administration.

So if we are going into some impartial plan that is going to have any automatic cuts, should we not provide that those cuts are achieved in an impartial way and have CBO be the arbiter? We thought so and so we put that into our proposition.

But back to OMB. If you use their high growth numbers, then we know we are looking for numbers in 1987 which means it probably will not go into effect any time prior to the 1986 elections. I suppose that is a happy thought if you are running for office in 1986. You can go out on the stump and say, "I supported a proposition that is going to bring us down to a balance. I have been faithful and I have been true." Yet you can go around to these groups and say, "You notice that none of you have been cut so you know I am protecting and looking after you." You sort of get to have your cake and eat it, too.

Mr. GRAMM. Will the Senator yield?

Mr. CHILES. When I finish my statement.

We on the Democratic side are serious about deficit reduction. We have a history of searching for more deficit cuts. We want the American people to know we are serious. We believe we should start now and not put this off until future years. Let us do this by 1990. Unfortunately, I am afraid that Gramm-Rudman makes the playing field 1 year longer and $23 billion wider. Our amendment is a drive for the goal line and we are serious about it.

I yield to my distinguished colleague from Texas.

Mr. GRAMM. The distinguished Senator from Florida makes reference to the Gramm-Rudman-Hollings amendment and makes the statement that under our amendment there would be no cuts before the 1986 election, but let me remind my colleague that under our path to achieve a zero balanced budget in fiscal 1991, that would require the President to submit a budget with no greater than a $144 billion deficit this year. In turn, it would not be in order to bring a budget to the floor of the Senate that had a deficit greater than $144 billion. Reconciliation mandated by June 15, and the sequester, if we fail to achieve our goal or went 5 percent over it, would be by October 1, and in fact there would be a substantial reduction in the deficit prior to the November election.

Mr. CHILES. I say to my good friend from Texas that I am not quite as sanguine, I guess, or trusting about this administration. I have seen it happen in other administrations as well, even in my party; that we will not get some phony projections when that budget comes up here, and with OMB being the projector, we will not get some phony numbers, and that budget will come in within that. And if you look and see what we have had in past years and how that budget has changed from 1 month to the next or from the time it was talked about until it moved on up in future years, you see that there have been many changes. And I might well think that there could be some changes at this time, too.

I yield the floor.

Mr. JOHNSTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, in a sense this debate is rather beside the point, it seems, because the Senate has decided what it is going to do, and that is it is going to enact the Gramm-Rudman-Hollings amendment. It seems that the Senate is not terribly interested in what is in the Chiles-Johnston-Bentsen-Byrd amendment or, indeed, what details are in the Gramm amendment. It is unfortunate that this whole thing has broken down into a partisan wrangle in which the suggestion is that looking at the details of legislation is somehow being against a balanced budget and somehow being for the Gramm-Rudman amendment is somehow being for the balanced budget. That is the question. Yea or nay, pick your side. That is the mood of the Senate.

I think that is very unfortunate, Mr. President, because what we are about here tonight and, indeed, what the House may get stampeded into is enacting what could be the most far-reaching piece of legislation that the Senate has ever passed.

Now, if it is that far reaching, then I hope and pray that it has the salutary results that its authors profess. But, Mr. President, I frankly fear that it will not.

A day or so ago, Mr. President, in the fine autumn sunshine as I walked to the Senate from the Hart Senate Office Building I came upon one of the chief supporters of this measure, whose name I will not state at this time, but I have since heard the same thing from another. We engaged in conversation about the Gramm-Rudman amendment. I said to that supporter, "Are you really serious about this amendment? Is this a serious piece of legislation or is it, rather, a posturing to put the Democrats on the spot and try to draw a difference between those who are for or against?" And he said, "Well, it is serious, indeed it is very serious, but," he said, "We don't seriously expect that it would ever come about because its results are so bad that both the President and the Congress would have to avoid it."

Now, therein, Mr. President, I think lies the whole case for Gramm-Rudman; that is, that if its results were ever triggered they would be so bad, so terrible for the country, that both the President and the Congress would recognize the folly of proceeding down that road and therefore they would avoid it. In other words, it is like the annual debt extension resolution; we always talk about not doing it and somehow it is avoided. Well, maybe what we would end up with, Mr. President, to some extent is another hoop we have to jump through like the annual debt extension, full of sound and fury, eventually and usually signifying nothing because the Congress goes along realizing that the bills have already been incurred, that they have to be paid and we proceed to pay them.

I suggest, though, Mr. President, that the potential for mischief in this measure is considerably more than

just another hoop to jump through, because it seems we are setting the scene for a train wreck without providing the means to avoid that wreck, or at least not providing any ready means to do so.

If I may just indicate what my research has shown, I think we can set the scene for what may well happen on the opening day, on New Year's Day, fiscal 1987.

Now, there is a present $17 billion difference between the $163 billion deficit in the budget resolution and the $80 billion target outlined in the amendment for fiscal 1986—$17 billion, which happens to be below the mark for requiring action.

However, Mr. President, the farm bill as reported by the House, according to OMB, contains an additional $10 billion in deficit. The Senate, according to OMB, has reported legislation which has as much as a $20 billion deficit.

In addition, we have what would probably be, according to our estimates, about an $8 billion appropriation shortfall, $2 billion that we are already over, and additional money which we will need for firefighting in the West. That is probably $500 to $600 million.

FEMA accounts will be used up by the storm on the gulf coast. There will probably need to be a supplemental for defense.

So that by the time you are finished, you will have an outlay shortfall, I believe, on New Year's Day for the fiscal year 1986 of $30 to $40 billion.

It is quite true that if CBO is correct in their estimates and if Congress comes in, for example, on the farm bill under the figures or at the figures the budget resolution projects, in that event, if all those happy things occur, we will not kick in this procrustean bed that would be required in 1986. I think that is very unlikely.

What has been the record of OMB and CBO in projecting deficits and of this Congress in doing so? How well can we make the system respond when we make cuts in terms of getting cuts in outlays? The answer is, not very well.

In fiscal year 1981, we, in Congress, recall how deep and painful—and I think unfair—in many respects those cuts were. We cut every program that the eye could see, from food stamps to school lunches to legal services to the Corps of Engineers—to everything except entitlements and national defense, which of course went up in that year.

However, Mr. President, between fiscal years 1981 and 1982, with all those cuts, we actually increased outlays by $53 billion. Between fiscal years 1984 and 1985, an additional $24 billion was added to outlays.

The point is that when you are trying to cut outlays, as opposed to budget authority, it is very difficult, it is virtually impossible, to get an immediate response, particularly in your big-ticket items such as national defense, where contracts are involved and the contracts spend out over a long period of time. You cannot get a response in outlays. The only way you can get a response in outlays, by and large, is to cut salaries, to cut entitlements, to cut those payments to individuals. The ability to get that done is very limited.

So here we are, Mr. President, with a history of big cuts in budget authority, big cuts in the budget which caused a lot of pain to a lot of people, turning around and finding that the last year we did not cut outlays but increased outlays, and increased the size of the deficit in terms of outlays.

So on New Year's Day for fiscal year 1987, we are going to find ourselves, I believe, having to cut some $30 to $40 billion in outlays; and if that is so, we will have to have an across-the-board cut in pay, to start with, of between 5.5 and 7.3 percent. That would assume a 100-percent spend-out in pay. Actually, the rate is only about 90 percent, so you can up that to about 6.5 to 8.5 percent, which would be required for an immediate pay cut under this legislation. In budget authority, it would require twice that amount.

Again, it is easy to say that is bad. I mean, to cut military pay by 7 or 8 percent across the board would be immediately harmful to the national defense. To bring back a cruiser from the Mediterranean because you do not have the training time would be harmful to the national defense. To cut training time for the new B-1 bomber would be harmful. We cannot do all those things. It is very well and good to say we cannot do those things, but this legislation sets the scene for doing it.

Mr. President, another thing that is a little-noticed detail against the very far-reaching provisions of this bill: I do not guess it is really important to talk about a detail such as this, but this bill, in effect, makes impossible the granting of supplemental appropriations, in my view, because it says this on page 16:

> After the Congress has enacted a joint resolution, it will not be in order to consider any bill or resolution, or any amendment to a bill or resolution, that provides for budget outlay or new budget authority in excess of the appropriate allocation of such outlays or authorities reported in section 302(b).

We have that same kind of provision in the Budget Act now, but the difference is that this bill does not allow you to waive points of order. It is out of order to do that, and you cannot waive the point of order.

For example, with respect to a supplemental for firefighting, which is a direct outlay—and we will have exceeded the fund for firefighting in the West this year by several hundred millions of dollars—in order to be able to have a supplemental appropriation for firefighting, you would have to take an equal amount from some other accounts, not in budget authority but in outlays.

The same is true for any other supplemental, whether it be for the FEMA account, which will have been exhausted completely—I understand by the hurricane which hit in the Mississippi and Florida areas—or for any other subject.

Mr. President, there are a couple of good points about the Gramm-Rudman amendment, and I sum them up as follows:

First, it requires the President to be a part of the process, to submit a budget which meets the targets. That, I must say, is a very great accomplishment, because we all know, at least inside the beltway, that it is the President's tax cuts and the President's defense buildup which are the driving force of this deficit. The President, who goes out on the front steps of the Capitol, and says, "Let's have a balanced budget amendment," never fails to submit a budget which not only fails to balance the budget or have any hope of balancing the budget, but also has deficits which are even larger than that of the so-called spendthrift Congress.

So this does have that advantage, and I compliment the authors at least on making the President a part of the action.

Second, it does ensure action by Congress. While action is obtained by Congress at the present time, under the Budget Act, Congress sometimes is slow to act.

So it does have those two strong points. But its problems far outweigh its strong points—those problems being that it deals with outlays instead of budget authority; there is no flexibility for those programs which provide for slow outlays; there is no provision made for revenue slowdowns, other than an actual recession, tightly defined.

In the final analysis, Mr. President, we set the scene for a showdown between the President and Congress, and I guess the question is whose head is hardest and I think I can tell this body that the head that is hardest will be the President's. He is not going to yield, in my judgment, on matters like national defense or on matters like an additional tax. I think we will set the scene for chaos.

Another relatively small point as far as the people around the country are concerned, but I think a very important one as far as this Constitution is concerned, has to do with the power of appropriations. In the final analysis this is the power to decide how we are going to spend the money.

There is an elaborate procedure set up under this bill which purports to say that a line item identified in a certain OMB publication must be cut on a pro rata basis, with a further provision that no project, activity, or program, if I recall the words, can be completely eliminated.

There is no statement as to duration or depth. Indeed, I was unable to get an answer the other day on the question whether that meant you could suspend for a year or 2 as long as you did not eliminate a project—I suppose you can do that. I suppose you could also give $1 to a project and that would be sufficient under this language. Of course, those who know the appropriations process know that some of the largest accounts of all are stated in one line item. For example, the Corps of Engineers construction general account is one line item under which there are literally hundreds of projects. The Bureau of Reclamation construction account is one line time containing literally hundreds of projects. Some of the Department of the Interior line-item programs contain literally hundreds of projects.

So we are giving to the President more than a line-item veto power, because if he had the line-item veto power he would have to kill all of the Bureau of Reclamation construction, or all of the Corps of Engineers construction program. Now he can pick and choose as he wishes, so long as he does not eliminate the project, whatever that means—I mean really what does it mean to eliminate the project? Some would say eliminating the project means wiping out the authorization. Others would say it means completely stopping the project over such a period of time as it is eliminated. I do not know what it means.

But I can tell this body that it means that the President has an incredible amount of discretion. We are massively transferring by this action to the President the power to pick and choose among these various projects.

Mr. President, it is not necessary in order to achieve the good parts of this amendment to take with it all of these Constitution bashing, precedent setting, unwise, provisions that are contained in this bill. So that is why the Chiles-Byrd-Johnston, so-called Democratic leadership amendment, is a much better alternative.

First of all, Mr. President, we ensure Presidential action in the same way and to the same extent that the Gramm-Rudman amendment provides.

We also provide that the President must submit his budget and must submit it meeting targets just as their provision does. We also ensure congressional action, but there are at least three things, Mr. President, that we do that are decidedly superior to the Gramm-Rudman amendment.

First, Mr. President, we take care of the problem of slow outlays because we provide that in those accounts which have slow outlays, again Department of Defense kind of programs, where budget authority or appropriations voted in a given year do not spend out at all for 3 or 4 years sometimes and do not reach their peak until perhaps 5 or more years after an appropriation is made. We provide that those shall be treated equally and across the board, that the Congressional Budget Office shall be required to determine an average rate of budget authority to outlays and all programs would, therefore, have to bear that proportionate share of budget authority cuts.

This would avoid the situation, Mr. President, where, for example, EPA sewer grants which outlay very slowly would be completely savaged, almost wiped off the map by Gramm-Rudman. Our provision provides a fair and realistic treatment of budget authority and outlays.

Mr. President, I know that our colleagues here in the Senate understand the significance of this change. But I hope that people outside understand the difference because it is a reason for total rejection of the Gramm-Rudman amendment.

Second, Mr. President, our targets take into consideration the gross national product and its growth rate and require a reduction in the deficit as a percent and as a proportion to the gross national product, which means that our targets conform to what the health of the economy is going to be. Balance the budget within the same time, but do so in a rate that is more achievable because it is consistent with the health of the economy.

Third, Mr. President, and perhaps most important, it provides for a way to avoid the train wreck. It provides that if Congress passes legislation that meets the targets and the President vetoes that legislation, the President cannot thereby invoke his own orders, his own priorities of spending, but rather must then resubmit another plan which Congress must consider again under expedited procedures. Of course, upon failure to act a reduction plan would come in but it provides, in effect, that the President cannot by his veto invoke Presidential appropriations in this country.

The one provision, Mr. President, is the essence of the difference between the Gramm-Rudman amendment and our amendment because it pays due respect to the separation of powers and does not as I say permit the President through the exercise of a veto to invoke his own provisions.

It allows Congress, Mr. President, to set the priorities for spending, subject to a Presidential veto as the Constitution provides.

Mr. President, I believe our proposal is designed to cut the deficit as effectively, indeed more effectively than is the Gramm-Rudman amendment without doing violence to the Constitution, without doing violence to the separation of power, without giving to the President the authority to set spending priorities, without setting the scene for an economic and constitutional crisis of such dimensions that it would be almost unthinkable.

Mr. President, I urge our colleagues in considering the difference between these two proposals to give due regard to the Constitution, to give due regard to our ability to avoid the crisis.

I yield the floor.

(Mr. TRIBLE assumed the chair)

Mr. GORE. Mr. President, the amendment now pending is, in my judgment, superior to the Gramm-Rudman-Hollings amendment in several respects which I would like to discuss. But before going to those points, I would like to discuss briefly the procedural tangle in which we find ourselves.

The essence of the procedural dispute now confronting the Senate is whether or not to have a temporary extension of the debt limit while we move to final action at a time certain on the Gramm-Rudman-Hollings amendment. The majority refuses to allow a unanimous consent request proposed by the minority leader because some Senators, whose identity I do not know, not the majority leader, but some Senators on the majority side refuse to allow a temporary extension of the debt limit, even though we propose final action at a time certain this week on the Gramm-Rudman-Hollings amendment.

Now, why do they refuse that reasonable request? The answer is very simple, in my opinion. In my opinion, there is a desire to force the other body to act without considering the substance of the Gramm-Rudman-Hollings amendment. I believe that is a mistake for several reasons. First of all, I think it does harm to the kind of legislative process which the American people would like to think occurs in this building. There should be at least a few days for the other body to look at and examine a proposal that is sent from here to the other body.

Second, I believe the tactic preferred by the majority does violence to the relationship between the two bodies intended in Jefferson's Manual. One principle running all through Jefferson's Manual is the necessity for both Houses of Congress to avoid actions which lead to antagonism, ill-feeling, or hostility between the two Houses of Congress. For Members of this body to craft a procedure which has the effect of forcing a quick, hasty, ill-considered action on the part of the other body is an unwise course of action that, in the

opinion of this Senator, while it does not violate Jefferson's Manual in any way, nevertheless, runs counter to the spirit of Jefferson's Manual and it is a course of action which we should not pursue.

But, make no mistake about it, the reason for this impasse is very simple. Members of the majority do not want the other body to have any hearings, to give any scrutiny, or any close consideration of any sort to the Gramm-Rudman-Hollings amendment. That is the reason we are here.

The unanimous-consent request propounded by the minority leader, by contrast, fixes a timetable for expeditious action, both in this body and in the other body, but gives a few days for the other body to at least read and examine the Gramm-Rudman-Hollings amendment.

In the opinion of this Senator, that approach is preferable. And, under the terms of the unanimous-consent request proposed by the minority leader, there would be no train wreck, the checks would be honored, and the payments would be made, because the temporary extension would go into effect immediately upon action, assuming that the Senate acted favorably upon it. And that temporary extension would continue for 10 days.

If the House chose to stay in, they would have 10 days to consider it. If they chose to go forward with the current legislative calendar, go for the very short recess at the end of the week, they would have 3 days—Tuesday, Wednesday, and Thursday. And, under the same unanimous consent request, this body would act this week early on Thursday on the Gramm-Rudman-Hollings amendment and all amendments thereto.

In a colloquy only 1 hour ago, the majority leader was asked, "What is unreasonable about the proposal from the minority leader as to procedure?" His response was, "Not much." He then made it clear that the reason for our current impasse is purely and simply the unwillingness of some Senators on the majority side to allow this reasonable procedure to go forward.

Now, I would like to look at the provisions of the Democratic leadership amendment now pending and compare those provisions to the provisions of the Gramm-Rudman-Hollings amendment.

First of all, the cuts in the deficit would begin 1 year earlier and be completed 1 year earlier under this amendment as compared to the schedule outlined in the Gramm-Rudman-Hollings amendment.

The schedule outlined in the Gramm-Rudman-Hollings amendment, as has been abundantly noted, would require no cuts in the deficit this year whatsoever. It is highly questionable whether it would require any cuts at all next year. Because if one believes that the budget resolution number contained in this year's resolution, or the second year covered by that resolution, is a real number, and if one assumes that we make those cuts, as we did this year, then the Gramm-Rudman-Hollings amendment would require no cuts other than those already required in the budget resolution. And even if those assumptions were wrong, and some small cuts were required, they would not come until a few days before the election, and the implementation of those cuts would not come until well after the election.

The pending amendment by contrast says in effect no more smoke and mirrors, no more plans that look good on paper but when all is said and done do nothing, no more promises to reduce the deficit after the next election but real action now to reduce the deficit and set up a real timetable to get it down to zero a year earlier than proposed in the Gramm-Rudman-Hollings amendment.

I believe this is a question of candor. It is a question of credibility. I noticed one of the stock market analysts on the news last night saying the financial markets are weary of vague plans and promises that suggest that at some future time way off in the future we may have some reductions in the deficit. Just wait until the election is over. That is essentially what the Gramm-Rudman-Hollings plan says. This financial analyst said what the markets are waiting for—and I might interject in my own words what any serious student of our current fiscal crisis is waiting for—is an indication now that we are serious, we are ready to go forward with meaningful cuts in the deficit right now, and map out a plan starting now that actually gets the job done.

The Democratic leadership amendment meets that test. Second, the Democratic leadership amendment avoids a very serious flaw in the design of the Gramm-Rudman-Hollings amendment with respect to the difference between budget outlays and budget authority. Some programs that have slow spendout authority would be affected in a very serious and unfair way by the operation, the mechanistic operation of the Gramm-Rudman-Hollings amendment. After the November elections next year when the Gramm-Rudman-Hollings amendment would first begin to take effect it would require uniform cuts in budget outlays. A slow spendout program would have its budget authority slashed very drastically in order to achieve very small reductions in budget outlays.

Programs like veterans' hospital construction, community development block grants, and other programs of that description would be hurt very badly 2 years from now. The Democratic leadership amendment by contrast recognizes the uneven application of the formula contained in the Gramm-Rudman-Hollings amendment, and applies the uniform reductions to budget authority instead. It is a question of fairness. It is a question of practicality. On this point as well the Democratic leadership amendment is superior in the judgment of this Senator.

There is yet another difference that illustrates why many will prefer the Democratic leadership amendment. Means tested programs, those which form the basis of the so-called safety net, are exempted from the Democratic leadership amendment's cut mechanism. Such is not the case with respect to the Gramm-Rudman-Hollings amendment. The issue of fairness in budgeting is one which the Democratic Party has made repeatedly over the last 5 years—indeed, throughout its history but with particular force and clarity during the last 5 years. That issue is raised once again by the distinction between these two amendments in how they affect means tested entitlements. And once again, in the judgment of this Senator, the Democratic leadership amendment is clearly preferable because it preserves our commitment to basic fairness for those who threaten to fall through that so-called and much flaunted safety net.

Let me move to yet another reason why I think the Democratic leadership amendment is perferable. It preserves the institutional integrity of the legislative branch of Government. Here is what I mean by that, Mr. President. Let us suppose that the Gramm-Rudman-Hollings amendment is adopted, as it may well be. Let us suppose that so-called gun is put to the head of the legislative branch, and let us suppose that in response the legislative branch passed a reconciliation bill that meets all of the targets in a real way, and it comes up with a formula which keeps us on the so-called glidepath, discharges our responsibility to the American people, and moves us inexorably toward the zero deficit that most of us want to see reached. But the President at this point decides that he does not like the particular way in which the legislative branch went about its business. What alternative then does he have?

He can veto the reconciliation bill, of course, and he could do that under either of the amendments that are under discussion. But under the Gramm-Rudman-Hollings amendment if the Congress meets its responsibilities, stayed on the glidepath, and came up with a budget reconciliation package that reduced the deficit by the sufficient amount, and the President vetoed that reconciliation bill, then automatically the uniform cuts would go into effect. Even if the Congress did what the Gramm-Rudman-

51-059 O-86-39 (Pt. 19)

Hollings amendment purports to force it to do, if the Congress meets its responsibilities, discharges its obligations, comes up with an adequate reduction in the deficit for that year, then this could still be triggered by the President simply with a veto of that reconciliation package which met all the targets.

I think that reduces the constitutional role of the legislative branch. The Democratic leadership amendment addresses this problem and corrects it. It says that if the Congress does not meet the goals outlined in this amendment, then the trigger would be pulled, and the uniform cuts would take place.

But if the Congress does legitimately discharge its responsibility and makes the requisite cuts in the deficit, then the President could not automatically void all of that action by the Congress and trigger the uniform cuts simply by vetoing the reconciliation bill. He can still veto the reconciliation bill, but at that point it would come back to the Congress and the process of give and take between the legislative and executive branches would take place. The President would make a proposal; the Congress would consider it.

I believe that is preferable.

There is another problem with the Gramm-Rudman-Hollings amendment which has to do with defense contracts. I understand that most Members of this body do clearly understand that the Congress cannot welsh on contracts entered into in prior years. It would be very hard to get bidders on a new ship or plane if we set that precedent, and the courts would have a say in it as well. But we have all seen, in the news media and in speeches on this floor, some of the outrageous waste in defense contracts signed in prior years.

Surely, we do want to exempt that waste from the operations of our deficit reduction plan. In fact, if you asked the American people as a whole, "Where do you want to start the spending reductions; where do you want to start?" The vast majority would say, "Well, what about that $7,000 coffeepot? That is a good place to start. What about that $1,017 plastic cap on the bottom of the chair the navigator sits on in the B-52? That is a good place to start. What about the $600 ladder? That is a good place to start."

Under the Gramm-Rudman-Hollings amendment, hands off those items, at least with respect to that amendment. That is a prior year contract. Do not look there for your cuts. Look at the means-tested entitlement programs. Look at Medicare. Look at the health programs for the poor and the elderly, but do not look at the coffeepot, the hammer, or the plastic cap.

Again, the Democratic leadershiip amendment corrects this flaw while recognizing the legal and perhaps constitutional problems of going back and voiding contracts. It puts the pressure on the Defense Department to go in and eliminate wasteful procurement practices and make the cuts first where the American people want to see them made first. Do not exempt this part of the Defense Department.

Yet another part of the Gramm-Rudman-Hollings amendment which is corrected by the Democratic leadership amendment has to do with the level of detail at which the President loses his discretion between different items. Some will say, "Wait a minute. The authors of the Gramm-Rudman-Hollings amendment were convinced yesterday that, yes, that is a serious defect in their amendment and they are willing to correct that."

Fine, I think that is good.

The Democratic leadership corrects it right in the body of the amendment, and this distinction shows how useful it has been to have this discussion and examination, short as it is, of the details and workings of the Gramm-Rudman-Hollings amendment.

Some who wanted to vote last Friday on an amendment they had not read most probably did not consider the improvements that could be made as a result of sustained examination and scrutiny.

I suggest that there may very well be other improvements that can be made, such as the ones I have been outlining, such as the ones that are corrected in the Democratic leadership amendment, and there may be yet others that we in this body do not clearly recognize.

There is a natural tendency in human nature to get wrapped up in the deliberations of whatever group you are a member of and lose sight of other possibilities. It is partly for that reason that those who wrote the Constitution required that both Houses of Congress take an independent and careful look at any law before it is passed. If, in the short time we have been able to find this amendment we have found such serious flaws, some of which they are willing now to correct, consider the very real possibility that if the other body has a few days to look at this Gramm-Rudman-Hollings amendment they may find some other very serious problems that we have not seen. We have seen enough and we have tried to correct them in the Democratic leadership amendment.

So, Mr. President, I think that the preference is clear. If you want to put off any real deficit reduction until after the election and yet say that we are on the glidepath, then support the Gramm-Rudman-Hollings amendment.

If you want real deficit reduction now, if you want to get on with the unpleasant task that we all know is necessary and start real reductions, then vote for the Democratic leadership amendment now pending.

In closing, Mr. President, let me say that one other thing is clear as well. If you want the procedure which respects the ability of both Houses of Congress to consider legislation in a reasonable yet expeditious way, then you would accept the unanimous-consent request propounded by the minority leader to fix a time certain this week for final action—indeed, Thursday of this week for final action—on the Gramm-Rudman-Hollings amendment and all amendments thereto and simultaneously avoid the train wreck of no money in the till with a 10-day temporary extension of the debt limit.

I yield back my time, Mr. President.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. Mr. President, I am here before the Senate to talk about a tremendously important matter. Unfortunately, there are few, if any, of my colleagues on either side of the aisle here. I think it is a strange way to do business, but maybe there is some merit in all of this.

I look around the room and I see almost a few people watching the deliberations as there are on the floor. The press galleries are packed; we could not get more than 90 or 100 people up there if we tried very hard. I see the hardy souls up in the galleries there listening to this tremendously fascinating discussion as I talk about what is, I think, a tremendously important proposition.

None of it will ever be reported and few will hear what we say here at this late hour. For something interesting, I would like to report that the Toronto Blue Jays are ahead 5 to 0. The baseball game is being played in Toronto. Meanwhile, we drone on on something here I do not wish to make light of. I do wish to make light, Mr. President, of the fact that few, if any, are listening. But I suspect that a great many care.

The question has been asked of the Senator from Nebraska where the baseball game can be found. I direct my colleague to either the Democratic or Republican cloakroom. I think that vital information is being piped into those rooms just off the floor of the U.S. Senate.

Mr. President, I certainly hope, although I started out with some levity here—sometimes we take ourselves too seriously in this body, but this is one of those occasions when I think we had better take ourselves seriously.

I have been here now, this is the seventh year. I suspect the deliberations going on here now, with the Democratic leadership alternative being offered as the only major alternative to the Gramm-Rudman amendments, that that is probably something that

could go down in history sometime as a tremendously important event.

I think it is the obligation of all Senators on both sides of the aisle to be as thoroughly familiar as possible with this proposition.

Mr. President, I wish to ask for order in the Senate. There are hardly enough people on the floor of the U.S. Senate to cause any furor, but if I cannot have the attention of at least the few colleagues on the floor and if we cannot have quiet from the staff sitting back on the seats behind us here, I would suggest that maybe we should clear this matter up entirely.

I know none of you want to hear me talk and I am not particularly thrilled about standing here trying to make some intelligent remarks myself, if that is possible at this hour. But I do want to say, Mr. President, that unless the Senate as a whole on both sides of the aisle is interested enough to at least take a look at what I consider to be a quite well-thought-out alternative to the Gramm-Rudman proposal, then there may be some time down the line a few weeks or months or years when people will say, maybe we should have listened; maybe we should have taken a look at the alternative.

I think one thing is certainly clear, that this is going to have an effect, good or bad, on the future decisions of this body with regard to fiscal responsibility, budgetary procedure, and last, but not least, driving up the national debt.

I compliment my friend from Texas, Mr. GRAMM, who, I think, came up with a tremendously interesting proposal and also his colleague and cosponsor, Mr. RUDMAN. I think Senator RUDMAN and Senator GRAMM have done a great service to the Senate in maybe focusing attention on a problem that we have been wrestling with now for the 7 years I have been here. At least they have come up with a proposal that has gotten the attention of this body and has gotten the attention of the people of America. That is good.

It is not good, I suggest, for us to assume necessarily that just because it has gotten people's attention, it is the best possible proposal we could enact. But act we must, Mr. President, as this body well knows.

This Senator has been on the floor on many occasions offering proposal after proposal with a whole series of colleagues on both sides of the aisle to try to do something about the crisis that faces us in fiscal policy today since way back when. Way back when—was a little over 4 years ago, maybe 5 years now, when we were below—we were below, Mr. President—the $1 trillion debt ceiling limit in the United States. I remember when we broke through the $1 trillion figure for the first time.

What that really means is that it took 203 or 204 years for the United States of America, during all of that period of time, to accumulate enough debt that we went through the $1 trillion debt ceiling limit. Here we are, 4½ or 5 years later, and we have doubled it; 203 and 204 years to get to a trillion dollars, and 4 or 5 years to double that to $2 trillion. And there are dire predictions that unless we sharply correct our course, we are going to be busting through the $3 trillion debt ceiling limit yet in the 1980's. I am very fearful that will come to pass.

Among the other problems that I see along with many of the good things that are offered in the Gramm-Rudman proposal is the fact that they have not ratcheted up the main targeting mechanism that is the heart and soul and the best part, in my opinion, of the measure offered from that side of the aisle. I will be offering an amendment at some appropriate time when we have nothing else to do that would move up that ratchet. Because if the Gramm-Rudman proposal is as good as many people think it to be and since it has swept through America grabbing the attention of all Americans who have been led to believe, I think to some extent incorrectly, that this is a measure that, at long last, is going to get hold of the deficit and straighten us up, I point out what I think is a fatal flaw in the proposal that has been offered, which is the real reason that we had that meeting of the Senate last Sunday, highly unusual. We were here late last night, we are here late again tonight.

The fact is that that proposal, with all of its good features, basically is fatally flawed with a mechanism that essentially is likely to mark time for a year while the deficit climbs and the national debt keeps on going up.

Oh, it will be argued when I offer the amendment to ratchet that up to make the teeth sharper and put them into effect promptly that is not necessary because of the protections in this bill. But as I shall argue at that time, Mr. President, originally, as I understand it, the proposal by Senator RUDMAN and his coauthor, Mr. GRAMM had an early ratchet that would start almost immediately.

Yes, there is a provision in there that says that on November 1, about 3 weeks from now, CBO and the Office of Management and Budget are required to come forth with projections as to where we are right now. That is supposed to trigger something. Unfortunately, I am very fearful that by design—by design, Mr. President—that was altered for reasons best known to the authors. I suppose that they will have some reasonable explanation of why that took place. But, you see, Mr. President, the major proposal on which these amendments are being offered calls for the fact that we are going to start ratcheting this down and if Congress does not act, then a triggering mechanism takes over and we go to sequestering under the authority of the President of the United States.

I think that is a pretty good proposal, and once again I salute those on that side of the aisle who came up with the suggestion.

The problem is, Mr. President, the first thing we did was raise by $20 billion the deficit figure that would trigger this, from roughly $170 billion to $190 billion. And also for that first reporting period on November 1, this year, the statistical information could be raised to 7 percent rather than 5 percent over a certain figure that followed in the rest of the bill.

I believe that could very well allow us, Mr. President, to take time out for a whole year, until October next year, when the next report is called for, and if the crisis is as great as I and other people believe it to be, then I suggest we cannot, we should not, we dare not take time out for 1 year in an effort to try to do something about the fiscal calamity that may be, Mr. President, much closer than many of us care to face at this particular period.

Meanwhile, back at the ranch, Mr. President, out in my State of Nebraska we have a depression on our hands, and that is really not understood very well in many parts of the country. That farm depression spreads not only across Nebraska but our neighboring States as well, brought on, Mr. President, by a total crashing of commodity prices, brought on by tremendously high interest rates that have already added to the nearly unbearable costs to the farmers and ranchers of this country who produce the food that we all eat and enjoy, brought on, Mr. President, by irresponsible fiscal policy under Democratic and Republican administrations. There is plenty of blame to spread around to all. The fact is that we have not followed the right course of action over the last several years when we should have stepped up to the table, looked the problem in the eye and properly called the shots.

The problem in Nebraska and the other agricultural States is a true depression while the good times are rolling to a considerable degree in other parts of the United States.

I saw a story in the paper the other day where Maryland has one of the lowest unemployment rates in its history. That is not true in Nebraska and other agricultural States. So I can tell you, Mr. President, that it is our inability to attack the deficit problem which has caused the high interest rates that I referred to, which has caused also the high valuation of the dollar, which has been a major problem as far as agriculture is concerned because our agricultural products along with all of our manufactured

products are literally priced out of the international marketplace. I only say this because that shows how important, Mr. President, this matter is to a State like Nebraska. But we are not only Senators from our own States but we are U.S. Senators. Sometimes we have to stand up and make some votes that might not be popular back home but are for the overall good of this Nation.

So I simply want to focus attention this evening with these brief remarks, Mr. President. I think this is a tremendously important matter. I think we should have the attention of the Senate if we possibly can, even the authors of the bill themselves might listen just a little bit instead of talking all the time others are trying to get their attention.

But that is not the way it works in the Senate, unfortunately. I am afraid we are ready to rush into a bill and pass it overwhelmingly. We may learn to regret that sometime in the future. I hope not. I hope I am wrong. But unless we can make some amendments to the Gramm-Hollings-Rudman amendment which I think are very much necessary, it might well be a keen disappointment, Mr. President, as have other major pieces of legislation in the last few years which have borne the names of some of the leading sponsors of this particular bill.

I say caution. I say warning, Mr. President. I hope that my colleagues will read this bill and see if they agree with some of the key points in it and whether or not there should be some amendments before we adopt it.

If it is amended, as I would hope, or if we consider the Democratic leadership plan, which I believe is the better thought out and more sure course to success, I think it is a foregone conclusion by and large that the Democratic leadership proposal is going to be defeated in the Senate. That is the eventuality that I see. I hope it is not the case.

There are good features in both of these bills. I have looked at both of them. I believe that the Democratic leadership bill is the superior bill, the better thought out bill, the better balanced bill, the bill that will get us quicker and faster to the goal which we all want. Mr. President, I urge caution.

I yield the floor.

Mr. CHILES. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GRAMM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRAMM. Mr. President, I should like to make note of the fact that I do not have anyone on my side of the aisle who has requested to have the right to speak on this amendment protected. On this side of the aisle, therefore, we are prepared to vote.

I know that a great deal of concern has been expressed on both sides of the aisle about the debt ceiling; and since no one is here who has asked to speak on this amendment, we on this side are prepared to vote.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, as I understand it, we have had some debate on the amendment. I apologize for being absent, but I was hosting a distinguished Japanese delegation, belatedly.

As I understand it, there has been debate on the leadership amendment; is that correct?

Mr. CHILES. Not exactly debate.

Mr. BYRD. There has been a little talk. There has not been any debate.

Mr. DOLE. Is the distinguished Senator from Nebraska prepared to offer his amendment at this time? If there is no more discussion on the leadership amendment, maybe we can agree to set that aside and take up the amendment of the patient Senator from Nebraska.

Mr. EXON. Mr. President, may I answer the distinguished majority leader? I think probably not. I have waited about 6 hours now. I can wait another 6 or 8 hours and probably take it up in the morning. I do not want to disrupt the Senate any more than it has been disrupted.

But I suspect that there is a majority feeling on this side of the aisle, at least, that we should pursue this matter until it is resolved.

Mr. DOLE. Then we ought to pursue this matter.

Mr. EXON. I would have been ready to bring this matter up if it had been brought up ahead of the amendment when I was scheduled to bring it up. I really think it would be best if we put it off until the morning, if that can be worked out.

Mr. DOLE. Mr. President, let me renew my plea to Members on both sides. I would like to complete action on the debt ceiling matter and, in addition to that, a temporary extension of a few days. But we have not accomplished anything. All day yesterday we had discussions, all day today we had discussions, and then tonight, when we were in session, nobody wants to discuss anything. Everybody wants to discuss it in someone's office, but not on the floor.

I do not know what a leader is to do, except to try to push ahead.

Is Senator LEVIN available? There is an amendment we can accept. If he was here, we could accept that amendment. I understand Senator KERRY has an amendment that we could probably accept.

Mr. CHILES. We can find out if they are around.

Mr. DOLE. The distinguished Senator from Florida indicated earlier that maybe he would discuss his amendment a while and take up a couple of other amendments. That is certainly satisfactory. I do not fault anyone for that.

I must say we are going to be here tomorrow morning quite early and that no one is going to want to do it then, because it is too early. Now it is too late. Then it will be something else at noon and then we will stall around until 3 or 4 o'clock and say, "Let's go to work, but we don't want to work beyond 5." And that has happened the last 2 days.

I believe in trying to get along here with everyone. I would like to do something if we can get an agreement. We want to vote on the Gramm-Rudman-Hollings-Boren amendment tomorrow. We want to pass an extension tomorrow for a few days and satisfy the concerns not only of the American people and the Treasury, but the Speaker of the House and the Republican leader.

I have had at least a half dozen calls today from Congressman MICHEL, the Republican leader. I am sure the Speaker has called the distinguished minority leader that many times.

I believe Senator Baker once said that when the Senate does not want to move, it is like a wet noodle.

We ought to do something, either that or just stay in session all night and do nothing so the American people know we did not do anything while their checks were being dishonored. I am prepared to do that. If nobody wants to talk, we will just stay here and every hour or so we will remind the American people that nothing has happened—we cannot get an agreement; we cannot get an amendment. We have a filibuster by silence and inaction; no amendments.

It seems to me that we have some obligation, if not to accommodate each other, to accommodate those who are going to be wondering why their checks were not honored at the various 41,000 banks.

Is the Senator from South Carolina prepared to move his amendment?

Mr. HOLLINGS. Yes; the Gramm-Rudman-Hollings amendment, we are prepared to move that. We have been

trying to vote on it since last Thursday. We had a "Dear Colleague" letter sent out 2 weeks ago to let the Members know of our plans.

If the majority leader wishes, I do not mind spending a few minutes now on my views on this particular amendment while he tries to arrange to get a vote. Is that what we are trying to do now?

Mr. DOLE. I would like to get something, or get unanimous consent to move the Gramm-Rudman-Hollings amendment right now.

Mr. HOLLINGS. We are prepared to vote.

Mr. DOLE. I think there would be some modifications there, because Senator LEVIN and others suggested changes. I think they are reasonable. Senator GLENN, I believe, has a change, and others have changes that were suggested.

But if everybody is going on strike, we cannot work. I know the labor lobby has been here, but I did not know we were on strike.

It seems to me that we ought to do something, or announce we are not going to let this bill pass so the American people understand.

Mr. President, I ask unanimous consent that we may turn to the consideration of the Gramm-Rudman-Hollings amendment and that we may modify the amendment to incorporate changes suggested by Senator LEVIN, Senator KERRY——

Mr. FORD. Mr. President, has the Senator checked this with Senator LEVIN? He wanted his time, in all seriousness. I know what the Senator is doing and everybody else knows.

Mr. DOLE. We are trying to get a vote.

Mr. FORD. I understand what the Senator is trying to do. Nobody has been hoodwinked.

Mr. DOLE. The American people are.

Mr. FORD. Well, that is what you say, and I cannot get the television you can. So they are getting that message.

But I want to protect Senator LEVIN and if you are going to include Senator LEVIN in that unanimous-consent request, I will have to object.

The PRESIDING OFFICER. Objection is heard.

Mr. DOLE. Mr. President, I ask unanimous consent that the time on the pending amendment be limited to 5 hours, equally divided, and that the time consumed be charged equally to both sides since the amendment has been pending.

The PRESIDING OFFICER. Is there objection?

Mr. CHILES. I object to that. We do not have the time to vote.

Mr. DOLE. We would, if we had a time agreement.

Mr. President, I ask unanimous consent that we vote on the pending amendment at 10:30 a.m.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BYRD. Mr. President, will the Senator yield the floor?

Mr. DOLE. I am happy to yield. If the Senator wants to debate the amendment, I want to hear all about it.

Mr. BYRD. No; I am going to make a unanimous consent request.

Mr. President, I ask unanimous consent that the Senate vote tomorrow at 3 o'clock in the afternoon on the pending Democratic leadership amendment, and that immediately thereafter the Senate proceed to the consideration of the short-term debt limit extension.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. I object.

The PRESIDING OFFICER. Objection is heard.

CLOTURE MOTION

Mr. BYRD. Mr. President, I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on H.J. Res. 372.

Robert C. Byrd, Alan Cranston, George Mitchell, Lawton Chiles, Jim Sasser, John Melcher, John Glenn, John C. Stennis, Paul Sarbanes, Tom Eagleton, Gary Hart, William Proxmire, David Pryor, Carl Levin, Don Riegle, and Wendell H. Ford.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

BALANCED BUDGET AMENDMENTS

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. BYRD. Mr. President, I ask unanimous consent that the vote occur tomorrow afternoon on the Democratic leadership amendment, and that a vote occur on the Gramm-Rudman-Hollings amendment at 10 o'clock a.m. on Thursday with a vote to occur at 11 a.m. Thursday on the short-term debt limit extension to October 18, and that a final vote—I will not ask for a vote on the resolution itself because we do not know what is in some of the amendments that might be offered. I make that request.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. BOSCHWITZ. Regular order.

The PRESIDING OFFICER. The question is on amendment No. 743.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, I will be very brief with my comments. I believe we should debate this proposal while the distinguished leader sees exactly where we are going from here through the rest of the evening. Necessarily, Mr. President, it would be the propensity and disposition of the Senator from South Carolina to vote for the Democratic leadership amendment. So it is with sincere misgivings that I find I could not possibly support this very weak approach to the deficit problem. I have tried from the very beginning to act in a bipartisan fashion and take the budget that the Congress has passed and impartially apply the truth in budgeting to it.

I realized after 5 years of steadily trying with colleagues on both sides that I was not going to pass a budget freeze or any plans with revenues or some of the other things. So now the leadership comes forward with the deficit soaring. Everyone knows the catastrophe that we face. So necessarily when the Senator from Texas came to me, I looked very carefully at what he was proposing, as I have done the very same thing before as a Governor—right to the point. With respect to the Hollings' participation in this, I wanted to make absolutely certain that it was impartial. On that basis we changed it around, and gave the split between the controllables and the uncontrollables including the entitlements with the COLA's and the rest of the budget including defense.

I wanted to make certain that it was not only impartial with respect to programs, but it was impartial with respect to the President and the Congress. I did not want to give the President any advantage. On the contrary, I wanted to give him a ministerial task at the bidding of the Congress to perform on equal percentages across the board.

We agreed on that.

I wanted to make sure there were revenues. I can understand the sensitivity about spelling it all out, but I wanted to make it possible because I

am of a different school of thought from the Senator from Texas, who thinks that balancing the budget could be done without revenues. I thought it had to require revenues to really get it done.

But with that difference in mind, we included revenues—as an option in the alternative proposal open to the President and the Congress.

I wanted it to be practical, workable, doable, and in that sense, in order to get to all parts of the budget, I got the Senator from Texas to turn around the dates and times he was proposing. His original approaches similar to the Chiles-Byrd amendment that all the fix-it mechanisms come in the wrong part of the year.

It was I who insisted that we start right at the beginning of the year. And thereby starting at the beginning of the year, we play with real bullets, and say that we have the discipline to carry out the budget we adopted. So that we don't catch anybody off base we necessarily began to increase the deficit amounts because the intent is to institute a process.

It would be this Senator's intent that we never have to use the trigger mechanism under this particular budget process revision. Specifically, we ran the deficit from $171.9 billion to $180 billion and we tried to apply that after getting all the measurments from CBO and the Office of Management and Budget and we added on the 7 percent trigger. That came to the $192 billion figure. That was intentional. We have been criticized for that, saying that nothing is going to happen. I hope nothing will happen.

I hope we can get something like this and that in November when we get the reports nothing happens with respect to the trigger and, therefore, the President takes over under the requirement of the budget to be submitted in January conforming to the $144 billion deficit level we propose for the next ensuing fiscal year, 1987.

So, in reality, I realized the first one to get hit if I had anything to do with it and the mechanism worked would be the President of the United States.

I wanted to make sure that we did not have the Social Security argument. That just brings headlines and stories and everything else, and no one can talk sense. It is a trust fund and on that basis the Senator from Texas and the Senator from New Hampshire agreed that we would take it off budget. We had some arguments about that. Many in the Budget Committee and in this Senate wanted to keep it on for various reasons. But we have forgone that particular argument and set it aside in specific language at three places in our amendment.

Now along comes the Chiles-Byrd proposal and it does not have that particular intent. It wants to write a new budget.

You can see on page 28 under proposals:

> In developing proposals for deficit control, the President should include programs in education, job training, scientific research, and export promotion.

Therein we have fallen back into the trap of rewriting the budget. We did not want to do that.

We are not trying to get my budget passed or highlight a particular need or anything else. There was to be neutrality, impartiality, with respect to the programs, entitlements, and everything else.

But they have the bit in their teeth on this side trying to get up a particular budget and go to the special interest groups and say, "You see in our amendment we looked out for education. We looked out for scientific research. We looked out for exports. Gramm-Rudman-Hollings did not even think of those things."

It is not that at all. We intentionally did not list those things because we were looking for a process to put us all in a box, including this Senator, all Senators, and including the President.

I think we have TIP O'NEILL in a box when we get rid of Social Security, and I think we got our House colleagues in a box. We can all talk sense to each other.

I can tell you here and now under this particular proposal the President is out of the box in several ways. In one part on defense—if he finds the security of the country is endangered, he does not have to do anything about defense cuts. Otherwise, the actual working of this amendment really plays with politics on one hand and relieves the President because he is bound to veto any congressional action, and if I were him I would veto it, when we come in the middle of October and say by November 1 he shall raise revenues.

It is on page 16:

> Deficit control message. A deficit control message for a fiscal year shall (a) specify the amount by which the deficit for such fiscal year shall exceed the maximum deficit; (b) contain proposals by the President—shall contain proposals by the President for increases in revenues and decreases in budget authority.

And so forth and so on down the line.

So they are still aiming at the revenues there.

You see, they are trying to catch Senator GRAMM—and I am trying to catch President Reagan.

You may recall the story about the Japanese and the American out on that hunting trip and they came by surprise upon this big grizzly bear.

Our Japanese friends, who we are entertaining, will enjoy this.

The Japanese dropped to the ground and started putting on his Nike track shoes. The American said, "My Heavens, you are not going to outrun that bear."

The Japanese said, "Honorable sir, I don't have to outrun the honorable bear. I have to outrun you."

I know what they are trying to do. They are trying to get Senator GRAMM. I am trying to get the President of the United States. But when you tell the President he has to do the revenues and come from a $200 billion deficit down to $170 billion in the next 2 or 3 weeks, that is a $30 billion drop.

I had to listen to Senator CHILES all weekend. On Saturday, he said:

> That still leaves us with a deficit for next year of $200 billion.

He was referring to the lousy budget resolution passed on August 1.

Now he comes on Tuesday and wants to reduce it to $170 billion and says:

> We are puny, we are weak, we have not done the thing. We want to show the President who is really for deficit reduction.

All Friday, Saturday, and Sunday, the opponents of Hollings-Gramm said we would salvage all programs, we would ruin labor, education, women-infant's and children's feeding, the poor and hungry people.

These are the people I have worked with for 25 years. They say, "What are you doing now?" I said, "I just gave you $20 billion. I have raised you $20 billion. I raised you to $192 billion from $172 billion."

They say, "No, you are cutting it."

I am not cutting it. But now with all that talk about savaging, they come in on Tuesday and say, "You have not cut enough. We want to have a bigger Armageddon. We want to have more and real savaging."

That is a political game. It is sad that we could not get a bipartisan move going on a serious problem of this kind just to have what they call a Democratic alternative.

That has been the trouble on this side of the aisle. I speak seriously to all colleagues. I do not speak seriously with any inhibitions about the other side of the aisle.

There is the Wall Street Journal for last Thursday morning quoting that the Republican Senatorial Campaign Committee has targeted me for defeat. Well, we will see who can beat the Republicans in South Carolina. I have heard that talk before and it really does not work, to tell you the truth.

On this side of the aisle, we will continue to beat ourselves. Why? You have passed the budget, Democratic colleagues, that calls for a 3-percent real growth in defense next year, that's $25 billion, with entitlement COLA's another $15 billion, or a total of $40 billion; interest costs of $30 billion, to bring it to $70 billion; health costs increase $15 billion, to $85 billion, with an election year and no revenues.

So you are presently at what you call a bypass, we are talking about here, on the budget. A majority of Democrats voting for the budget that we passed in August have said, "Next year, let us make sure we have to find $85 billion with no revenues," and where do they find it except savaging urban renewal, the UDAG Program, Economic Development Administration, Small Business, Export-Import Bank, women-infants and children's feeding, school lunches, higher education loans, and otherwise.

So we keep cutting each year our own programs through our own blindness, and then bog down here tonight in a political charade. You want us to give you a vote on the Democratic alternative. No, you do not want to vote, filibustering your own amendment. And in reality, it ought to be filibustered.

You can go down the steps on this particular amendment and see that it makes the Director of the Congressional Budget Office prepare a report that runs the fiscal affairs of this Government—nobody elected him to office. The Director of CBO is king. You ought to run for that particular job. He is not an elected official. I do not think it is constitutional. And our friends say Hollings-Gramm stretches the constitutional line.

In any event, it says he reports and the President shall do it and if he does not like that, he shall do this and he shall do the other thing.

Read this nonsense. They have gone completely overboard to get together a bunch of pages called the Democratic alternative. This is not a Democratic alternative, it is an atrocity. You can go right through Democratic Presidents from Harry Truman, down the line to Lyndon Baines Johnson, who balanced the budget in fiscal 1968 and 1969. We used to be fiscally responsible. Now we are all parliamentary whiz kids here at 11 o'clock at night. We do not want to move, we do not want to go back, we do not want to go forward. We just do not like this particular procedure.

That is what the truth is. You know it and I know it. We have truth in budgeting. It is impossible. It is going to be tough on everybody, but it gives us time.

We said that for this particular year, 1985, for the fiscal year 1986 budget, we would provide for a deficit of $180 billion plus a 7-percent leeway for statistical insignificance to make the trigger at $192 billion. Our opponents argued the whole weekend—over 20 hours—about what a horrible thing our amendment was. It was Armageddon, the whole world was going to end, now they are back here saying it is not enough.

I would be ashamed to participate in that kind of shenanigan. That is exactly what it is. You know it and I know it on this side of the aisle. It is who can outmaneuver and who knows the most rules and who can file the most cloture motions and all that kind of thing.

They have no idea on this side. They worry about the House—my other colleague is not here who was worried about the House a while ago. I can tell you, the House Members are serious about this. Their leadership over there is serious about it. They are ready to do something. They are not worried about the House, they are worried about themselves, because they know the House Members are running. They are going to have to explain this $2 trillion debt; they are going to have to explain this $200 billion deficit. They have a responsibility that they have to immediately face up to. So the House is ready to move on this. They have been ready to move on something as long as Social Security was protected.

We have not done anything to anybody's budget on any of these particular programs. We have added $20 billion to all of them. But to come now to this leadership amendment—I could go down step by step and show the inconsistencies that it contains. I was trying all last weekend to get a copy of it. You could not get one.

But all of its action occurs next year when the President submits his budget, and then there is 30 days here and then 50 days there. It all happens around, let us say, April, give or take, it might be May, might be March or whatever.

Therein was one of the things I insisted on with Senator GRAMM. Why? To forgo one of the basic problems with this Democratic thing.

"Defense contracts are included in deficit reductions. They have been excluded in Gramm-Rudman-Hollings, allowing savings from cutting wasteful procurement instead of cutting combat readiness." Whoopee for them who are so strong for defense. Ha-ha.

We said, let us make it effective immediately at the beginning of the year because that is exactly what happens. You have $300 billion in budget authority, new budget authority in the 1986 budget that is subject to cuts.

Under the Chiles amendment, Cap Weinberger is going to be down there letting his contracts as fast as he can. I was the one who said, "Don't wait until next April." Why? So you could get to the contracts no later than early November and you would not have to cut readiness. Yet the Democratic leadership has critically and falsely reported in their worksheet how brave they are and how sensible they are about defense and how wrong we are because we want to cut readiness.

Nobody wants to cut readiness. You cannot cut anything but readiness if you wait until next April. Contracts are let by that time and you cannot avoid the obligation of a contract.

Second, if you are going to get to COLA's, you have already paid out the January COLA, you have already paid out the February COLA, you have already paid out the March COLA. You are not going to start taking COLA's back. Your fiscal year is gone. This leadership amendment puts deficit reduction into the time when it makes it impossible to be done.

I am looking for the art of the possible. I happen to be a professional politician and public servant. I think Government can work. I have seen Government work at the very lowest local level. I have seen it work in the statehouses and in the city halls. But this Washington thing is a cancer. It keeps on and on out; maneuvering each other and we do not want to do anything about it.

Fortunately, to those who were worrying about the other side of the Capitol, they do want to do something about it. I hope a majority will want to do something about this over here and yes, improve it. There is nothing sacrosanct about Gramm-Hollings-Rudman. Senator LEVIN came up with a good amendment and I have seen others. They will improve our product.

I am glad we got off that OMB package, that thing from OMB that all of us had a heck of a time getting a copy of. Now we can use this description from the Budget Committee.

But that was the best we had so we had to design this and it is an improvement. Maybe we will get some on the House side. Put in a better bill, but do not put in a charade like this and call it Democratic. I would hate to have to go home and explain that or to anyplace else. I would hate to go to Illinois and say that is the best we could put up as Democrats, the best we could come up with—the President shall raise revenues and we go back to tax and tax and spend and spend, and by the way, it was not a big enough effort, so we made an impossible effort. How can they do $30 billion between now and November 10 this year? No way to do it.

Here is what the leadership sheet says:

> Require immediate action to reduce the deficit now in fiscal year 1986. Cuts $10 billion below Gramm-Rudman-Hollings this year. Effective November 10, 1985.

Well, you are looking for $30 billion based on Senator CHILES' comments on Saturday and nobody is trying to forcefeed taxes. The U.S. Senate just voted overwhelmingly, on the matter of a minimum corporate tax, and said do not make it effective before October 1986. Now they want to call this an alternative.

Look at how the Senators on this side of the aisle voted on October 1986 for a tax, just a few hours ago. Now

they want us all to come and vote for a bunch of taxes to pick up $30 billion because you cannot cut enough programs. You really will ravage all the programs trying to cut $30 billion. And they say that is what I recommended.

That is not. I had recommended taxes. We had $15 billion in revenues in Chiles-Hollings. But no one will agree to revenues.

I am not trying to repass my own plan, I am trying to move on now that I have lost on that particular score. I am trying to move on to a process and I hope we in the Senate can and will.

We are looking for a mechanism or process to give truth in budgeting and in actuality, we will probably not trigger anything this fall. But it certainly starts taking effect soon as the President gets his experts around him in November and December to submit his January budget. As he does that and he sees what has to be done, then there is going to be trauma all over the Hill and there is going to be trauma with us and it is going to be tough with us as committee chairmen and ranking members to get those zero sum amendments.

It is not going to be easy, no one contends it is. But let us not stay in the box and do all this parliamentary maneuvering around here and play charades with the budget process. If you read this amendment carefully, you see it goes all over the lot with the Congressional Budget Office Director as a king. He is to submit a report and he starts programming everything. There you go. That is not workable. The President is bound to veto it. If I were President, I would veto it. Therefore, we do not have anything to do. We have gone through a daze, gotten a lot of headlines, gotten a lot of stories. That is what we have done for 5 years.

I hope we can get serious on this, vote on it, reject it, get all the others up, give us a chance to debate their merits. You can tell by the descriptions here that they are not accurate at all. There is no intent to have a deficit reduction bill. There is an intent to have a parliamentary collision with the White House and above everything else, not have a vote.

It is actually impossible to get done, and everybody else knows it. They say, "Well, we can't beat Gramm-Rudman-Hollings by a vote so we beat them by maneuvering.

I thank the distinguished Chair.

Mr. CHILES addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida.

Mr. CHILES. Mr. President, I know how much it strained my friend from South Carolina to have to make those brief critical remarks on this amendment. I know his conscience bothered him, but he felt he had to do it. I appreciate the great restraint in his manner. He is always a gentleman. He is always temperate. He is always restrained. I am so very glad that he spoke so concisely, without exaggeration or hyperbole, and in such a calm, sober, thoughtful, restrained, and scholarly way. My, how I appreciate that. It is good that he did it in that way.

I am reminded of an old southern saying that if you take the lady to the dance, you better be prepared to dance with her. I appreciate that, too, and I understand it. I did not elect to take the other lady to the dance. I have my own lady, and so I am prepared to dance with her. But I understand that you need to be prepared to dance with the lady you agreed to take to the dance.

I listened to just a few of his remarks. And one of those was that Gramm-Rudman is equal between the President and the Congress.

Now, that is interesting because I think one of the things we have been talking about since we were able to get a copy of Gramm-Rudman last Wednesday is whether it is equitable or not; or are there some biases that need to be changed. As I listened to the Senator from South Carolina, I heard the personal pronoun used sometimes in terms of changes he had been able to make. That's nice, I am glad he was able to make some changes. I wish he had been able to make a few more.

I am glad he has been able to read our proposal as carefully and thoroughly as he has. I wish that he would read the Gramm-Rudman-Hollings proposal with that same kind of care because I think he would find a few things in there that are not entirely equal. As an example let me mention the power the President would have to veto a congressional plan. Even if it meets the criteria of being on the glidepath, to a balanced budget, the President can still veto it, and if either House sustains that veto, then he triggers the sequestering of funds. It does not seem to me that is exactly equal.

He also talks about equality in the cuts. Well, when you say you are dealing with outlays as well as dealing with budget authority, to me somehow it does not come out equal. We know if you fool around with these budgets they spend out at different rates in different programs.

If you pay a percentage out of outlays and budget authority or you put it on outlays, which this really does—it is just on outlays, not budget authority, but just on outlays—then when you go after a program that spends out slowly on outlays to get 5 percent or 7 percent you have to take tremendous sums out of the budget authority.

If it is a water and sewer grant proposal, you take 40 or 50 percent of the budget authority to get the small amount of outlays. In fact, EPA and sewer treatment grants, Veterans' Administration hospital construction, to get the outlays there you are going to have to go after it. I would not want to use as indelicate a word as "savagely." I think I heard it a few minutes ago, but I must be wrong.

Subsidized housing, including our section 202 housing for the elderly and handicapped, could be devastated.

Now, that is one of the things I think needs to be cleaned up in Gramm-Rudman. It is one of the things we attempted to do in this terrible, terrible proposal which we have before us. And it is one of the things that I think the Senator from South Carolina missed. I applaud his good work, but I think he missed that.

In community development block grants, we find the same kind of thing—a 55-percent reduction in urban development action grants.

Well, maybe we ought to cut them. Let us say we are going to cut them. Let us not use the device of saying we are going to use outlays.

The same thing goes with the problems of SSI, and pension programs for the VA people. You are going to have to go after tremendous sums of money because you are talking about outlay numbers.

But my friend from South Carolina said that this Gramm-Rudman proposal is an equal proposal. I am not sure that I can really consider it to be equal when, if the President says that we have not met the goals and his order goes into effect immediately Congress can change that order if within 10 days both Houses pass a reconciliation and that goes to the President and he signs it.

Now, the Senator from South Carolina has been around here a long time. He has seen us try to operate around here a long time. Is it equal to say that the President's order goes into effect and the only way you say it is if within 10 days you can move those things? Maybe under the Gramm-Rudman time scale, when you are supposed to get something on Wednesday and vote on it on friday, 10 days is a long time. I do not know. But to me I hardly consider that to be equal.

Mr. RIEGLE. Will the Senator yield for a question at that point?

Mr. CHILES. I will yield.

Mr. RIEGLE. Or would the Senator rather continue with his remarks?

Mr. CHILES. I would like to continue a little bit longer, and then I will be happy to yield to my friend.

We are now talking about doing something great—we are going to accept Senator LEVIN'S provisions on recession. That is good. That shows there have been some changes brought up by some of the "terrible people" on this side of the aisle. But what does that do? The change that has been agreed on says that you can

have two quarters in an estimate of a recession. But the change does not say anything about the President's discretionary authority. Remember we are talking about whether this is equal.

What happens if there are two-quarters of a recession under Gramm-Rudman? It says the President may send an order saying that we have a recession. It does not say he has to. So you can be in the middle of a recession and if the President decides he does not want to do anything, he does not have to do it. But this is supposed to be an equal proposal. It is "equal" all right. Some equality.

We talk about the CBO king, I think I heard mentioned.

The question I guess really is what kind of king do you want? I have heard the Senator from South Carolina talk about OMB a long time, about their estimates, how they are inflated. But this plan would basically make OMB a king, and we are talking about whether it should be a CBO king. I do not know.

I have seen Republican and Democratic administrations, and I have never known OMB to be impartial. I have always seen it to be a captive of the administration in power.

With respect to the estimates as to whether there is going to be a recession, the estimates as to what the spending is going to be, remember that under this plan, which is supposed to be "equal," CBO has an estimate and OMB has an estimate, and if they disagree, you take the midpoint.

If somebody has his own dog in the fight and he gets a chance to fight his dog, and the other dog cannot fight because he has two pulling him, I do not think that is going to be a fair fight. The CBO has two chains around the dog's neck, the Democrats and Republicans pulling at that chain. OMB has only one master, and you know what will come out of that fight. Yet we are told that this is an "equal" proposal and anything else is just a piece of garbage.

As I heard the scholarly remarks of the Senator from South Carolina, I heard him say that we are talking about a box and that Gramm-Rudman is to put everybody in a box—put Congress in a box, put the President in a box. Well, we are trying to build a box, too. We are trying to build a better box. We are trying to say that if we are going to have a box, let us make it a real one. Let us make it a trap, in effect. Let us say that if we are going to talk about this and one piece is supposed to be garbage and the other piece is fair and impartial, no flaws in one but lots of flaws in the other, our box says that you have to do something before the election. It says some of the drastic things that are going to happen under these proposals, and unless Congress and the President get their acts together, it will happen sooner.

I probably did not hear it right, but I thought I heard something about the Democratic leadership alternative being a bunch of shenanigans and we ought to be ashamed of it. I thought I heard something about this being an atrocity. My word, I probably did not hear that right, that sort of intemperance would be unexpected.

I just want to say to my good friend from South Carolina that I learned what I know about budgeting at his knee.

And I learned something about shenanigans at his knee.

I guess I watched too well and learned too well on some of these matters, and maybe I plead guilty, trying to be a fellow who observed my betters and trying to learn something from them.

With respect to defense, let us talk about contractors. I have heard a lot about the fact that you cannot change any of these contracts. I just read in the paper the other day where the Defense Department canceled DIVAD and said they are not going to do anything with DIVAD. I wonder why somebody did not say it is against the Constitution, that you cannot impair the right of a contractor under the Constitution? I have not heard anybody say that yet. I have not heard anybody raise the Constitution. But when we say we are concerned about readiness and we think we ought to be more careful because some of them duplicate two or three ways to knock out a tank—why, we determine whether we should look at those contracts, too.

Oh, no, you cannot do that. It is impairing the right of a contractor, and that is against the Constitution.

There may be a lot of things we are doing in both plans that are against the Constitution. We are making drastic changes. We are taking what have been prerogatives of Congress, and maybe both plans will be tested.

How interesting it is to hear that one plan is balanced and fair and perfect, and now that the sponsors have cleaned it up. Maybe it was not clean to start with, but they say they have cleaned it up

But the other plan is supposed to be an atrocity, a sham, shenanigans, and we "ought to be ashamed." Now is that just something.

I think it is good that we have the Senator from South Carolina raising these points. We have been looking for an opportunity to debate. We spent a couple of hours on it and nobody on that side stood on the floor. They just left us and covered the floor.

I think that is what we need to do with this plan. In Gramm-Rudman, we are talking about something that is very important for the country.

As far as delaying things is concerned, I think we have been ready, and we do stand ready, to say that we will make sure that nobody has to worry about their checks. So if we want to extend the debt ceiling for a short period of time or pass a clean bill in order to debate this, we should do it. I think we are ready to vote on Thursday, to clean up this whole matter. That should be done.

The Senator from South Carolina has mentioned that the House wants to work on that. I think that is fine. I think we should give them a few days to work on it and not roll this down there tomorrow and say, "Hey, you have to do this or the world comes to an end."

I cannot understand why we cannot get a simple extension of the debt ceiling for a short period of time, 7 or 10 days, or whatever would be reasonable. We could do that for a short period of time and agree to a final vote on Gramm-Rudman. We indicated that we are ready to do that. I certainly will push for that.

I know our plan probably lends itself to some discussion and debate. We have not had it out quite as long as Gramm-Rudman, and we welcome comments, especially those that are scholarly and learned and thoughtful and done in the spirit of trying to improve the plan, rather than just to light fireworks.

I thank the Senator from South Carolina for his fine statement.

Several Senators addressed the Chair.

CLOTURE MOTION

Mr. BYRD. Mr. President, I send a motion to the desk.

The PRESIDING OFFICER. The Chair recognizes the Senator from Kansas.

Mr. BYRD. Mr. President, I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion will be stated.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on H.J. Res. 372.

Robert C. Byrd, Alan Cranston, Wendell Ford, John Melcher, Daniel K. Inouye, Edward Zorinsky, J. James Exon, Don Riegle, Patrick Leahy, John D. Rockefeller, John F. Kerry, Dale Bumpers, Howard M. Metzenbaum, Tom Eagleton, Frank R. Lautenberg, and Quentin Burdick.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

The Senate continued with the consideration of the joint resolution (H.J. Res. 372) increasing the statutory limit on the public debt.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, it is obvious to me that we have a filibuster going on here. Probably agreement has been made with the House Speaker, who does not want to get this legislation until they get back from their 5-day recess.

We always plead for extra time, and I think it is finally starting to dawn on some of us. There is no reason we cannot finish in the Senate. We are protecting the House of Representatives. That is all it is.

I know a number of House Members in both parties have plans to depart here early Thursday and, of course, if we hang around until Thursday and do not send the bill over to the House until Thursday, obviously it is too late. They are out of town. They will be all over the world by Friday and they are going to stay out there Friday, Saturday, Sunday, Monday, Tuesday and they will not be back until Wednesday.

I am not going to be a party to that. There is no reason we cannot complete action on the amendment that is pending right now.

We have had the debate. Members are ready to vote. We are ready to accommodate other Members who have amendments and complete action on this bill tomorrow. It can be done early afternoon.

But it seems—I hope I am mistaken—but it appears to me now what we are really doing is trying to protect the House of Representatives.

There is no reason the Senate cannot vote. We have been here 7 or 8 days. Obviously I cannot bring it to a conclusion because there are some who do not want it brought to a conclusion. They are willing to stay all night to protect the House of Representatives. I think it is time we start worrying about the taxpayers and the people who are going to be impacted.

There is no doubt in my mind, and I do not think many Americans will disagree, that we are facing a delay. That is all we have had—a big delay tactic for the last 6 days.

We have had one excuse after another, and here we are at 11:20 p.m. in the evening on a Tuesday evening trying to figure out some way we can delay it 2 more days so that the Speaker of the House and the others will not have to face up to it until a week from tomorrow.

It seems to me that our obligation is to get it out of the Senate. I think we made a reasonable proposition to the distinguished leader, made one this morning at 11 a.m.; we heard nothing until 4:30 p.m. Another day has gone. We made a counterproposal this evening, and all the amendments, I might add, with one or two exceptions, are coming from the other side of the aisle, so it is not that there is any reluctance to deal with the amendments.

But it seems to me that we have to make a judgment. Either we are going to stay here and not do anything. It seems to me that is one thing we can do. We have had some debate on the leadership amendment. We are ready to vote on this side. We are prepared to vote without further debate.

It seems we should vote and go on to the other amendments. Senator LEVIN has an amendment. Senator KERRY has an amendment. Senator EXON has an amendment. Senator MELCHER has an amendment.

Early on this evening, everyone was anxious to offer those amendments. Two of them we are willing to accept. It will take about 5 minutes.

But it is obvious the freeze is on, and the freeze probably is going to last.

I do not have any quarrel about how long it lasts. It can last until those who are holding it up on the other side decide to let us proceed.

MOTION TO PROCEED TO MOTION TO RECONSIDER VOTE BY WHICH MOTION TO INVOKE CLOTURE WAS REJECTED

Mr. DOLE. Mr. President, it seems to me that in an effort to indicate again that we are willing and ready to do work, I move to proceed to the motion to reconsider which is at the desk, and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Kansas to proceed to the motion to reconsider the vote by which the motion to invoke cloture was rejected.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], the Senator from Arizona [Mr. GOLDWATER], the Senator from Nevada [Mr. LAXALT], the Senator from Maryland [Mr. MATHIAS], the Senator from South Dakota [Mr. PRESSLER], the Senator from Vermont [Mr. STAFFORD], the Senator from Idaho [Mr. SYMMS], and the Senator from Virginia [Mr. TRIBLE] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. INOUYE], the Senator from Louisiana [Mr. LONG], and the Senator from Mississippi [Mr. STENNIS] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 56, nays 33, as follows:

[Rollcall Vote No. 207 Leg.]

YEAS—56

Abdnor	Gorton	McConnell
Andrews	Gramm	Murkowski
Armstrong	Grassley	Nickles
Bingaman	Hatch	Nunn
Boren	Hatfield	Packwood
Boschwitz	Hawkins	Pell
Chafee	Hecht	Proxmire
Cochran	Heflin	Quayle
Cohen	Heinz	Roth
D'Amato	Helms	Rudman
Danforth	Hollings	Simpson
DeConcini	Humphrey	Specter
Denton	Kassebaum	Stevens
Dixon	Kasten	Thurmond
Dole	Kerry	Wallop
Domenici	Leahy	Warner
Durenberger	Lugar	Wilson
Evans	Mattingly	Zorinsky
Garn	McClure	

NAYS—33

Baucus	Exon	Melcher
Bentsen	Ford	Metzenbaum
Biden	Glenn	Mitchell
Bradley	Gore	Moynihan
Bumpers	Harkin	Pryor
Burdick	Hart	Riegle
Byrd	Johnston	Rockefeller

Laxalt	Stafford	

So the motion to reconsider was agreed to.

CLOTURE MOTION

Mr. DOLE. Mr. President, I sent a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The bill clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment No. 743 to House Joint Resolution 372, a joint resolution increasing the statutory limit on the public debt.

Bob Dole, John H. Chafee, Don Nickles, Mack Mattingly, Bob Packwood, Rudy Boschwitz, James Abdnor, Phil Gramm, Bill Cohen, Al Simpson, Frank Murkowski, Bob Kasten, Daniel J. Evans, Mitch McConnell, Warren B. Rudman, Arlen Specter, Alfonse D'Amato, Chuck Grassley, Ted Stevens, James A. McClure, and John Danforth.

MOTION TO RECONSIDER VOTE BY WHICH MOTION TO INVOKE CLOTURE WAS REJECTED

The PRESIDING OFFICER. The question is on the motion to reconsider.

Mr. DOLE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question in on agreeing to the motion to reconsider. The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], the Senator from Arizona [Mr. GOLDWATER], The Senator from Nevada [Mr. LAXALT], the Senator from Maryland [Mr. MATHIAS], the Senator from South Dakota [Mr. PRESSLER], the Senator from Vermont [Mr. STAFFORD], the Senator from Idaho [Mr. SYMMS] and the Senator from Virginia [Mr. TRIBLE] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] is necessarily absent.

The PRESIDING OFFICER (Mr. MATTINGLY). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 56, nays 35, as follows:

[Rollcall Vote No. 208 Leg.]

YEAS—56

Abdnor	Gorton	McConnell
Andrews	Gramm	Murkowski
Armstrong	Grassley	Nickles

NOT VOTING—9

East	Mathias	Stennis
Goldwater	Pressler	Symms
Laxalt	Stafford	Trible

So the motion to reconsider was agreed to.

[The following proceedings occurred after midnight.]

The PRESIDING OFFICER. The clerk will report the motion to invoke cloture.

Mr. DOLE. Mr. President, I ask unanimous consent that there may be 10 minutes, equally divided between the distinguished minority leader and the majority leader, to discuss the balance of the program.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

SCHEDULE

Mr. DOLE. Mr. President, the next vote, if there is one, will be on cloture, and I doubt that we can invoke cloture.

Then I would hope to move to table the motion to recommit, which would take with it everything else, and we would go back on the Gramm-Rudman-Hollings amendment. Since the distinguished Senator from Connecticut divided it, we would then have 19 different sections to vote on; but without cloture, each one would be debatable. I am prepared to try to do that. I may not have the votes to do that, but it seems to me that we have to do something to indicate that we are prepared to act.

Apparently, there is some reluctance to vote on the Gramm-Rudman-Hollings amendment tomorrow, because there is at least a suspicion that we would not then extend the short-term debt limit. Maybe it is my fault because I have not made it clear, but I have been suggesting all day that that would not only be possible but also that I hope it would be done without a rollcall vote. I do not think I want to do it, but even if I wanted to suggest that we extend the debt ceiling right now for 10 days, by unanimous consent, I could not get it; and I could not get unanimous consent after a vote on the leadership amendment.

I can get consent after a vote on the Gramm-Rudman-Hollings amendment, and I would intend to do that immediately and hope to dispose of it in 30 seconds, certainly not more than 20 minutes. Then we would still have a couple of other amendments that are relevant to the subject matter, which would be considered after that, and I hope we could complete that tomorrow; but if not, by noon on Thursday, so that we could then turn to the reconciliation bill.

If there is any doubt about that, I would propound a unanimous-consent request that would include disposition of the leadership amendment, which would include disposition of the modified Gramm-Rudman-Hollings amendment, because it needs to be modified to include a number of amendments we have agreed to, including amendments by the Senator from Michigan, the Senator from Florida, the Senator from Massachusetts, the Senator from Oklahoma, and others.

Then I would include in that unanimous-consent request that we next move to the short-term debt limit extension through October 17, with a 30-minute time agreement—and hope not to need that—and following that, we would consider only the following relevant amendments. We have a list of those, at least the ones I believe are relevant, and it is hoped that some of those can be eliminated.

However, if there is some doubt about our willingness to furnish votes or to bring up the brief debt extension, I apologize that I have not made that clear. That is my intention. You have my word that that will happen, and we will furnish nearly every vote on this side and hope to have some on that side.

That is a statement I wish to make before we get into any additional votes tonight.

If we can reach some agreement tonight, then it would not be necessary to have the cloture vote or to have a vote on the motion to table, and we could come in early in the morning and proceed to the leadership amendment, to be followed by the other amendments that we tried to dispose of earlier, followed by the Gramm-Rudman-Hollings amendment, followed by short-term debt limit extension, followed by the other relevant amendments.

So if there is any interest in that, I would certainly be willing to pursue it. Otherwise, I do not know of anything to do but to vote on the cloture motion, which will fail, but which will indicate that we are making an effort to resolve the impasse.

Mr. BYRD. Mr. President, the distinguished majority leader has made a proposal which I think is certainly worthy of our careful consideration. I would like to have a few minutes to talk with my colleagues on this side.

So, inasmuch as our Members have been called back from their homes, expecting to vote on cloture—with the two votes that preceded it—I suggest that we go ahead and have the cloture vote. That is what we told them to come back for.

Then, during the vote I will certainly make a good faith effort to agree to the proposal or something very closely related to it.

I tried to follow the distinguished majority leader's remarks. It was quite a lengthy proposal. I would like to see it in writing, if the distinguished majority leader will, or I will be happy to make a proposal immediately after the cloture vote which I think would be pleasing to the majority leader. I have one in mind.

In any event, I think we can resolve this within the next 15 minutes hopefully, and that is about what it would take on a cloture vote.

So let us proceed with that, and the majority leader will be assured that I am very interested in bringing this matter to an end. We have made several proposals over here that have been good faith proposals, and I want to see it brought to a conclusion, and I think we can do that.

CLOTURE MOTION ON AMENDMENT NO. 730, AS MODIFIED

The PRESIDING OFFICER. The clerk will report the motion to invoke cloture.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisons of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment No. 730, as modified, to H.J. Res. 372, a joint resolution increasing the statutory limit on the public debt.

Bob Dole, Al Simpson, Bob Packwood, Phil Gramm, Rudy Boschwitz, Chic Hecht, Jake Garn, Malcolm Wallop, Ernest F. Hollings, Orrin Hatch, Steve Symms, David Boren, Thad Cochran, Warren B. Rudman, John Danforth, Slade Gorton, Mark Andrews, Gordon Humphrey, Strom Thurmond, Mitch McConnell, Bill Cohen, Edward Zorinsky, Richard G. Lugar, John Warner, Frank Murkowski, Alphonse D'Amato, Ted Stevens, Chuck Grassley, Daniel J. Evans, Jesse Helms, Barry Goldwater, Bob Kasten, James A. McClure, Paul Laxalt, Don Nickles, James Abdnor, Paul Trible, Pete Wilson, and Pete Domenici.

VOTE

The PRESIDING OFFICER. The question is, Is it the sense of the Senate that debate on amendment No. 730, as modified, to House Joint Resolution 372, a joint resolution increasing the statutory limit on the public debt, shall be brought to a close? The yeas and nays are automatic under the rule.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST], the Senator from Arizona [Mr. GOLDWATER], the Senator from Nevada [Mr. LAXALT], the Senator from Maryland [Mr. MATHIAS], the Senator from South Dakota [Mr. PRESSLER], the Senator from Vermont [Mr. STAFFORD] and the Senator from Idaho [Mr. SYMMS] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 53, nays 39, as follows:

[Rollcall Vote No. 209 Leg.]

YEAS—53

Abdnor	Denton	Hawkins
Andrews	Dixon	Hecht
Armstrong	Dole	Heflin

NOT VOTING—8

East	Mathias	Stennis
Goldwater	Pressler	Symms
Laxalt	Stafford	

The PRESIDING OFFICER. On this vote the yeas are 53, the nays are 39. Two-thirds of the Senators present and voting not having voted in the affirmative, the motion is rejected.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CHAFEE). Without objection, it is so ordered.

The majority leader is recognized.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

PRESIDENTIAL APPROVALS

A message from the President of the United States announced that, on October 7, 1985, he had approved and signed the following enrolled bill and joint resolution:

S. 1689. An act to amend various provisions of the Public Health Service Act; 2nd S.J.Res. 115, Joint Resolution to designate 1985 as the "Oil Heat Centennial Year".

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1855. A communication from the Under Secretary of Agriculture (International Affairs and Commodity Programs), transmitting, pursuant to law, the initial commodity and country allocation table showing current programming plans for food assistance under PL-480 for fiscal year 1986; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1856. A communication from the Clerk of the United States Claims Court, transmitting, pursuant to law, a certified copy of the Court's judgement in the Minnesota Chippewa Tribe et al. v. the United States; to the Committee on Appropriations.

EC-1857. A communication from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, a listing of contract award dates for the period November 1 through December 31, 1985; to the Committee on Armed Services.

EC-1858. A communication from the Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Army's proposed letter of offer to Turkey for defense articles estimated to cost in excess of $50 million; to the Committee on Armed Services.

EC-1859. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Reviews of the Audits of the Financial Statements of the National Credit Union Administration's Operating and Share Insurance Funds for the Year Ended September 30, 1983; to the Committee on Banking, Housing, and Urban Affairs.

EC-1860. A communication from the Chairman of the Consumer Product Safety Commission, transmitting, pursuant to law, a report on safety activities under the Cigarette Safety Act of 1984; to the Committee on Commerce, Science, and Transportation.

EC-1861. A communication from the Secretary of Transportation, transmitting a draft of proposed legislation to require the licensing of operators of vessels that tow disabled vessels for consideration; to the Committee on Commerce, Science, and Transportation.

EC-1862. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "The Strategic Petroleum Reserve: An Overview of Its Development and Use in the Event of An Oil Supply Disruption"; to the Committee on Energy and Natural Resources.

EC-1863. A communication from the Assistant Secretary of the Interior (Water and Science), transmitting, pursuant to law, a report on a proposed contract with the Wellton-Mohawk Irrigation and Drainage District, Gila Project, Arizona; to the Committee on Energy and Natural Resources.

EC-1864. A communication from the Deputy Associate Director for Royalty Management, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-1865. A communication from the Deputy Associate Director for Royalty Man-

agement, Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on the refund of certain offshore lease revenues; to the Committee on Energy and Natural Resources.

EC-1866. A communication from the General Counsel of the Treasury, transmitting a draft of proposed legislation to amend the Internal Revenue Code of 1954 to provide for the collection of fees for certain services; to the Committee on Finance.

EC-1867. A communication from the United States Trade Representative, transmitting, pursuant to law, the annual report on the operation of the International Coffee Agreement for coffee year 1984/1985; to the Committee on Finance.

EC-1868. A communication from the Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the sixty day period prior to October 4, 1985; to the Committee on Foreign Relations.

EC-1869. A communication from the Assistant Attorney General (Administration), transmitting, pursuant to law, notice of a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-1870. A communication from the Assistant Secretary of the Treasury (Management), transmitting, pursuant to law, notice of a new Privacy Act system of records; to the Committee on Governmental Affairs.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-463. A petition from a citizen of Concord, NH, relating to firearms; to the Committee on the Judiciary.

POM-464. A petition from a citizen of Concord, NH, relating to the "Gay Rights Bill"; to the Committee on the Judiciary.

POM-465. A petition from a citizen of Newcastle, WY, relating to the income tax amendment; to the Committee on the Judiciary.

POM-466. A petition from a citizen of Carmichael, CA, relating to the income tax amendment; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. 1002. A bill to amend the Lanham Act to improve certain provisions relating to concurrent registrations (Rept. No. 99-153).

By Mr. THURMOND, from the Committee on the Judiciary:

Report to accompany the bill (S. 1262) to amend the Immigration and Nationality Act to extend for 2 years the authorization of appropriations for refugee assistance and for other purposes (Rept. 99-154).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources:

Roger Dale Semerad, of Maryland, to be an Assistant Secretary of Labor; and

James M. Stephens, of Virginia, to be a member of the National Labor Relations Board for the term of 5 years.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. KENNEDY:

S. 1743. A bill to amend section 810 of the Housing and Community Development Act of 1974, section 202 of the Housing Act of 1959, and section 8 of the United States Housing Act of 1937, to establish a special program for housing for the chronically mentally ill; to the Committee on Banking, Housing, and Urban Affairs.

S. 1744. A bill to require States to develop, establish, and implement State comprehensive mental health plans; to the Committee on Labor and Human Resources.

S. 1745. A bill to amend titles XVI, XVIII, and XIX of the Social Security Act with respect to services and benefits for chronically mentally ill individuals; to the Committee on Finance.

By Mr. CHILES:

S. 1746. A bill to direct the Attorney General to study and recommend methods to control the diversion of legitimate precursor and essential chemicals to the production of illegal drugs; to the Committee on the Judiciary.

By Mr. ROTH (for himself, Mr. PELL, Mr. CRANSTON, Mr. CHAFEE, and Mr. STAFFORD):

S. 1747. A bill to amend the Foreign Assistance Act of 1961 to protect tropical forests in developing countries; to the Committee on Foreign Relations.

S. 1748. A bill to amend the Foreign Assistance Act of 1961 to protect biological diversity in developing countries; to the Committee on Foreign Relations.

By Mr. BOSCHWITZ:

S. 1749. A bill for the relief of Fransisco Roman and Rosalba Roman; to the Committee on the Judiciary.

By Mrs. KASSEBAUM:

S. 1750. A bill to amend the Federal Aviation Act of 1958, as amended, to increase civil penalty limits for safety violations by persons engaged in commercial aircraft operations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. HEINZ:

S.J. Res. 217. Joint resolution to designate the week of December 2, 1985, to December 8, 1985, as "National Emergency Medical Air Transport Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. HUMPHREY:

S. Res. 237. Resolution supporting the intent of the President to discuss with leaders of the Soviet Union American concerns with the Soviet Union presence in Afghanistan, and for other purposes; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. KENNEDY:

S. 1743. A bill to amend section 810 of the Housing and Community Development Act of 1974, section 202 of the Housing Act of 1959, and section 8 of the U.S. Housing Act of 1937, to establish a special program for housing for the chronically mentally ill; to the Committee on Banking, Housing, and Urban Affairs.

S. 1744. A bill to require States to develop, establish, and implement State comprehensive mental health plans; to the Committee on Labor and Human Resources.

S. 1745. A bill to amend titles XVI, XVIII, and XIX of the Social Security Act with respect to services and benefits for chronically mentally ill individuals; to the Committee on Finance.

IMPROVED SERVICES FOR THE CHRONICALLY MENTALLY ILL

Mr. KENNEDY. Mr. President, I rise to offer a legislative initiative to improve services to one of the most mistreated and neglected groups in American society, the chronically mentally ill. Because an effective response to the problems of the chronically mentally ill requires action that falls into the jurisdiction of a number of committees, I have divided this initiative into three bills so that each piece of this program may be appropriately referred.

The last three decades have witnessed both great hope and cruel disappointment for the chronically mentally ill. Beginning in the early fifties, the development of psychotropic drugs produced a true revolution in the treatment of this population. For the first time, medicine could significantly improve the ability of the chronically mentally ill to function in society and could reduce the pain, anguish, and delusions produced by psychoses.

With these new developments, there was widespread awareness that long-term confinement of the mentally ill in large institutions should be replaced by a system of community care. Hospitalization should, by and large, be restricted to acute episodes of illness. As President Kennedy stated in his 1963 State of the Union Message, "The abandonment of the mentally ill to the grim mercy of custodial institutions too often inflicts on them a needless cruelty which this Nation should not endure."

The advancements in psychotropic medications did lead to a remarkable decline in the number of mental patients confined to mental hospitals. Between 1955 and today, the number of patients resident in public mental institutions declined from over half a million to 120,000.

But the removal of patients from mental hospitals was not matched by

the growth of the community-based system of care President Kennedy envisioned in his 1963 address. Instead, the deinstitutionalized mentally ill too often faced a future of isolation, abandonment, and despair. Many of the chronically mentally ill live in single room occupancy hotels or board and care homes. With no services, no treatment, and no integration into the larger society, they spend their days staring at walls or wandering the streets.

And they are not the most unfortunate members of this population. On an average day in this great country of ours, there are between 125,000 and 250,000 chronically mentally ill individuals without any home at all. It is a sad commentary on our society that one can walk a block from the White House and find confused, hallucinating, mentally ill people, talking to themselves, dressed in rags, and sleeping on grates on the coldest days of Washington's winters.

This situation would be heartrending if it were unavoidable. But the sad state of so many chronically ill Americans is not unavoidable: it is disgraceful.

We know how to care for the mentally ill in the community. We know how to assure that each mentally ill individual can live in humane conditions. We know how to provide the care and treatment that will allow each mentally ill individual to come closer to his or her full potential.

But far too many States and communities have failed to provide the care for the chronically mentally ill that constitutes simply justice. And the Federal Government has not only failed to provide the leadership that is its responsibility; key Federal policies have actually contributed to the mistreatment of chronically mentally ill Americans.

The key features of an effective, community-based program for the chronically mentally ill include:

Case management, so that someone is responsible for the care and support services he needs;

A program of habilitation and rehabilitation, which would provide services to the chronically mentally ill appropriate for their level of functioning and responsive to their individual needs. Needed activities can range from regular social contact to assist with reintegration in the community to vocational training, supervised work, or assistance in obtaining and keeping competitive employment.

Medical treatment, which would provide treatment ranging in intensity from day hospitalization to a periodic appointment with a psychiatrist to check on and adjust medication;

Assistance to families, who often provide the front-line care for the mentally ill in the community and have too often been left to cope with the severe strains of mental illness without any assistance from the society at large; and

Housing services, ranging from halfway houses with staff in residence providing continuous supervision to largely independent living.

A program of this type is not particularly costly—especially when compared with the expenditures for the expensive institutionalization that it would largely replace. The Community Support Program demonstrations funded on a modest scale by the Federal Government and other activities at the State level have shown how effective and humane this approach can be. Indeed, evaluations of the Community Support Program have shown that it can reduce days of hospitalization among the chronically mentally ill by 50 percent. States like Colorado and Wisconsin, that have well-developed community-based programs have also been able to reduce the number of days of hospital care per capita as much as 50 percent below the national average.

But despite the progress that has been made by individual States and communities, the gap between good practice and typical practice still remains shamefully wide. Some States and communities have simply failed to live up to their responsibilities to this population, and Federal policies have too often been inadequate or even counterproductive.

The initiative I am introducing today is designed to cure those failings. It says that we as a nation have a responsibility to the chronically mentally ill. It says that the Federal Government must exercise leadership by insisting that States and communities live up to their responsibilities as the price of receiving Federal funds. And it says that the Federal Government must put its own house in order by correcting policies which hinder the achievement of the comprehensive system of care the chronically mentally ill need.

I know that there are some who will say that the care and treatment of the chronically mentally ill is appropriately a State and local responsibility. I agree that actual delivery and organization of services must remain primarily a State and local role. But to assert that there is no important responsibility for the Federal Government is to say that Washington should ignore both fiscal facts and simple morality.

From the fiscal point of view, the Department of Health and Human Services estimated that 1983 expenditures for the chronically mentally ill totaled $8.7 billion. Of this amount, $3.9 billion, or 45 percent came from the Federal Government. So the Federal Government has a large financial stake in this population, even if the Federal investment is too frequently spent neither wisely nor well.

But the moral argument for Federal leadership is even more compelling. To argue that the Federal Government has no responsibility to see that justice is done is to argue that it should remain as indifferent to the sufferings of its chronically mentally ill citizens as it was to the sufferings of our black citizens for far too many years of our country's history.

As Dorothea Dix told the U.S. Congress in 1848:

> May it not be demonstrated as the soundest policy of the Federal Government to assist in the accomplishment of great moral obligations by diminishing and arresting wide-spread miseries which mar the face of society, and weaken the strength of communities? I confide to you the cause and the claims of the destitute and desolate who, through the providence of God, are wards of the nation, claimants on the sympathy and care of the public, through the miseries and disqualifications brought upon them by the sorest afflictions with which humanity can be visited.

The key features of the initiative I am introducing today include:

ALCHOHOL, DRUG ABUSE AND MENTAL HEALTH [ADAMHA] BLOCK GRANT CHANGES

To qualify for ADAMHA block grant funds, a State must develop and implement a comprehensive mental health plan for the chronically mentally ill. The plan must cover all mental health funding sources in the State—including Medicaid, State and local funds, and private insurance funds, not just the relatively small PHS funding sources.

The plan must provide for the establishment and implementation of an organized, community-based system of care for the chronically mentally ill as defined by the Secretary of HHS in regulations. The plan must include provision of case management services for all chronically mentally ill individuals receiving public funds. The plan must include a program of outreach to the homeless mentally ill. Once the plan is accepted by the Secretary, progress toward achieving plan goals and objectives is a condition for continued ADAMHA block grant funding.

The plan must be developed with the assistance of a broad-based advisory board including advocates for the mentally ill as well as public and private agencies dealing with the mentally ill.

An additional $10 million is provided in the first year after adoption of the legislation to assist States in developing their comprehensive plan. An additional $50 million per year is provided in subsequent years to assist in plan implementation.

A demonstration program of project grants to agencies developing and implementing methods of serving the homeless chronically mentally ill is established.

MEDICAID CHANGES

Under current law, Medicaid is not clearly available—except through a waiver process that only a few States have applied for—to fund the social services, habilitative, and rehabilitation services the chronically mentally ill need in the community. By contrast, Medicaid support is fully available for care in State mental institutions for chronically mentally ill individuals who are 21 or younger or 65 or older. Medicaid is available without any age limit for chronically mentally ill individuals in skilled nursing facilities or intermediate care facilities, so long as those facilities are not institutions primarily for the treatment of mental illness. And Medicaid is also available without any Federal limits for care in the psychiatric ward of a general hospital. The institutional bias in current Medicaid rules has been an important factor in inhibiting State development of a true continuum of care for the chronically mentally ill.

The initiative would make the following changes to improve Medicaid's contribution to the community care of the chronically mentally ill and to reduce the unnecessary institutionalization that Medicaid often pays for.

States would be required to provide case management services under Medicaid for the chronically mentally ill.

States would be required to provide community and home-based care under Medicaid for Medicaid-eligible chronically mentally ill. Community and home-based care would include the essential elements of a service system for the chronically mentally ill, such as day activities, habilitation and rehabilitation services, staff and service costs of supervised living arrangements, foster care, vocational and prevocational services, respite care, day care and day hospitalization, mental health clinic services, crisis intervention services, and counseling and assistance for families of the chronically mentally ill.

To assure that services would be provided cost-effectively, States would be allowed to waive normal Medicaid rules and arrange for the provision of care on a contractual or capitated basis.

The Secretary of HHS would be required to provide technical assistance to States in fulfilling these Medicaid plan requirements.

Skilled nursing facilities and intermediate care facilities treating chronically mentally ill patients would be required to provide appropriate services. Currently, States place Medicaid-eligible chronically mentally ill patients in these facilities to get Medicaid reimbursement, but, because Medicaid will not reimburse care provided in an institution for the treatment of mental disease, appropriate staffing and services are not required.

The Secretary would be authorized to fund demonstrations in up to five States or regions within States of the delivery of services on a capitated basis with a single entry point.

Hospitals receiving Medicaid reimbursement would be required to have a written discharge planning arrangement to assure that any chronically mentally ill patients discharged after a spell of illness would have a program in place assuring receipt of case-management and appropriate community services.

A maintenance of effort requirement would be established to assure that States did not simply replace current State funded services in the community with Medicaid-funded services.

SSI CHANGES

Many chronically mentally ill individuals are eligible for supplemental security income because of their disability. SSI eligibility also normally assures Medicaid eligibility. Some features of the current SSI Program, however, need to be changed in order to provide appropriate service to the chronically mentally ill, who differ from other disabled populations in that their disability is often episodic.

Institutionalization for more than 30 days normally means the loss of SSI payments. In situations where the chronically mentally ill person relies on SSI income to maintain a residence, a short-term spell of illness can thus mean that the patient will be homeless when he is discharged. This legislation would continue enough of the SSI income to maintain a residence when the period of institutionalization is expected to be for less than 6 months.

Delay in SSI eligibility can often be disastrous for a chronically mentally ill individual. This legislation would provide for presumptive SSI eligibility—including Medicaid eligibility—for chronically mentally ill individuals who are about to be discharged from an institution, who are at imminent risk of institutionalization, or who are homeless and willing to participate in a plan of care.

Persons resident in public institutions are not eligible for SSI under current rules. This limits State flexibility to establish half-way houses and other transitional living facilities. This proposal would allow SSI eligibility in such facilities.

Persons who exceed a certain level of earnings—called the SGA test—are no longer eligible for SSI, no matter how disabled they remain from the medical point of view. This is not an important problem from the income support standpoint, but, since Medicaid eligibility and SSI eligibility are linked, a chronically mentally ill individual who has been able to work may lose the very medical and support services that have made his working possible. This legislation would remove the disincentive to work inherent in this rule by allowing continuance of Medicaid coverage for 3 years after the SGA test is exceeded by a chronically mentally ill person.

Permanent liberalization of the SGA test. To remove a disincentive to enter the work force on the part of SSI eligible individuals, the SGA standard was liberalized in 1980 for a 3-year period. The liberalization was recently extended until 1987. This legislation would make the change permanent.

HOUSING LAW CHANGES

One of the major problems facing the chronically mentally ill and agencies serving them is achieving decent housing, particularly housing that can be used for transitional living facilities. Changes made by this legislation to assist with this problem include:

Revise the Urban Housing Program to allow State mental health authorities or other private nonprofit or public agencies designated by the State to claim vacant HUD properties for use for transitional living. An authorization of $5 million the first year would be established and of $15 million in each of the 2 subsequent years.

Establish a set-aside of section 202 subsidizing housing as provided in H.R. 1 to make it easier to develop housing for the handicapped, including the chronically mentally ill.

Establish a new program of housing vouchers tailored especially for the chronically mentally ill. Costs would be shared on a 50-50 basis between the State and Federal Governments. The authorization would be $5 million in the first year, $15 million in the second year, and $25 million in the third year.

Enactment of these proposals will mean a major improvement in the care and treatment of the chronically mentally ill—an improvement that is long overdue.

In evaluating proposals for significant changes in social programs, it is always important to be conscious of the fiscal costs involved. This is particularly true today in view of the disastrous budget deficits this administration's failed fiscal and economic policies have created.

I believe the total cost of this package will be modest, because the new services offered can largely be financed through reorientation of existing funds. To the extent that elements of the package do require major expansions of Federal expenditures, I anticipate that there will be revision of these proposals as they work their way through the legislative process. But I offer them in the firm conviction that the time is now to begin to offer the chronically mentally ill and their families the opportunities for humane and effective treatment that is the obligation of a civilized society.

The great artist Vincent Van Gogh was a victim of chronic mental illness and suffered terribly from his episodes of psychosis. In a letter to his brother composed shortly before his suicide at the age of 37, he wrote, "Oh, if I could have worked without this cursed disease, what things I might have done."

Passage of the legislation I am offering today will be a small step toward the prevention of the tragic waste of human potential that chronic mental illness represents.

I ask that the text of the legislation be printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 1743

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Housing for the Chronically Mentally Ill Act of 1985".

SEC. 2. URBAN HOMESTEADING.

Section 810 of the Housing and Community Development Act of 1974 is amended—

(1) by redesignating subsection (k) as subsection (l); and

(2) by inserting after subsection (j) the following:

"(k)(1) In addition to a program which meets the requirements of subsection (b), the Secretary shall approve an urban homestead program carried out by a unit of general local government or a State or a public agency of a unit designated by unit of general local government or a State which provides for—

"(A) the conditional conveyance of unoccupied residential property by the responsible administrative entity to a State mental health authority or other public authority or private nonprofit agency certified by the State mental health authority without any substantial consideration for the purpose of providing supervised living for the chronically mentally ill;

"(B) an agreement whereby the transferee agrees to utilize such property solely for the purpose for which the property was transferred, and to make such repairs and improvements to the property as may be necessary to meet applicable local standards for decent safe and sanitary housing within three years after the date of initial conveyance; or

"(C) the revocation of any such conveyance upon a material breach of any condition thereof or any agreement entered into under subparagraph (B).

"(2) The Secretary shall include in the program under this subsection property which meets the requirements of subsection (a) and which has a value as of the date of conveyance of not to exceed $40,000, except that this limit may be waived by the Secretary.

"(3) To the extent practicable, properties to be conveyed for the purpose of this subsection shall be made available on a Statewide basis.

"(4) There are authorized to be appropriated for the purposes of this subsection not to exceed $5,000,000 for the fiscal year ending September 30, 1986, and not to exceed $15,000,000 for each fiscal year thereafter.".

SEC. 3. SECTION 202 HOUSING FOR THE HANDICAPPED.

(a) FINDINGS AND PURPOSE.—

(1) The Congress hereby finds that—

(A) housing for nonelderly handicapped families is assisted under section 202 of the Housing Act of 1959 and section 8 of the United States Housing Act of 1937;

(B) the housing programs under such sections are designed and implemented primarily to assist rental housing for elderly and nonelderly families and are often inappropriate for dealing with the specialized needs of the physically impaired, the developmentally disabled, and the chronically mentally ill;

(C) the development of housing for nonelderly handicapped families under such programs is often more expensive than necessary, thereby reducing the number of such families that can be assisted with available funds;

(D) the program under section 202 of the Housing Act of 1959 can continue to provide direct loans to finance group residences and independent apartments for nonelderly handicapped families, but can be made more efficient and less costly by the adoption of standards and procedures applicable only to housing for such families;

(E) the use of the program under section 8 of the United States Housing Act of 1937 to assist rentals for housing for nonelderly handicapped families is time consuming and unnecessarily costly and, in some areas of the Nation, prevents the development of such housing;

(F) the use of the program under section 8 of the United States Housing Act of 1937 to assist rentals for housing for nonelderly handicapped families should be replaced by a more appropriate subsidy mechanism;

(G) both elderly and handicapped housing projects assisted under section 202 of the Housing Act of 1959 will benefit from an increased emphasis on supportive services and a greater use of State and local funds; and

(H) an improved program for nonelderly handicapped families will assist in providing shelter and supportive services for mentally ill persons who might otherwise be homeless.

(2) The purpose of this section is to improve the direct loan program under section 202 of the Housing Act of 1959 to ensure that such program meets the special housing and related needs of nonelderly handicapped families.

(b) HOUSING FOR HANDICAPPED FAMILIES.—

(1) Section 202(h) of the Housing Act of 1959 is amended to read as follows:

"(h)(1) Of the amounts made available in appropriation Acts for loans under subsection (a)(4)(C) for any fiscal year commencing after September 30, 1985, not less than 15 percent or $100,000,000, whichever amount is greater, shall be available for loans for the development costs of housing for handicapped families. If the amount required for any such fiscal year for approvable applications for loans under this subsection is less than the amount available under this paragraph, the balance shall be made available for loans under other provisions of this section.

"(2) The Secretary shall take such actions as may be necessary to ensure that—

"(A) funds made available under this subsection will be used to support a variety of methods of meeting the needs primarily of nonelderly handicapped families by providing a variety of housing options, ranging from small group homes to independent living complexes; and

"(B) housing for handicapped families assisted under this subsection will provide families occupying units in such housing with an assured range of services specified in subsection (f), will provide such families with opportunities for optimal independent living and participation in normal daily activities, and will facilitate access by such families to the community at large and to suitable employment opportunities within such community.

"(3)(A) In allocating funds under this subsection, and in processing applications for loans under this section and assistance payments under paragraph (4), the Secretary shall adopt such distinct standards and procedures as the Secretary determines appropriate due to differences between housing for handicapped families and other housing assisted under this section.

"(B) The Secretary may, on a demonstration basis, determine the feasibility and desirability of reducing processing time and costs for housing for handicapped families by limiting project design to a small number of prototype designs. Any such demonstration shall be limited to the 3-year period following the date of the enactment of the Housing Act of 1985, may only involve projects whose sponsors consent to participation in such demonstration, and shall be described in a report submitted by the Secretary to the Congress following completion of such demonstration.

"(4)(A) The Secretary shall, to the extent approved in appropriation Acts, enter into contracts with owners of housing for handicapped families receiving loans under, or meeting the requirements of, this section to make monthly payments to cover any part of the costs attributed to units occupied (or, as approved by the Secretary, held for occupancy) by lower income families that is not met from project income. The annual contract amount for any project shall not exceed the sum of the initial annual project rentals for all units and any initial utility and services allowances for such units, as approved by the Secretary. Any contract amounts not used by a project in any year shall remain available to the project until the expiration of the contract. The term of a contract entered into under this subparagraph shall be 240 months. The annual contract amount may be adjusted by the Secretary if the sum of the project income and the amount of assistance payments available under this subparagraph are inadequate to provide for reasonable project costs. In the case of an intermediate care facility in which there reside families assisted under title XIX of the Social Security Act, project income under this subparagraph shall include the same amount as if such families were being assisted under title XVI of the Social Security Act.

"(B) The Secretary shall approve initial project rentals for any project assisted under this subsection based on the determination of the Secretary of the total actual necessary and reasonable costs of developing and operating the project, taking into consideration the need to contain costs to the extent practicable and consistent with the purposes of the project and this section.

"(C) The Secretary shall require that, during the term of each contract entered into under subparagraph (A), all units in a project assisted under this subsection shall be made available for occupancy by lower income families, as such term is defined in section 3(b)(2) of the United States Housing Act of 1937. The rent payment required of a lower income family shall be determined in accordance with section 3(a) of such Act, except that the gross income of a family occupying an intermediate care facility assist-

ed under title XIX of the Social Security Act shall be the same amount as if the family were being assisted under title XVI of the Social Security Act.

"(D) The Secretary shall coordinate the processing of an application for a loan housing for handicapped families under this section and the processing of an application for assistance payments under this paragraph for such housing.".

(2) Section 202(d) of the Housing Act of 1959 is amended by adding at the end thereof the following new paragraphs:

"(9) The term 'housing for handicapped families' means housing and related facilities to be occupied by handicapped families who are primarily nonelderly handicapped families.

"(10) The term 'nonelderly handicapped familes' means elderly or handicapped families, the head families' means elderly or handicapped families, the head of which (and spouse, if any) is less than 62 years of age at the time of initial occupany of a project assisted under the section.".

(3) Section 202(c)(3) of the Housing Act of 1959 is amended by inserting after "section" the following: "and designed for dwelling use by 12 or more elderly or handicapped families".

(c) SUPPORTIVE SERVICES FOR ELDERLY AND HANDICAPPED FAMILIES.—Section 202(f) of the Housing Act of 1959 is amended—

(1) by inserting "(1)" after the subsection designation; and

(2) by adding at the end thereof the following new paragraph:

"(2) Each applicant for a loan under this section for housing and related facilities shall submit with the application a supportive services plan describing—

"(A) the category or categories of families such housing and facilities are intended to serve;

"(B) the range of necessary services to be provided to the families occupying such housing;

"(C) the manner in which such services will be provided to such families; and

"(D) the extent of State and local funds available to assist in the provision of such services.".

(d) TERMINATION OF SECTION 8 ASSISTANCE.—On and after the first date that amounts approved in an appropriation Act for any fiscal year become available for contracts under section 202(h)(4)(A) of the Housing Act of 1959, as amended by subsection (b) of this section, no project for handicapped (primarily nonelderly) families approved for such fiscal year pursuant to section 202 of such Act shall be provided assistance payments under section 8 of the United States Housing Act of 1937, except pursuant to a reservation for a contract to make such assistance payments that was made before the first date that amounts for contracts under such section 202(h)(4)(A) became available.

(e) IMPLEMENTATION.—Not later than the expiration of the 120-day period following the date of the enactment of this Act, the Secretary of Housing and Urban Development shall, to the extent amounts are approved in an appropriation Act for use under section 202(h)(4)(A) of the Housing Act of 1959 for fiscal year 1986, publish in the Federal Register a notice of fund availability to implement the provisions of, and amendments made by, this section. The Secretary shall issue such rules as may be necessary to carry out such provisions and amendments for fiscal year 1987 and thereafter.

(f) EFFECTIVE DATE AND APPLICABILITY.—

(1) The provisions of, and amendments made by, this section shall become effective on October 1, 1985.

(2)(A) Except as otherwise provided in this section, the provisions of, and amendments made by, this section shall not apply with respect to projects with loans or loan reservations under section 202 of the Housing Act of 1959 using authority approved in appropriation Acts for fiscal years beginning before October 1, 1985.

(B) Notwithstanding subparagraph (A), the Secretary may apply the provisions of, and amendments made by, this section to any project in order to facilitate the development of such project in a timely manner.

SEC. 4. HOUSING VOUCHER PROGRAM.

Section 8(o) of the United States Housing Act of 1937 is amended by adding at the end thereof the following:

"(9)(A) The Secretary is authorized to carry out a separate program to provide assistance payment authority in accordance with this subsection to provide housing for the chronically mentally ill through State mental health agencies who shall make such contracts available in connection with programs of supervised housing for the chronically mentally ill as defined by such agencies. Assistance may be provided under this paragraph for housing in half-way houses, group houses, or ordinary multifamily housing, subject to the receipt by the Secretary of an appropriate State certification that the recipient is participating in an appropriate plan of care and will receive a level of supervision appropriate to the recipient's needs.

"(B) Assistance contracts may be available under this paragraph—

"(i) only in those States which agree to furnish 50 per centum of the housing costs associated with the program under this paragraph; and

"(ii) only for assistance under contracts with landlords for periods of not to exceed 60 months.

"(C) The Secretary shall distribute housing assistance authorized under this paragraph among the States on the basis of applications by the appropriate State agencies. If the amount of funds for which applications are received exceeds the amount of funds for which applications are received exceeds the amount of funds available, the available assistance shall be allocated on the basis of State population and the need for assistance in order to enable the chronically mentally ill to receive housing assistance.

"(D) For the purpose of carrying out this paragraph, there are authorized to be appropriated not to exceed $5,000,000 for fiscal year 1986, not to exceed $15,000,000 for fiscal year 1987, and not to exceed $25,000,00 for fiscal year 1988.".

S. 1744

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "State Comprehensive Mental Health Services Plan Act of 1985".

STATE COMPREHENSIVE MENTAL HEALTH SERVICES PLAN

SEC. 2. (a) Part B of title XIX of the Public Health Service Act is amended—

(1) by inserting before the heading for section 1911 the following: "Subpart 1—Block Grant"; and

(2) by adding at the end thereof the following: "Subpart 2—State Comprehensive Mental Health Services Plan

"DEVELOPMENT GRANTS

"SEC. 1920B. (a) The Secretary shall make grants to States for the development of State comprehensive mental health services plans which comply with section 1920C. In order to receive a grant under this section, a State shall submit an application to the Secretary. Each such application shall—

"(1) contain a description of the activities the State will conduct in order to develop a State comprehensive mental health plan which complies with section 1920C;

"(2) contain a certification that the State will develop such plan with the assistance of the State Advisory Council established under section 1920D; and

"(3) be in such form, and contain such additional information, as the Secretary may by regulation prescribe.

"(b)(1) Except as provided in paragraph (2), the amount of a grant to a State under this section shall be the amount which bears the same ratio to the amount appropriated to carry out this section as the population of the State bears to the total of the population of all States which submit applications under this section.

"(2) Notwithstanding paragraph (1), the amount of a grant to any State under this section shall not be less than $150,000.

"(c) To carry out this section, there are authorized to be appropriated $10,000,000 for fiscal year 1987.

"STATE COMPREHENSIVE MENTAL HEALTH SERVICES PLANS

"SEC. 1920C. (a) In order to receive an allotment under section 1913—

"(1) for fiscal year 1988, a State shall have a State plan approved by the Governor of the State and submitted to and approved by the Secretary;

"(2) for any fiscal year beginning after September 30, 1988—

"(A) have a State plan, or revisions of a State plan which has been approved for a prior fiscal year, submitted to and approved by the Secretary; and

"(B) be certified by the Secretary under subsection (d) as having made adequate progress in the implementation of the State plan during the preceding fiscal year; and

"(3) for any fiscal year beginning after September 30, 1987, have established and have in effect the State Advisory Council required under section 1920D.

"(b) In order to be approved by the Secretary under this section, a State comprehensive mental health services plan shall meet the following requirements:

"(1) The State plan shall establish objectives for the provision of mental health prevention and treatment services in the State during the fiscal year for which an allotment is requested under section 1913 and each of the two succeeding fiscal years.

"(2) The State plan shall describe, in a form and manner which complies with standards promulgated by the Secretary, the resources devoted to and the activities to be carried out under the plan during each such fiscal year, including—

"(A) a description of mental health activities funded or supported under this Act;

"(B) a description of mental health activities funded or supported by State appropriations;

"(C) a description of mental health and related support activities funded under or supported through title XIX of the Social Security Act and other programs of Federal assistance; and

"(D) a description of mental health activities reimbursed or provided in the State by private third party insurers.

"(3) For each such fiscal year, the State plan shall—

"(A) provide for the establishment and of implementation of an organized community-based system of care for chronically mentally ill individuals;

"(B) contain quantitative targets to be achieved in the implementation of such system, including numbers of chronically mentally ill individuals residing in the areas to be served under such system;

"(C) describe services to be provided to chronically mentally ill individuals to enable such individuals to gain access to essential mental health services;

"(D) describe medical and dental care and rehabilitation services and employment, housing, and other support services to be provided to chronically mentally ill individuals in order to enable such individuals to function outside of inpatient institutions to the maximum extent of their capabilities; and

"(E) provide for activities to reduce the rate of hospitalization of chronically mentally ill individuals.

"(4) Except as provided in paragraph (5), the State plan shall require the provision, in each such fiscal year, of case management services to each chronically mentally ill individual in the State who—

"(A) receives substantial amounts of public funds or services pursuant to—

"(i) the aid to families with dependent children program under a State plan under title IV-A of the Social Security Act;

"(ii) the supplemental security income program under title XVI of such Act;

"(iii) any State program of public assistance;

"(iv) a State plan for medical assistance under title XIX of such Act; or

"(v) the program of old-age, survivors, and disability insurance benefits under title II of such Act; or

"(vi) mental health services funded by the State.

"(5) The State plan may provide for the implementation of the requirements of paragraph (4) in a manner which phase in during fiscal years 1987, 1988, and 1989, the provision to all chronically mentally ill individuals to which such paragraph applies the case management services required to be provided under such paragraph.

"(6) The State plan shall provide for the establishment and implementation (during the fiscal year for which the plan is submitted and each of the two succeeding fiscal years) of a program of outreach to, and services for, chronically mentally ill individuals who are homeless.

"(7)(A) Except as provided in subparagraph (B), the State plan shall provide, to the maximum extent feasible, for the delivery of services under the State plan through community mental health centers.

"(B) With respect to services provided under the State plan with payments under this title, the State plan shall require that such services be provided in an area through any community mental health center existing in such area to the extent feasible.

"(c)(1) A State shall to the extent feasible provide services under the State plan in accordance with subsection (b)(7) through a community health center which—

"(A) complies with the provisions of section 1916(c)(4);

"(B) provides assurances to the State that—

"(i) the mental health care of each patient of the center will be provided under the supervision of a member of the professional staff of the center; and

"(ii) any medical services provided to a patient of the center shall be provided under the supervision of a physician unless otherwise permitted by State law, and to the maximum extent feasible, that such physician shall be a psychiatrist.

"(d)(1) By July 1 of each fiscal year, each State which receives an allotment under section 1913 for such fiscal year shall prepare and transmit to the Secretary a report which—

"(A) describes the progress made by the State in implementing the State plan during such fiscal year and during previous fiscal years; and

"(B) contains such revisions of the State plan as the State considers appropriate.

"(2) The Secretary shall review each report of a State under paragraph (1) and determine whether the State has made adequate progress, during the fiscal year in which the report is submitted and in previous fiscal years, in implementing the State plan and any revisions thereof which have been approved by the Secretary. If the Secretary determines that a State has not made adequate progress in implementing the State plan in any fiscal year, the Secretary shall not make an allotment to such State under section 1913 for any fiscal year after such fiscal year until the State takes such corrective action as the Secretary may require to ensure that adequate progress is made by the State in implementing such State plan.

"(e) The Secretary shall provide technical assistance to States directly or big contract in the development and implementation of State plans which comply with this section. Such technical assistance shall include the development and publication by the Secretary of model elements for State plans and model data systems for the collection of data concerning the implementation of the State plan.

"ADVISORY COUNCIL

"SEC. 1920D. (a) Each State shall establish an Advisory Council on Mental Health Planning. A State Advisory Council shall—

"(1) assist the State in the development and establishment of the State plan; and

"(2) monitor the implementation of the State plan.

"(b) Each State Advisory Council shall be composed of—

"(1) the director of the State mental health agency;

"(2) the director of the State agency which administers or supervises the administration of the State plan submitted under title XIX of the Social Security Act;

"(3) two individuals who represent advocacy groups for chronically mentally ill individuals;

"(4) two individuals who represent advocacy groups for the provision of mental health services;

"(5) one individual who represents the organization of community mental health centers;

"(6) one individual who is a psychiatrist or other type of mental health professional and who is not employed by the Federal, State, or local governments;

"(7) a member of the committee of each House of the State legislature which has jurisdiction over State mental health activities;

"(8) one individual who is a physician representing academic medical centers in the State; and

"(9) such other members representing public and private agencies providing services to mentally ill individuals as the Secretary may prescribe by regulation or as may be selected by the Governor of the State.

"(c) Members of a State Advisory Council described in paragraphs (3) through (9) of subsection (a) shall be appointed by the Governor of the State.

"NATIONAL STANDARDS

"SEC. 1920E. (a) The Secretary shall establish national goals and objectives for a community-based system of care for chronically mentally ill individuals.

"(b) At least once every three years, the Secretary shall conduct a review in each State of the State's programs for the care of chronically mentally ill individuals to determine if such programs are in accordance with such national goals and objectives.

"(c) In conducting any such review, the Secretary may hold public hearings in the State. The Secretary shall provide the results of any such review conducted under subsection (b) to the State and to the State Advisory Council, including such recommendations for the improvement of State programs for the care of chronically mentally ill individuals as the Secretary considers appropriate. The Secretary shall request the State and the State Advisory Council to provide the Secretary with comments on such review. After receiving and evaluation any such comments, the Secretary shall publish a report concerning such review and recommendations.

"DEFINITIONS

"SEC. 1920F. For purposes of this subpart:

"(1) The term 'State Advisory Council' means a State Advisory Council on Mental Health Planning established under section 1920D.

"(2) The term 'State plan' means a state comprehensive mental health services plan described in section 1920C(b).".

(b) Section 1911 of such Act is amended by striking out "and $576,000,000 for fiscal year 1987" and inserting in lieu thereof "$596,000,000 for fiscal year 1987, and $656,000,000 for fiscal year 1988".

(c)(1) Section 1913(a)(4) of such Act is amended—

(A) by striking out "or" after the semicolon in subparagaph (B);

(B) by inserting "or" after the semicolon in subparagaph (C); and

(C) by inserting after subparagraph (C) the following new subparagaph:

"(D) one or more States have not complied with subpart 2 of this part;".

(2) Section 1916(a) of such Act is amended to read as follows:

"(a)(1) In order to receive an allotment for a fiscal year under section 1913(b), each State shall—

"(A) submit an application to the Secretary which complies with paragraph (2); and

"(B) comply with subpart 2 of this part.

"(2) Each such application submitted under paragraph (1)(A) shall be in such form and submitted by such date as the Secretary shall require. Each such application shall contain assurances that the legislature of the State has complied with the provisions of subsection (b) and that the State will meet the requirements of subsection (c).".

(3)(A) Subsections (e) and (f) of section 1916 are repealed.

(B) The repeal made by subparagraph (A) shall take effect on October 1, 1987.

DEMONSTRATION PROJECTS FOR SERVICES FOR HOMELESS CHRONICALLY MENTALLY ILL INDIVIDUALS

SEC. 3. Section 303 of the Public Health Service Act is amended by adding at the end thereof the following new subsection:

"(e)(1) The Secretary is authorized to make grants to States or private nonprofit entities for demonstration projects to provide services for homeless chronically mentally ill individuals. No grant may be made under this subsection unless an application therefor is submitted to the Secretary in such form and containing such information as the Secretary may prescribe.

"(2) To carry out this subsection, there are authorized to be appropriated $5,000,000 for fiscal year 1987, $10,000,000 for fiscal year 1988, and $10,000,000 for fiscal year 1989.".

S. 1745

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Social Security Act Mental Health Amendments of 1985".

SEC. 2. SERVICES UNDER THE MEDICAID PROGRAM.

(a) STATE PLAN REQUIREMENTS.—Section 1902(a) of the Social Security Act is amended—

(1) by striking out "and" at the end of paragraph (45);

(2) by striking out the period at the end of paragraph (46) and inserting in lieu thereof "; and"; and

(3) by inserting after paragraph (46) the following new paragraph:

"(47) provide services for chronically mentally ill individuals (as defined by the Secretary in regulations) in accordance with section 1919.".

(b) REQUIRED SERVICES.—Title XIX of such Act is amended by adding at the end thereof the following new section:

"SERVICES FOR CHRONICALLY MENTALLY ILL INDIVIDUALS

"SEC. 1919. (a) CASE MANAGEMENT.—(1) The State plan shall provide for inclusion of case management services for chronically mentally ill individuals who are eligible under the plan.

"(2) For purposes of this subsection, the term 'case management services' means—

"(A) the development of a plan of care which shall be reviewed not less often than every 3 months;

"(B) coordination of, and assistance in obtaining, social and maintenance services, such as assistance with daily activities, transportation, habilitation, rehabilitation, provocational and vocational services, and housing;

"(C) coordination of medical services, including crisis intervention services, and follow-through to see that necessary services are received:

"(D) assistance in obtaining income support services, such as housing assistance, food stamps, and supplemental security income benefits;

"(E) an organized system, including discharge planning services, to ensure that individuals discharged from institutions receive necessary outpatient and community services without delay;

"(F) consultation with and assistance to families of chronically mentally ill individuals.

"(G) outreach activities, particularly for the homeless; and

"(H) such other services as the Secretary may specify in regulations.

"(b) HOME AND COMMUNITY-BASED SERVICES.—(1) The State plan shall provide for inclusion of home and community-based services for chronically mentally ill individuals eligible under the plan.

"(2) For purposes of this subsection, the term 'home and community-based services' means—

"(A) day treatment activities;

"(B) habilitation and rehabilitation services;

"(C) staff and service costs of supervised living arrangements, but not including the cost of shelter and food;

"(D) foster care;

"(E) vocational and prevocational services;

"(F) respite care;

"(G) counseling of and assistance to families of the chronically mentally ill;

"(H) day care and day hospitalization;

"(I) mental health clinic services;

"(J) crisis-intervention services; and

"(K) outpatient medical mental health services, including psychotherapy and drugs for the treatment of mental illness.

"(L) such other services as the Secretary may prescribe in regulations as necessary to achieve a continuum of home and community-based services.

"(3) No State may reduce or limit the amount of non-Medicaid expenditures made by the State for any fiscal year after fiscal year 1986 for home and community-based services for chronically mentally ill individuals, below the amount of non-Medicaid expenditures made by such State in fiscal year 1985, increased by the percentage increase in the Consumer Price Index for All Urban Consumers (United States city average) from the beginning of fiscal year 1985 to the beginning of such later fiscal year. For purposes of this paragraph, 'non-Medicaid expenditures' means expenditures made by the State for which no Federal matching payments are made under this title. However, for services previously provided without Federal matching which become eligible for Medicaid matching as the result of enactment of this legislation, this requirement may be fulfilled by reducing the Federal matching amount that would otherwise be available for such services.

"(4) The Secretary shall provide technical assistance to help States in designing and implementing programs of home and community-based services for chronically mentally ill individuals.

"(c) LONG-TERM CARE.—No payment shall be made under this title for expenditures made for skilled nursing facility services or intermediate care facility services provided under this title unless the facility providing such services meets standards established by the Secretary in regulations for the appropriate care and treatment of chronically mentally ill individuals if the facility provides care for chronically mentally ill individuals financed by this title.

"(d) METHODS FOR PROVIDING SERVICES.—Case management services and home and community-based services required by this subsection may be provided directly by the State, or on a contractual or capitated basis, without regard to section 1902(a)(23) and section 1903(m).".

(c) NONAPPLICABILITY OF REQUIREMENT FOR EQUAL SERVICES.—Section 1902(a)(10) of such Act is amended in the matter following subparagraph (D) by striking out "and" before "(IV)" and by inserting before the semicolon at the end thereof the following: ", and (V) the making available of case management services and home and community-based services to chronically mentally ill individuals as required under section 1919 shall not require the making available of any such services, or the making available of such services of the same amount, duration, and scope, to individuals who are not chronically mentally ill".

(d) DEMONSTRATION PROJECTS.—(1) The Secretary of Health and Human Services shall enter into agreements with up to 5 States under which the State shall conduct demonstration projects to provide mental health services on a prepaid capitation basis to chronically mentally ill individuals who are eligible under the State's plan approved under title XIX of the Social Security Act. Under such demonstration projects, mental health services shall be provided by a private nonprofit or governmental entity which shall assume direct responsibility for assessment of all such individuals and for the provision of multidisciplinary case management services, and shall provide directly or by contract all necessary mental health services. States may conduct the demonstration projects statewide or within regions of the State.

(2) Federal funding for demonstration projects under this subsection shall be made at the same matching rate as under title XIX of the Social Security Act.

(e) EFFECTIVE DATES.—(1) Except as provided in paragraph (2), the amendments made by this section shall apply to calendar quarters beginning more than 90 days after the date of the enactment of this Act.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary of Health and Human Services determines requires State legislation in order for the plan to meet the requirements imposed by the amendments made by this section, the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet the requirements imposed by the amendments made by this section before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of the enactment of this Act.

SEC. 3. HOSPITAL REQUIREMENTS UNDER MEDICARE AND MEDICAID.

(a) CONTINUITY OF CARE.—(1) Section 1861(e) of the Social Security Act is amended—

(A) by striking out "and" at the end of paragraph (8);

(B) by striking out the period at the end of paragraph (9) and inserting "; and"; and

(C) by adding at the end thereof the following new paragraph:

"(10) has a discharge planning agreement, approved by the State agency administering the State plan under title XIX of this Act in the State where such institution is located, with the State or local agency responsible for case management services for chronically mentally ill individuals eligible under such State plan, which assures that all such individuals will have a case plan established and a case manager assigned prior to discharge.".

(2) Section 1919 of the Social Security Act (added by section 2 of this Act) is amended by adding at the end thereof the following new subsection:

"(e) HOSPITAL SERVICES.—No payment shall be made under this title for expendi-

tures for inpatient or outpatient hospital services provided by an institution which does not meet the requirements of section 1861(e)(10).".

(b) CONFORMING AMENDMENT.—Section 1861(f)(2) of such Act is amended by striking out "(9)" and inserting in lieu thereof "(10)".

(c) EFFECTIVE DATE.—The amendments made by this section shall become effective 90 days after the date of the enactment of this Act.

SEC. 4. SUPPLEMENTAL SECURITY INCOME PROVISIONS.

(a) EXTENDED ELIGIBILITY PERIOD FOR INSTITUTIONALIZED INDIVIDUAL WHO MAY RETURN HOME.—(1) Section 1611(e)(1) of the Social Security Act is amended by adding at the end thereof the following new subparagraph:

"(E) Notwithstanding subparagraph (B), the amount of the benefit payable under this title shall be payable to an eligible individual or eligible spouse (if any) described in such subparagraph (B) for the first 6 months in which such individual or spouse is in such facility if such individual—

"(i) is chronically mentally ill individual (as defined by the Secretary in regulations);

"(ii) is reasonably expected to be a patient at such a facility for a period of 6 months or less, as certified by a physician; and

"(iii) has a residence to which he is expected to return upon discharge from such facility.".

(2) Section 1611(e)(1)(A) of such Act is amended by striking out "and (D)" and inserting in lieu thereof "(D), and (E)".

(3) Section 1611(e)(1)(B) of such Act is amended by striking out "In any case" and inserting in lieu thereof "Except as provided in subparagraph (E), in any case".

(b) PRESUMPTIVE DISABILITY.—Section 1614(a)(3) of such Act is amended by adding at the end thereof the following new subparagraph:

"(I) Any individual shall be presumed to be disabled for purposes of this title if such individual does not have earnings which exceed the level established pursuant to subparagraph (D), and is certified by a State mental health agency as being—

"(i) a chronically mentally ill individual (as defined by the Secretary in regulations);

"(ii) about to be discharged from an institution, at imminent risk of being institutionalized, or homeless; and

"(iii) willing to participate in a plan of care pursuant to regulations of the Secretary.".

(c) EXTENDED MEDICAID ELIGIBLITY.—Section 1619 of such Act is amended by redesignating subsection (c) as subsection (d), and by inserting after subsection (b) the following new subsection:

"(c) For purposes of title XIX, any individual who was entitled to a supplemental security income benefit under this title within the prior 36-month period shall be considered to be a disabled individual receiving supplemental security income benefits for so long as the Secretary determines under regulations that such individual is a chronically mentally ill individual and would be at substantial risk of being institutionalized if he were not eligible for medical assistance under the State plan under such title XIX.".

"(d) ELIGIBILITY OF INDIVIDUALS IN TRANSITIONAL LIVING FACILTIES.—Section 1611(e)(1)(D) of such Act is amended—

(1) by striking out "A person" and inserting in lieu thereof "(i) Except as otherwise provided in clause (ii), a person"; and

(2) by adding at the end thereof the following new clause:

"(ii) A chronically mentally ill individual may be an eligible individual or eligible spouse for purposes of this title with respect to any month throughout which he is a resident of a public emergency shelter for the homeless or halfway house (as those terms are defined by the Secretary in regulations).".

(e) PERMANENT EXTENSION OF SECTION 1619.—Section 201(d) of the Social Security Disability Amendments of 1980 (as amended by section 14(a) of the Social Security Disability Benefits Reform Act of 1984) is amended by striking out ", but shall remain in effect only through June 30, 1987".

(f) EFFECTIVE DATE.—The amendments made by this section shall apply to benefits payable for months beginning more than 90 days after the date of the enactment of this Act.

SEC. 5. MEDICARE PART B COVERAGE OF SERVICES RELATING TO MENTAL INLLNESS.

(a) REPEAL OF LIMITATION.— Subsection (c) of section 1833 of the Social Security Act is repealed.

(b) CONFORMING AMENDMENT.—Section 1866(a)(2)(A) of such Act is amended by striking out the second sentence.

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to calendar years beginning after the date of the enactment of this Act.

By Mr. CHILES:

S. 1746. A bill to direct the Attorney General to study and recommend methods to control the diversion of legitimate precursor and essential chemicals to the production of illegal drugs; to the Committee on the Judiciary.

PRECURSOR AND ESSENTIAL CHEMICAL REVIEW ACT

● Mr. CHILES. Mr. President, one of the gaps in our current enforcement strategy against illegal narcotics is the lack of regulation of certain chemicals which are essential in the processing of drugs such as cocaine, LSD, methaqualone, and PCP. Some of these chemicals are precursors, or forerunners, of the illegal narcotics. Some are necessary in the processing stages of various drugs of abuse. These chemicals are found in normal commercial channels but can be diverted to illicit, clandestine labs throughout the United States where they are used to make dangerous drugs.

Two such chemicals are ethyl ether and acetone. These are unregulated chemicals with many legitimate industrial, commercial, and private uses. Ether is used as a solvent in the processing of dyes, waxes, and other substances. It is also used in the production of diesel fuel, in dry cleaning, and in medicine as an anesthetic. Acetone is a common cleaner. But in addition to these uses, both are chemicals of choice in the processing of cocaine. And while we don't want to impede the legitimate uses of these and other similar chemicals, we must address the fact that they are abused in the clandestine manufacture of narcotic and dangerous drugs.

Clandestine manufacture has recently become a major source for narcotic and dangerous drugs on the illicit market. Over the last 5 years, the number of clandestine lab seizures in the United States increased 85 percent. In these underground labs, chemists are processing the drugs which threaten the very fabric of our society.

The problem is getting worse. The number of cocaine labs seized in the United States has skyrocketed beyond other clandestine lab seizures; 24 cocaine labs were seized in fiscal year 1984—a 120-percent increase over the number seized in fiscal year 1983. Of those 24 labs seized, 18 were in the district which includes my State of Florida.

Beyond the obvious need to control the accessibility to these precursor and essential chemicals by clandestine chemists, we need to focus on the danger factor of the chemicals themselves. Both ether and acetone, for example, are highly combustible. An explosion of 1 gallon of ether is roughly equivalent to 10 sticks of dynamite. In March of this year, 330 gallons of ether were discovered inadvertently by a landlord in Miami, FL, who was checking on a tenant's warehouse. Some of the ether was in a very volatile state. Had it exploded, it would have caused many deaths and much property damage. The potential exists for one clandestine cocaine lab to devastate an entire neighborhood through an ether explosion.

Situations like this cannot go unaddressed. I know that the Florida State Legislature is considering proposals to regulate the production and distribution of both ether and acetone. I commend their efforts. I also recognize the work of the Drug Enforcement Administration in both controling some of the more abused of these chemicals, like P2P, a precursor chemical used in the production of amphetamines and methamphetamines, and in establishing voluntary systems of cooperation in the chemical industry to report suspicious purchases of precursor and essential chemicals.

I think, though, that this is an area in which the Federal Government should exert more leadership. My discussions with law enforcement officials in Florida indicate that regulations on some of these chemicals would be extremely helpful to them in their fight against drug traffickers. The legislation I am introducing today puts the Federal Government in an active position in determining how we can best control the diversion of these chemicals to illegal production of drugs of abuse.

This bill requires the Attorney General to examine the problem of precursor chemicals and those chemicals which are necessary in the production

of narcotic and dangerous substances. I would encourage him to look not only at ether and acetone, the examples I have presented today, but at all such chemicals. Some of the other chemicals DEA has targeted are ergotamine tartrate, a precursor of LSD; antranillic acid, a precursor of methaqualone; and piperidine, a precursor to PCP. I urge him to act expeditiously in proposing legislation, regulations, or alternative methods for preventing the diversion of such legitimate precursor and essential chemicals to the production of illegal drugs.●

By Mr. ROTH (for himself, Mr. PELL, Mr. CRANSTON, Mr. CHAFEE, and Mr. STAFFORD):

S. 1747. A bill to amend the Foreign Assistance Act of 1961 to protect tropical forests in developing countries; to the Committee on Foreign Relations.

S. 1748. A bill to amend the Foreign Assistance Act of 1961 to protect biological diversity in developing countries; to the Committee on Foreign Relations.

TROPICAL DEFORESTATION AND BIOLOGICAL DIVERSITY

Mr. ROTH. Mr. President, I offer these bills to address two critical international environmental problems: tropical deforestation and biological diversity.

Tropical forests now cover only 8 percent (3.5 million square miles) (for reference the United States has an area of about 3 million square miles) of the Earth's land surfaces, yet they contain at least two-fifths of the Earth's plant and animal species. These forests are this world's richest source of raw materials.

Tropical forests are rapidly being cleared for agriculture, cattle production, firewood, timber, and pressures on tropical forests are increasing. The loss of these forests affects many people in a variety of ways, such as increased flooding, soil erosion, silting of waterways, droughts and shortages of firewood and timber. In addition, the losses of tropical forests cause the extinction of many plant and animal species and may even alter regional and global climate.

Rain forests are an important source of raw materials for agriculture, industry, commerce and medicine. For example, they have supplied the origins of, mice, millet, yams, bananas, pineapple, sugarcane, and many more await investigation. The wild relatives of modern food crops provide genetic resources to increase productivity, nutritive content, to resist new diseases, pests and environmental stresses.

By the end of the 20th century it is anticipated that we could loose at least 1 million species due to habit at destruction.

Plants and animals are vital to human survival. They produce foods, medicines, and raw materials. They also provide services such as pests and flood control and degradation of waste. Therefore, the conservation of biological diversity is vital to human survival and well being if for no other reason than that a species of plants and animals provide people with important products.

Forty percent of prescription drugs sold in the United States contain chemicals derived from wild species. Twenty-five percent of these drugs come from plants, another twelve percent from fungi, and bacteria, and six percent from complex animals. Marine animals are considered by scientists to be a still untapped source of new chemicals.

To protect critical habitats and to prevent loss of wildlife, we must conserve and maintain the Earth's basic life-support systems, including climate, the water cycle, the soils and genetic diversity. We must set forth the efforts to provide for a livelihood without destroying crop lands, forests and water supplies, that are essential for meeting human needs as well as supporting the diversity of other life on our planet.

The bills we are introducing today do not authorize new spending, but seek to strengthen existing provisions of the Foreign Assistance Act of 1961, pertaining to tropical deforestation and biological diversity.

Components of the tropical deforestation bill include:

First. Information exchanges with developing countries which stress the importance of the conservation of our forest resources, for the long-term benefit of our global environment.

Second. Support for projects that identify and implement alternatives to settling forested areas.

Third. Support training and education programs which improve forest policies and land use planning.

Fourth. Support stable and productive farming practices in areas already cleared or degraded, especially those practices that demonstrate small-scale, affordable, low-risk resource conserving projects.

Fifth. Improve production of already cleared lands to help conserve forests which have not yet been degraded.

Sixth. Support research to identify alternatives to forest destruction.

Seventh. Help developing countries to identify tropical forest ecosystems and species in need of protection, in order to conserve biological diversity in forest areas. In addition, make the setting aside of protected areas a condition of support for activities involving forest clearing.

Eighth. Any assistance under these activities would be denied if the activity would result in the conversion of forest land to the rearing of livestock, the colonization of forest lands, the construction of dams, unless the activity is the least harmful way to improve the likelihood of the rural poor.

The components of the biological diversity bill include:

First. An allocation of not less than $10 million in assistance funding for biological diversity protection.

Second. The AID must include in each country development strategy statement a plan to assist that country in the conservation of biological diversity.

Third. In addition, AID must cooperate with appropriate international organizations, exchange information with recipient countries support training and education efforts to prevent loss of biological diversity, and enter into long-term agreements on biological diversity protection.

Mr. President, I ask unanimous consent that these bills be printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 1747

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That chapter 1 of part I of the Foreign Assistance Act of 1961 is amended—

(1) by redesignating section 118 (22 U.S.C. 2151p) as section 117;

(2) by striking out subsection (d) of that section; and

(3) by inserting after that section the following new section 118:

SEC. 118. TROPICAL FORESTS.—(a) In enacting section 103(b)(3) of this Act the Congress recognized the importance of forests and tree cover to the developing countries. The Congress is particularly concerned about the continuing and accelerating alteration, destruction, and loss of tropical forests in developing countries, which pose a serious threat to development and the environment. Tropical forest destruction and loss—

"(1) result in shortages of wood (especially wood for fuel), loss of biologically productive wetlands, siltation of lakes, reservoirs, and irrigation systems, floods, destruction of indigenous peoples, extinction of plant and animal species, reduced capacity for food production, and loss of genetic resources; and

"(2) can result in desertification and destabilization of the earth's climate.

Properly managed tropical forests provide a sustained flow of resources essential to the economic growth of developing countries, as well as genetic resources of value to developed and developing countries alike.

"(b) The concerns expressed in subsection (a) and the recommendations of the United States Interagency Task Force on Tropical Forests shall be given high priority by the President—

"(1) in formulating and carrying out programs and policies with respect to developing countries, including those relating to bilateral and multilateral assistance and those relating to private sector activities; and

"(2) in seeking opportunities to coordinate public and private development and investment activities which affect forests in developing countries.

"(c) In providing assistance to developing countries, the President shall place a high

priority on conservation and sustainable management of tropical forests and shall—

"(1) engage in dialogues and exchanges of information with recipient countries—

"(A) which stress the importance of conserving and sustainably managing forest resources for the long-term economic benefit of those countries, and avoiding the irreversible losses associated with forest destruction; and

"(B) which identify and focus on policies of those countries which directly or indirectly contribute to deforestation;

"(2) support projects and activities—

"(A) which offer employment and income alternatives to those who otherwise would cause destruction and loss of forests; and

"(B) which help developing countries identify and implement alternatives to colonizing forested areas;

"(3) support training programs, educational efforts, and the establishment or strengthening of institutions which increase the capacity of developing countries to formulate forest policies, engage in relevant land-use planning, and otherwise improve the management of their forests;

"(4) help end destructive slash-and-burn agriculture by supporting stable and productive farming practices in areas already cleared or degraded and on lands which inevitably will be settled, with special emphasis on demonstrating the feasibility of agroforestry techniques and on other kinds of small-scale, affordable, resource-conserving, low-risk, local projects which use technologies and methods suited to the local environment and traditional agricultural techniques and feature close consultation with and involvement of local people at all stages of project design and implementation;

"(5) help conserve forests which have not yet been degraded, by helping to increase production on lands already cleared or degraded through support of reforestation, fuelwood, and other sustainable forestry projects and practices, making sure that local people are involved at all stages of project design and implementation;

"(6) support projects and other activities to conserve forested watersheds and rehabilitate those which have been deforested, making sure that local people are involved at all stages of project design and implementation;

"(7) support training, research, and other actions which lead to sustainable and more environmentally sound practices for timber harvesting, removal, and processing, including reforestation, soil conservation, and other activities to rehabilitate degraded forest lands;

"(8) support research to expand knowledge of tropical forests and identify alternatives which will prevent forest destruction, loss, or degradation, including research in agroforestry, sustainable management of natural forests, small-scale farms and gardens, small-scale animal husbandry, wider application of traditional practices, and suitable crops and crop combinations;

"(9) conserve biological diversity in forest areas by—

"(A) supporting and cooperating with the International Union for Conservation of Nature and Natural Resources, the World Wildlife Fund, United States Government agencies, other donors (both bilateral and multilateral), and other appropriate governmental, intergovernmental, and nongovernmental institutions in efforts to identify, establish, and maintain a representative network of protected tropical forest ecosystems on a worldwide basis;

"(B) whenever appropriate, making the setting aside of protected areas a condition of support for activities involving forest clearance or degradation; and

"(C) helping developing countries identify tropical forest ecosystems and species in need of protection and establish and maintain appropriate protected areas;

"(10) engage in efforts to increase the awareness of United States Government agencies and other donors, both bilateral and multilateral, of the immediate and long-term value of tropical forests;

"(11) require that any program or project under this chapter significantly affecting tropical forests (including projects involving the planning of exotic plant species) be based upon careful analysis of the best sustainable use of the land and take full account of the impacts of the proposed activities on biological diversity;

"(12) deny any direct or indirect assistance under this chapter for—

"(A) activities which would result in the conversion of forest lands to the rearing of livestock, unless it has been demonstrated that the proposed activity will contribute significantly and directly to improving the livelihood of the rural poor and is the least harmful way of doing so;

"(B) the construction, upgrading, or maintenance of roads (including temporary haul roads for logging or other extractive industries) which pass through relatively undegraded forest lands, unless it has been demonstrated that there exist adequate safeguards to prevent unplanned forest destruction and that the proposed activity will contribute significantly and directly to improving the livelihood of the rural poor and is the least harmful way of doing so;

"(C) the colonization of forest lands, unless it has been demonstrated that the soils in the area are capable of sustained agriculture, that there exist adequate safeguards to prevent unplanned forest destruction, and that the proposed activity will contribute significantly and directly to improving the livelihood of the rural poor and is the least harmful way of doing so;

"(D) the construction of dams or other water control structures which flood relatively undegraded forest lands, unless it has been demonstrated that the proposed activity will contribute significantly and directly to improving the livelihood of the rural poor and is the least harmful way of doing so;

"(E) the procurement or use of logging or timber processing equipment, unless it has been demonstrated that all timber harvesting operations involved will be conducted in an environmentally sound manner which minimizes forest destruction and that the proposed activity will contribute significantly and directly to improving the livelihood of the rural poor and is the least harmful way of doing so; and

"(F) actions which (i) invade or significantly degrade national parks or similar protected areas which contain tropical forests, or (ii) introduce exotic plants or animals into such areas; and

"(13) utilize the resources and abilities of all relevant governmental agencies.

"(d) Whenever feasible, the President shall accomplish the objectives of this section through projects managed by private and voluntary organizations or international, national, or regional nongovernmental organizations active in the region or country where the project is located.

"(e) Each country development strategy statement or other country plan prepared by the Agency for International Development shall include an analysis of the actions necessary in that country to achieve the goals of this section and of the extent to which the actions proposed for support by the Agency meet the needs thus identified.

"(f) Each annual report required by section 634(a) of this Act shall include a report on the implementation of this section.".

S. 1748

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 119 of the Foreign Assistance Act of 1961 (22 U.S.C. 2151q) is amended—

(1) by redesignating subsection (b) as subsection (b)(1);

(2) by adding at the end of subsection (b)(1) the following new paragraphs:

"(2) For each fiscal year beginning with fiscal year 1987, not less than $10,000,000 under this part shall be allocated for purposes of new activities under this subsection which commence in or after fiscal year 1987 (and subsection which commence in or after fiscal year 1987 (and are not continuations of any activity commenced prior to such fiscal year).

"(3) To the fullest extent possible, the Agency for International Development shall continue and expand activities under this subsection which commenced prior to fiscal year 1987."; and

(3) by striking out subsections (c) and (d) and inserting in lieu thereof the following:

"(c) Each country development strategy statement or other country plan prepared by the Agency for International Development shall include a detailed plan to assist that country in the conservation of biological diversity. Each such plan shall include, as appropriate, assistance in carrying out all the types of efforts specified in subsection (b).

"(d) To the fullest extent possible, projects supported under this section shall include close consultation with and involvement of local people at all stages of design and implementation.

"(e) Whenever feasible, the objectives of this section shall be accomplished through projects managed by appropriate private and voluntary organizations, or international or regional or national nongovernmental organizations, which are active in the region or country where the project is located. For each fiscal year beginning with fiscal year 1987, the Agency for International Development shall allocate not less than $3,000,000 under this part for projects managed by such organizations.

"(f) The Administrator of the Agency for International Development shall—

"(1) cooperate with appropriate international organizations, both governmental and nongovernmental, and recognize the coordinating role played by the International Union for Conservation of Nature and Natural Resources and the World Wildlife Fund;

"(2) look to the World Conservation Strategy (which was prepared by the International Union for Conservation of Nature and Natural Resources, the World Wildlife Fund, and the United Nations Environment Program, and is now widely accepted) as an overall guide for actions to conserve biological diversity;

"(3) engage in dialogues and exchanges of information with recipient countries which stress the importance of conserving biological diversity for the long-term economic benefit of those countries and which identi-

fy and focus on policies of those countries which directly or indirectly contribute to loss of biological diversity;

"(4) support training and education efforts which improve the capacity of recipient countries to prevent loss of biological diversity;

"(5) whenever possible, enter into long-term agreements in which the recipient country agrees to protect ecosystems or other wildlife habitats recommended for protection by the International Union for Conservation of Nature and Natural Resources or as a result of activities undertaken pursuant to paragraph (6), and the United States agrees to provide additional assistance necessary for the establishment and maintenance of such protected areas;

"(6) support programs to identify critical ecosystems in developing countries and make surveys of national parks and proposed protected areas where such surveys will enhance the protection of endangered species or the protection of critical ecosystems;

"(7) review the Agency's environmental regulations and revise them as necessary to ensure that ongoing and proposed actions by the Agency do not inadvertently endanger wildlife species or their critical habitats, harm protected areas, or have other adverse impacts on biological diversity, and shall report to the Congress within one year after the date of enactment of this paragraph on the actions taken pursuant to this paragraph;

"(8) ensure that environmental profiles sponsored by the Agency include information needed for conservation of biological diversity; and

"(9) deny any direct or indirect assistance under this chapter for actions which invade or significantly degrade national parks or similar protected areas or introduce exotic plants or animals into such areas.

"(g) Each annual report required by section 634(a) of this Act shall include, in a separate volume, a report on the implementation of this section.".

Mr. PELL. Mr. President, I am delighted to join Senator ROTH in introducing legislation on biological diversity and tropical forests. This legislation will significantly enhance protection of the ecosystems that are richest in their variety of living things.

I have a particular interest in the legislation to protect biological diversity. The legislation Senator ROTH and I are introducing on this is a direct outgrowth of my 1983 legislation, title VII of Public Law 98-164, to create a new program to assist countries in the protection of endangered species. The 1983 law makes the protection of endangered species an important objective of U.S. assistance and authorizes the Administrator of AID to assist countries in the protection of wildlife habitats, in the setting up of national parks and reserves, in the enforcement of antipoaching laws and in the effort to halt the pollution of ecosystems.

This year's biological diversity legislation builds on that effort. The proposed bill allocates $10,000,000 in each fiscal year, beginning in fiscal year 1987, to new projects to protect biological diversity. The bill also incorporates the protection of endangered species into each AID country plan, encourages training to improve the capacity of recipient countries to prevent the loss of species and provides concrete technical assistance, such as surveys of proposed parks and reserves, to developing countries.

This bill is similar to an amendment I tabled earlier this year to the Foreign Assistance Act. At the time of my amendment, the distinguished chairman of the Foreign Relations Committee, Senator RICHARD LUGAR, agreed to hold a hearing and markup of biological diversity legislation. It is my hope to complete the committee's action on these bills before the end of this year.

Mr. President, it is estimated that more than 1,000 plant and animal species will become extinct each year and that if present rates of tropical deforestation and ecosystem disruption continue into the next century, 20 percent of all species on Earth may become extinct within the next human generation.

The extinctions projected in the coming decades will be largely due to human activities. They will occur on a scale that render natural biological extinction trivial by comparison. This loss of species and ecosystems due to human activities is resulting in the progressive impoverishment of the Earth's biological systems. This, in turn, reduces the ability of natural systems to support human populations.

For example, the center of origin of many food plants are in the tropics. As tropical areas are converted, ancestral stocks of these plants are jeopardized or lost. Only three species—corn, wheat, and rice—produce two-thirds of the total world grain crop. The food supply of the entire world now depends on maintaining a balance between the genetic systems of these and a few additional crops, and their pests and diseases. In the future, new sources of food may need to be developed from as yet undiscovered germ plasm.

The U.S. Government is in a unique position of world leadership to help conserve biological diversity. Most of the areas that need to be protected are in developing countries. There is a clear and close relationship between the poverty of the people of those countries and biological impoverishment—and this will intensify if current trends are not altered. Through its own aid programs and through the multilateral assistance programs it can influence, the U.S. Government can play a major role in reversing these negative trends which affect our economic and security interests as surely as they affect the well-being of people in the developing world.

Mr. President, the pending legislation on biological diversity, and the companion bill on tropical forests, can make a contribution to halting the loss of thousands of species. Once a species has become extinct, it is lost to mankind for all time.

I hope, therefore, we can move forward on these bills as expeditiously as possible.

Mr. CHAFEE. Mr. President, today I am introducing with my colleague from Delaware [Mr. ROTH], two bills reflecting the fact that environmental protection is an international issue. The failure to protect tropical forests or to preserve biological diversity in countries around the world can have profound effects in this country. As a world leader in the area of environmental protection and as a country with an immediate and real stake in such protection and preservation, it is a responsibility of the United States to help protect our global environment.

These bills would require additional U.S. actions to prevent destruction of tropical forests and would require additional actions to prevent extinction of animal and plant species in developing nations.

Tropical deforestation in developing nations is a result of rapid population growth and development pressures. Recent studies have taught us that an area the size of Pennsylvania is being deforested every year. Only in relatively recent years have researchers learned more about the environmental effects of deforestation.

Clearing of rain forests increases the carbon dioxide in the atmosphere; the carbon dioxide absorbs solar radiation and leads to climatic warming, the so-called "greenhouse effect."

Tropical deforestation is expected to combine with fossil fuel burning to cause temperatures around the world to increase beginning in the 1990's. Some melting of the polar ice caps may occur, resulting in a rise in the sea level.

Tropical deforestation also is thought to change global rainfall as bare soil reflects increased solar radiation and air circulation is altered.

Population pressures are leading to attempts to turn tropical forests into farmland. There is also a problem called by some the hamburger connection, the conversion of tropical forests to grazing land to produce beef, which is primarily for U.S. fast-food restaurants.

Rain-forest soils are poor; most of the nutrients are in the foliage. After the nutrients from the burnt trees have washed away, silting rivers, crops fail, and pasturelands must be abandoned.

Though tropical forests cover only about 6 percent of the Earth's land surface, they are thought to contain more than 40 percent of its plants and animal species. It is believed that as forests are cut down species that have not yet been identified are becoming extinct. It has been estimated that by

the year 2000 or up to 2 million species may be extinct.

These bills will strengthen existing provisions of the Foreign Assistance Act. They build upon what Congress has already done to establish as priorities the preservation of tropical forests and biological diversity while helping developing nations to resolve their economic problems. The bills call on the administration to accelerate efforts to incorporate protective measures into foreign development assistance, design new projects and programs, and to ensure that ongoing activities do not destroy these critical resources.

Mr. President, these are important bills. Companion measures have been introduced in the House and are being supported by the Natural Resources Defense Council, World Wildlife Fund-United States, National Audubon Society, National Wildlife Federation, Sierra Club, and Environmental Policy Institute. I urge my colleagues in the Senate to review these measures and to join us as cosponsors. Prompt attention and hearings before the Senate Foreign Relations Committee would be extremely helpful.

Mr. CRANSTON. Mr. President, today I join Senators ROTH and PELL in introducing two measures critically important to the environment: A bill to assist in developing countries in the conservation of biological diversity and a bill to conserve tropical forests. Each bill amends the Foreign Assistance Act, as administered by the Agency for International Development [AID] to assure that U.S. development policy will not endanger wildlife species or their critical habitat and that U.S. assistance programs support projects which place high priority on conservation and sustainable management of tropical forests, including support for the designation and maintenance of protected forest areas.

These measures command our urgent attention.

Sheer human activity costs us more than 1,000 plant and animal species each year. Accelerated by the decimation of tropical forests, we could lose 20 percent of all species on Earth within the next human generation. This is of far more than historic or academic interest: What we are experiencing is the impoverishment of the Earth's biological systems, which in turn reduces the ability of natural systems to support human populations.

As much as 40 percent of all the Earth's plants and animals exist in tropical forests.

All over Asia, Africa, South and Central America, tropical forests are being rapidly destroyed through ranching, road building and hydroelectric projects, and cutting for firewood. In the last century, over a half of the world's tropical forest area has been destroyed, and at the present cutting rate, another 1.2 billion acres will be gone by the end of this century. Deforestation of this magnitude is a kind of biological Armageddon: We lose complex and diverse ecosystems. We see the siltation of lakes, reservoirs, and irrigation systems, a reduction of good production capacity, the destruction of indigenous peoples, and a loss of genetic resources, upon some of which many may be directly dependent. On a global scale, such massive destruction of forests brings desertification and a significant change in the Earth's climate: Tropical deforestation is expected to combine with fossil fuel burning to cause temperatures around the world to increase beginning in the 1990's. Some melting of the polar ice caps may occur, resulting in a rise in the sea level.

Mr. President, these global environment issues are appropriately addressed through U.S. policy for several reasons;

First, our political interests include a commitment to maintain the Earth's basic life-support systems. Our public institutions and private firms carry on worldwide activities that directly and indirectly affect the environmental policies of other countries.

Second, the humanitarian base of our democratic society compels us to take heed of peoples whose cultures and very lives are threatened by tropical forest destruction.

Third, U.S. economic growth is affected by the adverse domestic natural resource conditions of developing countries, which purchase just about a third of all U.S. exports, and who contribute to our economic growth by giving us a sustained supply of wood and wood products at reasonable prices.

Fourth, we are committed to helping preserve the world's ecosystems both by domestic legislation and national policies, and being party to a host of international conventions and agreements—including the Endangered Species Act of 1973, the Convention on International Trade in Endangered Species of Wild Flora and Fauna, and the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere; and

Fifth, U.S. educational and scientific interests are well-served by our long-term study of the influence of tropical forest ecosystems on global physical, biological, and geochemical processes. Tropical forests are a rich and living laboratory for flora and fauna that exist nowhere else in the world.

The biological diversity measure we introduce today includes an allocation of not less than $10 million in assistance funding for biological diversity protection. It directs AID to include in each country's development strategy a plan to assist the Nation in biological diversity conservation. The bill further directs AID to exchange information, support training, and enter into long-term agreements on biological diversity protection. The tropical forest bill directs AID to place a high priority on tropical forest conservation. It requires the Agency to move away from supporting large-scale development activities that destroy vast amounts of prime tropical moist forests.

Mr. President, I am pleased to be associated with these measures as cosponsor. I am a member of the Senate Foreign Relations Committee that will review the bills, and I look forward to expeditious action.

By Mrs. KASSEBAUM:

S. 1750. A bill to amend the Federal Aviation Act of 1958, as amended, to increase civil penalty limits for safety violations by persons engaged in commercial aircraft operations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

CIVIL PENALTY LIMITS FOR PERSONS ENGAGED IN COMMERCIAL AIRCRAFT OPERATIONS

● Mrs. KASSEBAUM. Mr. President, today I am introducing legislation prepared by the administration which would increase civil penalty limits for safety violations by commercial aircraft operators. The legislation is described in detail in the Secretary of Transportation's letter of transmittal.

Mr. President, I ask unanimous consent that the bill and the accompanying letter of transmittal be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1750

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 901(a)(1)(A) of the Federal Aviation Act of 1958, as amended (49 United States Code 1471(a)(1)(A)), is amended by inserting "1101," immediately after the word "section" where it first appears.

SEC. 2. Section 901(a)(1) of the Federal Aviation Act of 1958, as amended (49 United States Code 1471(a)(1)), is amended by inserting the following words immediately after "violation," where it first appears: "except that the amount of such civil penalty shall not exceed $10,000 for each such violation of title III, VI, or XII of this Act, or any rule, regulation, or order issued thereunder, by a person who operates aircraft for the carriage of persons or property for compensation or hire, and".

SEC. 3. Section 901(a)(2) of the Federal Aviation Act of 1958, as amended (49 United States Code 1471(a)(2)), is amended by inserting the phrase ", or of section 1101, 1114, or 1115(e)(2)(B)" immediately after "XII".

THE SECRETARY OF TRANSPORTATION,
Washington, DC, September 5, 1985.

Hon. GEORGE BUSH,
President of the Senate, Washington, DC.

DEAR MR. PRESIDENT: Enclosed for introduction and referral to the appropriate Committee is a draft bill "To amend the

Federal Aviation Act of 1958, as amended, to increase civil penalty limits for safety violations by persons engaged in commercial aircraft operations, and for other purposes."

The primary intent of the Department of Transportation in proposing this legislation amending section 901 of the Federal Aviation Act of 1958, as amended, (FAAct), is to combat safety violations of the FAAct and regulations and orders issued thereunder. We are proposing this legislation which stiffens existing civil penalty authority for safety violations as a means of deterring future violations.

Specifically, the bill would increase the maximum civil penalty in section 901 of the FAAct from $1,000 to $10,000 for safety violations of the FAAct or regulations issued thereunder by persons who operate aircraft for the carriage of persons or property for compensation or hire. The present civil penalty authority of $1,000 per violation has been in effect since 1938. The economic effect of that level of civil penalty has eroded substantially in the nearly five decades which have passed since that time.

While we believe that a $1,000 maximum civil penalty is fully adequate for the vast majority of safety violations by the general aviation community, there are cases involving commercial operations where that level of civil penalty is simply not adequate to deter future safety violations. Accordingly, our proposal would permit us to seek civil penalties up to $10,000 for each violation of title III, VI, or XII of the FAAct or the Federal Aviation Regulations issued thereunder by persons engaged in the carriage of persons or property for compensation or hire. The present maximum civil penalty of $1,000 for a violation would remain in effect for others in the aviation community.

Further, the bill provides for a civil penalty of $1,000 for a violation of section 1101 of the FAAct, relating to notification of proposed construction of structures which could pose a hazard to air navigation, and authorizes the Federal Aviation Administrator to compromise such civil penalties as may be imposed under that authority. At the present time, only criminal sanctions may be sought for violations of section 1101. In most cases, civil penalties would represent a more reasonable way to deal with such violations and would provide an added and oftentimes more effective approach for the Government to use in assuring compliance with the construction notification requirements of the FAAct.

We believe the increase in civil penalty authority will assist in providing greatest deterrence to safety violations of the FAAct or regulations issued thereunder and, to that extent, will enhance aviation safety. Moreover, enactment of these provisions will have no budgetary impact on the Federal Aviation Administration programs.

The Office of Management and Budget advises that there is no objection, from the standpoint of the Administration's program, to the enactment of this legislative proposal.

Sincerely,

ELIZABETH HANFORD DOLE.●

By Mr. HEINZ:

S.J. Res. 217. A joint resolution to designate the week of December 2, 1985, to December 8, 1985, as "National Emergency Medical Air Transport Week"; to the Committee on the Judiciary.

NATIONAL EMERGENCY MEDICAL AIR TRANSPORT WEEK

● Mr. HEINZ. Mr. President, today it gives me great pleasure to introduce a joint resolution requesting the President to designate the week of December 2, 1985 as "National Emergency Medical Air Transport Week." This resolution commemorates the vital role of hospital based helicopters in providing critical access to health services to Americans living in both urban and rural areas of the United States.

The hospital based helicopter concept was originally developed by the military in Korea and Vietnam. The growth of these programs, from less than one dozen in 1978 to over 100 today, demonstrates the growing role of air transport in linking Americans to appropriate health care services. Last year, over 48,000 persons experiencing critical, life-threatening situations were flown to needed medical care by helicopters or fixed-wing aircraft.

The American Society of Hospital Based Emergency Air Medical Services will celebrate it's 5th anniversary during the week of December 2, 1985. It is most appropriate, therefore that the Congress and the President recognize the vital role of this organizations' members in providing access to advanced medical services and technology.

Mr. President, I ask unanimous consent that the text of this joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 217

Whereas, emergency air transport vehicles provide vital access to health services for Americans living in both urban and rural communities twenty-four hours per day, three-hundred-sixty-five days per year;

Whereas, the number of air transport programs in the United States has grown from less than one dozen in 1978 to over one-hundred today;

Whereas, thirty-eight states and the District of Columbia host at least one air transport program to serve their populations;

Whereas, over 63,000 patients were flown in 1984 alone and of these, 43,631 patients were in critical, life-threatening situations;

Whereas, December 1985, marks the fifth anniversary of the American Society of Hospital Based Emergency Air Medical Services: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to designate the week of December 2, 1985, to December 8, 1985, as "National-Emergency Medical Air Transport Week" and call upon the Federal, State, and local government agencies and the people of the United States to observe such week with the appropriate programs, ceremonies and activities.●

ADDITIONAL COSPONSORS

S. 122

At the request of Mr. PRYOR, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 122, a bill to reorganize the Department of Health and Human Services by establishing an independent agency, governed by a bipartisan board, to administer the Old Age, Survivors, and Disability Insurance Program and the Supplemental Security Income Program under titles II and XVI of the Social Security Act, to provide appropriate delegations of authority to such agency from the General Services Administration and the Office of Personnel Management, and for other purposes.

S. 637

At the request of Mr. ZORINSKY, the name of the Senator from Arkansas [Mr. PRYOR], and the Senator from Tennessee [Mr. GORE] were added as cosponsors of S. 637, a bill to amend the Railroad Retirement Act of 1974 to allow a worker to be employed in any nonrailroad employment and still qualify for an annuity, subject to current deductions in the tier 1 benefit on account of work and new deductions in the tier 2 benefit if the employment is for his last nonrailroad employer.

S. 723

At the request of Mr. MATSUNAGA, the name of the Senator from Maine [Mr. MITCHELL] was added as a cosponsor of S. 723, a bill to amend title XVIII of the Social Security Act to authorize payment for occupational therapy services under part B of the Medicare Program.

S. 778

At the request of Mr. HEINZ, the name of the Senator from West Virginia [Mr. ROCKEFELLER] was added as a cosponsor of S. 778, a bill to amend title XVIII of the Social Security Act to allow Medicare coverage for home health services provided on a daily basis.

S. 1382

At the request of Mr. CHAFEE, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 1382, a bill to amend the Securities Exchange Act of 1934 with respect to insider trading.

S. 1393

At the request of Mr. ABDNOR, the name of the Senator from Oklahoma [Mr. BOREN] was added as a cosponsor of S. 1393, a bill to provide for a study of the use of unleaded fuel in agricultural machinery, and for other purposes.

S. 1470

At the request of Mr. HUMPHREY, the name of the Senator from North Carolina [Mr. EAST] was added as a cosponsor of S. 1470, a bill to require the Secretary of Health and Human Services

to establish the National Adoption Information Clearinghouse.

S. 1570

At the request of Mr. NICKLES, the name of the Senator from Arizona [Mr. GOLDWATER] was added as a cosponsor of S. 1570, a bill to amend the Fair Labor Standards Act of 1938 to exclude the employees of States and political subdivisions of States from the provisions of that act relating to maximum hours, to clarify the application of that act to volunteers, and for other purposes.

S. 1624

At the request of Mr. DECONCINI, the names of the Senator from North Dakota [Mr. ANDREWS], the Senator from Iowa [Mr. GRASSLEY], the Senator from South Carolina [Mr. HOLLINGS], the Senator from South Dakota [Mr. ABDNOR], the Senator from Nebraska [Mr. EXON], and the Senator from Colorado [Mr. ARMSTRONG] were added as cosponsors of S. 1624, a bill to make ineligible for certain agricultural program benefits persons who are convicted under Federal or State law of planting, cultivation, growing, or harvesting of controlled substances.

S. 1639

At the request of Mr. EXON, the name of the Senator from Idaho [Mr. SYMMS] was added as a cosponsor of S. 1639, a bill to authorize the minting of gold bullion coins.

S. 1679

At the request of Mr. GRASSLEY, the name of the Senator from Alabama [Mr. HEFLIN] was added as a cosponsor of S. 1679, a bill to strengthen provisions of the law that provide safeguards when imports threaten to impair the national security.

S. 1710

At the request of Mr. HOLLINGS, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of S. 1710, a bill to establish a motor carrier administration in the Department of Transportation, and for other purposes.

SENATE JOINT RESOLUTION 74

At the request of Mr. THURMOND, the names of the Senator from Arkansas [Mr. BUMPERS], the Senator from Ohio [Mr. GLENN], and the Senator from Maryland [Mr. SARBANES] were added as cosponsors of Senate Joint Resolution 74, a joint resolution to provide for the designation of the month of February 1986 as "National Black (Afro-American) History Month."

SENATE JOINT RESOLUTION 193

At the request of Mr. SYMMS, the names of the Senator from North Carolina [Mr. HELMS], and the Senator from Oklahoma [Mr. BOREN] were added as cosponsors of Senate Joint Resolution 193, a joint resolution to authorize the President to issue a proclamation designating the week beginning October 20, 1985, as "The Lessons of Grenada Week."

SENATE JOINT RESOLUTION 195

At the request of Mr. KASTEN, the names of the Senator from Texas [Mr. BENTSEN], the Senator from Maine [Mr. COHEN], and the Senator from Alaska [Mr. MURKOWSKI] were added as cosponsors of Senate Joint Resolution 195, a joint resolution to designate the week of October 20, 1985, through October 26, 1985, as "National Temporary Services Week."

SENATE JOINT RESOLUTION 196

At the request of Mrs. HAWKINS, the names of the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Rhode Island [Mr. CHAFEE], the Senator from Mississippi [Mr. COCHRAN], the Senator from Kansas [Mr. DOLE], the Senator from Utah [Mr. HATCH], the Senator from Wisconsin [Mr. KASTEN], the Senator from Alaska [Mr. MURKOWSKI], the Senator from Oklahoma [Mr. NICKLES], the Senator from Virginia [Mr. TRIBLE], the Senator from California [Mr. WILSON], the Senator from Arkansas [Mr. BUMPERS], the Senator from Illinois [Mr. DIXON], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Massachusetts [Mr. KERRY], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from Georgia [Mr. NUNN], the Senator from Illinois [Mr. SIMON], the Senator from Mississippi [Mr. STENNIS], and the Senator from Maine [Mr. MITCHELL] were added as cosponsors of Senate Joint Resolution 196, a joint resolution designating September 22, 1986, as "American Business Women's Day."

SENATE JOINT RESOLUTION 199

At the request of Mr. MURKOWSKI, the names of the Senator from South Carolina [Mr. HOLLINGS], the Senator from West Virginia [Mr. ROCKEFELLER], and the Senator from Georgia [Mr. NUNN] were added as cosponsors of Senate Joint Resolution 199, a joint resolution to designate the month of November 1985 as "National Elks Veterans Rememberance Month."

SENATE JOINT RESOLUTION 209

At the request of Mr. D'AMATO, the names of the Senator from Maryland [Mr. MATHIAS], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Pennsylvania [Mr. SPECTER], the Senator from Hawaii [Mr. INOUYE], the Senator from New Jersey [Mr. BRADLEY], the Senator from Nevada [Mr. LAXALT], and the Senator from Michigan [Mr. RIEGLE] were added as cosponsors of Senate Joint Resolution 209, a joint resolution to designate the period from October 28, 1985, through October 28, 1986, as the "Centennial Year of Liberty in the United States."

SENATE JOINT RESOLUTION 211

At the request of Mr. DURENBERGER, the names of the Senator from Montana [Mr. BAUCUS], the Senator from Michigan [Mr. LEVIN], the Senator from Missouri [Mr. DANFORTH], and the Senator form California [Mr. CRANSTON] were added as cosponsors of Senate Joint Resolution 211, a joint resolution to provide for the designation of the week of October 6, 1985, as "National Sudden Death Syndrome Awareness Week."

SENATE JOINT RESOLUTION 213

At the request of Mr. FORD, the names of the Senator from Rhode Island [Mr. CHAFEE], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Georgia [Mr. NUNN], the Senator from Michigan [Mr. LEVIN], the Senator from Nebraska [Mr. ZORINSKY], and the Senator from North Dakota [Mr. BURDICK] were added as cosponsors of Senate Joint Resolution 213, a joint resolution to designate January 19-25, 1986, "National Jaycee Week."

SENATE CONCURRENT RESOLUTION 68

At the request of Mr. DURENBERGER, the names of the Senator from Maine [Mr. COHEN], and the Senator from New Jersey [Mr. BRADLEY] were added as cosponsors of Senate Concurrent Resolution 68, a concurrent resolution expressing support for Chile's national accord for the transition to full democracy.

SENATE CONCURRENT RESOLUTION 71

At the request of Mr. WEICKER, the names of the Senator from North Dakota [Mr. ANDREWS], the Senator from Washington [Mr. GORTON], the Senator from Oregon [Mr. HATFIELD], and the Senator from Indiana [Mr. LUGAR] were added as cosponsors of Senate Concurrent Resolution 71, a concurrent resolution to commemorate the accomplishments of Public Law 94-142, the Education for All Handicapped Children Act on the 10th anniversary of its enactment.

AMENDMENT NO. 724

At the request of Mr. THURMOND, the name of the Senator from Nevada [Mr. LAXALT] was withdrawn as a cosponsor of amendment No. 724 proposed to Senate Joint Resolution 77, a joint resolution to approve the Compact of Free Association, and for other purposes.

SENATE RESOLUTION 237—SUPPORTING DISCUSSIONS ABOUT THE SOVIET PRESENCE IN AFGHANISTAN

Mr. HUMPHREY submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 237

Whereas military forces of the Union of Soviet Socialist Republics invaded Afghanistan in December 1979;

Whereas there are at present more than 115,000 Soviet troops engaged in the systematic destruction of Afghanistan through a scorched earth policy which includes the de-

struction of crops, water and food supplies, the agricultural infrastructure, and villages, and includes the widespread killing of innocent civilians;

Whereas Soviet tactics in Afghanistan have directly caused the following: a refugee population in Iran and Pakistan of more than three million, the largest refugee population in the world; hundreds of thousands of war-related casualties; deprivation and suffering for most Afghan citizens; and the possibility of large-scale famine;

Whereas Soviet troops and their Afghan proxies have employed the use of chemical weapons against innocent Afghans;

Whereas the human rights abuses perpetrated by Soviet troops against the Afghan population, including women, children, and the elderly, have been thoroughly documented by the report from Helsinki Watch entitled "Tears Blood and Cries" and by the report on the situation of human rights in Afghanistan prepared for the Economic and Social Council of the United Nations;

Whereas both the United States and the United Nations have repeatedly called for a peaceful, negotiated settlement of the conflict, including the immediate withdrawal of all foreign troops from Afghanistan; and

Whereas no President of the United States has met directly with the head of the Soviet Union since the invasion of Afghanistan in December 1979: Now, therefore, be it

Resolved, That the Senate, in an effort to bring about an end to the massive human rights abuses and murderous policies which the Soviet Union is perpetrating against the population of Afghanistan—

(1) strongly supports President Reagan's intent to discuss directly with Soviet leaders American concerns with the Soviet presence in Afghanistan; and

(2) calls upon the President to reiterate the desire of the United States to achieve a negotiated political settlement agreeable to all interested parties in Afghanistan, which settlement should include—

(A) the complete withdrawal of all foreign troops;

(B) the restoration of the independent and nonaligned status of Afghanistan;

(C) self-determination for the Afghan people; and

(D) the return of Afghan refugees with safety and honor.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President.

● Mr. HUMPHREY. Mr. President, the sixth anniversary of the Soviet invasion of Afghanistan is less than 3 months away. These 6 years have been disastrous for the people of Afghanistan who have suffered enormous losses at the hands of 115,000 Soviet troops. Today I am introducing a resolution which expresses the Senate's abhorrence of the situation in Afghanistan and supports the intent of the President to directly address these issues with Soviet leaders.

On November 19, President Reagan will meet with Soviet leader Mikhail Gorbachev in Geneva. This will be the first meeting between an American President and a head of the Soviet Union since Soviet troops invaded Afghanistan in December of 1979. Both the United States and the United Nations have asserted that the only acceptable solution to the Afghan tragedy would include: The complete withdrawal of all foreign troops, the restoration of the independent and nonaligned status of Afghanistan, self determination for the Afghan people, and the return of Afghan refugees with safety and honor.

Despite international condemnation for their murderous policies in Afghanistan, the Soviets have pursued a "business as usual" approach which includes the use of chemical weapons against civilian populations, dropping toy bombs manufactured specifically to maim children, burning families alive, destroying crops, kidnapping children, and carpet bombing of villages. Although these atrocities have been widely documented, the Soviet Union has successfully carried out their policies without the scrutiny of the Western Press. The barbarous murder of Arizona Republic Journalist Charles Thornton underscores how far the Soviets will go to keep the world from knowing the truth in Afghanistan.

Mr. President, former National Security Advisor Zbigniew Brzezinski testified last June that the Afghan problem is the "moral issue of the time." He noted that this point must be registered at "every opportune moment" so that the indifference of the West toward the fate of the Jews is not "repeated with passivism toward the potential genocide of the Afghans." The November summit is the most opportune time since the invasion for an American President to directly express our abhorrence of the repugnant polices which the Soviets have employed over the past 6 years. American and Soviet leaders have met at many critical times in the past 40 years. However, an American President has never met with a Soviet leader while the Soviets were occupying and destroying the population of a foreign country on a scale similar to that in Afghanistan. We know too well the history of Soviet expansion since the conclusion of the Second World War. However, in Afghanistan the Soviet Union is engaged in more than the subjugation of a foreign nation, they are engaged in the physical annihilation of a nation.

Mr. President, in these weeks before the coming summit, it is important for this body to send a clear message to the President that we support the four major tenets of U.S. policy toward the Afghan conflict and that we support efforts by the President to discuss this issue directly with Soviet leaders, at every opportune moment. It is also important for this body to send a clear message to the people of Afghanistan that we will not support a settlement of the Afghan conflict that does not take into account the concerns of the Afghan resistance. The United States speaks with one voice on Afghanistan—and there is no better individual to carry our message to the Soviets than President Reagan, and no more opportune moment than the November summit in Geneva.●

AMENDMENTS SUBMITTED

INCREASE IN PUBLIC DEBT LIMIT

BOREN (AND OTHERS) AMENDMENT NO. 739

Mr. BOREN (for himself, Mr. EXON, Mr. BENTSEN, Mr. PRYOR, Mr. BUMPERS, and Mr. LEVIN) proposed an amendment to the joint resolution (H.J. Res. 372) increasing the statutory limit on the public debt; as follows:

At the appropriate place in the joint resolution, insert a new section as follows:

SEC. . Notwithstanding any other provision of this Act, the Senate Committee on Finance is directed to report to the Senate by July 1, 1986, legislation providing for payment of an alternative minimum corporate tax by corporations on the broadest feasible definition of income to assure that all of those with economic income pay their fair share of taxes provided further that said alternative minimum corporate tax shall take effect for corporate tax years commencing on or after October 1, 1986. The revenue raised by this tax shall be applied to reduce the Federal deficit.

STATE, JUSTICE, COMMERCE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATION, 1986

HOLLINGS AMENDMENT NO. 740

(Ordered to lie on the table.)

Mr. HOLLINGS submitted an amendment intended to be proposed by him to the bill (H.R. 2965) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1986, and for other purposes; as follows:

On page 69 after line 24, insert:

SEC. 607. Funds appropriated by this Act shall be expended for travel and transportation of persons and things only by the most direct and economical mode and route practicable: *Provided,* That this section may be waived only when certified to be in the Government's interest by the head of an agency: *Provided* further, That nothing in this section shall be construed as changing current Government policies with regard to utilizing United States flag carriers.

Mr. HOLLINGS. Mr. President, recently Jack Anderson revealed in his column that State Department and USIA employees have been abusing their travel privileges by booking passage on the *Queen Elizabeth II.* According to the article, the total costs of the trips on the *Queen Elizabeth II* amounted to $289,305, while airfare for the same trips would approximate $81,000.

One imaginative USIA employee—being transferred from Uruguay to Washington—included a ride up the Mississippi for his family on the *Delta Queen* as part of his taxpayer-supported itinerary. On February 14, 1984, the Comptroller General decided that such travel "was not performed on a usually traveled route as required by regulation." The decision called for repayment of $12,760, but when USIA tried to collect, the employee appealed to the Foreign Service Grievance Board, which ruled that he didn't have to pay. I did not know that there are any higher authorities in these matters than the GAO, but the result is that USIA has now filed suit in the Federal courts to recoup the money. Have you ever heard of anything more absurd.

For the last 9 years I have served as either chairman or ranking minority member of the Appropriations Subcommittee that controls the funding of the Department of State and the U.S. Information Agency. Last week, Senator RUDMAN and I sweated out $68,000,000 in additional cuts order to get the fiscal 1986 bill within our allocation under the first concurrent budget resolution. It is absolutely dismaying to me that some luxury-loving bureaucrats are taking unnecessary trips aboard luxury liners, while we are struggling to find enough money to adequately maintain and secure our posts overseas.

Mr. President, it is bad enought to foist upon our citizens an awful national debt of $2 trillion, but they should not have to pay outrageous expenditures such as those exposed by the article. Over the years I have worked to ensure a safe environment for the dedicated people we have in the Foreign Service of our Nation. However, a report such as this undermines all that we have worked for.

Apparently the Department of State and U.S. Information Agency are unwilling to correct these abuses. Our colleague, Congressman JACK BROOKS, will hold a hearing in the House Government Operations Committee later this month. In the interim, since the agencies won't act, we must, and I am introducing an amendment today to the Commerce, Justice, State, and the Judiciary Appropriations Act (H.R. 2965) to eliminate this abuse of official travel.

Mr. President, I ask unanimous consent that the article by Jack Anderson, appear at the end of my remarks. I invite the cosponsorship of my colleagues on this amendment and will have more to say about this when the bill is before the Senate.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LUXURY-LOVING BUREAUCRATS BEND RULES

WASHINGTON.—Some luxury-loving State Department and U.S. Information Agency employees have been taking advantage of permissive travel regulations to book passage on posh cruise ships when they take their families on home leave between assignments.

The taxpayers foot the bill for these vacations, which cost several times what the airfare would be.

Travel records of the two agencies show that in fiscal years 1962 to 1964, a total of 260 employees and dependents elected to travel by sea, as the rules allow. The cost was $556,232—more than $400,000 higher than airline tickets would have been.

The public first heard about this abuse of federal travel regulations last year, when the General Accounting Office reported to Rep. Jack Brooks, D-Texas, that one USIA employee being transferred to Washington from Uruguay included a $14,440 ride up the Mississippi on the riverboat Delta Queen as part of his family's travel arrangements.

Brooks was so outraged that he asked the auditors to do some more research. They found that the Delta Queen wasn't the only floating royalty favored by Foreign Service and USIA employees. Out of the 260 seafaring travelers, 120 chose to go-first-class all the way—on the pride of the British passenger fleet, the Queen Elizabeth II.

The total cost for the QEII trips was $239,305. Airfare would have been roughly $81,000.

Our associate Tony Capaccio found these examples among the records of the Queen's travelers:

One State Department employe with six dependents flew from India to Spokane, Wash., for home leave. Then the family completed their circumnavigation of the globe by flying to New York, taking the QEII to Southampton and continuing on to India by air. The five-day cruise across the Atlantic cost the taxpayers $18,407; airfare from New York to London would have been $4,732.

A State Department employee and his wife headed home to Los Angeles from Pakistan by flying to Bangkok and embarking on a 19-day cruise aboard the Queen Elizabeth to Hawaii, where they took a plane the rest of the way home. The cruise aboard the luxury liner alone set the taxpayers back $15,050; the couple could have flown from Pakistan to Los Angeles for less than $3,000.

A State Department employee going on home leave from Bombay took his three dependents to London by air. They caught the QEII at Southampton, arriving five days later in New York. The Atlantic crossing cost the taxpayers $10,718, instead of the $2,704 it would have cost to fly.

A group of six USIA employees and dependents being transferred to Washington from posts in Pakistan and India sailed on the Queen Elizabeth for $16,576, or $12,520 more than airfare would have cost.

The official Foreign Affairs Manual encourages employees to take the most direct and economical routes to and from their foreign posts. But the regulations don't prohibit traveling by sea, and many employees evidently assume that a leisurely cruise on a luxury liner is just one of the perquisites of serving abroad. While USIA employees may go by ship only one way, the State Department lets its people travel by sea both homeward and outward bound.

State Department Comptroller Roger Feldman did not return our calls. A USIA spokesman declined comment on grounds that a legal case on the matter is pending.

INCREASE IN PUBLIC DEBT LIMIT

PRESSLER AMENDMENT NO. 741

Mr. PRESSLER proposed an amendment to the joint resolution (H.J. Res. 372), supra; as follows:

It is the sense of the Senate that any funding reductions or sequestering of controllable expenditures implemented by the various federal agencies as a result of this Act shall be made uniformly and shall not disproportionately be made in the funding of programs targeted for rural and lesser populated areas.

HAWKINS AMENDMENT NO. 742

Mrs. HAWKINS proposed an amendment to the joint resolution (H.J. Res. 372), supra; as follows:

At the appropriate place, insert the following:

( ) POINT OF ORDER.—Notwithstanding any other provision of law, it shall not be in order in the Senate or House of Representatives to consider any reconciliation bill or reconciliation resolution reported pursuant to a concurrent resolution on the budget agreed to under section 301 or 304 of the Congressional Budget Act of 1974, or any amendment thereto, or conference report thereon that contains any provision with respect to the Federal Old-Age Survivors Trust Fund or the Federal Disability Insurance Trust Fund, with respect to revenues attributable to the taxes imposed under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954, or with respect to the old-age, survivors, and disability insurance program established under title II of the Social Security Act.

CHILES (AND OTHERS) AMENDMENT NO. 743

Mr. CHILES (for himself, Mr. BYRD, Mr. JOHNSTON, Mr. EXON, Mr. LEVIN, Mr. BENTSEN, and Mr. CRANSTON) proposed an amendment to amendment No. 738 proposed by Mr. DOLE (for Mr. GRAMM and others) to the motion to commit the joint resolution (H.J. Res. 372), supra; as follows:

In lieu of the pending amendment to the motion to commit, insert the following new section:

SEC. . DEFICIT REDUCTION PROCEDURES.

(a) CONGRESSIONAL BUDGET PROCESS.—

(1) ONE CONCURRENT RESOLUTION ON THE BUDGET REQUIRED ANNUALLY.—

(A) IN GENERAL.—Section 310 of the Congressional Budget Act of 1974 is amended—

(i) by striking out all beginning with "SEC. 310. (a)" through "necessary—" in the matter preceding paragraph (1) of subsection (a) and inserting in lieu thereof the following:

"SEC. 310. (a) IN GENERAL.—Any concurrent resolution on the budget considered under section 301 or section 304 for a fiscal year shall, to the extent necessary—"; and

(ii) by striking out subsection (b) and redesignating subsection (c) as subsection (b).

(B) CONFORMING CHANGES.—

(i) The table of contents in subsection (b) of subsection 1 of the Congressional Budget and Impoundment Control Act of 1974 is amended—

(I) by striking out "Adoption of first concurrent resolution" in the item relating to section 301 and inserting in lieu thereof "Annual adoption of concurrent resolution";

(II) by striking out "First concurrent resolution" in the item relating to section 303 and inserting in lieu thereof "Concurrent resolution"; and

(III) by striking out "Second required concurrent resolution and reconciliation" in the item relating to section 310 and inserting in lieu thereof "Reconciliation".

(ii) Paragraph (4) of section 3 of such Act is amended—

(I) by adding "and" after the semicolon at the end of subparagraph (A);

(II) by striking out subparagraph (B); and

(III) by striking out "(C) any other" and inserting in lieu thereof "(B) a".

(iii) Section 300 of the Congressional Budget Act of 1974 is amended—

(I) by striking out "first" in the item relating to April 15 and in the second item relating to May 15; and

(II) by striking out the items relating to September 15 and September 25.

(iv)(I) The heading of section 301 of the Congressional Budget Act of 1974 is amended to read as follows:

"ANNUAL ADOPTION OF CONCURRENT RESOLUTION".

(II) Section 301(a) of such Act is amended by striking out "the first concurrent resolution on the budget" in the first sentence and inserting in lieu thereof "a concurrent resolution on the budget".

(III) Section 301(b) of such Act is amended—

(aa) by striking out "first concurrent resolution on the budget" in the matter preceding paragraph (1) and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)"; and

(bb) in paragraph (1) by striking out all beginning with "the concurrent resolution" through "both" the second place it appears and inserting in lieu thereof "the Congress has completed action on any reconciliation bill or reconciliation resolution, or both, required by such concurrent resolution to be reported in accordance with section 310(b)".

(IV) Section 301(d) of such Act is amended by striking out "first" each place it appears.

(V) Section 301(e) of such Act is amended—

(aa) by striking out "set for" in paragraph (1) and inserting in lieu thereof "set forth"; and

(bb) by striking out "first concurrent resolution on the budget" each place it appears and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)".

(v) Section 302(c) of such Act is amended by striking out "or 310".

(vi)(I) The heading of section 303 of such Act is amended by striking out "First".

(II) Section 303(a) of such Act is amended by striking out "first concurrent resolution on the budget" in the matter following paragraph (4) and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(vii) Section 304 of such Act is amended—

(I) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)"; and

(II) by striking out "pursuant to section 301".

(viii)(I) Section 305(a)(3) is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(II) Section 305(b) of such Act is amended—

(aa) in paragraph (1) by striking out ", except that" and all that follows through "15 hours"; and

(bb) in paragraph (3) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(ix) Section 308(a)(2)(A) of such Act is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(x) Paragraph (1) of section 309 of such Act is amended by striking out ", and other than the reconciliation bill for such year, if required to be reported under section 310(c)".

(xi) Section 310(f) of such Act is amended by striking out "subsection (a)" and inserting in lieu thereof "301(a)".

(xii) Section 311(a) of such Act is amended—

(I) by striking out "310(a)" the first place it appears and inserting in lieu thereof "301(a)"; and

(II) by striking out "310(c)" and inserting in lieu thereof "310(b)".

(xiii) Clause 1 of Rule XLIX of the Rules of the House of Representatives is amended by striking out ", 304, or 310" and inserting in lieu thereof "or 304".

(2) MAXIMUM DEFICIT AMOUNTS.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) POINT OF ORDER.—Section 301 of the Congressional Budget Act of 1974 is amended by redesignating subsection (c), (d), and (e) as subsections (d), (e), and (f), respectively, and inserting after subsection (b) the following new subsection:

"(c) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) The provisions of paragraph (1) shall not apply in any fiscal year in which—

"(A) a declaration of war is in effect;

"(B) the Armed Forces of the United States are engaged in combat; or

"(C) the Congressional Budget Office projects there will be a recession.

For purposes of this paragraph, the term 'recession' means a decline in the gross national product or increase in the unemployment rate during any two consecutive fiscal quarters.".

(ii) CONFORMING CHANGE.—Section 301(e) of such Act, as redesignated by clause (i) of this subparagraph, is amended by inserting "; and when so reported such concurrent resolution shall comply with the requirement described in paragraph (1) of subsection (c), unless such paragraph does not apply to such fiscal year by reason of paragraph (2) of such subsection" after "October 1 of such year" in the second sentence thereof.

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—Section 304 of such Act is amended—

(i) by inserting "(a) IN GENERAL.—" after "Sec. 304."; and

(ii) by adding at the end thereof the following new subsection:

"(b) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider or adopt any concurrent resolution on the budget for a fiscal year under this section, or to consider or adopt any amendment to such a concurrent resolution, or to adopt a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(2) The provisions of paragraph (1) shall not apply in any fiscal year in which—

"(A) a declaration of war is in effect;

"(B) the Armed Forces of the United States are engaged in combat; or

"(C) the Congressional Budget Office projects there will be a recession.

For purposes of this paragraph, the term 'recession' means a decline in the gross national product or increase in the unemployment rate during any two consecutive fiscal quarters.".

(C) DEFINITIONS.—Section 3 of the Congressional Budget and Impoundment Control Act of 1974 is amended by adding at the end thereof the following new paragraphs:

"(6) The term 'deficit' means, with respect to any fiscal year, the amount by which total budget outlays for such fiscal year exceed total revenues for such fiscal year.

"(7) The term 'maximum deficit amount' means—

"(A) with respect to the fiscal year beginning October 1, 1985. $170,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1986, $134,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1987, $96,000,000,000;

"(D) with respect to the fiscal year beginning October 1, 1988, $52,000,000,000;

"(E) with respect to the fiscal year beginning October 1, 1989, $000,000,000,000; and

"(F) with respect to the fiscal year beginning October 1, 1990, $000,000,000,000.".

(3) RECONCILIATION.—

(A) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(i) DIRECTIONS TO COMMITTEES.—Section 301(b) of the Congressional Budget Act of 1974 (as amendment by paragraph (1)(B)(iv)(III) of this subsection) is further amended—

(I) by striking out "may also require" in the matter preceding paragraph (1) and inserting in lieu thereof "shall also, to the extent necessary to comply with subsection (c)";

(II) by inserting "require" after the paragraph designation in paragraph (1);

(III) by inserting "require" after the paragraph designation in paragraph (2); and

(IV) by redesignating paragraphs (1) and (2) as paragraphs (2) and (3), respectively,

and inserting before paragraph (2) (as so redesignated) the following new paragraph:

"(1) specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a);".

(ii) CONFORMING CHANGES.—

(I) Section 310(a) of such Act is amended—

(aa) by inserting "or" at the end of paragraph (2);

(bb) by striking out "; or" at the end of paragraph (3) and inserting in lieu thereof a period; and

(cc) by striking out paragraph (4).

(II) Section 310(d) of such Act is amended by striking out "subsection (c)" and all that follows through "year" and inserting in lieu thereof "subsection (b) with respect to a concurrent resolution on the budget adopted under section 301(a) not later than May 30 of each year".

(III) Subsections (e) and (f) of section 310 of such Act are amended by striking out "subsection (c)" each place it appears and inserting in lieu thereof "subsection (b)".

(IV) Section 300 of such Act is amended by inserting immediately after the second item relating to May 15 the following new item:

"May 30	Congress completes action on reconciliation bill or resolution, or both, implementing first required concurrent resolution.".

(B) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—

(i) IN GENERAL.—Section 304(a) of such Act (as redesignated by paragraph (2)(B)(i) of this subsection) is amended by adding after the period the following new sentence: "Any concurrent resolution adopted under this section shall specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a) to the extent necessary to comply with subsection (b).".

(ii) CONFORMING CHANGE.—Section 310(d) of such Act (as amended by subparagraph (A)(ii)(II) of this paragraph) is further amended by adding at the end thereof the following new sentence: "Congress shall complete action on any reconciliation bill or reconciliation resolution reported under subsection (b) with respect to a concurrent resolution on the budget adopted under section 304(a) not later than 30 days after the adoption of the concurrent resolution.".

(4) ENFORCEMENT.—

(A) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 311(b) of such Act is amended by inserting before the period at the end thereof the following: ", or would otherwise result in a deficit for such fiscal year that exceeds the maximum deficit amount specified for such fiscal year in section 3(7) (except to the extent that paragraph (1) of subsection (b) of section 310 does not apply by reason of paragraph (2) of such subsection)".

(B) REPORTING REQUIREMENT EXTENDED TO CONFERENCE REPORTS.—Section 308(a) of such Act is amended by striking out "the report accompanying that bill or resolution" in the matter preceding paragraph (1) and inserting in lieu thereof the following: "or whenever a conference report is filed in either House, the report accompanying that bill or resolution or the statement of managers accompanying that conference report".

(b) BUDGET SUBMITTED BY THE PRESIDENT.—

(1) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.— Section 1105 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(f)(1) Subject to paragraph (2) of this subsection, the deficit set forth in the budget so transmitted for any fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974, with budget outlays and Federal revenues at such levels as the President may consider most desirable and feasible.

"(2) The provisions of this subsection shall not apply in any fiscal year in which—

"(A) a declaration of war is in effect;

"(B) the Armed Forces of the United States are engaged in combat; or

"(C) the Congressional Budget Office projects there will be a recession.

For purposes of this paragraph, the term 'recession' means a decline in the gross national product or increase in the unemployment rate during any two consecutive fiscal quarters.".

(2) REVISIONS AND SUPPLEMENTAL SUMMARIES.—Section 1106 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) Subsection (f) of section 1105 shall apply to revisions and supplemental summaries submitted under this section to the same extent that such subsection applies to the budget submitted under section 1105(a) to which such revisions and summaries relate.".

(c) DEFICIT REDUCTION PROCEDURES.—

(1) CURRENT SERVICES SUBMISSION BY PRESIDENT.—With the estimated budget outlays and proposed budget authority submitted under section 1109 of title 31, United States Code, the President shall include—

(A) a separate statement specifying—

(i) an estimate of outlays and revenues for the current fiscal year; and

(ii) an estimate of whether the deficit for the current fiscal year will exceed the maximum deficit amount for such fiscal year, the amount of any such excess, and a determination of whether such excess is statistically significant; and

(B) in any case in which the President estimates pursuant to clause (ii) of subparagraph (A) that the deficit for the current fiscal year will exceed the maximum deficit amount for such fiscal year by a statistically significant amount, a deficit control message which complies with paragraph (2).

(2) DEFICIT CONTROL MESSAGE.—A deficit control message for a fiscal year shall—

(A) specify the amount by which the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year; and

(B) contain proposals by the President for increases in revenues and decreases in budget authority and outlays which will result in the reduction of the deficit for such fiscal year to an amount which is less than or equal to the maximum deficit amount for such fiscal year.

(d) BUDGET SUBMISSION BY PRESIDENT.—With the budget submitted to the Congress under section 1105 of title 31, United States Code, for a fiscal year, the President shall include—

(1) a separate statement which—

(A) specifies the matters specified in subparagraph (A) of subsection (c)(1) with respect to the current fiscal year;

(B) specifies an estimate of whether the deficit for the fiscal year for which the budget is submitted will exceed the maximum deficit amount for such fiscal year; and

(2) in any case in which the President estimates that the deficit for the current fiscal year will exceed the maximum deficit amount for such fiscal year, a deficit control message for such fiscal year which complies with paragraph (2) of subsection (c).

(e) INDEPENDENT ESTIMATES.—

(1) REPORT REQUIRED.—Not later than 14 days after the President submits estimates pursuant to section 1109 of title 31, United States Code, and not later than 14 days after the President submits a budget pursuant to section 1105 of such title, the Director of the Congressional Budget Office shall submit a report to the Committees on the Budget of the Senate and the House of Representatives. Each such report shall include—

(A) a statement of the amount (if any) by which the deficits for the current and following fiscal years will exceed the maximum deficit amounts for such fiscal years;

(B) a statement of the amount by which the deficit for the most recently completed fiscal year was reduced under the provisions of this section;

(C) a statement of the amounts by which the budget authority for national defense for the current fiscal year shall be reduced in order to reduce, by a proportionate share, the excess set forth pursuant to subparagraph (A) with respect to such fiscal year;

(D) a statement of the amounts by which—

(i) the budget authority and outlays for inflation adjustments including an identification and quantification of implicit inflation adjustments for non-means-tested nondefense entitlements (other than Social Security) and budget authority for non-means-tested nondefense discretionary programs; and

(ii) amounts made available for a fiscal year to the Secretary of Agriculture or the Commodity Credit Corporation to carry out a program to provide price support to producers of an agricultural commodity (including any program under which payments are made to producers as target price payments or for participation in a reduced acreage, acreage set-aside, or acreage diversion program);

shall be reduced across-the-board for the current fiscal year in order to reduce, by their proportionate share, the amount of the excess set forth in such report pursuant to subparagraph (A) with respect to such fiscal year;

(E) a statement of the extent to which the proposals set forth in the most recent deficit control message submitted by the President pursuant to subsection (c) or (d) would, if enacted, eliminate the amount of the excess for the current fiscal year set forth in such report pursuant to subparagraph (A).

(2) TREATMENT OF EXISTING CONTRACTS.—For purposes of subparagraphs (A) through (F) of paragraph (1), funds for existing contracts shall be included in any reduction unless—

(A) penalty provisions in such contract would produce a net loss to the Government;

(B) reduction of the contract violates legal obligations of the Government; or

(C) reduction would cause a program, project, or activity to be terminated or render such program, project, or activity infeasible.

(3) CONGRESSIONAL ACTIONS TAKEN INTO ACCOUNT.—In determining the amounts by which budget authority and outlays shall be reduced under subparagraphs (C) and (D) of paragraph (1) for a fiscal year, the Director

shall take into account actions already taken by the Congress with respect to that fiscal year.

(4) DETAILS REQUIRED.—Any report submitted under this subsection shall specify an equal percentage reduction in budget authority for each appropriation account and for each program, project, or activity within each such account. If it is not administratively feasible to continue any such program, project, or activity at the reduced level, the report shall specify such lesser reduction as will make such program, project, or activity feasible, and shall reduce other programs, projects, or activities in the same amount to compensate for such adjustment.

(f) DEFICIT REDUCTION RESOLUTION.—

(1) IN GENERAL.—Within 30 days after the Congress receives a deficit control message under subsection (c) or (d), the Committee on the Budget of the House and the Committee on the Budget of the Senate shall report to their respective Houses a deficit reduction resolution. A deficit reduction resolution shall specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a) of the Congressional Budget Act of 1974 in a manner which will result in the reduction of the deficit for the current fiscal year to an amount which is less than or equal to the maximum deficit amount for such fiscal year.

(2) COMPLETE ACTION.—The Congress shall complete action on a deficit reduction resolution with respect to a deficit control message within 40 days after receiving such message under subsection (c) or (d).

(3) REPORT TO BUDGET COMMITTEES.—If a deficit reduction resolution is agreed to in accordance with paragraph (2) containing directions to one or more committees to determine and recommend changes in laws, bills, or resolutions, and—

(A) only one committee of the House or the Senate is directed to determine and recommend changes, that committee shall promptly make such determination and recommendations and shall, within 50 days after the deficit reduction message with which such resolution is concerned was received by the Congress under subsection (c) or (d), report to its House a deficit reduction bill containing such recommendations; or

(B) more than one committee of the House or the Senate is directed to determine and recommend changes, each such committee so directed shall promptly make such determination and recommendations, and shall within 50 days after the deficit reduction message with which such resolution is concerned was received by the Congress under subsection (c) or (d), report such recommendations to the Committee on the Budget of its House, which upon receiving all such recommendations, shall report immediately to its House a deficit reduction bill, with such committee amendments as are necessary to eliminate any recommendations not directly related to reducing the excess deficit.

(4) COMPLETE ACTION.—Congress shall complete action on any deficit reduction bill reported under this subsection not later than 60 days after the date on which the deficit reduction message with which such bill is concerned was received by the Congress under subsection (c) or (d).

(5) PROCEDURE.—

(A) Except as provided in subparagraph (B), the provisions of subsections (b) and (c) of section 305 of the Congressional Budget Act of 1974 for the consideration in the Senate of concurrent resolutions on the budget and conference reports thereon shall also apply to the consideration in the Senate of deficit reduction bills and deficit reduction resolutions reported under this subsection and conference reports thereon.

(B) Debate in the Senate on any deficit reduction bill or deficit reduction resolution reported under this subsection, and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to not more than 20 hours.

(g) AUTOMATIC DEFICIT REDUCTION.—

(1) FAILURE TO COMPLETE ACTION.—If the Congress does not complete action on a deficit reduction bill for a fiscal year within 60 days after the Congress receives a deficit reduction message for such fiscal year under subsection (c) or (d), the President shall issue an order which implements the reductions in budget authority and outlays contained in the most recent report of the Director of the Congressional Budget Office under subsection (e). An order of the President under this paragraph shall not provide for the reduction of budget authority and outlays, in any manner which differs from the manner specified by the Director of the Congressional Budget Office in such report. Notwithstanding any other provision of law, amounts made available for a fiscal year to the Secretary of Agriculture or the Commodity Credit Corporation to carry out a program to provide price support to producers of an agricultural commodity (including any program under which payments are made to producers as target price payments or for participation in a reduced acreage, acreage set-aside, or acreage diversion program) shall be reduced by the amounts specified in such report.

(2) INSUFFICIENT DEFICIT REDUCTION.—

(A) REPORT BY THE DIRECTOR OF THE CONGRESSIONAL BUDGET OFFICE.—If the Congress completes action on a deficit reduction bill for a fiscal year within 60 days after the Congress receives a deficit reduction message for such fiscal year, the Director of the Congressional Budget Office shall, within 5 days after such action is completed, prepare and transmit to the President and the Congress a report which determines whether such bill contains sufficient reductions in budget authority and outlays to reduce the deficit for such fiscal year to an amount which is less than or equal to the maximum deficit amount for such fiscal year.

(B) DETERMINATION BY DIRECTOR.—If, in preparing the report required by subparagraph (A), the Director of the Congressional Budget Office determines that a deficit reduction bill for a fiscal year does not make sufficient reductions in budget authority and outlays to reduce the deficit for such fiscal year to an amount which is less than or equal to the maximum deficit amount for such fiscal year, the Director shall include in such report—

(i) a specification of the amount by which the deficit must be reduced for such fiscal year (in addition to the reduction in the deficit that will result from the implementation of such bill) in order to reduce the deficit for such fiscal year to an amount which is less than or equal to the maximum deficit amount for such fiscal year; and

(ii) a statement which revises the most recently completed report under subsection (e) with respect to such fiscal year in order to specify the reductions in budget authority and outlays which are necessary (after the implementation of such bill) to reduce the deficit for such fiscal year to an amount which is less than or equal to the maximum deficit amount for such fiscal year.

(3) IMPLEMENTATION.—If the Director includes in the report required under paragraph (1)(A) the statement described in paragraph (2)(B)(ii), the President shall issue an order implementing the reductions on budget authority and outlays contained in such statement. An order of the President under this paragraph shall not provide for the reduction of budget authority and outlays in any manner which differs from the manner prescribed by the Director in such statement.

(4) AUTOMATIC REDUCTIONS NOT TRIGGERED BY VETO.—The President shall not issue any order under this subsection if the Congress completes action on a deficit reduction bill (that will reduce the deficit to not greater than the maximum deficit amount) within the 60-day period specified in paragraph (1) or paragraph (2)(A) but the President does not approve, or disapproves such bill.

(5) REQUEST FOR SUPPLEMENTAL APPROPRIATIONS.—

(A) If the President determines that the amount of the reductions in budget authority required for national defense for a fiscal year under paragraph (1) or (3) will endanger national security, the President may submit to the Congress a request for supplemental appropriations in an amount not to exceed the amount of such reduction.

(B) Amounts appropriated pursuant to a request under subparagraph (A) may be used only for—

(i) programs, projects, and activities that are within functional category 050 on the date of the enactment of this Act; and

(ii) programs, projects, and activities that the President determines are vital to the national security.

(C) For the 30-day period beginning with the day on which the President submits a request under subparagraph (A), the President is not required to reduce budget authority for national defense by the amount of budget authority requested.

(h) PRESIDENTIAL PROPOSALS FOR DEFICIT REDUCTION.—

(1) IN GENERAL.—If the President disapproves, or does not approve, a deficit reduction bill for a fiscal year, the President shall submit to the Congress, within 15 days after the Congress completes action on such bill, proposals for legislation to reduce the deficit for such fiscal year to an amount which is less than or equal to the maximum deficit amount for such fiscal year.

(2) RECONCILIATION INSTRUCTIONS.—If the President submits proposals for legislation under paragraph (1), the concurrent resolution on the budget required to be reported under section 301(a) of the Congressional Budget Act of 1974 on May 15 of the fiscal year in which such proposals are submitted shall contain specifications and directions described in section 310(a) of such Act which will result in the reduction of the deficit for the current fiscal year to an amount which is equal to or less than the maximum deficit amount for such fiscal year.

(3) AUTOMATIC DEFICIT REDUCTION.—If a concurrent resolution on the budget contains specifications and directions in accordance with paragraph (2), and the Congress does not complete action on a reconciliation bill which implements such specifications amd directions in a manner which will result in the reduction of the deficit for the current fiscal year to an amount which is less than the maximum deficit amount for such fiscal year, the President shall issue an order which implements the most recently completed report of the Director of the Congressional Budget Office under subsec-

tion (e) for such fiscal year. An order of the President under this paragraph shall not provide for the reduction of budget authority and outlays in any manner which differs from the manner prescribed by the Director in such report.

(i) FUNDING PRIORITIES.—

(1) PRESIDENTIAL PROPOSALS.—In developing proposals to be included in a deficit control message under subsection (c) or (d), the President shall give priority to funding those programs that constitute an investment in future economic growth, including programs for—

(A) education and job training;

(B) scientific research and development; and

(C) export promotion.

(2) CONGRESSIONAL PROPOSALS.—In developing proposals to be included in a deficit control bill or deficit control resolution under subsection (f), the Congress shall give priority to funding those programs that constitute an investment in future economic growth, including programs for—

(A) education and job training;

(B) scientific research and development; and

(C) export promotion.

(j) APPLICATION.—

(1) IN GENERAL.—The provisions of subsections (c) through (i) shall not apply in any fiscal year in which—

(A) a declaration of war is in effect;

(B) the Armed Forces of the United States are engaged in combat; or

(C) the Congressional Budget Office projects there will be a recession.

For purposes of this subsection, the term "recession" means a decline in the gross national product or increase in the unemployment rate during any two consecutive fiscal quarters.

(2) PAYBACK OF EXCESS.—

(A) IN GENERAL.—If pursuant to paragraph (1), the provisions of subsections (c) through (i) are not in effect for a fiscal year, and the deficit for such fiscal year exceeds the maximum deficit amount for such fiscal year, the maximum deficit amount specified in section 3(7) of the Congressional Budget Act of 1974 for each of the succeeding three fiscal years shall be reduced by an amount equal to the sum of—

(i) one-third of the amount by which the deficit exceeded the maximum deficit amount in such preceding fiscal year; and

(ii) the amount of any interest which will be payable on the public debt as a result of the amount described in subparagraph (A), except as provided in subparagraph (B).

(B) EXCEPTION.—If, pursuant to subparagraph (A), the maximum deficit amount for a fiscal year is required to be reduced, and if the maximum deficit amount specified in section 3(7) of the Congressional Budget Act of 1974 for such fiscal year is zero, the concurrent resolution on the budget under section 301 of the Congressional Budget Act of 1974 for such fiscal year shall set forth, in the aggregate, a recommended level of Federal revenues which exceeds the appropriate level of total budget outlays set forth in such concurrent resolution for such fiscal year by an amount which is at least equal to the amount by which such maximum deficit amount would have been required to be reduced for such fiscal year pursuant to subparagraph (a) but for the operation of this subparagraph.

(k) DEFINITIONS.—For purposes of subsections (c) through (j) of this section:

(1) The term "budget outlays" has the meaning given to such term in section 3(1) of the Congressional Budget and Impoundment Control Act of 1974.

(2) The term "concurrent resolution on the budget" has the meaning given to such term in section 3(4) of the Congressional Budget and Impoundment Control Act of 1974.

(3) The term "deficit" has the meaning given to such term in section 3(6) of the Congressional Budget and Impoundment Control Act of 1974.

(4) The term "maximum deficit amount" has the meaning given to such term in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974.

(5) The amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year shall be treated as "statistically significant" if the amount of such excess is greater than 5 percent of such maximum deficit amount.

(6) The term "non-means-tested nondefense entitlement" shall be defined by the Director of the Director of the Congressional Budget Office, and shall include the following programs: Guaranteed Student Loans, Adoption Assistance, Foster Care, Medicaid, Child Nutrition, Special Milk, Food Stamps, Nutrition Assistance for Puerto Rico, Earned Tax Credit, Aid to Families with Dependent Children, Supplemental Security, Income, Veterans' Pensions, Veterans' Compensation.

(7) The term "non-means-tested nondefense discretionary program" shall be defined by the Director of the Congressional Budget Office, and shall include the following programs: Section 202 Handicapped and Elderly Housing, Chapter 1 of the Education Consolidation and Improvement Act, Head Start, Pell Grants, Education of the Handicapped, Supplemental Feeding (WIC), Subsidized Housing, Low-Income Energy Assistance

(8) The term "inflation adjustments for non-means-tested entitlements" includes a quantification and identification of implicit inflation adjustments requiring, by law, increased federal expenditures.

(9) The term "proportionate share" means, with respect to defense and nondefense programs for a fiscal year, the ratio (expressed as a percentage) of outlays for defense and nondefense programs, respectively, for the prior fiscal year to all outlays taken into account for purposes of making reductions under this section for such prior fiscal year.

(l) The provisions of subsections (a), (e), (f), (g)(2), and (g)(3) of this section are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

(m) EFFECTIVE DATE.—This section and the amendments made by this section shall become effective on the date of the enactment of this section and shall apply with respect to fiscal years beginning after September 30, 1985, and before October 1, 1990.

DECONCINI AMENDMENT NO. 744

(Ordered to lie on the table.)

Mr. DECONCINI submitted an amendment intended to be proposed by him to the joint resolution (H.J. Res. 372), supra, as follows:

At the end of the joint resolution, add the following:

SEC. . The President, acting through the United States Trade Representative, shall immediately take action to initiate negotiations with the governments of the principal foreign copper-producing countries to conclude voluntary restraint agreements with those governments for the purpose of effecting a balanced reduction of total annual foreign copper production for a period of between 3 and 5 years in order to—

(1) allow the price of copper on international markets to rise modestly to levels which will permit the remaining copper operations located in the United States to attract needed capital, and

(2) achieve a secure domestic supply of copper.

NOTICES OF HEARINGS

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. ANDREWS. Mr. President, I would like to announce for the information of the public that the Select Committee on Indian Affairs will be holding a confirmation hearing on October 16, 1985, in Senate Russell 325, beginning at 10 a.m., on the nomination of Ross O. Swimmer, of Oklahoma, to be Assistant Secretary of Indian Affairs at the Department of the Interior. Those wishing additional information should contact Peter Taylor, staff director of the committee, at 224-2251.

AUTHORITY FOR COMMITTEES TO MEET

SELECT COMMITTEE ON INTELLIGENCE

Mr. DOLE. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Tuesday, October 8, 1985, in closed executive session in order to receive a briefing on Central America.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY RESEARCH AND DEVELOPMENT AND SUBCOMMITTEE ON NUCLEAR REGULATION

Mr. DOLE. Mr. President, I ask unanimous consent that the Subcommittee on Energy Research and Development of the Committee on Energy and Natural Resources, and the Subcommittee on Nuclear Regulation of the Committee on Environment and Public Works, be authorized to meet during the session of the Senate on Tuesday, October 8, to hold a joint hearing to consider S. 1517, a bill to amend the Low-Level Radioactive Waste Management Policy Act of 1980 to authorize continued financial and technical assistance of the Department of Energy to the regional low-

level radioactive waste compact regions, and to revise the guidelines and procedures for the establishment and use of regional disposal facilities for low-level radioactive waste, and for other purposes; and S. 1578, a bill to amend the Low-Level Radioactive Waste Policy Act to improve procedures for the implementation of compacts providing for the establishment and operation of regional disposal facilities for low-level radioactive waste, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Tuesday, October 8, in order to receive testimony concerning S. 238, to reform procedures for collateral review of criminal judgments, and for other purposes.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON MANPOWER AND PERSONNEL

Mr. DOLE. Mr. President, I ask unanimous consent that the Subcommittee on Manpower and Personnel of the Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, October 8, to hold a hearing on peacetime military medical care.

The PRESIDING OFFICER. Without objection, it is ordered.

ADDITIONAL STATEMENTS

CALL TO CONSCIENCE FOR SOVIET JEWRY

● Mr. GORTON. Mr. President, if Americans ever need reminding of the oppressive nature of the Soviet Government, all they have to do is take a look at the plight of Soviet Jewry. Do not let the slick style of the new Soviet leadership fool you. Not only does the oppression continue, it is getting worse.

From 1968 to 1983, over 262,500 persons left the Soviet Union with Israeli visas. The peak year was 1979, when 51,320 emigrated. As recently as 1981, nearly 9,500 emigrated, but last year the number dwindled to 896.

There are still at least 1.8 million Jews left in the Soviet Union, although some Western specialists estimate the number may be as high as 2.8 million. As many as 400,000 have shown an interest in emigrating. For those who have applied for an exit visa and been denied permission, life can be unbearable.

Ask Dr. Fred Ehrlich, from Lynnwood, WA. Recently, Dr. Ehrlich wrote to me and offered some of the evidence—the tip of the iceberg, as he called it. There is nothing like real human stories to give meaning to the tragedy of Soviet anti-Semitism. As Dr. Ehrlich explains:

Leave it to the Soviets to come out with something new in anti-Semitism! It's urgent that we speak out for Yuli Edelstein of Moscow, a Hebrew teacher arrested in September when authorities suddenly "found" hashish in his possession.

It's urgent that we speak out for Michael Tzivin of Leningrad who was arrested outside a trial of a fellow Jew while reading King David's psalms. He's not been heard of since.

It's urgent that we speak out for Dimitri Shapiro of Moscow, another (persecuted) Hebrew teacher, whose mother was roughed up as the KGB desecreted a holy Mezuzah and confiscated his Tefillin (Phylacteries) on the pretext of looking for illegal drugs.

It's urgent that we don't forsake Yakov Levin and Yakov Mesh of Odessa, Yakov Gordetsky of Leningrad, . . . who along with countless other Jews, daily pay the price. . . .

Twenty-one year old Anatole Virshuvsky of Moscow was recently accused and convicted of grand larceny in Kiev, and is currently serving a two-year sentence in a labor camp. The true details are that Virshuvsky, who was visiting in-laws in Kiev, was detained by the KGB as he rode on a bus, studying from two Hebrew books which he had borrowed from the Kiev Synagogue. Apparently, the KGB had managed to get an official of the Synagogue to corroborate that Virshuvsky had "stolen" the holy books from the unused library dating back to czarist times. (No Jewish Bible has been published in Russia since before the 1917 communist revolution.) Virshuvsky, his wife, and infant child (born while he awaited trial in prison) need your help. Please!

Let us try to help Iosef Berenstein who applied for an exit visa in 1979. Since that time he has been arrested, charged with malicious hooliganism, and sentenced to prison where he was harassed, beaten, and partically blinded upon arrival!

Mr. President, Dr. Ehrlich would undoubtedly want me to repeat a point made earlier: these are but a few examples. The tragedy is enormous. All Americans and, indeed, all those throughout the world who treasure freedom must speak out against anti-Semitism in the Soviet Union.●

THE FARM CREDIT CRISIS

● Mr. BOREN. Mr. President, I recently received a letter from the Federal Land Bank Association of Anadarko that clearly spells out exactly why it is so important to give our undivided attention to addressing the current farm credit crisis. Since the farm credit system was originally created by this body, it is our charge to ensure not just survival, but a progressive survival of the system. But one way or another, the farm credit system will survive; farmers may not. Therefore, it is imperative that we rebuild this program by firming the foundation: increasing farm income so that the farmers can pay off the debts that they have incurred, the debts that they want to be able to honor. Farmers do not want to be bailed out, they only want a fair chance to plant and harvest with a market before them.

I can only say a loud "Amen" to the points made by Mr. McComas of the Federal Land Bank Association of Anadarko. My work on the Senate Agriculture Committee and my public statements echo this agreement. It is the farmers, in the truest sense of the term, who have been subsidizing the rest of us for years. They must have at least a 10- to 20-percent improvement in income now or we face disaster. More income now is so much better than a massive bailout later on. Anything that we may invest now or have invested in the past assures us of a worthwhile return from this agricultural way of life that contributes to the wealth of our Nation.

I commend Mr. McComas for the honesty of his letter to me, and I request that its full text be printed in the RECORD.

The text follows:

FEDERAL LAND BANK
ASSOCIATION OF ANADARKO,
Anadarko, OK, September 11, 1985.

Hon. DAVID L. BOREN,
Russell Senate Office Building,
Washington, DC.

DEAR SENATOR: I am appalled by the fact that our system has first suggested a government bail out in 18 to 24 months. If things are not righted by the Congress and the Administration, then a bail out of our system is inevitable. The Farm Credit System, a creation of the government many decades ago, will survive and each of you will see to it; but more important, will the farmer survive? Our system has one-third of all farm debt and it is needed, so I think it goes without saying that it will survive and the government will see to that, be they Democrat or Republican.

The Congress and the Administration are wrestling with a farm bill and its cost to the taxpayer in the budget.

Facts:

(1) The American farmer is the only part of our economic system today that can compete world wide.

(2) American agriculture has been the backbone of our industrial and military might by the few feeding the many.

(3) The American public is the cheapest fed people on earth—about 15 cents of every dollar spent on food.

(4) Agriculture has been used as a whipping boy in our foreign policy with embargos in the previous three administrations.

(5) Whether you want to believe or admit it, the American farmer has not been in a net profit position except for about five years of the last 20 years. (This can best be seen by the increase in the agriculture debt load during this period.)

(6) A truth was stated many decades ago by a great leader: "As agriculture goes, so goes our nation." This is just as true today as then.

(7) There are two large creators of new dollars in our economic system and their origin is the earth—agriculture and petroleum. We seem to be hell bent on destroying both.

(8) The American farmer has been forced to over-produce creating a large surplus that is costly to the taxpayer due to ineffective farm programs and our cheap food poli-

cies that has kept the profit margin low, if any, so low that he had to produce too much to survive.

(9) I feel our government is following the same path with the farmer that we did with petroleum. Through bad government policies, we kept the price of oil low, until a few could organize and highjack the many.

I do not believe anyone, business, individuals or government, improves its position by weakening or destroying its strengths. The American farmer has been a God-given blessing to our country. Because of his efficiency and ability to produce, our country has been able to maintain world leadership. He has been used to feeding the masses, helping set and enforce foreign policy, free up labor, which insures military and technological strengths, having a nation of people that are the best fed and clothed in the world and stood as the only giant in our economic system that competes in the world markets thereby providing some balance to our trade deficit.

The administration, the Congress and the public now say that the farmer must be on a free market. This is a noble statement, however, the farmer has not been on a free market for the past 50 years and because of his strength and contribution to our economic system will never be allowed this privilege.

According to what I read, there is a farm debt nationwide of some $220 billion. It does not take a very smart cookie to figure out how much net profit it takes to service this kind of debt at 12 percent interest.

Whatever the government spends now on the farmer or has spent in the past is damn cheap for the government and for the people as compared to his past, present and future contribution to our nation's strength.

You, our leaders, are faced with the following facts if you do nothing or too little.

(1) A bail out of the Farm Credit System in 12 to 24 months that will cost the government untold billions.

(2) Horrendous losses written off by government agencies doing business with agriculture such as FmHA, CC and SBA to name a few.

(3) Country bank failures to the point that money must be pumped into the FDIC, another untold billions.

(4) Growing unemployment in agriculture supported industries because without a reasonable profit the farmer cannot buy or pay.

(5) Large losses by suppliers of farmers due to his inabilifty to pay (no net profit). I have stated all of the above to make the following points.

(1) The American farmer must have a reasonable net profit. This can only be accomplished with a good bi-partisan farm program that will insure profit and reduce costly surpluses over a 5-year program. Mr. President, if given a choice between guns and butter, the masses will take butter every time.

(2) The Farm Credit System may need a bail out in the future. However, the users of this system need relief now through reduced cost. This can be accomplished by the Congress and the administration allowing all of the system bonds to be tax free and government guaranteed for the next five years.

(3) The Conservancy Act that has been proposed by the Farm Credit Council passed.

Mr. President, the Congress and Mr. and Mrs. Household USA, the people I deal with are not numbers or statistics; they are flesh and blood, tanned by the sun, and stooped by hard work. The national farm debt of more than $220 Billion may be 20 percent to 50 percent bad paper called non-performing and non-accrual loans in banking circles but the people we serve are 95 percent plus good people in a Catch 21 that they did not create.

The bottom line is that bail outs don't pay taxes but profitable farmers and the other 20 percent to 30 percent of the workforce that he creates do pay taxes. It is time to fish or cut bait; pay now or pray later.

Thank you for any consideration given to these thoughts.

Sincerely,

PAT L. MCCOMAS.●

NRC'S RESEARCH PROGRAM

● Mr. McCLURE. Mr. President, I would like to take a moment today to bring attention to a program that has contributed a great deal to the furtherance of safety in our nuclear industry, and yet this program has received little or no credit—in fact, to the contrary, it has unfairly borne the brunt of attacks made against its parent organization of late.

The program of which I speak is the Nuclear Safety Research Division of the Nuclear Regulatory Commission [NRC]. This particular portion of the NRC has too often been the punching bag for much of the criticisms voiced against the NRC. By this I do not mean that the safety research program per se is openly criticized for poor performance, but rather, the problem has a much more subtle synergism: As NRC comes under increasing attacks from all directions, the safety research program is inevitably thrown to the lions first, in order to absorb the blows of continued NRC budget cuts. Witness the fact that NRC's overall budget request this year is 10 percent less than it was 2 years ago. Yet during this same period, the research portion of this budget has declined by almost 30 percent. I am not at all sure how much more the research program can be taxed before it no longer will be able to serve the function for which it was created; that is, to provide a sound, technical basis for NRC's regulatory process in the promotion of safety in the nuclear industry.

Mr. President, before we get too far into the 1986 budget cycle, and before we let another year pass where NRC's research program again goes to the chopping block, I ask that we first take the time to look carefully into the impact that further cuts would have on the nuclear industry, and more importantly, on public safety in general.

Chairman Palladino's recent testimony before the Senate Appropriations Committee highlights the problems to which I refer. In his testimony, Chairman Palladino stated that:

• • • to stay current with our day-to-day regulatory responsibilities, research has had to absorb the major portion of our cutbacks.

Yet Palladino went on to say that:

A stable, continuing program of research is essential for the Commission to carry out its responsibilities. Our research program provides us with the kind of sound technical information we need to deal effectively with emerging complex technical issues. When information developed by our research program is lacking, we often have to require factors of safety to compensate for our lack of knowledge. If, as is often the case, such factors are overly conservative, an unnecessary burden may be placed on the industry and the public.

I would like to point out here that "conservatism" in NRC licensing decisions does not always translate into added public safety, as many conservative operating requirements actually add unnecessarily to the complexity of a plant, and thereby reduce its overall safety.

Chairman Palladino is not alone in appreciating the role of NRC safety research, while recognizing its vulnerability to budget cuts. I quote from the Commission's December 19, 1984 meeting during which time the NRC budget was discussed:

Bill Dircks, Executive Director of NRC:

Research, as you know • • • is always more of the difficult items to sell and it becomes the swing factor.

Commissioner Lando Zech:

It certainly looks to me like the research cut is absolutely devasting. The research budget is, the way I look at it, and absolutely direct contribution to the health and safety of the public. It contributes to the safe operation of the plants • • • and the research program is something that goes hand in hand with regulation, and hand in hand with the other areas that contribute directly to the safe operation of our plants.

Bob Minogue, Director, Office of Nuclear Regulatory Research:

After the severe cuts that we took in the 1985 budget, this further cut would simply continue a trend to dismantling the NRC's research program • • • I think we have gone as far as we can go • • •

I think the net effect of this kind of program reduction in the Research Office, on top of what has gone on in previous years and in view of the absence of a DOE light water reactor research program, would reduce the United States to the status of about a third-rate nuclear power in terms of research capability and understanding of the technology.

Commissioner Jim Asselstine:

Bob, it sounds like many of • • • the programs, including the ones that would be reduced or eliminated, are what you call the safety-net function of research; that is, on going programs that give us the information to allow us to respond in a timely way to problems when they come up, and to understand what the uncertainties are and then enable us to make decisions • • •

Mr. President, I could go on to describe the detailed contributions that NRC's research provides in areas such as severe accident analysis, seismic design, human factors, plant aging, fission product source-term, advanced re-

actors evaluation, and nuclear waste programs, just to name a few. But instead, I would just like to leave you with my bottom-line message: NRC's research programs serve a vital function that Congress simply cannot let go and still claim to be a responsible arm of the Federal Government.●

MINORITY ENTERPRISE DEVELOPMENT WEEK

● Mr. DOMENICI. Mr. President, there are over 600,000 minority-owned businesses in our Nation. Minority enterprises form a significant percentage of all of this country's businesses, and their number continues to grow. These firms are a vital part of the economic and technological success of the United States. They develop innovative goods and services for the marketplace. They provide jobs for hundreds of thousands of workers. They enliven the economies of their communities. In short, they are a dynamic force in our Nation's marketplace.

Minority enterprises are no different from the overwhelming majority of American businesses. They seek to earn an honest dollar by providing a quality product at a reasonable price. What sets them apart are the obstacles that they have had to overcome in order to participate in our free enterprise system. Many of the owners of these businesses have had to surmount the barriers of language, education, and discrimination in order just to have a chance to succeed. That they have met these challenges and conquered them is a testament to their faith, their diligence, and their abilities. It also speaks well of our country, which has supported their endeavors and created a climate whereby any individual with the determination and the ability to succeed can succeed.

President Reagan has declared this week to be Minority Enterprise Development Week in recognition of the achievements of this Nation's minority-owned enterprises. I join him in applauding the accomplishments of America's minority businesses. Recognition of these firms gives me special pleasure because one of New Mexico's businessmen has been singled out for special recognition. Dave Bradley of Albuquerque has been selected as the Minority Small Business Person of the Year for the Albuquerque District of the Small Business Administration. Mr. Bradley, a native American, is president of Bradley Construction, Inc. Bradley Construction, in business since 1973, employs 50 individuals and had over $8 million in sales last year. Dave Bradley epitomizes the hard work, talent, and determination which so many minority business owners possess.

Mr. President, minority enterprises are an integral part of the American economy today. They exemplify the continued vitality of the free market system. These firms have enriched our Nation and stand as proof that the American dream is alive and well and attainable in 1985.●

PROPOSED ARMS SALES

● Mr. LUGAR. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million or, in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales be sent to the chairman of the Foreign Relations Committee.

In keeping with my intention to see that such information is available to the full Senate, I ask to have printed in the RECORD at this point the notification I have received.

The material follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, October 7, 1985.

Hon. RICHARD C. LUGAR,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 86-02, concerning the Department of the Army's proposed letter of Offer to Turkey for defense articles and services estimated to cost $71 million. Shortly after this letter is delivered to your office, we plan to notify the news media.

You will also find attached a certification as required by Section 620C(d) of the Foreign Assistance Act of 1961, as amended, that this action is consistent with Section 620C(b) of that statute.

Sincerely,

PHILIP C. GAST,
Director.

[Transmittal No. 86-02]

NOTICE OF PROPOSED ISSUANCE OF LETTER OF OFFER PURSUANT TO SECTION 36(b)

(i) Prospective Purchaser: Turkey.

(ii) Total Estimated Value: Major defense equipment,[1] $0 million; other, $71 million; total, $71 million.

(iii) Description of Articles or Services Offered: Five hundred ninety conversion kits each consisting of 13 subkits and support items necessary to convert M48A1 tanks to the M48A5 configuration.

(iv) Military Department: Army (USQ).

(v) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vi) Sensitivity of Technology Contained in the Defense Articles or Defense Services Proposed to be Sold:

(vii) Section 28 Report: Case not included in Section 28 report.

(viii) Date Report Delivered to Congress: October 7, 1985.

[1] As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

TURKEY—TANK CONVERSION KITS

The Government of Turkey (GOT) has requested the purchase of 590 conversion kits each consisting of 13 subkits and support items necessary to convert M48A1 tanks to the M48A5 configuration. The estimated cost is $71 million.

This sale will contribute to the foreign policy and national security objectives of the United States by improving the military capabilities of Turkey; furthering NATO rationalization, standardization, and interoperability; and enhancing the defense of the Western Alliance.

The conversion kits will be used by the Government of Turkey in their Tank Conversion Programs. This conversion changes a tank from gasoline to diesel power and upgrades the cannon from 90mm to 105mm. The GOT will have no difficulty in absorbing and maintaining the converted tanks since the end item, parts, tools and test equipment and trained personnel are already available in the country. The tank conversion kits will be provided in accordance with, and subject to the limitations on use and transfer provided for under the Arms Export Control Act, as embodied in the terms of sale. This sale will not adversely affect either the military balance in the region or U.S. efforts to encourage a negotiated settlement of the Cyprus question.

There is no prime contractor; various contractors would be involved in supplying these items.

Implementation of this sale will not require the assignment of any additional U.S. Government personnel or contractor representatives to Turkey.

There will be no adverse impact on U.S. defense readiness as a result of this sale.

U.S. DEPARTMENT OF STATE, UNDER SECRETARY OF STATE FOR SECURITY ASSISTANCE, SCIENCE AND TECHNOLOGY,
Washington, DC, October 4, 1985.

Pursuant to Section 620c(d) of the Foreign Assistance Act of 1961, as amended (the Act), and the authority vested in me by Department of State Delegation of Authority No. 145, I hereby certify that the provision to Turkey of 590 M48A1 tank conversion kits at an estimated cost of $71 million is consistent with principles contained in Section 620c(b) of the Act.

This certification will be made part of the certification to the Congress under Section 36(b) of the Arms Export Control Act regarding the proposed sale of the abovenamed articles and is based on the justification accompanying said certification, and of which such justification constitutes a full explanation.

WILLIAM SCHNEIDER, Jr.●

THE NELSON BARNETT FAMILY OF BATESVILLE, AR

● Mr. PRYOR. Mr. President, I want to pay special recognition today to a family and a town and a way of life. The family is the Nelson Barnetts, and the town is Batesville, AR, and the way of life is one that many in this country would say is fast disappearing. I don't think it is, though, Mr. President—not as long as people like the Barnetts are alive and thriving in my home State.

Batesville is a beautiful town in the foothills of the Ozarks. It is blessed with natural resources and is rich in historical significance. Each year the White River Water Carnival Parade makes its way down Main Street with thousands lining up to watch in front of beautiful homes, churches, and businesses along the route.

At 267 Main Street the parade passes a living tradition, and that is Barnett Brothers Department Store.

This year, Mr. President, Barnett Brothers is celebrating its 100th anniversary, and recently members of the Barnett family came from all over the country to take part in the festivities. Let me add that members of the Barnett family include hundreds who are not related by blood but who feel themselves part of this clan.

Throughout the years, members of the immediate Barnett family have played significant roles in developing Batesville and White County. And their department store has been a vital partner in economic development.

The people who work at Barnett's are especially friendly and hospitable. They are the old-fashioned kind who come out from behind the counter and talk to you and ask about the family. Their warmth is genuine. I have campaigned there many times, and it's a wonderful place where you can find anything under the Sun and have it gift-wrapped.

Mr. President, on this special occasion for the people of Batesville, I want to wish the Barnetts and their store a happy century and many years of progress ahead. It's encouraging to know that their way of life is still a part of America.

DOREL CATARAMA, PRISONER IN ROMANIA

● Mr. SIMON. Mr. President, there are times when we have seen success by quietly talking. Times when silence and caution and reservation are the best courses of action. There are times when we are able to bridge ideological and philosophical differences by mutual respect and understanding, when humanity transcends politics.

There does come a time, however, after communication and patience and perseverance, when we must stop for a moment to consider the progress we have made on such a course. And we must then respond accordingly.

I particularly feel this necessity on behalf of Dorel Catarama, a prisoner in Romania, whose brother, Viorel, continues to plead for the release of his loved one. Viorel and his father, Valeriu, live in Chicago.

After a great deal of correspondence, Senator DIXON and I met with Ambassador Gavrilescu in mid-June. We spoke in detail of the charges against Dorel, of Amnesty International's belief that those charges are perhaps fraudulent and of the real concern that Dorel is being persecuted because of his religion. He is a Seventh-day Adventist. Ambassador Gavrilescu was to communicate our concerns to his government and we were to hear back within 2 or 3 weeks.

Since that time, we have written three letters and made numerous telephone calls—none of which have elicted a response from the Government of Romania. Four months have passed and we have made no visible progress on behalf of Dorel Catarama.

In July, Viorel Catarama wrote a statement to be used as testimony in Senator DANFORTH's hearings on most-favored-nation status. He refrained from submitting the statement for a variety of reasons, one of which was genuine hope that we would soon be hearing from Romanian officials.

At this time, I ask that the contents of his statement be printed in the RECORD.

The statement follows:

STATEMENT OF VIOREL CATARAMA

Mr. David Funderburk—the former U.S. Ambassador to Bucharest—has said recently that Romania's abysmal record on human rights and its lack of reforms are a mockery of declared U.S. policies. I know the truth of this statement. I am Viorel Catarama. My father and I left Romania in February, 1982 and were granted political asylum in the United States. When news of our leaving reached Romania, fifty militiamen and secret police stormed into my brother's home. They ransacked his house for over 13 hours, digging up the foundation, pulling up the floorboards, and breaking through the walls. They found ten dozen eggs, two pounds of meat, 75 pounds of cornmeal, and 3 boxes of soda—enough to arrest my brother for food overstocking. Significantly, the secret police confiscated all my brother's religious materials, Bibles, hymnals and the like. Dorel was forced to sign a statement that he was in possession of $3000 which had been brought illegally in to Romania. They also claimed that he had embezzled from two of his former employers.

Ample proof exists that Dorel did none of these things. Nevertheless, he was sentenced to ten years in prison. After an appeal hearing, the sentence was increased by four years. The Romanian authorities have confiscated all of Dorel's possessions, leaving his wife with only the bare essentials: some furnishings and cookware.

Amnesty International and my family have been in touch with people who have seen Dorel in jail. According to these eyewitnesses, Dorel is beaten and tortured regularly. He rarely gets to eat anything except bread and water. They do not allow him to practice his religion—he is a Seventh-Day Adventist. One year ago, the Romanian authorities found a Bible in Dorel's possession. Without informing us, they put my brother into an unheated railroad car, sending him to a jail with worse living conditions. The trip took six days—six days in freezing temperatures and without food. This treatment for the possession of the Bible is reminiscent of the treatment afforded the Jews in the Holocaust.

My brother's wife repeatedly sends him packages, but each one fails to reach him. The authorities have told her in private that they will release Dorel if my father and I return to Romania. The two of us will never go back there. We want to see Dorel, but not from the adjoining prison cell. Meanwhile, my sister-in-law continues to be harassed daily. We have encouraged her to leave Romania before they find a reason to imprison her. She has applied weekly for the past 3 years for a passport. Each week is turned down. The secret police have told her many times that they have a very long reach, implying that they can somehow harm me and my father here in the U.S. and they tell her to watch her step.

I present these facts to you because I cannot believe that the United States would consider continuing to give most-favored-nation status to Romania, a country that favors most imprisonment, injustice, and religious persecution. In approximately ten years of giving MFN to Romania there has been no noticeable improvement in their overall attitude towards human rights and religious liberty. We cannot hope for Romania to change its ways without changing our ways towards it. Stripping Romania of its most-favored-nation status would be a signal to its government. It would be a signal to all nations that the United States disapproves of trading with those who disapprove of the rights of man.

My brother, his fellow prisoners, and I thank you.●

TRIBUTE TO PATRICIA WILBUR

● Mr. HATFIELD. Mr. President, in the past few days we have become well aware of the fact that the Federal Treasury is not a bottomless well from which we can draw resources without limit. Such is the nature of most treasures—no matter how great, ultimately they are spent.

Today, however, I want to bring to the attention of my colleagues a treasure that cannot be spent: the loyalty and support of a friend. For the past 12 years, I have had the benefit of such support from a superlative member of my staff, a gifted secretary and dear friend, Patricia Wilbur. Today marks the 12th anniversary of Pat's employment in the U.S. Senate as a part of my staff, and it is my sincere pleasure to offer to her my heartiest congratulations and deep gratitude.

Pat epitomizes the best in a Senate employee: skill, dedication, sensitivity to the constituency for whom she works and genuine interest in all those around her. I know that my ability to serve the people of Oregon has been greatly enhanced by Pat's tireless and selfless work.

One of Pat's greatest delights and sources of justifiable pride is her family. Several of them have served the Senate in various capacities and it is a pleasure to join her husband Perry, her sons Mark and Wade, and her daughter Valerie, in offering to Pat my very best wishes for the future. I look forward to continuing to work with Patricia Wilbur in the service of Oregon and the Nation.●

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

UNANIMOUS-CONSENT AGREEMENT

Mr. DOLE. Mr. President, I think we are quite close to an overall agreement. We have a little snag on the wording of the amendment on the temporary extension. I hope we could resolve that by tomorrow, but it would seem to me that in the interest of time—and the loss of time—we might go at least that far. I have discussed it with the distinguished minority leader, and let me make the following request. It will be considered after I recite all of it.

I ask unanimous consent that all pending motions on amendments to House Joint Resolution 372 be laid aside. Following that, I ask unanimous consent that the Senate convene at 9 a.m. on today; that there be a special order in favor of the distinguished Senator from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes; the leaders under the standing order have 10 minutes each, to be followed by disposition and final action on the Levin amendment, by voice vote, and the Kerry amendment, the CBO study, by voice vote, followed by the modified trigger to be offered by the distinguished Senator from Nebraska [Mr. EXON], which would require a rollcall, and then the Senate would recess from 10:15 to 11:15 for a joint meeting of Congress and, upon returning, would move to the leadership amendment, and there be a vote on the leadership amendment at 12:30 p.m. on Wednesday, October 9; that to be followed by consideration of the Melcher minimum tax amendment under a time agreement of 40 minutes, 30 minutes to the distinguished Senator from Montana, 10 minutes on the other side, and then the amendment of Senator DODD and Senator KERRY, exempted means-tested programs, 30 minutes, divided 20 minutes to the proponents and 10 minutes to the opponents of the amendment. The Levin amendment, I failed to mention, would be 5 minutes on a side, 10 minutes equally divided; the Kerry amendment 10 minutes equally divided; the Exon amendment 40 minutes, 30 minutes to the distinguished Senator from Nebraska, and 10 minutes to the opponents of the amendment. Following disposition then of the Melcher and Dodd amendments, we would move to the consideration of the modified Gramm-Rudman-Hollings amendment, as modified, and it be considered original text for the purpose of further amendment and hopefully to be able to vote up or down on that amendment not later than 3 p.m.

Now, at that point we would need to pass the temporary extension, get it to the House early afternoon, and we need to work out that language with the distinguished chairman of the Finance Committee. We will be hoping to meet with the Senator from Colorado and the Senator from Louisiana, and we will try to have some Treasury people here, to see if we can work out language satisfactory to all parties.

Is there objection to that much?

Mr. GLENN. Mr. President, reserving the right to object, I have a question.

Mr. BYRD. Mr. President, will the distinguished majority leader yield? I would be happy to give 5 minutes of my time under the leader's order for morning business so that Senators might be able to introduce bills.

Mr. GLENN. I thank the distinguished minority leader.

Mr. KERRY. Will the majority leader yield?

Mr. DOLE. Yes, I will be happy to yield.

Mr. KERRY. Mr. President, I just wanted to check: The votes on those agreed-upon amendments will be rollcalls and they will be up-and-down. Is that correct?

Mr. DOLE. The agreed-upon amendments on CBO will not require a rollcall vote.

Mr. KERRY. No, but the distinguished Senator from Nebraska [Mr. EXON] asked me to protect his interests. In addition, on my amendment with the Senator from Connecticut, we would like to have an up-and-down vote.

Mr. DOLE. That is a judgment I am not prepared to make. I think I have to have some flexibility if we are going to finish the bill. That is not part of the agreement.

Mr. KERRY. Mr. President, reserving the right to object——

Mr. DOLE. Mr. President, I indicated earlier that the Levin amendment would be accepted, that the Kerry CBO study amendment would be accepted, that there would be an up-and-down vote on the Melcher tax amendment, and an up-and-down vote on the Exon trigger.

I have gone as far as I can because of the problem with the wording of the temporary extension.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object——

The PRESIDING OFFICER. The minority leader.

Mr. BYRD. I am only asking the majority leader to yield.

Mr. President, I want to be sure that we have a clear understanding of the phrase "as modified."

I believe the distinguished majority leader asked that at 3 p.m. on Wednesday, October 9, the Senate proceed to vote on the Gramm-Rudman-Hollings amendment as modified. With respect to my understanding of "as modified," the last modification that I know of in connection with that amendment was on Friday afternoon of last week. Is that correct?

The PRESIDING OFFICER. The minority leader is correct.

Mr. BYRD. There would be no further modification of that. But we could say the Gramm-Rudman-Hollings amendment as modified and as amended, is amended.

Mr. DOLE. Mr. President, the Budget Committee has been working on modifications all week, including one on the rules, one on committee jurisdiction, a number of amendments that were raised in the original Democratic proposal. That is what we meant as modified—in other words, the Gramm-Rudman-Hollings amendment as modified.

I ask the distinguished Senator from New Mexico to indicate just what they have done. I think it is what we have talked about.

Mr. DOMENICI. Mr. President, I say to the minority leader that a number of amendments that have been offered on the floor would be included in this modification. The proposed Levin amendment, which has not yet been offered on the floor, but which we are aware of, would be included in the modification. The CCC amendment that the distinguished Senator from New York had intended to offer would be included.

With reference to one of your concerns, which had to do with the point of order, a modification providing for 60 votes for the waiver, the so-called super majority, is drafted.

There has been an ongoing discussion with reference to jurisdiction among the committees versus the Budget Committee on a reconciliation that could occur after the President's sequester because the way it is drawn in the bill that is pending the Budget Committee could have jurisdiction to draw the legislative legislation. That has been worked out with various authorizing committees, and in particular the Finance Committee, so that the final modification would include a very similar process through reconciliation, I say to my distinguished friend, the minority leader, where the committees would do the work and report it back to the Budget Committee. There may be another. That is seven or eight. But there are no others that I am aware of that are substantial other than the ones I have described as those that have been already accepted at the desk.

I think that is what we intend by "modified" because we would have to modify it in some way to include those and we intended to.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER (Mr. RUDMAN). The Democratic leader.

Mr. BYRD. Mr. President, this would be the first time I ever remember doing something like that. When we say "the Rudman amendment as modified," we all know what the modi-

fication was on Friday. We have been able to read it. That amendment was modified. That was before the yeas and nays were ordered on it. It could be modified without unanimous consent.

Now, if I understand what we are about to do here, we are going to proceed to vote on the Gramm-Rudman-Hollings amendment as modified further with some package we have never seen.

Mr. LONG. Mr. President, may I suggest that we agree to vote on what they have here now and then when we see the amendment change, we can agree to modify it.

Mr. BYRD. I say to the distinguished majority leader, we would have to see what we mean by "modification." What are we doing to the amendment?

Mr. LONG. In other words, my thought is if someone wants to see what the changes are, why do we not agree to vote on what is printed here and then bring the modifications in tomorrow and we can give unanimous consent to modify it.

Mr. GRAMM. What if we do not get it?

Mr. BYRD. Mr. President, we just cannot start down this road. I apologize to the majority leader. I did not know that was what we were going to do. Understand that if we were going to agree to something now to vote on the amendment as modified, we have not seen what the modification is. In that modification I am sure there will not be line item veto, Davis-Bacon, or whatever. But we have not seen that package. We cannot agree to it sight unseen.

I thought "as modified" meant as modified by the modification that was made on Friday afternoon, which we all know and have read. We know what it is. But that is "as modified" or amended, if amended, because we see the amendments. We vote on them by voice or by unanimous consent or by rollcall or by division. But now to come and say that we will agree to vote at a certain hour on that amendment as modified and we go beyond what modification really is, we cannot do that.

Mr. DOLE. If the Senator will yield at that point, I think there may be a misunderstanding. What we have done is what was requested or suggested in the Democratic offer and Republican counteroffer. It has the Republican counteroffer proposed to include Byrd-Chiles Senate rules changes which is the one that Senator DOMENICI just referred to, that adjustment; the Bentsen committee jurisdiction adjustment, which they have been working on for 2 days bipartisan, everyone has been in there; the Kerry CBO study which was to be a part of that. He now wants to offer it separately.

If any of these changes are not acceptable to the Democratic cosponsors they must be allowed to offer their amendments. Then, as I understand, Senator MOYNIHAN has been around to visit about the CCC amendment. All these suggestions came from that side of the aisle.

Mr. GRAMM. That is exactly right.

Mr. BYRD. I hope the majority leader will not misunderstand me. Let us take the Byrd amendment, which has to deal with the waiver provision which would require that we pass a law by way of a joint resolution, which the President could veto, rather than be able to waive a particular provision, let us say, of the Budget Act through current rules. I must say to the majority leader, I would not dream of putting this Byrd change into a package that Senators have not seen.

May I say that if a Senator offers an amendment and the chairman says, "I am willing to accept the amendment," and the ranking minority member says, "I am willing to accept the amendment," that does not get it in the bill. It still has to be voted on by the Senate. It still has to be a Senate action, not the action of just two managers who may be willing to accept it.

We talk about modification here. We all may agree on a package, but we still have to vote on that package one way or anther. We cannot agree by unanimous consent to a modification that we have not seen.

I do not know what is in that modification. It is for the protection of the majority leader and others on that side of the aisle, as well as for those on this side of the aisle, that I raise this issue.

Mr. DOMENICI. Mr. President, will the distinguished minority leader yield?

Mr. BYRD. I yield.

Mr. DOMENICI. Let me say to my friend from West Virginia, I have regularly told our leader that if he is going to enter into a unanimous-consent agreement, he ought to use these words "as modified" because I have been asked by him, by many Senators here to work on the Bentsen proposal, to work with RUSSELL LONG, to work with BOB PACKWOOD, and I have been doing that. When the leader put in his unanimous-consent request as modified, I want the distinguished Senator to know that was at my request. The Senator may quite properly perceive that "as modified" meant to him as modified last Friday. Frankly, it has been further modified on the floor. I think that is further possibility that that is a modification to a modification.

Mr. BYRD. That is an amendment if it is done on the floor.

Mr. DOMENICI. But it is now part of that modified bill. I clearly said we have to sit down here in the morning and look at those four or five that we have drawn as we have just described it and that is what I intended by the word "modified," and I clearly understand what it means. I mean I really greatly appreciate the Senator who has been here for a lot longer than I have telling me what amendments mean and what happens on the floor when two managers agree. I understand all that. I do not want to mislead the Senator and I did not intend to mislead the leader when I say you must put "as modified" in. It means to me what I have just described.

I do not have the draftsmen here. They are still up there drafting very complicated references. It may be done by now. They may be asleep up there in their rooms. It is 3 o'clock in the morning. But I cannot tell what they are in detail until the morning. I can tell the Senator, with few exceptions, they are about what we have discussed here. However the Senator wants to resolve that issue so we can vote on it. I merely tell him what I asked the leader to do.

Mr. BYRD. I thank the distinguished Senator. Let me say this: I am sure that the Senator would not want this to happen. Let us say that Mr. CRANSTON and I and Mr. MELCHER, Mr. ZORINSKY, Mr. DODD, and Mr. KERRY agree on three or four changes we will make and then we turn to Mr. DOLE and say, "This is our package. We have all agreed on it." Then that is taken to the desk as a modification. The Senator from New Mexico has not seen it. The Senator from Texas has not seen it. That is just not the way we do business in the Senate.

Mr. MELCHER. Will the leader yield?

Mr. TRIBLE assumed the Chair.

Mr. BYRD. I do not impugn anyone's motives, but the only modification I have ever heard of is an action that the Senate agrees to. A Senator offers a bill, or an amendment. If he offers an amendment and he wishes to modify it, if no action has been taken on it, the yeas and nays have not been ordered, he can modify it. He does not have to ask unanimous consent. But that action is right out in the open, in front of everyone. That is a modification.

If Mr. DOLE offers an amendment and he wants to modify it, he can modify it until he gets the yeas and nays on it. After that, he can only modify his own amendment by unanimous consent.

Otherwise, he can offer an amendment, he can amend his own amendment, but he cannot modify his own amendment if any action has been taken on it.

But for a group of Senators, with the best of intentions, to get together and say, "We have worked out a modification; BYRD's waiver provision is

taken care of," that cannot be a modification.

And when the Senator says, "The amendment, as modified," well, I am thinking it is that modification that took place last Friday which I read in the RECORD. I knew about it. I knew what they were doing.

We cannot just have among a group of Senators an agreement that they will modify the Rudman amendment, take it to the majority leader and have it become a modification at the desk—with no Senate action. I am sorry, I must say to the majority leader, I can only agree to the amendment as it was officially modified.

Mr. RUDMAN. Will the minority leader yield?

Mr. BYRD. If you want to ask unanimous consent——

Mr. RUDMAN. I just want to ask a question.

Mr. BYRD. No; I am saying if any Senator wishes to ask unanimous consent that this modification be included, then I would say, "Reserving the right to object, what is in it? What is in the modification?"

We do that all the time. But we cannot agree to that modification if we have not seen it; I have not seen it.

Mr. RUDMAN. Will the Democratic leader yield for a question and a comment?

Mr. BYRD. Yes.

Mr. RUDMAN. I understand precisely what the Democratic leader is saying. And what he is saying is correct in the sense that it would be difficult to agree, not having seen the final document.

Thus, I would like to pose a possible solution in the form of a question to the leader, to both leaders. We do have pending at the desk a modified amendment which is what the Democratic leader thought we were referring to. Why not simply have this unanimous-consent agreement tonight, which is referring to these things, refer to that modified amendment, as is the understanding of the Democratic leader, knowing full well that when we arrive here in the morning, the very things contained in the modification that the chairman of the Budget Committee has been working on, and many people on the other side of the aisles, have all been agreed to.

Mr. BYRD. By whom?

Mr. RUDMAN. By those individuals.

Mr. BYRD. Yes.

Mr. RUDMAN. If, after looking at those, there is disagreement, then obviously we would want to retain the right at that point not to vote on that particular amendment until we worked that out. Because it is my belief that when morning comes and when the Democratic leader and the people on his side and this side see what those modifications are, they will quickly agree.

Mr. BYRD. Mr. President, whatever the Senate wishes to agree to is fine. But we cannot say tonight that we will agree to that modification. We cannot agree to that. Certainly, whatever the Senators have agreed upon as modifications, what they would like to have included, should be examined. We would like to take a look at them. Then the Senate could act on them. They could ask unanimous consent in the morning for whatever changes they would like. That is fine. It is still the Senate that has to act upon it, to ask unanimous consent that such-and-such be changed. Any Senator could reserve the right to object. He might want to see for himself what the changes are. He could object or not.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BYRD. I have the floor. I will yield to the majority leader. I will yield the floor.

Mr. DOLE. No; that is fine.

But in looking at the sheet that the distinguished minority leader gave me earlier—and this is what I was reading from—the amendment as modified be considered original text for the purpose of further amendment. If that is the case, then I do not see any problem. We will consider the amendment at the desk. There can be further amendments if there is no objection. And I think most of the amendments to be offered are all from that side of the aisle.

But I certainly agree with the distinguished minority leader; he has a right to look at the one specific amendment that he was interested in and that is the rule amendment. He may not agree with an agreement somebody else worked out.

So why can we not agree, then, to do as suggested here, that the Senate proceed to vote on the Gramm-Rudman-Hollings amendment, as modified, and that the amendment at the desk be considered original text for the purpose of further amendment. And then when the distinguished chairman of the Budget Committee meets with the same group he has met with—I do not know if everybody has to approve every amendment. I have not seen any of the amendments on that side. But we are willing to proceed. But I should think, particularly in the case of rules change which you have raised, you have not agreed to that and you should not be expected to.

Mr. BYRD. May I say to the distinguished majority leader, the majority leader does not see every amendment. That is true. No Member here can vouch for every amendment. But we should all have the opportunity to see the amendments or have an understanding of them. Of course, we also trust the managers of the bill to do what is right.

But, if I understand the distinguished majority leader now, we are talking about the Rudman amendment, as modified on last Friday and as shown in the RECORD, the modification, whoever modified it—I believe it was the Senator who modified it.

Mr. DOLE. It was modified and there will be amendments tomorrow morning. It will be further amended. Senator LEVIN has an amendment, Senator KERRY has two amendments, Senator EXON has an amendment. There will be a lot of attempts to amend it. Senator MELCHER has an amendment.

Mr. BYRD. An amendment, as amended.

Mr. DOLE. Yes.

Mr. MELCHER. Will the minority leader yield for a question?

Mr. BYRD. Will the majority leader allow me to yield?

Mr. DOLE. Yes.

Mr. MELCHER. Mention has been made of a modification of the Gramm-Rudman-Hollings amendment in relationship to the Credit Commodity Corporation. And while several of us have stated that we assumed that what this amendment, this proposal, was attempting to do would be to spread equally any cut in the Department of Agriculture in those various sections covered by the Budget Act, spread it evenly, and that such an amendment or modification, whatever term you wish to use, would be drafted. However, I have not seen it. The distinguished ranking member of the Agriculture Committee has not seen it. We know what the intentions are. However, I feel very hesitant to agree to something without having looked at the language and analyzing it to see whether or not it does do exactly that; spread it evenly.

We could have, if it is left to the discretion of this particular administration, they would probably wipe out most of the dairy programs, or a good chuck of it. But this is permanent law if it is enacted. The next time we might want to wipe out the wheat program, which I would have a great concern about and I assume some others would.

So I do not want to see any piecemeal arrangement where we just say, "Well, we will take everything as modified except the particular point the distinguished leader is interested in." I am also interested in the CCC part of it. I would like to see the language, like to have it analyzed, and like to see that it does exactly as all of us have been talking about, spreading it evenly across the board.

Mr. BYRD. I thank the distinguished Senator.

Mr. MELCHER. I thank the distinguished leader for yielding.

Mr. DOLE. Can we agree—I did not draft this. It was handed to me.

Mr. BYRD. As written, Mr. Majority Leader.

Mr. DOLE. You have no problem.

Mr. BYRD. That is all right if we have a clear understanding as to what the phrase "as modified" means. It has always to my knowledge had the meaning that I have given to it, and the definition that I have given to it. It has never, to my knowledge, meant that a group of Senators, no matter how well intentioned, could agree among themselves that they would make certain changes, then take them to the desk, and put them in that measure without the Senate's having acted thereon. Action has already been taken on the Gramm-Rudman-Hollings amendment. It could not even be modified now by the offerer without unanimous consent because action has been taken on it. We just cannot do what, as I understand it, was about to be done.

I do not ascribe any motives to anyone. I think Senators probably felt that it was appropriate, and all right to do it that way. But to do that would be to legislate by less than the full Senate. It would be an action in the form of enacting a law by virtue of three Senators, or 6 or 8 or 10 getting together, agreeing among themselves and just putting an extra package at the desk, and say this is our modification. Then we come along, and we agree to the Gramm-Rudman-Hollings amendment, as modified. And in that modification is not only the action that was taken on Friday by the offerer of the amendment, which was appropriate, but also a lot of other language that could have who knows what in it—Davis-Bacon, you name it, farm price supports, whatever. That would be a modification. But the Senate would be acting without knowledge as to what is being modified.

Mr. DOLE. As I understand we are willing to limit that amendment at the desk as modified, and it be considered as original text for the purpose of further amendment. There will be amendments starting at 9 something tomorrow if we get this amendment on Melcher-Kerry-Dodd on the other side, and there will be additional amendments after disposition of that amendment.

Mr. BYRD. If the distinguished majority leader will yield, I will say this and no more. It is a little bit like agreeing to technical amendments. But instead of just technical amendments, there are also substantive amendments. So we agree to technical amendments, and some one or more Senators or staff people could with the very best of intentions, I guess, put something in as a substitute, and the Senate would have agreed to it.

Mr. DOLE. Mr. President, I would amend that request to ask unanimous consent that it be considered en bloc because there was a previous motion to divide the amendment by the distinguished Senator from Connecticut.

The PRESIDING OFFICER. Is there objection to that request? Without objection, it is so ordered.

Mr. DOLE. As I understand, we come in at 8:30 in the morning. We will have a special order by the distinguished Senator from Wisconsin. There will be leaders' time, 5 minutes for Senator GLENN, and I will reserve my time. Then we will take up the Levin amendment, the Kerry CBO study, and we will have a vote on the Exon trigger before we recess at 10:15 for the joint session of Congress. We will come back, and have disposition of the Melcher-Dodd-Kerry amendment. Then we will come back and move to the leadership amendment.

Following that, we will dispose of the Melcher-Dodd-Kerry amendment, and then move to the Gramm-Rudman amendment, as modified. Hopefully, at that time, we will be able to work out something where the distinguished Senators from Louisiana, Colorado, and Oregon can work out the extension. Hopefully, that would occur at about 3:30. We could dispose of that by voice vote.

Then in the meantime, we will try to wrap up the balance of our agreement. As I understand, the distinguished minority leader would agree that we need something to amend.

I ask unanimous consent that immediately following the Proxmire special order, the Gramm-Hollings-Rudman amendment be laid down.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ZORINSKY. Mr. President, will the balance of the list of amendments be concluded?

Mr. DOLE. Yes. We have been trying to work out where we would have final passage at say 4 or 5 o'clock on Thursday but we sort of got hung up on the debt ceiling matter. We hope to resolve that tomorrow, and then conclude the agreement.

Mr. ZORINSKY. Thank you.

Mr. DOLE. Mr. President, I ask unanimous consent that the unanimous-consent request that has been approved by the distinguished minority leader by both sides be considered en bloc and appear separately in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS

Mr. DOLE. Mr. President, earlier I had indicated we would convene at 9 o'clock. If we are to have a vote on the Exon amendment, prior to the recess, I ask unanimous consent that the Senate convene at 8:45 a.m.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

RECESS UNTIL 8:45 A.M.

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that the Senate stand in recess until 8:45 a.m. today.

The motion was agreed to; and, at 3:19 a.m., the Senate recessed until Wednesday, October 9, 1985, at 8:45 a.m.

NOMINATIONS

Executive nominations received by the Senate October 8, 1985:

THE JUDICIARY

Carolyn Miller Parr, of Maryland, to be a judge of the U.S. Tax Court for a term expiring 15 years after she takes office, vice William M. Fay.

B. John Williams, Jr., of Virginia, to be a judge of the U.S. Tax Court for a term expiring 15 years after he takes office, vice Howard A. Dawson, Jr.

IN THE COAST GUARD

The following Regular officers of the U.S. Coast Guard for promotion to the grade of captain:

Peter K. Valade
Carl R. Mockler
Andrew F. Hobson
David H. Amos III
Rene N. Roussel
Frank M. Chliszczyk, Jr.
Laurence J. Murphy, Jr.
Theodore M. Nutting
Leon K. Thomas, Jr.
Kenneth J. Morris
Garran C. Grow
William M. Simpson, Jr.
Thomas E. Yentsch
Cecil W. Allison
Arcangelo V. Arecchi
Frederick M. Hamilton
Douglas Teeson II
Laurence H. Somers
Glenn E. Serotsky
Paul M. Blayney
Carl H. Helman III
Howard A. Newhoff
Randall D. Peterson
Thomas E. Omri
Richard B. Chapman
Sperry C. Storm
Joseph P. Coleman
Carl H. Pearce
Robert W. Scobie
Wallace S. Worthington
Eugene K. Johnson

Ahearn, Francis W., xxx-xx-xxxx
Alexander, Roger A., xxx-xx-xxxx
Alison, Thomas M., xxx-xx-xxxx
Allen, Lewis H., III., xxx-xx-xxxx
Almquist, Tommy B., xxx-xx-xxxx
Anderson, Ruth M., xxx-xx-xxxx
Angell, John E., Jr., xxx-xx-xxxx
Anno, Stephen E., xxx-xx-xxxx
Arceneaux, Ronald J., xxx-xx-xxxx
Ardillo, Nick P., Jr., xxx-xx-xxxx
Ardis, Wesley R., xxx-xx-xxxx
Armstrong, John E., xxx-xx-xxxx
Arnold, John E., xxx-xx-xxxx
Arrison, John R., xxx-xx-xxxx
Ash, Robert K., Jr., xxx-xx-xxxx
Ashbaugh, Dennis M., xxx-xx-xxxx
Astor, Wally G., xxx-xx-xxxx
Atkins, William D., Jr., xxx-xx-xxxx
Atwood, Argyle P., Jr., xxx-xx-xxxx
Bailey, Edward L., Jr., xxx-xx-xxxx
Baker, Vincent T., xxx-xx-xxxx
Ball, James A., xxx-xx-xxxx
Barbeau, Jack W., xxx-xx-xxxx
Barnes, Albert M., xxx-xx-xxxx
Bash, Donald C., xxx-xx-xxxx
Bash, James C., xxx-xx-xxxx
Bashant, Ronald W., xxx-xx-xxxx
Beard, Preston S., xxx-xx-xxxx
Beasley, John T., xxx-xx-xxxx
Bednarz, Michael H., xxx-xx-xxxx
Begert, William J., xxx-xx-xxxx
Beggs, Paul L., xxx-xx-xxxx
Bender, William C., xxx-xx-xxxx
Benham, Clarence, Jr., xxx-xx-xxxx
Benson, David E., xxx-xx-xxxx
Bergeman, Gerald M., xxx-xx-xxxx
Bergren, Scott C., xxx-xx-xxxx
Beu, Norman J., xxx-xx-xxxx
Beverly, Gerald M., xxx-xx-xxxx
Billones, Louis R., xxx-xx-xxxx
Bishop, Donald W., xxx-xx-xxxx
Blair, James D., xxx-xx-xxxx
Blanks, Randolph M., xxx-xx-xxxx
Block, William H., xxx-xx-xxxx
Bolz, Larry F., xxx-xx-xxxx
Bondaruk, Henry A., Jr., xxx-xx-xxxx
Borah, Steve B., xxx-xx-xxxx
Boston, William E., III., xxx-xx-xxxx
Bowen, Ronald S., xxx-xx-xxxx
Bower, Robert C., xxx-xx-xxxx
Bowers, John V., Jr., xxx-xx-xxxx
Brantner, John A., xxx-xx-xxxx
Braswell, Nancy S., xxx-xx-xxxx
Brauer, Richard F., Jr., xxx-xx-xxxx
Bridges, Mark E., xxx-xx-xxxx
Britan, Joseph K., xxx-xx-xxxx
Brower, Stephen A., xxx-xx-xxxx
Brown, Kenneth N., Jr., xxx-xx-xxxx
Brown, Richard J., xxx-xx-xxxx
Buchanan, Timothy G., xxx-xx-xxxx
Buck, Donald L., xxx-xx-xxxx
Bump, David G., xxx-xx-xxxx
Bunger, Allen D., xxx-xx-xxxx
Burrows, William E., xxx-xx-xxxx
Byers, Norman P., xxx-xx-xxxx
Cahill, Lawrence J., Jr., xxx-xx-xxxx
Callens, Pierre A., xxx-xx-xxxx
Cantrell, Ronald L., xxx-xx-xxxx
Capps, Thomas E., xxx-xx-xxxx
Carpenter, Newton L., Jr., xxx-xx-xxxx
Carr, Philip T., xxx-xx-xxxx
Carr, Virgil J., Jr., xxx-xx-xxxx
Case, Thomas R., xxx-xx-xxxx
Cathey, William H., xxx-xx-xxxx
Charlton, Hugh J., xxx-xx-xxxx
Cherry, Charles E., xxx-xx-xxxx
Chojnacki, Raymond, xxx-xx-xxxx
Cirino, Alan B., xxx-xx-xxxx
Clapper, John R., xxx-xx-xxxx
Clark, Howard A., xxx-xx-xxxx
Clark, James C., xxx-xx-xxxx
Clark, Richard D., xxx-xx-xxxx
Clarke, Sidney H., xxx-xx-xxxx
Cleland, Thomas E., Jr., xxx-xx-xxxx
Cobb, William P., xxx-xx-xxxx
Cochoy, Robert E., xxx-xx-xxxx
Cochran, James E., xxx-xx-xxxx
Cockerham, Warren E., xxx-xx-xxxx
Cole, Richard T., xxx-xx-xxxx
Cole, Robert A., xxx-xx-xxxx
Colestock, Harry E., III., xxx-xx-xxxx
Collins, Orville M., xxx-xx-xxxx
Condit, Dale O., xxx-xx-xxxx
Cone Wallis D., Jr., xxx-xx-xxxx
Conlan, George I., xxx-xx-xxxx
Conn, Richard D., xxx-xx-xxxx
Connor, Michael A., xxx-xx-xxxx
Conques, Duane L., xxx-xx-xxxx
Contreras, Raymond T., xxx-xx-xxxx
Coolidge, Charles H., Jr., xxx-xx-xxxx
Cope, Robert S., xxx-xx-xxxx
Corbett, James D., xxx-xx-xxxx

EXTENSIONS OF REMARKS

IMPORT RESTRAINTS DON'T HELP INDUSTRY

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. SCHULZE. Mr. Speaker, I want to call to the attention of every Member of the House an excellent article from the New York Times that appeared on October 1. The article, written by W.R. Wilson, president and CEO of Lukens, Inc., demonstrates precisely why the President's Voluntary Steel Import Program isn't working.

As Bob Wilson points out so clearly, a major problem with the program is "category-switching." This practice allows exporters to substitute higher-valued steel for lower-valued steel, without violating their voluntary quotas. Lukens and other steel companies have been hit particularly hard by this practice. For example, imports of high-valued alloy plate steel from East bloc countries have skyrocketed under the President's program, up nearly 10 times over the level of just a year ago.

Bob Wilson's article shows why much more needs to be done. Either the administration must take more vigorous action or Congress will have to act on its own.

Mr. Speaker, I ask that the article from the New York Times of October 1, 1985, be printed in the RECORD.

IMPORT RESTRAINTS DON'T HELP INDUSTRY

(By W.R. Wilson)

COATESVILLE, PA.—To understand the frustration that fuels the protectionist fervor in Congress, it is instructive to examine why voluntary restraints on imports favored by President Reagan do not help American industry. The case of steel producers is a good lesson.

Charles Blum, a United States trade negotiator, said this month that the 14 voluntary restraint agreements negotiated this year with foreign steel makers gave "the American steel industry a chance—probably its last chance—to put its house in order." He said: "The monkey is now on the back of the domestic industry."

The truth, however, is that the ballyhooed voluntary restraints have offered more monkey business than real relief, even where modernized and restructured steel companies—those that have already put their houses in order—are concerned.

One year ago, the President derailed an attempt by Congress to impose quotas on steel imports. Mr. Reagan pressed for voluntary restraints on imports that would reduce imports to 18.5 percent of the domestic market. In response, the steel industry agreed to drop its legal efforts to end unfair trade despite a finding by the International Trade Commission that domestic steel makers had, in fact, been injured by imports.

Nevertheless, the President's trade enforcers, through a complex array of exceptions, delays and compromises, have managed to snatch failure from the jaws of success. The Administration's program is not working, for the following reasons:

First, overall import levels have not declined in the way the Administration promised. Through the middle of 1985, steel imports were still skimming 26 percent of our domestic market, some 7.5 percentage points above the level the President targeted last year. Each percentage point represents roughly a million tons of steel, and, according to the Congressional Research Service, for every million tons that are imported, 9,400 American jobs in steel and related industries are lost.

The chief culprit is the so-called front-end loading process. In anticipation of the import restrictions, foreign producers saturated their order books. United States negotiators let them fill these last-minute orders by loading exports in the first years of the five-year arrangements.

A second reason the program has not worked is that every time an unfair exporter is brought under control, another abuser takes its place. The Administration has negotiated arrangements with 14 steel-producing countries, but imports in the first half of this year came from 76 countries including 18 without steel mills.

By far the largest increase has come from Eastern bloc countries. With respect to steel plate, for example, Rumania, East Germany, Poland, Hungary, Czechoslovakia and Yugoslavia accounted for 35.6 percent of total imports through June 1985, up from 2.6 percent in the same period in 1984.

Even people who argue that trade relationships with our European and Japanese allies justify some sacrifice of American jobs find it difficult to explain why Eastern bloc nations should be allowed to profit so handsomely at our expense.

Perhaps the program's greatest deficiency is that it undermines a guiding principle of steel stabilization—that import relief would enable American industry to modernize in order to compete more effectively with foreign steel makers. The President's program has the opposite effect: Companies that have already paid the price of modernization are being hurt the most.

Consider the Lukens Steel Company, a Pennsylvania corporation with annual sales of $300 million. Since 1979, Lukens has streamlined its operations by cutting the salaried workforce in half, increasing furnace productivity by 150 percent, reducing energy use by 24 percent and improving worker productivity by more than 23 percent. It uses the most modern electric furnaces.

Lukens's chief products are carbon-plate steel and a higher valued alloy-plate steel. When President Reagan restricted exports, his trade negotiators did not differentiate between carbon and alloy plates, thus allowing foreign mills to fill their import allotments with a greater percentage of high-value, alloy-plate products. The effect on the domestic alloy-plate market has been dramatic: Import penetration of alloy-plate steel has risen from 7.9 percent in 1983 to the current annualized level of 32 percent, thereby completely undermining the intent of the negotiated steel arrangements.

These imports threaten to knock the legs from under even modernized American companies just as they begin to recover from the recession. Demand for steel, which perked up in the recent recovery, is beginning to fade. By permitting foreign competitors to import these high-value steel products, all in the early years of the five-year contracts, the Administration has allowed foreign mills to skim the cream off the recovery.

Modernized American steel companies such as Lukens can compete on equal terms with foreign mills that sell their products at prices that cover production and marketing costs. Domestic companies cannot hope to compete with subsidized and government-controlled steel industries. And they certainly cannot justify additional capital expenditures if subsidized imports depress prices below costs for even the most efficient American manufacturers.

Unless voluntary restraints can truly reduce imports and in a way that is fair to producers in the United States, it is likely that the clamor for protectionism will grow even louder.

PERSONAL EXPLANATION

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. BARNES. Mr. Speaker, I was absent from the House on Monday, October 7, and would like to indicate my positions on votes taken on that day.

On rollcall No. 338, the Emerson amendment to H.R. 2100, the farm bill, making cuts in the Food Stamp Program, I was paired against the amendment and would have voted "no."

On rollcall No. 339, the Gingrich amendment, I would have voted "no."

On rollcall No. 340, the Frank amendment, I would have voted "aye."

On rollcall No. 341, a motion to suspend the rules and pass the bill H.R. 3174, relating to military malpractice insurance, I would have voted "yea."

THE STARTING PLACE

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. SMITH of Florida. Mr. Speaker, it is with great pleasure and pride that I announce the opening of the newly expanded residential building at the Starting Place in

Hollywood, FL, on October 13, 1985. This new facility houses 40 adolescent clients who are dedicating the next several months of their lives to this highly commendable program. It also signifies a genuine commitment to the rehabilitation of those young people who have fallen under the influence of drugs and alcohol and implements a much needed effort to make them productive, honest members of our community.

The Starting Place is one of the largest, most comprehensive mental health facilities of its kind in the State of Florida. It is presently celebrating 15 years of helping clients and families throughout Broward, Dade, and Palm Beach Counties. I am proud to announce that the recovery rate is at 79 percent, a number that far exceeds the national figure. Developed and brought to conception in 1970, the Starting Place began as a volunteer-staffed drop-in center for people needing to talk about their problems. Over the years, the Starting Place, as a mental health facility specializing in drug and alcohol rehabilitation, has helped thousands of individuals turn their lives around.

The Starting Place has five units, three of which focus on adolescents aged 12 to 18 who are involved in substance abuse. In these programs, the therapeutic process takes place in group, individual, and family counseling sessions. Parental involvement is an integral part of this process. It is incorporated through multifamily and parent groups that provide the acquisition of parenting skills and insight into family conflicts and solutions. All units are highly structured and include classroom time with certified Broward County schoolteachers. Upon graduation, credits are transferable. All programs are geared toward teaching clients the skills necessary to gain confidence, to feel pride, to function academically, and to cope effectively with the stresses of everyday life.

The Daycare Adolescent Program provides for intensive therapeutic intervention while maintaining family stability. Young people attend sessions Monday through Friday, 10 hours each day, for a minimum of 6 months. Structure is provided for the youth, while the family is given the opportunity to work on problems in a therapeutic environment. This process aids in regaining familial cohesion and individual direction.

The most recent addition to the Starting Place is the innovative PLUS [practical living and usable skills] procedure. This 9 to 12 week model residential program offers vocational training in the areas of data calculating and recording, computer skills, office skills, auto maintenance, building maintenance, food management, and water safety and first aid. This unique setting gives clients the opportunity to learn the practical life skills necessary to cope in the everyday world.

The centralized intake and referral unit processes almost all of the mental health needs of the whole community, regardless of the specific program a person's needs require. Notably, this unit is used for the entire drug abuse network in Broward County.

Outpatient care is designed to allow the adult and school-aged client to continue with normal, everyday activities while receiving counseling for what may or may not be the result of substance abuse. Outpatient services include individual, family, and group counseling.

Mr. Speaker, drug and alcohol abuse is one of the most serious epidemics this country has ever known. It is a threat which pervades all classes of society. At one time in our history, the high price of drugs made it a problem of only the upper class. Then, it was thought that the rich were merely recreational users and that the real problem lay in the depths of the impoverished who resorted to crime to support their drug habits. The truth is, with the plummeting price of drugs, everybody can now afford to get high, to get sick, to lose their grip on reality, and eventually to become addicted.

Millions of this country's youth are users of alcohol and illicit drugs. They invariably suffer severe consequences which destroy not only their lives, but their families as well. In the long run, it is the community as a whole which suffers, since without healthy, sober youth, there is no worthwhile future. If we allow the seduction of a generation into the drug culture, we will be experiencing the after effects for decades.

There is really only one thing which will have a real impact on the situation: new, creative, innovative rehabilitation and prevention programs such as the Starting Place. In its purest sense, it is a program which takes young people with drug, school, and family problems and gets them straight.

But the cost of getting straight is not cheap. In reality, it can be truly prohibitive, and the bottom line is that current Federal resources are not enough. The success of any drug rehabilitation program ultimately depends on the dedication and the commitment of public organizations, private businesses and, of course, individual citizens.

So far there has been a consolidation of these efforts and progress has been made. The Starting Place is living proof of that. The drug rehabilitation network in the United States has grown significantly in recent years. In 1968, just 183 programs existed. By April 1984, almost 3,000 rehabilitation programs received some Government assistance. Reported financing for these programs in fiscal year 1984 exceeded $1.4 billion: 21 percent of which was provided by the Federal Government; 57 percent was provided by the State and local governments; and 22 percent by the generous donations of the private sector. But, as significant as this growth in rehabilitation funding may be, it is still disturbing because it indicates that a large segment of society, especially the young, continues to abuse drugs.

In 1984, Congress approved and the President signed into law a measure that extended the alcohol, drug abuse and mental health block grant for 3 years. Appropriations for fiscal year 1985 were $515 million. Fiscal year 1986 should see appropriations increase to $545 million. By fiscal year 1987, the Federal Government will be appropriating $576 million for this grant.

The numbers may seem high, but we all know how thinly this money is spread. Sheldon Shaffer, the able and dedicated director of the Starting Place, will attest to that. It was no small feat to raise the money needed to carry out his plans and build this facility. But perseverance and commitment by all involved has certainly prevailed. October 13 will be, without a doubt, a very important milestone. It is after all, a new starting place for the Starting Place.

I hope that this will result in increased public awareness of the problem, an understanding of what needs to be done, and a willingness to do something about it. Unfortunately, the problems of drug and alcohol addiction often seem distant and insignificant until they happen to someone you care about. It is imperative that this attitude be changed.

We all must recognize that it is our collective responsibility to support this cause. I urge my colleagues in Congress to support increased financial backing for programs, such as the Starting Place, that are dedicated to rehabilitating drug abusers. If we shirk this responsibility, the impact will affect all of our families, our communities, and the future of our Nation.

I sincerely applaud the efforts and accomplishments of the Starting Place and especially the young people who have worked so hard to build better lives for themselves. I wish them the best of luck in their new facility and pledge my continued support.

WHY THE REAGAN DOLLAR INITIATIVE WON'T DO THE TRICK

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. PEASE. Mr. Speaker, on Sunday, September 22, the administration reversed course and acknowledged indeed that the dollar is our paramount trade problem. In a five nation economic summit in New York City, the following was purportedly agreed to:

Coordinated foreign exchange market intervention to push the dollar down, and

A vague commitment by Japan, France, Germany and the United Kingdom to expand their domestic economies.

The following day, the dollar dropped nearly 5 percent as the markets panicked and the various central banks intervened. On that same day, the finance ministers from some of these countries publicly disavowed any specific commitment to stimulate their economies.

Since then, the dollar has declined several more percentage points in mixed trading.

Will intervention in the foreign exchange markets cure the dollar problem—this is,

bring the dollar down another 20 percent to 25 percent?

Yes, at the cost of significantly higher inflation a year or two down the road. The reason for this is that foreign exchange intervention means the central banks around the world sell (or increase the supply of) dollars in order to depress their price in world currency markets. Currency markets are essentially like any other market. They are governed by rules of supply and demand. When these central banks sell dollars, they are increasing the dollar-denominated money supply. They are effectively printing money. But this is exactly what the Federal Reserve has refused to do all along with regard to the budget deficit. Interest rates have remained high in this country because Chairman Volcker has thus far refused to pay for the budget deficit by printing money for fear of reigniting inflation.

Normally, central banks have the option to neutralize the inflationary side-effects of foreign exchange intervention by tightening credit domestically. This is called sterilization. When sterilizing foreign exchange intervention, central banks sell dollars (increase their supply) in the international currency markets at the same time that they mop up the resulting excess liquidity by tightening the money supply at home.

Sterilization is clearly not an option for the Fed these days. With the economy not growing very much, tightening the money supply in the presence of undiminished borrowing by the Treasury (on account of the budget deficit) would mean higher interest rates. These higher rates might not only throw the economy into a recession, but also defeat the original purpose of the foreign exchange intervention: lowering the dollar. Hence, relying exclusively on foreign exchange intervention to bring the dollar back into alignment could be profoundly counterproductive.

The fundamental reason for severe currency misalignments is divergent national macroeconomic policies. Foreign exchange intervention merely treats the symptoms of the problem. The only real cure is the coordination or harmonization of the economic policies of the major trading nations. The higher the share of foreign trade in our GNP, the more important this coordination becomes. Accordingly, as the major source of international economic divergence today, the U.S. budget deficit stands in the way of the dollar's realignment.

In the absence of a reduction in the budget deficit, the administration's request to Japan, the United Kingdom, France and Germany to stimulate their domestic economies is more a plea to compensate for rather than coordinate with U.S. economic policy. The only option available to these countries is to expand their budget deficits, since lowering their interest rates would only lead to a weakening of their currency (the opposite of what is sought). But France and the United Kingdom have been fighting for years to lower their public sector deficits and Germany is acutely sensitive to any policy that could be construed as inflationary.

It is no wonder their finance ministers disavowed a commitment to the Reagan administration to stimulate their economies. The type of international economic coordination that is needed is a worldwide reduction in interest rates. This is plainly impossible without a reduction in the U.S. budget deficit, since it is the attendant borrowing by the U.S. Treasury which has caused the high rates in the first place.

The budget deficit is currently nearly $200 billion per year. If one subtracts defense, Social Security/Medicare and interest on the national debt from the current budget, one is left with approximately $250 billion. Clearly, the President's emphasis on spending reduction to reduce the deficit is empty rhetoric. Either some sort of revenue increase is needed or nearly all domestic programs will have to be slashed. The only other option is to do nothing. In this case, not only would interest rates and the dollar remain high but interest on the national debt would quickly get out of hand. Interest is presently roughly $150 billion per year. Without a reduction in budget deficits, interest could be $300 billion to $400 billion on a national debt of $3 trillion to $4 trillion by the early 1990's. This is a sure recipe for economic disaster in the form of either hyperinflation or an unacceptable contraction of private credit leading to recession/depression.

Accordingly, our trade deficit and rapidly growing foreign indebtedness are only the first visible installment of the costs accompanying continuing excessive fiscal deficits. These deficits were caused by the failure of Mr. Reagan's "supply side" tax cuts to pay for themselves as promised in the 1980 campaign. For the past 3 years, they have effectively provided foreign exports with a 25 percent to 40-percent price advantage over American goods. As a result, many Americans in import-competing industries are losing their jobs largely for reasons having nothing to do with productivity, competitiveness or the unfair trading practices of foreign countries. Their government is indirectly subsidizing the foreign competition by a large margin. As the father of this subsidy, Mr. Reagan bears much responsibility for their plight and for the protectionist sentiment sweeping the country.

However, the President has refused to assume this responsibility and thereby face up to an honest mistake. He spurns and threatens to politically exploit even moderate attempts by congressional Republicans and Democrats alike to responsibly address the problem. Meanwhile, factories continue to close and workers continue to be laid off.

Something needs to be done to force the President to become part of rather than an obstacle to the solution to our budget and trade deficit problems. I will be introducing legislation on Thursday, October 10, to do just that.

THE LEGACY OF FEDERAL INDIAN POLICY

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. DORGAN of North Dakota. Mr. Speaker, we will soon celebrate Columbus Day to honor a brave, 15th century explorer, who thought he had found a sea route to Asia. What Columbus unwittingly discovered was the Western Hemisphere, with its multitude of native tribes and nations, numbering perhaps 10 million people.

In the 500 hundred years since the European discovery of the Western Hemisphere, we have seen a checkered history of policy toward Indian peoples. Since Congress holds the constitutional responsibility for Federal Indian policy, I believe that we should understand how past policies affect our current trust responsibilities.

Recently, the National Congress on American Indians testified before the House Select Committee on Children, Youth, and Families and presented a useful survey of the highlights of Federal Indian policy. I would like to commend to my colleagues excerpts of this broad overview, in the hope that it can help us to shape more constructive policies in the future.

The excerpts follow:

STATEMENT OF SUZAN SHOWN HARJO, EXECUTIVE DIRECTOR, NATIONAL CONGRESS OF AMERICAN INDIANS BEFORE THE HOUSE SELECT COMMITTEE ON CHILDREN, YOUTH, AND FAMILIES, SEPTEMBER 26, 1985

Mr. Chairman and Members of the Committee, I am pleased to appear before this Committee to discuss the experiences of Indian people in the United States. At the outset I would like to point out that we have been referred to as "Indians" for only 500 years. Prior to that we were, and remain, Tsististas, Lakota, Dine, Muscogee, Ojibway and several hundred other nations. We still maintain 300 separate languages and dialects. The Indian population today is about two million. The population at the time Columbus landed in what is now Cuba in 1492 is under dispute, but many estimates put it at 10 million.

THE LEGACY OF FEDERAL INDIAN POLICY

Today Indian people have the highest birthrate in the nation and also the highest mortality rate. The average age of death for Indian people is 45 and the median age is only 18. In terms of age, we are the demographic reverse of the United States as a whole.

The experience of most minorities in the United States has been one of a struggle to gain a place in the melting-pot—social acceptance, economic power and equal rights. The experience of Indian people is just the opposite. Our struggle is one to avoid being subjugated in the melting-pot, and to preserve our land, our water, our traditions, our unique legal rights. Indian nations are inherently sovereign, and have negotiated approximately 600 treaties with the U.S. government. In this, we are different from racial and ethnic minorities. we ceded billions of acres of land and untold natural resources in return for a protected land base; water, hunting, gathering and fish rights;

and educational and health services. While many provisions of treaties have been broken unilaterally by the U.S., treaties are still the "Supreme Law of the Land", as they are characterized in the U.S. Constitution. Nothing is more doomed to failure than an effort to toss Indian people into the general melting-pot or to deal with Indian people on a strictly racial basis. Our legal status requires that we be dealt with on a government-to-government basis.

TREATY AND TRADE PERIODS

During the Colonial Period, the British Crown entered into numerous treaties with Indian Nations, but did not formulate any coordinated policy. The lines established by the Crown in 1768, beyond which no European settlements were to occur, were routinely violated. Relations between colonists and Indians were often cordial, with Indians providing food, meat and skills necessary for the immigrants to adjust to their new habitat.

Following the Revolutionary War, the Ordinance for the Regulation of Indian Affairs and the 1787 Northwest Ordinance were passed, promising no taking of Indian lands without Indian consent and requiring laws for the preservation of peace and friendship with the Indians. The first Indian law passed by the First Congress of the United States, the first of the Indian Nonintercourse acts in 1790, stated that only Indian land transaction without Congessional approval would be void, and President Washington interpreted this to the Seneca Nation as assurance that "in future, you cannot be defrauded of your lands."

INDIAN REMOVAL AND INDIAN WARS

Indian nations east of the Mississippi, however, were under constant pressure to give up their lands. The infant U.S. general govenment did not enforce its favorable Indian laws against the powerful colonies-turned-states. During this period, most of the Indian lands in the East were stolen. Following the Indian Removal Act of 1830, most of the Indian population in the Southeastern United States was forced to move to Oklahoma. The West at that time was not considered habitable by white people.

The mid-19th century brought a great influx of European settlers to the West, lured by land and gold. And the coming of the railroad brought both accelerated migration and the destruction of the buffalo herds. The U.S. government, reflecting the pressure for Indian land and gold, began an aggressive policy of military action against Indians followed by negotiation of treaties. Between 1853 and 1856, fifty two treaties were signed.

ASSIMILATION POLICY

Assimilation, always an element of U.S. policy with regard to Indians, has dominated U.S. Indian policy in the late 19th century and through part of the 20th century. Assimilation for Indian people meant cultural genocide—a concerted effort to destroy Indian languages, traditions, customary laws, dress, religions and occupations. Assimilation also has meant the abrogation of treaties and the demand that we give up land, water, forests, minerals and other natural resources.

Three major ways in which the goals of assimilation were to have been accomplished were 1) through federal franchising on Indian nations given to anxious Christian denominations; 2) through a culturally unravelling imposed educational system designed to separate child from family and instill non-Indian values; and 3) through federal efforts to break up tribal landholdings, turn Indians into individual landowners and impose taxes on their lands.

CHANGES IN INDIAN EDUCATION

The U.S. education efforts directed at Indians, until recently, have been based on the premise that Indian people are inferior to white people. The first Congressional appropriation for Indian education funds was in 1819, when $10,000 was set aside in a "Civilization Fund." Indian people were to cast aside their traditions and be educated into the culture and religion of the dominant population. In 1871, President Grant delegated to churches the responsibility of nominating Indian agents and directing the education efforts on reservations. In fact, churches were assigned to specific reservations, and others were not allowed entry into it. The aim of government-sponsored church-directed education was to strip Indian people of their religious views, practices and languages.

By the end of the 19th century there were many off-reservation boarding schools and day schools on reservations. The establishment of boarding schools for children was a deliberate attempt to disrupt traditional child rearing practices. Children were forcibly removed from their homes for up to twelve years, and parents and other relatives were not allowed to visit the children during the school year.

There have been major efforts in the past couple decades to recoup from these past experiences and to re-establish traditional Indian family values. Those values often include an extended family with sharing of child care among relatives. Extended family identification is central to citizens of Indian nations. The Indian Child Welfare Act of 1978 broke the chain of wholesale expatriation of Indian children when it recognized the traditional kinship system and the nonparental rights of extended family members.

Education today, fortunately, is coming under increasing tribal control, primarily as a result of important education reform acts of the 1970's. The result is culturally relevant curricula which includes an emphasis on tribal history, Indian languages and increased self-esteem. Indian education is the most decentralized of Indian programs, and the one in which the government has the least hold. While Indian tribes and parents are finally gaining control over Indian schools and have made the few remaining boarding schools into institutions which are administered by Indian boards and serve children with special needs, the federal government under this Administration is attempting to lessen the commitment to Indian education.

Fortunately, there are a number of Members of Congress who are vigilant where Indian education is involved, and some of these practices have been held in check.

While curricula for Indian-controlled schools is vastly improved, the same is not true for the history texts used by most students in grade schools, high schools and colleges around this country. Most history courses relegate Indian matters to a few pages or at best a chapter. A recent study of thirteen newly-issued college history textbooks by Fred Hoxie of the Newberry Library in Chicago, revealed that most of the new books still persist in treating Indian history with ignorance, misrepresentation and apathy. Most of the textbooks reviewed by Hoxie did not include new scholarship work on native population at the time of Columbus. It makes a big difference in your view of history whether there was one million or ten million tribal people here at the time of European immigration to North America. We have many problems with textbooks which refer to the Battle of the Little Big Horn as a "massacre," while the deaths of 300 unarmed and sleeping Indian men, women and children at Wounded Knee is referred to as an "incident."

ALLOTMENT PERIOD

The Indian land base has gone from 138 million acres in 1887 to approximately 50 million acres today. There are many reasons for land loss, including flooding for Corps of Engineers projects, creation of national monuments, taking of land for tax defaults and welfare payments, invalidation of wills and BIA forced sales on the open market. The 1887 Allotment Act or Dawes Act alone resulted in the loss of over half of the Indian land. Of the 48 million acres left after the Allotment Act had taken its toll, 20 million acres were desert or semiarid and not suitable for cultivation. The federal government promised to irrigate these lands and "to make the desert bloom." For most of these arid reservations, this promise remains unfulfilled.

The Allotment Act allocated land on reservations which had been guaranteed by treaties. Every family head was to receive 160 acres and a single person 80 acres. The idea was that Indians should become farmers and thereby become more civilized. Any land outside the allotted acreage was declared to be "excess" and sold to non-Indian settlers. Sometimes in western movies you see white settlers lining up and at the shot of a gun will all go running to claim land. Often this was Indian land declared excess by an act of Congress.

Much of the remaining land has been lost through the inheritance system managed by the federal government. Under this system, a nightmare of fractionated land has developed. Land is passed on to every member of a family to be held jointly, with escalating numbers of landowners through the generations. This has made management and land title issues most difficult, as consent of the landowners had to be gained for transactions to occur.

Several years ago Congress passed the Indian Land Consolidation Act to provide authority to tribes and individuals to consolidate and better use land holdings. However, it will take many years before any real improvement will be realized, and the method of separating the fractionated interests from the Indian heirs in one of the Act's provisions has been determined to be unconstitutional in one federal circuit.

During the allotment period U.S. citizenship was conferred on Indian people, whether they wanted it or not, if their land was held in fee status. In 1919, a law was passed making Indians who had served in World War I U.S. citizens, and in 1924 the Indian Citizenship Act was passed. The federal definition of Indian is one who is a citizen of an Indian nation, and courts have held that the Indian definition is political, rather than racial.

A NEW DEAL FOR INDIANS WANES

The Indian Reorganization Act (IRA), passed in 1936, finally put a formal end to the allotment policy, and the Indian land base has remained relatively constant since that time. The IRA also contained provisions for the establishment of a revolving credit fund to foster economic development and mechanisms for chartering and organiz-

ing Indian governments. This interest in tribal self-government was short-lived.

During the period from World War II to 1961, there occurred a series of disruptive assimilation efforts to force Indians into the melting-pot. This era is referred to as the "Termination Period." During the 1950s, federal Indian policy involved the termination of tribal-federal relationship with certain Indian governments, the liquidation of their estates, the transfer of federal responsibility and jurisdiction to states and the physical relocation of Indian people from reservation to urban areas. Termination legislation affected more than 100 tribes, bands and rancherias; some 12,000 individual Indians were disenfranchised and 2.5 million acres of Indian land was removed from trust status. Today, many of these tribes are attempting, via federal legislation, to be restored to their former status. In recognition of the disastrous effects of this policy, Congress already has restored several Indian tribes in Wisconsin, Oregon, Oklahoma and Utah.

SELF DETERMINATION POLICY

Since the 1960s, U.S. policy has placed more emphasis on tribal self-determination. A number of important laws directed at this goal have been enacted, but none in its implementation has met the expectations for reform. Among these laws are the Indian Self-Determination and Education Assistance Act of 1975, the Indian Child Welfare Act of 1978 and the American Indian Religious Freedom Act of 1978.

The Indian Self-Determination and Education Assistance Act directed the Secretary of Interior, upon the request of any Indian tribe, to contract with the tribe to "place, conduct and administer programs." This was a radical departure from the system of undisguised paternalistic government-run programs on reservations. This is, however, far from a completed process. While there are now schools and health and law enforcement programs administered by tribes, the BIA and the Indian Health Service (IHS) still have veto power over contracts the tribes wish to negotiate. Often there are massive bureaucratic and financial obstacles to tribal government efforts to contract to administer their own services. And, important training, technical assistance and funding aspects have yet to be implemented as mandated.

The Indian Child Welfare Act of 1978 was designed to strengthen Indian families by stopping the practice of removal of Indian children from their homes and placing them with non-Indian families off the reservation. From 1969 to 1974, 25-35% of Indian children were separated from their families and placed in foster care, adoptions or institutions.

The Indian Child Welfare Act recognized tribal jurisdictional authority regarding custody proceedings, and the practice of non-Indian adoption over the objection of the extended families has been halted in great part.

Another indication of Congressional and Administration concern for preservation of Indian culture was exhibited in the passage in 1978 of the American Indian Religious Freedom Act. That Act states, "it shall be the policy of the United States to protect and preserve for American Indians their inherent right of freedom to believe, express and exercise the traditional religions of the American Indian, Eskimo, Aleut and Native Hawaiians, including but not limited to access to sites, use and possession of sacred objects, and the freeedom to worship through ceremonies and traditional rites."

The hoped-for protection of and access to sacred sites and areas has not been made possible by the American Indian Religious Freedom Act (AIRFA). Governments and courts in the U.S. seem to have no trouble accepting the fact that there are holy places in Jerusalem, Bethlehem and Mecca, but do not give the same credence to areas of spiritual significance to American Indians. Most tribal religions have a center at a particular place, be it a river, mountain, plateau, valley or other natural feature. The problem of lack of access is exacerbated by the increased development on federal lands in the West, where many Indian religious sites are located. Access to sacred areas are needed for spiritual renewal and communication, and many feel that development of certain areas threaten their religions with extinction.

Nearly all of the human remains unearthed in this country are Indian. There are many thousands of Indian human remains in museums and universities all over the country. The Smithsonian, by its own account, has 12,000 Indian bodies in its collection. This is a matter that the National Congress of American Indians and others are currently discussing with the Smithsonian Institution, and may be a matter which will need Congressional attention if these remains cannot be returned to tribes for reburial.

FEDERAL POLICIES HARM INDIAN FAMILIES

This Committee is particularly involved with family issues, and the issues described above—the taking of land, forced relocation, an institutionally racist educational system, removal of Indian children from their homes, U.S. government paternalism, obstacles to self-governance, stripping of tribal recognition and denial of religious freedom—continue to place great stress on Indian families. Symptoms of these policies are, not surprisingly, high unemployment and alcohol and drug abuse. Indian unemployment stands at about 65% and in some tribes as high as 90%.

Alcoholism has greatly increased since World War II among Indian people, and it would be difficult to find an Indian family not directly affected by it. The 1980 Census shows the alcoholism rate for Indians to be 451% higher than the rest of the U.S. population. Even though alcohol and drug abuse is the number one social problem among Indian people and alcohol-related diseases and deaths are the biggest killers of Indians, the Bureau of Indian Affairs and the Indian Health Service has never made the prevention and treatment of this abuse as a priority.

Thank you for asking me to appear before your Committee. The National Congress of American Indians particularly welcomes opportunities such as this because it represents an audience which does not routinely consider Indian policy. I will be happy to answer any questions you may have.

PREPARING FOR LESSONS OF GRENADA WEEK

HON. JOE BARTON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. BARTON of Texas. Mr. Speaker, as we prepare to observe the lessons of Grenada Week in Congress and throughout the country, my colleague, NEWT GINGRICH of Georgia, is doing his part to raise public awareness of the reality of that event.

I want to share with you a column that recently appeared in the Orlando Sentinel and which documents some of his efforts.

The article follows:

[From the Orlando Sentinel, Sept. 25, 1985]

LESSONS OF GRENADA WEEK: LEARN ABOUT COMMUNISM THE EASY WAY

Rep. Newt Gingrich, who probably has the most fertile mind in the U.S. Congress, has joined forces with Democratic Rep. Ike Skelton of Missouri to coordinate a Lessons of Grenada Week.

You might expect this from the Georgia Republican, who is a historian by profession. It is a part of his earlier, published plan for survival of the nation, which includes a grass-roots education campaign. Gingrich is 100 percent right on this business of the need to educate the public about the realities of the world.

Unfortunately, when those realities conflict with liberal dogma and cherished fantasies, they get slim-to-none attention from those whose specialties are conducting prolonged pathological studies of flaws in the conservative psyche.

And the lessons of Grenada conflict like heck with liberal dogma and cherished fantasies. One of those lessons is, to quote Gingrich:

"The pro-Marxist tendency of a small but vocal segment of our society which was exposed as a result of Grenada. The left wing of our own Democratic Party, the media, leftist clergy and academics have defended communist Grenada and criticized the liberation. This group has denied reality much like the neo-Nazis and other hate groups deny the reality of the Nazi Holocaust."

One of the neat side benefits of the liberation of Grenada from its Marxist thugs was that for the first time the complete archives of a communist government were captured intact. The 35,000 pounds of documents are now in the U.S. Archives and open to inspection by any interested citizen. A selection of them were published by the departments of Defense and State. Grenada Documents: An Overview and Selection can be ordered from the U.S. Government Printing Office (1984-421-0528:4) for $19.

Among the things revealed in these documents was how the communists on Grenada sought to deceive and dupe others, pretending to be social democrats. The documents reveal what callous liars communists are, including the late Maurice Bishop. They reveal how the Soviets and the Grenadan communists schemed to hide their real intentions. And they reveal how much help they received from American left-wingers.

TransAfrica, the organization that is spearheading the protests against South Africa, invited Bishop to the United States. Dessima Williams, Grenada's ambassador to the Organization of American States, discussed this trip in an April 20, 1983, memorandum to Bishop.

"According to Mr. Randall Robinson, the executive director of TransAfrica, their invitation to you is to say to the Reagan administration: 'Maurice Bishop is our man, a black man. You mess with him, you mess with all black Americans. And we are bringing him here to show you that we are friends with him.' "

There are some really interesting documents from aides to Democratic Rep. Ron

Dellums of California. One of them, Carlottia A. Scott, addressed Bishop as "My Dear Comrade Leader" and she said it was imperative that Grenada's revolution succeed in order to give "those of us in the U.S. a bright ray of light at the end of the long, dark tunnel of our oppressed existence under this ludicrous system."

Gingrich and Skelton are hoping Americans will observe Lessons of Grenada Week Oct. 20-26 by taking a hard look at the reality of communism in the Western Hemisphere and how it is connected with the strategic goals of the Soviet Union.

A major conference at the Center for Strategic and International Studies in Washington on Oct. 9 will kick things off. Town hall meetings, rallies on college campuses and other events are scheduled around the country during the week itself.

It will be interesting to see if the truth about a communist regime can generate as much interest as propaganda from a communist regime. It will be interesting to see if Americans are really interested in learning about reality the easy way rather than the hard way.

Gingrich and Skelton deserve thanks for making the effort.

THE CHALLENGE OF MILITARY REFORM IN THE PHILIPPINES

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. COURTER. Mr. Speaker, the unfortunate situation in the Philippines is well known. Within the past few years, and more importantly since the assassination of Benigno Aquino, unpopularity and resistance to the Marcos government has increased. While much of this unrest is a result of certain Government policies, the problems have been exacerbated by greed and ineptness within the military, which today is charged with a larger internal role than ever before due to the mounting resistance in that country. Indeed, concern regarding the stability and permanency of not only the present Government but that of the U.S. installations at Subic Bay and Clark Air Base are rising. Our relations with this historically close and strategically important ally are at stake.

Gen. T.R. Milton, USAF (retired), has recently published in the Air Force magazine an insightful analysis addressing the past trends and current problems facing this country. Specifically, he argues that a major catalyst for unrest is corruption in the military ranks which not only impedes its effectiveness, but tends to widen the rift between the population on the one side and the Armed Forces and the Government on the other.

Excerpts from the Milton article, including proposals for an effective Philippine military, follow:

THE QUESTIONABLE FUTURE OF THE PHILIPPINES

(By Gen. T.R. Milton)

VER AND HIS ALLIES

General Fabian Ver, Chief of Staff of the armed forces and thus the senior military officer, came to power as a presidential favorite. A Marcos cousin, Ver's military career has been spent in direct service to the President; he has risen from aide, chauffeur, and bodyguard to his present eminence. As might be expected, all the current service chiefs owe their promotions, and presumably their allegiance, to General Ver. Therefore, when the commission investigating the Aquino murder decided that the trail led to the military and, by inference, to General Ver, there was consternation in the armed forces headquarters at Camp General Emilio Aguinaldo. Ver, Brig. Gen. Luther Custodio, and various enlisted men were directly implicated.

The enlisted men charged with complicity in the Aquino murder are housed in a temporary stockade, which, as it happens, is across the street from the Philippine Air Force Golf Club, where they are treated to the occasional meal. General Custodio is in quarters arrest; General Ver has taken leave of absence during the trial. In my casual lunchtime meeting with him, Ver appeared unconcerned, even jovial, and, as it turned out a few days later, with reason. The prosecution has been denied use of most of the critical evidence, and President Marcos has declared he will reinstate General Ver to his former position if he is found innocent. As this is written, that action seems a foregone conclusion.

Meanwhile, Lt. Gen. Fidel Ramos, Ver's deputy, a West Point graduate and a highly respected officer, is Acting Chief of Staff. It is not an enviable position. All retirements of senior officers have been postponed for the duration of the trial, so Ramos must deal with the same old crowd. If there were any doubts as to where the loyalties lie, they were dispelled by a full-page newspaper advertisement supporting General Ver and signed by eighty percent of the Philippine generals. A notable exception was General Ramos.

The armed forces are badly in need of a major overhaul, of that there can be no question. Training is spotty and, in the case of ground troops, sometimes nonexistent. There are severe shortages of communications equipment, rolling stock, and medevac helicopters. Bullet wounds are thus often fatal for lack of medical care, a sure cause of low morale. Military pay is grossly inadequate, leading to poverty and thievery in the lower ranks and corruption at the senior level. The Air Force is chronically short of fuel and spare parts, and the Navy has most of its ships riding at anchor for the same reasons.

All in all, Philippine armed forces are in poor shape to deal with a rising insurgency, one that appears to be taking to heart military tactics found in U.S. Army manuals. One rare encouraging sign has been the demand made recently by a substantial number of junior and middle grade officers, Philippine Military Academy graduates, for military reform. Perhaps someone will listen.

The Philippine armed forces, with a total strength of 155,000, are large enough to contain and defeat 10,000 guerrillas, especially when the guerrillas are without outside help. Being large enough, however, is meaningless without the leadership, training, and morale necessary for successful military action.

Back in 1950, when Ramon Magsaysay became defense minister, he found himself head of a barracks bound military with no great urge to fight. The Huks, accordingly, were on the move, and Magsaysay began to make unannounced visits at odd hours to military units. Sometimes these lightning visits resulted in the summary relief of a commander. At other times, Magsaysay found what he was looking for, and a promotion was forthcoming. The overall effect of this dynamic man's campaign was a restoration of morale, self-esteem, and combat leadership. That, combined with imaginative social reform, was responsible for the defeat of the Huks.

Now, thirty-five years later, the armed forces are once more in need of rejuvenation. Somehow, and for whatever reason, the image of the Philippine military has become badly tarnished. Fine young officers are still being turned out at the Military Academy in Baguio, there are capable, even outstanding, leaders at every level, and no one has ever doubted the fighting qualities of the Filipino military man. The trouble lies deeper, and the solution will require major changes in the structure. How and when or even if, this will come about is a matter of conjecture.

The Republic of the Philippines will have a presidential election in 1987. President Marcos has put a damper on speculation about the election by announcing, last spring, that he will run again, health problems or not. In fact, he has looked more like his old self in recent appearances, but the rumors do persist of occasional setbacks in what appears to be a chronic kidney disease.

The real speculation has to do with the office of vice president, at the moment, unoccupied. It seems doubtful that Mrs. Marcos will be in line for the job, in view of the country's present unrest, although she remains a possibility. Over the years of the Marcos dynasty. Imelda Marcos has become far more than the President's wife. She is, in many ways, almost a coequal of the President himself, one whose picture shares official walls with that of her husband.

If President Marcos succeeds himself for another six-year term, the dynasty will have become a fixture. More to the point, negotiations on the future of Clark and Subic will be under his aegis, and there is no reason to believe he would not favor a new lease.

His likely opponent in the 1987 election is Salvador Laurel, a man who has a slightly jaundiced view of the continued American presence. He has stated that he would retain the bases until 1991, then hold a plebiscite. Since plebiscites are sensitive as to how the question is worded, and Filipinos an emotional and unpredictable lot, we might not wish to wait around in the face of an uncertain future. Certainly, it will be difficult to get major congressional funding for bases of doubtful tenure.

CHOICES FOR MARCOS

The old quarters at Clark have stood there a long time, dating back to the turn of the century when Clark was known as Fort Stotsenberg. They have housed the horse cavalry, the Japanese briefly, and the Air Force these past forty years. When 1991 comes around, it will be just twelve years short of a century that the United States has been established at Clark. For old times' sake does not qualify as a military reason to stay on, but there are other valid ones. The Philippines are going through troubled times, but they have been through troubled times before. Beyond that, the relationship between the United States and the Republic of the Philippines is far closer than that of allies. It is one of old and trusted friends, or at least, it has been up until now.

The next few years will determine the future of that friendship. Without question, the Marcos regime is an unpopular one among a great many Filipinos. The seedy reputation of the armed forces is a major contributor to that unpopularity. For better or worse, we are associated with the Marcos regime. The United States thus finds itself in a delicate position. Clearly, there is rising opposition to the Marcos family rule and, with it, a rise in anti-Americanism. How deep this anti-Americanism really goes is hard to determine, but, as an educated guess, it is not very deep just now. Whether it grows from here on will depend to a very great extent on the behavior of the Philippine government.

If President Marcos will face up to the fact that his military forces are held in low esteem and widely viewed as both corrupt and inept, he will know what to do. A reformed military, adequately paid, trained, and disciplined, could deal with the NPA in short order. Anti-Americanism would then recede to the radical fringe. But if nothing is done to repair the military's image and effectiveness, the next few years could see our long association come to an end. Manila is not even close to going the way of Saigon, but neither was Saigon in 1960.

SOUTH DAKOTA'S JOE FLOYD

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. DASCHLE. Mr. Speaker, "Joe Floyd is a Helluva Salesman,"—the headline in an article which recently appeared in the Sioux Falls Argus Leader—just about says it all. Joe Floyd, board chairman of KELO-Land stations in South Dakota and president of Midcontinent Corp., is a walking success story.

What the headline doesn't say is that Joe Floyd is also a "helluva friend." In the years I have known him, he has gone to unusual lengths to accommodate the needs of his friends and his fellow citizens. On many occasions we have been the recipients of his good will.

South Dakotans are extremely fortunate to have such an innovative thinker who so ably represents them and the communications industry. He is a rare leader, a rare businessman and a unique American. I would like to submit the text of the Argus Leader article which appeared Thursday, October 3, and depicts the talent and insight of a man who has been synonymous with our State for over 60 years.

[From the Sioux Falls (SD) Argus Leader, Oct. 3, 1985]

A HELLUVA SALESMAN—KELO'S JOE FLOYD: FROM USHER TO HEAD OF ENTERTAINMENT EMPIRE

(By Frederic J. Hron)

Joe L. Floyd *is* a helluva salesman. His friends and business associates nationwide attest to that. They are sold on the charm and chutzpah, the vigor and vision of Floyd, the man who introduced South Dakotans to television and has helped build a multimillion-dollar entertainment and communications company called Midcontinent Corp.

During his almost 60 years in the entertainment business, people always have been willing to buy whatever Foyd has had to sell, from vaudeville folly to video cassettes.

"He has always had a promotion up his sleeve," Evans Nord, the president of KELO-TV, says. Nord met Floyd, who is 74 today, in the 1940s when he was selling radio advertising and Floyd was managing theaters in Sioux Falls.

"He'd dream something up, then head to the radio stations. He'd say, 'I've got a couple who are going to be married in an airplane 5,000 feet over the city. Why don't you broadcast it?' Or, he'd have a guy sitting on top of the marquee at the Hollywood Theater for umpteen days."

This hucksterism developed early in life.

For a time during the Great Depression the teen-age Floyd made his living auctioning clothes off a live model. The auction stopped when the model was down to her bathing suit—but the audience didn't know that.

Perhaps Floyd's greatest promotion was the game show *GI Blind Date* that he developed in the early 1940s to draw theatergoers into the Hollywood and Granada theaters.

The show allowed young soldiers, who were in Sioux Falls to attend the U.S. Army's communications school, to get dates with local girls. The girls would sit on one side of a partition and ask questions of the soldiers on the other side, then make a date based on their answers.

'They' meet each other, get a kiss, and off the stage they'd go. The audience loved it." Floyd says.

GI Blind Date was so popular that Floyd promoted it all the way to New York City and a four-year stint on the NBC radio network, with Arlene Francis as host. Today, the show has been reincarnated for television as *The Dating Game.*

At the height of *GI Blind Date,* Floyd was earning $4,000 a week and traveling between New York City, where he worked on the show's script during the week, and Sioux Falls, where on he managed the theaters of his future partner, Eddie Ruben, and his own Sport Bowl on weekends.

A RARE FAILURE

Since the day in 1928 that he first donned an usher's uniform at the Minnesota Theatre in downtown Minneapolis, Floyd had been smitten by the stage, so the outlet for his newfound fortune came in backing Broadway shows. For one of the few times in his life, success eluded Floyd.

"I put my money into bum shows and lost every dime," he says today. "I came back (to Sioux Falls, at the end of *GI Blind Date's* four-year run) as broke as when I went out." His last stab at big-time theater had been the forgettable musical *Ramshackle Inn* with Zazu Pitts. "It opened in Boston and closed in Boston, all in the same week."

Upon his return to Sioux Falls, Floyd received a call from showman Herman Levin, who had produced *Ramshackle Inn.* "He calls and wants a fast ten grand," Floyd says. "I said no. So he said, 'How about five grand . . . or one grand?'

"I told him I was never going to get into that business again." A year later, Levin's next musical opened. It was called *My Fair Lady.* "That's the one I turned down!" Floyd growls with disgust.

The turn of events probably was fortuitous for Sioux Falls and South Dakota. Had Broadway success lured Floyd back to the Big Apple, the history of television in the Sioux Empire would have been different.

Floyd was made a partner in his movie theater business in 1946, ostensibly to keep him in Sioux Falls, concentrating on the theater business.

"Eddie recognized that Joe had a very rare talent for promotion, and at the same time Eddie was expanding the theater operation," Larry Bentson, Ruben's son-in-law, says. "He cut Joe in on a piece of them because Joe was a very perceptive guy. When you've got somebody who's real good, sometimes you make them a partner."

It didn't work.

Soon, a new entertainment medium, television, commanded Floyd's attention. Television could ruin the movie business, he reasoned. If he and Ruben were to survive, they'd better get into television.

Floyd wanted Midcontinent Broadcasting Co. in Sioux Falls, which owned KELO radio and a television license it hadn't activated.

Floyd wanted to buy it, but Ruben was apprehensive. "Eddie was very cautious," Floyd has said. "I don't think there's ever been a venture that we've ever gotten into that Eddie didn't object to, and didn't want to go into it, and that I didn't push him into it.

"By the time I got him to go, brother I had all the negatives that there were ever to have, which was very good, because sometimes I would realize through this maneuvering where I was exposed."

THE FLOYD IMAGE

Floyd, who'd enlisted Bentson, as an ally in the television proposal, said his conviction was so great, he'd go it alone, if necessary. Bentson sided with Floyd, and reluctantly, Ruben gave his consent.

After the acquisition in 1952, "we immediately started to work on how we'd run a television station," Nord says. He was KELO's general manager then. "At that time, there was no question if we'd do it, but how we'd do it and how we could afford it."

Floyd, whom the partners put in charge of the Sioux Falls station, faced the greatest selling job of his life.

He also faced a paradox: There were fewer than a dozen television sets in all of Sioux Falls, those bought by enthusiasts who erected lofty towers to attract signals from Minneapolis and Omaha. Without viewers, Floyd didn't have anything to sell advertisers or the networks. And South Dakotans weren't likely to buy television sets to pick up a station that had no programming or advertising.

Locally, Floyd arranged a deal with the television distributors in town. If they'd commit to buying advertising on his station, he'd give South Dakotans a signal worth buying a television set to receive.

His challenge in selling the networks and national advertising accounts was much more difficult. Floyd camped out in New York City for months before KELO's airing in May 1953. And although he put in 16-hour days calling on ad agencies and making social contacts, he had little to show for his efforts until friend Clifford Gill created "the Floyd image."

Gill had been a friend from Floyd's 1920s days in the movie houses in Minneapolis. By 1953, Gill had established a career in advertising. He felt Floyd could make an impact on Madison Avenue if he advertised in a local trade publication, *Advertising News of New York,* using a layout Gill had put together. It featured a picture of Floyd, a big cigar jutting arrogantly from his mouth, under a headline that boasted: "I'm Joe Floyd. I consider myself a helluva salesman."

Floyd was reluctant to go with the ad because he thought it was too egotistical, Nord says. "I thought, it's like saying I'm a helluva guy," Floyd says. "But Gill insisted."

The ads did the trick, and Floyd's fortunes began to change. He became a celebrity in advertising circles. Everyone wanted to meet the fellow with the big cigar.

"It was the most successful ad campaign of any television station in the country," Nord says, and the station used it for almost two decades. "We merchandised his face with the cigar on cigarette lighters, money clips and tie clasps. We'd give those to advertising executives instead of a business card."

Floyd once said, "People would say, 'Let me see that crazy guy with the cigar.' It was the greatest door opener in the world." The most important door it opened was to the office of George Laboda, the advertising manager for Colgate-Palmolive Co. The company's *Colgate Hour* was one of the most popular shows on television at that time, and Floyd thought that if he could get Colgate to buy time on his station, it would legitimize KELO-TV in the eyes of many other programmers and advertisers.

Intense lobbying by Floyd convinced Laboda to buy KELO—and provide his program on film, a precedent for Colgate. KELO needed film because it was the first station to go on the air without a hook-up to the network, in those days achieved via telephone line.

BOMB TIME

Floyd spent the better part of the next four years in New York, promoting KELO and his developing network to KELO-Land stations, KDLO in Garden City and KPLO in Reliance. He promoted from sunup to sundown, Nord says, making sales calls during the days and attending social functions at night.

Floyd refused to consider that KELO might fail; he willed its success, says Nord, who often teamed with Floyd in New York.

Ford is an engaging companion, his many close friends say, and he used cocktail parties and social events to meet influential people in the television industry informally. The World Series parties KELO hosted at New York's Warwick Hotel are legend: Hundreds of advertising and television executives eating, drinking and cheering their favorite team on Floyd's tab. They were grand affairs. The last bash set Floyd back $30,000.

"He loved it, He loved every minute of it," Nord says. "He was very good at it. But those parties also had a purpose." That was to sell KELO-Land stations. "It was fun for him, but it also was business for him."

Floyd's reputation survives today on Madison Avenue, although he curtailed his activities there in the 1960s.

Floyd still loves to socialize; the 5 p.m. cocktail hour is a daily ritual.

George McGovern, a Floyd traveling companion and confidant for more than 20 years, says Joe was always good for morale on trips. "He liked to drink and he had a saying about the cocktail hour," the former U.S. Senator and Democratic presidential nominee says. "He'd call it 'bomb time.' At 5 p.m., he'd say, 'It's bomb time.'

"One time he said that while we were walking through the Los Angeles airport. A security guard heard it and grabbed him and told him it was against the law to talk about bombs in airports." Floyd didn't get arrested, McGovern says, but he did get a stern lecture.

Friend and Sioux Falls businessman Max Pasley says he sees Floyd almost daily when both are in town, often to swap stories over a scotch at the end of the day.

Even when travels keep them apart, they share the cocktail hour. "When Joe's down in Ocean Reef (his vacation home in Florida) and he gets lonely, he'll call me up." The two will pour drinks and have a long-distance cocktail hour.

But Floyd's friends say he's more than just a good drinking buddy. "He's always there if you need anything," Pasley says. "If you have him for a friend, you have a true friend. Anything you want, he'd be there to help you."

STILL ON THE MOVE

Floyd's enthusiasm and positive attitude infect the people around him, friends say, and his travels and hobbies give him a wealth of stories to entertain with. He's easily drawn into telling stories from his early days in the theater business in Minneapolis.

The first time he met Will Rogers, the humorist asked Floyd how many shows he'd have to perform. "I said, four a day and on Saturday and Sunday, five. Then he asked me how many newspapers we had. I say four.

"He says, 'Where am I going to get a fifth paper?' I tell him I can get one in St. Paul. So he says, 'Here's what I want you to do. Stand in the wings and hand me a newspaper when I go on stage.'"

Floyd did. "He'd walk out on stage and open up the paper and say, 'I see by the headlines . . .' He'd go on for 30 minutes, and he never saw the paper before I handed it to him. Each show was a new show; he'd have the audience in stitches. And all I had to do was give him a paper."

Bing Crosby, Bob Hope, Howard Hughes and other celebrities are the stars of other Floyd stories.

Consistent with his involvement in movies and television, Floyd is a camera bug. He's taken news footage and stills when accompaning McGovern and Sen. Larry Pressler on Congressional trips around the world. He loves deep sea fishing, and until last year, he and Pasley co-owned a 50-foot fishing boat at Ocean Reef. During the 1950s and 60s, Floyd hopped between Midcontinent's properties in a company plane he took delight in piloting. "He's the one who got the company involved in airplanes," partner Larry Bentson says. "He's also the one who got us into boats."

Although bad knees and a serious stroke he suffered four years ago have slowed his pace. Floyd is alert, in charge at Midcontinent's Sioux Falls offices—and usually on the go.

"He's just a warm, stimulating friend." McGovern says. "I've had more laughs and more good cheer with Joe Floyd than any other single person. . . . You're never bored when you're around Joe. He's enthusiastic about life and his friends."

Floyd's success stems from his ability to know what people want. "Joe always had an intuitive knowledge about what the public would respond to" Bentson says. "He's a real grassroots thinker."

Floyd is observant and perceptive, McGovern says. He cites two examples of Floyd's foresight.

The first involves a briefing with a U.S. general midway through the first of two trips to Vietnam that Floyd made with McGovern. The general was explaining how many South Vietnamese soldiers were helping the U.S. fight the Viet Cong.

"Joe kept saying, 'Where are they? I haven't seen any of them. All I've seen is American boys,'" McGovern recalls. The general stuck by his figures. "When we got off the plane (on our return) there was a small item in the Argus about a study by the Rand Corp, which said the South Vietnamese troop strength was much lower than was being reported by the military. Joe saw that, and he was willing to tell a high-ranking U.S. officer that he was full of baloney."

The second occurred during a 1978 tour of Africa. Floyd and McGovern met with Bishop Desmond Tutu and South African Prime Minister P.W. Botha. Again Floyd displayed his ability to see beyond the surface. "He was appalled by the lack of spirit of compromise" in South Africa, McGovern says. "It was perfectly clear to Joe then that something was going to blow if the government didn't compromise. He couldn't understand why the government wouldn't meet with Tutu and work something out. That's the way he'd have handled it if it was a business deal. He said within 10 years, this place was going to be in flames."

Floyd credits his success to his friends: "Most of it has come through our acquaintances."

He prides himself in being a man who keeps his word. "When I tell someone something, I mean it," he says. He expects the same in return.

"The key is being in the right place at the right time, and recognizing you're there."

EUROPEAN COMMUNITY VIOLATION OF STEEL PIPE AND TUBE AGREEMENT

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. FIELDS. Mr. Speaker, a clear violation by the European Community of a commitment made to our Government is threatening to shut down a plant in Baytown, TX, employing almost 200 people. The Hoesch Tubular Products Co., otherwise known as HTP, finishes heat-treated steel tubular products, known as oil country tubular goods or OCTG, at its Baytown plant. The only possible source of supply for this plant is HTP's German parent company, Hoesch AG. HTP cannot utilize heat-treated unfinished OCTG in the United States to be finished at Baytown.

Both the U.S. Trade Representative and the EC recognized HTP's requirements in negotiating the pipe and tube arrangement which went into effect last January. The U.S.T.R. agreed to new higher quota limits of 7.6 percent of U.S. consumption for EC pipe and tube, and 10 percent for the OCTG subcategory, in large part to allow specifically for an allocation by the EC of an additional 42,000 tons of OCTG to Hoesch in Germany, for the purpose of supplying the HTP Baytown plant. The U.S. Trade Representative, at that time, Ambassador Brock, obtained a commitment from the EC negotiators to make this special allocation, within the overall quota limit, so that HTP could get the rew material it needs to keep operating in Texas and employing Ameri-

can labor. It was understood that this special allocation would supply half of HTP's minimum needs and the rest could be provided from regular quota allocations to Hoesch by the EC. The quota ceilings would have been lower in the absence of this understanding.

Mr. Speaker, the EC has not fulfilled its commitment to our Government. The EC failed to make the agreed special allocation. Instead, they gave permission to ship finished OCTG to other European producers who do not have any facility here in the United States and who employ European labor to do the job that U.S. labor is doing in Baytown. And unless HTP can obtain the full amount they are entitled to, they will have to close their doors in Texas. Already, HTP has been forced to lay off many of its workers for lack of raw material.

The U.S. Government agreed to the current quotas on European steel pipe and tube as the result of an expressed commitment from the EC that they would allocate a specific part of that quota to keep an American steel facility running. It is outrageous that the EC has violated this commitment, and has redistributed this amount to others. The United States cannot permit its interests to be jeopardized by the violation of agreements such as this. I do not advocate raising the quota celings by even 1 ton. Instead, I am introducing legislation aimed at correcting this problem without further raising the quota ceiling. My bill would require the United States to reduce the pipe and tube quotas by any amount which the EC has failed to allocate as agreed and allocate that amount so as to conform to the terms of the agreement. Mr. Speaker, we cannot continue to allow our interests to be jeopardized by the violation of our trade agreements. I urge prompt consideration of my legislation in order to save the jobs of 200 Baytown workers.

TRAILS CENTER IN INDEPENDENCE WILL REFLECT PIONEER EXPANSION

HON. ALAN WHEAT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. WHEAT. Mr. Speaker, the pioneers who settled the West embodied the very best of the American spirit. I want to congratulate the city of Independence, MO, for its efforts to preserve the heritage and adventures of the American pioneer.

Mr. Speaker, the city of Independence has embarked on a vigorous development project. Plans are underway to build the Oregon-California-Sante Fe Trails Interpretive Center in the heart of Independence. The center will preserve for future generations the indomitable spirit and courage of the American Pioneer. The Missouri General Assembly has appropriated $2.1 million for the initial development of the project.

The new interpretive center will further the recognition of Independence's role in American expansion and enhance the cultural and educational value of historic Old Town Independence. The center will become an integral part of the town's historic loop that the city has established in cooperation with the National Park Service. On this 5-mile loop, people are able to visit the home of former President Harry S. Truman, the Truman Museum, the Harry S. Truman Railroad Station, the Joseph Smith—Mormon Visitor's Center, and a pre-Civil War jail museum. The Three Trails Interpretive Center will also work in conjunction with other facilities across the Nation, such as the Gateway Arch in St. Louis and the Trails Center in Oregon City, OR, to generate a national network of centers to increase the understanding of the pioneer experience and spirit.

The role of Independence in westward expansion began as early as 1827, when the city was founded. First finding prosperity in supplying fur traders and trappers, Independence soon took the leading role as the final stop for explorers who blazed the trails that would later lead the brave settlers to the promise of fertile land and gold. Independence was described as the "point of embarkation" for every part of the great "private ocean."

Independence grew as the rush to settle the West picked up momentum. Along with neighboring communities such as Kansas City and Westport, Independence was a leader in outfitting wagon trains for the long Journey over the Great Plains and the Rocky Mountains. It was necessary for the pioneer family to buy all of the provisions and supplies they would need for the entire journey because hostile Indian tribes were the only inhabitants in the Great Plains. Thus, those outfitters located further west held an advantage over their competitors. Independence prospered because it held a 200-mile advantage over St. Louis, Kansas City, and Omaha would later prosper because they brought the pioneers a little nearer the western frontier.

Today, Independence is a beautiful and thriving community of more than 100,000 people. The Three Trails Interpretive Center will enhance the understanding of the pioneer experience and the role of the city of Independence in the westward expansion of our country. The city of Independence, its elected officials, and all those involved in this development project should be commended.

A TRIBUTE TO "CASEY" CASEBOLT

HON. JOE BARTON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. BARTON of Texas. Mr. Speaker, in small cities and towns across the country our daily and weekly newspapers play a very important role in keeping our citizens informed about government and how it affects them.

No one recognizes this more than a candidate for public office.

Residents of Ellis County, TX, have long recognized Mr. and Mrs. Casebolt for their very active role as journalists and historians. Casey and his wife, Fay, worked long hours in writing and editing newspapers—devoting more than 40 years of their lives to newspapers in Ellis County.

I was saddened earlier this month to learn of the death of Floyd W. "Casey" Casebolt, who as editor of my hometown newspaper, the Ennis Daily News, played a very significant role in the life of our community.

Casey always had time to talk about my activities as a candidate and later as a Member of Congress. Each day he shared humorous and interesting glimpses of life in town in his "Ennis Echoes" column. Readers looked forward to reading it for both its entertainment and information.

Shortly after graduating from William Jewell College in Missouri, Casey decided he wanted to adopt Texas as his native State. He accepted a reporting job with the Waxahachie Daily Light in Ellis County and worked there for 28 years, including 17 years as editor.

He left that position to serve as an executive with several New Mexico newspapers, but his fondness for Ellis County prompted Casey and Fay to return there in 1959.

Over the years, community groups have honored him and his wife for the unselfish way they have given of their time and helped promote worthwhile community events.

As editor, Casey always made it a point to stress news coverage of churches, schools, and other educational groups, service and charitable organizations. Those who showed promise as writers, he encouraged to become working journalists.

Mr. Speaker, I just wanted to take a moment to recognize Casey's work and contributions to the betterment of Ellis County. We will all miss him very much.

LEGISLATION TO PERMIT VESSELS FORFEITED TO THE UNITED STATES TO BE TRANSFERRED TO EDUCATIONAL INSTITUTIONS WITH COMMERCIAL FISHING PROGRAMS

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. STUDDS. Mr. Speaker, today, I am introducing legislation that will authorize the Secretary of Transportation to transfer vessels which have been forfeited to the Federal Government to be donated to qualified educational institutions for use in commercial fishing vessel safety programs.

The commercial fishing industry has a safety record as bad as any industry in the United States. Human error is a contributing cause to the majority of fishing vessel casualties, and is most often related to poor watchkeeping procedures, lack of preventive maintenance, navigational errors, and rules of the road violations.

The Commandant of the Coast Guard has recommended a fishing vessel initiative which has been endorsed by the Secretary of Transportation. The establishment of a safety education program is a large component of this initiative.

There currently exist vocational schools and community college programs that offer courses in fishing vessel safety, which already serve the aim of the Coast Guard's initiative. The purpose of this legislation is to help these schools obtain suitable vessels, so that students will be able to receive "hands on" experience in operating a fishing vessel.

Recent increases in maritime drug interdiction operations by the Coast Guard have generated a comparable increase in the number of suitable vessels obtained through forfeiture to the United States. The legislation we are introducing today will help put these forfeited resources to constructive use. We iook forward to prompt and favorable action on this legislation by the Congress.

A GREAT SUCCESS STORY BECAUSE OF GREAT TEAMWORK BY GOVERNMENT AND THE PRIVATE SECTOR

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. VANDER JAGT. Mr. Speaker, I would like to share with my colleagues a real success story updated recently by the Muskegon Chronicle of Muskegon, MI, that concerns a new business and the partnership possible between Government and the private sector. My involvement with this story began back in March 1984 when I learned of a grant application being made by Laboratory Furniture, Inc., to acquire, a building, machinery, and equipment necessary to operate a manufacturing facility for laboratory furniture in the Muskegon Heights area, which is part of the Ninth Congressional District of Michigan.

Knowing of the great need for employment opportunities in the Muskegon Heights area, I was privileged to lend my support to this application for $700,000 under the Urban and Rural Economic Development Program of the Department of Health and Human Services. This grant request was matched by $2.5 million of private investment, better than a 3 to 1 ratio, and was designed to provide approximately 200 jobs. When I first contacted Secretary of Health and Human Services, Margaret Heckler last year, I stated that I could not think of an area in greater need of new employment opportunities than Muskegon Heights. I met with the entire city council of Muskegon, Heights and received their total and complete commitment to this project. I also worked closely with John J. Lindale, executive director of the Economic Development Corp. of Muskegon County, a leading force in the effort. At the time of the grant application Muskegon Heights had over 20 percent unemployment and qualified as a distressed area.

With the approval of the grant and the increased private investment in Muskegon Heights, new revenue for a hard-pressed city government has been provided, the rennovation of a vacant, old industrial building has been accomplished, the Central Business District has been revitalized and most importantly, new workers have and will continue to have a chance to be trained and to increase their standard of living. I am indeed proud to have been a small part of this success story and recommend the following article for my colleagues' review.

OLD FACTORY GAINS NEW LIFE WITH NEW FIRM

It was bad news all around, another depressing failure story for a Muskegon manufacturing plant.

Less than two years ago, the long-troubled Browne-Morse Corp. was liquidated for nonpayment of taxes. For months its factory at the corner of Sixth and Broadway, which had manufactured laboratory furniture and equipment for a nationwide market, sat silent and locked. Dozens of employees—as many as 75 in 1981, before the final slide—were out of work.

That was two years ago.

Today, the old factory building, just barely out of the Muskegon Heights downtown business district, is humming again, under new ownership and with a growing roster that now stands at about 50 employees and is expected to reach 200 before many more months. Laboratory Furniture Midwest, Inc., with heaping helpings of government aid, has set up shop.

That shop is expected to grow quickly, according to company President Wayne W. Hills. The Muskegon Heights operation is a wholly owned subsidiary of the Long Island-based Laboratory Furniture Inc., and a large share of the national firm's production is supposed to come to Muskegon Heights before long.

"It will be the long-term goal of this company to move manufacturing here," Hills said in a recent interview. "Within two years, this will be the main manufacturing plant."

Hills predicts employment will reach 65-75 by the end of 1985. And, he says, "by the end of next year, I would be disappointed if we were not between 150 and 200."

Nationwide, Laboratory Furniture Inc., employs between 800 and 1,200 people, Hills estimates. Corporate headquarters and one plant are in Carle Place, New York, headed by President Edward R. Fiance, other manufacturing facilities are in Elkins, W. Va.; Newbury Park, Calif.; and McDermott, Ohio. The national firm, which Hills describes as a "closely held family corporation," was founded in 1947.

The midwest subsidiary was created just last year, specifically to run the Muskegon Heights plant. Opportunity tapped when corporate managers learned that Browne-Morse—which manufactured basically the same products as Lab Furniture—was in receivership and up for sale.

"The president (Fiance) heard that, and it fit the company's long-term goals," Hills says. Lab Furniture submitted the low bid, and in February 1984 it bought Browne-Morse's assets.

Purchase and occupancy of the building came later that year, with the crucial help of a $700,000 grant from the U.S. Department of Health and Human Services directly to the company. Aided by that grant, a $1 million bond issue floated by the Muskegon Heights and Muskegon County Economic Development Corp., and a 100 percent property tax abatement on the work granted by the Muskegon Heights City Council. Lab Furniture bought and renovated the 77-year-old building and started up production early this year. Hills himself, who formerly worked for a rival firm, was hired last November to head the new subsidiary.

Further reconstruction is under way again, and again with taxpayers' help. A $100,000 loan from the U.S. Department of Housing and Urban Development, funneled through the city of Muskegon Heights, is helping the company renovate the building's decaying exterior while freeing capital to be spent on new tooling.

Already the Muskegon Heights plant makes all the company's drawer and case runners and some other components of the hospital and laboratory furniture that are its sole product. Soon the local factory will be making fume hoods, a sort of sophisticated version of a stovetop ventilator fan. Eventually, "we'll be the parts fabrication center for the company," Hills says.

Topping earlier contracts totalling $3 million, the plant recently won two more equalling about $2 million: one for "flexible laboratory systems," or adjustable lab furniture, for the Laurence-Livermore labs in Livermore, Calif.; the second for the Clorox Technical Center of Pleasanton, Calif., according to Hills.

All this means growing employment, a large proportion of the workers being Muskegon Heights residents. According to a company fact sheet, employment on July 1 stood at 43, of whom 22 where Heights residents and 16 were black. Hills says most are "entry-level" employees. He declines to state the wage scale at the non-union plant but admits it's lower than at the old Browne-Morse operation, whose workers were organized into Local 693 of the Allied Industrial Workers union.

Although Laboratory Furniture Midwest employs a small nucleus of long-time Browne-Morse workers, most are young people working at their first full-time jobs, Hills says, learning skills in welding, press operation and other trades.

The firm's payroll and fringes from July 30, 1984, through last June 30 equalled $496,360, the company's fact sheet states. Total spending, most of it local, totalled about $2.2 million by that date, and the company anticipates spending $3 million by year's end. Browne-Morse's delinquent taxes of $108,920 have been paid.

So far, at least, the new company has been welcomed. Heights city officials, who tour the plant regularly, profess themselves delighted with their new resident.

YURI TARNOPOLSKY AND RELIGIOUS PERSECUTION IN THE SOVIET UNION

HON. LAWRENCE J. SMITH

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. SMITH of Florida. Mr. Speaker, the policies that the United States has pursued to encourage human rights have not been as effective as we would like them to be or

as they should be. In the late 1970's, Soviet officials first crippled the Soviet Jewish emigration movement when the numbers of Jews allowed to emigrate began to decline. In 1984, Soviet authorities strove to paralyze the Jewish emigration movement further. Soviet Jewish emigration dropped to an all time low of 896.

My adopted refusenik, Dr. Yuri Tarnopolsky's plight is similar to the Soviet Jewish refuseniks who were unlucky enough to be included in the "896". Dr. Yuri Tarnopolsky of Kharkow, Ukranian SSR, is an example of the Soviet Jew caught in this emigration quagmire. He is unable to leave the Soviet Union to practice religious freedom and can not stay and continue his life as an organic chemist. He was sentenced on June 30, 1983, to a 3-year term on Chita labor camp for slandering the Soviet state. Since the time of his original application for an emigration visa in 1976, he has been refused work in his profession. Both he and his family have been subjected to great hardship and harassment.

A new stepped-up campaign to erase Jewish culture has begun. Disruption of their lives and harassment by authorities are not new to the tens of thousands of refuseniks waiting to emigrate such as my adopted refusenik, Dr. Yuri Tarnopolsky. The latest attempt to eradicate Jewish culture from Soviet society, however, is new. Hebrew teachers and the most active political activists were singled out, arrested, and imprisoned on trumped-up charges.

The leadership of the Soviet Jewish emigration movement may disappear if these Hebrew teachers and activists are eliminated. Soviet television recently aired a crude documentary on Jews in the Soviet Union mentioning their anti-Soviet tendencies and association with Zionists. This film represents not only an upsurge in anti-Semitism, but also a continuation of the Stalinist mentality of equating any allegiance to Judaism or Israel as an act of treason possibly punishable by death. If refusenik leaders are to weather this new Soviet storm, they will need our support and commitment to their cause.

The Soviets need to realize that Soviet Jewish emigration is a priority and commitment of the United States. We should require that all future U.S. delegations make no economic agreements without first obtaining significant human rights improvements. To do this, we must institute guidelines so that our negotiations do not deteriorate into the buying and selling of human beings.

I suggest the following guidelines for U.S. delegations to improve Soviet human rights practices:

First. A substantial release of prisoners of conscience and refuseniks prior to any negotiations as an honorable gesture.

Second. The inclusion in all emigration arrangements of the principles of repatriation to Israel or family reunification elsewhere.

Third. The end of the harassment of all Jewish study groups, and Hebrew teachers, including restrictions on their ability to obtain and prepare educational materials.

Fourth. An end to the inflammatory Soviet media campaign that utilizes anti-Semitic stereotypes, portraying a United States-Zionist world conspiracy to subvert the U.S.S.R.

Beyond that, Soviet Jewish emigration and all human rights issues should be considered an essential component of any negotiating agenda whether it involves trade, economics, or arms. When human rights are included as a nonessential part of any negotiation, the subject is too easily raised, then dropped. The problem should be elevated above the realm of humanitarian appeals, to an integral nondismissable part of any negotiation.

It is my hope that the Soviet Union will comply with the family reunification provisions of the Helsinki Final Act and the International Convenants on Human Rights. It is my sincere hope that Dr. Yuri Tarnopolsky, his wife Olga, and daughter Irina will receive favorable consideration of their applications for exit visas in the near future. I address this appeal to General Secretary Mikhail Gorbachev on the eve of the November summit in the spirit of hope, justice, humanity, and peace.

INDEPENDENCE FOR CYPRUS

HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 1, 1985

Ms. FIEDLER. Mr. Speaker, I would like to commend my distinguished colleague from Ohio [Mr. FEIGHAN] for holding this special order this evening. The purpose of this special order is to commemorate the 25th anniversary of independence for the Republic of Cyprus, and I am pleased to participate.

Todays anniversary only underscores the tragedy of the current situation in Cyprus. The country is divided and occupied by 30,000 Turkish troops supporting the outlaw state, the Turkish Republic of Northern Cyprus. For the Creek Cypriots who comprise 82 percent of the population of Cyprus and for the 200,000 Greek Cypriots who were displaced by the Turkish invasion in 1974, the situation is intolerable.

A negotiated diplomatic settlement promises to provide the quickest remedy to the needless suffering of the Greek Cypriots. This settlement should encompass the goal of removing all foreign troops from Cyprus and should reaffirm the principle of respect for independence, sovereignty and territorial integrity as it applies to Cyprus. Within these diplomatic parameters, the U.S. State Department should work actively for a just and peaceful solution to this tragic situation. Resolutions passed by the United Nations and the recent negotiations started by the Secretary General of the United Nations Perez de Cuellar also show potential for an equitable diplomatic solution.

Once again I am pleased to participate in this special order and I hope that continuing congressional attention to Cyprus will contribute to a just and equitable solution to the Cyprus issue.

ECONOMIC IMPACTS OF OFFICE BUILDINGS

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mrs. SCHNEIDER. Mr. Speaker, I would like to share with my colleagues today a statement prepared by the Building Owners and Managers Association International. I think that this paper brings to our attention an enormous contribution made to the economy by a sector we tend to take for granted, the little noticed office building. The well-managed office building is an enormous boon to the local and regional economy as this paper describes. I commend it to my colleagues.

BEYOND BRICKS AND MORTAR: DOLLAR IMPACTS OF OFFICE BUILDINGS

(By Dr. Alton Penz, Research Analyst, BOMA International)

The casual observer studies an office building's physical presence and architecture; local government officials welcome the expected infusion of tax dollars; and local businesses look forward to increased sales.

In the U.S., about 40 percent of the entire workforce holds jobs that require an office environment to work in. In 1982, their efforts accounted for approximately $640 billion of the Gross National Product, which was almost $3.1 trillion that year.

The public underestimates how much office buildings contribute to national productivity because the office building industry is so incredibly dispersed. There are over 650,000 buildings in the U.S. alone in which three-quarters of the space is dedicated to office activities, according to a recent multimillion dollar survey by the U.S. Department of Energy.

Pinning a single label on that space presents a challenge because no two buildings are alike. BOMA International's Experience Exchange Report (EER) reflects this diversity in its size and extensive tables.

ECONOMIC IMPACT OF A 200,000 SQUARE FOOT BUILDING

A look at a hypothetical but statistically typical 200,000 square foot multi-tenant building will help illustrate the magnitude of an office building's effect on the surrounding community's economy. Statistics on its tenancy and operation are drawn from the EER.

Although many office buildings are only the size of small apartment buildings, this example building is the average size building reporting in the EER and is representative of the stock of large office building space in North America. The EER shows that the average office building tenant occupies around 6,647 square feet. So, a typical 200,000 square foot multi-tenant building, of which there are many in metropolitan areas, would have about 30 different tenants.

The operating budget for a 200,000 square foot building, including the cost of cleaning, repairs/maintenance, utilities, property taxes, insurance and administration is approximately $1.3 million a year. If this is ex-

trapolated to the approximately nine billion square feet of office space in the U.S., then the total expenditure for office space operation is approximately $60 billion a year.

In 1984, office property managers spent an average of 22.5 cents per square foot of office building space for roads and grounds maintenance, and an additional 13.5 cents for security services. (Office properties in downtown locations spent more, on average, for security, and suburban properties incurred higher landscaping costs, on average.)

For a 200,000 square foot building, the total roads/grounds maintenance bill exceeded $45,000, about 70% of which was paid to outside contracting firms.

In addition, the 200,000 square foot example building will generate almost $100,000 a year in revenue to a leasing agent to secure tenants for the building as space becomes available.

EMPLOYMENT AND EXPENDITURE PATTERNS

In terms of employment, a 200,000 square foot building would create approximately 24 new jobs, with 15 people on the building managment's payroll, and another nine positions that would be filled through building service contractors, who provide the building with services on a contractual basis. This estimate is derived from wage rate data supplied to BOMA International by several of its local associations.

Tenant employer payrolls for work accomplished within a office building are substantial. If the typical office worker occupies 226 square feet, a 200,000 square foot building will house about 750 workers. The total payroll for that many employees, based on current income and wage statistics, is about $13 million a year.

According to 1984 EER averages, a U.S. building tenant employer was paying $13.53 annually per square foot for space while spending $75 a square foot for office labor (direct wages). All together, an employer pays over $100 a square foot for office labor (direct wages, fringe benefits and office space). This relationship emphasizes how important it is for an office building to provide a supportive environment for workers to function productively.

LOCAL ECONOMIC IMPACT

The occupants of a building interact with the surrounding community on a variety of levels. Although the total local exenditure level for office workers is not readily available, rough calculations suggest that the total impact is much greater than one might expect. For example, in the 200,000 square foot building with a wage payroll of $13 million, about $6.6 million annually is spent by the office worker's household on food, beverages, tobacco, clothing, jewelry and accessories.

If just 10 percent of this budget is spent by office workers while they are at work, the personal consumption impact of these workers on the office building's neighborhood is three-quarters of a million dollars a year.

The importance of a developer's decision to construct a new office building is magnified in those instances where the tenants represent basic (versus support) industries. A business in a basic industry provides a net monetary gain to a community because its revenues come almost exclusively from outside the community but most of the expenses of the business are purchases of local labor and materials. This monetary inflow further stimulates the community economically because the influx of new employees generates the need for additional stores, restaurants and specialty shops.

A support industry business, in contrast, sells its products locally. It generates a net (although usually small) monetary outflow from the community because some of its purchases are for materials or goods produced outside of the community.

Numerous researches in the last decade have explored the total long-term effect on a community of basic industry. They have sought empirical verification for the long-term income and employment effects that result from each additional dollar of income, or job position created by a new basic industry business. They refer to the ratio of long-term to immediate effect as a multiplier.

Very rough rules of thumb at this time are that each new dollar of basic industry income stimulates one and a half additional dollars of local business, and each new basic industry job stimulates the need for approximately 0.5 to 1.5 workers, depending upon local labor conditions. The resulting multipliers are thus 2.5 and 1.5-2.5 for income and employment, respectively.

BENEFITS TO MUNICIPAL BUDGETS

In general, the net benefits of office buildings on municipal budgets are substantial. Each community situation will be different, of course, because the nature of the building and its proposed occupants, the nature of the facilities that it replaces, the current availability of municipal services and local taxing procedures all vary tremendously from city to city.

The following example will illustrate some of the issues involved. In this instance, all of the numbers except for the size of the building are derived directly from a study that addressed an actual situation.

A major U.S. city was debating the merits of permitting high rise office building development in a region of the municipality that had previously not experienced such development. Extrapolating from that process to the level of a single building, the debate was whether to allow the construction of 400,000 square feet of office space which would replace 66,000 square feet of commercial retail space.

A study was made to examine how the municipality's revenues would be affected by the demolition of retail space and addition of office space for each source of additional revenue. Different types of space are taxed differently. The results were that the total revenues accruing from the new office building via property taxes, sales taxes, business taxes, utility taxes and miscellaneous other taxes would be $2.22 per square foot of net additional space.

Similarly, the municipality's service operations were studied to see how police and fire services, public transportation, public utilities, legal services and general administration services would be affected by the new building. The conclusion of these studies was that the additional costs attributable to the net additional office building space would be $0.24 per square foot.

This particular study revealed that the net fiscal impact on the municipality's budget would be a net gain of $1.98 per net additional square foot of office space. For the typical 200,000 square foot building, the annual net income would be $396,000.

The size of the net gain, $1.98 per net additional square foot, as compared with the absolute increase in costs of $0.24 per net additional square foot, suggests that the additional office space in a community can be a beneficial one. Numerous cities have experienced the benefit of surges in municipal revenues (relative to costs) as their office markets have grown.

An office building contributes much more to a community than fiscal analysis can recognize. These other issues, many of which fall in the realm of physical planning, cannot be ignored in a real decision context. However, the economic contribution of office buildings to a city's financial welfare can be substantial.

TRIBUTE TO ADOLPH SCHUMAN

HON. SALA BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mrs. BURTON of California. Mr. Speaker, Adolph Schuman, a dear friend and a dedicated and generous supporter of the Democratic Party passed away last week.

He was a highly successful businessman, but did not confine himself to that pursuit. He was deeply involved in efforts to aid the state of Israel from its founding in 1948. Locally, he was a major supporter of St. Anthony's Dining Room, which serves food to the homeless and needy, and other charities in his hometown of San Francisco.

Adolph Schuman was a long-time supporter of Democrats, most prominently the Kennedys. He was a close friend and supporter of my husband Phillip. The cause of progressive politics was served well by Mr. Schuman.

He was a man who enjoyed life and gave of himself to everyone around him. Lilli Ann, the clothing company he founded and built into international prominence in the world of fashion, is well-known as a business that cares deeply about its employees. In an industry that too often has exploited its workers and fought against unions, his company was a union shop. Adolph Schuman certainly had no aversion to making a profit, but he did not hesitate to share the success of his business with those who worked for him.

My heartfelt sympathy goes out to his wife Jo and his daughter Cynthia. Adolph's many friends will miss this remarkable man.

TAXATION OF STATE AND LOCAL DEDUCTIONS

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. DASCHLE. Mr. Speaker, we have a shared concern about the inequity in our present tax system which favors the rich and which increasingly burdens the middle-income wage earner. From this concern about a Tax Code laden with loopholes for the wealthy has come a national interest in simplifying our tax system.

If our goal is one of restoring fairness in the Tax Code so that we are not asking the average taxpayer in this country to pay

more than his or her fair share, while the wealthy are able to abuse the system, then eliminating the deductability of State and local taxes is folly. The vast majority of taxpayers take the deduction for State and local taxes. Those State and local taxes are paying for important services like our schools, libraries, health care, roads, police and fire protection. In recent years, the Federal role in many areas has been trimmed back or eliminated increasing the burden on States and municipalities to pick up costs once assumed by the Federal Government. To modify or eliminate the deduction for State and local taxes on Federal income tax returns poses a direct threat on services which primarily affect low- and middle-income citizens.

What outrages the American public most is abuse of the tax system. They fume, rightly so, at the fact that large corporations can get by year after year paying no Federal income tax, some actually getting millions of dollars in tax refunds. If we are going to clean up the Tax Code, let's get rid of the loopholes and shelters which promote unfairness in our tax system. The deduction for State and local taxes is not an abuse of the tax system and should be left as is.

GEORGE F. CICOTTE TO RECEIVE EAGLE SCOUT AWARD

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. GEKAS. Mr. Speaker, today I would like to recognize the achievement of Mr. George F. Cicotte, a constituent of mine from Middletown, PA. On Sunday, October 20, 1985, family and friends will gather at the Church of Jesus Christ of Latter-Day Saints to witness the presentation of the highest achievement in Boy Scouting—the coveted Eagle Scout Award—to Mr. Cicotte.

As a young citizen, Mr. Cicotte has displayed energetic capabilities by participating in many different projects and community services which have won him special merits of honor.

I am proud to congratulate Mr. Cicotte for his outstanding contributions to his community. His unselfish attitude toward others has set an example for the rest of us to follow. I am honored to have an individual like him in my district.

DAYLIGHT SAVING TIME EXTENSION ACT DRAWS EDITORIAL SUPPORT

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. MARKEY. Mr. Speaker, the House will soon be considering H.R. 2095, the Daylight Saving Time Extension Act of 1985. The bill adds a total of 1 month to the current period, by beginning daylight saving time on the first Sunday in April—compared to the current starting date of the last Sunday in April—and ending on the first Sunday in November—compared to the current ending date of the last Sunday in October.

The choice of dates was a compromise reached after discussions between the bill's sponsors and its former critics. As a result of these compromises, the bill was reported from the Committee on Energy and Commerce without dissenting views. The decision to begin daylight saving time at the start of April rather than the start of March, as proposed in previous bills, ensures that mornings will not be cold and dark for schoolchildren and farmers. Mornings in April, even under daylight saving time, will be brighter and warmer than mornings in any winter month under standard time.

The benefits of the bill, including energy conservation, traffic safety, and crime prevention, have been cited in numerous editorials across the country. The following editorials in support of the bill are from USA Today, the Washington Post, the Boston Globe, and the Los Angeles Times:

[From USA Today, Apr. 26, 1985]

LET DAYLIGHT TIME LIGHT OUR LIVES LONGER

In just a second, an hour goes by.

At 2 a.m. Sunday, most of the USA goes on daylight-saving time. By moving the clock's hands forward, we gain an extra hour of daylight, every day, for the next six months, until we go back on standard time on the last Sunday in October.

What good is that extra hour of daylight?

The businessmen in California will have enough light left to spend some extra time on the beach.

The lawyer in Massachusetts will be able to weed there garden in daylight after work.

The Cubs fans at lightless Wrigley Field in Chicago will be able to watch the whole game, even if it goes into extra innings.

Whoever you are and whatever you do, extending daylight-saving time will let the light last longer for you.

One more hour of daylight for two more months of the year is time enough for people to play 19 million more rounds of golf. It adds time to picnic in the park, jog, play softball, or walk in the woods.

For young families, more daylight time brings a bonus. The child who was waking up with the sun at 6 will sleep until 7. And in the evening, families have more time to spend together outside while it is still light.

But if six months of daylight-saving time is so good, why don't we have more of it? Why not eight months?

We can, if Congress approves.

Bills have been introduced to start daylight time in March and end it as late as November. Adding two months of extra daylight could save lives, money, and energy.

More daylight driving time will mean fewer car accidents. Two months of extra light could save 100 lives a year, and $52 million in accident damages.

When the natural light lasts longer, we turn on artificial lights later. In just two months, we could save the equivalent of 6 million barrels of oil.

Adding two months of daylight time could even cut crime. When the USA was on daylight time for most of 1974 and 1975, a government study found violent crime in Washington, D.C. fell by 10 to 13 percent.

Despite all the obvious adavantages to choosing light over darkness, some still say no. They argue that daylight time hurts the lifestyles and livelihoods of farmers and ranchers.

But for farm states where that is a real problem, there is an option: They can stay on daylight time the year around, just as Arizona, Hawaii, and parts of Indiana do now. Or they can ask the government to change their time zone.

We are wasting sunlight and wasting energy in springtime now because daylight starts at 5 a.m., when most people are still asleep.

Congress has the power to say, "Let there be light."

It should act now to let the sun shine on.

[From the Washington Post, Apr. 28, 1985]

DAYLIGHT ON CAPITOL HILL

Like clockwork, Congress takes a look every year at some version of legislation to extend Daylight Saving Time beyond the current period that runs from the last Sunday in April to the last Sunday in October. But this year, supporters of a new effort believe their latest proposal has a better chance than those pressed in recent years. Already it has picked up considerable support from a variety of organizations as well as from the Department of Transportation, which estimates that the proposed change could save oil and reduce traffic fatalities.

Without going into all the ancient history surrounding this issue, this year's proposal would stretch daylight time from the third Sunday in March to the first Sunday in November. That's one more week in the fall. In mid-March, sunrise would occur at about 7 a.m. in the middle of a time zone, which, supporters note, would mean that schoolchildren would not be in the dark on their morning trips.

Why not try it? According to Congressional Quarterly, groups supporting this bill include the Barbecue Industry Association (looking at millions of additional charcoal briquettes that would be used); the American Association of Nurserymen; the Amateur Softball Association; and the National Association of Convenience Stores. With groups like these, how can the proposal miss? Easily, because farmers don't like starting their chores earlier and cows don't know ho to tell time. Nevertheless, Congress at least could allow a one-year experiment that would give everyone a chance to mark time and weigh the difference.

[From the Boston Globe, Apr. 27, 1985]

SEEING THE LIGHT ON DAYLIGHT SAVING

Tonight is the night to turn clocks ahead an hour; daylight saving time comes not a moment too soon. If Congress acts with common sense this session, in future years Americans will enjoy daylight saving's benefits for six additional weeks each spring, starting on the third Sunday in March rather than the fourth Sunday in April.

As structured now, daylight saving is a lopsided affair. It begins more than four months after winter solstice each year, but lasts until a bit less than two months before the following winter solstice.

A bill filed by Reps. Edward Markey (D-Mass.) and Carlos Moorhead (R-Calif.) proposes the change. It should be enacted.

Most objections to the change, which has died several times in Congress in recent sessions, come from rural areas and the western sides of time zones. The two major ob-

jections are that the change would interfere with standard agriculture patterns and that it would make children go to school in the dark.

In reality, the change would do nothing more each spring than imitate in reverse the fall pattern of sunrises and sunsets. No area in the country would experience later sunrises each spring morning than it now does each fall. Furthermore, no sunrise would come as late as it does during each winter—on standard time.

On the plus side, springtime daylight saving would expand recreational opportunities and make life more pleasant each afternoon. April needs all the help it can get. The hour of sunlight displaced each spring morning is often lost anyway, coming well before many people have risen.

This change, a trivial matter in the panoply of public policy issues plaguing the nation today, is nevertheless one that can be achieved solely bny Congress. It is one of those projects that would improve the quality of life for most, perhaps all, Americans—provided only that Congress sees the light.

[From the Los Angeles Times, Sept. 2, 1985]

WILL CONGRESS SEE THE LIGHT?

When Congress gets back to work, it will have before it a bill sponsored by Reps. Edward J. Markey (D-Mass.) and Carlos J. Moorhead (R-Glendale) to give the country another month of daylight-saving time. Let's hear it for the Ayes.

Daylight-saving time currently stretches from the last Sunday in April to the last Sunday in October. Under the bill, clocks would be set an hour ahead on the first Sunday in April, and back an hour on the first Sunday in November.

The potential nationwide benefits of 30 more hours of evening daylight far outweigh the potential disadvantages of 30 more hours of morning darkness. During daylight-saving time there are fewer crimes and traffic accidents, less energy is consumed and more leisurely walks are taken at sunset than during the same hours of standard time. Another month of those conditions couldn't hurt. It might even stimulate the economy, because people would have an extra hour of daylight for shopping.

The American Farm Bureau Federation leads the opposition to the bill, claiming that later sunrises make the work of farmers more difficult and endanger children waiting for school buses or walking to school in rural areas.

These concerns are legitimate, but for children they are exaggerated. Because April has the earliest sunrises, schoolchildren would not face mornings that are darker or colder than those during any other part of daylight-saving time, and a study by the Department of Transportation has shown that the risk of accidents would not increase with an extension of daylight-saving time.

Rita Walters, president of the Los Angeles school board, says that she has never heard any opposition to daylight-saving time from concerned parents or school officials here. She said that her schools would be ready for daylight-saving time at the beginning of April, and that an extra week in the fall would do no harm. Several school officials around the country commented that many schools now operate in the dark during standard time. Additional daylight-saving time would help in those situations.

For us, the clincher is that Halloween would come during daylight-saving time, giving children an extra hour of light for going door to door. How can Congress pass up the chance to hand everybody a treat like that?

PROPOSALS TO TAX EMPLOYEE BENEFITS

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. HAWKINS. Mr. Speaker, I today filed a supplementary list of cosponsors for House Resolution 268. This list is filed pursuant to clause 4 of rule XXII of the Rules of the House of Representatives. It brings to 253 the number of Members who have cosponsored House Resolution 268, expressing the sense of the House that employee support systems not be taxed.

The list of cosponsors is broadly bipartisan. It contains the names of liberals and conservatives, committee chairman and new Members. All sections of the country are represented and all committees of the House.

There are 253 Members of the House of Representatives who support a continuation of the present tax treatment of employee pension and benefit plans. Their names are as follows:

Mr. Gary L. Ackerman, Mr. Joseph P. Addabbo, Mr. Daniel K. Akaka, Mr. Glenn M. Anderson, Mr. Frank Annunzio,, Mr. Douglas Applegate, Mr. Les Aspin, Mr. Chester G. Atkins, Mr. Les AuCoin, Mr. Doug Barnard, Jr., Mr. Michael D. Barnes, Mr. Herbert H. Bateman, Mr. Jim Bates, Mr. Berkley Bedell, Mrs. Helen Delich Bentley, Mr. Howard L. Berman, Mr. Tom Bevill, and Mr. Mario Biaggi.

Mr. Michael Bilirakis, Mr. Ben Garrido Blaz, Mr. Sherwood L. Boehlert, Mr. William Hill Boner, Mr. Robert A. Borski, Mr. Douglas H. Bosco, Mr. Frederick C. Boucher, Mrs. Barbara Boxer, Mr. John B. Breaux, Mr. Jack Brooks, Mr. George E. Brown, Jr., Mr. Hank Brown, Mr. Terry L. Bruce, Mr. John Bryant, Mrs. Sala Burton, Mr. Albert G. Bustamante, Mrs. Beverly B. Byron, and Mr. William Carney.

Mr. Bob Carr, Mr. Jim Chapman, Mr. Gene Chappie, Mr. William Clay, Mr. William F. Clinger, Jr., Mr. William W. Cobey, Jr., Mr. Howard Coble, Mr. Tony Coelho, Mr. E. Thomas Coleman, Mr. Ronald D. Coleman, Mrs. Cardiss Collins, Mr. Silvio O. Conte, Mr. John Conyers, Jr., Mr. Jim Cooper, Mr. Lawrence Coughlin, Mr. James A. Courter, Mr. William J. Coyne, and Mr. Larry E. Craig.

Mr. George W. Crockett, Jr., Mr. Dan Daniel, Mr. William E. Dannemeyer, Mr. George Darden, Mr. Thomas A. Daschle, Mr. Robert W. Davis, Mr. E de la Garza, Mr. Thomas D. DeLay, Mr. Ronald V. Dellums, Mr. Ron de Lugo, Mr. Norman D. Dicks, Mr. Joseph J. DioGuardi, Mr. Julian C. Dixon, Mr. Wayne Dowdy, Mr. Richard J. Durbin, Mr. Bernard J. Dwyer, Mr. Mervyn M. Dymally, and Mr. Roy Dyson.

Mr. Dennis E. Eckart, Mr. Bob Edgar, Mr. Don Edwards, Mr. Mickey Edwards, Mr. Glenn English, Mr. Ben Erdreich, Mr. Lane Evans, Mr. Dante B. Fascell, Mr. Vic Fazio, Mr. Edward F. Feighan, Mr. Hamilton Fish, Jr., Mr. James J. Florio, Mr. Thomas M. Foglietta, Mr. William D. Ford, Mr. Wyche Fowler, Jr., Mr. Martin Frost, Mr. Don Fuqua, and Mr. Dean A. Gallo.

Mr. Robert Garcia, Mr. Joseph M. Gaydos, Mr. Sam Gejdenson, Mr. George W. Gekas, Mr. Benjamin A. Gilman, Mr. Newt Gingrich, Mr. Dan Glickman, Mr. Henry B. Gonzalez, Mr. Bart Gordon, Mr. Kenneth J. Gray, Mr. Ralph M. Hall, Mr. Tony P. Hall, Mr. John Paul Hammerschmidt, Mr. Thomas F. Hartnett, Mr. Charles Hatcher, Mr. Augustus F. Hawkins, Mr. Charles A. Hayes, and Mr. W. G. Hefner.

Mr. Cecil Heftel, Mr. Dennis M. Hertel, Mr. John Hiler, Mr. Frank Horton, Mr. James J. Howard, Mr. Carroll Hubbard, Jr., Mr. William J. Hughes, Mr. Duncan Hunter, Mr. Henry J. Hyde, Mr. Andrew Jacobs, Jr., Mrs. Nancy L. Johnson, Mr. Ed Jones, Mr. Walter B. Jones, Mr. Paul E. Kanjorski, Ms. Marcy Kaptur, Mr. Robert W. Kastenmeier, Mr. Jack F. Kemp, and Mr. Dale E. Kildee.

Mr. Thomas N. Kindness, Mr. Gerald D. Kleczka, Mr. Joe Kolter, Mr. Peter H. Kostmayer, Mr. Ken Kramer, Mr. Tom Lantos, Mr. Jim Leach, Mr. Richard H. Lehman, Mr. William Lehman, Mr. Mickey Leland, Mr. Norman F. Lent, Mr. Sander M. Levin, Mr. Mel Levine, Mr. Jerry Lewis, Mr. Jim Ross Lightfoot, Mrs. Marilyn Lloyd, Mr. Tom Loeffler, and Mrs. Cathy Long.

Mr. Trent Lott, Mr. Mike Lowry, Mr. Thomas A. Luken, Mr. Frank McCloskey, Mr. Joseph M. McDade, Mr. Bob McEwen, Mr. Stewart B. McKinney, Mr. Edward R. Madigan, Mr. Thomas J. Manton, Mr. Edward J. Markey, Mr. Ron Marlenee, Mr. Matthew G. Martinez, Mr. Nicholas Mavroules, Mr. Romano L. Mazzoli, Mrs. Jan Meyers, Mr. Dan Mica, Ms. Barbara A. Mikulski, and Mr. Norman Y. Mineta.

Mr. Parren J. Mitchell, Mr. Joe Moakley, Mr. Alan B. Mollohan, Mr. G.V. Montgomery, Mr. Jim Moody, Mr. Robert J. Mrazek, Mr. Austin J. Murphy, Mr. William H. Natcher, Mr. Bill Nichols, Mr. Henry J. Nowak, Mr. James L. Oberstar, Mr. Major R. Owens, Mr. Charles Pashayan, Jr., Mr. Timothy J. Penny, Mr. Claude Pepper, Mr. Carl C. Perkins, Mr. Melvin Price, and Mr. James H. Quillen.

Mr. Nick Joe Rahall II, Mr. Charles B. Rangel, Mr. Harry M. Reid, Mr. Bill Richardson, Mr. Thomas J. Ridge, Mr. Matthew J. Rinaldo, Mr. Don Ritter, Mr. Pat Roberts, Mr. Tommy F. Robinson, Mr. Peter W. Rodino, Jr., Mr. Robert A. Roe, Mr. Charles Rose, Mr. J. Roy Rowland, Mr. John G. Rowland, Mr. Gus Savage, Mr. H. James Saxton, Mr. James H. Scheuer, and Mrs. Claudine Schneider.

Mrs. Patricia Schroeder, Mr. Bill Schuette, Mr. Charles E. Schumer, Mr. John F. Seiberling, Mr. Philip R. Sharp, Mr. Richard C. Shelby, Mr. Bud Shuster, Mr. Gerry Sikorski, Mr. Mark D. Siljander, Mr. Norman Sisisky, Mr. Joe Skeen, Mr. Ike Skelton, Mr. Jim Slattery, Mr. Denny Smith, Mr. Lawrence J. Smith, Mr. Robert C. Smith, Mr. Stephen J. Solarz, and Mr. Harley O. Staggers, Jr.

Mr. Richard H. Stallings, Mr. Arlan Stangeland, Mr. Louis Stokes, Mr. Samuel S. Stratton, Mr. Gerry E. Studds, Mr. Al Swift, Mr. Robin Tallon, Mr. W. J. Tauzin, Mr. Gene Taylor, Mr. Esteban Edward Torres, Mr. Robert G. Torricelli, Mr. Edolphus Towns, Mr. James A. Traficant, Jr., Mr. Bob Traxler, Mr. Bruce F. Vento, Mr. Peter J. Visclosky, Mr. Harold L. Volkmer, and Mrs. Barbara F. Vucanovich.

Mr. Doug Walgren, Mr. Henry A. Waxman, Mr. James Weaver, Mr. Ted Weiss, Mr. Alan Wheat, Mr. G. William Whitehurst, Mr. Charles Whitley, Mr. Bob

Whittaker, Mr. Charles Wilson, Mr. Timothy E. Wirth, Mr. Robert E. Wise, Jr., Mr. Frank R. Wolf, Mr. George C. Wortley, Mr. Jim Wright, Mr. Ron Wyden, Mr. Sidney R. Yates, Mr. Gus Yatron, Mr. Don Young, and Mr. Robert A. Young.

SOVIET ACTIVE MEASURES, PART III

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. HYDE. Mr. Speaker, the following is the final section of a study on Soviet active measures and techniques used in a quiet war against the West. Active measures are effectively used by the Kremlin on a daily basis to subvert, deceive, and disinform the public opinion upon which Western democracies are built.

I recommend the following excerpts from Active Measures, Quiet War and Two Socialist Revolutions to my colleagues in the House.

It is important for all Americans to know the capabilities of the Soviets. They are, indeed, formidable adversaries.

FORGERY

The story of active measures would be woefully incomplete without mention of Soviet forgery operations. They too are an aspect of disinformation and deception. Forgeries, of course, are documents which, although false, are crafted by the KGB to appear genuine. They are often falsified or altered versions of U.S. official publications or communications; on occasion, they are totally fabricated.

Forgeries are usually intended for specific targets, such as a particular foreign government but often are directed at the people of an entire country or region. Forgeries, as with other classes of clandestine political warfare operations, are conducted by Service A, the First Chief Directorate of the KGB.

Fortunately, much of the effect of many Soviet forgeries has been neutralized by quick and efficient response by the CIA and FBI in informing the audience of the results of their analysis of the motivation for the operation and the errors of the forgery itself. Unfortunately, as with many Soviet operations, the truth has difficulty reaching all the recesses where the original Communist untruth has penetrated. The lie often outruns the truth.

Primary targets of Soviet forgeries are the North Atlantic Treaty Organization (NATO) and the U.S. itself. Third World countries are also targetted by the Soviets. The usual propaganda themes are the basis of the forgery motive: the United States is racist, a war monger, imperialist, and manipulative of Third World and NATO governments. The forgery is often accepted—although often, to their credit, not—by the target audiences, publicized locally and picked up and replayed by the Soviet media.

Although many Soviet forgeries show an increasing level of sophistication some forgery operations are poorly—or hastily—assembled and show carelessness. Nonetheless, forgeries are an especially pernicious and virulent form of Soviet active measures.

THE TWO SUPERPOWERS THEORY

Soviet active measrues, according to Lenczowski, follow the open propaganda theme of "the two superpowers." Lenczowski is one of a number of observers of Soviet behavior to see a hidden meaning behind "the two superpowers" concept. This theme, in the terms of Soviet strategic deception, promotes the idea that the U.S. and the USSR are both "superpowers," the Soviet union being placed at once on the same level of development as the United States, a primary goal of Soviet propaganda. This idea at the same time promotes the "mirror image" view of East-West relations (sometimes called the "Samantha" concept) that we, the people and leaders of the two countries, are really just the same after all. Logically if we find nuclear war "unthinkable," this theory holds, the Soviets also find it so when in fact the Soviets have developed over the years a complex doctrine on nuclear warfare including extensive and expensive civil defense planning. Plainly, rather than finding it unthinkable, they have given nuclear war a great deal of thought. Finally, the "two superpowers" idea morally equates the two countries and their systems, a perception which Jeane Kirkpatrick, U.S. Ambassador to the United Nations, finds so pernicious and the errors of which she has struggled against so tirelessly at the U.N. and elsewhere.

GAINING CREDIBILITY

Other observers see similar Soviet basic themes gaining credibility among analysts in the West. Although there may be some substance in these themes, these observers suspect they are the "product of a deliberate and persistent Soviet disinformation campaign," according to Joseph D. Douglass, Jr., a specialist on the subject of Soviet deception. Prominent among these themes are:

The Soviet Union will change.

There are "differences" among Soviet leaders.

U.S.-Soviet "convergence" is possible.

No attention should be paid to official Communist ideology in the Soviet Union.—it is not relevant.

The Soviet Union is defense oriented and threatens no one; it does not seek strategic superiority nor does it want first strike capability.

In an Interagency Intelligence Study the Executive Branch has identified the objectives of Soviet policy in promoting these themes as follows:

To confuse world public opinion regarding the aggressive nature of certain Soviet policies.

To create a favorable environment for the execution of Soviet foreign policy.

To influence both world and American public opinions against U.S. military and political policies and programs which are perceived as threatening by the Soviet Union.

DANGEROUS REEFS

No stranger to deception operations, himself, on April 5, 1940, Joseph Goebbels, Minister of Propaganda of Nazi Germany, gave a secret briefing to selected German journalists during which he is quoted as saying:

Up to now we have succeeded in leaving the enemy in the dark concerning Germany's real goal, just as before 1932 our domestic foes never saw where we were going or that our oath of legality was just a trick. We wanted to come to power legally, but we did not want to use power legally. . . . They could have suppressed us. They could have arrested a couple of us in 1925 and that would have been that, the end. No, they let us through the danger zone. That's exactly how it was in foreign policy too. . . . In 1933 a French premier ought to have said (and if I had been the French premier I would have said it): "The new Reich Chancellor is the man who wrote Mein Kampf, which says this and that. This man cannot be tolerated in our vicinity. Either he disappears or we march!" But they didn't do it. They left us alone and let us slip through the risky zone, and we were able to sail around all dangerous reefs. And when we were done, and well armed better than they, then they started the war.

The valuable lesson, learned from World War II about the Nazis, unfortunately was lost with respect to the Soviets. The "risky zone" is long since past.

"MASKIROVKA"

Very little has been written about deception operations because they are among the most closely guarded secrets of intelligence services and general staffs. Since World War II the Soviets have, unheralded, developed a sophisticated and well coordinated system of military and political deception. The Russian word maskirovka includes not only military "camouflage and covert maneuvers, but also political deception designed to protect the secrecy of military operations . . ." Jiri Valenta, a student of Soviet affairs, makes an interesting point with a certain irony when he writes that, "In the case of [the Soviet invasion of] Czechoslovakia, [Prime Minister Alexander] Dubcek admitted to being surprised and deceived. But this may have been due more to his, and some of his colleagues', political naivete and self-deception than to skillful Soviet strategem." This observation could well apply to many cases of "successful" Soviet deception operations; naivete and self-deception play a very large role in Soviet schemes.

"DEZINFORMATSIA"

As Lenin told Felix Dzerzhinsky, head of the Cheka, the then KGB, "Tell them what they want to hear." Within the scope of strategic deception and important aspects of active measures are Soviet disinformation (dezinformatsia) operations. One of the many purposes of disinformation, of course, is to hide Soviet strategic intentions.

Paul B. Henze, a former high government official and a longtime student of Soviet behavior has this to say about disinformation:

It is impossible to draw a clear boundary between misinformation and disinformation. The two categories are part of a continuum which in Soviet practice extends from distortion to total falsification, misrepresentation and forgery. All parts of this spectrum are interconnected and consciously manipulated to achieve desired results. Thus false information planted abroad and seemingly originating from sources that have no connection with the USSR or Eastern Europe is fed back iinto the Soviet propaganda system, cited in the Soviet press as authoritative confirmation of views which the CPSU propagandists want to spread, and then it is disgorged by TASS and Novosti in their international services. Thus spewed out again into international information channels, it becomes self-confirming. Sometimes the process goes through several cycles. Not only current news, but even scholarly research and intelligence are influenced.

To those familiar with Soviet techniques and objectives, such operations are relatively easy to identify, but often difficult to prove. To accomplish their purposes, Soviet

propagandists and KGB operatives do not rely only on the credulity and predisposition to believe of Western and Third World journalists, writers and intellectuals. They exploit the readiness of reporters to accept cash or other favours in return for doing their bidding. In Soviet usage, dezinformatsia means deliberately concocted, falsely attributed or distorted information brought to the surface through ostensibly non-Soviet channels or outlets. Of course, the more legitimate (and unwitting) these are, the better.

CULTURAL WARFARE

Soviet propaganda themes appear at increasing frequency in Western media, including those of the U.S., in print and on the screens of motion picture theaters and home television sets. This realm of activity is called by the Soviets "cultural warfare."

According to Michael Miklaucic, of the Woodrow Wilson International Center for Scholars, the Soviets have by means of active measures gained the "higher moral ground" in the global ideological struggle.

The semantics question, which some even call the "semantics war," and which is closely related to the disinformation issue, encompasses the problem of the misuse of words and terms by the Western media, often spontaneously, often in response to Soviet guidance. "Peace" and "democracy" are words misappropriated by the Communists long ago. More recently, Afghan freedom fighters are termed "rebels," and terrorists are called members of "liberation movements." Murders are perpetrated by "right wing death squads" never by left-wing death squads, although sometimes by "guerrillas," and so forth. Some of these semantic twists are Soviet inspired, some possibly not but serve Soviet objectives nonetheless.

It is known that the Soviet intelligence services and their surrogate services in Communist countries devote considerable resources to the penetration of foreign media. Foreign nationals are recruited as "agents of influence," working clandestinely under Bloc direction or to serve as collaborators with Bloc guidance, to make things happen as the Soviets want them to hapen.

In the last few years, such Soviet operations have surfaced in the press in a number of countries from Scandinavia, France and the Netherlands to Southeast Asia. It is presumed that others have not been publicized. The practice is widespread even if publicity of the practice is not. Nevertheless, numerous representatives of the American media have said publicly that for various reasons their own profession in the United States is free from such penetration. It is truly remarkable that the U.S. armed forces and intelligence services (again, based on public records) have been penetrated as have American high technology firms and other KGB/GRU targets, yet, although a target almost everywhere in the world and of unquestioned importance especially on the American scene, the media in this country have not been targetted by the Soviets. One can only ask why?

FOREIGN BROADCASTING

While the IID directs Soviet overt propaganda abroad, including overt radio as well as press activities, the ID manages Soviet clandestine radio programming.

To complement their overt foreign language international radio broadcasts, the Soviets maintain a significant clandestine broadcasting capability as well, still another aspect of active measures. For example, the National Voice of Iran, ostensibly broadcasting from within that country, is the official voice of the Tudeh, or Communist, Party of Iran and actually transmits from Radio Baku in the Soviet Caucasus. The same transmitters also broadcast official Soviet programs in Iranian languages. During the 1979–81 hostage crisis in Teheran, this clandestine Soviet radio station transmitted false information and inflammatory rhetoric in contrast to official Radio Moscow which was on occasion cautious in its coverage. The National Voice of Iran even replayed Soviet KGB-inspired disinformation from other countries.

EVEN SPORTS

The combined Olympic team fielded by the Soviet Union, when it attends the Olympics, is largely made up of professional sports organizations, the Dinamo Sporting Club and the Central Army Sports Club (ZSKA). The former belongs to the KGB. The latter, the ZSKA, is part of Soviet military intelligence (GRU), the military counterpart of the KGB. These two sports organizations are in strong competition, as indeed are their parent organizations, the KGB and GRU, themselves.

In the Soviet Union, sports and athletes are dedicated to the enhancement of the party and the state. Moreover, the special services of athletes and sportsmen are put to use extensively by the intelligence organizations, the KGB and GRU. The Spetsnaz, Soviet military special forces—the Soviet "Green Berets," if you will—provide the athletes for the ZSKA. The KGB has its own special forces, a counterpart to the Spetsnaz, which supplies athletes for the Dinamo Sporting Club.

These troops, the Spetsnaz and the KGB's own version, are an elite fighting force devoted in wartime to operations behind enemy lines, diversionary tactics and the assassination of foreign leaders. Their mission also embraces intelligence collection (including reconnaissance), deception, sabotage, terrorism and guerrilla warfare. The mission of the GRU is essentially military, while that of the KGB is political and economic. It is from these special forces that the Dinamo and ZSKA sports competitors come.

Personnel of these Soviet unconventional forces receive familiarization tours abroad as members of Soviet sports teams. Soviet athletes are not merely winning medals when competing abroad; they are preparing for clandestine activities or unconventional warfare roles; in effect, "casting" their target. It might be added that Soviet strategic plans include the employment of elements of "underground" Communist parties in the West in support of Soviet unconventional units in time of conflict.

Regarding athletes in the Spetsnaz, a former professional Soviet army officer had this to say:

The Soviet Union needs prestige, and one way of providing this is by winning Olympic medals. The country needs an organization with draconian discipline to squeeze the maximum effort out of the athletes. At the same time, the Spetsnaz needs athletes of the highest caliber who have the opportunity to visit areas in which they may have to operate in time of war.

The athletes, for their part, need opportunities for training and need to belong to an organization that can reward them lavishly for athletic achievement, give them apartments and cars, award commissioned ranks in the forces and arrange trips outside the Soviet Union.

The Spetsnaz thus provides a focal point for the interests of state prestige, military intelligence and individuals who have dedicated themselves to sports.

The ZSKA sends its athletes all over the world, and the fact that these athletes have military ranks is not hidden. The KGB, which also has the role of assassinating enemy VIPs, has its own similar organization. . . They are ordinary but carefully selected and trained soldiers, top-grade athletes, foreigners and, at the head of all of these, the professional intelligence men.

Soviet athletes are thus carefully selected and very well cared for. In a word, they are "special;" members of an elite service. Athletes too are elements in the overall scheme of Soviet active measures.

THE WESTERN RESPONSE

THE ULTIMATE WEAPON

(According to Sidney Hook, the philosopher)

(T)he ultimate weapon of the West is not the hydrogen bomb or any other super weapon but the passion for freedom and the willingness to die for it if necessary. Once the Kremlin is convinced that we will use this weapon to prevent it from subjugating the world to its will, we will have the best assurance of peace. Once the Kremlin believes that this willingness to fight for freedom at all costs is absent, that it has been eroded by neutralist fears and pacifist wishful thinking, it will blackmail the free countries of the world into capitulation and succeed where Hitler failed.

Our inability to comprehend Soviet strategy is connected to our misunderstanding of Soviet objectives. Sir James Goldsmith cites the Carthaginians of old who, although good warriors, were essentially a trading people. "They never understood the Romans," he says, "who were military and imperial." We too are a mercantile people, like the ancient Carthaginians, Sir James says, and we seem incapable of understanding the Soviets. To combat Soviet strategy, the disinformation content of Soviet active measures, according to Sir James, rather than restrictions and controls, "we need more information, more facts. We need better journalism," he says. The light of truth, once again, is the best defense.

To quote Brian Crozier again, "The security of a nation-State or of an alliance is concerned with territorial integrity, national sovereignty and the defense of a way of life." He goes on to say:

It is not enough to know and understand: it is also necessary to act. In a world war fought largely by means other than military, the search for security cannot be confined to an anlaysis of military and weapons capabilities, useful though these may be in themselves. Nor is a purely defensive posture enough. Containment has brought us to the brink of defeat in World War Three. A more active policy is required if we are to survive.

How can the West, especially the United States, deal with the Soviet active measures offensive? Our system is such that we cannot respond in like terms.

According to Rett Ludwikowski: Moscow has not attempted to abolish the Catholic Church or the relics of private ownership in Poland, aware of the Poles' strong attachment to these institutions. It is characteristic of Soviet Policy that (in both foreign and internal affairs) Russians try to insinuate themselves into places they find weak. But

when they encounter strong opponents and the prospect of swift victory seems uncertain, they will withdraw.

Accordingly, the Russians will never attempt to attack the United States directly except in some tremendous crisis. Rather, they will endeavor to weaken America's international position, to assist America's opponents, to incite unrest among America's neighbors, and to spread communist ideas among Third World countries.

THE BEST HOPE

"The best hope that the free world remains free," according to M.R.D. Foot of the University of Manchester, "Lies in an efficient, constitutional freedom-loving—but adequately secret—CIA and FBI. Our intelligence and counterintelligence capabilities must be strengthened. Another important part of the answer is to continue to illuminate Soviet and Bloc activities in the West, to subject to the light of day the realm of Soviet active measures. In the East, again the prescription is the light of truth: to continue to reinforce the Voice of America, Radio Free Europe and Radio Liberty—and for Cuba, Radio Marti—to carry to the peoples of the Soviet system the facts of the world as it really is and the hope of eventual freedom.

TO PRIZE PRECAUTION—TO KNOW

In the words of an ancient Chinese sage: "Now the way to make the country secure is to prize precaution. Now that you are aware of the dangers, misfortune is left at a distance." For first we must know. Then we must muster the will. And then we must act. But first we must know.

One final quotation: "The history of failure in war can be summed up in two words: Too late. Too late in comprehending the deadly purpose of a potential enemy; too late in realizing the mortal danger; too late in preparedness; to late in uniting all possible forces for resistance; too late in standing with one's friends."—General Douglas MacArthur.

VFW HERBERT W. BEST POST NO. 928—50 YEARS OF ACHIEVEMENT

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985920

Mr. EDGAR. Mr. Speaker, on October 12, 1985, the Herbert W. Best Post No. 928 of the Veterans of Foreign Wars of the United States, Folsom, Delaware County, PA, will celebrate its 50th anniversary.

The golden anniversary event represents 50 years of outstanding service to the United States on the part of the thousands of VFW post members who served in defense of this country. It also represents 50 years of dedicated achievement on the part of the post membership itself in supporting and maintaining a visible image of the best America has to offer at the community and local level.

As a member of the House Veterans' Affairs Committee for the past 12 years and chairman of its Subcommittee on Hospitals and Health Care I greatly appreciate the strong contribution all of our veterans organizations have made in expressing such a clear voice in behalf of all those who have served and sacrificed so much in defense of this Nation. However, it is important for all of us to realize that the strength of the veterans voice here in Washington is only a reflection of concern and interest of millions of veterans at the local and grassroots level who have contributed so much to their local friends and communities.

The members of the Herbert W. Best Post No. 928 can be truly proud of their 50 years of progress and achievement. I salute them, and wish them well for another half century of community involvement on behalf of the veterans of this country.

For the benefit of my colleagues I would like to introduce for the record a summary of the history and achievement of the post.

HERBERT W. BEST POST NO. 928

Herbert W. Best Post No. 928, Veterans of Foreign Wars of the United States, Folsom, Delaware County, Pennsylvania—one hundred thirty-three (133) charter members installed at installation ceremonies held in the auditorium of the Ridley Township High School on June 8, 1935, charter signed by James E. VanZandt, National Commander-in-Chief.

Prior to installation, a meeting was held on April 19, 1935 at the Emertz-Mullen Post, Chester, Pa. for charter application. Frank Clayton, Commissioner of the Kedron District of Ridley Township, presided at the meeting. The acting Adjutant was Charles E. Rigby of Holmes, Pa. Nominations and elections of officers took place at Memorial Hall, Folsom, Pa. at a post meeting held on June 6, 1935. Charles B. Merritt was elected Commander, Oscar Jacobs, Sr. Vice Commander; Joseph Jackson, Jr. Vice Commander; Harry Bowe, Quartermaster; Harry McCune, Chaplain; John Hill, Officer of the Day; Jesse Wood, Oscar Jacobs, George L. Moore, Trustees. Appointed as Post Adjutant was Charles E. Rigby.

The newly organized post was named in honor of Herbert W. Best who formerly resided with his uncle, Samuel R. Linville, at Brighton Terrace, Holmes, Pa. Sergeant Best was killed in action at Chateau-Thierry, France on July 12, 1918, while serving as a member of Company B, 111th Infantry. Sergeant Best is buried in Arlington National Cemetery, Virginia.

Post No. 928 has been extremely active for over 50 years in providing service to veterans and their families. The Post Service Officers are very knowledgeable in all situations involving veterans rights.

All National Holidays are observed by Post No. 928. Proper ceremonies are adequately provided by Americanism Chairman, Past District Commander, Charles Way. Most emphasis is placed on Loyalty Day and Memorial Day Services.

Citizens, Policemen and Firemen are cited for their outstanding contributions, such as heroism and bravery over and beyond the call of duty. V.F.W. citations are presented to recipients at Loyalty Day services.

Our departed comrades, both those killed in action, and all deceased members of Post No. 928 are remembered at our post Memorial Day services held on the mound in front of the post home.

Post No. 928, in conjunction with V.F.W. National and State, conducts a Voice of Democracy Scholarship Program. This a national broadcast script-writing program designed to give high school students the opportunity to elucidate their opinions on a patriotic theme and to convey their thoughts via the broadcasting media to all America. Our chairman for this most important program is Arthur Colwell.

Community services and activities have been provided for a half century to Ridley Township and all surrounding boroughs. Post No. 928 has provided honor guards and color guards for any and all special occasions. Our services are available, upon request, to the families of our members or any veteran for funeral services. Community activities has been the key to successful relationship in our home town environment.

The post has sponsored Girl Scout and Boy Scout troops, boy's clubs, had fund raisers for charitable causes, made flag presentations and gave a meeting place for many organizations including a school for retarded children. Safety programs are provided from time to time, such as Lite-a-Bike. This program is supported by personnel from the Township Police Department. A child identificaton program is being planned for the future. Christmas parties, Easter egg hunts and Halloween parties are also provided for children in and around our community.

Our members and post auxiliary are dedicated in providing service to the community in time of peace just as they have done in time of war.

The officers for 1985-1986 are as follows: John J. Adams, Commander; Joseph Friel, Sr. Vice Commander; David Burns, Jr. Vice Commander; William Kelly, Quartermaster; Charles Way, Post Advocate; Helmut Witzel, Chaplain; Allan Jameson, Surgeon; George Lincoln, Daniel Collins, Edward Semecheski, Trustees; Joseph Palumbo, Adjutant; George Lincoln, Service Officer; Alfred Mattera, Legislative Officer; Matthew Baldwin, Guard; Daniel Collins, Officer of the Day; Harry Buzan, 7th District Commander and Lawrence Doyle, Past Commander Advisor.

Fifty (50) years of service to our veterans and community will be celebrated October 12, 1985 at the Knights of Columbus, Crum Lynne, Pa.

TRIBUTE TO MR. FRANCIS VERN KRAUSE

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. LIPINSKI. Mr. Speaker, as the saying goes, "No man stands so tall as when he stoops to help a child." This statement indeed describes Mr. Francis Vern Krause, a 40-year employee of the Chicago Park District's Department of Recreation.

Beginning as a physical instructor in July, 1946, Mr. Krause rose through the ranks of the recreation department eventually becoming the assistant general supervisor of physical activities in 1980.

During his 40 years of working with the youth of Chicago, Mr. Krause's first priority has always been to build character in the athletes he coached, trained, and counseled. His dedication to this philosophy has re-

sulted in numerous athletes achieving scholarships at the high school and college levels. Today many of his former athletes are coaches themselves and they continue to follow and use that philosophy of character building.

Mr. Speaker, I ask this august body to join with me in thanking Mr. Krause for his dedication to the youth of America and to wish him well in his retirement years. His achievements truly place him head and shoulders above his fellow man.

ETHEL MEARS—CONGRESSIONAL PUBLIC SERVICE AWARD RECIPIENT FOR REDWOOD CITY

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. LANTOS. Mr. Speaker, I call to the attention of my colleagues in the Congress the outstanding accomplishments of one of my constituents. Ethel Mears—described by one of her neighbors as "a 90-year-old dynamo"—has been named to receive the Congressional Public Service Award for Redwood City, CA.

Mr. Speaker, Mrs. Mears' contributions to Redwood City and San Mateo County through the years have been numerous and significant, but they have often gone unrecognized because of the quiet and efficient way she has pursued them. She seeks out people who are in particular need of emotional and financial support, and then—without fanfare or attention—provides that help.

Ethel Mears provided much of the original impetus for the establishment of the Fun-After-Fifty Club some 28 years ago, and she has continued to be a strong force within the group since its foundation. She was an early president and did much to encourage the development of its orchestra and choral group. She and her husband Walter furnished much of the music and costumes used by the group for special programs.

Casa de Redwood, the first senior housing development in Redwood City, was another project which benefited from her enthusiastic support. She helped initiate the study of senior transportation which resulted in Redi Wheels and Escort Service Programs for seniors.

As a member of the Senior Center Advisory Committee, she was instrumental in bringing about the renovation of the Veterans' Memorial Building and developing it as a senior center. In cooperation with the San Mateo Community College District, Mrs. Mears helped design and implement the "Better Living for Later Years" Program. This extremely popular and worthwhile program has been conducted at several senior centers in recent years.

For 12 years, Mrs. Mears served on the San Mateo County Commission on Aging, and she was one of the founders of the San Mateo County Senior Forum. Recently she was appointed by the Redwood City Council to serve on the Redwood City Senior Affairs Commission. She has also served as a member of the board of directors of the Salvation Army.

Mr. Speaker, Ethel Mears exemplifies the concept behind the Congressional Public Service Awards—her life and commitment demonstrate the difference that one concerned individual can make in the life of her community.

PERSONAL EXPLANATION

HON. JIM MOODY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. MOODY. Mr. Speaker, during the vote on the Wylie amendment to the appropriations bill for the legislative branch on July 18, I am recorded as voting "present" instead of the "no" I intended to vote. I believe this was the result of a voting card malfunction. I adamantly opposed this amendment, which deleted funding for the printing of Playboy magazine in braille.

The supporters of the amendment repeatedly claimed that this was nothing more than a deficit reduction measure; this action, however, has far greater implications. In effect, Congress is now undertaking the "duty" of acting as a censor for the blind.

The Library of Congress has provided free reading material for the blind since 1931. Until the passage of the Wylie amendment in July, a committee composed of representatives of consumer groups, such as the American Council of the Blind, the Blinded Veterans Association, and the National Federation of the Blind, selected, without restraint, the material to reproduce in braille and recorded format. I firmly believe that this committee should retain full autonomy and not be shackled by others' opinion of what material is worthy of reproduction for the blind.

If this is simply a matter of "deficit reduction," I question why Playboy was the only magazine out of the 36 reproduced whose funds were eliminated. By what standard does Congress declare the articles (pictorial material is never reproduced) unsuitable for funding? What rationale have we to make the eighth most popular magazine among the blind inaccessible?

I urge my colleagues to reconsider their vote for this unprecedented censorship. I only hope that this issue will be reversed in the future.

UNITED STATES-JAPAN TRADE: HENRY SEES THE LIGHT

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. STARK. Mr. Speaker, in today's Washington Post, Henry Kissinger finally said, in his own baroque way, what many of us have been saying about trade policy for years. Wittingly or not, he has supported a proposal if mine that has been largely ignored in this year's trade debate. I'd like to summarize some of his main points because I think they're good ones, and I don't want to force everyone to plow through his entire essay to find them.

First, we need some stability in our trading system. Working in a global market where currency prices fluctuate dramatically, markets open and close capriciously and the rules of doing business change frequently inspires arbitrage and effectively precludes the formulation of long-run business strategies. Markets do not adjust freely; there are huge transition costs associated with opening and closing businesses and moving workers among different sectors.

Second, the underlying causes of our trade imbalance are macro in size and cannot be solved with microapproahes. Eliminating all the unfair trading practices of the Japanese would only reduce our trade deficit with them by about a third. That doesn't mean we shouldn't confront those problems—we certainly should—but it's a little like trying to balance the Federal budget by eliminating Amtrak. Currency intervention will help at the margins and will reduce pressures in the short run, but we need to solve the underlying causes of the currency imbalance to effect long-run stability.

Third, we need to respect the culture and traditions of our trading partners, especially the Japanese, before we negotiate with them. We have a long-standing inclination to try to force-feed the American way all over the world and we usually get our hands bitten off. Previously we saw this failing in our military overseas; now it's with our trade neogitators. It would be nice if someone in the administration would read some history.

Fourth, we need to inspire the Japanese to become more responsible members of the trading system. In the short run, a country can earn an advantage by piling up a trade surplus at the expense of its partners. In the long run, though, other countries will react fiercely to protect the jobs and industry they are losing, and the amicable cooperation on which trade is based will disappear. What we need to do as a first step is to limit the size of the trade surplus that the Japanese can hold with us. We should not haggle with them over how to do it, merely mandate that they do it or suffer penalties imposed by us. The methods they use could then be determined internally, through their own process, with their own priorities. It would be an easy rule to enforce and would tie our countries more closely together.

Dr. Kissinger's proposal is identical to a resolution, House Joint Resolution 238, that I introduced nearly 3 years ago and reintroduced on April 4, 1985. When I did so, people said it was a crazy idea. Is Henry Kissinger crazy? Fifteen years ago, I thought he was, but now I think he finally might have acquired some sense. Perhaps

his distinguished support will encourage some action on my resolution.

There is a global trade problem that is much more complex and widespread than the United States-Japanese imbalance. It involves stagnant industries and huge foreign debts in South America, grinding, hopeless poverty in Africa and single-product economies in the Middle East that have been unable to diversity and are now left potentially vulnerable as the price of their single product slides downward. America neither can nor should shoulder the burden for these problems on its own. The Japanese have a vital interest in economic and political stability and they should do more to preserve it. Unfortunately, the petty squabbling match we are in with them is not doing much to inspire their cooperation. We are not challenging the Japanese to show us their best side, we are goading them into exhibiting their most obstinate side. They have the ability to dramatically help develop the non-OECD world and to galvanize the international trading system. We should encourage them to do so.

Mr. Speaker, it's good to have Dr. Kissinger on board. He's a little late in reaching the conclusions that Lester Thurow at MIT and others have been preaching, but perhaps the oracular nature of his pronouncements will prod others to start thinking of trade in these commonsense terms. If so, we will all be grateful.

THE HISTORY OF GUESTWORKERS IN THE UNITED STATES

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. TORRES. Mr. Speaker, I rise today to call to the attention of my colleagues an article published on October 2, 1985, in the Los Angeles Times. The article, entitled "Growers Still Addicted to Foreign Workers," provides an important historical perspective to the current debate over the guestworker provisions of pending immigration reform legislation.

Mr. Speaker, I oppose expanded guestworker programs. These programs have never worked; they stimulate increased illegal migration and increase agricultural growers' dependence on foreign labor. They inevitably lead to massive abuse and exploitation. Finally, such programs are inconsistent with the purpose of immigration reform. If the purpose of immigration reform is to minimize unfair competition for domestic jobs, the importation of hundreds of thousands of foreign workers is obviously inimical to the goals of the legislation.

As many of my colleagues know, the immigration bill recently passed by the other body includes a massive new guestworker program. The so-called Wilson amendment to S. 1200 would allow growers to import as many as 350,000 temporary agricultural workers into the United States every year. In addition, the bill includes three other temporary worker programs for agriculture: The so-called transition program, a significantly streamlined H-2 program; and an agricultural commission to study and make recommendations on the needs of agricultural growers. Together, these provisions could allow as many as 500,000 guestworkers into the United States annually to compete for domestic jobs.

Mr. Speaker, I would hope that my colleagues will follow a different course. The need for massive new guestworker programs is unproven. The record of such programs is filled with countless examples of abuse and policy failure. It is anticipated that this body will soon consider immigration legislation, and there is little doubt that agricultural growers will lobby heavily for massive guestworker programs. I urge my colleagues to resist these efforts.

At a time when domestic farmworkers suffer from double-digit unemployment, it would be the ultimate irony for this body to enact legislation that would create massive guestworker programs in the name of saving American jobs. I ask that the full text of the referenced article be printed in the RECORD.

[From the Los Angeles Times, Oct. 2, 1985]

GROWERS STILL ADDICTED TO FOREIGN WORKERS

Congress appears closer than ever to passing a law that will punish—by fines or, ultimately, imprisonment—employers who knowingly hire millions of illegal aliens who are usually willing to accept low wages and harsh working conditions.

However, regardless of any legislation, chances are that many growers, who rely heavily on illegal aliens, will be given an "escape clause" so that they can legally continue the hiring practices that they have been using for more than 100 years.

In fact, on Monday the Reagan Administration gave its general blessing to a Senate-approved proposal by Sen. Pete Wilson (R-Calif.) to create a new "guest worker" plan that would allow growers of certain crops to continue bringing in hundreds of thousands of foreign workers for harvesting crops.

Wilson insists that, without the help of foreign workers, crops will rot in the fields, growers will go out of business or move their farms to Mexico, food prices will skyrocket and, in general, the nation's entire economy will be badly hurt.

Not everyone agrees. There is strong opposition to the idea of giving special treatment to growers from many quarters. Former Labor Secretary W. Willard Wirtz calls the plan "a sad but perhaps not surprising example of the cynicism and greed that has characterized the actions of so many growers for so many years."

Twenty years ago, Wirtz was bitterly denounced by growers for the crucial role that he played in ending the old bracero program, which helped growers legally get 1 million or more foreign nationals as fieldworkers from 1941 to 1964.

Wirtz, now in retirement, said in a telephone interview from his home in Washington that "it all sounds so similar to growers' cries of outrage when Congress allowed the old bracero program to die on Dec. 31, 1964, in large part because so many workers then in this country legally were without jobs."

"At that time, the U.S. unemployment rate of about 5% was considered too high, and Congress decided we didn't need the foreign workers. Now the jobless rate is well over 7%—and more than double that in the rural areas—yet once again we are hearing the cries that 'crops will rot in the fields' unless growers get foreign workers."

There are differences between the bracero program and the proposed "guest worker" plan that Wilson and others insist will provide adequate protection of foreign workers from abuses by employers. In addition, they say, the new plan will reduce, if not eliminate, the competition for farm jobs between the foreign nationals and U.S. domestic workers.

But it is going to be difficult to reassure domestic workers that they will be protected by the new law when, for instance, one of those involved in enforcing the proposed "guest worker" plan will be Deputy Labor Secretary John Norton, who testified in Congress on Monday in favor of the plan.

That's because Norton's family farm, J.R. Norton Co., has been found guilty by the California Agricultural Labor Relations Board of numerous state farm labor law violations ranging from firing workers for union activities to refusing to bargain in good faith with the United Farm Workers. Norton's workers chose the UFW as their bargaining agent in a state-conducted, secret-ballot election in 1977.

The company so far has lost court appeals and faces penalties that could range up to $1 million or more.

An aide to Wilson said that it is unfair to believe that Norton might not properly help enforce the proposed "guest worker" plan. After all, he said, Norton's company is "just one of many California growers who were unfairly prosecuted by a state agency that was biased in favor of Cesar Chavez and his union."

The national AFL-CIO has long backed laws designed to punish employers who knowingly hire illegal aliens, and it opposes making an exception for growers. However, Dolores Huerta, UFW vice president, says that no law designed to halt the flow of illegal aliens will work—except one that would help Mexico and other nations make their own economies so strong that their workers would not want to come to the United States. That is her way of saying that the UFW does not support penalties against employers who hire illegal aliens.

One of the more iroinic aspects of the efforts by conservatives such as President Reagan, Wilson and others to create another government-sponsored plan to help growers import foreign workers is that they are also among the nation's strongest advocates of a free-market, free-enterprise economy.

Normally, under the free-market concept, growers would have to raise wages and improve working conditions enough to attract U.S. workers to the jobs.

In fact, when the bracero program was killed by Congress in 1964, Wirtz said that "growers must now compete in the marketplace with other elements of the nation's economy for their workers. Americans can do the job, and there are enough of them."

But it didn't work that way. An estimated half of the present farm labor work force (variously estimated in California at between 200,000 and 300,000) is made up of illegal aliens, and, while farm labor wages have gone up somewhat (in part to keep out the UFW), growers insist that there are still not enough domestic workers to harvest their crops.

Even when the old bracero program was being used to bring in thousands of workers—mostly Mexicans—each year to harvest crops, illegal aliens were also coming here in record numbers. This year, the Immigration and Naturalization Service says the flow of illegal aliens is escalating. An estimated 1 million foreigners—about one-third of those who actually entered the country illegally—were apprehended last year by the INS.

Some of those who backed an end to the bracero program said in the early 1960s that growers should, however, be given a chance to phase out their dependence on foreign workers. Even former Democratic California Gov. Edmund G. (Pat) Brown urged Wirtz to "give the growers time to find domestic workers for farm jobs."

But the use of foreign labor is obviously a difficult habit for growers to break, and not even advocates of the proposed "guest worker" plan claim the plan will ever mean that growers will do without foreign laborers.

The habit is one of very long standing. Most observers refer to May 10, 1869, as the start of the foreign farm labor story in California. That was the day when a golden spike was driven into the last rail linking the Union Pacific with the Central Pacific railroad, opening an easy route from East to West. Thus, California farmers were able to start shipping food eastward in great quantities. And completion of the railroad also signaled layoffs for the thousands of Chinese who were brought to this country to work on the railroads. Their labor was cheap, compared to the wages expected by U.S. workers, and so the Chinese went to work for growers.

Heavy unemployment in the 1880s ignited the racist Chinese Exclusion Act in 1882, abruptly cutting off the major source of foreign farm labor at that time. Nevertheless, the pattern of growers relying heavily on cheap foreign labor had been established. The Chinese were followed by workers imported from Japan, the Philippines, Hawaii, the Caribbean and other foreign areas.

But the closest source for such workers was Mexico, and for many years Mexicans crossed into the United States, at times legally and at most other times illegally. Thus, that nation became the major supplier of cheap foreign labor.

The Great Depression brought Western growers the labor of poor whites from Oklahoma, Arkansas and other Southern and Southwestern states. (They became the subjects of John Steinbeck's famed "Grapes of Wrath.") But as the Depression eased, nonfarm employers began once again competing for their labor, and illegal aliens, or foreigners brought in by the U.S. government, replaced the "Okies," and growers' reliance on foreign workers resumed.

The trend has grown, and today employers in the garment, restaurant and other industries also make extensive use of illegal aliens for cheap labor. The proposed immigration reform law may stop much, if not all of that, which could mean a substantial increase in the number of jobs for domestic workers.

But unless the "guest worker" plan for growers includes tough, rigidly enforced prohibitions against unfair competition with U.S. workers, growers are likely to continue their 130-year-old tradition of relying on foreign workers as the mainstay of their work force.

TRIBUTE TO RICK REUSCHEL

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. LIPINSKI. Mr. Speaker, with the excitement of the major league baseball playoffs upon us, I would like to take a few moments to recognize and honor Rick Reuschel, an outstanding right-handed starting pitcher for the Pittsburgh Pirates and the odds-on favorite to receive the 1985 "Come Back Player of the Year" Award.

Rick Reuschel pitched for the Chicago Cubs from 1972 to 1981 and again in 1984. While with the Cubs, Rick posted double-figure victories in nine straight seasons. After pitching for 10 magnificent years with the Cubs and a World Series starter with the 1981 New York Yankees, no team would sign Rick Reuschel. Most teams were concerned with the shoulder surgery Rick underwent in 1982. They thought his pitching years were over. Finally, in September 1983 the Cubs signed Rick again. But after going 5–5 with a 5.17 ERA in 1984, Rick left the Cubs at the end of the season and announced for free agency.

Again, there was not much interest shown in Rick by any of the major league clubs until the Pittsburgh Pirates signed him to a minor league contract before the start of the 1985 season. Toward the end of May, Rick joined the Pirates and went on to win 8 of his first 10 starts. Rick finished up the 1985 season with a 14–8 record and the fourth best ERA in the National League at 2.27. Taking into consideration his 1985 minor league record of 6–2, Rick unofficially had over 20 victories this year. Recognizing Rick's continued ability to be an effective starting pitcher and his influence on the younger pitchers, the Pirates recently signed him to a 3-year contract.

Mr. Speaker, I want to congratulate Rick Reuschel on his refusal to give up when things were not going his way. His determination on and off the playing field is an inspiration to all of us. I wish him continued success in Pittsburgh.

MEMORIAL TRIBUTE TO DR. FRANKLIN L. ASHLEY

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. WAXMAN. Mr. Speaker, in February 1985, one of the most noted surgeons and humanitarians of the century passed away in St. Petersburg, FL—the city in which he was born. Though his work took him to the far corners of the globe, Los Angeles became his home. Many of the people who loved and admired Dr. Ashley have sought to pay public tribute to him. He will be honored posthumously by the Music and Performing Arts Angels with the Angel Victory Award.

Orphaned at an early age, Franklin Ashley worked his way first through law school and later, after the tragic death of his only sister, through Northwestern University Medical School. He furthered his studies with a year at Cornell and another at Columbia.

One of the great heroes of World War II, Dr. Ashley served as a commander aboard the aircraft carrier U.S.S. *Hornet* during the 1945 sea battle at Okinawa and Kyushu. He is credited with saving hundreds of lives and received the Presidential Citation and other honors. It was during this experience on midseas, putting back together badly broken and burned bodies, faces, teeth, and eyes that Franklin Ashley began his lifelong mission of healing through plastic surgery. In Hiroshima and Vietnam and in the street ghettos of Los Angeles, Dr. Ashley performed his miracles, at his own expense and without any publicity. At the University of California, Los Angeles, he founded the plastic surgery department and trained over 100 doctors—those who could meet his stringent professional requirements.

Dr. Ashley's renowned skills were in great demand by the stars of Hollywood and the social elite. At the time of his death, there were over 200 on the waiting list for his services.

In spite of his demanding schedule, Franklin Ashley went back time and time again to the work he found most gratifying—saving helpless children. His love for children brought about the founding of Garissa's Boy Town in Kenya. During a trip to Africa, he saw orphaned cripples, many of them lepers, abandoned as unfit by their parents, according to tribal custom. Dr. Ashley founded a home for these outcast children, gave them food, medical care and even improvised "crutches" out of tree limbs until he could return with proper artificial limbs. In many succeeding trips, he brought them books, clothes, and other supplies with his own funds. He even enabled them to become self-supporting by diverting water from a nearby river so that they could grow and sell fruits and vegetables. Many of them leave the settlement to attend high school in the city and then return to help with the younger boys. It is little wonder that to these boys he was known as the "White God."

Dr. Franklin Ashley was a legend. Legends never die but their presence is missed. The work of Dr. Franklin Ashley, hopefully, will be carried on by others who will be inspired by his story.

I ask the Members to join me in remembering Dr. Franklin Ashley as a great American and as an outstanding human being.

THE FARMER'S FRIEND: WAYNE ROTHGEB

HON. DAN COATS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. COATS. Mr. Speaker, I rise today to note the retirement of a man who has helped forge understanding between the farmer and the farmer's city cousin over the past several decades in the tristate region of Indiana, Michigan, and Ohio. The retirement of this man, Wayne Rothgeb, a nationally recognized broadcast journalist, leaves a gap that I believe will not soon be filled in our part of the Nation.

Wayne Rothgeb is an important spokesman for the agricultural community in the part of the Nation that I represent. The Allen County native was born on a farm near New Haven, IN, and spent 4 years as an Air Corps pilot during World War II. He saw extensive action in South Pacific battle zones. After the war, he received his B.S. in agriculture from Purdue University. For the last 34 years, Wayne was host of his own show on WKJG-TV in Fort Wayne, an NBC affiliate. He has also served as assistant Jay County agricultural agent.

While Wayne's stories and features are of particular interest to the farm community, they have also provided a tremendous service in explaining the problems and challenges of agriculture to our city friends. The educational efforts are particularly important and rewarding in light of the recent agricultural slump. The seeds of understanding that Wayne has sown for 34 years are bearing great fruit today in building a consensus and unity between two diverse segments of the population. That consensus is that farm success is everyones success and farm problems are everyone's problem.

For his high degree of professsionalism, integrity, and wit, Wayne recently received a national award, "Farm Broadcaster of the Year."

But such recognition, and a large following, have not changed this advocate for the farm community. Wayne Rothgeb remains a down to earth, folksy, sensitive individual who works hard to serve the needs of the community. Such selfless dedication earns him the title of "The Farmer's Friend." Wayne, on behalf of myself, residents of the Fourth District, and farmers all over the tristate area, we salute you. Thank you for all you have done.

GREATER NEW HAVEN BUSINESS AND PROFESSIONAL ASSOCIATION

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. MORRISON of Connecticut. Mr. Speaker, it is with great pleasure that I rise today to recognize the achievements of the Greater New Haven Business and Professional Association in encouraging the development of minority businesses in Connecticut's Third Congressional District.

The Business and Professional Association has been helping minorities start up and expand small businesses in the Greater New Haven area for the past 20 years. Largely run by members who volunteer their professional skills, this nonprofit organization offers a wide variety of services important to business development, including business planning assistance, referrals to financial sources, and development of marketing strategies and loan proposals. So far this year alone, over 75 management and technical assistance advocate tasks have been completed.

In addition to directly advising minority businesses, the association has also been very active as an advocate for minority business participation in both private and government contracting bids. In particular, the association has assisted general contractors in the Greater New Haven area in identifying and hiring minority subcontractors.

The Business and Professional Association will be celebrating its 20th annual awards dinner on Friday, October 11. This year's theme will be encouraging minority youth to become aware of and take advantage of available business opportunities. The guest speaker will be Iris W. Randall, president of the successful New Beginnings Consulting Firm based in New York City.

Several local business and community leaders will be honored at the dinner for their high achievements in their chosen professions and for their outstanding contributions to the local community.

Mr. Speaker, I am pleased to bring to the attention of my colleagues the four remarkable people who will be honored on Friday.

I know it is with great pride that the association presents the President's Cup Award to Mr. Willie A. Holmes, president of Barkley Associates in New Haven and an active member of many local, State, and national organizations. Mr. Holmes has provided the Greater New Haven Business and Professional Association with his strong and resourceful leadership as their president since 1983, and I join his colleagues in wishing him many more years of success.

The association's Community Service Award is being presented to two remarkable individuals, Hon. William Riley Dyson and Mrs. Mayola Riddick. First elected to the State legislature in 1977, Representative Dyson has done an outstanding job of representing Connecticut's 94th District. A respected teacher and administrator with both national and international experience, Representative Dyson has been actively involved in numerous civil activities throughout New Haven since moving to New Haven in 1970.

Mrs. Mayola Riddick, the second Community Service Award recipient this year, is the director of the New Haven Education Support Program which is designed to provide programs for high-risk children and juveniles. In addition, she also directs the Free Butter and Cheese Program provided by the Federal Government, which services over 4,000 New Haven people.

The deserving recipient of the Outstanding Business Award is Mr. Ernest Jones, a past officer and board member of the association, as well as president of the Dixwell Plaza Merchants Association and chairman of the city employees' retirement fund.

Mr. Speaker, the Business and Professional Association has clearly made a difference in many lives in the Greater New Haven community and is deserving of our praise and admiration. The men and woman whom they have chosen to honor this year typify the outstanding achievement and community service that this organization encourages. I know that my colleagues join me in congratulating the Greater New Haven Business and Professional Association and this year's outstanding awards recipients for their dedication to the pursuit of excellence in both professional and community service.

WHERE IS THE BALANCE COMING FROM?

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. GARCIA. Mr. Speaker, a balanced budget, or a manageable deficit is a desirable if not easily achieved goal. But how do we do it? We must decrease spending, obviously, but we should decrease funding for programs, such as defense, that are already heavily inflated.

Who will vote for a balanced-budget amendment? Those in Congress who are unwilling to vote for decreases in spending, particularly this close to the beginning of another election year. Many who vote for this amendment will do so in all sincerity, because they believe, as I am sure we all do, that we should not leave future generations of Americans, our children and grandchildren, with staggering deficits. But many will also vote for this amendment because it is an easy way out. It is a way to say we are for a balanced budget, without doing the actual dirty work required. It is an example of legislative buck passing, requiring the President to do what we have been unable or unwilling to do.

The Gramm-Rudman proposal was offered in a good faith effort to reduce this debt that threatens to strangle our economy. However, this balanced budget effort will reduce the deficit in an unbalanced manner. The proposal exempts so many programs that the center on Budget and Policy Priorities states that programs for the poor will shoulder most of the reduction burden.

Is there balance when the needy is this country must pay, when the most needed social programs face unceasing funding cuts while the defense budget balloons? Defense is necessary, but not at the expense

of the hungry, the homeless and the helpless of our Nation.

Under Gramm-Rudman, defense contracts are exempt from reductions because they are considered uncontrollable funds. This is certainly one occasion on which I agree with my colleagues from the other side—in this instance they have appropriately described the administration's policy on defense spending—uncontrollable.

"INCOME AND JOBS ACTION DAY" IN SEATTLE, WASHINGTON

HON. CHARLES A. HAYES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. HAYES. Mr. Speaker, I want to draw the attention of my colleagues to the occasion of my recent visit to Seattle, WA. I was invited by the United Food and Commercial Workers [UFCW] local 1105 to be a speaker at a jobs rally. The Income and Jobs Action Act, H.R. 1398, a bill I introduced which now has 29 cosponsors in the House, was the subject of the jobs rally.

Mr. Speaker, the Honorable Charles Royer, mayor of Seattle, WA, issued a proclamation making October 5, 1985, "Income and Jobs Action Day." The proclamation eloquently recognizes the right of all Americans to a decent job or an adequate income for those adults unable to find employment.

Mr. Speaker, according to a February 5, 1985, Congressional Budget Office report, a 1-percent reduction in the unemployment rate will reduce the deficit by $40 billion in fiscal year 1986. A 3-percent reduction in the unemployment rate would reduce the deficit by $120 billion in fiscal year 1986. What could have a more positive impact on our American society than reducing the deficit by putting people back to work.

Mr. Speaker, I believe you and the rest of my colleagues will find the proclamation I received, to make H.R. 1398 a law, very interesting.

The proclamation from the city of Seattle, WA, which calls on Congress to pass H.R. 1398 follows:

PROCLAMATION

Whereas, all Americans have a right to earn a decent living to support themselves and their families; and

Whereas, our nation's economic policy must recognize this right and also provide an adequate income for those adults who are unable to earn their living through paid employment; and

Whereas, U.S. Representative Charles Hayes of Illinois, along with other distinguished members of Congress, has introduced the Income and Jobs Action Act of 1985 to establish such a policy and mandate a coordinated program of implementation; and

Whereas, the City of Seattle supports this effort to ensure the right to a secure economic future for Americans;

Now, therefore, I, Charles Royer, Mayor of the City of Seattle, do hereby proclaim October 5, 1985, as income and jobs action day in Seattle, and urge the people of our city to support this important federal legislation.

CHARLES ROYER,
Mayor.

HEALTH CARE COSTS ARE OUT OF CONTROL

HON. TOM LEWIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. LEWIS of Florida. Mr. Speaker, the Ways and Means Committee is currently considering an issue that is a concern to all Americans—tax reform. Several proposals to alter our Tax Code are being discussed; however, I believe one issue that needs attention is health care.

Health care costs are out of control. Congress must address this concern. Therefore, I have joined my colleagues, Hon. SILVIO CONTE and Hon. OLYMPIA SNOWE, in introducing legislation which I feel provides an excellent start in helping middle-class Americans who care for family members that suffer from Alzheimer's disease and related disorders. This legislation would provide a nonrefundable tax credit for individuals who care for a relative that has one of these diseases. The tax credit is designed to assist individuals who earn under $60,000 and would be phased out as income rises above this figure. The maximum credit of 30 percent would be granted for persons earning under $25,000.

Caring for victims of Alzheimer's disease is just a start. As Members of Congress, we must pursue methods to keep health care costs down and to help those middle-class individuals who are most burdened by these costs. For example, the cost of institutionalizing an Alzheimer victim in Florida routinely costs approximately $2,500 per month. It is my hope that the Ways and Means Committee and all interested members will get involved in addressing this vital issue.

ACHIEVING SAVINGS IN THE SOCIAL SECURITY SYSTEM THROUGH ELIMINATION OF UNNECESSARY BENEFITS

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. PANETTA. Mr. Speaker, I would like to take this opportunity to reintroduce legislation that I sponsored in previous Congresses to make a small but significant change in the Social Security laws. The proposed change would eliminate a benefit that is contrary to the intent of the Social Security system, and is not needed by the recipient. By making such a change, we could save needed dollars in outlays, thereby strengthening the system as a whole.

Currently, the system treats a stepchild as a natural child for purposes of eligibility for family benefits. The child is entitled to receive survivor's, retirement and disability benefits through age 19, if he or she remains in school.

Clearly this provision is unobjectionable. An individual who has married the natural parent of a child and has adopted the child takes on the financial responsibility for his or her support. Thus, if the stepparent becomes disabled, dies, or retires, the stepchild is, and should be, treated as the natural child.

My bill is directed toward the situation in which the stepparent and natural parent become divorced and the child receives support from another source. Under current law, the child still receives benefits from the stepparent even though he or she now has a new source of support. For example, the following situation actually occurred in my district in California. A man married a divorced woman with two children and soon thereafter became disabled. The two children, as dependents, were eligible for and received family benefits. Subsequently, however, the couple was divorced and the woman remarried another time. Yet the children continued to receive benefits on the original man's disability, despite the fact that the children were being adequately supported by the woman's new husband and by child support payments received from the natural father. Such a situation is clearly unnecessary, and should be changed.

Not only does this loophole place an additional burden on the Social Security fund, but it unfairly penalizes the natural children of the disabled individual. Since the law places a cap on total benefits a family may receive from Social Security, the sums available to the natural children—who may not have another source of support—must be shared with the stepchildren who do not need it.

My bill amends title II of the Social Security Act to eliminate benefits for any individual who qualifies only as a stepchild, when the natural parent and the insured individual are divorced and the child is receiving support from a source other than that natural parent. The bill also applies to stepgrandchildren under comparable circumstances.

Mr. Speaker, I firmly believe that this legislation would achieve exactly the kind of reform we should be looking at in all spending programs in these days of budget conscious cost cutting. The savings would be realized not through reduction of benefits or raising of taxes. In no way does it betray the original intent of the Social Security Program. It is merely a fiscally responsible correction of a previously unrecognized loophole in the laws. I urge my colleagues to lend their support to this reform.

H.R. 3537

A bill to amend title II of the Social Security Act to provide that a child's insurance benefit shall not be payable to an insured individual's stepchild or stepgrandchild, after such child's parents are divorced, for any period during which such child is receiving support from another source

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SUSPENSION OF CHILD'S INSURANCE BENEFITS IN THE CASE OF A STEPCHILD OR STEPGRANDCHILD FOR MONTHS AFTER A DIVORCE OF THE CHILD'S PARENTS DURING WHICH THE CHILD RECEIVES OUTSIDE SUPPORT.

Section 202(d) of the Social Security Act is amended by adding at the end thereof the following new paragraph:

"(10) A benefit for any month under this subsection which would (but for this paragraph) be payable, on the basis of the wages and self-employment income of an insured individual, to any person solely as the stepchild or stepgrandchild of the insured individual shall not be payable if—

"(A) such person is the insured individual's stepchild, the insured individual and such person's other natural parent or stepparent were divorced prior to that month, and such person is receiving support, as determined under regulations of the Secretary, from any source other than such other natural parent or stepparent and the insured individual during that month, or

"(B) such person is the insured individual's stepgrandchild, the insured individual's son, daughter, stepson, or stepdaughter who is a natural parent or stepparent of such person and the other natural parent or stepparent of such person were divorced prior to such month, and such person is receiving support, as determined under regulations of the Secretary, from any source other than such son, daughter, stepson, or stepdaughter and the insured individual during that month.".

SEC. 2. EFFECTIVE DATE.

The amendment made by section 1 shall apply with respect to monthly insurance benefits payable under title II of the Social Security Act for months after the month in which this Act is enacted.

A TRIBUTE TO CECIL W. WOOD

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. DYSON. Mr. Speaker, I would like to take this opportunity to honor a man whose untiring and unselfish commitment to community and country has long been a source of great pride for the citizens of Maryland. Beginning in 1947 with a 4-year tour of duty in the U.S. Marine Corps, and most recently as an engineering technician for the U.S. Army Chemical Research and Development Center at Aberdeen Proving Ground, Mr. Cecil W. Wood has served his country with valor and distinction.

As you know, Mr. Speaker, the award program for the outstanding handicapped Federal employees of the year for 1985 is scheduled to be held on October 10, during National Employ the Handicapped Week. Mr. Wood, who hails from Harford County in Maryland's First Congressional District, has been accorded by act of the U.S. Army the high honor of nomination for this distinguished award.

Since suffering an injury that resulted in paraplegia 30 years ago, Mr. Wood has shown himself to be a man of courage and compassion. Just as Mr. Wood is committed to excellence in the work that he does at Aberdeen Proving Ground, he is dogged in his efforts to ensure Federal, State, and county compliance with building regulations involving accessibility for the handicapped. Volunteering his own time, Mr. Wood searches out public buildings for code violations and takes appropriate action to see that these violations are corrected. Because of his knowledge of this aspect of building construction, Mr. Wood is often called upon as a consultant on handicapped access issues by local school boards, and town, county, and State officials. Mr. Wood also devotes his time and energy to providing free transportation to many handicapped people in his community.

Mr. Wood's strong commitment to civic and humanitarian achievement is well known in the State of Maryland. Among his many accomplishments, Mr. Wood is chairman of the Harford County Governor's Committee on the Employment of the Handicapped; a member of the Governor's Committee for Employment of the Handicapped; secretary and treasurer of the Edgewood Christian Fellowship; chairman of the Edgewood Elk's Most Valuable Student Scholarship Program; chairman of the Northeast District Elks Tri-State Association Scholarship Program; past president of the Independent Handicapped Club of Harford County; member of the Aberdeen Proving Ground Committee for the Disabled; member of the Harford County Human Relations Commission; member of Chapter 30 of the Disabled American Veterans; and last year, recipient of the Department of the Army Handicapped Employee of the Year Award.

In so many ways, Mr. Wood exemplifies that which has made our country great—a spirit of giving, a belief that each of us, in our own way, can make a difference. Cecil Wood is a man who knows that actions speak louder than words. That if we strive in the face of adversity, that if we dare to challenge the limits of our abilities, not only do we grow stronger, but we also give hope and inspiration to others. So on this occasion, Mr. Speaker, it is with a sense of deep pride that I honor a great American, Mr. Cecil W. Wood.

AMERICAN HOSTAGE CRISIS IN 571ST DAY

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. O'BRIEN. Mr. Speaker, today is the 571st day Americans have been held hostage in Lebanon.

William Buckley was kidnapped on the streets of Beirut on March 16, 1984, 571 days ago today.

Today marks the beginning of the ninth month of captivity for Father Lawrence Jenco, a priest from Joliet, IL.

Terry Anderson, the Associated Press bureau chief in Beirut, was taken hostage in Lebanon 206 days ago today.

David Jacobsen, director of the American University hospital in Beirut, was kidnapped 133 days ago.

Thomas Sutherland, dean of the American University school of agriculture, was taken hostage in Lebanon 121 days ago.

Today also marks the 308th day since the kidnaping of Peter Kilburn, the American University librarian.

Mr. Speaker, the American hostage crisis is now in its 571st day. The crisis didn't begin with the hijacking of the Italian cruise ship. It won't end until the Americans held hostages in Lebanon are returned to the United States safe and sound.

THE RED CROSS TO THE RESCUE

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. COURTER. Mr. Speaker, the following article by Dale Taylor of the Trenton Times provides a solid and comprehensive history of one of our most important service organization, the American Red Cross. As with every tragic event since the American Civil War, the Red Cross is again coming to the aid of those in need. In this instance, it is the victims of the earthquake in Mexico who desperately need the services of this humanitarian organization. I commend this article to the attention of all of my colleagues who wish to know more about the background of the American Red Cross.

[From the Trenton (NJ) Times, Sept. 28, 1985]

THE RED CROSS: A TRADITION OF SERVICE

(By Dale T. Taylor)

The recent earthquakes that have devastated Mexico have, once again, confirmed the untold amount of human suffering that can come without warning anytime, anywhere. For many, the shock of such disasters is hard to overcome.

But, for Red Cross chapters around the world and particularly in the U.S., such tragedies are a call to action. And action is what the Red Cross is all about.

The American Red Cross story actually begins with one of America's fondest heroines: Clara Barton. Miss Barton came to the public's attention during the American Civil War when she cared for the wounded of both the Union and Confederate armies.

Because of her unselfish dedication, a dedication that still marks the Red Cross of today, she was called "The Angel of the Battlefield." While later visiting Europe in 1869, Miss Barton first heard of the Red Cross. And while assisting the Red Cross during the Franco-Prussian War of 1870-71, she became convinced that the need for a

similar organization in America was at hand.

Along with a group of friends and supporters, Miss Barton helped to establish the American Association of the Red Cross in Washington, D.C. in 1881. (The organization was later reincorporated in 1893 as the American National Red Cross).

For more than 100 years afterward, first through Clara Barton's leadership and then through the vision and dedication of countless others, the American Red Cross has responded to the natural and human disasters that have inflicted great pain and suffering on millions.

In 1881 Miss Barton directed disaster relief operations on behalf of forest fire victims in Michigan. She was there to aid those who suffered from the great floods of 1882-84 on the Ohio and Mississippi Rivers.

Once again, in 1889, the Red Cross stood tall in assisting the flood-stricken community of Johnstown, Pa. Internationally, the American Red Cross was there to offer the hand of assistance across the great stretches of ocean that separate America from those who suffer in foreign lands.

The Red Cross administered a relief program in Turkey following the Armenian massacres of 1896, and provided nursing care, medical supplies and food to ill and wounded soldiers in Cuba during the Spanish-American War period of 1898-99.

The American Red Cross was granted its first and second charters by Congress in 1900 and 1905, and Red Cross responsibilities for disaster relief and assistance to the Armed Forces were reaffirmed by the Congress.

The early 1900s saw the Red Cross expand its nursing services (1905-1912), establish nationwide first aid instruction (1910) and water safety instruction (1914). In 1909, the Central Committee of the Red Cross authorized the establishment of local chapters, a move that saw some 3,800 chapters spring up across the country during World War I.

During World War I, and at the request of the U.S. surgeon general, the Red Cross organized, equipped, and staffed 58 base hospitals, including 54 which were located overseas. Twenty thousand Red Cross nurses served at home and abroad, and services to meet emergencies arising in the families of servicemen were established.

Working through the Geneva-based international Red Cross, supplies were sent to 3,600 Americans being held as prisoners of war in Austria and Germany. And after World War I, the organization distributed almost a quarter of a billion dollars in relief supplies to Europe.

Between the first and second world wars, the Red Cross was busy once more with aiding the victims of natural disasters. The Japanese earthquake of 1923, floods and hurricanes both in the U.S. and the West Indies in 1926-28 and the great 23-state drought of 1930, all resulted in the Red Cross responding with aid and assistance.

In 1937, the first recruitment of blood donors was under way. During World War II, more than 13,000 Red Cross career workers were trained and served in some 5,600 camps and over 5,000 hospitals. By 1945, there were 212,000 nurses on the Red Cross roster.

The 1950's saw the Red Cross put out perhaps its most intense and sustained effort. Service with respect to the Korean War was augmented by service during some of the worst disasters to hit the United States and beyond. The devastating floods in the Midwest in 1951, the 1955 floods that hit both Eastern and Western states, and the Chilean earthquake of 1960 all brought out an extraordinary effort by the Red Cross.

And in Vietnam, the most difficult war, the American Red Cross was there displaying the same efforts to the wounded and other servicemen, as well as to their families, that have been its hallmark since its beginning.

Today, through its thousands of chapters nationwide, the American Red Cross continues with its support to the armed forces and veterans, disaster relief programs, blood donor services, nursing services and education programs, safety training and international relief cooperation. Become a part of the Red Cross story.

If you would like to donate toward the Mexican relief effort, or serve as a Red Cross volunteer, contact your local Red Cross chapter.

IN DEFENSE OF DEFENSE

HON. MAJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mrs. HOLT. Mr. Speaker, I would like to call attention to a column by William F. Buckley that appeared in the papers in late August when most of my colleagues were home in their districts and might have missed this most enlightening piece.

I believe this article provides some very important balance on the subject of defense procurement at a time when one of Washington's favorite sports is Pentagon-bashing.

[From the Washington Post, Aug. 20, 1985]

(By William F. Buckley Jr.)

The Navy Department has announced that the General Dynamics Corp. is no longer in Coventry. Last May Navy Secretary John Lehman suspended General Dynamics from further work for the Navy in response to revelations of smelly episodes that included turning over to the Navy bills to pay for public lobbying and, in one celebrated case, kennel fees for a dog.

It is the finding of the Navy, at this point, that where General Dynamics clearly erred, restitution is being made; that where there was ambiguity, there will be a code of ethics adopted on the basis of which government costs and contractors' costs will be strictly separated. That line, by the way, is not as clear as, say, the line that tell us where the equator is. Do you consider it a legitimate cost of developing a submarine the money you paid a lobbist to demonstrate your submarine's advantages to the admirals who make the final decision? Not so easy that one, is it?

But there is no question that great deposits of indignation have accumulated over the hilarious charges tracked down, charges made by some defense contractors for apparently simple items.

And who is going to doubt the venality of some businessmen? Not any informed capitalist I know of: it was Adam Smith, so to speak the father of capitalism, who observed that no group of businessmen ever met except to devise means of restraining trade. The only generality a believer in capitalism would resist is that the incidence of venality among businessmen tends to exceed the incidence of venality among politicians.

Which brings us to the question: What is it that some politicians are up to in yelling and screaming about the melodramatic charges?

Economy?

Saving the taxpayers unnecessary expenses?

We all know in detail about the $435 claw hammer, the $640 toilet seat cover, the $659 ashtray, the $3,046 coffee maker. Concerning all of which, a few observations:

It has been investigators of the Defense Department who have uncovered most of these unsavory episodes—not congressional investigators or agents of the Government Accounting Office. While not excusing the delinquencies, it is reassuring to know that the armed services, which have been the objects of so much scorn, are policing their own activities and bringing public attention to their own extravagances.

Upon discovery of clearly indefensible expenses (e.g., the $435 hammer), it is characteristic that counter-claims are made, and where the blame is clearly attributable to the contractor, restitution is forthcoming. The Navy was repaid the ridiculous cost of the ridiculous hammer. Last year the Defense Department didn't order a single hammer, but more than 80,000. They cost about seven bucks each.

Sometimes the story gets more complicated when you look into it. The $640 toilet seat cover wasn't the kind of thing thee and I use. It was a heavy molded plastic cover usable for the entire toilet system of a P-3 aircraft. The toilet seats themselves cost only $9.37.

Ah, the ashtrays. $659. For the E2C aircraft. But investigation reveals that some automobile ashtrays cost $100, even though manufactured in great quantity. Grumman had to make the custom-made ashtrays and was in fact losing money on them. The Navy, attempting to make its own ashtrays in its own shops, was paying $900 for them.

And then the famous coffee maker for $3,046. It was designed for a C5 that carriers up to 365 troops. Delta and TWA buy similar coffee makers for—$3,107. Exist a horror story?

A wise observer of the whole scene comments that in the zeal a clamp down on excessive costs, what is paradoxically happening is that costs are rising. The reason for this is the paper work: the investigations, classification, inspection, all the constraints that continue to add to the cost of doing business. A perfect bill that scrutinizes the cost of every screwdriver is going to add greatly to the cost of that screwdriver.

There are people about who have expensive Navy hammers not because they mind expensive hammers, but because they mind the Navy. Their perfect world would be one in which defense hammers cost nothing, because the armed services don't need hammers, the armed services having become historical relics, with perhaps a truck or two left over to escort our leaders to Appomattox.

IN DEFENSE OF DEFENSE

HON. BOB STUMP

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. STUMP. Mr. Speaker, I would like to call to the attention of my colleagues an

article from the Heritage Foundation's National Security Record dated July 1985.

I am convinced my colleagues will find this article on defense procurement most enlightening. It provides some very important balance on a critical subject at a time when one of Washington's favorite sports seems to be "Pentagon-bashing."

[The article follows:]

IN DEFENSE OF DEFENSE PROCUREMENT

During the past four and a half years Secretary of Defense Caspar Weinberger has directed the largest peacetime modernization of U.S. defenses in history. Complacency in the wake of the SALT and ABM agreements of 1972, the antidefense attitude in Congress after Vienam, and major defense reductions in the early Carter years led to a neardisastrous deterioration of U.S military forces. Restoring U.S. defenses was one of the highest priorities of candidate Ronald Reagan in 1980. In fulfilling that promise, he has fought for a major, multi-year military modernization program. Secretary Weinberger, in carrying out the President's program, has sought and presided over five consecutive annual increases in the defense budget. But at the same time, this former director of the Office of Management and Budget has led an intensive campaign against wasteful spending.

You would never know it from press accounts or comments from Capitol Hill. Bashing the Secretary of Defense for defense spending has become a favorite Washington sport. The challenge facing Weinberger, President Reagan recently said, was akin to the old saying, "Don't clean the skeletons out of the closet, or they'll accuse you of murder."

Weinberger's job is both formidable and thankless. This year the Pentagon will spend about $70 billion for the acquisition of weapons out of an estimated $253 billion in total defense outlays. These figures translate into a huge number of purchases of a dizzying array of weapons, parts, supplies and equipment. Some 13 million contracts are let each year to over 300,000 contractors by over 1,000 defense purchasing offices. Within this huge volume of purchases that are needed to keep the U.S. defense establishment functioning, critics can always find something that appears to be overpriced. Still, the attacks on Weinberger are puzzling.

After all, this is the same Caspar Weinberger who earned the nickname "Cap the Knife" for his willingness to slash spending while serving as budget director in the Nixon Administration. At Defense he has initiated improvements in the Pentagon's vast procurement system that would win praise in the business world. But few seem to notice the large number of efficient purchases made by the Pentagon; stories of $400 hammers are a lot more newsworthy.

THE INSPECTOR GENERAL

It is ironic that most of those reports of costly toilet seats, coffee pots and ashtrays announced by congressmen or appearing in the press originally were uncovered by Weinberger's own investigators, When the Defense Department's auditors and inspectors submit reports of waste they have found and corrected, the juiciest examples often are picked out and made public—without mentioning that they were discovered by the Pentagon's own investigators.

Some charges that appear excessive often can be explained. Still, when buying millions of items abuses are bound to occur. Weinberger's Office of Inspector General, created in 1982, has uncovered thousands of discrepancies. Ferreting out cases of excessive or improper overhead charges, padded accounts and other improprieties, the Inspector General has forced the suspension or debarment of hundreds of defense contractors. Last year 454 formal actions were taken by the Defense Department against contractors. Of these, 188 were suspensions for up to 18 months, while 266 contractors suffered the more serious penalty of being barred for up to three years from doing business with the government. The 1984 total of suspensions and debarments was a record; up six-fold since 1980.

The Pentagon currently is investigating 45 of the 100 largest defense contractors for a variety of contract violations and other wrongdoing. Chairman David S. Lewis of General Dynamics retired just as his company, a multi-billion dollar defense contractor, resolved a threat of suspension by the Navy for "improper and possible illegal conduct" in its handling of government contracts. While the Navy settled the case, it was symptomatic of the problems the Defense Department has had with even the biggest contractors. In May, General Electric's Space Systems Division pleaded guilty in federal court to a charge of padding labor costs for the production of nuclear missile warheads and paid a fine in excess of one million dollars.

The Inspector General's energetic pursuit of both the wasteful and the illegal is having a salutary effect down the line. Service inspectors, procurement officers and others are getting the message that the Secretary is serious about overcharges. Navy Secretary John Lehman, whose service has a large share of the modernization money to build toward the 600 ship Mavy, has been conducting his own campaign to cut costs. He recently reduced his command structure by eliminating the 450 man Naval Materiel Command that operated out of high-rise buildings near the Pentagon in Crystal City, Virginia. Lehman found that the Materiel Command was just another bureaucratic layer between the weapons developers and the Navy staff, so he did the unheardof—he abolished one of his own commands.

One of Secretary Weinberger's most successful innovations has been the Defense hotline that he established in 1981. Widely advertised throughout the Defense Department, the hotline can be called toll free from anywhere in the United States to report any evidence of waste, fraud or abuse. Last year the Defense Department reported that between June 1981 and September 1984 there were 23,410 calls or letters to the hotline. Of that number, 7,635 warranted further inquiry. At last report over 1,100 cases were under investigation as a result of hotline calls. These have included everything from reports of overcharging, abuse of authority by purchasing officers, improper contracting practices, waste of government supplies or funds, favoritism, nepotism, false or altered claims, and in a few cases, even bribery.

STREAMLINING ACQUISITIONS

Weinberger has been given little credit for a major reorganization that is expected to streamline and improve the Pentagon's purchasing process. The centerpiece of the reorganization is a new job, Assistant Secretary of Defense for Acquisition and Logistics, commonly known as the "acquisitions czar." The Secretary took the logistics function from the position of Assistant Secretary for Manpower, Reserve Affairs and Logistics and added to it the major responsibility of managing weapons procurement. This merges under a single manager the acquisition of new weapons with the control of supplies and facilities. With the new assistant secretary reporting directly to Weinberger, the Secretary's ability to coordinate the status of existing supplies with the purchase of new weapons will be greatly improved.

This structure also enables the Department's principal acquisition official to concentrate on procurement without having to worry about the research and development process. Weinberger has said the main task of his new procurement director will be to obtain the best quality and price he can get on everything the Defense Department buys. Weinberger's choice for the new job, James P. Wade, Jr., is a highly regarded defense procurement expect who has been Deputy Under Secretary of Defense for Research and Engineering during the past four years.

Another new position, this one mandated by Congress, is director of operational test and evaluation, also reporting to the Secretary of Defense. As a member of the Defense Resources Board, the director of operational test and evaluation will be able to bring first hand knowledge of the effectiveness and capabilities of new weapons systems to the Department's decision-making level.

Also part of the effort to cut costs and improve purchasing is the DOD Acquisition Streamlining Initiative. Deputy Secretary of Defense Taft announced just last month that acquisition streamlining, which has been used successfully on a trial basis, will be applied to all DOD systems acquisition programs beginning on October 1, 1985. The goal is to reduce the excess requirements, or so-called goldplating, often included in requests for bids prepared by the military, which raise the cost of new weapons. Future contracts are expected to emphasize the end-product desired rather than extensive "how to" procedures that become a major burden on contractors and raise costs.

Successful programs can be used as examples for future procurement. The B-1 bomber program, despite the serious handicap of being stretched-out, delayed and then killed by the Carter Administration, is a procurement success story. Since its revival early in the Reagan Administration, the B-1 has been below cost and ahead of schedule. Pursuing a multi-year procurement procedure, using available standard components whenever possible and operating on a fixed-price incentive program, the Air Force and Rockwell have made the B-1 a model for the development of large weapons systems. Under the fixed-price incentive program, the government splits the savings with the contractor when an item comes in on time and under budget. This gives the contractor a strong incentive to hold down costs and stay on schedule. As a result, hundreds of millions of dollars, if not billions, have been saved for the taxpayer on the B-1 program.

All of these efforts should improve the purchasing process. An example of the savings that can be realized is the Defense Department decision to buy a single new helicopter for all the services. The new chopper will perform anti-submarine duty for the Navy, provide combat transport for the Army, and search and rescue for the Air Force. Instead of allowing each of the three services to issue separate specifications for a new helicopter designed from the ground up to perform a designated service role, DOD

directed them to order different versions of the same basic helicopter that was already under development by Sikorsky. Similar decisions in favor of the joint purchase of other weapons and equipment could save billions.

CONTROLLING OVERHEAD

One of the biggest problems in defense contracting is the control of overhead. Most federal contracts include a provision covering the legitimate cost of doing business of the company selling the product. But problems have arisen from misunderstandings between contractors and federal agencies on what constitutes proper overhead charges.

The Federal Acquisition Regulations which became effective for DOD purchasing in April 1984 specifically disallow entertainment costs as part of overhead. But the regulations provide for reimbursement to contractors for "employee morale, health and welfare," which can lead to misunderstandings about what may properly be billed to the government. The Department's auditors and inspectors are on the lookout for charges for "employee morale" that include such items as golf outings for executives, kennel fees for their dogs and the like. The challenge for the Defense Department is to monitor contracts closely enough to catch such improper charges without hiring platoons of unneeded auditors or generating so much red tape and delays that the oversight effort itself impedes prompt and efficient purchasing.

Secretary Weinberger has tightened DOD regulations to exclude from reimbursable overhead the contractor's expenses for most public relations, legal fees, lobbying and advertising. The new policy is to place the burden on the contractor to certify, under penalty of perjury, that his submitted costs are proper. Defense is trying to avoid a knee-jerk reaction to criticism that could increase government red tape, slow the purchasing process and add further costs for contractors—which would just be passed back to the government. Weinberger has stated a clear bottom line, "We will not pay overhead charges that do not directly contribute to our national security."

INCREASING COMPETITION

Critics have charged that DOD competes only five percent of its contract dollars. This has led to proposals in Congress that would require Defense to increase competitive purchasing to as much as 70 percent. What sounds like a good suggestion warrants a second look. The five percent figure refers only to contracts that are formally advertised. In addition to those, Defense awarded 37 percent of its contract dollars last year on a "negotiated competitive" basis, and another 29 percent as add-ons to previously competed contracts. Only 28 percent of defense contract funds were committed on a sole-source basis.

Formal advertising is a one-time, sealed bid process, which a feasible only for items that can be described fully and accurately in writing, when time is not a major factor and when price is the only consideration. It is not a practical way to contract for highly sophisticated weaponry that requires a manufacturer with special skills, experience and a qualified workforce. High-tech systems cannot be purchased with assurance at the lowest price any company will bid.

Yet in those cases where increased competition is feasible a serious effort is being made to see that it is used. For example, from 1980 to 1984 the Navy increased its shipbuilding competition from 16 percent to over 84 percent. This is significant because of the increase in ship construction needed to build the 600 ship Navy. Another example of increased competition was the Air Force decision last year to divide a huge jet engine contract between General Electric and Pratt & Whitney. The competition between the two manufacturers, together with inclusion in the contracts of a warranty system that shifts some of the cost of material failures back to the contractor are producing substantial cost savings.

The Air Force is now giving serious consideration to the purchase of the Northrop F-20 in competition with General Dynamics' F-16 in the next multi-year cycle of purchases of a high performance tactical fighter. General Dynamics has had the sole contract for such aircraft in recent years, but several months ago Northrop offered to sell an improved model of the F-20, which the company developed by spending $800 million of its own money, on a fixed-price contract that would save the Air Force more than a billion dollars over a twenty year period. In the view of many in Congress and DOD, Northrop's offer is just too good to pass up.

SPARE PARTS HORROR STORIES

Most of the recent horror stories about very high prices being paid by DOD have been overcharges for a small number of spare parts or other minor pieces of equipment. The overcharges invariably were uncovered by the Defense Department itself. Last year DOD's spare parts management program saved or avoided costs approaching $1.2 billion through careful oversight. Some 500 initiatives currently are under way to improve spare parts purchasing by the Defense Logistics Agency and other purchasing offices throughout the Armed Services. Last year, over 211,000 items were screened to determine if they could be obtained through competitive purchasing. As a result, 48,000 were purchased competitively and another 57,000 were bought directly from the manufacturer, at considerable savings, instead of from the prime contractor. Major increases in the automation of acquisition, storage and retrieval of spare parts is paying dividends in improved productivity.

Secretary Weinberger has given the spare parts management program top priority to establish permanent improvements in spare parts purchasing. The Secretary has made the following points concerning some of the more prominent stories about over-pricing of spare parts or small items:

DOD did pay $110 each for two common diodes. But the error was discovered by government auditors, it was one item out of hundreds in a support package, and the contractor refunded the price. The same year DOD bought 122,429 diodes for four cents each.

DOD did pay $435 for a claw hammer. But the charge was discovered by a Navy employee, it was one of several hundred items in a support package, and the contractor refunded the price. Last year DOD bought 87,244 hammers for between $6 and $8 each.

A cost proposal submitted for support equipment included $9,600 for a special wrench. The charge was discovered by a DCAA audit. As a result, DOD never bought the wrench, but had it manufactured at a local machine shop.

DOD did buy ten large coffee makers for C-5 aircraft last year for $3,046 each. When configured for troop carrying, the C-5 can carry up to 365 people. Similar coffee makers used by TWA and Delta cost $3.107 each.

The famous toilet seat covers for P-3 aircraft that cost $640 each actually are not toilet seat covers. They are molded plastic covers for the entire toilet system, made especially for that purpose. Nevertheless, DOD stopped the purchase and the former supplier refunded $29,000 of $34,000 paid for 54 units in 1983. The price DOD pays for regular toilet seat covers for the P-3 is $9.37 each.

Reports of spectacular overcharges receive wide media coverage while the less interesting complete facts rarely catch up with the original story.

CONGRESSIONAL PROCEDURES

A serious deficiency in U.S. Government procurement is the effect of the annual appropriations process on the cost of government purchases. When Congress makes changes annually in the authorization and appropriation levels of long-term weapons development programs, the resulting stops and starts cause planning and production adjustments that increase the overall cost of the program. Operating on a system of annual appropriations. Congress usually has been unwilling to provide funding for more than one year at a time. Congress can correct this weakness in the system by authorizing more multi-year funding of major defense projects. Under multi-year contracts, cost overruns can be controlled more effectively and responsibility determined more readily. With fluctuating annual appropriations, it is often difficult to tell whether the contractor or the fluctuation in the flow of funds is responsible for cost overruns.

Congress also makes it difficult for any secretary of defense to cut costs where they will least affect national security. Even while calling for defense cuts, many Members of Congress insist on maintaining unnecessary bases in their states or districts, and sometimes force through legislation requiring the purchase of marginal weapons or equipment produced by a home district manufacturer. The Grace Commission report on waste in government estimated that congressional opposition to the closing or reduction of unneeded facilities cost taxpayers $2 billion every year.

CONCLUSION

On June 17 President Reagan announced the formation of an independent, bipartisan, blue-ribbon Commission on Defense Management under the chairmanship of David Packard. The commission will review efforts already undertaken to improve management and procurement practices, consider the organization and decision-making procedures at Defense, study the congressional oversight of the department, and submit a blueprint for further action.

This is a move in the right direction, and David Packard is a most appropriate choice to head such a study. Co-founder and longtime Chairman of the Board of the Hewlett-Packard Company, he combines top-level defense-related business experience with service as Deputy Secretary of Defense from 1969 to 1971. While at Defense, Packard introduced some notable improvements in management and procurement. For example, it was he who insisted on competition in the development of new fighter aircraft by having two companies build prototypes and then fly them off against each other for the production contract.

Congress and the media should give the Packard Commission an opportunity to review the record and make its recommendations without further sniping. If Congress wants to do something positive in the inter-

im, it could give the President the line item veto authority he is requesting. With a line item veto, the President could cut unneeded or marginal defense programs on a case by case basis and make meaningful reductions in the defense budget. Otherwise, the cries of waste at Defense will be seen as nothing more than cynical attempts to play politics with the defense budget.

JACK LEVAND—MAN OF THE YEAR OF THE GATEWAYS HOSPITAL MEN'S CLUB

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. WAXMAN. Mr. Speaker, on Sunday, October 27, 1985, Jack Levand will be honored by the Gateways Hospital Men's Club as "Man of the Year" in recognition of his 15 years of service to helping others.

The citation he will receive reads in part: For total commitment to the welfare and needs of community charitable endeavors and for exemplary leadership and major contributions of Gateways Hospital that have helped to assure that the emotionally disturbed have an opportunity to fulfill their potential as human beings * * *."

Before coming to Los Angeles in 1957, Jack Levand had already established himself as an achiever in his native Cleveland. He was a winning track man and captain of the cross country team at Ohio State before entering the business world. His success in business never interfered with his interest and devotion to the less fortunate. He actively participates in more than 84 charities, research, and community service organizations. Among them are the American Heart Association, U.S. Olympic Committee, Los Angeles World Affairs Council, Scripps Clinic, American Lung Society, Big 10 Club of California, Ohio State University Development Funds, and St. Judes, to mention only a few. In addition, he is an active member of the United Jewish Welfare Committee, a member of the board of governors of Sinai Temple, a fellow of the University of Judaism, a member of the Fraternity of the Music Center, American Red Cross, B'nai B'rith, Anti-Defamation League, Cedars-Sinai Medical Center, the Guardians, and many more.

In all of his endeavors, Jack has had the assistance and encouragement of his wife, the former Gloria Lee. They have celebrated 53 years of marriage and have been blessed with a close and happy family of three children and nine grandchildren. Gloria's talent and interest in dancing has been passed on to her grandchildren, two of whom are members of the New York City Ballet Co. and School of American Ballet.

I ask the Members to join me in congratulating Jack Levand on this special occasion and to wish him and the Levand family many more years of success and personal fulfillment.

A SALUTE TO THE ASSOCIATION FOR THE STUDY OF AFRO-AMERICAN LIFE AND HISTORY

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, October 8, 1985

Mr. STOKES. Mr. Speaker, I would like to bring to the attention of my colleagues the 70th Annual Convention of the Association for the Study of Afro-American Life and History scheduled for October 9 through 13 in Cleveland, OH. The 70th annual convention marks only the second time the association has met in the city of Cleveland. On behalf of the members of the Cleveland chapter and the entire community, I welcome the convention delegates to the city of Cleveland.

Established by Dr. Carter G. Woodson in 1915, the association, through its many programs and activities, attempts to foster an appreciation for the numerous cultural and historical contributions of black Americans to this great Nation. It was through Dr. Woodson and the association that the Nation began to recognize the immense historical contributions of black Americans through Negro History Week and now Black History Month. Not only did Dr. Woodson conceive this annual observance but also began to develop the programs of the association with this same goal in mind.

The association meets this goal through the publication of the "Journal of Negro History" and the "Negro History Bulletin." Additionally, the association promotes historical research and writing. Each year, the association sponsors the H. Council Trenholm Memorial Writing Contest for high school students.

The 5-day meeting in Cleveland will feature 40 major research presentations and 70 educational and publishers exhibits. Major speakers will include noted scholar and historian, Dr. John Hope Franklin, Senior Ebony Magazine Editor Lerone Bennett, Jr., historian Dr. Benjamin Quarles, and visting professor at the Massachussetts Institute of Technology, Dr. Helen Edmonds.

Mr. Speaker, one of the highlights of the 5-day national conference will be the awards night banquet scheduled for Friday, October 11. Three Clevelanders will receive the prestigious Dr. Carter G. Woodson Award at the banquet. The recipients are: Mrs. Myrtle Wiggins, Mr. George Edwards, and Mrs. Rowena Jelliffe. At this time, Mr. Speaker, I would like to share some information about the award recipients with my colleagues.

The first honoree is noted soprano and community activist, Mrs. Myrtle Wiggins. Mrs. Wiggins has been affiliated with the Cleveland chapter of the association for over 50 years. She was a participant in the 1930 national convention held in Cleveland. Through the years. Mrs. Wiggins has remained active with the national organization.

In the Cleveland metropolitan area, Mrs. Wiggins is regarded as one of the leading musical artists. She has made numerous contributions to the music program at her church, the Antioch Baptist Church where she serves on the music committee.

Mrs. Wiggins majored in music at Fisk University and performed for U.S. troops during World War II as one of the world renown Fisk Jubilee Singers.

Mrs. Wiggins recently retired from the Cuyahoga County Welfare Department.

The second Dr. Carter G. Woodson Award recipient is Mrs. Rowena Jelliffe. Mrs. Jelliffe along with her late husband, Russell, were the founders of Karamu House, the internationally acclaimed performance theatre in 1915. Karamu House has been a cultural pillar of strength in the Cleveland metropolitan area. Not only has it been a forum for outstanding stage and dramatic presentations, but also the various programs and activities sponsored by Karamu House have made an indelible mark on the community.

In addition to her long affiliation with Karamu House, Mrs. Jelliffe and her husband were also members of the planning committee of the 1930 association convention in Cleveland. During the 1930 convention, Mr. Jelliffe presided over the roundtable discussion of local black history.

Mr. Speaker, the last awardee is Mr. George Edwards. Like Mrs. Jelliffe and Mrs. Wiggins, Mr. Edwards played an integral role in the 1930 association convention in Cleveland.

Again, like the other awardees, Mr. Edwards is a noted artist and has given unselfishly of his time and talents in the Cleveland metropolitan area. Mr. Edwards, known throughout Cleveland for his violin performances, served as the violinist at the Carter G. Woodson Festival of Music held during the 1930 convention.

He is an active member of the Mt. Zion Congregational Church and served as the chairman of the church's music committee.

A graduate of Oberlin College, George Edwards has received rave reviews for his performances. Currently, Mr. Edwards performs with the Pro-Art Trio.

Mr. Speaker, the 70th National Convention of the Association for the Study of Afro-American Life and History will be both beneficial and interesting to the convention delegates and the members of the Cleveland community. It will be a very significant occasion for the honorees—Mrs. Myrtle Wiggins, Mrs. Rowena Jelliffe, and Mr. George Edwards. At this time, I ask my colleagues to join with me in saluting the association and this year's honorees on the occasion of the 70th convention in Cleveland, OH.

SENATE—*Wednesday, October 9, 1985*

(Legislative day of Monday, September 30, 1985)

The Senate met at 8:45 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

THE PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Gracious God of Peace and Reconciliation, we praise and thank Thee for this day of repentence, mourning, and prayer in South Africa which is drawing people from every part of the nation, every racial group and every church, from government and the private sector. We thank Thee that business men and women have agreed to close their shops today so that their employees are free to participate. Loving Father, do in South Africa what no individual, no organization, no government can do. As the people gather in reconciliation, mourning and prayer, heal and reconcile and change the nation.

As we pray for South Africa we pray for ourselves. We have come a long way in race relations but we have such a long, long way to go. Help us, Lord, to consolidate all the gains and not lose ground in this struggle. Help us to take more seriously than ever our relationships with our sisters and brothers, whatever their race, remembering that we are one family under God who "hath made of one blood all nations of men for to dwell on all the face of the Earth * * *." (Acts 17:26) Give us grace to appreciate, respect, and honor our differences and to work for unity. Remove from our hearts every trace of prejudice and give us love for one another. We pray for ourselves and the whole human family in the name of Him whose perfect love was unconditional and universal. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished acting majority leader is recognized.

SCHEDULE

Mr. ANDREWS. Mr. President, the two leaders will be recognized under a reduced time of 5 minutes each.

There is a special order in favor of the Senator from Wisconsin [Mr. PROXMIRE] for not to exceed 15 minutes.

Immediately following the Proxmire special order, the Gramm-Rudman-Hollings amendment will be laid down and by a previous order of the Senate, three amendments to the Gramm amendment will be debated and voted on. Therefore, rollcall votes can be expected prior to 10 a.m.

At 10:15 a.m., the Senate will stand in recess until 11:15 a.m. to hear an address by the Prime Minister of Singapore. Senators are asked to assemble in the Senate Chamber by 10:10 a.m. in order to proceed as a body to the Hall of the House of Representatives for the joint meeting.

When the Senate reconvenes at 11:15, it will resume consideration of the debt limit extension.

By a previous unanimous consent, at 12:30 today, the Senate will vote on the Democratic leadership amendment.

Also by a previous unanimous consent, at no later than 3 p.m. today, the Senate will vote on the Gramm-Rudman-Hollings amendment as modified. Votes expected throughout the day, and the majority leader is still working with the minority leader to reach an agreement that will provide for the passage of a short debt limit and final passage of House Joint Resolution 372, as amended.

Mr. President, I ask unanimous consent that authority be granted for the appointment of a committee of Senators on the part of the Senate to join with a like committee on the part of the House of Representatives to escort the Prime Minister of Singapore into the House Chamber for the joint meeting to be held at 10:30 a.m. on Wednesday, October 9, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ANDREWS. Mr. President, I reserve the remainder of the leader's time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The acting Democratic leader is recognized.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the time of the distinguished Democratic leader be reserved for his use later today.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] will be recognized for not to exceed 15 minutes.

Mr. PROXMIRE. I thank the Chair.

PAINSTAKING RESTRAINT REQUIRED OF BOTH SUPER POWERS FOR ARMS CONTROL

Mr. PROXMIRE. Mr. President, in the summer 1985 issue of Foreign Affairs, John Steinbruner offers a highly persuasive analysis of the military and arms control policies this country should pursue. The author is the director of foreign policy studies at the Brookings Institution. Mr. Steinbruner foresees an extraordinarily rocky and difficult road for arms control negotiations between the two superpowers. He points out very sharp conflicts in objectives. Both powers push for advantages which are perceived by their adversary as serious disadvantages. To achieve an agreement, both the Soviet Union and the United States will, as he sees it, have to change their views.

Steinbruner contends that arms control agreements can progress that would serve the security interest of both sides. The U.S. current purpose in arms control negotiations is to reduce the level of strategic force deployments to ease the threat to U.S. strategic forces and also to lessen the nuclear threat to Western Europe. The Soviet Union, on the other hand, wants to stop or at least restrict the serious threat they see from technical improvement in U.S. strategic weapons. That sweeping American technologic advance could greatly weaken Soviet deterrence. Steinbruner sees the strategic defense initiative or star wars and the Soviet's reaction to it as the gateway to all other current arms control problems.

Now how about all this? Would not the restriction of our country's new star wars defense constitute a conspicuously onesided surrender by the United States of its technological advantage? Is not the determination by the Reagan administration to push ahead vigorously with star wars the very issue that rushed the Soviets back to the bargaining table in Geneva? How can it be in the United States' interest to restrict the effort to build an antimissile defense when that could benefit so greatly from the United States massive advantage in scientific technology over the Soviet Union?

Mr. Steinbruner provides a very emphatic answer. First he says the agreement restricting the direct use of weapons in space is "of overriding mutual interest for both countries." Steinbruner argues that both countries can and will move toward the technological capacity to knock out the other's intelligence and communications activities in space. What would be the result?

(The) consequences for the stability of international security (would be) far greater than those posed by any of the weapons issues that are more prominently discussed.

Steinbruner foresees the potential destruction of the satellite capability that is essential to arms control. But that is not all. At the very heart of the military capability of both superpowers is the command system. On both sides, they are quintessential to deterrence. Are they vulnerable? Here is what Steinbruner observes:

Current strategic command systems could not withstand even a small fraction of the offensive firepower that could be directed against them by existing forces, and this fact creates pressures on both sides for rapid and large-scale reaction to the perceptions of an impending attack. Since the interaction of these pressures under conditions of intense crisis could produce a sudden catastrophic breakdown of deterrence, diminishing them should be a major objective of arms control.

Steinbruner sees arms control negotiations as the only way to security. He calls the two superpowers "locked together," unable to secure "any enduring net advantage by unilateral efforts."

Mr. President, it is very hard for us to break ourselves of the habits and customs and history of all the generations of mankind until this time. This is precisely what we have to do. Why? Because we live in the nuclear age. War is entirely different than it has ever been before. It does us absolutely no good to secure a strategic military advantage over the Soviet Union offensively or defensively. We cannot win a nuclear war, no matter how much of our powerful economy or our marvelous scientific genius we pour into the power and capability of our nuclear forces. And that goes for nuclear defense as well as offense. Our one hope is restraint, mutual restraint. That means the restraint for us to take the wholly unnatural course of resisting the ability to build a nuclear war capability superior to our potential adversary. Even if we know we can build it, our one hope is to restrain that capability and to negotiate an effective arms control restraint on the adversary's part at the same time.

It is true that mankind has never done this before. Throughout all previous history, countries won or lost their wars. We will not. The Soviet Union will lose any nuclear war. So will the United States. There's no doubt about that. It's a lead pipe certainly. Once we accept that fact, the absolute imperative necessity for an arms control agreement that will preserve deterrence on both sides becomes obvious. Right now, that starts with forgoing our clear technological advantage in space with an agreement that will allow both superpower satellite systems, both intelligence systems, both command systems to endure. We have no choice. Neither does the Soviet Union.

Mr. President, I ask unanimous consent that the conclusion of the Steinbruner article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ARMS CONTROL: CRISIS OR COMPROMISE

(By John Steinbruner)

The issues of strategic arms control are complex in their technical details, but they nonetheless revolve around a reasonably simple central problem. The United States is primarily interested in reducing the level of strategic force deployments in order to alleviate a perceived threat to the U.S. intercontinental ballistic missile forces and a politically sensitive imbalance in weapons deployed in Europe. The Soviet Union is primarily interested in restricting the process of technical improvement in order to alleviate what it perceives as an emerging threat to Soviet ICBMs and ultimately to the entire structure of Soviet military forces. With the United States committed to revising the past and the Soviet Union to shaping the future, viable compromise requires arrangements that do both. The issues are too extensive and the underlying hostility too great to allow an immediate, comprehensive solution. Thus, compromise must be achieved through a series of partial measures, each of which balances force reductions and modernization restrictions.

Recent arms control negotiations have not focused on a balanced but limited combination of force reductions and weapons modernization restrictions, and that fact has virtually precluded their success. The proposals the U.S. and Soviet governments have advanced could be supplemented or combined in a variety of ways to embody such a balance, but in the context of related events the practical opportunities are limited. The Strategic Defense Initiative announced by the United States and the Soviet reaction to that announcement have made the issue of weapons in space a necessary element of any immediate compromise. Both in the substance of security and in the politics of adversarial diplomacy, that issue has become the gate to all others.

II

To the extent that an objective perspective is possible on matters so dominated by national sentiment, it appears that an agreement restricting the direct use of weapons in space is of overriding mutual interest for both countries. The reasons are quite fundamental. Over the past 20 years, space has been accepted as a sanctuary for gathering and communicating information necessary for the safe and stable management of worldwide military operations. The satellites that support these purposes depend upon mutual tolerance that has been established in practice, though not legally defined. They are susceptible to disruption and are highly vulnerable to deliberate attack. Both the United States and the Soviet Union have long been able to improvise indiscriminate attacks in space that would damage their own satellites as well as the opponent's, but neither has fully developed the weapons and organizations dedicated to precise and systematic destruction of the opponent's assets. Both are now in the early stages of doing so. If not established by formal agreement, the informal tolerance that now protects intelligence and communication activities in space is likely to be degraded very severely, with consequences for the stability of international security far greater than those posed by any of the weapons issues that are more prominently discussed.

With apparently compelling mutual interests at stake, an agreement restricting weapons in space should in principle emerge from the Geneva negotiations. In broad outline the plausible content of such an agreement is reasonably apparent. A distinction would be drawn between military research in space, which would be allowed, and weapons development, which would be prohibited. At the same time, reductions in ICBM deployments would be undertaken, affecting particularly the Soviet SS-18 as the largest and potentially most destructive member of that class.

In actual practice, however, such an outcome does not appear likely. Thus far, the two governments have taken starkly opposing positions. The Soviet Union insists on banning what they refer to as "strike weapons" in space as a necessary condition for any other measure of strategic arms control, and has proposed a 25-percent reduction in total force deployments to accompnay such a ban. The Soviets have not as yet suggested reductions focused on the specific weapons that are of primary American concern. The United States rejects any additional restrictions on weapons testing in space in order to protect plans for developing what we refer to as defensive technologies, and in general has not offered any meaningful restraint on the process of weapons modernization. The compromise necessary to avert a collision on these questions will require a degree of change in prevailing attitudes that rarely occurs. It is still plausible to hope for a constructive outcome, but it is not realistic to expect it.

III

The primary reasons for this situation extend well beyond the politics of the moment—the personalities of the current leaders, for example, or their putative bargaining maneuvers. The problem emerges from very basic differences in the security positions of the two countries, in their political systems, in their dominant perceptions, and in their respective policies. Some of these many enduring differences have immediate practical importance.

As has been true for much of the past 40 years, the timing of major decisions in the United States and in the Soviet Union is out of phase. In each country the size and technical character of its strategic establishment has been determined historically by a few fundamental decisions that, once made, have required a decade or more for full implementation. The fact that the two countries have made their critical decisions at different times has encouraged a sequential interaction between their respective weapons programs and has compounded the difficulties of achieving arms control. The preferred moment for compromise has been different for each country.

This problem of timing is quite acute at the moment. The United States is currently in a phase of implementing recently established commitments to a series of technical modernization programs and to two significant additions to the structure of its strategic forces (the deployment of submarine-based cruise missiles and of intermediate-range missiles in Europe). The surge of investment associated with this effort is highly unusual, and currently authorized programs will require several more years to be completed. The Soviet Union is emerging from a decade during which the top leadership did not authorize any major new strategic weapons deployment programs (as distinct from research and development efforts). As the Soviets completed previously authorized programs during the 1970s (notably the SS-17, SS-18 and SS-19 ICBMs, and the SS-20 intermediate-range missile system), overall Soviet investment in military forces remained essentially constant, and that portion allocated to strategic forces declined.[1] The Soviet leaders appear now to be contemplating a series of new strategic weapons deployment initiatives and associated adjustments in security policy. More than they were during the 1970s and more than the United States at the moment, the Soviet Union is in a reactive phase.

In addition to the disparity in timing of decisions, there are also fundamental differences in the way the two political systems make decisions. The Soviet Union initiates major decisions by establishing general military doctrines and by adopting planning assumptions; the implications are then imposed reasonably systematically on the details of weapons acquisition, operational posture and diplomatic positions. The system operates, as it were, deductively. In contrast, the United States requires widespread political consensus in order to make authoritative decisions and does not readily achieve this regarding doctrinal abstractions. The U.S. system makes very specific decisions and leaves open their broader implications for subsequent interpretation and political discussion. The U.S. decision-making process operates inductively and at any given time displays substantial internal inconsistencies representing unresolved political issues.

This difference in style has affected perspectives on strategic arms control. The Soviet Union understood the arrangements embodied in the SALT (Strategic Arms Limitations Talks) treaties as a fundamental political bargain focused on the principle of conferring "equal security" on both countries. Since equality could not be precisely defined—given the wide differences in established force deployments, geographic position, alliance arrangements and economic potential—the Soviets believed that the aggregate positions of the two countries had been arbitrarily but not unreasonably declared to be equal: advantages enjoyed by one side were assumed to be balanced by those of the other. Specifically, Soviet advantages in ICBMs, theater forces and numbers of weapons carriers were assumed to balance U.S. advantages in total weapons, submarine and bomber operations, overall force quality, geographic position and economic capacity. Moreover, with a baseline condition established, the Soviets believed that rules of evolution were to be followed preventing either side from securing any additional advantage that was not offset by the other side.

The U.S. political system is not equipped to make a bargain of that scope and did not do so. Actual decisions in the United States focused narrowly on the specifics of the formal treaties, and the broader implications of the arrangements were subjected to an as yet unresolved internal political debate. A well-organized group of security specialists has objected to the concession of Soviet advantage in any important dimension of military power, most notably in the payload capacity of the respective ICBM forces. Disputes over compliance with technical details of the treaties have been generalized into sweeping charges of Soviet cheating that resonate with general American distrust of the Soviet Union. The idea of a limited compromise that did not include a settlement of major political disputes has been opposed by constituencies in the United States that have strong grievances over human rights in the Soviet Union, political repression in Poland, military intervention in Afghanistan and many other matters. The United States has not formed the domestic consensus necessary even to ratify the SALT II agreement, let alone establish an enduring political bargain.

These different levels of conception and of political commitment have combined with the long-standing animosity between the two countries to produce sharp recriminations. The United States now accuses the Soviet Union of numerous treaty violations, the most prominent of which is a radar installation whose function is acknowledged to be legitimate but whose location is believed to be illegal under the Anti-Ballistic Missile (ABM) Treaty of 1972. The Soviet Union staunchly defends its own compliance record and accuses the United States of reneging on the basic political understanding, most notably by introducing new missile deployments in Europe which "circumvent" the SALT agreements and by announcing the intent to develop defensive weapons. With both sides now projecting weapons programs that would collapse the entire structure of existing arms control arrangements, each profoundly doubts and fears the basic intentions of the other.

IV

The current surge in U.S. strategic force investment is being interpreted by Soviet military planners as an offensive threat representing, potentially, a significantly enhanced capacity for a preemptive attack on Soviet forces. This underlying intention is imputed primarily on the basis of U.S. weapons modernization programs and additions to the force structure: the MX, the Trident II missile, the Pershing II in Europe, and cruise missiles with stealth technology. All in combination appear to establish the potential for precise attacks on the Soviet military infrastructure with tactical warning that would be too short to allow protective reaction. Moreover, as the Soviets view them, U.S. arms control proposals appear to have been designed to support such a preemptive strategy: if accepted, U.S. proposals would reduce deployed forces but they would not inhibit weapons modernization and would thus render successful preemption easier to accomplish.

The U.S. Strategic Defense Initiative is also assimilated into this pattern. In Soviet estimation, the technical prospects for a successful defense against an offensive attack designed to penetrate defenses are too remote to be a rational basis for a security policy. In this view, the only serious aspiration is for a defense against an offense already severely diminished by a preemptive attack. So interpreted and fully credited, this overall pattern presents a security threat to the Soviet Union of the gravest proportions.

Even if practical-minded Soviet leaders doubt that the United States can in fact achieve an effective capacity for strategic preemption, there are secondary implications of the U.S. effort that eventually are also very threatening. At its core, the U.S. strategic investment program is based on information gathering and processing technologies that represent the area of greatest U.S. advantage relative to the Soviet Union. These technologies have strong implications across the full range of U.S. military effort—conventional as well as nuclear weapons, offensive as well as defensive missions. Despite U.S. rhetorical emphasis on defense, it is reasonable for the Soviets to expect the most immediate and most dramatic results to involve offensive weapons. Indeed, it has become technically conceivable that precision navigation, rapid collection and dissemination of target information, automated battle management and related developments will eventually enable attacks on the Soviet military infrastructure by conventional munitions that are comparable to nuclear weapons in range, destructive effectiveness and even timing.[2] Beyond that, the underlying technologies are also likely to have very significant implications for general economic productivity. In effect, the United States appears to be marshaling its strongest comparative advantage for an extended competition in general military and technical positions. If that process is not restrained and if equal security is not conceded, then eventually the Soviet security position is likely to be severely degraded even if the ultimate destruction of nuclear war can be prevented.

Cast in these terms, the implicit American threat to the Soviet Union is sufficient to motivate a very extensive Soviet response and to force very difficult internal choices. If Soviet leaders cannot achieve acceptable restraints on the process of weapons modernization by normal diplomatic means, they will confront the apparent necessity of military reactions that are demanding enough to impose significant new burdens in the allocation of economic resources. Moreover, they face immediate deadlines for these choices. A new five-year plan (for 1986-1991) is nearing the point of final approval, to be accompanied, in all probability, by an unusually far-reaching policy review under the new political leadership.

V

The United States, of course, generally rejects the validity of Soviet fears and the legitimacy of any reaction to current U.S. programs. In the prevailing U.S. perspective, the MX and Trident II programs are justified responses to the perceived threat to U.S. ICBM installations emanating from the Soviet SS-18 and SS-19 programs that have already been completed. Similarly, the Pershing II and cruise missile deployments are accepted as necessary ripostes to the earlier

[1] Richard Kaufman, "Causes in the Slowdown in Soviet Defense," Soviet Economy, Vol. 1 (January-March 1985), pp. 9-32.

[2] The chief of the Soviet General Staff, Nikolai V. Ogarkov, bluntly pointed out this emerging threat shortly before he was "reassigned." Interview with Marshal of the Soviet Union N.V. Ogarkow, "The Defense of Socialism: Experience of History and the Present Day," *Krasnaya Zvezda*, May 9, 1984, first ed., pp. 2-3.

Soviet SS-20 program. They have been reconciled with legal requirements strictly construed, and the thought that they might contradict a broader political understanding would be summarily dismissed by most Americans.

With a limited qualification for the purpose of bolstering the conventional defense of Europe, the United States has consistently declared its only strategic intention to be that of deterring nuclear war by threat of appropriate retaliation. The explicit acquisition of a reliable preemptive attack capability against Soviet forces rather clearly would not receive broad support in the United States. To be sure, there is a possibility that U.S. forces facing the apparent inevitability of war might feel compelled to attempt a preemptive attack as the only conceivable route to victory and at any rate the most effective means of limiting damage.[3] This tendency might be enhanced as a greater capacity for preemption is in fact acquired. These possibilities, however, have not yet been sufficiently absorbed to have immediate influence on security policy. In short, an inclination to compromise in the arms control negotiations is not likely to emerge in the United States from any sympathy for the substance of Soviet arguments.

Moreover, prevailing opinion in the United States discounts even the subjective sincerity of the Soviet position. The central purpose of Soviet diplomacy is presumed to be the political division of NATO, and Soviet objections to American weapons programs are interpreted as tactical measures designed to promote dissent in Western Europe. A display of alliance resolve, it is believed, will eventually force the Soviets to accept what they cannot prevent. This assessment was strongly reinforced when the Soviets allowed negotiations on intermediate-range missiles to be reestablished after many stark warnings that they would not do so unless U.S. Pershing II and cruise missile deployments were first removed. The same logic is now being applied to the Soviet position on space weapons.

Given these attitudes and the state of its strategic weapons programs, the United States at the moment both enjoys the virtues and suffers the defects of a fortified position. There are no internal deadlines to force diplomatic actions. Extensive modernization of the U.S. strategic weapons arsenal has already been authorized by recent defense budgets, and the fact of active negotiations provides political accompaniment adequate to deal with domestic and even allied sentiment for arms control. President Reagan's vision of a transition to a posture of protective defense rather than retaliatory offense dominates the discussion of security policy. The vision has inspired a strong technical critique, but as yet no effective political opposition has crystallized. In the process of negotiation the United States is playing a waiting game and has thereby imposed on the Soviet Union both the burden of initiative and the associated opportunity.

VI

Aside from ideological rhetoric, the Soviets have been very cautious and conservative in recent history and they are unlikely to abandon that pattern suddenly, even under more vigorous political leadership. Though the greatest resolve must prudently be assumed, the Soviets are likely to maintain a rational preference for diplomatic solutions and to adjust that preference only in discrete stages. Some of those stages have undoubtedly already passed, but it is a reasonable assumption that an acceptable agreement with the United States remains the primary Soviet objective, as they themselves assert. Romantic Western ideas about hard bargaining notwithstanding, direct military pressure on the Soviet Union works to increase its terms for an acceptable agreement rather than to diminish them. As in any political system with internal integrity, the Soviet Union cannot be expected to collapse under pressure if it has other options; it will quite predictably seek to react in kind.

In making the issue of weapons in space the centerpiece of their diplomatic position, the Soviets are using it as both the symbol and the primary immediate instance of the broader issue of weapons modernization. This is a logical choice. Restrictions on weapons testing in space would in fact inhibit any short-term "demonstration" of missile defense technology beyond the limited purposes allowed under the ABM treaty.[4] Such restrictions offer a practical means of reducing the American defense initiative to its minimum and most legitimate claim—exploratory research on the fundamentals of defensive technology. To accomplish that in the area currently proclaimed by the United States as being of highest priority would establish the heretofore missing element in the U.S. arms control position: the principle of balancing force reductions with restraints on weapons modernization.

The choice of space as the central topic also conveys an implicit warning that antisatellite weapons will be an element of Soviet reaction if arms control efforts fail, and unfortunately that is also a logical choice. The Soviets can ill afford a comprehensive and sustained reaction to the perceived threat of American strategic investment. Before they commit themselves to broad weapons programs of the scope and magnitude required, they will very likely attempt a focused reaction designed to provide enough countervailing leverage to force an American compromise. If adroitly managed, a Soviet antisatellite weapons program could provide leverage that would be quite effective both in military and in political terms.

It is well within Soviet technical capability to develop and deploy advanced antisatellite weapons that will threaten critical assets of the U.S. command system—by far the most vulnerable and most important element of U.S. strategic forces. Though they already possess a rudimentary capability of this sort, the Soviets have not yet developed the dedicated, discriminating antisatellite weapons that they could produce if they chose to do so. Such weapons might effectively preclude the coordination required to organize a U.S. preemptive strike even if the raw firepower required for such a strike could not be denied. Moreover, by challenging the legitimacy of current space activities and creating controlled interference with military support systems, the Soviet Union could also introduce issues that would be enormously divisive both within the American political system and within the NATO alliance. In effect, the Soviet Union can create an immediate conflict between the continuation of military support activities and the developmental testing of new space weapons.

Beyond that, there are two areas of strategic weapons deployments where the Soviets can compete with relative advantage despite underlying technical inferiority. First, the large-scale deployment of submarine-based cruise missiles will be to the Soviet Union's advantage even if its versions are not as effective as ours. The reason is that the United States and its allies are exposed to threats from the oceans, have many critical targets near coast areas, have no significant air defense systems, and have strategic command arrangements that can readily be disrupted by attacks that develop with little warning. Second, the Soviets also have advantages in any competitive deployment of land-mobile ICBMs: notably, large empty land areas, authoritarian political control and internal secrecy that allow effective concealment, a ready system (the SS-25) that has already been designed and tested, and established experience with mobile missile operations on land.

Systematic exploitation of these advantages would bring the U.S. forces under significantly greater threat of preemption than they now experience and hence would increase our own incentive to initiate strategic operations under the pressure of crisis circumstances. Though this exploitation would be subtle and not very visible politically, in term of military realities it would be profoundly destabilizing. Moreover, such a development would be accompanied by a highly visible increase in the forward positioning of Soviet naval assets; over time this would register politically as a major change in security circumstances. Finally, concealed deployment of land-mobile ICBMs combined with extensive submarine cruise missile deployments could readily deny any accurate counting of total Soviet strategic assets. That would also be likely to register politically as a major and unfavorable change in security circumstances.

The short of it is that the Soviet Union, even though competing at a considerable technical disadvantage, can degrade the current U.S. and allied security position very significantly. In the absence of effective mutual restraints, it will probably do so.

VII

Given these circumstances, the diplomatic component of current U.S. security policy does not appear adequate to deal with emerging strategic conditions and is in need of substantial revision. In particular, its objectives have been misspecified. The virtually exclusive focus on achieving reductions in Soviet force levels and the consequent sacrifice of opportunities to impose restraints on future weapons deployments distort the priorities of actual American security interests. Force reductions, though desirable, are not as important as preventing new Soviet weapons programs. Restraint on new weapons is, at any rate, a necessary concomitant to reductions.

The further development of dedicated Soviet antisatelite systems represents the most serious immediate threat to the integrity and operational capability of U.S. military forces, particularly when combined with forward deployments of submarines

[3] Bruce G. Blair, *Strategic Command and Control: Redefining the Nuclear Threat*, Washington, D.C.: Brookings, 1985; and Daniel Ford, "U.S. Command and Control," *The New Yorker*, April 1, 1985; April 8, 1985.

[4] In National Security Decision Directive No. 119 establishing the Strategic Defense Initiative, President Reagan mandated the Department of Defense to "demonstrate" defensive weapons technology. The Washington Post, January 26, 1984, p. 1. Under standard U.S. military practice, demonstration entails activities that go well beyond the stages of research and clearly involve the display of weapons prototypes.

and other measures designed to enhance a preemptive threat to the central U.S. command system. Though absolute protection against this threat is not possible, very significant restrictions could be achieved by a prohibition on further testing and deployment of antisatellite systems. In any reasonable assessment, that should be the diplomatic objective of highest immediate priority. Categorical rejection of both the technical feasibility and inherent desirability of this objective has dominated recent American policy,[8] this is an error of judgment serious enough eventually to force a major political correction. Whether this can be accomplished before irreversible consequences have been triggered is perhaps the single most important security question confronting the United States at the moment.

The deployment of submarine-based cruise missiles is an issue somewhat similar in character but different in implication. The U.S. commitment to unilateral deployment of these systems without any serious attempt to achieve negotiated restraints is also a major mistake but one that has already been made. The consequences probably have already become irreversible, though they might conceivably be mitigated by eventual limitations on the scale and positioning of these deployments. The issue is largely whether the United States can learn from this experience to diagnose a significant flaw in its security planning: weapons acquisition and diplomacy are being separately managed, and the integration of them that circumstances require is not being achieved.

Regarding theater weapons, the threat to European and Asian allies posed by the SS-20 is less significant than the potential represented by the new SS-25. The characteristics of this system have not yet been fully displayed, and an assessment of it requires a degree of imagination. The problem is not so obscure, however, that security planners should be excused from anticipating it. The SS-20 is a system improvised from the cancelled SS-16 ICBM program, and there are reasons to believe that the Soviets considered its deployment to be a transitional arrangement. It is prudent to suppose that substantial improvements have been embodied in the SS-25, and that the new system provides a significantly better basis for a large-scale mobile deployment, one that is capable of covering targets throughout the entire U.S. alliance network in Europe and east Asia. If the Soviets choose fully to exploit their advantages in concealed mobile operations with a better system, the NATO missile deployment—so inherently visible that it is exposed to preemptive destruction by conventional Soviet forces—is not likely to be considered an adequate response indefinitely. Anyone worried about the SS-20 should be distinctly more worried about the SS-25 and relatively more interested in arms control arrangements that would prevent its deployment. No effort of this sort appears to have been made in Geneva, however, and U.S. officials at the moment appear to be conceding the inevitability of an impending surge in this category of weapons.

Beyond these more familiar issues lies the problem of the integrity of the command system. It has yet to emerge into clear public focus as the central strategic security problem of the age but is ultimately destined to do so. Current strategic command systems could not withstand even a small fraction of the offensive firepower that could be directed against them by existing forces, and this fact creates pressures on both sides for rapid and large-scale reaction to the perceptions of an impending attack. Since the interaction of these pressures under conditions of intense crisis could produce a sudden catastrophic breakdown of deterrence, diminishing them should be a major objective of arms control.

The problem is a difficult one in that it requires a combination of measures, no single one of which is likely to be decisive, or even effective, by itself. To be successful, the controls must dominate each country's overall assessment of the opponent's entire strategic posture. The most compelling method would be to remove the offensive capacity for an effective attack against the command system. But the force reductions required to accomplish that are too extensive to be a realistic immediate aspiration. Practical controls, therefore, must deal with the more ambiguous matter of intentions, largely through measures designed to prevent either side from optimizing a rapid, highly coordinated preemptive attack. A number of such measures can be identified to control the timing, precision and operational coordination of offensive forces: for example, the elimination of short-range systems and the disengagement of all systems from forward deployments; the design of deeply buried weapons and other means of protection that do not require and do not allow rapid responsiveness; the protective dispersion of command system assets; and the introduction of operational doctrines based on reconstitution after attack. These measures and the objectives they serve need much more development than they have yet received.

VIII

In sum, then, the familiar tragedy of avoidable and mutually damaging weapons deployments appears again to be emerging from the interaction of U.S. and Soviet strategic security policies. The situation is not yet irremediable. Effective statesmanship could still prevent misfortune, but many opportunities have been squandered. It has become difficult to believe that such statesmanship will suddenly emerge to master current trends. As indicated at the beginning of this article, designs for necessary compromises are certainly available, the most promising of which combines a prohibition on weapons development tests in space with reductions in large multiple-warhead missiles. It is prudent to acknowledge, however, that such arguments are being rapidly overtaken by events.

Let us repeat, then, some of the pieties of the nuclear age that have yet to become driving principles of policy. The securities of the United States and the Soviet Union have been locked together; it is extremely unlikely that either power can obtain any enduring net advantage by unilateral efforts. The age of technical virtuosity and dramatic weapons development has largely run its course. It has produced a dangerous situation which cannot be transformed by more weapons development, inevitable and even desirable as the individual projects may be. The cause of security primarily requires the establishment of a structure of political understanding and formalized restraint between the United States and the Soviet Union. For this to occur both political systems will have to undergo very substantial shifts in their prevailing attitudes and perceptions of security.

The most important threat to each country does not arise from weaknesses in political resolve, technical capacity, organizational competence or destructive firepower. The gravest threat is the inability to impose reasonable restraint, a mutally acknowledged problem for which each prefers to blame the other. There is in fact plenty of blame to be shared and, simply on practical grounds, each country would be well advised to begin at home. In the case of the United States, that requires adjustments in our strategic arms control policy.

[8] This position was officially articulated in the Department of Defense Report to the Congress on U.S. Policy on ASAT Arms Control, March 31, 1984.

FORTY YEARS LATER THE WORLD PRESS REVIEWS THE HOLOCAUST

Mr. PROXMIRE. Mr. President, the July issue of World Press Review has devoted its special World Press Report section to the legacies World War II has left behind.

Even now, 40 years later, stories are being written in papers such as the Financial Times of London, Le Monde of Paris, and many others that remind us of the horrors of that war.

This collection of articles addresses a variety of subjects, from the uneasy alliances that still plague us today to the growth of two superpowers which has fostered so much international tension.

Yet these articles also bring to mind another problem facing the world today—genocide.

Hitler left behind a trail of death and destruction of which few people could even have conceived before his crimes were revealed.

The authors of these articles treat Hitler and the Nazis almost as an aberration of history—an aberration whose aftermath still lingers in world problems today.

Some of the authors never mention the Holocaust specifically—but they do allude to the subject when discussing German guilt or the possibiity that a terror like this could occur again.

Mr. President, it is imperative that genocide should never occur again.

And it is obvious that we should do everything in our power to help ensure that genocide remain something that reporters will only have to write about in the past tense.

Every one of our Presidents in the last 35 years has asked the Senate to ratify the Genocide Treaty.

Mr. President, this treaty represents a chance to banish genocide from our future. Only the Senate has to act. No action is required by the House of Representatives, there will be no conference. Once we act, that is it. We can and should act now. This represents a chance, the sixth in 30 years that the Foreign Relations Committee has reported the treaty to the floor of the Senate and passed by a majority, this time by only one dissenting vote, and asked the Senate to ratify it. The

sixth chance for the United States to join with the 96 other nations, which includes every other developed nation in the world, that have ratified the convention.

No more bodies should be buried because of genocide, only genocide itself should be buried.

Forty years after the Holocaust the memories of the horrors persist in world thought.

But thoughts and memories are not enough—we must take action.

We must ratify the Genocide Treaty.

MYTH OF THE DAY—WELFARE SPENDING IS BEHIND THE DEFICIT

Mr. PROXMIRE. Mr. President, how many times have we heard people say that if we could only get all those freeloaders off the Federal dole, we would not have a deficit. Many people believe the Federal Government spends far more on welfare than it really does. This myth contributes to public frustration at our struggles over balancing the budget.

In 1984, the Federal Government spent about $852 billion and had a deficit of $185 billion, counting off-budget spending. All Federal spending for welfare, or public assistance related programs came to about $140 billion or 16 percent of total spending. This total includes money for such programs as Medicaid, low-income housing assistance, food stamps, and aid to dependent children. We could have completely eliminated these programs in 1984, and we would have still had a deficit of about $45 billion.

Furthermore, this total includes assistance which many people would not classify as welfare, such as medical care for veterans. Subtract this type of spending, and the total for welfare is closer to $120 billion.

But even using the broader definition of what constitutes welfare does not change the fact that it is a small part of the budget. It is also not growing as fast as many other parts of the budget. Between 1980 and 1984 Federal spending went from $590 billion to $852 billion, an increase of $262 billion. Welfare spending during this period increased from $95 to $140 billion—$45 billion—or 17 percent of the total increase. In contrast, defense spending went from $134 billion to $227 billion—$93 billion—or 35 percent of the total. Spending on defense grew twice as fast as that welfare. And if you want to apportion blame for the deficit, defense should receive twice as much as that for welfare.

Mr. President, cutting the deficit is difficult not because so much is being spent on the poor, who are relatively powerless, but because so little is being spent for them. Most Federal spending goes to those who have some power and who are able to make their displeasure at cuts heard. That is why the deficit is so large and so difficult to reduce.

Mr. President, I yield the floor.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

BALANCED BUDGET AMENDMENTS

The PRESIDING OFFICER. Under the previous order, the Senate will now resume the consideration of the pending business, which the clerk will state.

The legislative clerk read as follows:

A House joint resolution (H.J. Res. 372) increasing the statutory limit on the public debt.

The Senate resumed consideration of the joint resolution.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for a quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, it will be recalled that last night we said we were prepared to accept certain amendments. The Senator from Michigan has one, and I will yield the floor now so that he may present it, and I will accept it.

AMENDMENT NO. 745

(Purpose: To provide that controllable expenditures shall be sequestered from programs, projects and activities as defined in the most recently enacted appropriations acts and committee reports, or from each affected account if not so defined, so as to reduce the outlays by a uniform percentage)

Mr. LEVIN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Michigan (Mr. LEVIN), for himself, Mr. GRAMM, Mr. RUDMAN, and Mr. DODD, proposes an amendment numbered 745.

Mr. LEVIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER (Mr. HATFIELD). Without objection, it is so ordered.

The amendment is as follows:

On page 25, strike lines 12 through 21, and insert in lieu thereof: "(II) subject to clauses (ii), (iii), and (iv) of this subparagraph, eliminates one-half of such excess by sequestering from each affected program, project, or activity as defined in the most recently enacted relevant appropriations Acts and accompanying committee reports, or from each affected account if not so defined, for funds provided in annual appropriations Acts or, otherwise from each budget account, such amounts of budget authority, obligation limitation, other budgetary resources, and loan limitation, and by adjusting payments provided by the Federal Government not required by existing contractual agreements, to the extent necessary to reduce the outlays for each controllable expenditure by a uniform percentage;"

Mr. LEVIN. Mr. President, there is a major flaw in the proposal before us. The Gramm proposal, as it stands, would give the President unprecedented power. It would give the President tremendous new discretion to cut programs, activities, and projects for which funds are specifically appropriated by Congress. The President could protect his pet projects and drastically cut ones he did not like.

How can this be, when expenditure cuts needed to meet deficit-reduction targets were supposed to be uniform? Very simply, because the Gramm amendment defines "expenditures" in a such a way that the President could totally distort and undermine the priorities set by Congress.

Let us take just one example among hundreds—the research, development, test, and evaluation expenditure for the Army. The Gramm language requiring uniformity applies, of course, to that expenditure. That is a $4.8 billion expenditure. But there are 253 programs, projects, and activities inside that expenditure which have been specifically funded by the Congress. In granting the President authority to cut spending to meet deficit-reduction targets—cut, let us say, 10 percent from this $4.8 billion Army research expenditure—the Gramm language allows the President to pick and choose what funded programs would be cut and to what extent. The President would not have to uniformly cut each of those 253 specifically funded items, only the one item that they add up to—even though Congress has already exercised its discretion and prioritized spending by appropriating specific amounts for each of the 253 programs, projects, or activities within that budget account.

This means that the President could undo the will of the Congress, undo the Congress' priorities, undo careful action Congress has taken relative to the President's annual budget request, because of the way the Gramm amendment defines the word "expenditures."

Expenditures, as the OMB document referred to in the Gramm amendment defines them, are in many instances vastly different from appropriated accounts, vastly different from the programs, projects, and activities for which we carefully and precisely appropriated funds in bills and committee reports.

That would be a vast new grant of power to the President. We should not permit it. Everybody's pet project should be treated the same way—everybody's ox should be gored. Everybody should share in the sacrifice.

Over the last weekend, we debated this issue at length. That is one of the reasons we needed to take at least a few days to deliberate on this important piece of legislation—to address this kind of problem. I have met repeatedly with Senators GRAMM, RUDMAN, and DODD, who have now agreed to this amendment which makes sure that the specific programs and projects and activities funded by the Congress—be it in a bill or a committee report, or whatever way we do it—will be treated uniformly.

My amendment, thus, makes a critical change to avoid an unprecedented shift of power over the budget to the President. When this amendment is adopted, we will then preserve the historic balance of power between the President and Congress.

I reserve the remainder of my time.

Mr. PACKWOOD. Mr. President, I thank the distinguished Senator from Michigan. As usual, he has done yeoman work on this bill. He has indeed caught what might be called a flaw in this bill, and in bringing this to our attention has improved the bill and greatly enhances its chances of adoption.

Mr. LEVIN. I thank the Senator.

Mr. GRAMM. Mr. President, I congratulate our colleague from Michigan. Senator RUDMAN and Senator HOLLINGS and I have worked with him on this amendment.

We believe that the amendment carries out the intent of the bill. It moves from OMB line-item accounts to line-item accounts as they exist in the most recently adopted improved bill. It allows the specificity set out in terms of the definition of accounts in the relevant accompanying committee reports to be specified as guidelines.

It is not our objective here to specifically say that in each individual project we have to have an across-the-board reduction. We do not want to have 100 dams that are 99 percent complete. We do not want to pave highways that have 98 percent of the required asphalt on each one. Our objective is to the extent it is practical, to carry out public policy and to maximize the public welfare. But we want, within the sequester process, to preserve the priorities of Congress.

I thank our colleague for this amendment. I make note of the fact that this is a change that was made in concert with the Democratic side of the aisle that has given rise to changes which I believe improve the bill, expand its base of support, but which were objected to by the distinguished minority leader last night.

Mr. RUDMAN. Mr. President, let me simply say, in reiterating what the distinguished chairman of the Finance Committee has just stated, that the Senator from Michigan, as usual, has made a contribution that greatly improves the original draft.

As the Senator from Michigan knows well from our discussions here on the floor, the intention of the drafters originally was to give the President no more power or no less power than he presently has.

The problem with the bill as originally drafted in its reference as the Senator from Michigan correctly pointed out was that the categories as listed within the line items in the OMB circular tended to be too broad.

As the distinguished Presiding Officer is well aware as chairman of the Appropriations Committee, the Appropriations Committee in fact does a finite amount of breakdown in our bills. Thus by referencing them and with the additional language that the Senator from Michigan has drafted we in fact achieve our original intent.

I might add parenthetically that for those including those in the morning press who make the statement that this gives rise to an unwarranted, unprecedented amount of increase in Presidential power, I do not believe that was true before, and it certainly is not true now with the excellent amendment offered by the Senator from Michigan.

Mr. LEVIN. I thank my friends from Oregon, New Hampshire, and Texas.

Let me reiterate one thing for the history of this which is really critical because there was unintentionally or otherwise, and I presume unintentionally on the assurance of our friend from New Hampshire, there was unprecedented shift of power to the President in this bill and I have just given one example. The President could pick and choose among 253 items in but one expenditure line, the way this bill was written. There are hundreds of expenditure lines, but there are thousands and maybe tens of thousands of specified projects, activities and programs.

The language in the amendment speaks for itself. It is intended that it have its full broad meaning and not limited by anything that any of us might say here and that is—and I am quoting the amendments which were adopted—"that each affected program and project or activity as defined in the most recently enacted relevant appropriation acts and accompanying committee reports or from each affected account if not so defined," must be uniformly treated.

That is what I mean. And I mean it to have its full flower.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. RUDMAN. Mr. President, let me simply say the remarks just concluded by the Senator from Michigan are accurate. They are precise. They are precisely what the drafters of their amendment intend and the plain language speaks for itself.

I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back or expired.

The question is now on the amendment offered by the Senator from Michigan.

Without objection, the amendment (No. 745) is adopted.

Mr. LEVIN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. RUDMAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. RUDMAN. Mr. President, I believe the Presiding Officer could advise the Senator from New Hampshire that we currently are in a process of handling a number of amendments. I believe there is an amendment on that list by the Senator from Massachusetts. Is the Senator from New Hampshire correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. RUDMAN. I see the Senator from Massachusetts is here. So I expect if he seeks recognition we could then proceed.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KERRY. Mr. President, thank you.

AMENDMENT NO. 746

(Purpose: To provide for an annual report analyzing the effect of increased and improved tax enforcement and collection on tax compliance and revenue generation)

Mr. KERRY. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Massachusetts [Mr. KERRY] for himself and Mr. LEAHY, proposes an amendment numbered 746.

At the end of amendment 730 (modified and amended), add the following new section:

SEC. . The Directors of the Office of Management and Budget and the Congressional Budget Office and the Secretary of Treasury shall jointly report to the President and the Committees on Finance and Ways and Means on the projected level of revenues which would be raised by increased and improved tax enforcement and collection through audits, examinations, and other methods designed to eliminate tax cheating and increase revenue collections from individuals and corporations evading Federal taxation. The report shall include an analysis of measures which can be implemented to increase voluntary compliance with tax laws, including increased staff for taxpayer assistance, speedier processing of returns, improved information processing and collection, and public education designed to increase public trust and understanding of the Internal Revenue Service enforcement efforts. The report shall also include an estimate of the level of increased expenditures for Internal Revenue Service enforcement and compliance efforts at which additional expenditures would not yield additional revenues of at least $2 of

revenue for every $1 in expenditures. The report shall be issued on an annual basis no later than the date on which the President submits a proposed budget for each fiscal year to the Congress.

Mr. KERRY. Mr. President, I would like to be very clear about my purpose in submitting this amendment and what I am trying to achieve here.

Next winter, and possibly before that in the course of this fall, we are going to be confronting some of the toughest choices we have been faced with in a long time, and I welcome that. That is precisely why I am supporting this measure. I think Congress ought to be making those choices.

When we do make those choices, when we get into a zero sum budgeting process next winter, I want to make certain that the whole pie is on the table and every available source of revenue is being considered.

It is not only my anticipation but it is my hope that we are going to avoid the sequestration process. How are we going to do that? We are going to have to become more creative in where we look for available revenue.

The sad fact is that since 1975 there has been created in this country a 300-percent gap in tax compliance. If we were merely collecting taxes at the level that we collected them 10 years ago, not a whole new concept, but merely at the level of 10 years ago, we would have an additional $17 billion in revenue today. The revenue department, IRS, receives an increase of some 17 percent in forms and yet over those last years they have only received a 2-percent increase in personnel.

The stories of lost and even shredded letters from taxpayers, the diminution of a tax base that people have any credibility in, is exorbitant and the consequences of that, Mr. President, is that Americans by and large are losing their faith in the credibility of the tax structure itself.

Daniel Yankovitch did a study for IRS and that study for IRS showed that 41 percent of Americans believed that the majority of other Americans are not paying their fair share of taxes. Indeed, when the IRS submitted this year its request for personnel, they requested 95,000 personnel and they were cut back by the administration to 86,000 personnel and for a savings of $300 million, the administration showed a concomitant reduction in anticipated revenues from $36-some billion to $34 billion. So we lost $2.4 billion in revenue for a savings of some $300 million. It does not make sense.

The American people understand and want fairness in their tax structure. This is not a fluff study that I am asking for. I am asking for a comprehensive full review of what each and every State in this country has done from Massachusetts to Illinois to California. A host of States, some 14 to 16, already have implemented this kind of program and have increased their revenues significantly and it is high time that the Federal Government begin to take that kind of fairness and that kind of equity and that kind of approach seriously.

Mr. President, I believe if we were to have that kind of comprehensive review of all those options that are open to us to be able to increase enforcement and bring it down to a level where for every $1 expended, $2 are returned, we will have done the taxpayers of this Nation a great service.

The IRS will tell you, Mr. President, and tell all of us, that right now for every $1 expended, $23 can be returned to the coffers in some programs and a minimum, a minimum of $6 can be returned in others.

Mr. President, when I first submitted this concept last year in the budget process, and I am pleased to see we put it in there at least in a sense of what Congress ought to do, those reported income tax returns on which there was a failure to report or an ability to produce additional income amounted to a sum, according to the IRS, of $94 billion.

The PRESIDING OFFICER (Mr. PRESSLER). The Senator's time has expired.

Mr. KERRY. Mr. President, I ask unanimous consent for an additional minute from my colleague.

Mr. RUDMAN. I yield an additional 2 minutes of our time to my friend from Massachusetts.

Mr. KERRY. I thank the Senator very much. I hope I will not need it all and I thank my colleague.

When we first considered this during this winter, the IRS reported that there would be $92 billion in collectible items were they able to audit them. The sad fact is that corporate audits in this country have gone down 46 percent in the last few years; individual audits have gone down 26 percent. And just the other day in the space of these few months from when we first considered the budget until now, the IRS says that gap is in fact not $92 billion but $106 billion and there is an additional $30 billion of reported assessed but uncollected taxes of which they are only trying to get some $8 billion.

The National Governors Association unanimously passed a resolution in which they stated that they thought there was $20 billion out there if we were only to genuinely go after it.

Mr. President, one of the reasons I support the measure I support—and I congratulate my colleague on his efforts on it, because I think they have been important to the resolution of a major problem—is that I know there is additional revenue out there which would enhance people's faith in fairness in the process, which would give people a sense that we mean business and that we are going to be fair about it.

Right now there are hundreds of Americans who are being required to pay for police, fire, streets, all the services in their communities, while other citizens are not even paying their fair share. And I think that is the foundation of what we are all about.

So I want this study to be serious. When we sit down next winter, I want us to look at what is available to us, so we can avoid drastic cuts and so that we have other options, and I think this will help us to achieve that.

Mr. RUDMAN. Mr. President, let me say to my friend from Massachusetts that this is an excellent amendment. It is really very timely and it is quite pertinent, because here we are with the Gramm-Hollings-Rudman-Kerry, et al., amendment which we are going to act on today at 3 o'clock. The President referred to it as historic. It is historic in the sense that it will finally put some compulsion into the system. But it is also historic in another way, it seems to me, and that is if you take the figures of the Senate Finance Committee, which were well publicized last year, we understand there is up to $100 billion a year lost in revenue from both legal and illegal activities, at least half of that from legal activities, the so-called underground economy. Imagine how much easier our job would be, I say to my friend from Massachusetts, come this year when we have to involve ourselves in the budget process, let us say, for fiscal 1987, if we actually had that $100 billion. We would have a very simple task, indeed.

So it is an excellent amendment. We are delighted it was offered. I certainly commend the Senator from Massachusetts for offering it and hope that we get more than lip service from those who ought to look into this, and that we try to find real and meaningful ways to make all Americans pay their fair share so that some Americans do not have to pay their unfair share.

I yield back the balance of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Massachusets [Mr. KERRY].

The amendment (No. 746) was agreed to.

Mr. KERRY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. RUDMAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. KERRY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, my understanding is we are now to be on the amendment of the distinguished Senator from Nebraska, Senator EXON. We need to leave the Chamber by 10:15 a.m. for the joint session to hear an address by the Prime Minister of Singapore. I hope the distinguished Senator from Nebraska could follow the unanimous-consent agreement, offer his amendment, and we might vote.

Mr. President, I assume it has been reviewed earlier but we do hope to lay down the Exon amendment, have the debate, and perhaps postpone the vote until after the joint session. That would not change anything else in the order. But not later than 12:30 p.m. today the Senate will vote on the Democratic leadership amendment, then we have a couple of other amendments, and then there will be a vote on the Gramm-Rudman amendment as modified. Then hopefully we will have passage of a short-term debt limit—all before 3 p.m. Then we would go on to other amendments, attempt final passage of the bill by not later than 4 o'clock tomorrow, then lay down the reconciliation bill, and hopefully at least start on that today or tomorrow. Then next week we will try to catch up by coming in at 8 o'clock each morning on appropriation bills, and then shifting to the reconciliation at noon on each day.

So we need to double up, and catch up because the calendar is running out of days.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. RUDMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RUDMAN. Mr. President, I ask unanimous consent that when the Senate reconvenes following the joint session, the pending business be the Exon amendment.

Mr. CHILES. Reserving the right to object, Mr. President, I would like to know how much time the Senator from Nebraska is going to have. I assume we are talking about opening the debate now and going until 10:15, then having a brief time after we get back before the rollcall vote.

Can the Chair tell us how much time each side will have?

The PRESIDING OFFICER. Under the original agreement, the Senator from Nebraska was given 30 minutes and the other side was given 10 minutes.

Mr. RUDMAN. How much time is remaining for the Senator from Nebraska at this time under the previous agreement? His time has expired, is that correct?

The PRESIDING OFFICER. His time has expired.

Mr. RUDMAN. If the Senator from Nebraska would yield for a moment, under these circumstances, what would the Senator from Nebraska think might be reasonable? If he started debate now for the next, say, 12 minutes, how much time would the Senator from Nebraska like when he comes back?

Mr. EXON. In answer to the question from my friend, I shall simply start by saying that this Senator never agreed and I am surprised that those on this side of the aisle did not protect this Senator with the information that he was entitled to. I think it is a serious breach of senatorial ethics and I do not like it.

I understand the position that my friend is in. I shall shorten my time if we lay this down now and if I could have 20 minutes when we get back for my side and whatever is necessary on that side, we can wind it up at that time.

Mr. RUDMAN. Mr. President, let me say to my friend from Nebraska that certainly no one on this side, nor did he say so, intended to impinge on the Senator's rights. Having been here until 4 o'clock in the morning myself and observing what went on, let me assure the Senator from Nebraska that if something happened without his permission, it was highly unintended.

Mr. CHILES. Mr. President, I say to the Senator from Nebraska that my ethics are questioned daily now, but I only took this chair 1 minute ago. So I am not responsible.

Mr. EXON. Mr. President, I would ask in rhetorical fashion who was in charge, but may we go ahead with the pending business?

Mr. RUDMAN. We may.

Mr. President, I ask unanimous consent that in addition to the Exon amendment being the pending business when we return, the Senator from Nebraska now be allowed a total of 20 minutes——

Mr. EXON. With the understanding that I have a minimum of 15 minutes when we return.

Mr. RUDMAN. With a minimum of 15 minutes when the Senate reconvenes at 11:15. The managers on this side would require 10 minutes, followed by a rollcall vote.

Mr. EXON. Mr. President, reserving the right to object, as I understand the original agreement, it was a half hour for the Senator from Nebraska and my cosponsors and there was to be 10 minutes on that side of the aisle. Is that correct?

Mr. RUDMAN. If that is the request, I amend my request to 5 minutes.

Mr. EXON. I agree. I have no objection.

Mr. RUDMAN. Mr. President, has the request been granted?

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 747

(Purpose: To require reports by the Directors three times each year and to revise the definition of statistical significance for fiscal year 1986)

Mr. EXON. Mr. President, I send an amendment to the desk in behalf of Senator KERRY and myself and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nebraska [Mr. EXON], for himself and Mr. KERRY, proposes an amendment numbered 747.

Mr. EXON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment, add the following:

( ) PERIODIC REPORTING REQUIRED.—Notwithstanding the second sentence of subsection (d)(1) of this section, the Directors shall jointly report to the President and the Congress the matters described in such subsection on October 1, February 15, and May 1 of each fiscal year, except that with respect to fiscal year 1986, the Directors shall jointly report to the President and the Congress the matters described in such subsection on November 1, February 15, and May 1 of such fiscal year.

( ) STATISTICAL SIGNIFICANCE OF DEFICIT.—Notwithstanding the second sentence of subsection (d)(4)(H) of this section, if, in any report submitted with respect to fiscal year 1986 by the Directors under subsection (d)(1) of subsection ( ) after November 1, 1985, the Directors state that the deficit for fiscal year 1986 exceeds the maximum deficit amount for such fiscal year by an amount which is greater than 5 percent of such maximum deficit amount, such excess shall be treated as "statistically significant" for purposes of this section.

Mr. EXON. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is sufficient second.

The yeas and nays were ordered.

Mr. EXON. I thank the Chair and I thank my colleagues.

Mr. President, this amendment is a very simple, very straightforward one. Frankly, the Senator from Nebraska is surprised that the managers on that side of the aisle have not agreed unanimously to accept the amendment, because it is a significant step

forward in attempting to carry out what has been billed and designed, as I understand it, to put the wrench on the spending of the Federal Government and bring us back into line on deficits and the uncontrollable national debt. Therefore, I do not understand why there is opposition to this measure unless the facts of the matter are that this is not a serious amendment, this is not designed to do what it is billed to do. Unless we can adopt an amendment such as this, I think the main proposal before us is so fraught with inconsistencies that it falls, frankly, of its own weight.

Therefore, I say, Mr. President, that this is a test vote in the U.S. Senate as to whether or not we believe in the basic tenets of the Gramm amendment or whether we are trying to fool the American public with less than a realistic approach to face the fiscal difficulties and the national debt calamity that faces this country. I think the RECORD is very clear from a number of votes on the Senate floor, sponsored and approved by this Senator, that it is time to get serious.

Mr. President, would it be possible that we have a little order in the Chamber? This is a very serious proposal. I know there are a lot of important things going on, but they are no more important, I suggest, to the people of America, than the amendment that I have just proposed, along with Senator KERRY.

The PRESIDING OFFICER. The Senate will be in order.

Mr. CHILES. May we have order, Mr President.

The PRESIDING OFFICER. The Senate will be in order.

Mr. EXON. Mr President, this is a simple amendment to put teeth in the Gramm-Rudman proposal, put teeth in it, put teeth in it, put teeth in it. That is the basic tenet of the amendment that I have just offered. As drafted, the Gramm-Rudman proposal sets a first review period for November 1, 1985. Given the targets, nothing will happen in all reality, I suspect, this November. Our first real test will then be put off, Mr. President. We will go into recess. We will have a delay. It will be put off until October 1986, a full year from now. Congress must not delay its task of deficit reduction. My proposal would simply add to the reporting period as designated in the bill, February 15 and May 1. It would also make the margin for statistical significance for the February 15 and May 1 periods of 5 percent rather than the 7 percent as written into the Gramm proposal for the first reporting period.

Mr. President, we have a deficit crisis right now. Let us start deficit reduction and the clock ticking right now, not a year from now.

Mr. President, there may be a successful explanation from those on the Gramm amendment side of this measure as to why this is not feasible, why it is not workable and why it does not make the bill that they are advertising as the salvation for the fiscal sanity of America not stronger and not better.

I reserve the remainder of my time.

Mr. RUDMAN. Mr President, I believe that we have approximately 2 minutes until we must proceed to the House Chamber. Is the Senator correct?

The PRESIDING OFFICER. The Senator is absolutely correct.

Mr. RUDMAN. Let me then speak for 2 minutes. There is one basic flaw—there are several basic flaws but one I would address now—in the amendment offered by the Senator from Nebraska. The debate in this Chamber for the past week and a half has concentrated on obviously the most interesting part, if not the most effective part, of the plan. The Gramm-Rudman-Hollings plan has two parts. The first part is a compulsory process with teeth in it and the second part is the sequestering, and all we have been talking about is the sequestering. The fact is that the first imposes a requirement on the President as to the level of deficits contained in his budget. That is A. B is that time poses new requirements on the Congress. And C, if that does not happen, it then has an enforcing mechanism.

Now, the Senator from Nebraska does not have a bad idea except that it is now October of 1985, and the Congress thought it was playing with not real money during our budget resolution. Everybody thought we were playing with monopoly money. That is why we sat here in all solemnity just 8 weeks ago and said we are passing a budget with a $170.9-billion deficit and then just 8 weeks later somebody made a mistake with the adding machine and we find it is $192 billion, and some people say maybe more.

So let me say to my friend from Nebraska that I would like to do what he wants to do but the hardship on the American people when we set a set of priorities, when we thought we were playing with fake money—I did not but some people did—when we were playing with real money would be very unfair. That is why the Senator from Texas, the Senator from New Hampshire, and the Senator from South Carolina agreed, although we originally had it that way, that it would be unfair and that we would have the trigger November 1.

I understand, Mr. President, it is now 10:15 and I would just have the Chair restate that the Exon amendment is the pending business when we return. Am I correct?

The PRESIDING OFFICER. The Senator is absolutely correct.

RECESS UNTIL 11:15 A.M.

Mr. RUDMAN. Then under the previous order, I ask unanimous consent that the Senate go into recess for the purpose of attending a joint meeting of the Congress.

There being no objection, the Senate, at 10:14 a.m., recessed until 11:15 a.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. KASTEN].

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

AMENDMENT NO. 747

The Senate continued the consideration of the joint resolution.

Mr. RUDMAN. Mr. President, is the parliamentary situation that we are now on the Exon amendment and there are 15 minutes remaining to the Senator from Nebraska and 2½ or 3 minutes for the Senator from New Hampshire?

The PRESIDING OFFICER. There are 5 minutes for the Senator from New Hampshire. The Senator is correct, there are 15 minutes for the Senator from Nebraska.

Mr. RUDMAN. I thank the Chair.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. I thank my friend from New Hampshire. I thank the Chair.

Mr. President, the Exon-Kerry amendment will likely be the key amendment that tests the validity or lack thereof of the Gramm-Rudman amendment. Is the Gramm-Rudman amendment a fact or is it fiction? The Exon-Kerry amendment puts up-front teeth in the Gramm proposal. Without it, Gramm is essentially a toothless fraud on the American people that to date have been misled to a considerable extent that the Gramm amendment assuredly leads us to the promised land of Oz and the fiscal stability that we all seek.

The question that begs for an answer is whether the Gramm amendment is real or did it come from the wizards smoke machine? The analogy, of course, Mr. President, is facetious, but the true grit of the Gramm amendment and its pretension for a balanced budget is here before us in the U.S. Senate and we have the obligation to dispose of it.

The question is how do we best assure that it will work as advertised or whether it will go down in history as the great brain robbery?

Just before the break to attend the function in the House, the principal sponsors of the Gramm proposal stated that if we take seriously the deficit reduction action, there would be great hardship on the American people. Exactly. That should be clearly understood. There is no easy answer to our dilemma. That being a given, why is it not reasonable to begin the

hardship now and prescribe smaller and more evenhanded doses of the bitter-tasting herb, rather than taking a recess for a year until after the 1986 election?

All that this straightforward amendment of ours does is strengthen—I emphasize the word "strengthen"—the Gramm procedures for treatment of what most ails America's economy. Of course, that is the runaway deficit and the out-of-control national debt.

Mr. President, all that the Exon-Kerry amendment does, with no further change in the Gramm program, is insert two additional reporting dates on the status of the economy to the President of the Congress from the Congressional Budget Office and the Office of Management and Budget—on February 15 and May 1 of each year. I cannot imagine what is wrong with that.

I cannot imagine what is wrong with that.

Now, why is this necessary? Because after admittedly conceding that they wanted teeth in their proposal, the Gramm proponents backed away and formulated a plan as presented that sounds good but eventually puts off for a year the triggering mechanism to force compliance.

It will be claimed, Mr. President, that this required report from CBO and the Office of Management and Budget in just 20 days from now, on November 1, may, and I emphasize may, trigger something. But it is clear that the authors of the Gramm amendment, by their finagling with the arbitrarily raised deficit figure and the 7-percent increase in the significant statistic figure, have gone all out to get around this and delay significant action for at least 1 year. It may be that we will trigger the must-do penalties in 20 years but the weight of the evidence is that it will do otherwise, and it would be significantly put off for 1 year.

Mr. President, I strongly urge the adoption of the Exon-Kerry amendment because I believe it more than anything else will give the Rudman-Gramm proposal a chance, if you will, Mr. President, to do something about the deficit and the national debt.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time? The question is on agreeing to the amendment.

Mr. GRAMM. Mr. President, I do not need to take a long time on this amendment. The truth is we adopted a budget after we were unable to take the real reductions that were built into the Senate version and come to an effective conference with the House. So before we started this process we had a budget which Members on both sides of the aisle said was full of phony savings, was full of optimistic assumptions. So while in reality we claim to be talking about $171.9 billion, we are looking at $190 billion under any kind of realistic assumptions under that budget.

We thought it was important to get into the process, to recognize the reality of where we are, noting that everybody thought we were playing, as my colleague said, with play money in the first budget and everybody knows we are shooting with real bullets now. So what we are trying to do is to get into the process.

Now, let me explain to my colleague from Nebraska and others that in order not to be forced to sequester on November 1, the President is going to have to veto every appropriation bill that is a nickel over budget, and I hope those who support this amendment are ready to sustain those vetoes. I am. The President may well have to veto the farm bill if we adopt this program and enforce it if Congress is not fiscally responsible in that bill. I am ready to sustain those vetoes. I hope the authors of this amendment are also ready.

Finally, it may well be that the Superfund bill would be vetoed under this legislation. I think we can look at a broad range of possibilities. None of that has to happen, but it all depends on what we do on Superfund, what we do on the farm bill, what we do on appropriations. The truth is we are shooting with real bullets but we are recognizing where we are today.

I oppose this amendment. I am confident we are going to vote it down, but I remind my colleagues that when it comes to sustaining vetoes, I hope those who are so eager to get started are going to be there with me to sustain those vetoes.

The PRESIDING OFFICER. The question is on agreeing to the amendment. Who yields time?

Mr. EXON. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Nebraska has 9 minutes and 30 seconds.

Mr. EXON. I yield 3 minutes to the Senator from Arkansas.

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. BUMPERS. Mr. President, many of us on this side have said repeatedly that we think the Gramm-Rudman-Hollings proposal has a lot of merit. Procedurally, it is a mechanism that will probably force some discipline on the Senate that we have not had before. Most of the Members on this side are going to vote for it.

Last Thursday when it was presented to us as a fait accompli, however, it was said, "Don't look at it, don't try to amend it, don't do anything with it because if you don't vote for it right now, the Government is going to come to a halt."

This is a terrible way to legislate. Happily, some people over here have taken a lot of political heat in order to try to dress this bill up and make it work the way its sponsors told us it was going to work. Since last Thursday, because some people over here have analyzed this proposition and seen what it really does, there have been at least 100 technical and substantive changes made in that bill, the same bill we were told last Thursday was closely akin to the second coming. And I suspect there are a lot of things in this bill right now that a year from now we will wish he had thought of.

Now, the Exon amendment simply says that if you pass the amendment in its present form, you ought to call it the national deficit reduction postponement bill. He is simply saying that there is no great courage in voting for this bill if it is not going to do anything until everybody is safely reelected in 1986.

The Gramm-Rudman deficit reduction target for fiscal 1986 is $193 billion, and the CBO estimate for budget outlays in fiscal 1986 is $172 billion. Now, what kind of courage does it take to set a target of $193 billion for the fiscal year we are now in when everybody knows we are probably going to come in $20 billion under that target?

In 1987, the bill's target is $151 billion, and if you average the estimates right now of OMB and CBO, which the bill does, the deficit is projected to be $151 billion. What courage does it take to vote for a bill that sets a deficit target that is already precisely what CBO and OMB says the deficit will be? Not until fiscal 1988, not until 1988—even a year after the election—is anybody going to have to play with so-called real bullets. I keep hearing that term used around the Chamber.

So what the Senator from Nebraska has very thoughtfully done is say if you really believe in deficit reduction, and if you think this is a suitable mechanism and a suitable procedure for achieving it, which most of us do, then let us get on with the show.

So, Mr. President, I am happy to support this amendment by Senator EXON and tell the American people that Senators on this side of the aisle are also interested in deficit reduction and we are interested in it now, not in 1988.

Mr. RUDMAN. Mr. President, I want to respond very briefly to only one comment made by the Senator from Arkansas. I will represent to him now as I had on Friday and Saturday that there have been no substantive changes made on this side to the bill. The fact is that Senator LEVIN had a very good suggestion which was in the spirit of the bill which we all jointly accepted today. Senator BYRD, the Democratic leader, had a very interesting thought on the constitutionality of one of the rules changes devices. We agreed with that.

But let me say to the Senator from Arkansas that the bill we put at every one's office door on the 24th of September in terms of the front end and the back end philosophically has not changed. On Friday last and on Saturday all day on this floor Senator GRAMM, Senator HOLLINGS, and the Senator from New Hampshire told everyone here, if we could improve the bill, we wanted to do that. Senator BYRD has helped to do that and it was delightful. Senator LEVIN gives us a suggestion that we think improves the bill. But to claim that the basic philosophy of this bill has changed just is not accurate.

Mr. BUMPERS. Will the Senator yield?

Mr. RUDMAN. I do not have any other comment.

Mr. BUMPERS. The Senators also changed the definition of what constitutes a recession. They changed it from four quarters to two.

The PRESIDING OFFICER. Who yields time?

(Several Senators addressed the Chair.)

Mr. EXON. Mr. President, how much time remains on my side?

The PRESIDING OFFICER. The Senator from Nebraska has 6 minutes remaining.

Mr. EXON. And the other side?

The PRESIDING OFFICER. The Senator from New Hampshire has 1 minute and 20 seconds.

Mr. EXON. I yield to the minority leader.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BYRD. Mr. President, I was listening over the squawk box, and I heard the distinguished Senator from New Hampshire say that I was concerned about a rules matter and "we have agreed on that."

Mr. RUDMAN. If I said it inaccurately, what I intended to say was the Democratic leader had a problem with Congress giving some of its constitutional authority and rulemaking authority to the President, and my understanding is that has been worked out or, if it has not been worked out, it will be today.

Mr. BYRD. That has not been worked out. I have not discussed that change with any Senator. I am talking about looking at it like this and saying, "Here is what we will do." I do not know what has been done.

Mr. EXON. Mr. President, if I might reclaim my time, if the discussion has finished——

Mr. RUDMAN. Mr. President, I ask unanimous consent that the Democratic leader be allowed a couple more minutes to state his position.

The PRESIDING OFFICER. Is there objection?

Mr. GRAMM. Mr. President, reserving the right to object, we are under strict time constraint. The Senator from Nebraska has substantial time. If we let this thing slip, I am concerned that we are not going to meet our deadline.

So I hope the Senator from Nebraska will yield to the distinguished minority leader. On our side, we have a minute and a half remaining, and we will yield that to him.

Mr. EXON. Mr. President, I have a cosponsor who wants to be heard on this. I am going to insist, above everything else, that he be heard. I yield 3 minutes at this time to the distinguished cosponsor of this measure, the Senator from Massachusetts.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. I appreciate that, and I wish I did have a little more time.

Mr. President, as a cosponsor also of the Gramm-Rudman amendment, I am a cosponsor in this effort to try to commence this process sooner, and I will state quickly my reasons for doing so.

There is not a business in the country, nor even a Governor of the 43 States, that is required to balance its budget on an annual basis, that does not look for periodic reports on a more regular basis.

I am concerned that after this November 1, there will not be an annual report that will trigger any action whatsoever or require us to adhere to a rigorous standard, or to the bullets we have heard so much about, until almost a year has passed.

That is not a way to absolutely guarantee that we are going to be toeing a realistic line—not just a line that is midway between OMB and CBO, but a line that we know is holding us, by virtue of their appraisal, to what we should be doing in terms of reduction.

I do not think it is unreasonable for us to be looking for some guideline during that process. We are not changing the percent from the 7 percent on the first report this November. We are looking, as of February 15, to the 5 percent. At that point, Congress will be in session, and we will be responding to the budget message. We will be in the middle of the appropriations process, and we will have the ability to hold ourselves accountable at that point to take the action that is necessary to do as the Senator from Nebraska has said, put teeth into this process.

I think this is a reasonable approach. I do not know of a business in the United States that does not have quarterly reports or even monthly reports on sales and assets and where it is going.

I think we should show that we are really serious, that we are not tying this to the 1986 election, that we are being bipartisan about it and serious about it, and that we are willing to make those choices in January and February 1986.

So I urge Members to recognize that this does not change the process. It is my hope, as it is the hope of the distinguished Senator from Texas and the distinguished Senator from New Hampshire, that we will never have to sequester. It is my hope that we will make the choices we should make in January. But to help us do that and to toe the line that CBO and OMB are going to give us, we should know we are there. To ask them to submit that kind of report to us in January and again later in May seems to me the height of common sense and basically responsible, and I urge adoption of the amendment.

The PRESIDING OFFICER. The Senator's 3 minutes have expired.

Who yields time?

Mr. EXON. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Nebraska has 55 seconds remaining.

Mr. EXON. Mr. President, if we are ever to control the deficit, there must and should be all kinds of courageous action by Congress and by the President.

There are corporations paying no taxes, defense contractors ripping off Uncle Sam, a social program which include some waste in spending, and yes, farm programs which pay Government subsidies to wealthy corporate millionaires. There should be a hardship for the freeloaders and big spenders.

I suspect that opposition to the Exon-Kerry amendment is based on the fact that, if adopted by Congress, Congress and the President would immediately have to turn their attention to deficit reduction now. Let us put some teeth in the measure.

The PRESIDING OFFICER. The Senator's time has expired.

The majority leader is recognized.

Mr. DOLE. Mr. President, when we turn to the Gramm-Levin amendment this afternoon, it is my hope that we can have a vote on that by 3 o'clock. It may be that there will be a little time between the last vote and the Gramm-Levin amendment vote, and I ask unanimous consent that if there is any time, that time be used for debate and that there be no motions or amendments offered during that period.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object—and I will not object—the majority leader and I have discussed this matter.

When the distinguished majority leader says "between the last vote and the vote on the Gramm amendment," he means the last vote on the amendments we have already specified.

Mr. DOLE. That would be the Kerry-Dodd amendment.

Mr. BYRD. Whatever amendments are in order as per our agreement last night.

Mr. DOLE. That is correct.

Mr. BYRD. I thank the majority leader.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. RUDMAN. Mr. President, we yield back the remainder of our time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] is necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 46, nays 52, as follows:

[Rollcall Vote No. 210 Leg.]

YEAS—46

Baucus	Glenn	Moynihan
Bentsen	Gore	Nickles
Biden	Harkin	Nunn
Bingaman	Hart	Pell
Boren	Heflin	Proxmire
Bumpers	Inouye	Pryor
Burdick	Johnston	Riegle
Byrd	Kennedy	Rockefeller
Chiles	Kerry	Sarbanes
Cranston	Lautenberg	Sasser
DeConcini	Leahy	Simon
Dixon	Levin	Stennis
Dodd	Matsunaga	Weicker
Eagleton	Melcher	Zorinsky
Exon	Metzenbaum	
Ford	Mitchell	

NAYS—52

Abdnor	Gorton	Murkowski
Andrews	Gramm	Packwood
Armstrong	Grassley	Pressler
Boschwitz	Hatch	Quayle
Bradley	Hatfield	Roth
Chafee	Hawkins	Rudman
Cochran	Hecht	Simpson
Cohen	Heinz	Specter
D'Amato	Helms	Stafford
Danforth	Hollings	Stevens
Denton	Humphrey	Symms
Dole	Kassebaum	Thurmond
Domenici	Kasten	Trible
Durenberger	Long	Wallop
East	Lugar	Warner
Evans	Mattingly	Wilson
Garn	McClure	
Goldwater	McConnell	

NOT VOTING—2

Laxalt	Mathias

So amendment No. 747 was rejected.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PACKWOOD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CHILES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mr. CHILES. Mr. President, at 12:30 the Senate will have an opportunity to vote on the proposal offered by Senator BYRD, Senator JOHNSTON, myself and a number of others on our side. We believe it is a proposal that will set the standard on whether we are ready to face up to this deficit problem, and put it behind us. Mr. President, I notice we had a very narrow vote on the Exon amendment—52 to 46; 46 Senators said that they thought we should start this process sooner. I think that is a very significant vote. In fact, there were a few votes that came from the other side—a surprise—that said we should start it sooner. Well, if we can build on the vote of 46 Senators we will not only be able to start the job sooner; we will be able to finish it sooner.

We have an opportunity to tell the American people that we consider this problem to be very serious. Those of us that have worked on it for a number of years can say we finally have a mechanism that does the job, and, Mr. President, it does it in a fair way. It does it in an impartial way, allowing the President and the Congress to participate in sequestering process in an equal way.

Mr. President, among the main features of our plan is that it allows us to start sooner. And we will finish it 1 year sooner. We will not fall victim to the worries of a political year.

We will also have a fairer process because the figures will be more honest figures. We are going to use the impartial CBO. We will not be ruled by OMB which we know has always been a captive of the President. The process will focus on budget authority while the Gramm proposal would cut outlays on the percentage, and we know what that would do to programs that spend out their outlay money a little slower. It means sewer and water projects would be devastated. It means housing programs would be devastated. If we are interested in deficit reduction we can do it through budget authority. If we are interested in dismantling government, then we will go the other process, and then say we will do away with the 202 elderly housing program, we will do away with programs like water and sewer grants, and programs that people want and work fairly well. Let us cut those programs—their proportionate amount, if we need to—but let us not say we are going to knock those programs out.

Mr. President, we would allow the portion of defense having to do with weapons systems to be considered the same way we consider readiness. Why should we take all the money from the readiness side of defense? If you are really concerned about whether this country is going to be prepared, then you ought to be able to see these matters clearly. If the Defense Department can cancel the DIVAD contract because they think it is not working, should we not be able to take part of the savings from that side? Certainly we should, and this amendment will allow us to do that.

Mr. President, a major difference is that while the Gramm-Rudman plan exempts Social Security, it does not do anything about any of the other means-tested programs. I have a higher percentage of senior citizens, 17.4 percent, than any State in the Nation. And I think it is fine to consider Social Security recipients, and say we are going to exempt their cost-of-living increases. But I have a hard time in good conscience saying I am going to do that, but women's and infants' and children's programs are not going to be exempt in their cost of living and their means tested programs. Veterans pensioners, people that are below the poverty line who have protected this country are not going to get their COLA. We are going to cut them out. I have a hard time with that, Mr. President.

So I think we can make these cuts but we can make them on a fairer basis.

Mr. President, our amendment is much fairer in the way it preserves the constitutional powers of both the President and the Congress.

The Gramm-Rudman plan is just stacked right now. It favors the White House in every instance. I think there should be simple fairness.

Mr. President, let us look at the recession provision. There will be some modification, I understand. They are going to allow two quarters. If there is a recession for two quarters, the President may say it looks like a recession is imminent, so he would like to send up another message.

Mr. President, we all know around here what happens when you have a recession. Your revenues go down. You find yourself in a situation where deficits increase. To exacerbate that recession by going into some of these automatic cuts does not make sense.

We say that where you have those two quarters and you are in a recession, you suspend the plan. But you do not do that willy-nilly. After the recession is over, you come back and you have to make up the revenue.

Mr. President, in regard to process, we see that under the Gramm-Rudman plan if the President says we are in default, if he issues his Execu-

tive order with the effect of law, Congress has 10 days to move a reconciliation process through both Houses.

Mr. President, if this thing is supposed to be fair and is supposed to give the Congress an opportunity to act, you would not write into language that you allow just 10 days in which to act in both Houses. The President still has the ability to veto that plan even if they try to act in 10 days.

Mr. GRAMM. Will the Senator yield?

Mr. CHILES. I am happy to yield.

Mr. GRAMM. The bill simply says 10 days for the Budget Committee to initiate a reconciliation process. So it is not true that it has to be completed within 10 days. I wanted to be sure that that was corrected.

Mr. CHILES. But the bill does say that the Executive order takes force if the Congress has not acted in those 10 days.

Mr. GRAMM. I correct the Senator again. The bill says the sequester order, which is a ministerial function, goes into force immediately.

Mr. CHILES. That is right, and you only get it out of force if you do something in 10 days.

Mr. GRAMM. No. You have to initiate in 10 days, but whenever action is completed saving an equivalent amount of money, at that point, the across-the-board sequester would be replaced with a corresponding package to save the same amount.

Mr. CHILES. The Senator and I differ on that.

I think it is pretty clear if you look at this you will see on the one hand we have a proposition that starts sooner and finishes sooner, which deals with it in a balanced way and tries to treat the programs in a more balanced way as to where the cuts would take effect.

On the other hand, we say the Rudman amendment will simply give the President the authority and take away entirely the constitutional authority of the Congress, allowing the President in every instance be the initiator.

I yield to the Senator from Louisiana.

Mr. JOHNSTON. Mr. President, I thank the distinguished Senator from Florida for yielding.

Mr. President, there is a saying, act in haste, repent in leisure. I feel that the rush to judgment on this bill is going to result in a long season of repentance on the part of Members of Congress if it passes.

Indeed, it will pass the Senate. That much is clear. Indeed, the House may well be stampeded into accepting it also.

Debate on this measure has, as some would say, produced more heat than light. Clearly the Democrats have been accused of being obstructionists and having delaying tactics.

But, Mr. President, I would like to point out the many changes which have been made in this amendment since it was originally offered on this floor, I think only as a result of the fact that Democrats had been willing to stand on this floor and indeed suffer some of the slings and arrows not just of debate but indeed of the press countrywide, which made this appear as a fight between the forces of darkness and of light, of those who wanted to balance the budget and those who did not.

Those changes, Mr. President, are more than significant. Some of them are very far reaching. I will put into the RECORD at a later time a detail of those changes. Suffice it to say they are very far reaching.

Social Security has been exempted. I guess agriculture has been exempted. The powers of the President have been rapidly and tremendously circumscribed from the time it was first offered.

I say that, Mr. President, to point out that debate and delay on a measure this far reaching does indeed produce a better piece of legislation.

Mr. President, there is much in the Gramm amendment that is still, in my judgment, totally unacceptable and is going to require us to repent over a long period of time.

A huge transfer of prerogatives from the Congress to the President; problems with the rules, Mr. President, that I think are going to be mischievous in future years.

For example, the provision on page 16, that you may not have any measure, in case you were below the deficit target, which would tend to increase that target. That is going to make it very difficult indeed to ever have a supplemental. We need supplementals this year, as I mentioned last night, for fire fighting in the West, for the tremendous added emergency additional expenses which were added on that, all of which is in outlays; for the FEMA account, which has been depleted because of the storm down in Mississippi.

The problem, Mr. President, is that when you run up against a rule like that, this provision in the Gramm amendment provides that it may be waived only by joint resolution, only by a law of the land.

It is unlike the Budget Act where you can come in, by action of one House in the event of an emergency, and waive the provisions of that act. This may be waived only by joint resolution, by joint action of both Houses, signed by the President, and, if necessary, overriding a Presidential veto.

Mr. President, it seems to me that we are setting the scene here for a real national emergency if the trigger is pulled. I do not know how that emergency will be resolved. I fear that there is not machinery here which can smoothly get the country out of that emergency. I have seen Presidents be hardheaded. I have seen the Congress be either unable to act or be unduly hardheaded.

And considering the structures of this legislation, it seems to me that it is very bad legislation. Compare that, Mr. President, with the provision that Senator CHILES, Senator BYRD, and I have introduced. I believe we have a piece of legislation that is not only more workable but one that preserves the prerogatives of Congress to appropriate money subject, of course, to the power of the President to propose and, upon our failing to produce legislation which meets the targets, then, indeed, to invoke the Presidential plan.

We preserve what I believe is the constitutional right of either House to make its own rules, unlike the piece of legislation, the so-called Gramm amendment, which makes it possible to waive those rules or amend those rules by joint resolution.

Mr. President, the train, I guess, is ready to leave the station and the Senate will undoubtedly turn down this amendment, the pending Chiles-Byrd-Johnston amendment and, later today, will enact the Gramm amendment. I have no doubt that many of my colleagues who, indeed, share the same misgivings that I share about the Gramm amendment, will vote for it simply because they do not want to be tagged as being against a balanced budget. Mr. President, for my part, I think over a period of years, I have shown that I have supported the balanced budget and have shown that with a series of votes which would actually have done the job. But whatever anyone's record shows, Mr. President, this, in my view, is not the way to balance the budget. I think it can produce a whole raft of unintended results.

I think there may be problems lurking in this legislation beyond what we have identified. Because, indeed, we have been shooting at a moving target, trying to study and debate in a period of great haste, late at night, with cloture motions, without the opportunity to have any hearings on this matter.

I think, Mr. President, that it is a great mistake. I think that the Chiles-Byrd-Johnston amendment is a much better piece of legislation, a much more workable piece of legislation. I commend it not only to my colleagues but to the House.

Mr. BUMPERS. Mr. President, the debate we have had here for the past 6 days has helped all of us understand the potential impact and the special procedures in the Gramm-Rudman-Hollings proposal.

If we had voted on this proposal last Thursday, very few of us would have understood the issues it raises or been

ready to offer constructive amendments to it.

Now, we have before us a substitute proposal, which in many ways is stronger and less ambiguous than the Gramm-Rudman-Hollings proposal.

It is stronger because it requires that the Congress make deficit savings this fiscal year and next fiscal year, not starting in fiscal 1988. Under the Gramm-Rudman-Hollings, all the deficit cuts will come after next year's election; this would be very convenient for Members running for reelection but it does not demonstrate the urgency that the sponsors seem to profess about the deficits.

The proposal is less subject to mischief because the CBO Director, not the OMB Director, ensures that any automatic budget cuts are made across-the-board.

The Chiles-Byrd-Johnston proposal gives the President an incentive to cooperate with Congress in making budget cuts. Under Gramm-Rudman-Hollings, the President would have every incentive to frustrate Congress in making budget cuts because then he would have more power to make these cuts by himself.

The Chiles-Byrd-Johnston proposal would not deepen any recession into which we slide. Budget cuts would be temporarily suspended during any recession. Under Gramm-Rudman-Hollings the President can direct that all the cuts be made, even if this would deepen the recession.

Finally, Chiles-Byrd-Johnston would protect programs for the poor from automatic budget cuts and would ensure that Defense spending is subject to the same across-the-board cuts as other domestic spending programs.

This is a responsible proposal that builds on the basic concepts in the Gramm-Rudman-Hollings proposal but avoids many of its pitfalls. If we had not fully debated this issue, we never would have had the opportunity to consider such a constructive alternative.

Mr. GRAMM. Mr. President, I wish to speak very briefly on the Chiles amendment. I wish to do it by way of contrast.

Back in July, a number of our colleagues and I started working together on a proposal to deal with the runaway deficit. In fact, I had started work on this proposal in earnest back in 1982, when it became clear to me that the Reagan program was going to deliver on every promise that it made except balance the budget. We put 8 million people to work, we stopped inflation, we rebuilt defense, we cut taxes, we saved Social Security. We promised all those things; we did them all. But we did not balance the budget.

I took that old work and in working with our colleague, FRITZ HOLLINGS and our colleague, WARREN RUDMAN, started putting together this proposal that is before us as the Gramm-Rudman-Hollings amendment. Our idea was to come up with a program that was workable and that was fair.

We recognized early on that Social Security was a freestanding trust fund and had to be taken out or else the first amendment was going to take it out; all of those who opposed it would use the Social Security red flag to try to destroy the political base for this proposal. But other than that, we tried to make the whole process a neutral process. We have worked with colleagues on both sides of the aisle. I heard charges earlier today that we came out with a proposal that basically said take it or leave it. The facts are exactly the opposite. We have worked long and consistently with our colleagues to try to improve the idea.

We never claimed that we had any monopoly on wisdom or truth. What we have tried to do is develop a vehicle to deal with the crisis. What we have before us in the way of an amendment, the Chiles amendment, is not a vehicle to deal with the crisis. It is not a concrete proposal to deal with the Nation's problems. It is a political proposal that is aimed at derailing an effort that was meant to try to deal with the problem.

If you want to find a reason to vote against the Gramm-Rudman-Hollings proposal, you can find one. But the point is that we have worked now with over 60 Members of the Senate in refining and adjusting and perfecting a vehicle that I believe is a good vehicle. It is not a perfect vehicle. But an advantage of doing this in law rather than by amending the Constitution is that we can learn from experience. We can adjust.

People have talked about this railroad. Let me make it clear, this is not a marriage of love that we are talking about here between this amendment and the U.S. Congress. Most Members of Congress, conservative and liberal, Democrat and Republican, would rather not deal with this problem. Oh, they want to get credit back home, but they do not really want to deal with it. And there are a lot of people at the White House who do not want to deal with it, either.

And it is not a marriage of convenience. There is nothing convenient about forcing the Government to live on a budget. There is nothing convenient about having the President probably vetoing appropriations bills this year. There is nothing convenient about bringing the budget down to $134 billion next year and there is nothing convenient about the decisions we are going to have to make when we have only the option of simply saddling our children and grandchildren with debt.

It is not a marriage of love, it is not a marriage of convenience; it is a marriage of necessity. We are raising the debt ceiling in this bill to over $2 trillion. That is about as clear a way of defining failure as I can imagine. Yet, despite the fact that the budget process has clearly failed, there are still those who say not now; do not make us deal with it now; this is not the time. There are those who say not this vehicle; this is not the way.

Well, let me say to my colleagues, I ask them to look at the proposal that I have put forward with the Senator from South Carolina and the Senator from New Hampshire and ask themselves, "Is this an effort that is clearly intended to be workable and practical?" Ask themselves if there is any alternative that is available to this Congress that would have any better chance of working. I submit the answer is there is not.

I ask my colleagues, therefore, not only to vote for the Gramm-Rudman-Hollings amendment, not only to vote down the Chiles amendment, but, as we have efforts later today in individual amendments to exempt one sacred cow or another, help us preserve a balance. It is a balance that says that if we do not do our job, then we are going to have an across-the-board cut in defense and the President is not going to like it and he is going to do everything he can to avoid it. If we do not do our job, the social programs will be cut across the board and there will be many Members of Congress who will not like it. But it will force them to do their job.

The truth is this proposal, the Gramm-Rudman-Hollings amendment, is truth in budgeting and it is a binding process. It does not dictate that my view, which is that we need to control spending, will prevail. It does not dictate that the view of others who support this who want to raise taxes will prevail. But it does require that a solution occur.

It is that solution, Mr. President, that the Nation cries out for. Why is there such support for this proposal? It is because, for the first time in a long time, we have brought America's agenda to the floor of the Senate. The President has been trying to talk about tax reform. Members of this body have been trying to talk about protectionism. The American people are concerned about the deficit. So where our base of support came from here is not a series of special interest groups that are churning up support. Our support is coming from the people who do the work and pay the taxes and pull the wagon and make America work.

VOTE ON AMENDMENT NO. 743

The PRESIDING OFFICER. The time of 12:30 has arrived. The question is on agreeing to the amendment of the Senator from Florida. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 40, nays 59, as follows:

[Rollcall Vote No. 211 Leg.]

YEAS—40

Baucus	Glenn	Mitchell
Bentsen	Gore	Nunn
Biden	Harkin	Pell
Bingaman	Hart	Proxmire
Bumpers	Inouye	Pryor
Burdick	Johnston	Riegle
Byrd	Kennedy	Rockefeller
Chiles	Kerry	Sarbanes
Cranston	Lautenberg	Sasser
DeConcini	Leahy	Simon
Dixon	Levin	Stennis
Eagleton	Matsunaga	Zorinsky
Exon	Melcher	
Ford	Metzenbaum	

NAYS—59

Abdnor	Gorton	Moynihan
Andrews	Gramm	Murkowski
Armstrong	Grassley	Nickles
Boren	Hatch	Packwood
Boschwitz	Hatfield	Pressler
Bradley	Hawkins	Quayle
Chafee	Hecht	Roth
Cochran	Heflin	Rudman
Cohen	Heinz	Simpson
D'Amato	Helms	Specter
Danforth	Hollings	Stafford
Denton	Humphrey	Stevens
Dodd	Kassebaum	Symms
Dole	Kasten	Thurmond
Domenici	Laxalt	Trible
Durenberger	Long	Wallop
East	Lugar	Warner
Evans	Mattingly	Weicker
Garn	McClure	Wilson
Goldwater	McConnell	

NOT VOTING—1

Mathias

So the amendment (No. 743) was rejected.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GOLDWATER. Mr. President, will the Senator yield for a brief moment?

Mr. PACKWOOD. I am happy to yield.

MILITARY PROMOTIONS ON HOLD

Mr. GOLDWATER. Mr. President, at the other briefing I called attention to the fact that there are over 5,000 promotions in the military being held up by the minority leader because of an argument with the White House on interim appointments, and I agree with him. But, Mr. President, I looked in yesterday's RECORD and there are almost 1,000 more.

These are not interim appointments. These are men who have devoted their lives to the defense of our country, and I think it is time the minority leader allowed these people to be promoted.

INCREASE OF PERMANENT PUBLIC DEBT LIMIT

Mr. MELCHER. Mr. President, am I correct that my amendment would be called for next under the unanimous-consent agreement?

The PRESIDING OFFICER. The Senator is correct.

Mr. MELCHER. I thank the Chair.

AMENDMENT NO. 748

Mr. MELCHER. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Montana [Mr. MELCHER] proposes amendment numbered 748.

Mr. MELCHER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the Resolution add the following new section:

SEC. 1. IMPOSITION OF CORPORATE MINIMUM TAX.

(a) IN GENERAL.—Section 56 of the Internal Revenue Code of 1954 (relating to corporate minimum tax) is amended to read as follows:

"SEC. 56. ALTERNATIVE MINIMUM TAX ON CORPORATIONS.

"(a) TAX IMPOSED.—

"(1) IN GENERAL.—A tax is hereby imposed (in addition to any other tax imposed by this subtitle) on each corporation in an amount equal to the excess (if any) of—

"(A) 20 percent of so much of the corporate alternative minimum taxable income of the taxpayer for the taxable year as exceeds $100,000, over

"(B) the regular tax for the taxable year.

"(b) CORPORATE ALTERNATIVE MINIMUM TAXABLE INCOME.—For purposes of this title, the term 'corporate alternative minimum taxable income' means the taxable income (determined without regard to the deduction allowed by section 172) of the taxpayer for the taxable year—

"(1) reduced by the corporate alternative minimum tax net operating loss deduction provided by subsection (d), and

"(2) increased by an amount equal to the corporate alternative minimum tax preference items.

"(c) CORPORATE ALTERNATIVE MINIMUM TAX PREFERENCE ITEMS.—For purposes of this section, the corporate alternative minimum tax preferences items are those items applying to corporations under Section 57(a).

The flush language at the end of Section 57(a), stating what preferences do not apply to corporations, is amended by striking the reference to paragraphs 3, 6, and 12(A); and by adding a reference to paragraph 8. Further, paragraph (9) of section 57(a) (relating to capital gains as items of tax preference) is amended by adding at the end thereof the following new subparagraph:

"(E) SPECIAL RULE FOR CERTAIN INSOLVENT TAXPAYERS.—

"(i) IN GENERAL.—The amount of the tax preference under subparagraph (A) shall be reduced (but not below zero) by the excess (if any) of—

"(I) the applicable percentage of gain from any insolvency transaction, over

"(II) the applicable percentage of any loss from any insolvency transaction which offsets such gain.

"(ii) REDUCTION LIMITED TO AMOUNT OF INSOLVENCY.—The amount of the reduction determined under clause (i) shall not exceed the amount by which the taxpayer is insolvent immediately before the transaction (reduced by any portion of such amount previously taken into account under this clause).

"(iii) INSOLVENCY TRANSACTION.—For purposes of this subparagraph, the term 'insolvency transaction' means—

"(I) the transfer by a taxpayer of real property used by the taxpayer in the active conduct of a trade or business of the taxpayer to a creditor in cancellation of indebtedness, or

"(II) the sale or exchange by the taxpayer of property described in subclause (I) under the threat of foreclosure,

but only if the taxpayer is insolvent immediately before such transaction.

"(iv) INSOLVENT.—For purposes of this subparagraph, the term 'insolvent' means the excess of liabilities over the fair market value of assets.

"(v) APPLICABLE PERCENTAGE—For purposes of this subparagraph, the term 'applicable percentage' means that percentage of net capital gain with respect to which a deduction is allowed under section 1202(a).".

"(b) EFFECTIVE DATE.—The amendment made by this section shall apply to transfers or sales or exchanges made after December 31, 1981, in taxable years ending after such date.

"(d) CORPORATE ALTERNATIVE MINIMUM TAX NET OPERATING LOSS DEDUCTION.—For purposes of this section—

"(1) IN GENERAL.—The term 'corporate alternative minimum tax net operating loss deduction' means the net operating loss deduction under section 172 for the taxable year for purposes of the regular tax, except that in determining the amount of such deduction—

"(A) in the case of taxable years beginning after December 31, 1985, section 172(b)(2) shall be applied by substituting 'corporate alternative minimum taxable income' for 'taxable income' each place it appears, and

"(B) the net operating loss (within the meaning of section 172(c)) for any loss year shall be adjusted as provided in paragraph (2).

"(2) ADJUSTMENTS TO NET OPERATING LOSS COMPUTATION.—

"(A) POST-1985 LOSS YEARS.—In the case of a loss year beginning after December 31, 1985, the net operating loss for such year under section 172(c) shall be reduced by the amount of corporate alternative minimum tax preference items arising in such year.

"(B) PRE-1986 YEARS.—In the case of loss years beginning before January 1, 1986, the amount of the net operating loss which may be carried over to taxable years beginning after December 31, 1985, for purposes of paragraph (1) shall be equal to the amount which may be carried from the loss year to the first taxable year of the taxpayer beginning after December 31, 1985.

"(e) SPECIAL RULES RELATING TO CREDITS.—For purposes of this section—

"(1) CREDITS NOT ALLOWABLE.—For purposes of determining any credit allowable under subpart A, B, or D of part IV of this

subchapter (other than the foreign tax credit allowed under section 27(a))—

"(A) the tax imposed by this section shall not be treated as a tax imposed by this chapter, and

"(B) the amount of the foreign tax credit allowed under section 27(a) shall be determined without regard to this section.

"(2) FOREIGN TAX CREDIT ALLOWED AGAINST ALTERNATIVE MINIMUM TAX.—

"(A) DETERMINATION OF FOREIGN TAX CREDIT.—The total amount of the foreign tax credit which can be taken against the tax imposed by subsection (a) the amount determined under subpart A of part III of subchapter N (section 901 and following).

"(B) INCREASE IN AMOUNT OF FOREIGN TAXES TAKEN INTO ACCOUNT.—For purposes of the determination provided by subparagraph (A), the amount of the taxes paid or accrued to foreign countries or possessions of the United States during the taxable year shall be increased by an amount equal to the lesser of—

"(i) the foreign tax credit allowable under section 27(a) in computing the regular tax for the taxable year, or

"(ii) the tax imposed by subsection (a).

"(C) SECTION 904(a) LIMITATION.—For purposes of the determination provided by subparagraph (A), the limitation of section 904(a) shall be an amount equal to the same proportion of the sum of the tax imposed by subsection (a) against which such credit is taken and the regular tax as—

"(i) the taxpayer's corporate alternative minimum taxable income from sources without the United States (but not in excess of the taxpayer's entire corporate alternative minimum taxable income), bears to

"(ii) the taxpayer's entire corporate alternative minimum taxable income.

For such purposes, the amount of the limitation of section 904(a) shall not exceed the tax imposed by subsection (a).

"(D) DEFINITION OF CORPORATE ALTERNATIVE MINIMUM TAXABLE INCOME FROM SOURCES WITHOUT THE UNITED STATES.—For purposes of subparagraph (C), the term 'corporate alternative minimum taxable income from sources without the United States' means taxable income from sources without the United States, adjusted as provided in paragraphs (1) and (2) of subsection (b) (taking into account in such adjustment only items described in such paragraphs which are properly attributable to items of gross income from sources without the United States).

"(E) SPECIAL RULE FOR APPLYING SECTION 904(c).—In determining the amount of foreign taxes paid or accrued during the taxable year which may be deemed to be paid or accrued in a preceding or succeeding taxable year under section 904(c)—

"(i) the limitation of section 904(a) shall be deemed to be the amount of foreign tax credit allowable under section 27(a) in computing the regular tax for the taxable year increased by the amount of the limitation determined under subparagraph (C), and

"(ii) any increase under subparagraph (B) shall be taken into account.

"(3) CARRYOVER AND CARRYBACK OF CERTAIN CREDIT.—In the case of any taxable year for which a tax is imposed by this section, for purposes of determining the amount of any carryover or carryback to any other taxable year of any credit allowable under section 30 or 38, the amount of the limitation under section 30(g) or 38(c) (as the case may be) shall be deemed to be—

"(A) the amount of such credit allowable for such taxable year (determined without regard to this paragraph), reduced (but not below zero) by

"(B) the amount of the tax imposed by this section for the taxable year, reduced by—

"(i) the amount of the credit allowable under section 27(a), and

"(ii) in the case of the limitation under section 38(c), the amount of such tax taken into account under this subparagraph with respect to limitations under section 30(g).

"(f) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) REGULAR TAX.—The term 'regular tax' means the taxes imposed by this chapter for the taxable year (computed without regard to this section and without regard to the taxes imposed by sections 47(a), 531, and 541).

"(2) TAXABLE YEAR IN WHICH ITEM ARISES.—In the case of any amount which is taken into account for regular tax purposes in more than 1 taxable year, such amount shall be treated as an item arising in the first such taxable year.".

(b) ESTIMATED TAX.—Sections 6154(c)(1) (defining estimated tax) and 6655(f)(1) (defining tax) are each amended by inserting ", 56," after "section 11".

(c) CONFORMING AMENDMENTS.

(1) Section 26 (relating to definition of tax liability) is amended—

(A) by striking out subparagraph (A) of section (b)(2) and by redesignating subparagraphs (B) through (H) of subsection (b)(2) as subparagraphs (A) through (G), respectively, and

(B) in subsection (c)—

(i) by striking "(1)" before "For" and by adding at the end thereof the following new paragraph:

"(2) For treatment of tax imposed by section 56 as tax not imposed by this chapter, see section 56(c).", and

(ii) by striking out the heading and inserting in lieu thereof:

"(c) SPECIAL RULES FOR MINIMUM TAXES.—".

(2) Section 57 (relating to items of tax preference) is amended—

(A) by striking out the last sentence of subsection (a),

(B) by striking out subsection (b), and

(C) by striking out subsection (e).

(3) Section 58 (relating to rules for application of past) is amended—

(A) by striking out "$10,000" in subsection (b) and inserting in lieu thereof "$100,000",

(B) by striking out "respective regular tax deductions (within the meaning of section 56(c))" and inserting in lieu thereof "respective corporate alternative minimum taxable incomes (within the meaning of section 56(b))",

(C) by striking out subsection (d),

(1) by striking out paragraph (1) of subsection (f) and

(2) by striking out "the item of tax preference set forth in section 57(a)(9) and" in paragaph (2) of subsection (f).

(4) Section 882(a) (relating to tax on foreign corporations connected with United States business) is amended by striking "section 11 or 1201(a)" in paragraph (1) and inserting in lieu thereof "section 11, 56, or 1201(a)".

(5) The table of sections for part VI of subchapter A of chapter 1 is amended by striking out the item relating to section 56 and inserting in lieu thereof the following new items:

"Sec. 56. Additional minimum tax on corporations.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1985.

Mr. MELCHER. Mr. President, this is a 20-percent corporate minimum tax. Very briefly, the amendment creates an alternative 20 percent corporate minimum tax on an expanded income base, over $100,000, that includes these preferences:

First, accelerated depreciation; the same as for individual taxpayers.

Second, capital gains would be in the base with the Grassley language to help insolvent taxpayers.

Third, various other items that are in the minimum for individuals would apply to corporations.

Fourth, just as for individuals, the investment tax credits would not be allowed against a corporate minimum tax.

The revenue gained from the amendment is $3 billion to $5 billion per year.

Mr. President, there are several basic industries already in serious recession. For that reason, the amendment does not add their preferences to the minimum tax. These preferences are not included in the amendment and would leave the following industries under present law: agriculture, energy, mining and minerals, and forest products.

Mr. President, we have had several days of discussion on what we are going to do about curbing the deficit. All the discussion we have had is in the future as to what we are going to do about curbing the deficit.

While I commend the debate that we have had and commend the opportunity to address these problems in the nature of an amendment to the debt ceiling bill and will support it, Mr. President, there is nothing done immediately. This is all prospective. This all says that sometime within the coming year we are going to do something to start alleviating these huge Federal deficits.

I am offering this amendment, Mr. President, because the subject matter has been around for several years. Surely, during the last 2 years, the American taxpayers, when told that profitable corporations, highly profitable corporations are not paying any Federal income tax, have said, "Why do we have to pay? What is the matter? What has gone haywire?"

The minimum corporate tax, in various forms, has been considered as a prospective mechanism, but it has never been adopted.

So this amendment puts it into effect immediately, this coming taxable year. It says we are going to reduce the deficit by $3 billion to $5 billion in this particular fiscal year—this one right now that we are already in—and then in the succeeding fiscal years. It closes some gaping loopholes that were placed in the Tax Code with

the idea that we want to have business incentives and, by a combination of business incentives, people are alarmed that highly profitable corporations are allowed to escape paying anything in Federal income taxes.

Well, it is time to correct that. I think the case has been well made. The American people have decided, "Yes, indeed, we want it changed. We want it changed immediately." But nothing has been done about it.

Earlier, the Senate adopted another prospective instruction to the Finance Committee that they come up with a proposal that would have the effect of applying a minimum tax to profitable corporations. That, Mr. President, is good thinking, but does nothing for now.

And so, what I am proposing will do something now and will start the job of doing what we—in other words, put our mouth where our money is. We have been talking about doing something, now is the time to start.

Mr. President, despite the obvious advantages of $3 billion to $5 billion in revenue gains, I have to again emphasize that my amendment allows the continuation of present law for these basic industries that are already in such desperate straits economically and already suffering a serious recession.

Mr. President, I reserve the balance of my time.

Mr. DOLE. Mr. President, we do not have any requests for time. We are prepared to yield back our time.

Mr. MELCHER. Mr. President, might I tell the distinguished majority leader that because of the time constraints we have, our side is in a conference right now. And, as conferences go, they will drag out for awhile, I am sure. There is no way, it seems, to have a short conference, like, say, 5 or 10 minutes.

But I will accommodate the distinguished majority leader by giving more discussion that I would have later on. I am just allowing myself the opportunity to listen to somebody else.

Mr. DOLE. Mr. President, I understand the distinguished chairman of the Finance Committee will oppose the amendment. He is now conferring with the chairman of the House Ways and Means Committee. We adopted a minimum tax amendment just yesterday. So I will let the distinguished chairman make the argument.

I would say, while I have the floor, we are grateful that we are moving ahead on this bill. I have had the indication from the House side that if we can send the temporary debt extension over by 3 or 3:30 they could act on it fairly quickly this afternoon. That would avoid the necessity of any Federal Financing Bank funding, and that bank was never intended to fund the debt ceiling extension.

I hope that if, the distinguished Senator from Montana does not use all of his time that he would yield it back and we could vote and move on to the Kerry-Dodd amendment, and following that we could even move up the time for a vote on the so-called Gramm-Rudman-Hollings amendment, as modified, at the desk. So if we can pick up 20, 30 minutes, or 40 minutes, it would be very helpful to our colleagues in the House.

Should I suggest the absence of a quorum?

Mr. MELCHER. No, Mr. President.

Mr. President, the distinguished majority leader mentioned the amendment was adopted regarding the minimum tax. That is a fine amendment and I voted for it, as did almost everybody in the Chamber, almost universal.

The fault of that amendment is simply that it is an instruction to the Finance Committee to work on a minimum tax for corporations. That instruction is certainly fine, but it does nothing about enacting into law the necessary requirement that the loopholes be changed enough so that highly profitable corporations will start having to pay a tax to the Federal Government on those profits.

Now there were about 40 very large corporations during 1984 that paid nothing in Federal income taxes, or actually got a rebate.

These are corporations that everybody recognizes: AT&T, Hutton, Morgan, General Dynamics, Harris Corp., Boeing, Westinghouse, Pacific Lighting Corp., Great Northern, Nekoosa, Pacific Gas & Electric Co., ITT, Allied Corp., Coors. I will not go on listing or telling you any more. But the information is available and can be examined. But the point is that while we are talking about all this we are losing revenue that the Treasury desperately needs.

Last May for instance, the second day of May, we voted on the first budget resolution. What we said there was this: the proponents explained that a minimum tax on corporate profits should be enacted. It calls on the Finance Committee to ensure that everyone pay some tax regardless of their source of income, after allowable deductions and preferences. Despite those, everybody should pay a minimum tax. The amendment is revenue neutral because any money raised will be used to either lower individual tax rates or exempt from taxation those at the lower end of the income scale.

That was in May. Here we are in October. Nothing has happened yet. So we adopt another instruction that says we ought to do something next year. It is all too true that the deficits of $200 billion per year in public debt that we are seeking to allow to increase to well over $2 trillion must say to us what are the steps we are taking to correct it? This is one of the steps. That is the reason that I bring this amendment up at this time.

The question is since ordinary taxpayers feel that they are being taxed significantly, why do these loopholes exist? Why do these corporations that are very highly profitable not pay income tax? Well, I believe when Congress enacted the 1981 Tax Act most Members of Congress were unaware that because of the legislation some of our most profitable corporations were going to be able to reduce their Federal income tax bills to zero. But this is the partial effect of the 1981 Tax Act. The amendment addresses corrections to those past mistakes. In all fairness to all taxpayers, all of us that are reviewing what we pay ourselves and what our constituents pay, they say to us correct it, stop it. It is not equitable. It is unjust. Beyond that, it is crazy because we need the money in the Treasury.

There is no corporation, or no company, or no individual citizen of these United States, that under our Tax Code is expected to pay more than the law requires. We do not expect that. So for these corporations who are using the tax laws to their advantage to escape paying Federal income taxes, we have allowed it. For instance, Mr. Grace, chief executive officer, chairman of W.R. Grace, when asked the question on one of the television early morning news shows why the Grace Commission found so many ways of helping to close the gap in the deficit, why did not he address those problems? He said that was a little bit beyond the scope of what they were asked to do. They were asked to look at Government functions to find out where savings were. The inquiry was made by the television reporter, does your company pay any taxes or very little Federal income taxes? The answer to that was a very candid, yes. That is true. Grace and company pays very little in Federal income taxes because there are certain advantages in the tax law that they use. Therefore, their tax obligations on profits is not exceedingly high regarding Federal income taxes.

The television reporter further inquired, well, do you think that is right? The very candid answer of Peter Grace was, no, it does not make much good common sense. It does not make much business sense for the Government. But after all, it is a law. And I have to satisfy my board, the stockholders, and if we start giving more money to the Government than is required under the law, they are going to have serious complaint about our judgment. So the situation exists.

I say, Mr. President, that it is time to change that situation. For that reason, the amendment is before us. I hope the amendment will be adopted.

51-059 O-86-42 (Pt. 19)

There will be sent along with this package of increasing the Federal debt some minimal effort to reduce the deficit. This is the only minimal effort that will take effect to reduce the deficit that will be in this package. That is why I believe it is so necessary to address the problem now, to address the amendment now, and to vote for it. There will be an up-or-down vote on the amendment. I hope the Senate will agree to it with a good majority.

Mr. President, I reserve the balance of my time.

The PRESIDING OFFICER. Who yields time?

If neither side yields time, time will run equally against both sides.

Mr. GRAMM. Mr. President, the majority side wants to protect its time. I understand the clock is running against both sides. So I would like to suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, the quorum call has gone on for some time and has been charged against the opponents who may want to speak in opposition. I also lost some of my own time during the quorum call.

But I want to use these last 8½ or 9 minutes to say, Mr. President, that we have held this thing hostage, correcting this lack of gaining income tax from taxpayers who obviously should be paying it, highly profitable corporations. We have held this thing hostage during the past 2 years while somebody has palavered in one little group, in this committee, in the White House, has argued, "Do not do anything about that; yes, it needs correcting. It should be corrected. Do not do anything about that. Wait until we have our big revenue package, our revising of the income tax laws, and the code, after we have had some equitable consideration to become revenue neutral but improve the efficiency of collecting taxes."

There are two things wrong with that argument. First of all, we need the money now. We need it right away. These are taxpayers who, because we have created huge loopholes for them, these corporations make huge profits and pay no taxes.

You can ask any one of them if they do not agree with Will Rogers, that this is a very fine country but it does cost something to live in it.

Their answer will be, "By all means, we do agree with that and we know that the present loopholes which are there for us not to pay any income taxes is nonsense. But that is allowed."

That is why they do not pay taxes. Peter Grace said, "Yes, indeed, it does not make any sense for us not to pay taxes, but I have a board of directors and I have stockholders and if I just volunteer to take some of the profit and send it to the Treasury they would think I was nuts."

That is a pretty candid answer. He went on to say, "And they probably wouldn't want me in the job, and I like the job I have."

I want to end this situation where we hold hostage doing the right thing, doing the equitable thing, doing the very vital thing that is necessary to help get some money in the Treasury to help reduce the deficit and be fair to the rest of the taxpayers of this country and make common sense out of the tax laws of the United States. I want to do it and do it now. I hope there are other Senators who also feel that way so we have a good vote and a clear majority carries. I do not happen to believe that we are going to get a tax bill out of the House Ways and Means Committee very soon. If it did come trotting out of there, from what I have heard, most people want to vote against it. When it gets over here and goes to the Finance Committee, the hassle starts anew. And then when it gets to the Senate floor, who is going to be happy with it? By that time the basic industries of the United States will be in such doldrums that our emphasis will have to be on revenue. This is justified revenue, this is needed revenue, and, by golly, it is time we got it.

So I hope no one will fall for the argument of delay; the House Ways and Means Committee and the Finance Committee can do it better.

I will not argue that, but let us certainly not fall for the argument they are going to do it, because we do not know when that will happen. And given the fact that the House Ways and Means Committee cannot even get their bill out, it has more enemies than friends at this time from what they have done so far, and given the fact that the Finance Committee is going to have to take up that bill and try to do something with it—and they are going to have difficulty—and given that the Senate is going to have some trouble with it, that puts us well into next year. Then it will go into conference and the good Lord knows when it will ever come out. If there is so much wrong with this that the Finance Committee can correct it, great. I would be delighted if it happened.

The simple truth is, Mr. President, that we need the revenue and we need it now. We, above all, need to show a positive step with the package that we are passing today, so that there will be some action and there will be some hope that the deficits are going to start coming down. It does precious little good to start talking about what a brilliant concept everybody has in this addition to the new budget process via the Gramm-Rudman-Hollings proposal, when we do adopt it, if we do not know when it will start reducing the deficit.

We have goals in it that we say will reduce the deficit, but we are not proving to the American public, the American taxpayers in particular, that we are doing something about correcting the deficit by being equitable, using common sense, by closing the very loopholes that have created this disastrous situation where corporations using all those advantages end up being highly profitable but not contributing to the Federal Treasury by paying income taxes.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Six minutes, forty seconds.

Mr. MELCHER. Mr. President, I will now yield. I know all time has expired——

Mr. PACKWOOD. Mr. President, I was going to ask, is the Senator going to ask for the yeas and nays?

Mr. MELCHER. Yes. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PACKWOOD. As the Senator from Montana knows, I am going to oppose this amendment.

Mr. MELCHER. Mr. President, I yield 1 or 2 minutes, whatever the distinguished chairman needs.

Mr. PACKWOOD. One of the difficulties in trying to write legislation on the floor of the Senate and just literally present it, and do it in relative haste, is the fact that you can make inadvertent errors, and that is what they are. I think this has to be an inadvertent error. This amendment has two effective dates. One is December 31, 1981:

> The amendments made by this section shall apply to transfers or sales or exchanges made after December 31, 1981.

And the other is:

> The amendments made by this section shall apply to taxable years beginning after December 31, 1985.

If the court were to interpret it, I am not sure which version they would take. They are in the same bill and passed at the same time. I do not know if there are other inadvertent errors like that, but it is a good reason why this should be defeated, because I do not know what else may be in there unintentionally. But clearly you have two effective dates 4 years apart.

Mr. MELCHER. Mr. President, I thank the distinguished chairman for his comments, but what he has pointed out—and I would like to have his attention—is the first date applies to the Grassley amendment, which the Finance Committee has indicated they

are going to accept. The second date applies to the enactment of the basic provisions in the act. The Grassley proposal dealing with taxpayers that are in deep trouble and going into insolvency, that application of capital gains is a very limited one. That is the only thing the date applies to. The second one is the correct date. So I hope the distinguished chairman will recognize that.

Mr. PACKWOOD. I might say to my good friend, I know that is the intention of the Senator, but that is not the way it is drafted. And there is a genuine drafting error, surely no malevolent intent. I know what my good friend from Montana intends. That is not the way it is drafted, and I do not know what a court will do when it gets this with two effective dates, both applicable 4 years apart.

Mr. MELCHER. Mr. President, the situation is as I described, nevertheless. The first applies to the so-called Grassley provisions and has limited application. The second one applies, as the distinguished chairman has indicated, and it does not in any way create a sort of bogeyman to say here is a big flaw.

Mr. President, I well recall when there were 40 pounds of technical amendments dragged over to the desk in the 1984 tax bill, and those were technical amendments to straighten out what the Finance Committee and the Ways and Means Committee had drafted.

So, Mr. President, let me assure the Senate that the date reference the distinguished chairman made is not one that would impinge upon the collection of the taxes on a minimum basis from the profitable corporations, which, after all, is what we are after.

Mr. President, might I inquire if I have any time remaining?

The PRESIDING OFFICER. Two minutes, fifty seconds.

Mr. MELCHER. Mr. President, I will only conclude then by saying the day of reckoning is here. It is obvious that some minimum corporate taxes should be paid by profitable corporations. I will repeat that the changes I am makng in the amendment apply to accelerated depreciation, the same as for individual taxpayers, and the capital gains would be in the base with the Grassley amendment to help insolvent taxpayers. The same minimum for individuals would apply to corporations. That is fair. Nothing could be fairer about this approach. And just as for individuals, the investment tax credits would not be allowed against the corporate minimum tax.

Now, Mr. President, in closing, the revenue gained from the amendment is $3 to $5 billion per year, that the amendment places these provisions into law now, effective January 1. It is high time we do it.

Mr. President, I also want to make it clear, and I will defend this very emphatically, that the basic industries already in serious recession are not affected by this. The preferences they have are not included in the amendment and would leave the following under the present law: agriculture, energy, mining and minerals, and forest products.

Mr. President, the reason they are not included in here, that their preferences are allowed is, simply put, they are already going broke. They are already in recession. Whatever the present tax law is, we leave them alone, but we go after the highly profitable corporations and require them, make it the law that they contribute through corporate taxes to the Treasury of the United States to help reduce this deficit. Those who want to reduce the deficit have been making quite a case on how necessary it is, and I am among that group. I ask all Senators to take this seriously, vote now to put it in place, vote to make something happen so we can have the advantage of showing in this entire package that we are reducing the deficit.

Mr. BENTSEN. Mr. President, is there any time remaining at all?

The PRESIDING OFFICER. Fifteen seconds.

Mr. BENTSEN. Then, I will state my support of the chairman of the committee in his opposition to the amendment. I think that if we are going to have credible and responsible legislation, something as highly technical as this should not be written on the floor of the Senate.

We heard witnesses this morning in the Finance Committee talking about line of business items, and talking about limited partnerships in very technical fields.

I strongly oppose the amendment, although I am one of the authors of such an amendment.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MELCHER. Mr. President, I ask unanimous consent that I may have 30 seconds.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, I only want to say that the best place to write this is in the two committees. I do not argue with that. But the fact is that it has not been written in the two committees, and it is not before us. Therefore, I argue that this is good, this is what they have been considering. Let us vote on it now and not delay another year. We have already waited 2 years. Another year would make it 3 years.

If we can ever get another tax bill out, let the two committees make improvements, but let us not wait any longer.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MELCHER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Montana [Mr. MELCHER]. The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] is necessarily absent.

I also announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

The PRESIDING OFFICER (Mr. EVANS). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 10, nays 88, as follows:

[Rollcall Vote No. 212 Leg.]

YEAS—10

Baucus	Johnston	Melcher
Boren	Kennedy	Pell
Burdick	Levin	
Exon	Matsunaga	

NAYS—88

Abdnor	Goldwater	Murkowski
Andrews	Gore	Nickles
Armstrong	Gorton	Nunn
Bentsen	Gramm	Packwood
Biden	Grassley	Pressler
Bingaman	Harkin	Proxmire
Boschwitz	Hart	Pryor
Bradley	Hatch	Quayle
Bumpers	Hatfield	Riegle
Byrd	Hawkins	Rockefeller
Chafee	Hecht	Roth
Chiles	Heflin	Rudman
Cochran	Heinz	Sarbanes
Cohen	Helms	Sasser
Cranston	Hollings	Simon
D'Amato	Humphrey	Simpson
Danforth	Inouye	Specter
DeConcini	Kassebaum	Stafford
Denton	Kasten	Stennis
Dixon	Kerry	Stevens
Dodd	Lautenberg	Symms
Dole	Leahy	Thurmond
Domenici	Long	Trible
Durenberger	Lugar	Wallop
Eagleton	Mattingly	Warner
East	McClure	Weicker
Evans	McConnell	Wilson
Ford	Metzenbaum	Zorinsky
Garn	Mitchell	
Glenn	Moynihan	

NOT VOTING—2

Laxalt	Mathias

So the amendment (No. 748) was rejected.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. PACKWOOD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DODD addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

AMENDMENT NO. 754 TO AMENDMENT NO. 730, AS MODIFIED

Mr. DODD. Mr. President, I send an amendment to the desk and ask for its immediate consideration. I offer this amendment on behalf of myself and Senators KERRY, GRAMM, LEVIN, HOLLINGS, BOREN, RUDMAN, and LEAHY.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Connecticut [Mr. DODD], for himself and Mr. KERRY, Mr. GRAMM, Mr. LEVIN, Mr. HOLLINGS, Mr. BOREN, Mr. LEAHY, and Mr. RUDMAN, proposes an amendment numbered 754.

Mr. DODD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the pending amendment, add the following new section: "During the time in which a sequester order is in effect, any cost of living adjustment for Social Security shall not count as income for purposes of determining Supplemental Security Income payments or payments from any other programs which are offset as a consequence of cost of living adjustments for Social Security."

Mr. DODD. Mr. President, this amendment which I am offering on behalf of a broad cross section of Senators is intended to protect, very simply, the cost-of-living adjustments for lower income recipients of Social Security. Under this amendment, Mr. President, the Social Security COLA would not count as income for purposes of determining SSI payments or payments from any other programs which are offset as a consequence of Social Security COLA's.

Mr. President, it was assumed that the Social Security COLA's would be protected under this legislation when it was offered. However, due to the interplay between Social Security and SSI Programs, the real effect of the Gramm-Rudman amendment in its present form would be to ensure very full COLA's for middle or upper income Social Security beneficiaries but to deny the benefits of the cost-of-living adjustment to our neediest citizens on Social Security.

This would come about, Mr. President, as a result of the fact that SSI assistance for recipients of Social Security is determined as the difference between the level of Social Security benefits and a Federal standard benefit level. Hence, if one were to receive the full Social Security COLA but lose the cost-of-living adjustment under the SSI Program, under the workings of the amendment as it presently reads every dollar lost under SSI would cut into any increase realized under the Social Security COLA.

So this amendment is designed to close that glitch, which I believe was not intended, so as to not cause great harm to the people who do collect SSI and disability payments for veterans. I think those are the two programs that would be affected.

Mr. RIEGLE. Will the Senator yield for a question?

Mr. DODD. I am happy to yield.

Mr. RIEGLE. As I understand, the SSI benefit comes as a supplement to the regular Social Security payment to those persons who receive it. As I understand the amendment, the COLA is protected for the basic Social Security part of it. But if I am not mistaken, I think the way it is drafted, the supplemental portion, which also normally receives the COLA adjustments so there is no erosion of the buying power of the money, that COLA on the supplemental part, in fact, would disappear. That would be the area where it has not been protected.

Mr. DODD. It could. It could be affected by budget decisions we make down the line. It does not protect that line.

Mr. RIEGLE. It seems to me that the case which the Senator has made, and with which I agree—these are the lowest income people, the people who are in the most severe circumstances—is to protect the basic Social Security COLA as well as the supplemental income COLA. Otherwise, we in fact are going to see them sliding backward in terms of their living standard.

Mr. DODD. As my good friend from Michigan knows, he and I do not have any substantive disagreements on that kind of debate. What I am really trying to do is to protect that SSI recipient against the double whammy, the double whack that they would get without this amendment. I am not protecting them against the single whack that they could get in the budgetary decisions that we will make if this amendment is adopted.

Mr. RIEGLE. I am with the Senator. We do not want them to get the double whammy, but I do not think we want them to get the single whammy either. It seems to me this ought to be modified, and I would join in it if it is modified to cover both parts, the Social Security part and the SSI part, because this is the one group that we do not want sliding backward. This is the group that is self-identified as needing the supplemental income. You do not want the inflation eating away the buying power of those dollars. If you only protect part of it and you do not protect the supplemental income, you really have not achieved what you are after. I think it is a drafting flaw, frankly, and it ought to be fixed.

Mr. DODD. We have a limited amount of time. I do not disagree with the substance of what my colleague is saying, but under the process we are trying to deal with here the question of whether or not we would actually impose the double whack I believe is unintended even by the authors of the amendment. It was not my intention, even though substantively I agree with my colleague from Michigan, to eliminate that person from the single whack they could be receiving. I understand what I am doing in that particular circumstance. I will more than likely join my colleague from Michigan at some later date when we get into the budgetary priorities and will be agreeing with him on that. But as far as the process goes here today dealing with this amendment, I am merely trying to close up, along with my colleague from Massachusetts and others who are cosponsors here, the glitch that created the double whack that an SSI recipient would be getting or a veteran's disability under the veterans' pension programs that would also be tied to the cost-of-living adjustment on Social Security and thus reducing overall that person's income.

Mr. GRAMM. Will the distinguished Senator from Connecticut yield?

Mr. DODD. I will be glad to yield.

Mr. GRAMM. I begin, Mr. President, by thanking my distinguished colleague from Connecticut and my distinguished colleague from Massachusetts for working with me to iron out this potential difficulty. The purpose of the bill is to assure that Social Security as a freestanding trust fund, self-contained, is off budget and out of the process. However, because the payment for SSI is a supplement to Social Security, while we bring the SSI COLA within the sequester process because of a reciprocity relationship, we have the potential that SSI being frozen would assure that people would not get the Social Security COLA.

Because of the diligent analysis and effort of our two colleagues, we are here with a joint amendment which I support and accept on behalf of the majority which will guarantee that the sequester will apply to all COLA's on budget across the board but will assure that people on Social Security get their full COLA and that that is not offset in any other program.

I thank my colleague from Massachusetts and my colleague from Connecticut for improving the process and making the language very clear to assure that we achieve exactly what we want in terms of people getting the COLA for Social Security, and that it is not offset against any other benefit.

I thank my colleague and, on behalf of the majority, we accept this amendment.

Mr. DODD. Mr. President, I appreciate the comments of the Senator from Texas.

In conclusion, because I want to make sure my colleague from Massachusetts is also given a chance to respond, I would have preferred, as my colleague from Texas knows, that we deal with the means-tested entitle-

ment programs across the board because those are the people at the very lowest level of our society. That would have been a rather large group, and I realize that once that opened up, an argument could be made that we ought to start opening it up on other fronts.

It is I think highly that, as we move with this into conference with the House, something along the lines of means-tested entitlement programs would probably end up being a part of this package for the very reasons that my colleague from Michigan has outlined.

But for the sake of this debate today, I think closing up this particular hole that would have been a double burden on these people at least takes care of part of that problem.

Mr. BINGAMAN. Will the Senator from Connecticut yield for a question?

Mr. DODD. I will be glad to yield.

Mr. BINGAMAN. I applaud the action of the Senator, but I want to make it clear in my own mind. The unanimous-consent agreement, or the description I have before me, talks about the Dodd-Kerry amendment to exempt means-tested programs from sequestering. That is not what is being done here. This is to avoid, as the Senator phrased it, the double whammy, but clearly the SSI and any other means-tested program would still be subject to sequestering even with this amendment in place?

Mr. DODD. My colleague from New Mexico is absolutely correct. This will not do what would be listed on that sheet of paper, and, quite frankly, it is conceivable we would have lost everything in trying to make this improvement, and so we moved in this way.

Mr. President, I ask unanimous consent that the distinguished Senator from Vermont [Mr. LEAHY] be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DODD. Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. RIEGLE. Mr. President, I would like to seek time from the Senator, but if the Senator from Massachusetts wishes, I will wait.

Mr. KERRY. Mr. President, how much is remaining, please?

The PRESIDING OFFICER. The Senator has 14 minutes remaining.

Mr. KERRY. Mr. President, I ask the Senator how much time he needs?

Mr. RIEGLE. I am wondering if the Senator will yield 2 minutes to the Senator from Michigan.

Mr. KERRY. Mr. President, I yield 2 minutes to the Senator.

Mr. RIEGLE. I thank my colleague.

The PRESIDING OFFICER. The Senator is recognized for 2 minutes.

Mr. RIEGLE. Mr. President, I think it is very important we understand what is happening, because important things are being lost in the rush, the corner cutting. Whether it is deliberate or accidental is to some extent beside the point. What is proposed is in the name of protecting the poorest of the poor who receive this income supplement—and they get the supplement only because of how dire their circumstances are—the way this whole procedure is drafted they are pushed under this particular budget-cutting knife. This amendment is basically cosmetic in the sense that it does not deal with the problem. It appears to deal with the problem in the sense of protecting the Social Security COLA, but these people get the supplemental income because their income is so meager that we have decided as a matter of national policy we need to provide the extra amount just so they can survive. The COLA catches them up a year later for the inflation increase that has taken place so they are not sliding further into poverty.

I just do not want the RECORD to show that in the name of us having a social conscience and being decent that we are coming in here and correcting I think a deliberate flaw in this package when in fact it is not being done. This amendment is deficient, and it ought to be fixed now. To do half the job is to not do the job. I feel very strongly about it. This is part of the problem when we are being ramrodded here with insufficient time, no hearings, or anything else.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. RIEGLE. It is no wonder people are going to get butchered by this thing.

I thank my colleagues for the time.

The PRESIDING OFFICER. Who yields time?

Mr. KERRY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KERRY. Mr. President, I do not disagree with the distinguished Senator from Michigan that this does not do the whole job. Doing the whole job is not always possible at one moment in time necessarily, but I have talked, as I know my distinguished colleague from Connecticut has, with the chairman of the Budget Committee and with others who will be part of this process. There is nothing in this bill as it is currently contructed which states that those people in need, and about whom we all share a concern, are going to lose their COLA. It does not provide an absolute protection, nor does it say in any way that they will be deprived of that COLA. What we have, however, is a potential problem in this legislation—and I suggest inadvertently—because there is an offsetting of the SSI benefit to the Social Security system. For each gain in the COLA in Social Security, there would have been an inadvertent reduction in what was given under SSI to those who are most needy.

What we are seeking to do here, within the limits of our ability at this point, is to be able to eliminate at least that problem. So, while these people may not gain as much as they might have, they still gain. There is still a protection. It may not be a protection that we would all deem adequate, but it is a protection. Needless to say, my hope is that further protection can be provided when and if this legislation reaches the other side of the Capitol.

Mr. RIEGLE. Mr. President, will the Senator yield for a question?

Mr. KERRY. I yield.

Mr. RIEGLE. I appreciate the Senator yielding.

I have no question about his motive, because I know that he wants to try to do what is right and necessary here.

The way the budget cutting knife comes down when that discipline kicks in, it has to eat into the COLA pot first. There is about $9 billion there. Once that has been exhausted, it flips on into the controllable area, and I am using numbers applicable to fiscal 1986. So it is virtually certain that that full COLA amount gets stripped away.

These people do not even come up to the poverty line with the supplemental security increment. They are below the poverty line even with that addition. Taking away that COLA puts them first in line for mandatory spending cuts. You are literally putting them first in line, the way this process works, in that their cost-of-living protection for the supplemental income part is stripped away before we get into any of the controllable accounts.

If we are going to have a war on deficits, do we want to take the people we have identified as the poorest of the poor and put them in the front of the line? I think some people do. I do not think the Senator from Massachusetts wants to, but this amendment is defective, and the time to fix it is now.

We can send a modification to the desk, if the intent is to protect these people. I do not aim the strength of my feeling at the Senator from Massachusetts. But let us do it; let us not just say we are doing it. That is part of the charade here. If we are willing to do it, let us do it.

I am not willing to sit around and hear people say we are concerned about the poor but we are not going to fix this problem and in fact make them poorer.

I thank the Senator for yielding.

Mr. KERRY. Mr. President, I yield to the Senator from Connecticut.

Mr. DODD. Mr. President, we are having two different debates, a process debate and a substance debate.

Even the Democratic alternative talked about the reduction in the

budget of $30 billion by December 10. I hope there is no illusion that if we had done that, we would reach many categories that are near and dear to many Members. That is not the point.

We are trying to set up a process that is going to hit and be felt by a number of constituencies which are important to us, including SSI recipients. I know that the Senator from Michigan knows that, the Senator from Massachusetts knows that, and I presume that the Senator from Texas knows that. We are trying to take care of a situation that was an unwarranted burden on those people; and we still have the opportunity, if we are able to reach those tragets, that we will not have to get into this. If we are not able to, then there is going to be a burden sharing. Anyone who suggests otherwise has not been in this Chamber the last 2½ days. There is that problem, and I recognize it as well as anyone else.

I read an article today entitled "Congress at Its Worst." That has been the last 5 years, starting, with all due respect, with the Gramm-Latta proposition in 1981 and then the tax cut of 1981. That is where the problem began. That is Congress at its worst, and not having the collective courage over the last 5 years to do anything about it. That is Congress at its worst.

What we are trying to do here is to put something in there that takes care of SSI recipients and protects them, both at 1600 Pennsylvania Avenue and Capitol Hill.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DODD. I yield.

Mr. LONG. I ask the Senator if he agrees with this: If the proposal works the way we hope it would work, the automatic cut provision would never go into effect, because the committees would look at the problem and look at the manner of economizing that was necessary, and even the possibility of raising taxes, if that should be a better answer. The Senate and the House of Representatives would exercise their judgment to frame a measure that would be far better than anybody could hope to do without knowing the problems at the particular moment.

When the time comes for action, the Appropriations Committee should look at its items and the Commerce Committee should look at its items, and the other committees as well, and then bring out a measure to reduce spending rather than have the across-the-board cuts take effect. Obviously, when you are shooting in the dark, you have to do the best you can with what you know at the moment.

If the automatic cut provision triggers next year, it will be much better to say what our approach should be at that time.

Mr. DODD. Mr. President, the Senator from Louisiana is always far more clear than I could be. I agree with him.

I will be the first one to join the Senator from Michigan when such effort is made in this area, but I believe that is a separate debate. That is not the debate before us today. That is all the Senator from Connecticut is trying to accomplish with this particular amendment.

Mr. RIEGLE. Mr. President, will the Senator yield for a question?

Mr. DODD. I yield.

Mr. RIEGLE. Mr. President, is the Senator aware that at the present time—and these are the accurate numbers; I have just checked them—there are 1,800,000 people who receive SSI and who get no regular Social Security benefit? In other words, their entire income is only in the second category. It is just the SSI.

So what you are providing in terms of the COLA protection on the regular Social Security aspect does not affect them. So you are stripping them. That group is being left bare. Those are the poorest of the poorest of the poor. Those are the people who are getting by on literally a minimal subsistence amount of money.

By the way, that is 50 percent of all the SSI recipients. Fifty percent of them do not receive a regular Social Security benefit. I do not expect that these facts are necessarily known, because we do not dive into this area very often.

I do not want anybody to be misled in terms of what this is actually going to do, because the amendment, I am afraid, has been crafted to leave these people out—not by the Senator from Connecticut, or not with any intent on his part, but I think that is what happened here. The way to fix it is to stop for 2 or 3 minutes now and do it. Why do we want to protect the people who are better off and get the SSI and leave naked to the knife the people who are less well off?

Mr. DODD. If you want to make an argument, you can argue Social Security, because there are a lot of people under Social Security who would be getting the COLA and who are driving Cadillacs. That is a legitimate debate. That was a decision made for obvious political reasons.

I think the Senator is talking about a budget debate, and I agree with him on that. But we are talking about a process debate that is going to put some discipline into a process that will force us to make some decisions. It does not automatically reach the conclusion the Senator from Michigan has suggested.

We may never have to get to that. If we do, the committees are here, and it will allow the committees and this body to make a determination as to whether or not those people should be affected in the way the Senator has described.

Mr. RIEGLE. So the Senator, I gather, is unwilling to make that modification. I ask if he would do so, and I would be happy to work with him to draft it. I think it is the thing to do.

Mr. DODD. I realize that; but I think that if we were to engage in such an effort, I have a question about it, and I think we would lose both processes.

Mr. President, how much time do I have?

The PRESIDING OFFICER. Twenty seconds.

Mr. DODD. I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. GRAMM. Mr. President, I yield back the remainder of my time.

Mr. DODD. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment (No. 754) was agreed to.

Mr. DODD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GRAMM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GRAMM. Mr. President, I wish to review a couple of matters because under the current agreed-to procedure we will proceed to a vote on the Gram-Rudman-Hollings amendment at 3 p.m. I shall review very briefly something that has been much discussed so there is no confusion and then I will yield to our distinguished colleague from Massachusetts, Senator KENNEDY, to speak on behalf of this amendment.

Mr. President, concerns have been raised in the last few days about technical factors within the bill and suggestions have been made by Senator LONG, Senator BENTSEN, Senator BYRD, and others, that improvement could be made and the problems could be dealt with.

I remind my colleagues that we have the bill at the desk that has been there since Friday. We all know what is in that bill, whether we like it or do not like it. There have been a series of amendments to that bill adopted. So we will be voting at 3 p.m. under the current order on a known commodity.

There will be amendments which I would consider technical amendments—others may not—that will be presented, discussed, debated to deal with concerns that Senator LONG and Senator BENTSEN have suggested, concerning the process for reconciliation in a post-sequester time period.

There will be a correcting amendment, though it has not been cleared with the distinguished minority

leader, that tries to deal with a problem of setting out procedures in the Senate and House of Representatives in statue that instead does it within rules, which is clearly more acceptable as an approach, though the distinguished minority leader has not signed off on it.

There will be a series of other technical amendments that basically bring in the changes that have been made by Senator LEVIN that move to House and Senate authorizing accounts rather than OMB accounts. These will be discussed, presented, debated, and voted on separately.

We are voting here on a bill that has been at the desk since Friday. I want people to understand that.

So these other changes, technical improvements, will be voted on later. They are not being voted on now.

I am happy to yield to the distinguished Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I understand we have a vote at 3 p.m. but there is no time limitation; am I correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. KENNEDY. I just want recognition on my own, Mr. President, and I ask the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KENNEDY. Mr. President, I prefer the Democratic leadership alternative and I have voted for it. But with its defeat it is also clear to me that we could argue endlessly about how and when we will balance the budget without making any real progress.

The Gramm-Rudman-Hollings approach has its problems and I hope and expect the House of Representatives will amend it to begin the process of deficit reduction now and to finish it earlier. But we can hardly say that we oppose balancing the budget later because we cannot pass a bill to balance the budget sooner. In candor, I must also say to my colleagues that Congress itself seems to lack any will or strategy to limit and then eliminate the deficit under present procedures.

In August the Senate voted for a budget that promised a deficit of $172 billion. It was a fraud then and there were those who said it was. Now the deficit has risen about $20 billion in just 2 months.

The only thing in recent years equal to the record Federal deficits is the fervent rhetoric heard in this Chamber about the urgency of a balanced budget. I would reach the goal faster and in a different way, but I believe we must reach it.

I would rather restrain spending by picking the weakest or most wasteful programs not by across-the-board cuts. But I also believe we must have cuts.

We can no longer do nothing. We can no longer afford a deadlock in which Congress stands its grounds and the President refuses to meet us even halfway. At least the Gramm-Rudman-Hollings approach does impose some of the sacrifice in the military budget where the White House has replaced fiscal responsibility with the biggest spending spree in Federal history.

Gramm-Rudman-Hollings is the only bill that can pass the Senate. I will vote for it now and I believe the House and the Senate will pass a final version with important modification.

In closing, let me emphasize my essential points. We are all crying fire in the overcrowded theater of the Federal deficit. We cannot continue to debate endlessly which fire extinguisher to use while the fire itself rages on.

I yield the floor.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. EXON. Mr. President, will the Senator yield?

Mr. RUDMAN. I yield.

Mr. EXON. Mr. President, it is evident that this Senator has followed closely and read in detail the Gramm-Rudman proposal to lead us to a balanced budget. There are many worthy ideas advanced, as I have said earlier in debate. There are also, in my studied opinion, many shortcomings.

The No. 1 problem, it appears to this Senator, is that the proposal is strong on well intentions but short on timely enforcement provisions. The net effect, I fear, is that it lacks balance and, therefore, less than a 50-50 chance for its success. I hope it is not a resounding disappointment if not disillusionment to all who support fiscal responsibility.

I am fearful that at its bottom line it comes up as a convenient "cover" to eliminate the "sting" of the irresponsible action of busting through the $2 trillion debt ceiling, after we broke through the then historic $1 trillion limit only shortly over 4 years ago.

It takes the public attention off the irresponsible action of crashing ever onward to debt this Nation cannot afford or tolerate.

We have let pass another milestone to potential economic disaster without demonstrating the courage to do some meaningful correction now.

I, therefore, must oppose both the Gramm-Rudman amendment and the further increase in the debt ceiling.

I thank my friend from New Hampshire.

Mr. RUDMAN. Mr President, I will be brief. We have debated this matter on this floor for now greater than a week.

In the words of a Senator who has been here for more than 30 years, it is probably the most exhaustive debate in recent years that he can remember. In fact, this Senate has set the agenda for what the country has been looking at this week, for the first time in a long time. And with all of the problems that people perceive in this proposal, the reason we are standing here today and the reason it will pass with an overwhelming amount of support is because people have finally come to the recognition that we can no longer point fingers, we can no longer say, well, the Congress could do it but will not; we can no longer say that the President can do it but will not; but we must put into the system some institutional discipline, if you will, a backbone transplant so that Congress lives up to its responsibility.

I have heard a lot of interesting talk about how bad this proposal is and it reminds me of the saying in a New Hampshire courtroom: If you do not have the facts, pound the law. If you do not have the law, pound the facts. And if you have neither then pound the table.

And we have heard a lot of table-pounding in this Chamber.

The fact is that the reason we are here and the reason we are voting for this is the American people are saying enough, $2 trillion is enough.

And I am pleased to have worked with people on both sides of this aisle to finally come up with a proposal that gives this country at least some opportunity to not be voting for the $3 trillion debt ceiling 6 years from now.

I yield the floor.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Mr. President, this is not a perfect plan but it is the best plan that has been presented. The time has come for the idea of putting the Federal Government on a budget like everyone else. The time has come to set out binding constraints and make Congress make hard decisions, to force the President and Congress to come to grips with a problem that the American people want to see someone come to grips with.

I thank my colleagues who may have worked on this ideal long and hard, who have helped us perfect the bill. I thank those who have supported it who are known as liberals and I thank those who are known as conservatives. But what we share in common is a commitment that we are not going to continue to let the debt ceiling rise without doing something about the problem.

We here today on this amendment will call in the credit cards and reform the process and put the Nation on the long path to a balanced budget. It will force tough decisions, but that is what elective office ought to be about.

I am proud of this amendment. I am proud of the support we have and I am proud of the fact that it is going to be supported across the philosophical

spectrum and it is going to be supported across the aisle.

I say to those in the House of Representatives, because we are going to have a temporary debt ceiling, do not think you can run away from this issue. The American people want the problem dealt with and they are going to hold the leadership of the House of Representatives accountable for making the issue that the American people are concerned about the issue that the people's House is concerned about.

The PRESIDING OFFICER (Mr. MCCONNELL). The Senator from Colorado.

Mr. HART. Mr. President, 3 days ago, the bishops of the Catholic Church of America said that poverty in this Nation was morally unacceptable—the rate of unemployment, the rate of hunger, the rate of deprivation.

The action about to be taken by the Senate flies in the face of that declaration.

This amendment is a tribute to the failure of Reaganomics and is going to take the failure of Reaganomics out on the people who can afford it the least. I think it is tragic and a travesty that those who visited that failure upon us are those who are coming back now to say to those people who are the victims of that failure, "You are going to bear the rest of the burden."

This is not a balanced budget amendment. The hard choices are not going to be made because three-quarters of the budget has been taken off the table. If people in this Chamber want to make hard choices, let us go to the people of this country with a tax increase. The people who have propounded this amendment do not have that kind of courage.

Mr. DOLE. Mr. President, I ask unanimous consent that I may proceed for 1 minute to advise my colleagues of what will follow after this vote.

Mr. STENNIS. Will the Senator yield to me?

Mr. DOLE. I am happy to yield.

Mr. STENNIS. Do we have controlled time?

Mr. DOLE. Yes; the vote is to occur at 3 o'clock.

Mr. STENNIS. Is that an agreement? I want just 3 or 4 minutes.

Mr. DOLE. I ask unanimous consent that the Senator from Mississippi may be allotted 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. Mr. President, I did not realize that the vote was coming at 3 o'clock.

Mr. President, I have attended the debate here. We had a good debate. I was really proud to see the quality of it.

Mr. President, we have a problem here that I think that this amendment does not meet. But that does not mean that I am going to advocate that we just drop it or quit or defeat it. I have felt—and I am not knowledgeable in this field; I am not an economist, but I have tried to use common sense. I think it is just eighth-grade commonsense and arithmetic to be able to see that our country is in a financial condition that some across-the-board raising of money is necessary in order to bring our income and outgo in balance. And I mean by that everyone must contribute something, everyone contributes something toward paying the national debt.

Personally, I think we must have more revenue if we are going to balance our budget. I do not believe anything short of such an effort will really do the work.

I think further—and I am not trying to blame anyone—I think further that this amendment is dangerously near being unconstitutional. The prerogatives and powers and responsibilities of the legislative branch of our Government are spelled out in the U.S. Constitution. These provisions are virtually ignored by the amendment now proposed.

That is clear as a bell. We have not actually had a formal hearing. There is no real report that I know of; just some released figures. There is no available competent witness capable of depth and learning and experience that has been brought in here and put on the witness stand to have a chance to tell what they know and be examined by both sides. We just have not done that.

I am afraid it is the gravest matter that I have ever had to pass on in the years that I have been here. And it is deeper and makes a midget out of the Great Depression of the 1930's. I remember those years. I was already practicing law in those days.

So I think we have a problem here. I do not approve of this measure as it is written. But I know it is all we are going to get out of this proposal now. I would like to see this bill go on over to the House and let them take their best effort on it and see what they say, and what they recommend, what reasons they give.

I am concerned greatly about the augmentation of this problem by the world trade situation. It may be, after all, that the most difficult problem we are facing in our economy is the restoration and a better chance in world trade. So I think that those things must be exhaustively gone into by highly competent people and then have the debate here, where we can do a better job.

I voted for what I thought was the better amendment, the Chiles amendment. I am going to cast my vote now for this amendment, not that I approve it, but to keep this thing alive and keep it going and see if we can come up with a far better bill that comes nearer filling the purposes of our need, including the enormous problem of world trade. I think we will suffer serious consequences if we do not tackle that one in depth.

So, with that explanation, I am going to cast my vote for the bill. I appreciate all of the effort that has been made by all the Senators on all sides; no criticism at all in that way, not any. I thank the leader for granting me the time.

Mr. DOLE. I thank the distinguished Senator from Mississippi.

Mr. President, I ask unanimous consent that the distinguished minority leader be permitted to speak for 3 minutes and the majority leader be permitted to speak for 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

GRAMM-RUDMAN-HOLLINGS AMENDMENT NO. 730, AS MODIFIED

Mr. DANFORTH. Mr. President, the Gramm-Rudman amendment is long and complex, but the question before us is very simple: Are we going to take decisive action to eliminate the enormous Federal deficits that threaten the strength and stability of the Nation's economy?

At the beginning of this year we all agreed that the times could not be more propitious for a major reduction in the Federal deficit. The American people had just reelected—by a landslide—a President identified with spending cuts. The economy, while not robust, was strong enough to make reductions in Government spending possible. The effect of the deficit on interest rates and on the value of the dollar was creating serious difficulties for American agriculture and other sectors of the economy that are sensitive to international trade. Congress could consider the budget free from election-year politics. The Republicans in the Senate committed themselves to setting the budget on a course toward balance in 1990.

And yet, with the confluence of all of these favorable factors, we labored mightily and brought forth a mouse. We made some progress against the deficit, but we fell far short of the targets we set for ourselves. The truth is that we let the country down.

I am a cosponsor of the proposed constitutional amendment to require a balanced Federal budget. I am a cosponsor of legislation to provide the President with temporary line-item veto authority. And I am a cosponsor of the Gramm-Rudman amendment before us today.

I cannot say that any of these proposals represents my first choice for reducing the deficit. My first choice would be responsible congressional action. But Congress has not shown itself to be willing and able to take such action, and it is for that reason

that I support the institutional constraints that have been proposed.

I refuse to accept the notion that we should carry on with business as usual. I refuse to pretend that $200 billion deficits don't matter. I refuse to bequeath to my children and to future generations a burden of debt that will handicap their ability to grow and to prosper. I believe that we should take action today to ensure a sound and prudent fiscal policy for the Nation, and I urge adoption of the amendment.

Mr. EAGLETON. Mr. President, I am ready to cast the difficult votes that will be necessary to reduce this Nation's disastrous budget deficits, but I am not prepared to buy a magic elixir that doesn't list its ingredients on the label from salesmen who can't or won't answer straightforward questions.

That is exactly what the sponsors of this legislation are holding out to the Members of this body. From all outward appearances the amendment looks like a tough, new approach to our deficit problem, but on closer inspection it begins to resemble the same tired, old prescription the administration has been peddling for 5 years now—spare the rich and sock it to those in need.

The amendment does nothing about tax expenditures which are a large part of the deficit but which overwhelmingly benefit wealthy individuals and corporations. It does nothing about the $143 billion interest payment on the national debt, or Social Security cost of living, or our $40 to $50 billion farm programs. If you listen to President Reagan, who would be empowered to make the budget cuts, this amendment won't significantly affect defense spending because the President deems that to be relatively uncontrollable.

Mr. President, in two words I am voting against the Gramm-Rudman amendment because it is unfair and it is a sham. I ask that an editorial and news article from the Washington Post of October 9, 1985, and editorials from the New York Times of October 4 and October 9, 1985, be printed in my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 9, 1985]

THE DEFICIT AMENDMENT

Its sponsors and the president keep chipping at the deficit-reduction amendment on the Senate floor to take important shares of the pain out of it. The more they rework it, the more it comes to resemble either (1) a showy effort on the part of those who brought us the deficit to demonstrate now how much they deplore it, and/or (2) a selective effort not so much to reduce the deficit as to use it as a lever to attain assorted lesser policy objectives.

The difficulty for the last five years has been that the deficit has been a residual element in policymaking. The president and the parties in Congress have had various programmatic or distributional goals—cut taxes, increase defense spending, show themselves to be the stoutest possible protectors of the seventh of the population that receives Social Security benefits. The choice, particularly as framed by the president, has come down to letting the deficit rise or cutting an enormous swath through all other domestic programs. Not even the president has been able or willing to propose the requisite cuts, and the deficit has risen.

The amendment in the Senate was meant to reenergize this stale debate by requiring that deficit-reduction come first and by confronting the president and Congress with a much more difficult set of choices. In its original form it set deficit targets declining to zero over the next five years and decreed that if Congress failed to hit a target, the president would have to make spending cuts, in defense and Social Security as well as the domestic remainder of the government. It made no mention of tax increases, but the idea was that, rather than cut defense and Social Security, the president would likely agree to one. There was a hammer at everyone's head.

But the terms keep changing. To pick up support on the floor, the sponsors agreed that none of the burden would fall on Social Security; it would be exempt. Partly to ease the pressure on defense and partly to avoid deep spending cuts just before next year's elections, they have also stretched out the deficit-reduction schedule; the amendment now would probably have no effect for a year. Meanwhile, the president, in professing "enthusiastic suport" for "what might well become historic legislation," has served oblique notice that he would not expect it to affect defense. In "a personal caveat" in his radio speech on Saturday he reminded listeners that Congress has already agreed (in this year's budget resolution) to defense spending increases of 3 percent per year after inflation over the next several years. "And next year I will propose those amounts already accepted as necessary for keeping the peace," he said.

The sponsors say that defense remains subject to the terms of the amendment, but that is clearly not the way the president understands or intends it. The stakes are too high not to have agreement on the rules. The amendment would have some seriously uneven effects within the Defense Department. The theory is that, to avoid these, the president would agree to a more rational budget. But to the extent that defense became exempt along with Social Security, there would be no pressure on him to agree to anything. The amendment would then only seriously affect the domestic programs that have been in the balance against the deficit all along. It would be a stronger license to dismantle them. It sounded a week ago like a good idea. It begins to sound increasingly like a bad one.

[From the Washington Post; Oct. 9, 1985]

BALANCED FISCAL PLAN REASSESSED

The rush by President Reagan and Congress to mandate a balanced budget in six years is running into increasing skepticism as both the White House and key lawmakers confront the painful realities of a proposal that was quickly embraced last week.

The plan, in theory, would legally require Reagan and Congress to make difficult political choices on spending, taxes and the military that they have been unwilling to confront. It would set deficit targets that both Reagan and Congress have demonstrated they cannot meet on a year-to-year basis.

While the Senate is expected to approve the bill and send it on to negotiations with a less-enthusiastic House, there are increasing questions about whether it will work as advertised—what Sen. Warren B. Rudman (R-N.H.), a chief sponsor, calls "a mechanism to force action" by the President and Congress.

For example, administration officials said yesterday that the White House was attempting to back away from the deficit target of $144 billion for next year in the plan, out of concern that Reagan might not be able to achieve it.

Sources also said that national security affairs adviser Robert C. McFarlane and Defense Secretary Caspar W. Weinberger expressed serious misgivings last week about the legislation because of the prospect it could lead to sharp cuts in Reagan's military expansion.

Although Reagan has insisted Congress keep "previous commitments" to increase defense spending, "it's hard to see how" that is possible under the existing plan, one senior, administration official commented.

Their concern is focused on legislation pending in the Senate, which Reagan endorsed last Thursday, that would set targets in law leading to a balanced budget in six years.

No agreement on the plan was reached yesterday, despite a day of political struggle.

Sponsored by Rudman, Sen. Phil Gramm (R-Tex.) and Ernest F. Hollings (D-S.C.), among others, the legislation is attached to a bill extending the federal debt ceiling to more than $2 trillion.

While not final, and subject to widely varying interpretations, the legislation has been touted by its sponsors and by Reagan as an automatic process that would resolve the years-long deadlock over annual deficits now in the $180 billion range.

If anything like the proposal now being debated in the Senate becomes law, it would have major ramifications for the way the president and Congress set the government's priorities:

It would provide a powerful impetus to Reagan and Congress to come to grips with the deficit issue each year, perhaps overcoming the stalemate that has characterized the debate over rising red ink. By outlining a set of stringent targets for reducing the $180 billion deficit to zero, the law would create an automatic process for decisions that are not battled out year-by-year. Just the threat of such targets, and the process that is triggered if they are exceeded, could force action on the deficit.

If the deficit targets are not met, the legislation would place additional new authority in the hands of the president to impose budget cuts. This would be a major shift away from Congress and toward the White House in the balance of power over federal spending that was established in budget reform legislation enacted in 1974.

Both Congress and Reagan would probably face unpleasant choices they have sought to avoid in the past for a host of political reasons. For example, Reagan might be faced with the prospect of unwanted cuts in defense spending along with sought-after cuts in domestic spending.

If he rejected that, Reagan might confront a tax increase offered by Congress instead. Congress might have to accept deep

cuts in domestic programs it has refused to enact in the past.

If the targets are not met, the budget ax may fall on a relatively narrow portion of the federal budget.

The way the legislation is now written, only about one-third of the budget, or about $300 billion, would be subject to reductions if the targets are not met. Social Security, interest on the national debt, some defense procurement and a host of other programs deemed "relatively uncontrollable" by the Office of Management and Budget would be off-limits.

An unforeseen slowdown in the economy could throw the balanced-budget plan off track.

Although Congress and Reagan may achieve one year's deficit target, a sudden recession could depress revenues, raise government social spending and create a difficult problem the next year when the targets are further away than was expected. "No one will go to jail," said a White House official, but it would throw a wrench into the target machinery.

Reagan has not shrunk overall government spending as a share of the economy, but one of the hallmarks of his presidency has been a marked shift in priorities from domestic to defense spending. Under the new system, if the deficit targets are exceeded, Reagan would have to impose across-the-board budget cuts hitting both defense and domestic spending. Even so, some Pentagon spending, for contracts signed in prior years, is protected from cuts.

Rep. Leon E. Panetta (D-Calif.), reflecting the unease of some Democrats at what appears to be a major grant of new presidential authority, said Gramm and Rudman "have essentially fashioned a club" and "handed the club to the president."

House Speaker Thomas P. (Tip) O'Neill Jr. (D-Mass.) yesterday was sharply critical of Gramm, saying he "is more responsible for the mess the nation is in than any other person than Mr. Reagan." O'Neill also criticized the Gramm-Rudman proposal as a "disgraceful maneuver to subvert the Constitution."

Rudman has denied a shift in the balance of power is contained in the plan. If the targets are not met, he said last week, the president "cannot pick and choose" what to cut and decide by how much. Rather, he said, the president's action "would be purely ministerial."

Although details are still being negotiated, the proposal works like this: a series of deficit targets, starting from $180 billion in fiscal 1986 and declining each year to zero in fiscal 1991, are written into law.

Each year, the president would be required to propose, and Congress adopt, a budget that falls within the specified target.

Each year, the Office of Management and Budget and the Congressional Budget Office would be required to report jointly to the president on the projected deficit, the amount it exceeds the target—if it does—and the percentage spending reductions needed to bring it within the target.

If the target is exceeded, the president would be required within 14 days to impose the budget cuts.

A number of areas in the budget would not be affected, however, including Social Security, interest on the national debt, some Pentagon spending and programs deemed by OMB to be "relatively uncontrollable."

This is a major point of contention since it would be left to the Executive Branch, and not Congress, to decide which programs fit this description of "relatively uncontrollable."

Half the spending cuts would come from automatic spending increases for inflation in entitlement programs, such as food stamps, Medicare and Medicaid, and others. The programs could not be cut, just the inflation adjustments.

The other half would come through an across-the-board cut in remaining discretionary spending. About 60 percent of the military budget would be subject to such cuts.

"There is no way to avoid a fairly heavy hit on defense," said a White house official. Once these cuts are imposed, the president and Congress can then both come up with alternatives.

[From the New York Times, Oct. 4, 1985]

THE BALANCED BALONEY ACT OF 1985

Frustrated by the failure to reduce the breath-taking Federal deficit, Congress and the President are ready to fasten onto a fantasy. Dreamed up by Senators Rudman of New Hampshire and Gramm of Texas, both Republicans, it promises to balance the budget by 1991. The idea is appealing but this approach is perilously unbalanced.

Congress' frustration is easy to understand. This year, again, it has struggled to cut one program after another only to wind up with yet another huge deficit. The plan responds handsomely to the prevailing mood of desperation.

Here is how it's supposed to work: The deficit for fiscal 1986 is assumed to be $180 billion. Deficits in following years would be reduced to zero in equal yearly steps. If the President and Congress failed to agree on how to achieve the goals, the bill would require across-the-board spending cuts—with important exceptions.

The first flaw is the starting point. The official estimate for this year's deficit is low, maybe $20 billion too low. Second, aiming at zero is arbitrary, perhaps dangerously so. Big cuts in the deficit are essential. But perfect balance isn't necessary by a given date. Forcing its achievement could, depending on economic conditions, start a recession or stifle a healthy recovery.

Third, the approach is unbalanced and unfair. The trigger mechanism would affect only spending, and not all of that. It would not cut interest on the debt or Social Security and would leave vague leeway for increases in other "uncontrollable" costs. No tax increases are involved and no controls would apply to rising "tax expenditures"—revenues lost to deductions and exemptions that add to deficits just as spending does.

The final flaw concerns credibility. Congress may solemnly demonstrate its firm resolve with legislation—but everyone knows Congress can act even faster in the opposite direction. The 95th Congress passed a law requiring a balanced budget by 1981. The 96th repealed it.

Senators Rudman and Gramm, now joined by Senator Hollings, give their scheme the title "Balanced Budget and Emergency Deficit Control Act of 1985." Beware. The only way to balance the budget and control the deficit is to cut spending equitably, which neither the President nor Congress seems able to do; or raise taxes, which the President refuses to do; or both. No wonder everyone's rushing to embrace this choice bit of balanced baloney.

[From the New York Times, Oct. 9, 1985]

CONGRESS RUSHES TO UNFAIRNESS

Melodrama surrounds Congress, where members are plenty touchy about approving a new borrowing limit of two trillion dollars. Will the Government grind to a halt while legislators dawdle? Would the Treasury really dare tell banks to bounce Federal checks? Will a so-called balanced-budget bill emerge as law?

The first two questions are the melodrama, lacking honest suspense. If Government stops at all, the interruption will be token, a nuisance and not a disaster. Washington may be technically obliged to stop writing checks for a few minutes; but not for one minute does anyone think that Federal checks will turn worthless.

The danger of truly lasting damage arises in question three. The Senate and House have suddenly been seized by the notion that they must now—right now! hurry! —do something about the deficit. And some members think the way out is a bill ordering it to stop. The bill is as unfair as it is unexamined.

The huge Reagan deficits remain an urgent concern. But this hasty proposal for controlling them is foliage. Connecticut's Republican Senator, Lowell Weicker, one of the opponents, properly calls it a "legislative substitute for the guts we don't have to do what needs to be done."

What's the rush? The deficit problem has been around for five years as both President and Congress have ducked their responsibility to adjust spending fairly, while refusing to provide enough revenue to pay the bills. Finally embarrassed by the inevitable consequences, they're running for the bushes, including the new one sponsored by Senators Gramm, Rudman and Hollings.

It would require the President to submit budgets that reduce the deficit $36 billion each year, until it drops to zero in 1991. In event of a deadlock with Congress, automatic spending cuts would come into play. But only some people would bear the burden.

Less than half the budget would be subject to cuts. Interest, Social Security, two-thirds of the defense budget and all other programs with contract commitments would be exempt. Meanwhile, the possibility of raising adequate revenues would not even be considered.

What kind of fair sacrifice is it to do a lion's share of the chopping out of school lunches, Supplementary Social Insurance and Federal pensions? Where is the justice in disproportionately starving the safety-net programs for the poor, like food stamps, Head Start and community health? Where is the common sense in chopping from military readiness, job training, the National Institutes of Health and agencies like the F.B.I. and the F.A.A.?

The impact would be so punitive that the next Congress and the next President would be hard pressed to repeal it. There's an easier way to fight the deficit battle fairly: Avoid both the pretense and the punishment and kill this bill now.

Mr. GRASSLEY. Mr. President, I support the stated purpose of the amendment offered by Senators GRAMM, RUDMAN, and HOLLINGS: That future spending must be reined in, and that the Federal budget must be balanced in the forseeable future.

However, Mr. President, I have reservations about this legislation, not only in terms of its ability to balance

the budget, but also in the way it has evolved over the last 2 weeks.

First, in terms of its effectiveness: The changes outlined in this amendment are not ineffective in and of themselves. For me, it is a case of being "once bit, twice skeptical." In 1978, Congress passed a law known as the Byrd-Grassley law which mandated that no deficit spending could occur beginning in fiscal year 1981. That is now a public law.

Well, obviously, we have not only deficit spend every year thereafter, but since 1981, we merely doubled the trillion dollar debt.

Mr. President, for the past 5 years, Congress has willfully ignored a statute mandating a balanced budget. What makes us think Congress will balance its budget as a result of this amendment? Or any other bill? The problem doesn't require new legislation because the law is not the problem.

We do not need legislation with teeth in it. Congress would still do what it wills, with or without teeth. The problem is the will: It's the unwillingness of Congress to commit to self-discipline.

There are two activities involved in self-discipline. The first involves realism, which requires us to recognize how bad the current crisis is. The second involves hard decisions to limit spending. If we do not first recognize the size of the problem, the decisions for cutting spending will be inadequate.

Congress chooses optimism over reality precisely so that our decisions will be less disciplined. This has been the pathology of our failure to control deficits.

If there is one truism that supersedes all others where the Federal budget is concerned, it is this: the results of our decisions never match up with what we planned. It is this fundamental precept which compels us to view this amendment with a strong dose of realism.

There is no need for me to burden this Chamber with the now-legendary charts showing the mismatch between our fiscal plans and fiscal reality. Like the one showing projected deficits falling off the chart, but actual deficits rising off the chart. Or the one in which projected GNP is always rising, when in fact it behaves like a roller coaster. And on and on.

The charts clearly show our obsession with optimism, and our inability to plan in the same ballpark with reality.

This narcotic of optimism is crucial, Mr. President, to understanding what we are doing here today. Under this amendment, the very next budget submitted by the President must show a deficit of $144 billion for fiscal year 1987. The current fiscal deficit is projected at $180 billion in this amendment. In other words, the deficit must shrink from $180 billion to $144 billion, or by $36 billion in absolute terms. If you use the baseline instead for fiscal year 1987, which is $163 billion, then only a $19 billion cut is needed next year. No sweat, right?

The problem, Mr. President, is not quite that surmountable. This recent year's deficit is about $210 billion. Two years ago, however, we projected it would be only $175 billion. Even 1 year ago we projected it would be $176 billion. We missed the projection by $35 billion in the course of just 1 year!

Now, if we really think the fiscal year 1986 deficit will only be $180 billion as projected in this amendment, we'd better give ourselves a cold slap in the face. OMB has already bumped its fiscal year 1986 deficit projection up to $200 billion, and we still have a year to go.

Enough said about the short term. The outyear numbers in this amendment are just as suspect, perhaps more. Using the new CBO Update, the outyear deficit projections in this amendment are somewhere between the CBO estimates and its high-growth alternative. In other words, there is an underlying assumption that the economy will perform at a real rate of 4.2 percent in each of the next 5 years. The narcotic of optimism has struck again, Mr. President. Is it realistic to assume that after 34 consecutive quarters of real growth, the economy will do 20 more quarters of high growth?

More than anything else, Mr. President, I fear we will be totally unprepared when reality sets in 2, 3, 5 years down the road when the baseline deficits are much more inflated, and the amount we must cut to reach the goals of this amendment is so much greater.

When the real magnitude of the deficit problem surfaces, and it comes time to cut not the $19 billion that we anticipate right now cutting out of next year's budget, but the $60 billion that actually occurs, what are we going to do? Are we really setting ourselves up for a whopping big tax increase?

And so we do not mistake the cure to be simply some new-found courage by Congress, there is a further hurdle which must be surmounted. It is a mathematical hurdle. While the savings target will surely rise as our projections are matched against reality, the pot from which those savings must come is shrinking, since we have taken the Social Security trust fund offbudget. This point does not argue one way or another for doing that. It is merely a fact that we have a quarter of a loaf less with which to work. And that makes the task so much more formidable.

Because Social Security has been taken offbudget, there is a constant risk that other trust funds will apply for and receive similar status. And perhaps other programs after that. Soon we have a growing savings requirement with a shrinking pot of resources from which to achieve the savings. It is a microcosm of the current budget crisis in which a shrinking tax base coupled with overspending is resulting in expanding deficits.

The final reservation I have involves the defense budget. Last weekend I woke up and read in the Des Moines Register that the President supports this amendment because he was given assurances we would not lower defense spending as projected over the next 3 years.

This is news to me, Mr. President. There were certainly no such assurances contained in the original drafting of this amendment.

Now, that means either the baseline for defense will have to be increased next year in order to provide its share of savings in any across-the-board sequestering of funds, or nondefense programs would be cut in much greater proportions than defense, or we would have to raise taxes to meet the savings target, none of which I can support at this time.

It seems to me, Mr. President, that we're right back where we started in the budget process—three-quarters of the budget is put offbounds, and so nothing will get done.

Mr. DURENBERGER. Mr. President, I rise in support of the pending amendment to the debt limit bill. I do so after coming, with some reluctance, to the conclusion that this proposal is the best available answer to our national deficit crisis.

During the past week, the Senate has witnessed an extraordinary series of events, as the Gramm-Rudman proposal proceeded from seed to full flower in a very short time. I believe its progress can be attributed to the fact that there is nothing like the sight of the gallows to focus the mind. We are facing the gallows of a looming economic catastrophe in this country if we do not immediately and forcefully address the deficit. The Gramm-Rudman amendment, for all its difficulties and ambiguities, does just that.

Thomas Jefferson once said,

> The question whether one generation has the right to bind another by the deficit it imposes is a question of such consequence as to place it among the fundamental principles of government. We should consider ourselves unauthorized to saddle posterity with our debts, and morally bound to pay them ourselves.

Mr. President, my first vote to raise the ante on Federal borrowing was on a temporary debt ceiling of $879 billion in 1979. Today I vote for a more than $2 trillion ceiling and the word "temporary" has been dropped. Unless we take action immediately, I will be forced to vote for a $3 trillion debt in only 5 years. Every $1 we borrow

today will cost future generations $24 to repay. The average young worker today will pay $10,000 in taxes over his or her lifetime to finance the budget deficit for 1985 alone. If we are to escape the moral condemnation of future generations, for having mortgaged their rights for our political expedience, we must find a new path. Hopefully, the Gramm-Rudman proposal points us in that direction.

In a recent speech I made in Texas, I used the illustration that the reason that there were so many heroes at the Alamo was that there was no back door. In the budgetary Alamo, we have not been so fortunate. As the politicians of this Government have been driven into an Alamo by a national consensus for reducing deficits, some have found the back door, leaving others the privilege of bleeding and dying for the cause.

The President of the United States, who is supposed to be our Davey Crocket in this Alamo, has not fully lived up to the confidence we on this side of the aisle and the American people have placed in him. Despite heading into the second half of his administration with a 49–1 lead over the opposition, his first plan in 1985 to help us fight our way out the front door of the Alamo gave us a $145 billion deficit in 1988. We Senate Republicans said that was not good enough and put together a 5-year budget resolution to balance the budget in 1990. The President effectively vetoed that plan and any other which raised revenues of any kind. That has left us without leadership and without a plan for addressing this looming national crisis.

The wisdom of the Gramm-Rudman proposal is that it tries to force into service those areas of the budget that heretofore have been conscientious objectors in the battle of the budget. Gramm-Rudman is the first serious proposal that I have seen on this floor which attempts to solve our deficit problems by a means of cutting anything but discretionary domestic spending. That is where most of the casualties have been in the last 4 years and they cannot give anymore. It will force the Congress and hopefully the administration to realize that reducing the deficit requires control of spending, yes, but it also requires an increase in Government revenues.

Unfortunately, Mr. President, the Alamo as redesigned by Gramm-Rudman does have its back doors, which could be its undoing as a genuine budgetary tool. Social Security has been exempted. The Department of Defense is claiming that one-third of its huge annual budget is exempted as well. What this means is that the burden falls more heavily on those who are not favored with such an exemption.

I am talking about the Medicare Program, which has contributed $42 billion in spending reduction over the last 5 years. I am talking about farm programs which will be called upon in the short term and for years to come to prevent the extinction of family farms. I am talking about programs like general revenue sharing and others which allow State and local units of governments to take responsibility for clean air and water, safe workplaces, and economic development. On behalf of the people who rely on those programs, I commit myself to fight to protect their place in the Nation's priorities when the budget crunch, created by Gramm-Rudman, comes.

Mr. President, our former colleague Nicholas Brady, included in his maiden speech to this body a description of a historical event which is relevant to this debate. In 1869, Maj. John Wesley Powell led the first expedition down the Colorado River. Powell's diary entry for August 28 of that year reads as follows:

> We come to a place which seems worse than any yet; to run the rapids would be sure destruction. After supper Captain Howland asked to talk to me. He, his brother, and William Dunn have determined to go no farther. All night I pace up and down. Is it wise to go on? At last daylight comes; breakfast is as solemn as a funeral. Two rifles and a shotgun are given to the men who are going out. I asked them to help themselves to rations. They refused * * * some tears are shed: Each party thinks the other is taking the dangerous course. The three men watch us off.

There is a plaque now on the wall of the Grand Canyon which reads:

> Here on August 28, 1869, Seneca Howland, O.G. Howland, and William H. Dunn, separated from the original Powell party, climbed to the north rim and were killed by Indians.

The following day, Powell and his remaining crew rowed out safely into quiet waters.

I share this story with my colleagues because it says a lot about danger, real and perceived. It suggests that our safest course at difficult times is to tackle our problems head on.

In the final analysis, Mr. President, I reach the conclusion that the proposal before us stands the best chance of forcing the President and the Congress to tackle the deficit problem head on. That course is not without its dangers, but at this point in time, Mr. President, we have no other choice.

Mr. HATFIELD. Mr. President, I oppose this proposal. No matter how we dress it up with modifications and fine tunings to meet the specific objections or interests of one Member or another, it remains a fundamental unsound proposal that again represents a congressional abdication of its fiscal responsibilities. It will snarl the Congress in additional procedural complexities that will make present conditions seem simple and straightforward by comparison. It will almost certainly create an avalanche of litigation as to the authority of the President to withhold cost-of-living adjustments on entitlements.

And, it will keep hordes of numbers crunchers with green eyeshades busy year round, just keeping track of percentage reductions, congressional priorities, outlay streams, scorekeeping adjustments, and myriad other details. The elected representatives of the people will be further removed from the decisions that affect the people. Anonymous bureaucrats in the executive branch and here in Congress will run the show more than they do now, to the people's loss.

Mr. President, it is not easy to defend the status quo. There is not much worth defending. But I am convinced that our current predicament lies not so much with the present congressional budget process as with our will to make it work, and no new system, no matter how cleverly contrived, will work unless we summon the will and courage to make it work. I do not yet discern that change of will. We are only fooling ourselves, and worse, fooling the people, if we believe this proposal will bring order out of chaos and put us on a sure path to deficit reduction.

Mr. KASTEN. Mr. President, as an original cosponsor of the Gramm-Rudman Balanced Budget and Emergency Deficit Control Act of 1985, I rise in support of the Gramm-Rudman amendment. I believe that this legislation will set the stage for true fiscal discipline in Congress. It's about time.

There is no question that the large deficits we are facing today require significant action by Congress. We can only get deficits under control by addressing the spending that causes them, and by allowing economic growth to narrow the gap between revenues and outlays.

With this legislation, we are finally taking action to get our fiscal house in order. The Senate has decided that this deficit spending must stop. It would allow Federal budgeting to be like the budgeting each family does. It allows day-by-day and week-by-week corrections so that spending doesn't get out of control.

It's like your family. When you realize you are over spending, you take serious steps toward getting spending under control. You have to pay the bills, so you have to make some sacrifices. But, first you have to gather up your credit cards and cut them in half. Well, Gramm-Rudman cuts the Federal credit cards in half.

Mr. President, Federal spending is out of control. The national debt is now over $2 trillion. This is roughly equal to a stack of $1,000 bills more than 250 miles high. Unless Congress

gets spending under control, it will only grow. And, as the national debt has grown, so has the cost of maintaining it.

This amendment will put some teeth in the budget process, give us a way to really get control over Federal spending, and lead to a balanced budget by 1991. Briefly, it sets declining deficit targets for each of the next 5 years. In each year, if Congress does not come up with a budget that meets the deficit target, then the President must send Congress across-the-board spending reductions so that the deficit comes in line with the target.

All programs except Social Security will be subject to reductions. Social Security is excluded for two reasons. First, it's a special case. It has its own separate trust fund, and is not financed through general revenues the way other programs are. Second, Social Security is currently scheduled to be removed from the budget in 1990. This measure just speeds that up to 1986.

Some opponents of Gramm-Rudman say that this is just another way to give the President more power. This isn't true. The President and Congress should be partners in controlling Federal spending. This legislation calls upon the President to send an across-the-board spending reduction to Congress. The President has no authority to choose which programs are cut. And, this only takes effect if Congress has failed to reduce the deficit. It also gives Congress the right to disapprove the across-the-board cut. Essentially it retains veto authority for Congress.

Others are concerned that this measure might lead to a massive tax increase. I do not agree. There are no built-in biases for or against tax increase. And, in fact, the emphasis on spending restraint in this plan means that chances are better for reducing the deficit through spending cuts, rather than tax increases.

Like the sponsors of this amendment, Senators GRAMM and RUDMAN, I believe that this is the best approach toward reducing the deficits. Tax inicreases just do not work. In the past, we have assumed increases in taxes as part of the deficit reduction effort, and they have not worked. In fact, we have seen that they only fuel more spending. Spending for 1986 will be about 25 percent of GNP. In 1980, it was about 23 percent. Revenues over the period have been a constant 19 percent. Clearly, we do not have high deficits because the American people are undertaxed; we have high deficits because Congress spends too much.

Mr. President, the Gramm-Rudman amendment is a positive step toward serious deficit reduction. It is a collective bipartisan effort that mandates a balanced budget in the year 1991. This amendment calls for real reductions in spending, and demonstrates that Congress is serious about reducing deficits. I am proud to be a cosponsor of this amendment, and I urge my colleagues to lend it their support as well.

Mr. NICKLES. Mr. President, the time has come to enact changes in the way we implement our Federal budget. This amendment to the debt ceiling is the best medicine for this problem.

The amendment, known as the Balanced Budget and Emergency Deficit Control Act of 1985, would put into place a realistic path toward a balanced Federal budget. First, it would set declining deficit levels over the next 5 years, beginning with $180-billion in fiscal year 1986 and $0 in fiscal year 1991. Second, it would require both the Congress and the President to comply with these deficit levels when they formulate their respective budgets. Next, it would enforce these deficit levels by providing emergency sequestering authority for the President in the event the projected deficit would exceed the maximum allowable. The President may also propose an alternative plan to the Congress to bring the deficit within the allowable range.

There are also several safeguards in the bill worth mentioning. In the event of a recession, where the real growth in the gross national product is negative, the President would be given 30 days, as opposed to 14, in which to issue his sequester order or send an alternative proposal to Congress. Also, the provisions of the act would be ineffective in a formal declaration of war. Finally, it allows for a leeway of 7 percent first year and a 5-percent overage in the deficit levels as well as exempt Social Security from the sequestering process.

Mr. President, on occasion I like to analyze the Federal debt and Federal spending. Each Senator receives on a monthly basis publications entitled the "Monthly Statement of the Public Debt of the United States and the Monthly Treasury Statement of Receipts and Outlays of the U.S. Government." These are periodic reminders of the painful reality that our fiscal situation in this country is worsening. For the benefit of my colleagues, I would like to briefly summarize these statements.

For the month ending August 31, 1985, total public debt outstanding was $1,818 billion. This compares to $1,561 billion for the same period in 1984. This represents a 16.5-percent increase of total debt over last year and a 375-percent increase over 1970. For the latest census data, this equals $7,853 per person and $21,286 per household.

At our current rate of spending, we will have accumulated $2,079 billion in total public debt by the end of fiscal year 1986. This is a staggering figure when compared to the total debt of $383 billion for 1970 and $914 billion in 1980. The estimate of borrowing from the public to finance the Federal debt for fiscal year 1985 is $203 billion. Total capital available in U.S. markets is $748 billion, of which Government borrowing takes a 27-percent share.

For the month of August, we amassed $57.8 billion in receipts and $83.6 billion in outlays, leaving a deficit for the month of $27.8 billion. Fiscal year to date amounts are $660.2 billion for receipts and $863.6 billion for outlays for a deficit of $203.4 billion. According to the Treasury Department, there will be $736.0 billion in receipts, $947.3 billion in outlays, and a deficit of $211.3 billion for fiscal year 1985. For the entire year this translates into $3,179 per person and $8,618 per household for receipts, $4,092 per person and $11,091 per household for outlays, and $913 per person and $2,474 per household for the annual deficit.

May I say that these figures put into perspective the magnitude of our fiscal problem. When we consider various deficit reduction measures, we must now look toward savings which are much larger and more painful than we have ever made before in this country's recent history. Some have argued that we must look to taxes to fill this void. However, we are taking a reasonable level in taxes from the public at 19.0 percent of the gross national product [GNP]. On the other hand, spending has increased to 24.8 percent of GNP, the second highest level since 1945.

I encourage my colleagues to take a hard look into making the types of spending cuts necessary to bring down the deficit when they consider this change in the budget process. The amendment we have before us is not a panacea but rather a starting point to bring our Federal deficit under control over a gradual period of time. I urge my colleagues to adopt the proposal.

Mr. WILSON. Mr. President, I rise today in support of the Balanced Budget and Emergency Deficit Control Act of 1985, and I want to commend its distinguished authors Senators GRAMM, RUDMAN, and HOLLINGS. When our task is to raise the debt ceiling to over $2 trillion, the potential for financial disaster in this Nation is self-evident. I speak today not only as a U.S. Senator but also as a citizen deeply concerned with the continued economic strength and prosperity of America.

Since I have been a Member of this body, no issue has caused me greater concern or greater frustration than Congress' inability to control the Federal deficits that have mounted and that will continue to mount, unless some major institutional changes are made in the way our Government manages the Federal budget.

I am pleased to join as a cosponsor of this legislation which will establish a maximum allowable deficit ceiling

beginning with the $180 billion deficit set out in the 1986 budget and reducing the allowable deficit in four equal steps to zero in 1990. And, the automatic budget correction process contained in the legislation will ensure that we stay on our path to fiscal solvency. Specifically, if, after a review by the Congressional Budget Office and Office of Management and Budget, it is established that projected deficits will exceed the maximum deficit ceiling for that year, this excess deficit will be eliminated by sequestering automatic increases and controllable expenditures across-the-board by a uniform percentage, with the notable express exception that Social Security benefits and cost-of-living payments are exempted. Congress may initiate a different deficit reduction proposal as long as it eliminates the excess deficits.

The provisions of this bill are waived during a declaration of war. Also, the provisions of this emergency legislation may be modified if economic factors indicate that the United States is in a recession. However, any modifications in this legislation would have to be adopted by both Houses of Congress and signed by the President.

Admonitions against running our Government in the red are as old as this Nation. Thomas Jefferson, this country's greatest political scientist, stated that "If we can prevent the government from wasting the labors of the people under the pretense of caring for them, they will be happy." Unfortunately, President Jefferson's wise insights have not been heeded, and the people are not happy. American taxpayers believe that their labors are being wasted when their elected representatives continue wasteful, unbridled Federal spending. Of the nearly 15,000 letters that I receive each week, nearly half of those constituents are demanding that Congress stop mortgaging the future of this Nation.

In fact, nearly all Americans passionately want us in Congress to balance the Federal budget. Yet, even with this clear bipartisan, grassroots message from young Americans who are just starting their families to older Americans in the twilight of their lives, Congress has not had the collective courage to give them the fiscal security that they want so very badly.

Not that the public should doubt the good intentions of the Members of Congress, but, good intentions are not enough if—in our efforts to provide for our constituents—we neglect the greater, even more urgent obligation to all Americans to legislate with fiscal discipline.

I have reservations about this legislation. Some good programs may have to be cut and some wasteful programs may not be cut enough. However, these economic times require that we make drastic changes in our Federal budget process to ensure that America maintains its place as the world's economic leader.

One potential danger associated with this legislation is that certain Members of Congress may try to bloat the appropriations for Federal programs to force the President to make the difficult spending cuts. Furthermore, because this legislation requires equal across-the-board cuts, rather than merit testing of Federal programs, unnecessary and wasteful programs could still flourish. That is why I am hopeful that this body will once again consider line-item veto legislation, which can be an important means for attacking unwise Federal spending.

Additionally, we need a constitutional amendment requiring a balanced Federal budget. This would impose a permanent mandate on our Federal Government to act with fiscal integrity. As the Senate chairman of Congressional Leaders United to Balance the Budget [CLUBB], I am pleased to say that we now have nearly 120 Members of Congress who are committed to enacting this responsible and critical budget reducing vehicle. And, even if the provisions of the Balanced Budget and Emergency Deficit Control Act are effective—and I believe they can be—I still support the balanced budget amendment because fiscal integrity does not come easily to Congress in the collective exercise of the spending power, and the absolute legal compulsion to achieve it should be embedded in our Constitution.

The requirement for a balanced Federal budget needs to be protected against future congressional faintheartedness and back-sliding. The requirement should be placed beyond the reach of all too easy statutory repeal.

The authors of the Balanced Budget and Emergency Deficit Control Act of 1985 carefully drafted this legislation to call for a timely solution to our deficit crisis. This solution, I am pleased to say, will be implemented in an equitable fashion. Because Social Security will not be part of the deficit reduction equation, present and future recipients are assured by Gramm-Rudman-Hollings that they will enjoy their full Social Security benefits during their later years. These Americans have paid their dues, and their benefits are expressly exempted from the cuts required by the amendment.

No doubt, this sobering legislation will cause Congress great pain as it recovers from years of stuporous, runaway Federal spending. Nevertheless, I hope my colleagues will endure the pain that must come from deficit reduction and accept the noble challenge that this legislation presents to us.

As the 99th Congress debates this critical legislation, the National and world watch anxiously and hope that we will find a way to calm the tidal wave of uncontrolled Federal spending. Our $2 trillion debt has focused all Americans and all the world on this body and on this vote, and we have an opportunity to reshape the future of this Nation, from the stock exchanges of Wall Street through the wheat fields of Kansas to the Silicon Valley of California. Let us seize upon this unique opportunity for the benefit of all Americans and for the benefit of all future Americans.

Mr. TRIBLE. Mr. President, I rise in support of the Gramm-Rudman amendment. The Congress is being asked to increase the debt ceiling or borrowing power of the Federal Government to over $2 trillion. Well, I am unwilling to do that, to impose that kind of burden on our children—unless we adopt a no-nonsense deficit reduction plan as part of the process.

This $2 trillion is obviously a lot of money, but it is really hard to fathom what it means.

We all can understand hundreds and thousands. We have some sense of millions and billions, but trillions are almost beyond comprehension.

Let me share two useful examples of what a trillion means.

If you take $1,000 bills and stack them up until you get $1 million, you will have a stack of $1,000 bills 4 inches high.

But if you stack $1,000 bills until you get $1 trillion, then your stack of $1,000 bills will reach 67 miles high. Let me give you another example: 1 trillion seconds equals 318 centuries or 31,800 years.

Suffice it to say that $1 trillion is a staggering sum. A $2 trillion plus national debt threatens to destroy our hopes for future generations, so that we can live beyond our means.

That's why the deficit reduction plan envisioned by this amendment is essential. The amendment will require the Congress to zero our $200 billion deficit over 5 years. That will be done not by increasing taxes on working people. But by restraining spending by $40 billion each year over the next 5 years.

The President will be required to submit a budget to the Congress that meets those targets and the Congress will be prevented from appropriating more money than permitted by those budgets.

This plan will impose disciplines on the spending process and will require the Congress to make the tough and politically unpopular decisions that are necessary to move toward a balanced budget and ensure continued economic growth and jobs for our people. Let's vote for this amendment and begin that all important task.

Mr. LAUTENBERG. Mr. President, the Gramm-Rudman plan is supposed to force action. That is what its authors say. Force action on the deficit. Force action on our rising national debt, that we are asked to raise to more than $2 trillion. Force action on our Nation's No. 1 economic problem.

And action we need. We need to cut that deficit. We need to cut spending. We need to get our budget balanced. And we need strong medicine to do it.

The question is not whether to cut the deficit; the question is how to cut the deficit.

The Gramm-Rudman plan is not the way. It would transfer power from the Congress to the President. It would give unprecedented power to the same President who has sent to Congress four budgets that have hurt my State. It would strengthen the hand of a President who proposed less than what is needed for Superfund cleanup of toxic waste dumps, less for mass transit and education, and more money for the Pentagon than the generals can wisely spend. It would strengthen the hand of a President who has presided over a doubling of the national debt.

The Gramm-Rudman plan would set targets for lower and lower deficits, until we reached a balanced budget in fiscal year 1991. But let's say Congress met those targets. Let us say Congress was on track to a balanced budget. But let us say the President did not like the way Congress did its job. The President could veto our plan. In so doing, he could trigger indiscriminate, across-the-board cuts in selected portions of the budget. Social Security would be exempt, but also exempt would be billions in defense contracts. So would billions in farm programs. But, virtually the rest of the Government would be cut, across the board.

The sponsors of Gramm-Rudman tell us, let us agree to cut the Coast Guard. Let us dry dock some cutters. So what if we are outgunned already in the fight against drug traffic? So what if drugs are the scourge of our cities? We have to live with it. We have to cut.

They are telling us, let us cut the FAA. Let us cut the number of controllers. Let us cut air safety research. So what if planes fall out of the sky? So what if people die? We have to get by. We have to cut.

They are telling us let us cut Customs. Let us cut the Immigration Service. So what if our borders are a sieve? So what if more illegal aliens flood our Nation? We have to cut spending.

They're telling us, get those outlay savings where you can. If it means you have to cut slow-spending programs to the bone, so be it.

To get a 3-percent cut in outlays, they're telling us, cut 40 percent budget authority in compensatory education. So what if 2 million children do not learn how to read or to add? Our society will have to bear a little ignorance.

Cut 55 percent of spending authority for urban development action grants. So what if our cities die? Cut in half the spending authority for job training. So what if 330,000 people do not get training? So what if people hang out on street corners?

Mr. President, I ride each day from my apartment to the Capitol. And everyday, I pass people sleeping in the street, huddled over gratings. But, Gramm-Rudman says, we can't stop to help. This Nation has to drive by the homeless. We have no spare change. We have to cut spending.

Cut broadly. But force action.

Cut ruthlessly. But force action.

Cut indiscriminately. But force action.

I refuse. Inaction is unacceptable, Mr. President. But so is blind action.

We aren't here to sit on our hands. Nor are we here to flail at the deficit neither.

Voters told us to stop driving this Nation into hock. But they didn't tell us to sell our souls to get even.

We are here to make decisions. Not to avoid them.

We are here to guide budget policy. Not to put it on automatic pilot.

The problem with the so-called action forcing mechanism before us, is that it forces blind action.

It is about time we started to make the tough decisions around here. It is about time the administration started making them with us. It is about time that we bellied up to the bar, and paid for the Government our people need. It is about time we started cutting spending, where spending can be cut. And we have to realize that we cannot cut everywhere. But where we can cut we should.

The proposal gives us targets. That's fine. We need them.

But it forces action that I cannot accept. It yields authority to a President who has been less willing than even this Congress, to face up to the problem. Under his watch, the debt doubled in 4 years.

Congress can make the tough decisions. It can cut spending, how and where spending can be cut. It can raise taxes, to pay for spending we can and must have. But under the plan before us, Congress could do all that, and then the President could veto that package that Congress might pass, and trigger automatic spending cuts, and spending cuts alone. So, the plan gives away to the President powers placed by our Founding Fathers in the hands of the Congress.

I cannot accept that. And before we accept anything so far reaching, so damaging to our structure, we should stop and think about what we are doing.

That is why I voted for the Chiles alternative. It was a preferable alternative that would not abandon our power and our responsibility to the President. An alternative that would reach balanced budgets more wisely—spreading the burden fairly, by calling for contributions from defense, and from domestic programs that can best bear the cuts.

We need to get on the road to balanced budgets. We need to do it now. But, Gramm-Rudman is not the answer.

Mr. PELL. Mr. President, the Congress, I believe, can and should take strong and prompt action to reduce the huge Federal Government deficits that have developed during the 5 years of the Reagan administration.

For that reason I have voted in favor of the proposal by Senators CHILES and BYRD that would require elimination of the Federal budget deficit in stages over the next 5 years resulting in a balanced budget in 1991.

The continuing Federal deficits are sapping the economic strength of our Nation and threatening ultimately an economic collapse. The Chiles-Byrd plan is strong medicine. It would impose strict fiscal discipline. It would lead to elimination of the threatening Federal Government deficits.

The Chiles-Byrd plan, moreover, would effectively cure our deficit disease in a fair and balanced way, and without granting the office of the President broad new powers. This proposal would protect Social Security from any automatic cuts in either benefits or in cost-of-living adjustments. It would require that defense spending, which has increased so rapidly, share in any required spending cuts, and it would assure that revenue increases as well as spending cuts be considered as part of the effort to reduce the deficit.

Finally, the Chiles-Byrd plan would achieve effective deficit reduction without giving the Office of the President broad new powers. This proposal would retain in the Congress its constitutional power and responsibility for the Nation's fiscal policy and for national spending priorities.

While voting for the Chiles-Byrd plan I oppose the deficit reduction plan proposed by Senators GRAMM and RUDMAN. Although similar to the Chiles-Byrd plan, the Gramm-Rudman proposal has serious flaws. It would provide an unprecedented transfer of power from the Congress to the executive branch, and it relies entirely on spending cuts to reduce any excess deficit with no provision for revenue increases.

The Gramm-Rudman proposal would have virtually no impact on budget deficits for the next 2 years. When it finally did become effective, the Gramm-Rudman plan would give

the Office of the President excessive powers and stack the deck against fair and balanced deficit reduction and in favor of excessive and very steep cuts in high priority programs for health and education, and for the poor. For these reasons, I regretfully must oppose the Gramm-Rudman proposal.

Mr. KERRY. Mr. President, I want to be sure that when we consider programs for cuts, both in the regular budget process and in sequestering, everything will be considered equally—that the full budget, in all functions, including 050, will be weighed for reductions. In other words, all expenditures of the Department of Defense are within the definition of "relatively controllable" expenditures as used in this amendment. So, I ask my good friend from South Carolina for some points of clarification here.

Is the term "relatively controllable expenditures" as it is referenced, "to current OMB controllability reports" meant to convey that some elements of the defense budget are off the ledger and therefore not a part of the consideration for across-the-board reductions by a uniform percentage with other programs in sequestering.

Mr. HOLLINGS. Mr. President, I appreciate the interest of the Senator from Massachusetts on this. As he undoubtedly knows for purposes of congressional consideration in budget matters dealing with defense, the Congress normally looks at function 050 costs, that is, for all defense items not just for the DOD. Now a portion of the outlays in the national defense function for any fiscal year are tied to prior year budget authority, sometimes as far back as 10 years. The Congress does not spend a great deal of time reanalyzing the past history—though it does do that and often uses funds appropriated in the past for new programs and actions.

Mr. KERRY. Mr. President, if the Senator would clarify a point here, what would that mean for commitments on prior year contracts and obligations?

Mr. HOLLINGS. Mr. President, it means that prior year funding is often available for new purposes because it is no longer needed for many reasons, and I think the DOD is aware of this, and such funds will be subject to review and revision in this process. The Divad is a perfect example. I anticipate some of the Divad's funds to be available as I do the funds from DOD's inflation surplus identified by the GAO. These are examples, of some of the types of funds included in the prior year category. To make this point as clear as possible, the following language has been inserted into the amendment, the term "budgetary resources" means unobligated balances, reimbursements, receipts credited to an account, and recoveries of prior year obligations.

Mr. KERRY. Mr. President, and one final question, if the Senator would, will it be possible to consider Department of Defense unexpended balances as a way of meeting the defense reductions rather than annual budget authorizations?

Mr. HOLLINGS. Mr. President, I anticipate two things to be involved. First, go to the $300 billion in fiscal year 1986 that Congress has authorized which is the approximate total we will appropriate. I believe when the Congress looks at these new budget authority requests, it will for sure look in detail not only at the justifications for them but also at the unobligated balances of the DOD and prior year funds no longer needed.

Mr. KERRY. Mr. President, I thank the Senator for these clarifications, and I commend him for the leadership he has consistently taken to move this body to adopt a balanced budget.

Mr. HOLLINGS. Mr. President, I thank the Senator and commend him for his diligence in grasping the details of the budget process in such a short period of time.

Mr. MITCHELL. Mr. President, it is appropriate that the Senate is finally treating the Federal budget deficit with the urgency it demands. But although the end is desirable—indeed, necessary—the means originally sought to obtain it were highly inappropriate.

In order to understand fully the substance of the two amendments now before the Senate, it is necessary and important to understand the procedure used—and attempted—to reach this point.

Last Thursday, 7 days ago, the Gramm-Rudman proposal was laid down as an amendment to the debt limit bill. That proposal ostensibly provided for automatic deficit reductions over the next 5 years to reach a balanced budget in 1991.

No hearings had ever been held on it; no committee had ever examined it; no reliable information was available as to the economic assumptions on which it was based, the programs it would reach, or the discretion granted to either Congress or the President to make spending cuts. There was not even a printed version of the proposal for any Senator to read.

Yet shortly after the proposal was first introduced, before debate had even begun, the majority leader moved to cut off debate by filing a cloture petition. And on the same day, the majority leader demanded that the proposal be voted on within 24 hours.

A printed copy of the proposal was not made available until Sunday, 2 days after the majority leader had demanded a vote on it. The resulting confusion included, indeed was especially noticeable, among the sponsors of the proposal.

During the debate, the sponsors were questioned about the meaning of their proposal. They disagreed among themselves about several provisions of the proposal, including some major ones.

One maintained that the President was only given authority to cut spending across the board, not discretionary authority to pick and choose which programs to cut.

Another said that the President would have discretion to decide where and what to cut.

One sponsor said farm programs were included among the programs to be cut. Another said they were not.

The proposal provided for automatic reductions in spending programs and defines them by incorporating, by reference, a document published by the Office of Management and Budget [OMB]. That document—a 400-page computer printout—was not made available to Senators until Monday, 3 days after the majority leader had demanded a vote on the proposal.

The OMB document divides Federal programs into two categories: One, entitlements, which are programs that automatically spend out provided an individual or locality qualifies by virtue of statutory conditions; and two, nonentitlements, which are programs for which Congress decides the spending limit each year.

Under the Gramm-Rudman proposal, cuts would be automatically made only in the inflation adjustments—the so-called cost of living increases—of entitlement programs, not in the basic programs themselves. But in the second category of programs, the nonentitlement programs—also known as discretionary programs—the cuts would be made across the board in the programs themselves.

Thus, the proposal would reduce a program like food stamps only by the amount of the cost-of-living adjustment. On the other hand, it would require a flat percentage cut in programs such as education aid for the disadvantaged.

But, because farm programs are an entitlement with no inflation adjustor built into them, they would be exempt from any cuts under the Gramm-Rudman proposal.

The Gramm-Rudman proposal also exempts about 40 percent of the defense budget, on the basis that prior-year contracts cannot be subsequently cut. But since the other 60 percent of defense spending is not exempted, the proposal virtually dictates the strategic path the Nation must follow for 5 years.

That is the most irresponsible and unacceptable way to deal with our Nation's security. It means that large-scale weapons systems, built under long-term contracts, will continue unabated, while the immediate needs of

our Armed Forces—spending for ammunition, maintenance, repair, and all the other activities that sustain readiness and conventional force strength—will be cut.

That would be the culmination of a process already well underway, as more and more of our defense dollars are put into the nuclear basket, and the readiness of our conventional forces continues to be steadily and drastically undermined.

The Gramm-Rudman proposal places the national security and the defenses of this Nation on automatic pilot. It is something we should not do.

The Senate, because of these and other shortcomings in the proposal, refused to be stampeded into a vote with less than a day's consideration.

And subsequently, over 100 modifications have been made in the proposal. Some are improvements, such as the language which clarified the limits of the President's spending authority. But other shortcomings have not been corrected: Farm programs apparently remain exempt; 40 percent of the defense budget remains untouchable.

But one of the changes the sponsors made has more to do with politics than with deficit reduction. That is the provision that allows this year's deficit to rise and which delays any real cuts until after the November 1986 elections.

This is not the first time the Senate has been asked to vote immediately for a proposal which delays painful spending cuts for a future Congress or a future President.

The Gramm-Rudman proposal not only requires no action this year, it effectively delays action until after the 1986 elections. It permits an actual increase in spending of $21 billion for 1986, which is to say a deficit increase of $21 billion in 1986. It does this by providing that for this year—and this year alone—the deficit may be exceeded by 7 percent without triggering any spending cuts. Next year, a 5 percent leeway is permitted.

What that means is that the deficit for the fiscal year which began 8 days ago can rise to $193 billion, rather than being held at the $171 billion level contained in the budget resolution already approved by the Senate. It means that next year's projected deficit of $144 billion can actually go up to $151 billion without triggering any automatic cuts.

It is hard to see how a measure that permits increased deficits can be seriously offered as urgent deficit-cutting legislation for which normal legislative routine must be suspended.

I bow to no one in my concern about the deficit. But as the details of the Gramm-Rudman proposal become known, it is clear that there is much less there than meets the eye.

Not only does it permit a deficit increase in the current fiscal year—a questionable basis on which to begin cutting any budget—its definitions of spending programs allow up to $710 billion of this year's total spending of about $1 trillion to be exempted from cuts.

Under the proposal, for instance, no spending savings could come from prior-year defense contracts, even though Congress has made savings, and large savings, in such spending in recent years. For example, in the 1984 defense bill, Congress managed to find a total of $785 million in savings from prior-year contracts. In 1985, Congress found $771 million in such savings. In the current year's defense budget, Congress has already discovered and will make savings of $212 million in such spending.

These are not ephemeral spending cuts in estimates of future costs; these are hard savings in actual payable defense contracts.

Under the Gramm-Rudman proposal, such savings could not be made.

The proposal predicates spending cuts on the assumption that all programs spend their allocated funds at an even rate. But that is manifestly not the case.

Programs spend their allocated funds at different rates depending entirely on the nature of the program. The minority staff of the Senate Budget Committee has estimated that under the Gramm-Rudman so-called across the board cut, some programs would be slashed by a third and more; others would be virtually exempted altogether. And the cuts would not be across the board; they would be wildly erratic.

A Congressional Budget Office review, for example, estimates that the proposal would require almost total elimination of the water treatment funds provided by the Environmental Protection Agency, as well as Veterans' Administration hospital construction.

At the same time, programs such as farm price supports would remain untouched. Farm programs are important. But the Gramm-Rudman proposal apparently would exempt almost all of them from cuts while virtually eliminating programs of equal importance to others in our society, such as veterans.

If there is one thing that has become clear in the past year, it is that reducing the deficit will require all sectors of the economy to bear a fair share of the burden. We cannot and should not adopt a proposal that indiscriminately preserves some spending and slashes other spending without reason. That is not Government. It is an abdication of responsibility.

The President, who has endorsed the proposal, on Saturday made it clear that he does not expect it to affect the defense budget. The President allowed himself something he called a personal caveat on defense spending, and pledged that next year he would propose defense spending higher than this year's figure, regardless of the Gramm-Rudman proposal.

Yet that is not what the sponsors of the Gramm-Rudman proposal say. They insist that 60 percent of the defense budget would be cut along with domestic programs.

Who is right?

More importantly, next year, when the President's budget comes to us, will it include the cuts in defense that are essential, along with domestic cuts, if we are serious about reducing the deficit?

I agree with the goal of reducing spending. Two years ago, and last year, I voted for budget freezes that would have sharply curtailed spending in all categories. This year I voted for a budget package that would have made a greater cut than that which was finally approved.

And I remain willing and ready to vote for a realistic proposal that will help reduce spending in the future. But a proposal which rests entirely on the promise of drastic cuts in the future, after November 1986, after yet another election has taken place, is neither serious nor defensible.

The budget problem we face is a problem now. It will be a greater problem after next November unless we are willing to act now. That was a prediction made last year, when a sizable majority of us sought to freeze all spending. That prediction has come true for this year, and the prediction I am now making will be no less true in 1987.

It is misleading to make the claim that this highly complex and unpredictable proposal holds the only key to reducing the deficit. That is simply not the case.

The proposal offered by Senator CHILES would balance the budget within a shorter time frame, eliminating the election-year failure of will so obvious in the Gramm-Rudman approach, and it does so without the questionable loopholes of that approach.

The Chiles proposal would not exempt 40 percent of defense spending from all scrutiny. It would spread the potential for cuts across the entire scope of defense spending, leaving room for rational strategic management of our defenses and permitting room for a safety valve for critical programs.

The Chiles approach would require about half the amount of spending reductions in domestic programs. It would permit the reductions in those programs to be concentrated in the cost of living adjustments rather than forcing both those and actual programs themselves to be slashed.

Most important, because it would apply to the total budget authority for all domestic programs—not just to the rate at which program funds are spent—it would not force the kind of erratic hit-and-miss slash-and-save cuts that Gramm-Rudman virtually requires. We would not face a choice between eliminating all our veterans hospital construction and making a smaller reduction in the Drug Enforcement Agency. If cuts were needed, it would reduce both equally.

Not only would the Chiles approach make for more rational management of Government operations, it would bring us to a balanced budget a full year earlier. That is because it does not contain the phony statistically substantial trigger in the Gramm-Rudman proposal.

Gramm-Rudman, like so many other future budget cuts, promises real pain and real sacrifice—down the road. It masquerades under a veneer of tough-minded objectivity, but there is a lot less there than meets the eye. Because the fine print permits a deficit increase so long as it is not statistically significant, this fiscal year's deficit of $171 billion can rise by up to 7 percent, to $193 billion, without triggering any automatic cuts.

Next year's statistically significant increase would allow next year's projected $144 billion deficit to rise to $151 billion before any cuts are triggered. That may take us safely through the November elections, as it is clearly designed to do. But it is not tough-minded. It is not budget cutting.

It cannot be too often repeated that reducing an existing deficit can only be done by reducing it now, not sometime down the road when it suits everyone better. Making choices means making real choices, not implying that in the future no really hard choices will have to be faced.

The Chiles alternative is not an easy approach. It would require hard and unpleasant choices among competing priorities. It would force difficult decisions. But it would not permit enormous areas of the budget to remain off-limits to reductions.

We cannot put off the difficult choices for yet another 15 months. We cannot rule large segments of the budget off-limits.

I believe the Chiles approach is both more sensible and more workable than the Gramm approach, and I am, accordingly, going to vote for it.

Mr. HEINZ. Mr. President, today the Senate is considering legislation which would raise our debt ceiling above $2 trillion dollars. That $2 trillion represents the total debt that the Government of the United States has accumulated since its birth more than 200 years ago. The most frightening aspect of our $2 trillion debt, however, is that fully half of it has been accumulated in the last 5 years.

The source of our burgeoning debt is no mystery, Mr. President. It is the direct result of our failure to reduce $200 billion annual budget deficits.

I take the floor today to put my colleagues on notice that I will not support legislation to increase the debt ceiling unless it is coupled with a program which will require us to restore fiscal discipline to our budgetary process and which will require us to get deficits down to zero by the end of this decade. I am adamant on this point, Mr. President, because I am convinced that this is our last clear chance to restore some semblance of balance to the Federal budget and escape from an ever-tightening noose of debt, a noose which, once fully tightened, will choke off growth and opportunity for the next generation of Americans.

I want to take a few minutes to explain why I find the current fiscal emergency so deeply troubling. We are living on borrowed money and borrowed time. The interest we pay to service our debt is the fastest growing element of the budget—by far. It is a shocking fact that more than half of the income taxes we collect from individuals go to interest payments. It is clear to anyone who has ever run a business or kept a family budget that this state of affairs cannot continue indefinitely.

There are some who argue that deficits do not matter and that adding $1 trillion to our national debt every 5 years is not cause for concern. They support their argument by pointing to current economic conditions—the economy has been performing remarkably well since the latter part of 1982. What this blindly optimistic view of fiscal unreality fails to account for is the inevitability of the consequences of living beyond our means: recession or runaway inflation. Throughout our history, American's economy has gone through relatively predictable expansion and retraction cycles, and there is no reason to expect this cyclical behavior to change. The current economic expansion has already exceeded the average postwar recovery period. It may go on for another year or even two—and I hope it does—but the hard truth is that a recession will come. If we go into a recession with deficits as high as they are now, it is not unrealistic to anticipate that Federal deficits would climb as high as $400 to $600 billion a year, carrying with them the risk of a total financial collapse.

The signs of the damage already inflicted upon our economy by high deficits are visible to anyone who cares to look. Financing our huge debt requires that Government compete with the private sector for available capital. The competition drives up the price of capital, as reflected by continued high real interest rates. As investment capital becomes more expensive and more scarce, there are disastrous consequences for the modernization of America's industrial base and for the support of entreprenurial ventures that will form the basis of our future economic strength and security. The replacement, now underway, of high value added industry by low valued added industry necessarily undermines U.S. economic strength. The wealth and power of this Nation or any nation ultimately rests on the power of production, not on consumption.

High interest rates contribute to the extraordinary and artificial strength of the U.S. dollar. An artificially high dollar makes U.S. goods relatively more expensive than foreign goods. Therefore, the Federal deficit is directly responsible for a substantial portion of our colossal—and growing—trade deficit.

Ultimately, Mr. President, we will address the deficit. My concern is that failure to do it now will lead us to do it in a way which, together with a recession, could cause hyperinflation.

Just recently, the five major industrial nations met to address the economic dislocations caused by the dollar's artificial strength. The short run solution agreed upon was to "intervene" in the international monetary market—a euphemism for flooding the market with dollars. Such flooding is designed to reduce the strength of the dollar, not by addressing the underlying problems which prop it up—namely, strong demand caused by the high interest rates generated by massive Federal deficits—but rather by meeting that demand with an increased supply of dollars. In the short term this may be a justifiable expedient, but in the long term it can mean only one thing, and that is inflation.

Absent significant, coordinated efforts to improve the health of other developed economies, I urge my colleagues to recognize the fact that this move is a harbinger of desperate future efforts to monetize the debt. If a new recession causes deficits to double or triple—and I think that scenario is probable—we could well face irresistible pressure to monetize the debt, to meet the soaring demand for debt capital by printing dollars. Once we start down that road, Mr. President, it will be nearly impossible to turn back.

One example should suffice to demonstrate the damage that massive economic dislocation can cause, and that is the example of Germany in the 1920's and 1930's where hyperinflation coupled with depression destroyed the Weimar Republic with catastrophic consequences. I do not intend to compare our current situation with the situation that existed in post-World War I Germany, but I do think it is instructive to look at the possible consequences of serious economic upheaval.

Earlier this year, as my colleagues well know, the Senate passed a budget package which would have substantially reduced deficits. I supported that package, not because I thought it was perfect, indeed it has serious flaws, but because I believe that politics involves practicing the art of the possible. And the plan the Senate initially adopted was the best one possible under the circumstances. Ultimately, it became clear that the Senate plan was doomed due to opposition in the House of Representatives and in the White House. So the Senate tried again with a plan which would have frozen Defense spending and entitlement programs, cut discretionary spending and raised some revenue. It did an even better job on reducing the deficit. Again, the plan was shot down. Finally, the Senate, with palpable frustration, agreed to a watered down version of its original plan. It became clear to many of us, at that point, that the process had broken down and that significant institutional reform was necessary if we were ever to address our Nation's number one domestic problem.

It should be a matter of profound concern to all of us that a failure of political will has brought us to the point where we must reform the budget process in order to force ourselves to act. It is like the killer saying, "Stop me before I kill again." Although this is not the preferred method of legislating, the fact is that we have run out of options.

Several Senators, and I am one of them, have decided that the debt ceiling extension will not pass without significant budget reform, reform that will give us a balanced budget by the end of the decade. In the end we will extend the debt ceiling because we must honor the debts we have authorized. But before we extend it, we should call in all the government issued credit cards.

As we work toward agreement on a major reform package, I want to note that I am pleased with the general consensus that Social Security should be removed from the budget process. Historically, Social Security has not been part of the budget. It was brought into the budget by President Johnson so that surpluses in the Social Security trust fund could mask spending on the Vietnam War. Today, Social Security surpluses continue to mask the true size of the Federal deficit. It is time we took that mask off.

Social Security pays for itself, and since the Government invests trust fund surpluses in Government debt securities, any reductions in cost-of-living benefits increase not only the size of the Social Security surplus but also the long term liability of the Federal Government to the Social Security trust fund. Any deficit reduction claimed as a result of Social Security COLA freezes is purely illusory.

In sum, Mr. President, I will not vote to increase the debt ceiling unless we couple that increase with a budget reform package which will force us to act and which recognizes that Social Security is not part of the problem. Nor will I support extraneous amendments to the debt ceiling which do not address the central issue of the Federal deficit. We simply cannot stand idly by and allow a crushing debt to wreck the greatest economy the world has ever seen. Any action we take to eliminate deficits will necessarily inflict some pain—and we have a responsibility to make sure that the burden is distributed as fairly as possible—but failure to act will cause economic disaster before this decade is out. I urge my colleagues to join me in this commitment to all Americans and to America's posterity.

Mr. CHILES. Mr. President, in the face of a $2 trillion national debt, Congress has taken the initiative again to get the White House to reduce Federal deficits. Every time we offered stronger plans in the past to reduce the flow of red-ink, the White House resisted.

The Gramm-Rudman plan is a clear statement of congressional impatience with the administration. But while the plan is built on good intentions, it is seriously flawed.

A recent editorial in the Baltimore Sun described the most troubling features of Gramm-Rudman. The article quotes Senator J. BENNETT JOHNSTON calling the proposal "legislative Armageddon."

It is a legitimate warning. As Senator JOHNSTON has correctly observed, it involves an enormous displacement of constitutional power, shifting it away from the Congress and over to the President.

That bothers me on two counts. First, the Constitution gave Congress financial powers, and we have no business giving them away. Second, Gramm-Rudman would be giving still more power to a President who has run up deficits doubling the national debt to $2 trillion in just 5 years.

Mr. President, Senator JOHNSTON is one of the Nation's stalwart champions of a strong national defense. And as a member of the Senate Budget Committee he has been tireless and demanding in the pressure he has applied to get the White House to accept deeper cuts in the deficit. While Gramm-Rudman got headlines, Senator JOHNSTON was a principal architect of a deficit-reduction plan that would have balanced the budget 1 year sooner. And the plan would have reduced the deficit $10 billion this year, while Gramm-Rudman raised it by $23 billion.

I commend the Baltimore Sun editorial to my colleagues and ask unanimous consent to have it printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Baltimore Sun, Oct. 8, 1985]

BUDGET BALANCING ACT

As the fiscal new year begins under the gun of an inescapable need to raise the national debt limit past the $2 trillion mark, Congress and the Reagan White House are in a state of contrived political panic and in search of a panacea.

The panacea of the moment—a proposal to mandate a balancing of the federal budget by fiscal 1991—has been described by Senator J. Bennett Johnston of Louisiana as a "legislative Armageddon." Norman J. Ornstein, a political scientist at the American Enterprise Institute, says it would have Congress concede a substantial share of its power to the presidency and alter the relationship between the branches of government.

Yet Congress is so transfixed by fear of the voters' wrath that it is rushing to do just what President Reagan wants, even though Mr. Reagan bears great responsibility for sky-high deficits. If the plan is passed in anything near its present form, Senator Johnston thinks it would give the president "total power over appropriations"—what gets funded and what does not. He doubts it could pass constitutional muster. So do we.

The budget-balancing plan sponsored by Senators Phil Gramm, Warren Rudman and Ernest Hollings supposedly would have federal budget ceilings set on a declining line to reach zero by fiscal 1991. The president and Congress would be expected to stay under these ceilings. But if Congress fails to do so, the president could "sequester" funds and cut spending "across the board." If, for example, Medicare has to be reduced 7 percent, a president presumably would have the power to say which parts of Medicare would be cut and if any specific programs are to be terminated.

Then there is the problem of exemptions. Payments on the national debt are excluded, as they must be. But so is Social Security, even though rising cost-of-living adjustments are bleeding the Treasury. Draconian cuts would have to be made in the remaining 60 percent of the budget.

Another troubling feature is the authority that would be conferred on the Office of Management and Budget, a creature of the White House. It could go high or low, depending on which economists it chooses to listen to, and therefore could position a president to work his will on Congress.

It is easy for politicians who have had a hand in doubling the national debt to give lip service to the idea of a balanced budget. It is quite another thing for them to inflict pain by raising taxes or crunching federal activities. There is just no assurance that a bid to solve these sensitive political problems by a mechanical formula will work.

The budget process is in such a mess, at both ends of Pennsylvania Avenue, that attention to the deficit is an appropriate start for the new fiscal year. Congress ought to know what it is doing, however, before it cedes to the executive branch its constitutional power of the purse.

Mr. CHAFEE. Mr. President, shortly the Senate will vote on whether or not to increase the public debt limit from

$1.8 trillion to over $2 trillion. Every time we vote to raise the debt limit by another staggering amount, we are acknowledging our failure to set this Nation on a path toward fiscal balance. We are failing the American people unless we come to grips with this problem.

Total debt in the American economy has risen by over 20 percent each year for the past 3 years—twice the rate during past recoveries. Every sector of the economy is contributing to the debt, with the growth of Federal borrowing leading the way. Our Nation is borrowing 1 out of every 4 dollars we spend. We are now spending $143 billion—13 percent of total Federal expenditures—just to pay for the interest—not the principal, just the interest—on the national debt. Unless we do something, in 1988 interest will require 20 percent of our taxes, and upward if the deficits—currently at $200 billion—continue.

This is not the legacy we should leave our children. But the Federal deficit is not simply a matter for our children to deal with. It threatens each American, here and now. Large deficits threaten our economic recovery. They make it difficult for manufacturers to compete in world markets. They hinder industrial expansion. And, most importantly, they mean fewer jobs for American workers.

The deficit crisis compels action—strong, immediate action—by the President and Congress to bring Federal spending under control. Despite our attempts to resolve the deficit problem during this year's budget process, it is clear that a new framework is needed to assure that measures will be taken to set the deficit on a downward path.

There is no formula for reducing Federal spending which would please everyone. But it we continue to delay taking action, every American stands to lose. If the deficit continues, inflation will surely rise, interest rates will go up and the essentials of life—food, clothing, and shelter—will increase in cost beyond what any government program could protect. This would be a bleak future indeed.

I support the bipartisan Gramm-Rudman-Hollings amendment because it establishes a clear and balanced blueprint for resolving the deficit problem. It will set binding targets for the President and Congress to reduce Federal spending over the next 5 years. As we endeavor to meet these targets, it is my hope that savings will not be made at the expense of high priority domestic programs. I intend to work diligently, as I did during this year's budget process, to assure that programs serving needy Americans, such as Medicaid; maternal and child health; the Women, Infants, and Children's Nutrition Program; Head Start; chapter 1; education of the handicapped; and others—do not bear the brunt of efforts to reduce the deficit.

If the deficit reduction targets are not achieved, an automatic sequestering procedure is set forth which requires across-the-board spending reductions for all programs, except for social security. Both military and domestic spending must contribute to these savings.

It is my hope that such a sequestering process will not be necessary. But the deficit crisis is an extraordinary situation, with deeply troubling consequences for our economy. It requires an extraordinary solution. This amendment offers us a solution, and I believe it would be irresponsible for us to ignore it today.

The passage of this bipartisan amendment offers us a magnificent opportunity to assure that our children and future generations will continue to find productive jobs; and buy homes. It will help to assure that small businesses will be able to expand and remain competitive, and that the purchasing power of American families will not be eroded by inflation.

Mr. RIEGLE. Mr. President, the Gramm proposal is seriously flawed and poses grave dangers to vital areas of the fundamental constitutional separation of powers between the legislative and executive branches.

This proposal came to the Senate floor without committee hearings or any detailed analysis of its intended and likely effects. It was presented in such a way as to stampede the Senate into acting without sufficient deliberation, and unfortunately, that is exactly what has happened.

I believe it is inherently unworkable in its present form and poses serious dangers to the economy and the American people if implemented as designed.

The Democratic leadership deficit reduction alternative, which I helped design and supported, would have corrected many of the defects in the Gramm proposal and would have given our Nation a fairer and stronger deficit reduction discipline.

It is my hope that the House of Representatives will have the time and strength to substanitially overhaul the Gramm proposal. That is not an easy task given the way this sweeping proposal has been wedged into the emergency debt limit extention legislation.

Few measures, if passed, are so vast that they completely reorganize fundamental balance of power relationships at the Federal level. This legislation does so in ways that are both known and unknown.

If this legislation eventually becomes law in its present form, I predict that our Nation will eventually come to view the passage of this proposal as a monumental error that we will long regret.

I ask unanimous consent to have printed an important analysis of the Gramm proposal prepared by the Democratic Study Group of the House of Representatives.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

(Special Report of the Democratic Study Group of the House of Representatives, October 6, 1985)

THE GRAMM-RUDMAN PROPOSAL

This Special Report deals with the Gramm-Rudman "Emergency Deficit Control Act" which is being offered as an amendment to the debt limit increase now pending in the Senate. The Gramm-Rudman proposal would make more sweeping changes in federal budget procedures than were made by the Budget Act of 1974 which created the current system.

Analysis of the proposal indicates that it has major problems and shortcomings. For example, the proposal could cause severe damage to the economy, disrupt vital government services, and encourage political brinkmanship. It also would increase powers of the President and congressional budget committees, and is riddled with inequities and ambiguities.

Despite these problems and despite assurances by Democratic leaders that the measure would be given prompt consideration, Republicans have refused to consider a short-term increase in the debt ceiling to provide time for proper consideration of Gramm-Rudman and correction of its deficiencies.

SECTION I—BACKGROUND AND SUMMARY

The preceding page is a reproduction of the cover of the Congressional Quarterly Weekly Report published immediately following House approval of the Gramm-Latta II budget reconciliation measure in 1981. The Congressional Quarterly cover—a sampling of actual pages from the 860-page document passed by the House—was designed to dramatize the reckless haste in which the measure was rammed through the House virtually sight unseen by a coalition consisting of all but two Republicans and 29 conservative Democrats.

The parallels between Gramm-Latta II and the Gramm-Rudman proposal are striking:

Like Gramm-Latta II, Gramm-Rudman has been sprung out of nowhere at the last minute;

Like Gramm-Latta II, Gramm-Rudman has not been subject to committee scrutiny in either the House or Senate;

Like Gramm-Latta II, Gramm-Rudman is a sweeping measure with far-reaching ramifications, both intended and unintended;

Like Gramm-Latta II, Gramm-Rudman appears to be riddled with problems;

Like Gramm-Latta II which Congress has spent the last four years straightening out, enactment of Gramm-Rudman in its present state will keep Congress and the federal courts busy for the next four years; and

Like Gramm-Latta II, the Republicans are adamantly refusing to allow time for Members and committees to study Gramm-Rudman, insisting instead that it be enacted immediately as is—even through this time the problems are apparent in advance.

With respect to the last point, Democrats have suggested enactment of a short-term extension in the debt limit to allow time to study Gramm-Rudman and correct some of

its shortcomings. Senate Republican Leader Dole has rejected such a course of action with a revealing comment:

"The longer something hangs around here, the staler it gets . . . People start reading it."

SUMMARY

Following are some of the main findings of DSG's analysis of the Gramm-Rudman proposal:

If the state of the economy deteriorates, the Gramm-Rudman measure could require deficit reductions which would be virtually impossible to achieve without creating economic and budgetary havoc.

The plan makes little allowance for deficit increases resulting from adverse economic conditions, and could set off a vicious cycle whereby an economic downturn leads to a deficit increase which must be eliminated through spending cuts or tax increases which, in turn, make the economic downturn worse.

Gramm-Rudman would clearly require massive spending cuts or tax increases in the first year of a recovery, probably sending the economy back into recession.

If the automatic spending cuts go into effect, they could seriously disrupt basic government functions such as law enforcement, courts and prisons, the IRS, and air traffic control. The cuts could also seriously disrupt; military readiness, by making large reductions in spending for personnel and operations and maintenance.

The measure as presently drafted is riddled with ambiguities and unanswered questions—for example, which programs would be subject to the automatic COLA cuts, how much latitude would the President have in discretionary spending, and does the measure actually create points of order which may only be waived by joint resolution passed by both chambers and signed by the President.

The proposal increases the powers of the President over budgetary matters. In practice the Administration would have broad discretion to determine whether or not the automatic spending cuts would be triggered, and would also probably have considerable discretion in determining what specific items would be cut.

The bill also strengthens the powers of the Budget Committee, and reduces the flexibility of other committees in meeting the budget resolution targets. Among other things, the bill seems to give the Budget Committees jurisdiction to report substantive tax and spending legislation under certain conditions.

SECTION II—DESCRIPTION OF THE PROPOSAL

[Note: The Gramm-Rudman proposal contains a number of ambiguities, and key provisions of the proposal make use of terms which do not have any precise meaning. Analysis of this legislation is made even more difficult by the fact that the measure has not been considered by any committee, and hence there is neither a hearing record nor a committee report available for guidance. The discussion in this section is based on what seems to be a reasonable interpretation of the proposal, and is generally consistent with the statements made by its sponsors.]

This section describes the basic provisions of the Gramm-Rudman "Balanced Budget and Emergency Deficit Control Act" which has been offered in the Senate as an amendment to the debt limit extension measure (H.J. Res. 372).

The Gramm-Rudman plan establishes maximum limits on the budget deficit for each of the next several years, ending with a balanced budget in FY 1991. Under the plan, neither the President's budget nor the congressional budget resolution would be permitted to exceed the maximum deficit limits, and strengthened enforcement procedures would be established to make sure that the budget resolution targets are followed in detail.

In addition, the plan requires the Office of Management and Budget (OMB) and the Congressional Budget Office (CBO) to make an estimate of the deficit at the start of each fiscal year, based on congressional action and economic conditions. If the estimated deficit exceeds the maximum permissible level, the President would be required to make proportional reductions in spending for certain categories of programs in order to eliminate any "excess" deficit.

The Gramm-Rudman proposal has undergone several revisions since it was first introduced 10 days ago. The following description is based on the modified version of the measure printed in the Congressional Record of Friday, October 4 (amendment number 730, as modified, offered by Senator Dole on behalf of Senators Gramm and Rudman and others—see pages S 12622-12626.)

MAXIMUM DEFICIT LIMITS

The limits on the maximum amount of the federal budget deficit established by the Gramm-Rudman proposal start at $180 billion for fiscal year 1986 (an amount roughly $8 billion above the target specified in the fiscal year 1986 budget resolution) and gradually decline in equal increments of $36 billion per year until a balanced budget is reached in fiscal year 1991. The annual limits are as follows:

[In billions]

Fiscal year:	
1986	$180
1987	144
1988	108
1989	72
1990	36
1991	0

PRESIDENTIAL BUDGET

Under the Gramm-Rudman plan, the President would be required to adhere to the maximum deficit limits in formulating his annual budget proposal to Congress, and would be prohibited from sending Congress a budget which calls for deficits that exceed these limits.

CONGRESSIONAL BUDGET PROCESS

The Gramm-Rudman plan makes a number of changes in the congressional budget process designed to ensure that the budget resolutions meet the maximum deficit limits and to make the spending and revenue targets in these budget resolutions binding. Generally, these changes in the budget process would be effective for the period fiscal year 1986 through fiscal year 1990.

Budget Resolutions

The Gramm-Rudman deficit control plan stipulates that it would not be in order for the House or the Senate to consider any budget resolution which provides for a deficit in excess of the maximum limits. The plan further specifies that it would not be in order to consider any amendment to a budget resolution which would increase the deficit. Thus, any amendments to a budget resolution would have to be "deficit neutral," providing sufficient spending cuts or revenue increases to offset any spending increases or revenue reductions. As under present law, the House and Senate Budget Committees would be required to report their budget resolutions no later than April 15, and Congress would be required to complete action on a conference report on the budget resolution no later than May 15.

In addition to the matters normally included in budget resolutions, Gramm-Rudman requires the Budget Committee to use their authority under the so-called "elastic clause" of the Budget Act to include "any other procedure" which is appropriate to carry out the purposes of the Budget Act (as amended by Gramm-Rudman).

Reconciliation

The Gramm-Rudman plan also requires the budget resolution to include any reconciliation instructions necessary to ensure that the spending and revenue targets in the resolution are met. The plan also adds a new requirement that the House and Senate complete action on reconciliation legislation within 30 days of the adoption of the conference report on the budget resolution (i.e., by June 15), creating a very ambitious timetable for the reconciliation process. It would not be in order to offer any amendments to the reconciliation bill which would increase the deficit.

Binding Subcommittee Allocations

Further, the Gramm-Rudman plan makes the budget resolution targets binding down to the subcommittee level. As under present procedures, the conference report on the budget resolution would allocate the spending totals in the resolution among the various House and Senate committees. The committees would then be required to subdivide these allocations among their various subcommittees, as they are presently required to do. The Gramm-Rudman measure adds a requirement that these subdivisions (known as "302(b) allocations" after the relevant section of the 1974 Budget Act) must be reported within 10 days after adoption of the conference report on the resolution.

Moreover, Gramm-Rudman makes these subcommittee allocations binding, specifying that it would not be in order to consider any spending bills which violate these allocations in terms of budget authority or outlays. At present, the "302(b)" allocations are not binding (except in very limited circumstances) and serve primarily as yardsticks for measuring whether or not spending bills are consistent with the budget.

Making the 302(b) allocations binding in terms of both budget authority and outlays greatly increases the weight given to the various programmatic assumptions in the budget resolution and reduces the flexibility of the Appropriations Committees and other committees to make decisions regarding spending for particular programs.

Deferred Enrollment

Gramm-Rudman requires deferred enrollment of appropriations bills and all other spending bills until the reconciliation bill required by the budget resolution has been enacted. This deferred enrollment procedure means that such bills would be "held at the desk" after passage by the House and the Senate, rather than being sent on to the President for signature, until the reconciliation measure has been enacted.

Binding Aggregate Targets

The Gramm-Rudman plan also makes the aggregate figures for spending, revenues, and deficits in a budget resolution binding on Congress as soon as the conference report on the budget resolution has been adopted. Under this provision, it would not

be in order to consider any spending measure which would cause the aggregate target for spending or deficits to be breached, regardless of whether or not the particular spending measure in question was within its individual spending allocation. Under present procedures, the aggregate targets in the budget resolution do not become binding until October 1, and points of order may only be raised against measures which breach both the aggregate ceilings and their individual allocations.

No Second Budget Resolution

Finally, the Gramm-Rudman plan abolishes the requirement for a second budget resolution. In recent years, Congress has not formally adopted such second resolutions, but has instead operated under automatic procedures which allow the first budget resolution to serve as a second budget resolution as well.

Prohibition on Waiving Points of Order

It should also be noted that the Gramm-Rudman legislation attempts to create extraordinary obstacles to waivers of the various restrictions it would impose by specifying that its provisions may only be waived, amended, or modified by a joint resolution addressed solely to that subject.

This language suggests that the points of order created by Gramm-Rudman (against consideration of appropriations bills which breach the 302(b) allocations for either budget authority or outlays, for example) cannot be waived through normal procedures such as unanimous consent, a two-thirds majority vote to suspend the rules, or adoption of a rule reported by the House Rules Committee, but instead may only be waived through specific legislation passed by both the House and Senate and approved by the President. The practical effect of this provision is unclear, however, since it may not be legally possible (or constitutionally permissible) to enact legislation which supersedes the constitutional authority of each House of Congress to make its own rules.

AUTOMATIC SPENDING REDUCTIONS

The Gramm-Rudman plan also establishes a new procedure requiring automatic spending reductions if it appears likely that the projected budget deficit for that year will exceed the maximum permissible amounts specified by the budget resolution.

This procedure is triggered by estimates of the deficit made by OMB and CBO. Specifically, the two agencies would be required to report on October 1 of each year (November 1 in the case of 1985) on their projections for economic growth and budget deficits for the fiscal year just begun. If OMB and CBO disagree on their projections, an average of the two would be used.

If the projected deficits exceed the maximum permissible levels by more than 5% (7% in the case of FY 1986), the President would be required to issue an order, within 14 days of receiving the OMB-CBO report, reducing spending by an amount sufficient to bring the deficit under the specified ceiling. In making these reductions, the President would be required to follow the formula set forth in the Gramm-Rudman plan. Under this formula, half of the necessary reductions would come from reduction or elimination of "automatic spending increases" and the other half would come from proportional reductions in discretionary spending (through a process referred to as "sequestering" in the proposal). The Gramm-Rudman proposal explicitly exempts Social Security (including retirement, survivors, and disability benefits) from these cutbacks.

Reductions in "Automatic Spending Increases"

It is not entirely clear what programs would be subject to the curtailment of "automatic spending increases." The legislation indicates that the cutbacks would apply to "all federal programs indexed directly or indirectly," but the meaning of this term is ambiguous. Clearly, all programs with formal cost-of-living adjustments (COLAs) would be subject to these reductions (excepting Social Security, which is specifically exempted). Programs with COLAs include civilian and military retirement, Railroad Retirement, Supplemental Security Income, Veterans Pensions, and child nutrition. Other programs which might or might not be covered, depending on how the legislation is interpreted, include Food Stamps, Veterans Compensation, Medicare, and Black Lung disability benefits, among others. (See Section IV for a more complete description of questions regarding coverage of this provision.)

Under Gramm-Rudman, cutbacks in these programs would be limited to curtailment or elimination of COLAs and other automatic spending increases. It would not be permissible to reduce the current level of benefits or to reduce increases in spending which result from increases in the number of eligible beneficiaries. If the savings resulting from elimination of automatic increases are insufficient to meet the goal of reducing one half of the excess deficit, then the remaining deficit reduction required would be achieved through additional cutbacks in discretionary spending.

REDUCTIONS IN DISCRETIONARY SPENDING

The requirement for reductions ("sequestering") in discretionary spending would be applied to all expenditures which OMB classifies as "relatively controllable." This category essentially represents expenditures which can be controlled through the appropriations process, and excludes spending mandated by permanent law (i.e., entitlements) or outlays resulting from the spending of appropriations enacted in prior years. The Gramm-Rudman legislation appears to require across-the-board, proportional reductions in all such "controllable" outlays sufficient to reduce the deficit by the required amount. In practice, these outlay reductions would presumably be achieved by making corresponding proportional cuts in new budget authority (appropriations).

The proposal requires that all such spending reductions be proportional. It is not clear, however, at what level of detail these proportional cuts would be applied, and how much discretion the President would have to reallocate spending within particular categories. The Gramm-Rudman proposal itself refers only to reducing "each relatively controllable expenditure by a uniform percentage." The term "expenditure" does not have any precise meaning. It could refer to anything from an agency or department to a specific project.

Sponsors of Gramm-Rudman have stated that the equal percentage reductions would be made at the level of individual appropriations accounts. It should be understood, however, that these accounts often encompass a broad range of items and activities, and may encompass expenditures totaling several billions of dollars. Examples of broad appropriations accounts include "Operations and Maintenance—Army;" Military Construction—Navy;" "Bureau of Reclamation—Construction Program;" and "Training and Employment Services" (encompassing all programs under the Job Training Partnership Act.). It seems likely that the President would have broad powers to alter spending within these accounts—increasing some items and reducing others—as long as the proper percentage reduction was made in the account as a whole. The Gramm-Rudman proposal does stipulate, however, that the President could not use his new authority to eliminate any program, project, or activity.

ALTERNATIVE PLANS

The Gramm-Rudman measure permits the President to propose an alternative plan for reducing the deficit down to the maximum permissible level, but he still must issue his automatic spending reduction order, pending congressional action on this alternative.

Under Gramm-Rudman, the House and Senate budget committees would be permitted to report legislation superseding the President's automatic spending reduction order and reducing the deficit to the maximum permissible level through alternate means. Such legislation would have to be reported by the Budget Committee within 10 days after the President issues his automatic spending reduction order, and would have to be adequate to eliminate any deficit in excess of the ceiling.

This provision of Gramm-Rudman appears to give the Budget Committees authority to report substantive tax, appropriations, and entitlement legislation in order to meet the deficit reduction targets. This legislation would be privileged, and thus could be brought to the Floor without a rule. No amendments would be in order which would increase the deficit above the maximum permissible levels. The proposal does not specify a firm deadline for passage of this legislation, as long as it is reported in a timely manner.

Special Procedures in Recession Years

Gramm-Rudman provides for special procedures for recession years, which would be defined as any fiscal year for which OMB and CBO project negative economic growth. Under such conditions, the President would have 30 days to issue any automatic spending reduction order which might be required to bring the deficit under the maximum limits. During this period, the President would be permitted to propose legislation achieving the required deficit reductions through alternate means or suspending the requirements of the Gramm-Rudman legislation in whole or in part. Such an alternative would then be considered by Congress under expedited procedures.

If no such alternative is proposed by the President, or if the alternative has not been enacted within the 30-day period, the President would be required to issue his automatic spending reduction order no later than 30 days after receiving the deficit estimate from OMB and CBO. The President would be free to issue such an order sooner, despite the existence of a recession.

No Adjustments For Subsequent Changes

The Gramm-Rudman plan does not appear to provide for the suspension of the automatic spending reduction provisions in situations where the deficit might subsequently prove to be lower than the amounts initially projected by OMB and CBO.

The plan also does not provide for imposition of automatic spending reductions at a later point in the fiscal year, if the deficit

rises above the permissible levels. Rather, under Gramm-Rudman the test would be applied only at the beginning of the year, based on the budgetary policies and economic conditions then in effect.

TREATMENT OF SOCIAL SECURITY

The Gramm-Rudman measure makes several changes in the budgetary treatment of the Social Security trust funds. First, the proposal removes the two Social Security trust funds from the budget totals, for the purposes of the budget submitted to Congress by the President and the congressional budget resolution. This change would be effective with FY 1986.

At the same time, however, the proposal requires that the trust funds be counted for purposes of determining whether or not the deficit falls within the maximum permissible levels. Thus, the operations of the trust funds would be added back into the President's budget and the congressional budget resolutions for the purposes of determining whether or not they are in compliance with the deficit limits.

The proposal specifically exempts Social Security from the automatic spending reductions which would be triggered by a deficit in excess of the maximum level, and also generally exempts this program from any other limits on spending and revenues that might be adopted.

Finally, Gramm-Rudman prohibits the adoption of any future legislation making transfers from the general fund of the Treasury to the Social Security trust funds, or vice versa. This prohibition would be permanent, but enactment of this legislation cannot prevent Congress from subsequently enacting legislation that makes such transfers.

SECTION III—MAJOR PROBLEMS AND CONCERNS

This section analyzes the likely impact of the Gramm-Rudman proposal, focusing on some of the major problems and concerns which have been raised.

IMPOSSIBLE TARGETS

Unless the economy performs much better than most people expect, it will be virtually impossible to meet the deficit targets set forth by Gramm-Rudman. Even if the economy grows steadily over the next five years, the task of meeting the deficit targets will be difficult (especially toward the end of the period). But if the economy deteriorates, reaching the specified deficit levels may well be impossible—requiring deficit reductions upwards of $100 BILLION in the space of a single year.

Some indication of the deficit reductions that might be required under two different economic scenarios is provided in the table on page 12. This table shows CBO's projections of the deficits likely to result under the budget resolution recently adopted by Congress (S. Con. Res. 32). Two separate sets of projections are shown—one prepared using CBO's principal set of economic assumptions (which call for continued steady economic growth averaging 3.5% per year) and the other prepared using alternative "low growth" assumptions (which assume a recession beginning in mid-1986). As the table clearly shows, while the deficit declines steadily under the "steady growth" CBO assumptions, it grows rapidly in FY 1987 and FY 1988 under the "low growth" alternative.

The table also shows the additional deficit reductions (above and beyond those already assumed in the budget resolution) which would be needed to meet the Gramm-Rudman targets. Under the "steady growth" projections, no further deficit cuts would be needed in FY 1986 (assuming that all of the cuts already mandated by the budget resolution are actually made) and only relatively modest cuts would be needed in FY 1987 ($19 BILLION).

The new deficit reductions which would be needed in subsequent years would be rather large, however—$35 BILLION in FY 1988 and $84 BILLION in FY 1990. To put these in perspective, the budget resolution just adopted is expected to produce first-year deficit reductions of $37 BILLION (according to CBO's method of measurement). Considering that Congress would have some lead time to make these deficit reductions, these targets do not appear unachievable, although many would question how much more can be cut from domestic spending above and beyond the cuts already made.

ADDITIONAL DEFICIT REDUCTIONS NEEDED UNDER ALTERNATIVE ECONOMIC SCENARIOS

[In billions of dollars]

	1986	1987	1988	1989	1990
Gramm-Rudman deficit targets	180	144	108	72	36
Deficits under current budget resolutions:					
Using "steady-growth" assumptions	175	163	143	132	120
Using "low-growth" assumptions	200	259	272	256	252
Extra reductions needed to meet targets:					
Using "steady-growth" assumptions		19	35	60	84
Using "low-growth" assumptions	20	115	164	184	216

The real problems will arise if the economy does not continue to grow steadily. If the economy instead follows the path assumed in the "low growth" projections, Congress would be faced with the task of reducing the deficit by $115 billion in FY 1987, $164 billion in FY 1988, and $216 billion in FY 1990. These deficit reductions are so large as to completely dwarf anything that has been achieved to date, and would clearly require both drastic spending cuts and major tax increases.

It is possible that the Gramm-Rudman targets could be waived in FY 1987, since the economy would be in a recession under this scenario. A similar waiver would not be permitted for FY 1988, however. Rather, under Gramm-Rudman, achievement of a $164 billion deficit reduction in that year would be absolutely mandatory.

Of the two scenarios, the "low growth" path seems far more realistic. While there might not be a recession as early as next year, most economists believe that a recession is likely in the next five years—and probably sooner rather than later. Economic expansions in the United States during the postwar period have averaged 45 months in length. We are already in the 35th month of the current expansion. If the economy manages to get through until FY 1991 without a recession, it would be an almost unprecedented economic performance—equaling the sustained growth which occurred during the 1960s. Given all of the current problems of the economy—trade deficit, interest rates, and the budget deficit itself—such a near record performance hardly seems likely.

Thus, there is at least a good chance that something similar to the economic downturn assumed in the "low growth" projections of the table above will actually occur. If Gramm-Rudman is enacted, Congress will have absolutely committed itself to making deficit reductions of a truly staggering magnitude in the aftermath of such a recession.

DAMAGE TO THE ECONOMY

Although the Gramm-Rudman plan is supposed to help the economy by reducing the budget deficit, it is quite possible that enactment of this plan could end up causing severe economic damage. The basic problem is that Gramm-Rudman would force Congress to respond to economic downturns—and the deficit increases they cause—by cutting spending or raising taxes. These spending cuts and tax increases, in turn, are likely to make the downturn worse, thereby triggering a further round of tax increases and more drastic spending cuts, and so on in a downward spiral.

It is widely recognized that the state of the economy has a major influence on the size of the budget deficit. When economic growth slows and unemployment rises, the deficit rises as well, partially because of reduced tax revenues and partially because of increases in spending for programs such as unemployment insurance. For example, a one percentage point increase in the unemployment rate would be sufficient to produce a roughly $40 billion increase in the deficit.

The Gramm-Rudman plan draws no distinction between deficits resulting from economic conditions and deficits resulting from tax and spending policies. Rather, the measure would require rigid adherence to the maximum deficit limits, even in many situations where the deficit is rising solely because of adverse developments in the economy.

The Recession "Escape Clause"

It is true that the Gramm-Rudman plan includes an "escape clause" that allows suspension of the deficit limits during a recession. However, this escape clause is likely to be of little use for a number of reasons.

First, all this provision does is to give the President 30 days, instead of 14 days, to issue his automatic spending reduction order. During this period, the President would be allowed to propose—and Congress would be allowed to pass—legislation suspending the targets. If the President chooses not to delay issuing his order, or if the President and Congress are unable to agree within 30 days on an alternate course of action, the automatic spending cuts would go into effect, despite the recession.

Second, the special recession provision only applies when OMB and CBO predict that economic growth will be negative for the coming fiscal year. In other words, they apply only to recessions which are expected to occur in the future (or to current recessions which are expected to continue well into the future). Recessions are quite hard to predict, and neither OMB nor CBO has a record of accurately making such projections. Both completely failed to anticipate or even recognize the deep recession of 1981-1982 until it was well underway. (In fact, as late as September 1981 CBO was predicting that 1982 would be a year of strong economic growth.)

Further, even if the recession clause is triggered by an OMB/CBO projection of a recession, this clause applies only to the fiscal year in which the Gross National Product is actually falling, and not to any subsequent fiscal year if the economy has begun growing again, no matter how slowly. The effects of a recession linger for some time, however. While unemployment may begin to decline once the trough of the re-

cession has been passed, it is likely to remain high for some time. The budget effects of a recession tend to last even longer, since it takes time for incomes and profits—and thus federal revenues—to regain their precession levels, and even longer for the economy to catch up to where it otherwise would have been. Despite these factors, Gramm-Rudman would require a return to the rigid deficit targets as soon as the recession's trough has passed, no matter how high the unemployment rate might be and how large a recession-induced increase in the budget deficit might have occurred.

The disastrous effects which Gramm-Rudman might have during an economic downturn can be illustrated by the "low growth" projections in the previous table. These projections assume that a recession begins in mid 1986, and ends in the latter part of 1987. This recession would cause the deficit to grow from $200 BILLION in FY 1986 to $259 BILLION in FY 1987 and $272 BILLION in FY 1988.

The Gramm-Rudman targets might be waived in FY 1987—if OMB and CBO accurately predict the length of the downturn and if the President and Congress can agree on such a waiver. These targets could not be waived for FY 1988, however, since economic growth would have resumed by then under this scenario.

Thus, although this hypothetical 1986-1987 recession would send the deficit up to $272 BILLION in FY 1988, the Congress would be absolutely required to cut this deficit down to the maximum permissible level of $108 BILLION in that year. A $164 BILLION cut in federal expenditures would send the economy into a tailspin, assuming that such a monumental cut in the deficit could somehow be achieved in the space of one year. If Congress fails to enact the required deficit reduction, however, the automatic spending reduction provisions would take effect, thereby creating havoc with the operations of the Federal government as well as with the economy.

Economic Slowdowns

Finally, the rigid deficit reduction targets of Gramm-Rudman could cause problems not only in times of actual recession but also at any time when adverse economic conditions lead to an increase in the budget deficit. For example, any significant slowdown in economic growth is likely to produce a substantial deficit increase. Gramm-Rudman would require Congress to respond to this deficit increase by cutting spending or raising taxes (or allowing automatic spending cuts to take effect). This in turn, could cause a further slowdown in the economy.

DISRUPTIVE SPENDING CUTS

If the automatic spending reduction provisions of the measure are triggered, the result could be drastic spending cuts for many programs, leading to major disruptions of vital government services.

Elimination of COLAs

First of all, it seems very likely that all COLAs will be wiped out in any year when the spending reductions are triggered. The Gramm-Rudman formula requires that half of the required deficit reduction be made by reducing or eliminating cost-of-living adjustments and other "automatic spending increases." (If full elimination of these increases is not sufficient to produce half of the required deficit reduction, then the shortfall to produce half of the required deficit reduction, then the shortfall would be made up through additional cuts in discretionary programs.)

Although there is some uncertainty as to just which programs would be affected by these automatic COLA cutbacks, it is clear that the amounts available for cutting are not large, particularly since the Social Security COLAs are specifically exempted from cuts. The total cost of COLAs and other automatic increases (other than Social Security) amounts to somewhere between $2 BILLION and $5 BILLION in the current fiscal year. Obviously, if the required deficit reduction is more than a few billion dollars, the automatic spending cut formula of Gramm-Rudman will result in elimination of all COLAs for that year.

The programs which would be subject to the COLA cut include some means-tested programs such as Supplemental Security Income and Veterans Pensions. Elimination of these COLAs could cause serious hardships—particularly if the COLAs were eliminated for several years in a row (as could easily occur under Gramm-Rudman). In addition, it is possible that the Gramm-Rudman formula could be interpreted to require reduction or elimination of increases in payments to hospitals and physicians under Medicare. While these increases have been reduced or frozen in the past, it is not clear how long such a freeze could be maintained before hospitals and doctors start turning away Medicare patients.

Large Cuts in Discretionary Programs

The cuts which would be required in discretionary programs could be much more drastic. For example, suppose a total deficit reduction of $50 BILLION was needed. Assuming that $5 BILLION of this could be achieved through elimination of COLAs and other automatic increases, the remaining $45 BILLION would have to come from discretionary programs. "Controllable" outlays total roughly $261 BILLION in FY 1986 (under the budget resolution adopted by Congress). If such a $45 BILLION reduction had to be made this year, it would require a 17% across-the-board cut. In dollar terms, this would involve defense spending reductions of roughly $51 BILLION in budget authority and $28 BILLION in outlays, and nondefense spending reductions of roughly $28 BILLION in budget authority and $16 BILLION in outlays. All of these cuts would come on top of the cuts already mandated by the budget resolution.

Disruptive Effects

These cutbacks would be particularly disruptive because they would fall heavily on spending categories such as personnel and maintenance, since these are the types of spending which are easiest to control on short notice. Most spending for procurement, construction, and similar long term projects is very difficult to alter in the short-run, due to the difficulties of altering binding contracts which have previously been entered into.

In defense, the cuts would probably have to be made through large reductions in civilian and military personnel costs (through layoffs, shortened work schedules, or pay cuts, for example), reductions in maintenance and training operations, and curtailed purchases of small items such as spare parts and ammunition. Major procurement projects would not escape entirely, however. Although relatively small savings could be made in these items in the short-run, the Gramm-Rudman formula would probably require large cuts in new appropriations for these projects, possibly causing a major disruption in planned research, development, and procurement.

Nondefense agencies would probably also have to make large cuts in personnel costs through layoffs, short workweeks, or pay cuts. These cuts would probably be very disruptive to many essential functions, including law enforcement, the courts, air traffic control, management of public lands, tax collection, processing of Social Security and other benefit checks, and operation of VA hospitals. Similar disruptions would probably also occur in a wide variety of other activities, ranging from biomedical research to federal aid to local school districts.

INEQUITY

In addition to the drastic effects which might result from triggering of the automatic deficit reduction provisions, there are serious questions about the fairness of the formulas which would be used in making these reductions.

Revenues

The most prominent criticism is that very large portions of the federal budget would be entirely exempt from the mandatory cutbacks. Perhaps the largest single omission in revenues. The deficit reductions made under the automatic formula specified in Gramm-Rudman would come entirely on the spending side, and would not involve any increase in revenues whatsoever.

Many regard the omission of revenues as grossly unfair, especially in view of the fact that the revenue loss from the 1981 Reagan tax legislation is a major cause of the current deficit crisis. In addition, tax expenditures—that is, the revenue loss associated with various tax preferences and special tax breaks—are one of the fastest growing items in the federal budget. According to the Joint Tax Committee, total tax expenditures are projected to rise from $425 BILLION in FY 1986 to $598 BILLION in FY 1990—an increase of 41% in just four years. The Gramm-Rudman formula would allow this increase to continue unabated, while concentrating on additional spending cuts.

"Uncontrollable Funds"

Secondly, expenditures under binding contracts and other prior commitments would also be exempted from the Gramm-Rudman spending reductions. While such expenditures would be difficult to reduce, the effect of this is to cut a relatively small proportion of total outlays in some categories, while cutting a large proportion of outlays in others.

For example, close to 40% of outlays for defense are classified as "uncontrollable" (because they result from previously—made obligations and commitments) and would therefore be exempted from any across-the-board cuts imposed under the Gramm-Rudman plan. These uncontrollable defense outlays will go primarily for procurement of weapons, research and develoment, military construction, and similar long-term projects. It should be noted that large portions of outlays for many nondefense programs are also considered uncontrollable for similar reasons.

Like revenues, the omission of nearly half of the defense budget is a gross inequity since the huge defense buildup over the past five years is the other major cause of the deficit crisis.

Social Security and Other Entitlements

Third, some consider the exemption of Social Security from the COLA cuts required under Gramm-Rudman to be unfair. According to this view, Social Security rep-

resents such a large portion of federal spending that to exempt it from deficit reduction efforts just places an excessive burden on other federal programs. In addition, the fact that no other COLAs would be exempt may create some anomalous situations. For example, low-income aged, blind, and disabled persons receiving Supplemental Security Income and low-income veterans receiving Veterans Pensions would have their COLAs eliminated under the Gramm-Rudman formula, while middle-income Social Security recipients would receive their full adjustment.

Fourth, some consider the treatment of entitlements under the Gramm-Rudman plan to be excessively generous relative to the treatment of discretionary programs. Cuts in indexed entitlements with COLAs would be limited to eliminating the COLAs, while entitlements without COLAs (farm programs, for example) would probably be completely exempted from cutbacks. On the other hand, cuts in discretionary programs (such as defense, education, research, transportation, and basic government operations) would be limited only by the size of the deficit to be eliminated.

INCREASED PRESIDENTIAL POWER

Several provisions of the Gramm-Rudman legislation could serve to greatly increase the powers of the President in budgetary matters.

In practice, the President would have wide power to determine whether or not the automatic spending reduction provisions of Gramm-Rudman would be triggered for any given fiscal year. Under the proposal, these provisions would be triggered by deficit projections prepared by CBO and OMB. CBO is subject to bipartisan control and can therefore be expected to be non-partisan in its projections. OMB, on the other hand, is an integral part of the Executive Office of the President and can be expected to tilt its projections to accommodate the President's policies and preferences. Indeed, OMB budgetary projections have already been notoriously politicized under the Reagan Administration, with 1981 the most egregious example of manipulation.

Thus, if a President wanted the spending reductions triggered, OMB could simply forecast a large deficit. Similarly, if the President did not want the projections triggered, OMB could project a small deficit. Although the OMB projections would be averaged with those of the non-partisan CBO, OMB would just have to make sure that its figures were high enough or low enough to make the average come out at the desired level. While this manipulation might not work—or might appear too transparent—at times when the deficit is obviously either below or above the maximum level set by Gramm-Rudman, it would be quite easy at times when the deficit is anywhere close to the maximum.

Second, the Gramm-Rudman plan appears to give the President wide discretion in allocating the spending cuts which would be required under the automatic reduction formula. While the President would apparently be required to make proportional across-the-board cutbacks at the appropriations account level, he would probably be free to make any adjustments he desires below this level, subject only to the limitation that he could not completely eliminate any program or activity. A President might use this discretion to greatly reduce funding for particular construction projects, military installations, weapons contracts, or any other specific programs or projects which he dislikes or which are located in the districts of Members of the opposition party, while barely touching those he likes or which are located in districts represented by Members of his party.

Finally, the Gramm-Rudman measure at least attempts to prevent waiver of any of its provisions—apparently including the various procedural requirements it imposes on the House and Senate—except through enactment of formal legislation with the President's signature (or with the President's veto overridden). If this provision is found to be constitutional, it would effectively give the President a veto power over routine waivers of points of order in the House or Senate which are now handled by simple resolution or by unanimous consent.

INCREASED BUDGET COMMITTEE POWER

The Gramm-Rudman plan would also strengthen the powers of the budget committees and further centralize budgetary decision making in Congress.

For example, the Gramm-Rudman legislation appears to give the House and Senate budget committees jurisdiction under certain circumstances to report substantive legislation covering taxes, appropriations, entitlements, and similar matters. Specifically, the measure permits the budget committees to report such legislation within 10 days after a presidential order has been issued making automatic spending reductions. The purpose of such legislation proposed by the budget committees would be to supersede the automatic spending reductions by providing an alternative means of reaching the maximum deficit limits. This would give the budget committee truly extraordinary power to propose sweeping legislative changes, power which would be particularly significant in light of the crisis atmosphere which would prevail at such a time.

In addition, the Gramm-Rudman plan would increase the importance of the detailed programmatic assumptions contained in the congressional budget resolutions. At present, these resolutions provide only a general guide for congressional action on substantive spending legislation. Committees receive overall spending allocations, and exercise fairly wide discretion over spending for particular programs within these general allocations.

The Gramm-Rudman plan would reduce this discretion, however, by requiring the various committees to rigidly adhere to the allocations of total spending authority among their subcommittees (the so-called "302(b) allocations"). Presently, these allocations among subcommittees are only advisory. Further, these allocations would be made binding in terms of both budget authority and outlays. This is significant because the relationship between budget authority and outlays varies from program to program. Thus, while committees would continue to have the power to make their own allocations among subcommittees, and to change these allocations at will, in practice it would often be difficult to make allocations which differ substantially from those assumed in the budget resolution while still complying simultaneously with the targets for both budget authority and outlays.

POLITICAL BRINKMANSHIP

Finally, the Gramm-Rudman plan will be an open invitation to political brinkmanship. Basically, this is because the proposal creates the threat of some very unappealing events—the triggering of the automatic spending reductions—which require the cooperation of the President and both parties in the House and in the Senate to prevent. While the threat created by Gramm-Rudman might serve to increase bipartisan cooperation, it might also encourage various participants to withhold their support for such solutions until the very last moment, in order to use the threat of the Gramm-Rudman spending cuts to extract the maximum concessions from their adversaries.

For example, Gramm-Rudman might create an incentive for cooperation among the White House and both chambers of Congress to enact revenue raising legislation in order to prevent massive automatic spending cuts. On the other hand, it might encourage the President to withhold his approval for such legislation until the very last minute, using the threat of the across-the-board spending cuts to force maximum concessions from the House on cutbacks in particular domestic programs. Conversely, Congress might use the threat of major automatic reductions in defense spending as a lever to force concessions from the President on taxes.

The likelihood of such brinkmanship is underscored by the fact that the Republicans are engaging in exactly that tactic right now—by threatening to close down the government in order to force Congress into enacting Gramm-Rudman with virtually no advance scrutiny.

It seems clear that if Gramm-Rudman is enacted as presently proposed, it will have to be repealed, waived, or modified before it expires in 1991. Unless one believes that the business cycle has been abolished, it is virtually certain that economic events will occur at some point during the next five years which will make attainment of the Gramm-Rudman limits completely impossible. When such an event occurs, the cooperation of both chambers and the President will be needed to undo the restrictions imposed by Gramm-Rudman. Attaining such cooperation may be quite difficult. Any group—including the President, one of the parties in Congress, or simply a group of Senators willing to filibuster—which believes it has little to lose by failing to act will have a powerful weapon for extracting concessions from those who have more to lose as a result of inaction.

SECTION IV—AMBIGUITIES, AND TECHNICAL PROBLEMS

This section provides examples of some of the many ambiguities and unanswered questions which remain with respect to the Gramm-Rudman proposal. Like its predecessor, Gramm-Latta II, appears to have been put together in great haste, and is being rushed through Congress with little time for careful examination.

As presently drafted, Gramm-Rudman contains so many ambiguous provisions and imprecise terms that it would be impossible for anyone to say with confidence just what the legislation does. If Gramm-Rudman is enacted in its present form, the inevitable result will be a great mass of litigation over the proper interpretation of various provisions.

WHICH PROGRAMS ARE SUBJECT TO COLA CUTS?

One major set of unanswered questions involves precisely which programs would be subject to the mandatory reductions in cost-of-living adjustments (COLAs) which would be triggered if the budget deficit exceeds the maximum permissible level. Gramm-Rudman specifies that the President must achieve half of the necessary deficit reductions (if possible) by reducing or eliminating

"automatic spending increases" in the program which are "indexed directly or indirectly." (The other half of the necessary deficit reductions would be made through across-the-board reductions in "controllable expenditures"—essentially outlays for discretionary programs.) Unfortunately, the terms "automatic spending increases" and "indexed directly or indirectly" have no precise meaning. While it is clear that certain programs would be subject to the COLA cuts, its impossible to tell whether or not several other large programs would be covered. Examples include the following:

Food Stamps—These benefits clearly have a COLA, but they are also technically not entitlements and therefore are included by OMB in its listing of "controllable expenditures." Apparently, Food Stamps would be subject to both halves of the deficit reduction formula. Would these benefits first have their COLA eliminated and then be subjected to an across-the-board percentage reduction? Or would they just get a COLA cut? Or just a percentage reduction?

Veterans Compensation—These entitlement benefits do not have an automatic COLA. In practice, however, every year Congress enacts legislation providing an increase in these benefits, generally equal to the expected amount of the Social Security COLA. On the one hand, these benefits would not appear to have "automatic spending increases" and thus would not be subject to the COLA cut. On the other hand, they do appear to be "indexed" in some sense of the word, so perhaps they would be covered after all. Then again, the annual ad hoc increase in benefits is technically a controllable expenditure, so perhaps these benefits would actually be subject to the other provisions, which call for across-the-board reduction in such "controllables."

Medicare—There benefits to the elderly are not directly indexed, but doctor and hospital reimbursement rates are adjusted annually based on inflation in medical services. This *probably* qualifies as "indirectly indexed", and so the reimbursement rates (through nothing else in Medicare) are *probably* subject to the COLA cap.

Federal Pay—By law, Civil Service pay is automatically indexed to comparable private sector wages, and military pay raises are linked to Civil Service pay raises. However, the President is also allowed to set "alternative" pay rates by proclamation, subject to a one-House veto. If an automatic pay raise takes place on October 1, is it then subject to the mandatory COLA cap? If the October 1 increase were lower than comparability because the President set an "alternative" raise, is that *not* automatic and therefore *not* subject to the COLA cap? Does the fact that all federal pay comes from budget accounts that are classified as "relatively controllable" mean that pay *rates* are covered under the provision requiring proportional reductions in controllable expenditures? That is, if a 10% cutback is made in a military personnel account does this empower a 10% cut in pay rates, or does it completely protect the rates (including raises) but force a 10% cutback in personnel?

Black Lung—These entitlement benefits are automatically indexed to federal civil service pay raises. If you conclude that federal pay rates are covered under "relatively controllable" sequestering, does that mean that these entitlement "COLAs", through linkage, can also be cut below zero?

HOW WOULD CUTS IN DISCRETIONARY PROGRAMS BE MADE?

How Much Presidential Discretion?

The language of Gramm-Rudman is very vague with respect to the question of how much discretion the President has to pick and chose among discretionary programs when issuing his order making across-the-board cuts.

The proposal specifically requires the sequestering order to cut "each expenditure," but this term has not defined meaning. Does it mean each agency, each bureau, each appropriation account, or each "activity" within an individual appropriation account? If it means each appropriation account, for example, then the President would still retain flexibility to choose among activities. Within the "Training and Employment Service" account, could he choose to cut the Jobs Corps 80%, Summer Youth Employment 10%, and the Block Grant, and Native Americans programs not at all? Within "Aircraft Procurement, Air Force", could he choose between planes and spare parts, or between combat and airlift planes, or even between F-16's and B-1's?

Can the President Reduce Funding to Zero?

The bill states that no action taken by the President under his authority to make across-the-board spending cuts can have the effect of "eliminating any program, project, or activity of the Federal Government." The meaning of this, too, is unclear. It certainly implies that the President has the authority to make drastic cuts in spending for particular programs and activities. May he cut funding down to just $1 for an item—therefore not technically violating the ban on eliminated things? Or can he cut funding down to zero? If a program or project has not been deauthorized, has it been eliminated simply because all of its funding has been withdrawn?

What happens to "Sequestered" Funds?

The deficit reduction plan is silent on the status on funds that are "sequestered" by the President under his spending reduction authority, leaving a number of unanswered questions: Are sequestered funds automatically rescinded? Do they remain in limbo, and lapse at the end of the fiscal year? If they had been appropriated for a multiyear period, do they become available for spending when the next fiscal year begins?

How is Non-Tax Income Affected?

Non-tax income from fees, licenses, rents, royalties, etc. shows up as "negative spending," and is classified by OMB as "relatively controllable," and thus would be subject to the across-the-board reductions required under the Gramm-Rudman proposal. For example, federal revenues from oil leases on the outer continental shelf (rents, royalties, and bonuses) are considered non-tax receipts. If the President is required to make proportional reductions in "controllable spending," does he have to increase these receipts by speeding up the auctioning of oil leases.

ARE OFF-BUDGET PROGRAMS AFFECTED?

Several large agencies and programs are considered off-budget under current law, including the Rural Electrification Administration, the Strategic Petroleum Reserve, the U.S. Postal Service, and the Federal Financing Bank. It is not clear whether the expenditures of such agencies would be counted towards the deficit in the presidential and congressional budgets which must meet the deficit targets of Gramm-Rudman, or if their spending would figure in the projection of the deficit by OMB and CBO that could trigger automatic spending reductions.

Social Security, on the other hand is explicitly excluded from the figures in the presidential and congressional budgets in one section of Gramm-Rudman, but explicitly included in the definition of "deficit" in a different section of the proposal. Are these two sections at cross purposes? Or is Social Security out of the totals in the budget resolution, but in the total when the parliamentarian, CBO, and OMB make their various determinations?

HOUSE RULES AND WAIVERS

The proposal states that, notwithstanding the Budget Act, any other provision law, or any rule of the House or Senate, no provision of Gramm-Rudman may be waived or modified except by joint resolution. Is this constitutional? If the House considered an appropriation bill under a rule (or unanimous consent) that waives the new point of order enforcing 302(b) allocations for outlays, is that waiver illegal and the bill thus void?

WHAT HAPPENS TO THE BUDGET COMMITTEE'S JOINT RESOLUTION?

When a presidential order capping COLAs and sequestering appropriations is issued, the budget committees may draft and report a joint resolution that would supersede the President's action. This provision of Gramm-Rudman is very vague. Could the Budget Committee's joint resolution be sequentially referred to other committees of jurisdiction, and may they amend it in ways that are not deficit neutral? If the joint resolution is enacted, must the President release the sequestered amounts? Does he have a choice? The Gramm-Rudman plan is silent on these issues.

Mr. BUMPERS. Mr. President, my staff has prepared an extended study on the debt, together with several CBO and CRS studies. I ask unanimous consent that the fact memo on the debt and financing costs and four exhibits be printed in the RECORD.

There being no objection, the fact memo was ordered to be printed in the RECORD, as follows:

FACT MEMO ON NATIONAL DEBT

Following is background information regarding the current status of the national debt and debt financing costs:

1. Basic Facts on Debt Level and Growth.

a. Debt subject to Statutory Limit.

(1) The current level of the debt subject to statutory limit is $1,823 billion, the same amount as the current statutory debt ceiling.

(2) The debt level on January 20, 1981, was $932 billion, so we are just short of doubling the debt President Reagan inherited from all of his predecessors. It is not clear when we will reach the exact doubling date; the delay in enacting the debt ceiling legislation has built up substantial borrowing needs for the Treasury Department, so the doubling date will be hit very soon after the debt ceiling is lifted.

(3) C.B.O. projected in its February Economic Report that the debt level rise to $2,119 billion at the end of Fiscal 1986, $2,414 billion in Fiscal 1987, $2,743 billion in Fiscal 1988, $3,104 billion in Fiscal 1989, and $3,505 billion in Fiscal 1990. Thus, the debt level over three trillion dollars during the term of President Reagan, more than tripling in just eight years.

(4) In its August "update," C.B.O. projects that the Congressional Budget Resolution—if it is fully implemented—will reduce the deficits between now and 1990 by nearly $500 billion, or 41% of the $1,233 trillion in deficits it projects we would run under current policies absent the budget resolution. This means the debt level could be held to around $3 trillion in 1990, instead of $3.5 trillion, still more than triple the debt figure President Reagan inherited.

b. Debt Held By The Public:

(1) The debt held by the pubic (a figure which excludes Treasury borrowing from various U.S. government trust funds) stood at $1,503 billion at the end of August, 1985. The official figure for the end of the fiscal year is not yet available, but C.B.O. projected the total to reach $1,526 billion by September 30, 1985.

(2) The debt held by the public stood at $749.5 billion at the end of January, 1981, so this measure of the debt already has doubled during President Reagan's term in office. Treasury statements on debt held by the public are issued monthly, so precise figures for January 20, 1981 are not available, and the exact date the figure doubled also is unavailable.

(3) C.B.O. projected in its February report that the debt held by the public would hit $1,526 by the end of Fiscal 1986, $1,740 in Fiscal 1987, $1,972 in Fiscal 1988, $2,220 in Fiscal 1989, and $2,786 in Fiscal 1990. In short, this measure of the debt also will more than triple during Ronald Reagan's terms in office.

(4) In its August "update" C.B.O. projected that the debt held by the public would rise less if the budget resolution is fully implemented. It projects the public debt to rise to $2,252 billion by Fiscal 1990, reflecting C.B.O.'s estimate that the budget resolution will reduce spending by $500 billion by that date. Even with C.B.O.'s optimistic reestimate of the budget resolution, the public debt would stand at $2,133 at the end of fiscal 1989, almost tripling during Ronald Reagan's term in office.

2. Basic Facts on Interest Costs to Finance National Debt.

a. An unbelievable amount of money is being spent to finance the accumulated debt. There are two measures of this cost, the net interest costs of the government and the interest costs for all borrowing to finance the debt. The second figure, total borrowing costs, includes Treasury borrowing from the public and Treasury borrowing of the surpluses of various trust funds, like Social Security. The first figure, net interest, counts as income all interest payments to the government for loans (e.g. student loans) and all Treasury interest payments to trust funds. Thus, when Treasury borrows from a trust fund, the transaction appears as a wash on the net interest figure in the unified budget—it's a cost of borrowing to Treasury, but it's interest income to the Social Security Trust Fund. But, clearly, if Treasury couldn't borrow these trust fund surpluses or if there were no surpluses to borrow, it would have to borrow these amounts from the public. So, the real total cost of financing the national debt includes Treasury borrowing from the trust funds. The net interest figure does not reflect these borrowings and, in addition, it discounts the borrowing costs to the extent of any interest income to the Treasury—income that has nothing to do with debt financing.

b. For Fiscal 1985, the net interest costs are projected to be about $130 billion. But, if one includes borrowing from trust funds and does not offset this figure with interest income from loans that have nothing to do with the national debt (e.g. student loans), the total borrowing to finance the national debt actually is $181 billion this year, $50 billion more than the net interest figures would indicate.

c. C.B.O. in its February report projected that net interest payments would rise to $146 billion in Fiscal 1986, $163 billion in Fiscal 1987, $186 billion in Fiscal 1988, $206 billion in Fiscal 1989, $230 billion in Fiscal 1990. If this projection holds true, we will have spent $1,018 trillion during Ronald Reagan's term in office just to finance the national debt. Remember, that this money doesn't buy us anything—not one bomb, not one Peace Corps Volunteer, not one Head Start worker, not one flag to fly over the Capitol, nothing. It just buys the use of someone elses money to pay for programs that we aren't willing to pay for directly.

d. In its August "update" C.B.O. lowered its estimates of net interest costs. Assuming that the budget resolution is fully implemented, it estimates that the net interest costs will be $137 billion in Fiscal 1986, $149 billion in 1987, $161 billion in 1988, $169 billion in 1989, and $178 billion in 1990. This is $67 billion less the baseline estimate, but it still has us spending $951 billion on interest payments during President Reagan's eight years as President—and these are net interest figures.

e. Between 1981 and 1985, total Treasury borrowing to finance the debt was $132 billion more than the net interest figure for a total of $476 billion in borrowing to finance the debt. There are no projections available on the total borrowing which will be required to finance the debt for the next three years, but it surely will exceed the net interest figure by more than $132 billion; this is true in part because the annual surpluses in the trust funds are projected to double during this time, reducing the net interest figure. The difference between the net and total interest figure this year is $50 billion. So, at a minimum the total borrowing costs will exceed the net interest figure by $150 billion; more likely it will exceed it by $250 billion. Thus, our total borrowing costs for President Reagan's term in office will be over $1.3 trillion ($1.390 using the February C.B.O. estimate and $1.333 using the August C.B.O. estimate).

3. Compound Interest:

a. The concept of compound interest is familiar to most people. When we put money in a savings account and leave it there, we earn interest on the interest payments previously left in the account. This happens because these previous interest payments add to the balance in the account, meaning we earn more in interest payments in all subsequent years.

b. Whenever the government borrows money to pay interest costs on money it previously borrowed, we have compound interest on the national debt as well. When we borrow the money needed to pay our interest costs, we add to the debt, increasing the amount of debt that must be financed. We then are forced to pay interest on interest, compounding the debt. In fact, we currently are borrowing even more than our total interest costs, which accelerates the process of compounding. We are not only adding to the debt by borrowing to pay interest, we are adding to the debt directly above this amount.

c. In a special study (Exhibit A), the Congressional Research Service has estimated the compound interest costs we are incurring. It estimates that in 1982 the government interest payment bill included $5 billion in compound interest. In 1986, it estimates this figure will be $52 billion, more than a 500% increase in just four years. As long as we continue to borrow funds to pay current interest costs, this compounding process will continue and grow.

d. In addition to compound interest, the fact that the government borrowing needs are so large holds interest rates higher than they would otherwise be. This increases the costs of borrowing. A special study done for you by C.R.S. shows that the average interest rate paid by the government for its borrowing has grown dramatically in recent years. From 1930 to 1979, the interest rate paid by the government only once exceeded 6% (in 1974). Since 1978, the interest rate paid by the government has risen to 8-9%. It never exceeded 8% before 1981. In 1981 it reached 8.6%, in 1982 it was 9.1%, in 1983 it dipped to 7.9%, in 1984, it rose back to 8.5%, and in 1985 it dipped to 8.5% again. This increase in the interest rate paid by the government to borrow money—as well as the dramatically larger amounts that are being borrowed—both add to compounding of the debt and interest costs.

4. Debt to G.N.P. Ratio:

a. If we had an economy that was growing even faster than the growth in the debt and interest costs, the problem would not be quite as serious, but we don't. In fact, the ratio of the national debt to the Gross National Product is growing at an alarming rate.

b. In another special study (Exhibit B), the Congressional Research Service has created the debt/GNP ratio since 1930 when it stood at 15.8%. On the eve of the Second World War the debt/GNP ratio had risen to just over 40%. During the War it grew to over 100%. Between 1946 and 1974 this ratio dropped steadily, reaching a low of 25.1% in 1974. At the end of 1980 it had increased slightly to 27.8%. Since then it has risen to 39.6% at the end of Fiscal 1985, a 42% increase in the ratio in just four years. This increase is particularly startling when one recalls that it took this country 35 years to cut the debt/GNP from its high during the War to 27.8%. We are reversing a trend which has been underway for nearly forty years.

c. In this same study, C.R.S. has calculated the number of years it has taken since 1930 for the debt to double. Taking the debt in 1946, it took our country 31 years to double its debt. This figure has been dropping steadily since then, we now are talking about tripling the debt in just eight years.

d. C.B.O. projects in its February Economic Report that the debt/GNP ratio would rise from 39.6% at the end of 1985 to 49.7% in 1990, for a total increase in the ratio during Reagan's term of 78%. In this February report C.B.O. warns that the "most insidious danger of persistent large deficits is that they may result in a runaway accumulation of debt." (Report at 88). Such a process "could occur if the economy performed much worse then projected, or if spending was raised or taxes lowered beyond levels implied by current policy." (Id) When debt grows faster than the Gross National Product "an even smaller share of available resources would be left for private capital formation" and "net private investments could cease entirely and even become negative—the latter implying gradual depletion of the existing stock of physical capital." (Id.) Although C.B.O. did not then predict a run-

away debt, it said the "projected situation is obviously precarious. . . ." (Report at 91) It warns that "(s)hould the rate of nominal GNP growth turn out to be lower than projected by C.B.O. in its baseline case, or nominal interest rates higher, or both, the deficit-to-GNP ratio would be a rising one and the debt accumulation process could eventually become explosive." (Report at 92-93: emphasis supplied) It concludes by stating that—even assuming a higher rate of growth than C.B.O. projected—the fact that the debt/GNP ratio "does not come close to approaching a stable value . . . is evidence of the severe imbalance in U.S. fiscal policy." (Report at 93)

e. In its August "update" C.B.O. projects that the debt/GNP ratio might stabilize after 1987 and might fall slightly in 1988-1990. It projects the ratio to rise from 39.6% at the end of 1985 to 41.7% in Fiscal 1987 and fall to 40.2% in Fiscal 1990. This projection is based on C.B.O.'s assumption that the budget resolution will be fully implemented and that its economic assumptions are correct. Remember that if the debt/GNP stabilizes at roughly 40%, this still represents a huge increase in the ratio since 1981 when it stood at 27.8%. The last time we had a debt/GNP ratio this high was 1964 when it stood at 41.7%

5. Low Growth Scenario:

a. All of the C.B.O. budget projections quoted in this Fact Memo are based on C.B.O.'s projections on the economic outlook. In both its February and August reports, C.B.O. projects steady economic growth over the coming years, averaging 3.4%-3.5% until 1990, with low inflation (averaging 4.2%), declining unemployment (dropping to 6.3% or 6.2%), and lower interest rates (7.2% to 8.2% Treasury Bill rate). (Reports at pages xxii and xviii, respectively). These projections do not "rule out" the possibility of a recession during this period if such a recession does not lower the average growth rates for the period. (February Report at 39). But, C.B.O. states that there is "more than the usual element of uncertainty, partly because the economy has become more susceptible for foreign influences." (August Report at 4) Given this uncertainty, C.B.O. has made projections based on economic assumptions both more and less favorable than its baseline assumptions. The "low growth scenario" would project economic growth of 1% less than the baseline projections (of 3.4% to 3.5%) coming from a "recession in mid-1986, equal in length (five quarters) and depth (a real GNP decline of 4.9 percent) to the 1973-1975 recession." (August Report at 73) Under this "low growth scenario," inflation and interest rates would be lower but the budget deficit grows sharply. In terms of the deficit, such a low growth scenario would increase the baseline deficits by nearly $500 billion between 1983 and 1990, increasing the total deficits for these years from $1.265 trillion to $1.751 trillion. (February Report at 71) C.B.O.'s August Report projects that if the budget resolution is fully implemented deficits during this period will total $732 billion, but if the "low growth" scenario applies that these deficits will be $1.236 trillion, more than $500 billion more. (These figures come from another special C.B.O. study: Exhibit C.) In terms of the interest payments on the debt, the "low growth" scenario would add $59 billion to the total interest bill from 1986 to 1990, raising it from $794 billion to $853 billion. In terms of the debt/GNP ratio even more frightening results occur; C.B.O. projects that it would rise from 39.6% at the end of Fiscal 1985, 42.1% in 1986, 48.0% in 1987, 52.0% in 1988, 54.2% in 1989, and 56.2% in 1990. This 1990 debt/GNP ratio takes the U.S. back to where we were in 1955 and more than doubles the ratio we had as recently as 1981! This "low growth scenario would bring us close to the "exploding debt" that C.B.O. warned about in its February report.

b. There are economists who are less optimistic about the future than is C.B.O. On September 30 the National Association of Business Economists released a survey of 350 association members which showed that they expect only a modest pickup in the economy before a recession begins either in the latter part of 1986 or early 1987. A majority feel that the recession will come in 1986 and three-fourths say it will hit by the middle of 1987. (Exhibit D)

Subject: The Nature of Compound Interest and Its Effect on Federal Spending Since 1981.

This memorandum is in response to your request for a definition of compound interest and estimates of the magnitude of its effect on total interest outlays since 1981.

Interest compounding refers simply to the concept of interest on interest. If one has a savings account, for example, that pays a simple interest rate of 10 percent on the amount of money in the account, and if the interest earned on the saving remains in the account, then the accumulated interest itself will accrue interest. Consequently, if interest is posted to the account at the end of each year, then in two years, interest will not be equal to 20 percent of the initial deposit (10 percent each year), but 21 percent (10 percent in the first year, plus 10 percent and 10 percent of the first 10 percent, in the second).[1]

The principle works much the same for a loan. If one borrows a sum of money, promising to pay 10 percent per year interest, and rather than paying the annual interest charge, borrows it (by, say, increasing the debt by 10 percent), then at the end of two years, the interest owed will not be the sum of 10 percent of the original amount from two years, but a total of 21 percent, due to the interest on the interest accumulated from the first year. Consequently, failure to pay interest on a loan will compound the interest ultimately owed. This additional interest can be regarded as the cost of borrowing to pay interest on past borrowing.

For the last few years, the Federal Government has run deficits larger than the amount of net interest it has paid on its accumulated debt. Consequently, it has in all essentials been borrowing to pay the interest on past borrowing. Table 1 contains estimates of the effects of this compounding on interest paid by the Government.

Lines (1) and (2) of the table show the size of the Government's debt held by the public and how much the Government borrowed anew in each year. Line (3) indicates how much of this borrowing has resulted from changes in tax and expenditure policies from those in effect in 1981. Lines (4), (5), and (6) show how much interest was paid due to each of these, respectively. In line (4), total net interest paid on outstanding debt is given. In line (5), just the interest that would have to be paid on borrowing since 1981 is shown. The figures in line (6) show interest due to policy changes only. Finally, the amounts due to compounding are given in lines (7), (8), and (9).

Essentially, line (7) shows how much more the Government has had to spend on interest as a consequence of borrowing to pay interest since 1981. The extra interest cost due to borrowing to pay interest on debt accumulated only since 1981 is shown in line (8). Line (9) represents how much it has cost to borrow to pay interest on debt accumulated as a consequence of budget policy changes since 1981.

Considerable caution should be taken in the use of these figures. First, all computations are approximate. Second, no estimates take into account the fact that different budget policies would result in different interest rates and income levels, on which total borrowing and interest payments depend. Finally, one must be careful in assigning responsibility for these costs. Much borrowing since 1981 has been due to economic conditions—not policy—and (and as is apparent from line [1]) a large debt preceded the years covered in these estimates.

TABLE 1.—EFFECTS OF COMPOUNDING ON INTEREST PAYMENTS FISCAL YEARS 1982-86

[In billions of dollars]

	1982	1983	1984	1985 [1]	1986 [1]
(1) Total debt held by the public [2]	929	1,142	1,313	1,526	1,740
(2) Total deficit [3]	128	208	185	214	215
(3) Deficit due to changes in tax and spending	5	45	81	129	143
(4) Net interest paid	85	90	111	129	146
(5) Net interest due to borrowing since 1981	7	25	47	67	89
(6) Net interest due to changes in tax and spending	(4)	3	10	21	35
(7) Interest due to compounding on total debt	5	14	25	38	52
(8) Interest due to compounding on debt accrued since 1981	(4)	2	6	12	20
(9) Interest due to compounding on debt accrued due to policy changes from 1981	(4)	(4)	1	3	6

[1] Projected.
[2] End of year.
[3] Includes off-budget borrowing.

MEMORANDUM

To: Charles Ludlam, Senate Committee on Small Business, Russell Senate Office Building, Room 438.

From: William A Cox, Senior Specialist in Economic Policy.

Subject: Relationships Between Federal Debt, Interest Payments and GNP, 1930 and 1990.

In response to your request, I am transmitting a table and associated charts show-

[1] Compounding does not take place only in the context of holding the account more than 1 year. If interest is posted twice a year, for example, in the second half of the year, interest will be earned on the interest from the first. The more frequent the posting (or "compounding") of interest, the more total interest will be earned in a given period from a given simple interest rate. When compounding is continuous (i.e., computed every instant) a 10 percent simple rate per year becomes approximately 10½ percent.

ing the average interest rates on publically held federal debt, the debt as a percent of GNP and interest payments as a percent of GNP from 1930 through 1984 and projected through 1990. The projections through 1990 represent the Congressional Budget Office's calculations based on the Concurrent Resolution on the 1986 Budget and economic assumptions as reported in CBO's The Economic and Budget Outlook: An Update, August 1985. The table also shows the number of years it took for each year's outstanding debt to double; however, this cannot be calculated after 1982, for the projections through 1990 show no further doublings.

The data is the attached tables for 1940 through 1990 refer to GNP and interest payments by fiscal year and publically held debt outstanding at the end of each fiscal year. Fiscal years ended on June 30 through 1976 and subsequently on September 30. I have not located GNP for fiscal years 1930 through 1939. Therefore data in the table for those years refer to calendar-year GNP, fiscal-year interest payments and so-called "privately held U.S. Government debt" at the end of June in each year. "Privately held" debt in the 1930's corresponds closely to what we now refer t as "federal debt held by the public," i.e. that outside of Federal agencies, trust funds and Federal Reserve Banks. The lack of GNP by fiscal years for the 1930s gives rise to a minor inconsistency between the relationships of debt and interest payments to GNP for those early years and the relationships for 1940 and after. I do not believe this inconsistency to be of significance for your purposes

While CBO's economic assumptions represent an objective benchmark for this exercise, CBO also has published two alternative scenarios. One involves slow growth in 1986 and recession in 1987, which would yield considerably gloomier looking numbers for the late 1980s. The other is a fast-growth scenario, which permits the economy to grow out of its fiscal problems.

RELATIONSHIPS BETWEEN FEDERAL DEBT, INTEREST PAYMENTS AND GNP, 1930–90

[In billions of dollars]

Year	GNP	Debt	Interest payments	Average interest rate (percent)	Debt per GNP (percent)	Interest per GNP (percent)	Years to double

SOURCES AND DEFINITIONS

Data for 1940 through 1984 for fiscal year GNP, federal debt held by the public at the end of the fiscal year, and net interest payments are drawn from Office of Management and Budget, Budget of the United States Government, Fiscal Year 1986, Historical Tables, Tables 1.1, 1.2 and 6.1. Projections for 1985 through 1990 are drawn from Congressional Budget Office, The Economic and Budget Outlook: An Update, August 1985, Tables I-3, II-1 and II-3. Data for 1930 through 1939 are for calendar-year GNP and are drawn from the Economic Report of the President, January 1972, Table B-1. Data for 1930 through 1939 for "privately held" U.S. Government debt (excluding that held by Federal agencies and trust funds and the Federal Reserve Banks) at the end of June for each year and for interest payments on the debt are drawn from Board of Governors of the Federal Reserve System, Banking and Monetary Statistics, 1914 though 1941, November 1943, Table Nos. 149 and 150 (p. 513).

Average interest rates on Federal debt are calculated as net interest payments divided by the end-of-year debt outstanding.

"Years to double" (right-hand column) refers to the number of subsequent years until the outstanding debt reached more than twice the amount outstanding at the end of each fiscal year. After 1982 it is not projected by CBO to double again by 1990.

ECONOMISTS EXPECT MODEST PICKUP BEFORE RECESSION

(By John M. Berry)

DENVER, Sept. 30.—A survey of nearly 350 members of the National Association of Business Economists shows that they expect only a modest pickup in the economy before a recession begins either in the latter part of 1986 or early 1987.

Kathleen M. Cooper of Security Pacific National Bank, a vice president of NABE, said the survey also showed the members expect small increases in both inflation and unemployment in coming quarters. Cooper released the survey results at the NABE's annual meeting here.

For the current quarter, 44 percent of those responding said demand for their companies' goods and services was rising, with 33 percent reporting no change and 23 percent declining demand. Those figures were only slightly better than in the second quarter of this year, and otherwise the worst shown by the quarterly survey since the beginning of 1983.

Only 16 percent of the companies increased their employment this quarter, compared with 30 percent that reduced it, Cooper said.

Underscoring the weakness, nearly half the respondents reported falling profit margins and only 22 percent said their profits were rising. Almost twice as many of the companies' prices were falling as were going up.

"One result," Cooper said, "is that capital investment is beginning to suffer. The percentage of our overall membership reflecting rising capital outlays has fallen from 50 percent a year ago to 31 percent today. For goods-producing industries the decline has been even more dramatic—from 59 percent to 30 percent.

"Being bombarded with all of this negativism, our sights are not set very high for 1986—no matter what industry we represent," Cooper continued. "We anticipate real growth of only 2.7 percent from this year's fourth quarter to next year's, profit expansion of less than 4 percent, and a slight uptick in the unemployment rate."

The slow pace for the economy over the past year or so has caused many of the NABE members to push later the date at which they think a recession will begin. Nevertheless, a majority still expects a downturn to occur before the end of 1986 and three-fourths say it will hit by the middle of 1987.

At the same session at which Cooper presented the survey results, two other speakers differed with the median results of the survey and with each other.

One of them, James Annable, chief economist of the First National Bank of Chicago, agreed with the consensus that real economic growth would be modest next year. But he challenged the prediction of a recession beginning in 1986.

Annable argued that recessions usually follow either of two developments—a significant unintended inventory buildup, correction of which can lead to a sharp drop in production, or a rapid inflation.

Business has been so badly burned by unexpected inventory buildups in the past that production now tends to adjust very quickly to any drop in purchases, Annable said. And, therefore, this is not likely to be a contributing cause to a recession in 1986.

"In the circumstances of the U.S. economy today, inflation is the key to the timing of the next recession," Annable continued. "As long as it continues moderate, the odds are against a downturn. And the best bet . . . is that inflation stays well-behaved next year.

"It all adds up to no recession through 1986," he said.

The third speaker, Lief Olsen, an economic consultant formerly with Citibank, said that the rapid rate of money supply growth so far this year means "that right now, we are well-advanced toward higher growth in a short cycle.

"These short cycles are produced by compensatory adjustments in monetary policy in response to evidence that the economy is running too rapidly, as in early 1984, or too slowly, as in the past 12 months," Olsen said.

Mr. LEVIN. Mr. President, the current deficit situation is one of stalemate and deadlock. There is a dangerous game being played as to who will blink first. The President will not raise revenues even with a minimum tax on profitable corporations and wealthy individuals who are currently getting away with paying no tax by sheltering all their income. The President wants continuing large increases in the Defense budget. The House will not vote

for any revenues unless the President goes first.

Neither side has blinked. Deficits persist. Our national debt has doubled to $2 trillion in 5 years. It took 205 years for the first trillion to be run up.

We must change the status quo.

Some propose to do that with a constitutional amendment requiring a balanced budget. That is a dangerous course. It would write into the Constitution a mechanism which may well be too inflexible to protect the economic and physical security of this country.

Some propose a line-item veto which would not solve the problem and would give dangerous new power to Presidents to achieve Presidential goals unrelated to deficit reduction.

We must try something which will get us on a path to a balanced budget in a reasonable amount of time while preserving the delicate balance of powers in the Constitution which have been so critical to our well-being.

If there is a fear of doing what is necessary because of the political consequences, then we must try a mechanism which will make cuts in a fair way consistent with congressionally determined priorities. Such an approach will also probably force us to add revenues which, again, we can do without a general tax increase.

If the stalemate continues and the automatic mechanism takes over, I believe that some of the cuts will be so unacceptable as to force the President and the Congress to consider additional revenues such as a minimum tax on profitable corporations and wealthy individuals, continuation of the tobacco tax, and indexing income tax rates on a biannual basis instead of an annual basis.

We just cannot go on this way spending 20 percent more than we take in. The average American family is now paying $1,500 a year in interest on the Federal debt, and each year that amount is rising.

There is no substitute for consensus and courage as ingredients in the process of deficit reduction. In the absence of enough of either, I see no better alternative than a process which will provide fair, across-the-board cuts in spending based on congressional priorities, will not shift new power to the President and will probably force us to raise additional revenues—again, without a general tax increase.

The Gramm-Rudman-Hollings amendment we are about to vote on provides such a process. It has already been modified by my amendment to prevent a wholesale transfer of additional budgetary powers to the President, and I am confident that additional amendments will be passed by the Senate to broaden the coverage of the automatic spending reduction process and to increase the process' flexibility in times of recession. I also expect this proposal to be modified to protect the Senate's constitutional right to change its own rules.

Hopefully, the House of Representatives will pass a version of this proposal that is closer to that offered by Senator CHILES earlier today, which I preferred to this version. But the Gramm amendment is preferable to no action, to continuing stalemate. That is why I am voting for it.

Mr. ROCKEFELLER. Mr. President, having listened to much of the debate over the last 9 days, I have some significant concerns about the Gramm-Rudman-Hollings amendment. Obviously, indepth consideration by the relevant committees would have been desirable; the Senate is still each hour uncovering features of the amendment which have been little explained and less understood. Grafting this complex amendment on the extraordinary complexity of the Budget Act will inevitably lead to unforeseen consequences with which Congress will have to deal if this amendment is enacted into law.

But these concerns pale, in my estimation, compared to the overriding significance of coming to grips with the Federal budget deficit. We are facing a crisis. The Federal budget deficits pose a clear and present danger to our country's economic well-being. I will support this amendment because it represents strong medicine for dealing with the future deficits, and because I think that we need this framework to help force action to respond.

It has become commonplace to say that the deficits threaten our economic future—and they do. But the damage has already started. The deficits projected for the next few years are almost universally recognized as the root cause of our current high interest rates and the distorted value of the dollar, which is destroying the ability of our industries, workers, and farmers to compete—producing our soaring trade deficit. While my State of West Virginia has never fully recovered from the 1981-82 recession, all over the country, the overvalued dollar is undermining American industry, forcing jobs and future opportunities abroad. Many astute business people are calculating whether they can manufacture in this country and concluding they must take their plants and jobs overseas. And while I represent a State which has traditionally relied on basic industry, particularly coal and steel, the damage is being done across the board; Hewlett-Packard and IBM cannot afford to manufacture here either.

So we must deal with the deficits. Both the Chiles-Byrd amendment, which I supported, and the Gramm-Rudman amendment require the budget deficit to be reduced to zero over 5 years. Under Gramm-Rudman, if Congress does not act to achieve those reductions, the President would have authority to make the cuts needed to reach the deficit-reduction target.

This is strong medicine, and a major change in the way we do business here in Washington. But we face what is unquestionably a crisis, and the way we do business, in my judgment, is not equal to the challenge of getting us out of it.

The most serious argument against Gramm-Rudman, in my estimation, is that it represents an unprecedented grant of authority to the President, and that this President will use that grant of authority to continue his assault on the domestic side of the budget, which has already taken the lion's share of budget cuts during his terms of office.

I am philosophically opposed to many of the cuts Ronald Reagan and David Stockman have sought to make since 1981. I fought many of the cuts in my first year in the Senate, and I fought them when I was Governor. I continue to believe that a country that scrimps on education, training, child nutrition, research and development, and a host of other things that don't matter at all to Ronald Reagan is selling its future short. In dealing with the deficit, we shouldn't throw our priorities overboard, and we can't stop investing in the things that matter for our country's future.

But we must deal with the deficit.

Perhaps because of my experience as Governor, I see some link between Executive authority and the ability to keep budgets in balance. When the responsibility is clearly assigned, and when the Executive is accountable, I think the chance of making the hard decisions needed for fiscal responsibility is improved. The 535 Members of Congress, each of us committed to the programs and projects needed and desired by our States, are not a natural group of budget cutters.

But while Gramm-Rudman provides the framework for making hard decisions, adopting it does not mean trading our system for one-man rule. We cannot overlook the reality that this President—and any President—will be influenced by the will of Congress and a clear reflection of public opinion. Since his election in 1981, Ronald Reagan has sought to reduce the domestic side of the Federal Government. Since 1981, Congress, his own political party, and public opinion have checked his worst excesses. Some cuts have been made; others have been rebuffed. While Gramm-Rudman would give the President more leverage, it does not remove him from the multiple pressures of American politics, including his own party's desire for political survival.

If we enact a mechanism like Gramm-Rudman-Hollings into law, I predict that we will still be debating

the proper set of policies—what cuts are wise and which are disastrous; whether we need new taxes as well. In all likelihood, the Deficit Reduction Program that emerges from the Gramm-Rudman-Hollings framework would represent the consensus of what the American public would tolerate at a given point in time. But having put a balanced budget mechanism in place, we will have heightened the urgency of deficit reduction and provided a means of forcing action to deal with this intolerable deficit in the next few years.

Let me be crystal clear about one thing. The root cause of the deficits we face is the 1981 Reagan tax cut, which eviscerated the revenue base of the country. That tax cut, coupled with a massive peacetime defense buildup, created the structural deficits with which we are now burdened. In supporting Gramm-Rudman-Hollings, I am not accepting the bankrupt argument that Congress caused the deficit, or that Jimmy Carter caused the deficit, or that we have always had deficits. Deficits of this magnitude are new; they are fundamentally different from any peacetime deficits in history; and they are first, last, and always Ronald Reagan's deficits.

But that doesn't mean we can sit back, do nothing, and assign blame. I think the deficits are the No. 1 problem facing the country, and business as usual will not suffice for dealing with them. For that reason, I support the Gramm-Rudman-Hollings amendment.

Mr. BYRD. Mr. President, in 1981, I voted for a massive tax cut—$749 billion over 5 years. I did it because the people said, "The President should have a chance. Let him have his chance."

And so I voted in accordance with what I thought was the overwhelming sentiment in West Virginia and elsewhere, particularly West Virginia. I have since regretted that vote many times.

I believe, in this instance that those who vote for this amendment—and I try to remember always that I am not infallible—but I believe that those who vote for this amendment today are, in the future, if it becomes law, going to regret it. I think it will come back to haunt them.

I am foursquare in favor of balancing the budget, but I don't think the amendment before the Senate is the best way to do it.

The Gramm-Rudman amendment puts a straitjacket on Federal fiscal policy, preventing it from responding to change in the economy, international situations, and national security requirements. It also delays the day of reckoning on the deficit.

The amendment that I coauthored with Senator CHILES and others earlier today differs in at least three major respects from the Gramm-Rudman proposal, including:

The Chiles-Byrd amendment would have started the deficit reduction process a year sooner and placed it on a faster track than the Gramm-Rudman amendment;

The Chiles-Byrd amendment automatically protected necessary spending for national security requirements during times of undeclared war. The Gramm-Rudman amendment suspends its budget constraints only during times of declared war. The difference is crucial, because, for example, the United States has been involved in a declared war only once in 40 years, while there was no declaration of war in two of the heaviest and most costly recent conflicts—Korea and Vietnam; and

Unlike the Gramm-Rudman amendment, the Chiles-Byrd package provided an escape hatch to guard against excessive unemployment during an economic recession. The unemployment provision is essential—particularly to States like West Virginia, which have suffered high unemployment since 1981—because estimates have shown that unemployment under balanced budget spending restrictions contained in the Gramm-Rudman proposal could rise as much as 15 percent during a recession.

The Federal deficit is an enormous drain on the economic vitality of the United States. We need to eliminate the deficit, but we need a serious, effective, and responsible plan of attack. I do not think the Gramm-Rudman amendment meets that test, and I fear it may cause more harm than good.

I ask unanimous consent, Mr. President, that pertinent editorials from the Washington Post of today, the New York Times of today, and today's Washington Post op-ed article by our colleague, Senator BRADLEY, be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Oct. 9, 1985]

THE DEFICIT AMENDMENT

Its sponsors and the president keep chippng at the deficit-reduction amendment on the Senate floor to take important shares of the pain out of it. The more they rework it, the more it comes to resemble either 1) a showy effort on the part of those who brought us the deficit to demonstrate now how much they deplore it, and/or 2) a selective effort not so much to reduce the deficit as to use it as a lever to attain assorted lesser policy objectives.

The difficulty for the last five years has been that the deficit has been a residual element in policy-making. The president and the parties in Congress have had various programmatic or distributional goals—cut taxes, increase defense spending, show themselves to be the stoutest possible protectors of the seventh of the population that receives Social Security benefits. The choice, particularly as framed by the president, has come down to letting the deficit rise or cutting an enormous swath through all other domestic programs. Not even the president has been able or willing to propose the requisite cuts, and the deficit has risen.

The amendment in the Senate was meant to reenergize this stale debate by requiring that deficit-reduction come first and by confronting the president and Congress with a much more difficult set of choices. In its original form it set deficit targets declining to zero over the next five years and decreed that if Congress failed to hit a target, the president would have to make spending cuts, in defense and Social Security as well as the domestic remainder of the government. It made no mention of tax increases, but the idea was that, rather than cut defense and Social Security, the president would likely agree to one. There was a hammer at everyone's head.

But the terms keep changing. To pick up support on the floor, the sponsors agreed that none of the burden would fall on Social Security; it would be exempt. Partly to ease the pressure on defense and partly to avoid deep spending cuts just before next year's elections, they have also stretched out the deficit-reduction schedule; the amendment now would probably have no effect for a year. Meanwhile, the president, in professing "enthusiastic support" for "what might well become historic legislation," has served oblique notice that he would not expect it to affect defense. In "a personal caveat" in his radio speech on Saturday he reminded listeners that Congress has already agreed (in this year's budget resolution) to defense spending increases of 3 percent per year after inflation over the next several years. "And next year I will propose those amounts already accepted as necessary for keeping the peace," he said.

The sponsors say that defense remains subject to the terms of the amendment, but that is clearly not the way the president understands or intends it. The stakes are too high not to have agreement on the rules. The amendment would have some seriously uneven effects within the Defense Department. The theory is that, to avoid these, the president would agree to a more rational budget. But to the extent that defense became exempt along with Social Security, there would be no pressure on him to agree to anything. The amendment would then only seriously affect the domestic programs that have been in the balance against the deficit all along. It would be a stronger license to dismantle them. It sounded a week ago like a good idea. It begins to sound increasingly like a bad one.

[From the New York Times, Oct. 9, 1985]

CONGRESS RUSHES TO UNFAIRNESS

Melodrama surrounds Congress, where members are plenty touchy about approving a new borrowing limit of two trillion dollars. Will the Government grind to a halt while legislators dawdle? Would the Treasury really dare tell banks to bounce Federal checks? Will a so-called balanced-budget bill emerge as law?

The first two questions are the melodrama, lacking honest suspense. If Government stops at all, the interruption will be taken, a nuisance and not a disaster. Washington may be technically obliged to stop writing checks for a few minutes; but not for one minute does anyone think that Federal checks will turn worthless.

The danger of truly lasting damage arises in question three. The Senate and House

have suddenly been seized by the notion that they must now—right now! hurry!—do something about the deficit. And some members think the way out is a bill ordering it to stop. The bill is as unfair as it is unexamined.

The huge Reagan deficits remain an urgent concern. But this hasty proposal for controlling them is foliage. Connecticut's Republican Senator, Lowell Weicker, one of the opponents, properly calls it a "legislative substitute for the guts we don't have to do what needs to be done."

What's the rush? The deficit problem has been around for five years as both President and Congress have ducked their responsibility to adjust spending fairly, while refusing to provide enough revenue to pay the bills. Finally embarrassed by the inevitable consequences, they're running for the bushes, including the new one sponsored by Senators Gramm, Rudman and Hollings.

It would require the President to submit budgets that reduce the deficit $36 billion each year, until it drops to zero in 1991. In event of a deadlock with Congress, automatic spending cuts would come into play. But only some people would bear the burden.

Less than half the budget would be subject to cuts. Interest, Social Security, two-thirds of the defense budget and all other programs with contract commitments would be exempt. Meanwhile, the possibility of raising adequate revenues would not even be considered.

What kind of fair sacrifice is it to do a lion's share of the chopping out of school lunches, Supplementary Social Insurance and Federal pensions? Where is the justice in disproportionately starving the safety-net programs for the poor, like food stamps, Head Start and community health? Where is the common sense in chopping from military readiness, job training, the National Institutes of Health and agencies like the F.B.I. and the F.A.A.?

The Impact would be so punitive that the next Congress and the next President would be hard pressed to repeal it. There's an easier way to fight the deficit battle fairly: Avoid both the pretense and the punishment and kill this bill now.

THE GRAMM/RUDMAN PLAN: CONGRESS AT ITS WORST

(By Bill Bradley)

Congress is about to vote on the Gramm/Rudman mandatory balanced budget plan. This plan would require the budget deficit to be reduced to increasingly lower levels over a five-year period until the budget is in balance. If Congress does not act to achieve those reductions, then the president would have authority to "sequester" or eliminate unilaterally automatic increases in entitlements, except Social Security, and to make across-the-board cuts in defense and nondefense programs in order to reach the deficit-reduction target. Before Congress is stampeded, let us stop and think what's wrong with this proposal.

First, Gramm/Rudman is an unprecedented and probably unconstitutional shift of power from the legislative to the executive branch. But as one supporter sheepishly explained, "It's only for five years." With this additional power, Ronald Reagan, if he plays hard ball (and who thinks he will not?), could effectively dismantle the nondefense portion of the budget and wreak havoc with America's poor.

Under Gramm/Rudman in October of next year, when Congress would have to comply with this measure, we would have to come up with anywhere from $20 billion to $50 billion in additional annual deficit reductions, according to the Congressional Budget Office. Since the president has consistently ruled out any tax increase or defense cuts and wants Social Security to be a separate fund, he is likely to veto any congressional action to meet the target by raising taxes or cutting defense. Unless Congress musters a two-thirds majority on a veto override to raise taxes, the president would be required to cut across the board in the controllable portion of the defense and nondefense budget. That would mean a minimum of a 5 percent real cut in defense.

With each additional year as the deficit gap became larger and Congress could not get a two-thirds vote for tax increases, a bigger cut would be required for defense under Gramm/Rudman. This threatens to gut our readiness, to foreclose the option of building up our conventional strength, and to force us to rely more heavily than ever on offensive nuclear weapons.

Moreover, it stretches the imagination to believe that Ronald Reagan would actually preside over this defense cut at a time when the nation is entering serious arms control negotiations with the Soviet Union. Instead, shortly after Gramm/Rudman is passed, and at a moment of heightened tension somewhere in the world, the president will send Congress a message. That message will call upon a Congress to exempt defense from across-the-board cuts in the name of national security. With a simple majority, Congress will then veto to exempt defense.

Once this is done, the entire burden of the budget deficit reduction will come from cutting the nondefense programs and from eliminating cost-of-living adjustments for the middle class and the poor. Nearly all of the reductions would have to come out of the $100 billion that pays for education, the environment, children and other controllable nondefense programs. Even a brief recession in 1987 or 1988 could cause the deficit to mushroom over night, and we would need close to $75 billion to meet the targets of this proposal.

So, within three years, the entire nondefense discretionary budget of the U.S. government would be nearly wiped out by presidential fiat. With Gramm/Rudman attached to the debt limit in the legislative equivalent of the gun fight at the O.K. Corral, Congress will have ceded the authority vested in it by the Constitution and relegated the federal government to the status it held under Herbert Hoover.

Second, this legislation shows Congress at its worst. Gramm/Rudman burst upon the scene little more than eight days ago. The authors and supporters of the amendment continue to modify its provisons daily. One day they say that the entire defense budget is subject to an across-the-board cut. The next day, they say one-third of the defense budget is excluded from the proposal. One day, they say the farm program are subjected to cuts. The next day the CBO states quite explicitly that farm programs are not covered by this bill. One day Social Security is subjected to cuts. the next day it is sacrosanct. One day the proposal uses CBO numbers. The next day the numbers come from the Office of Management and Budget.

All of this confusion is understandable because no hearings have been held. The bill wasn't even printed until two days after the majority leader insisted we had to vote on it. Gramm/Rudman could very well be an unconstitutional delegation of power, but no constitutional scholar will be able to offer an opinion before it is enacted. It is all too likely that the deliberative branch of Congress may act unwisely in a nine-day rush to judgment.

Third, Gramm/Rudman is a mindless pursuit of a dubious economic objective. It requires the budget to be balanced in 1991. Why 1991? Why not 1994? Why not 1989? Why a balanced budget? The people of this country want spending restraint and defict reduction. Reducing the deficit is essential, balancing the budget is not. Contrary to the sponsors' favorite analogy, the national government is similar to a household. Nor is it similar to a state government. The national government has national economic responsibilities that mandate money be spent under certain economic conditions. That is the price of humane government in the 20th century.

The national government also has the responsibility of world leadership. The $9 billion in increased spending on the World Bank that Treasury Secretary James Baker says is essential to resolving the world financial crisis would be impossible under Gramm/Rudman, which would require the president to cut our existing contribution, absent congressional action. Yet unless we take on a leadership role in tackling the mountain of debt now casting a shadow across our economic future, balancing our budget could prove to be an exercise in futility. How could we support Israel and protect our vital interests in the Mideast if we have to make across-the-board budget reductions? There are some things worth spending money on, even if that leaves the budget somewhat unbalanced.

Finally, Gramm/Rudman is posturing at its worst. It is procedural answer to a substantive problem. But the Senate now has all the procedures it needs to reduce the deficit. What it lacks is the will. A legislator will not cut one dollar from the deficit with a yes vote on Gramm/Rudman. If we truly want to see defense cut 5 percent in real terms, we should vote now to do so. Why must we, in the name of congressional leadership, abdicate to the president our responsibility for setting the nation's priorities? If we believe more revenues are necessary, we should vote a tax bill now. Why must we comfort ourselves with the fiction that, at some point in the distant future, the president will change his mind and accept tax increases or that 66 Senators will ram them down his throat then, when they won't now?

The present deficit occurred on Ronald Reagan's watch. The deficits have been predestined since August 1981 when the tax bill was enacted. Congress has cut nondefense spending by $250 billion in the reconciliation acts of 1981 through 1985. Additionally, Congress has reduced the deficit $200 billion with the tax increases of 1982 through 1985. Had Congress not acted, our deficits would be $200 billion larger today.

Instead of once again grappling on a bipartisan basis with the tough decisions, particularly on taxes, Congress appears poised in a moment of irrationality and timidity to give Ronald Reagan the sole power to reorder the priorities of the national government. It will be an action that we will all live to regret.

Mr. BYRD. Mr. President, I make a parliamentary inquiry. What are we voting on—the Gramm amendment, as modified, and as amended?

The PRESIDING OFFICER. That is correct.

51-059 O-86-43 (Pt. 19)

Mr. BYRD. Do I properly understand that the appropriate construction for the phrase "as modified" in this instance would be the modification only that was sent to the desk last Friday?

The PRESIDING OFFICER. That is correct.

Mr. BYRD. Then we are voting on the amendment, as modified only by the modification that was appropriately sent to the desk last Friday, and in addition thereto the amendments—I believe about four in number—that have been adopted by the Senate since.

The PRESIDING OFFICER. There have been a total of five amendments adopted.

Mr. BYRD. Very well. There have been no substitute modifications—I am not talking about amendments—there have been no substitute modifications to the text of the Gramm amendment as of last Friday, including the modification that was made last Friday, other than the amendments, five in number?

The PRESIDING OFFICER. None would be in order, the yeas and nays having been ordered. There have been no modifications since then.

Mr. BYRD. I thank the Chair.

Mr. DOLE. Mr. President, following the vote on this amendment, which I hope will be approved, I will ask my colleagues to remain in the Chamber after the vote because the distinguished chairman of the Budget Committee, Senator DOMENICI, will then discuss a number of modifications, primarily from that side of the aisle, that we would like to offer without objection. There seems to be a bit of suspicion that we are trying to pull something over on someone and that is not the case.

There has been nothing, as the distinguished minority leader just determined, in this amendment except the amendment that has been pending as modified plus the amendments adopted this morning. The distinguished chairman of the Budget Committee will go into detail as much as it is necessary into some of these areas. Again I indicate these new amendments are mostly raised by Members on that side of the aisle. I think one was raised by a number of committee chairmen and the ranking members on both sides of the aisle. Then, I think the distinguished minority leader had some questions about the rules change matter. So that will be the next step.

Mr. President, let me also caution that we need to take action rather quickly on the temporary debt ceiling extension. I had a chance to visit with the Speaker briefly this morning. Also I know the distinguished chairman of the Finance Committee has visited with the chairman of the Ways and Means Committee. They would like to receive this little document—the temporary extension—as quickly as possible. I hope we can take maybe 20 or 30 minutes after the vote to have Senator DOMENICI or others explain modifications. I hope we can agree to them. But I would not want to spend a great deal of time before we go on to the debt ceiling extension.

Following that, there are still 13 amendments. We would then propound a unanimous consent request, and about three or four of those amendments will disappear if Gramm-Hollings-Rudman is adopted.

Mr. CHILES. Mr. President, I will say to the majority leader that we have just received a written list, I think, of the modifications that you are talking about that are going to be proposed. If the Senator is talking about handling that before we go to the debt ceiling extension, I do not know. I think we are going to need some time to look at those, and study them. I certainly do not want to sit here and indicate that I can be done in 2 minutes, 5 minutes, or 10 minutes, when we have not had a chance to study them yet.

The distinguished chairman of the Rules Committee mentioned a couple of things to me this morning.

Mr. DOLE. We will do it as late as it takes this evening.

I ask for regular order.

The PRESIDING OFFICER. Under the previous order, the hour of 3 p.m. having arrived, the question is on agreeing to the amendment proposed by the majority leader, Mr. GRAMM, Mr. RUDMAN, Mr. HOLLINGS, and others. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Maryland [Mr. MATHIAS] is absent on official business.

The PRESIDING OFFICER (Mr. GOLDWATER). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 75, nays 24, as follows:

[Rollcall Vote No. 213 Leg.]

YEAS—75

Abdnor	Garn	Melcher
Andrews	Goldwater	Murkowski
Armstrong	Gore	Nickles
Baucus	Gorton	Nunn
Bentsen	Gramm	Packwood
Biden	Grassley	Pressler
Boren	Hatch	Proxmire
Boschwitz	Hawkins	Pryor
Bumpers	Hecht	Quayle
Burdick	Heflin	Rockefeller
Chafee	Heinz	Roth
Cochran	Helms	Rudman
Cohen	Hollings	Sasser
D'Amato	Humphrey	Simon
Danforth	Kasten	Simpson
DeConcini	Kennedy	Specter
Denton	Kerry	Stennis
Dixon	Laxalt	Stevens
Dodd	Leahy	Symms
Dole	Levin	Thurmond
Domenici	Long	Trible
Durenberger	Lugar	Wallop
East	Mattingly	Warner
Evans	McClure	Wilson
Ford	McConnell	Zorinsky

NAYS—24

Bingaman	Harkin	Metzenbaum
Bradley	Hart	Mitchell
Byrd	Hatfield	Moynihan
Chiles	Inouye	Pell
Cranston	Johnston	Riegle
Eagleton	Kassebaum	Sarbanes
Exon	Lautenberg	Stafford
Glenn	Matsunaga	Weicker

NOT VOTING—1

Mathias

So the amendment (No. 730), as modified, was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER (Mr. HATFIELD). The majority leader is recognized.

Mr. DOLE. Mr. President, we would like to take until 4 o'clock for the distinguished chairman of the Budget Committee to explain a number of changes that we would like to make in the Gramm-Hollings-Rudman amendment that have been brought to his attention again primarily from Members on the Democratic side of the aisle. If I could turn it over to Senator DOMENICI, I think he could go through those amendments. If there are objections or corrections, we would like to resolve any areas of doubt so we could get on to voting on the temporary extension so we can send it to the House. I have been advised they would like to have it as quickly as possible because they have some interest in it.

Mr. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. DOLE. I will be happy to yield.

Mr. BYRD. Mr. President, I hope that Senators will stay around and listen, especially those who have voted already for the Gramm, et al., amendment.

Mr. CHILES addressed the Chair.

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mr. CHILES. I was wondering if I could ask the majority leader a question. I thought our understanding was that after we voted on Gramm-Rudman, which we have done, we were going to proceed immediately to do the debt extension and send that over. We are still trying to analyze some of these changes. There are some of them which I think are far-reaching; that are going to take some time, and it seems to me that is different from what we talked about last night. We did not hear anything about this last night, that there was going to be intervening business that had to be transacted, was to be transacted prior to the time we set this down. If the House needs to get this and act on it, I do not see why we do not send this down there.

Mr. DOLE. If I can get a unanimous-consent agreement. The problem was last night I could not get a unanimous-consent agreement, because the distinguished Senator from Louisiana had a problem with the language in the temporary extension. But I would not want to send the temporary extension to the House until we have an agreement to vote on final passage of the pending measure.

There may be some who may not take a great deal of time, and we could move it to the bottom. I know that the Senator from New Jersey has amendments he is willing to offer.

Mr. CHILES. Is there some reason you cannot get that unanimous-consent agreement now? Does this have anything to do with the unanimous-consent agreement?

Mr. DOLE. It might, if somebody objected, saying, "I don't think that's a good idea," and it is not on the list, and then it could not be offered. I think we probably could work that out.

Why not, in the next 10 or 15 minutes, let the Senator from New Mexico take a shot at it, and I will figure out a time agreement and show it to the distinguished minority leader.

Mr. BYRD. What the distinguished majority leader is saying is accurate. We had various amendments lined up in an overall agreement, but we had first after the Gramm-Rudman amendment the short-term extension. The majority leader did have a problem with the language of that, and we had to move ahead.

Mr. DOLE. Let me try to figure out a reasonable agreement on this effort, and I will be back to the minority leader.

Mr. BRADLEY. Mr. President, will the Senator yield for a question?

Mr. DOLE. I yield.

Mr. BRADLEY. In the interim, would it be possible for us to proceed with the amendment I am prepared to offer on the defense portion of Gramm-Rudman? I know that the majority leader has assured me that I will have an opportunity to offer the amendment, and I would like to do so as soon as possible, so that we can begin to enact provisions of the Gramm-Rudman amendment.

Mr. DOLE. I felt we could propound a unanimous-consent agreement; that at this time the distinguished chairman of the Budget Committee could go over some of the technical changes he would like to make. I have the Senator from New Jersey at nearly the top of the list, and I will try to get that agreement in a few moments.

Mr. SARBANES. Mr. President, will the Senator yield for a question?

Mr. DOMENICI. Mr. President——

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I wonder if we could have order.

The PRESIDING OFFICER (Mr. GOLDWATER). Will the majority leader yield for a question?

Mr. DOLE. I yield.

Mr. SARBANES. Is the RECORD to be available to us for last night's deliberations—the CONGRESSIONAL RECORD?

Mr. DOLE. I assume it will be. I did not work on it.

Mr. BYRD. Unfortunately, the RECORD will not be available to us, has not been available to us. It was cut off at some point about midmorning, right after midnight, or perhaps a little before that. The RECORD is still outstanding.

Mr. SARBANES. I understand that. It is 3:45, and there were some representations made last night in the course of debate which it seems to me are relevant now, as to how we are going to proceed—in particular, assurances that were given about how we were going to go after we had this vote on Gramm-Rudman, as I recall, with respect to the temporary increase in the debt ceiling.

Mr. DOLE. We could not reach agreement on that. I tried. We would have reached an agreement, but I could not get unanimous consent on that provision, so it stopped right after the vote on the Gramm-Rudman amendment.

Mr. SARBANES. Earlier, the majority leader made a rather flat statement, as I recall. That is why I was looking for the RECORD.

Mr. DOLE. What I would like to do now is proceed, and we can argue about last night's RECORD. We know that some of you want to defeat the bill, even though we have come this far, but we are not going to let that happen if we can avoid it.

Mr. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. DOLE. Yes.

Mr. BYRD. I hope we could proceed very soon with the extension of the debt limit, the short-term extension.

As I recall, the only problem that occurred last night to intervene between the actions and discussions we were having and a final wrapup of an agreement was language that was in that short-term extension. I believe it was Senator LONG who had some problems with that.

I wonder if someone could take a look at the problem and the language, so that we probably enact the short-term extension earlier.

I think this is going to take a while, I say to the distinguished majority leader.

Mr. DOLE. I think it is fair to point out for the RECORD—I know reference has been made by the Senator from Maryland—that after that discussion, there was a big discussion about what is meant by "as modified." That was about 3 o'clock in the morning.

We felt that "as modified" was not the interpretation the distinguished minority leader had, and we yielded to the minority leader, and that is why we have this problem. So the RECORD will not reflect that, unless you read the entire RECORD.

My view was that "as modified" meant that we voted on the leadership amendment. We did not go behind it or question it. We felt that we could do the same with the Gramm-Rudman-Hollings amendment. But we were restricted to what was at the desk, and they had a big discussion on that. On that basis, coupled with the problem with the short-term debt extension, we recessed about 3:15 a.m.

Mr. CHILES. Mr. President, if the Senator will yield, I know there was a problem that came up as to modification. But I recall that when we were first talking about whether we were going to be able to get a unanimous-consent agreement, the majority leader said he understood that there was a problem of perception on his part, that people over here were concerned about whether we would send it down.

I thought the majority leader said not once but twice, "You have my word that when we have a vote on the Gramm-Rudman amendment, the next order of business," or, "We will send it down and it will be by voice vote," and you will furnish votes on your side.

Mr. DOLE. That is right. Just give me a time for final passage.

I have been here a few days, and I am not going to fall into that trap. We will work out a time agreement. If you give me a time for final passage, we will send it to the House.

You have lost fairly soundly here, and let us keep the faith we have with the Members of this body. If you want to start another filibuster on that side, I am prepared to go into the evening.

Mr. CRANSTON. Mr. President, will the Senator yield for a question?

Mr. DOLE. I yield.

Mr. CRANSTON. The majority leader stated that there are Members on this side of the aisle who want to defeat this measure. I should like to say that I do not know of any Member on this side who wants to defeat this measure. Some of us do not like the Gramm-Rudman amendment. We know that we have to pass this and we are not going to block it in this bill.

I presume that the majority leader will try to work out an understanding on what amendments will be brought up. We do not know what amendments there will be. At the moment that is done, we can agree on a time certain tomorrow.

Mr. DOLE. That is what I attempted to do a few moments ago, but somebody wanted to give me the third-degree.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, first, let me thank the majority leader for giving me some time.

I am not sending an amendment to the desk at this time. Anyone who wants a copy of the amendment as I contemplate it either has it or it is available.

What I would propose to do is this. Obviously, the leader wants a time certain for adoption of the bill, and I will spend a little time telling you what this amendment would do if I offer it.

I would like you to know that Senators BOREN, BENTSEN, and LONG, on your side, have worked with us on a number of the provisions, as has Senator HOLLINGS. Senator PACKWOOD has worked with us on this side in detail on it. It contains the amendments that Senator DODD wanted. It contains the amendment of Senator LEVIN which was adopted.

I have not asked him if he supports the entire measure, but so the Senator will know, those amendments are in the perfected amendment.

Senator BOREN worked with us at length on CCC and other programs. I say to Senator BOREN, however, it does not include his language about including Social Security COLA's. So no one ought to be concerned about that.

The amendment includes PAULA HAWKINS's amendment which makes reconciliation bills which include Social Security provisions subject to a point of order.

Mr. KERRY. Mr. President, will the distinguished chairman yield for a question?

Mr. DOMENICI. I am pleased to yield.

Mr. KERRY. Mr. President, I simply would like to say many of us can facilitiate this process if we could somehow have a copy of the proposed modifications and of the bill as modified. I think we have a staff request for one but we have had some difficulty getting it. I certainly for one would like that and I think my colleagues will appreciate that.

Mr. DOMENICI. I said to my friend from Massachusetts I announced they are here. I think I brought 50 down. If that is not adequate we will get some more. Anyone who wants one will have one.

Mr. KERRY. I thank the Senator.

Mr. HART. Mr. President, will the Senator yield for a question?

Mr. DOMENICI. I am pleased to yield to my friend from Colorado.

Mr. HART. I thank the Senator.

Is it the intention of the distinguished chairman of the Budget Committee to describe the package of amendments contained and then move their adoption in whole, or in part or what process does the Senator envision?

Mr. DOMENICI. Mr. President, let me say to the Senator from Colorado what I am presently going to do is explain as best I can this amendment. I am going to discuss it in depth, and describe how it varies from what is at the table.

I have no present plans for how to consider the amendment. I was hopeful that we could send it to the desk on behalf of a number of sponsors. The leader desires that we discuss it first, and I understand his desire. We may indeed, after the discussion, send it on behalf of 15 or so cosponsors to the desk as an amendment.

The purpose of this has been to see if we could iron out any difficulties that anyone has with the legislation. Obviously, everyone is not going to agree, but we can at least make sure everyone understands it.

Mr. HART. Will the Senator yield further?

Mr. DOMENICI. Let me say this: I only need a little bit of time because I am only going to speak for 15 or 20 minutes, but I will be glad to answer a question.

Mr. HART. Then that leads to another question. Why does the Senator have only 15 or 20 minutes.

Mr. DOMENICI. I understand the leader sought that amount of time for me. He is out working with others on the other business of the Senate including a proposed unanimous consent to adopt the short-term extension.

Mr. HART. With due respect to all of those on this side of the aisle, the Senators named he has been working with, or someone has been working with, and enormous respect for each of them, they do not represent me and they do not represent the State of Colorado.

I am in this body as a representative of a sovereign State, and the normal course of proceedings in the Senate is if you want to change a measure you offer an amendment.

Mr. DOMENICI. That is correct.

Mr. HART. What it seems to me is being proposed here is an extraordinary process, that suggests that some members of the Democratic Party speak for all the Democratic Party or for all the representatives of each sovereign State. That is not the case. I do not know what arrangements have been made or deals have been cut. But I will do what I can to prevent action on a package that I have not seen, that may represent some modification that a group of Senators want, but that I do not know what it is.

Mr. BENTSEN. Mr. President, if the Senator will yield on that, let me say there is no intent on the part of those of us who worked to try to represent all Democrats, or all Senators, or the Senator from Colorado. We were trying to represent things that concern us, in my instance the jurisdiction of the Finance Committee.

I would certainly agree that now that the amendment has been proposed as an amendment, it is one which will be discussed. The Senator should be given the evidence so that he can study the need for this amendment. I do not see anything unusual in that process.

Mr. HART. Is there a group of them that run some pages that we are going to pass in 15 minutes? Is that correct?

Mr. BENTSEN. I was not making that point.

Mr. DOMENICI. I did not suggest that. I said the leader suggested that I take 15 or 20 minutes now. That is what I am trying to do.

I yield to the distinguished Senator.

(Mr. COHEN assumed the chair.)

Mr. PACKWOOD. Mr. President, I want to assure the Senator from Colorado of something because I had a hand in these amendments. I know what he is thinking and the Senator from New Mexico could turn them in and talk for an hour on them now. There is no intention here to sneak something substantively through.

I will tell the Senator very frankly what a number of us were worried about. As this was initially drafted, there was an extraordinary power in the Budget Committee to supercede the substantive jurisdiction of the authorizing committees. There are a number of amendments in here that correct that and make sure that the substantive committees are not gone around in either the initial budget process or subsequent sequestering or reconciliation or anything else. That is the thrust of the bulk of the amendments that the Senator will talk about, and I think he is perfectly right to ask what are they about but to the extent he can take my word for the general tenor of them, that is the bulk of what they are about.

Mr. MOYNIHAN. Mr. President, will the Senator yield for a question?

Mr. DOMENICI. I yield.

Mr. MOYNIHAN. I have been on this floor for 5 days saying I will offer an amendment to include the Commodity Credit Corporation in that category of expenditures that are considered relatively controllable. But now I learn there is a new provision in this amendment. As my distinguished chairman knows, when some of these discussions were taking place I was chairing a hearing in the Finance Committee. But what is this business of the Commodity Credit Corporation?

Mr. PACKWOOD. I think if he goes through it he will explain.

Mr. DOMENICI. I say to my friend, the Senator had an arrangement or on the floor he was going to offer it and the Senator said he was going to accept it. We put it in this amendment. We tell the Senator that.

Mr. MOYNIHAN. No. That is not what I said. I never for a moment said I would accept what was proposed.

Mr. DOMENICI. No; I did not say that. I said what the Senator proposed, as we understand it, is in this amendment. We are not trying to take his amendment right away.

Mr. MOYNIHAN. Could the Senator say that again?

Mr. DOMENICI. We are not trying to preclude his right to have a CCC amendment.

Mr. MOYNIHAN. If the Senator has my amendment in there, I do not care how it gets to the legislation.

Mr. DOMENICI. I say if it is not what he likes, the matter should be discussed further.

Mr. MOYNIHAN. Perhaps we could get a copy.

Mr. DOMENICI. The copies are here. We will get them to the Senator.

Mr. MOYNIHAN. That does tend to advance well. On the other hand, the majority leader observed last Saturday, "when people start reading these things"—I will leave that be.

Mr. DOMENICI. All right.

I will be pleased to answer questions as I proceed through. I just would like to get started.

The amendments as I understand them——

Mr. METZENBAUM. Mr. Pesident, without intending to make a long speech, is there a simple Domenici amendment that we may read?

I am told that all I can read is the whole Gramm-Rudman matter and that I have to define what changes. But is there a simple amendment that speaks just to this point he makes?

Mr. DOMENICI. There is just one amendment, the one the Senator is getting, that contains all of the changes. If the Senator reads it, he will find the amendments which were adopted yesterday and today along with everything I propose on behalf of the Senators I enumerated.

Mr. METZENBAUM. Let me ask a simple question. Does this amendment include all the langauge of Gramm-Rudman-Hollings or is this just an amendment to Gramm-Rudman-Hollings?

Mr. DOMENICI. It includes all the language in the Gramm-Rudman-Hollings unless otherwise amended, but almost all of it is what they originally sent to the desk as modified, amended, and voted in just a while ago.

Mr. METZENBAUM. As the Senator well knows, this is 44 pages, which totally encompasses the Gramm-Rudman-Hollings proposal. How are we going to understand exactly what the Domenici amendment is without taking the hours it would require in order to compare Gramm-Rudman as against this? And it is certainly not our usual way of proceeding, and that is what I do not understand why the Senator who is a skilled legislator would expect us to be able to proceed on the basis of this all encompassing amendment which is really in the nature of a substitute, as a matter of fact.

Mr. DOMENICI. I will give the Senator a typewritten summary of the changes. I just sent it out to be Xeroxed and it will be in a form that is perfectly referenced between the pending amendment and this new version, so he can read it and he will know exactly what is in it.

Mr. METZENBAUM. That sounds helpful and we will start from there.

I will yield to the Senator from New Mexico until we study this.

Mr. DOMENICI. I thank the Senator.

Let me state first that there are no longer any amendments to the Standing Rules of the Senate.

Second, the amendment now has a point of order against legislation until the committee of jurisdiction files its 302(b) allocations. This adds to the point of order in the amendment we adopted which enforces the 302(b) allocations. This amendment ensures your right to know what the 302(b)'s are since they are enforceable by point of order.

Third, you will now get quarterly estimates of economic growth.

Fourth, some people thought that maybe in the original language the mandate to the President that he must sequester the full amount of the overage might not have been firm enough. To the best of everybody's ability, this amendment now makes it absolutely mandatory that the full amount of the deficit overage as prescribed be sequestered.

The language that Senator LEVIN proposed here on the floor——

Mr. BRADLEY. Will the Senator yield at that point just to clarify something?

The full amount of overage would be sequestered according to the percentages in the bill, is that right, in the controllable nondefense and defense areas?

Mr. DOMENICI. That is right. No change in the makeup, merely additional words to satisfy everyone that wanted to look at it that the President cannot sequester half the overage and say, "I have done the job." It has to be the whole deficit overage.

Mr. CHILES. I wonder if, as the Senator describes this, he could tell us the page number. That will help us to follow this.

Mr. DOMENICI. I say to Senator CHILES, we are sending him a summary with the page references.

Mr. JOHNSTON. Mr. President, is it in order for the Senator to yield for a question?

Mr. DOMENICI. Let me first talk a moment on the floor here with Senator CHILES.

As the Senator goes through those, if he finds something that he would like to discuss, we would be pleased to do that. I did not mean to indicate that I did not want to discuss them with him. I just wanted to make sure he had a summary. As we move through and discuss them, he can see how urgent they are to him.

Mr. CHILES. That would be fine. It would be helpful, as the Senator is talking, if he could identify, if he has it there, what page he is on on the original text. We look at this and we are still trying to fight to get back to the page and it just takes us longer to try to follow it.

Mr. DOMENICI. The documentation the Senator received is a very detailed effort on our part to do the best kind of illustrating. And we referred to sections, if you will notice. And if you look up the section, you will find the section that I am alluding to.

There is a section of the bill that deals with payments required by existing contracts, and it is made clear that you cannot break existing contracts.

There is a section with reference to controllable expenditures. There has been discussion on controllability. The section that we now suggest is known as broadened controllability, which everybody has been talking about here on the floor, meaning that we have brought as much into that sequester category or that sequester pot, other than Social Security, as you could. Everything is sequesterable, except interest payments, Social Security COLA's, and clearly no one's existing entitlement benefits can be changed. If somebody is entitled to benefits, it cannot be changed.

Mr. CHILES. Can the Senator tell me what page he is on now?

Mr. DOMENICI. I say to Senator CHILES we will get him the referenced section in just a moment.

Mr. HART. Will the Senator yield for a question?

Mr. DOMENICI. Yes.

Mr. HART. Did I understand the Senator from New Mexico to say that the amendment we have enacted would be modified by this proposal to include or exclude existing contracts? What was the language there; about three pages ago, three sections ago?

Mr. DOMENICI. Prior year contracts that are executed and in existence cannot be broken as part of an automatic sequestration.

(At this point, Mr. SYMMS assumed the Chair.)

Mr. HART. Then that clarifies the question that was raised in the past 3 or 4 days as to whether long-term military procurement contracts are or are not subject to Presidential impoundment.

Mr. DOMENICI. To Presidential sequestration?

Mr. HART. Impoundment.

Mr. DOMENICI. Is the Senator speaking of sequestering?

Mr. HART. Sequestering means instead of legislative impoundment.

Mr. DOMENICI. Let me say if they are in existence at the time of the sequestration, and they are binding contracts, they cannot be impounded.

Mr. HART. Cannot be?

Mr. DOMENICI. Cannot.

Mr. HART. Then I beg the Senator to elaborate. The sponsor of the amendment said that the entire Defense Department budget was subject to impoundment or sequestration, whatever phrase you want to use. The Senator is now saying the long-term hardware procurement contracts are not subject to impoundment.

Mr. DOMENICI. All I am telling the Senator is that prior year contracts cannot be automatically sequestered. The same applies for CCC.

Mr. HART. Can be or cannot?

Mr. DOMENICI. Existing prior year contracts for CCC cannot be sequestered.

Mr. HART. Cannot. So the issue of $109.2 billion of multiyear military procurement is now clarified by this modification and taken completely off the table.

Mr. DOMENICI. I do not know that $109 is the number, I say to the Senator.

Mr. HART. That is the number contained in the budget documents that we have here, "Budget of the United States Government, fiscal year 1986," page 9-44, outlays for prior year contracts and obligations, national defense, $109.2 billion. The modification, once and for all, takes that $109 billion off the table. Is that correct?

Mr. DOMENICI. I really do not think that there is any reference in this amendment to that table. I will cite the section. Page 37 of the amendment before the Senator that the Senator asked before—I hope the Senator received it. If the Senator has not, I will send somebody with another one.

Mr. HART. I have not seen it.

Mr. DOMENICI. Page 17, is the definition, item (g).

Mr. HART. You will have to read it to me. Would the Senator mind reading it to me?

Mr. DOMENICI. I will send it over.

Mr. HART. Let me say while the Senator is looking if there is any thought on the part of the leadership of the Senate that we are going to enact this document any time in the very near future, they might as well forget about it. Because here is one Senator that is not going to let that happen so long as we cannot get answers. We are right back where we were last Thursday. What is going on in the U.S. Senate, Mr. President? We are being asked to enact a package of modifications, and I have just received it at 4:12 in the afternoon, and answers cannot be given that we have been asked since last Thursday.

Now we are told $109.2 billion of military contracts are not on the table, and are not subject to Presidential impoundment. Would it not have been nice to know that 15 minutes ago?

Mr. MELCHER. Will the Senator yield?

Mr. DOMENICI. I don't believe that all military contracts are off the table.

Mr. HART. The sponsors said on the floor of the U.S. Senate on Sunday that they were.

Mr. DOMENICI. The sponsors are here.

Mr. HART. I am glad to see it.

Mr. GRAMM. If the Senator will pose his question I would be happy to try to answer it.

Mr. HART. The Senator from New Mexico kindly in response to a question from the Senator from Colorado elaborated on the issue of military contracts that he says are covered by this document which has no title but is a proposed substitute. The issue is this: Are those the multiyear contracts contained in page 9-44 of the Budget of the United States Government for fiscal year 1986 as outlays for prior-year contracts and obligations for national defense?

Mr. GRAMM. If the Senator will allow me, let me say that in this proposal every element of the budget as it is currently defined except Social Security, which we have taken off budget, is now part of the sequester process. Those entitlements that have cost-of-living increases that are driven by eligibility are sequestered only so far as the cost-of-living increase is concerned. All other elements of the budget are subject to sequestering. We cannot invalidate a contract. We have heard discussion early today about doing it. We heard discussion about the DIVAD. The DIVAD contract was not invalidated because we simply came in and said we are not going to pay for it. It was invalidated because we had a clause in the contract that said unless it met performance standards, we would not accept it.

Mr. MELCHER. Will the Senator yield?

Mr. GRAMM. There has been concern expressed that defense was getting off the hook because defense was under contracts. The truth is if you break the budget down, we are still doing relatively little multiyear contracting, and relative to many other areas of the budget defense will be affected. The effect will come wherever we are in the fiscal year, where a sequester would be in order when the contract terminates. The same would be true for a person who had a contract to repair plumbing in HUD—under CCC, for example, when the contract expires, then the sequester goes into effect—but the constraint we face is the existing contract which we cannot invalidate. It would be nice to do it, but people would haul us into claims court, they would collect the money, and we would pay damages.

Mr. HART. What is the difference between this specific issue between the so-called modification and the amendment we just passed?

Mr. GRAMM. On this issue, we are attempting to respond to a concern raised by the Senator from New York, and by others that no part of the budget be excluded. The Senator from New York was concerned about agriculture because of the CCC. And so we simply brought in CCC and other programs such as guaranteed student loans, and said on these programs that we cannot invalidate a contract but we can have the sequester order become effective when the crop year ends, or when the student loan ends. That basically is the language.

Mr. HART. In the first year that this amendment takes effect will $109 billion of multiyear defense procurement be subject to Presidential impoundment or not?

Mr. GRAMM. It will depend on what kind of contract the procurement is under relative to other parts of the budget. Defense will be less protected than many other areas of the budget that have multiyear contracts. And the language that the Senator is challenging, some of which is in an amendment that will be offered today by the Senator from New York is language that was aimed at trying to deal with concerns that were raised on the Senator's side of the aisle to be sure that nothing was protected beyond the limits of the existing law. But I have to repeat to my colleague from Colorado that we cannot invalidate contracts.

Mr. HART. Senator, I am not suggesting we should. I am not advocating nor attacking anything. I am trying to get a straight answer which I still have not gotten.

Mr. GRAMM. The straight answer is that the changes we are discussing here, as in the case of CCC for example, were raised by the Senator from New York. I thought it was important to respond to those concerns. And the response was to try to assure we had broad language with the idea that except for Social Security and except for the fact we are not going to deny people eligibility, and except for the fact that we are not going to bring COLA's below zero, that to the maximum extent legal everything be covered. That is the effort of this language change.

Mr. HART. The Senator from New Mexico said prior to the arrival of the Senator from Texas that the language contained in the so-called modification exempts in the first year of the impoundment authorization of this amendment $109.2 billion multiyear defense procurement. Does the Sena-

tor from Texas agree or disagree with that statement?

Mr. GRAMM. I cannot give you the precise figure since it has never been a relative factor in the budget before—what contracts were in place. Nobody really can give you that exact breakdown. But I come back to the point, and I want to make it clear, if you are looking for a reason to say you are against this, that is great. There are plenty of them. But the language that you are questioning, the changes that are being made here, represent no sinister plot on our part. They represent an effort on our part to respond to concerns that were raised by the Senator from New York, the Senator from Louisiana, and the Senator from Texas.

Mr. HART. I am not impugning anyone's motives. I am asking straightforward questions which the U.S. Senate and the people of this country are entitled to have answers to. If the Senator as the principal sponsor of this measure as modified cannot answer them, the people of the United States deserve to know that.

Mr. GRAMM. Let me say that I have answered them.

Mr. HART. The Senator has not answered them.

Mr. GRAMM. The point I am making again, I go back to it, is that to this point it has not been a matter of any moment what part of outlays were contractual and what were not. When we bring in the sequester, it becomes important. But may I remind people of two additional things that I think may allay some concerns. First of all, by line items in the appropriation account, the cuts are made across the board. So for cuts to be make does not require that everything in the category not be under contract. It just means that proportion not be under contract. Second, these across-the-board sequesters never occur, never occur, if we do our job, which I intend to try to do.

Mr. MELCHER. Will the Senator yield for a question?

Mr. GRAMM. I do not have the floor.

Mr. MELCHER. Will the chairman yield for a question on the Commodity Credit Corporation?

The PRESIDING OFFICER. Is the Senator from New Mexico seeking recognition?

Mr. DOMENICI. I thought I had the floor. The Senator from Colorado asked me a question. I did not yield the floor.

The PRESIDING OFFICER. The Senator from New Mexico has the floor.

Mr. MELCHER. Will the Senator yield for a question concerning the Commodity Credit Corporation?

Mr. DOMENICI. I would be pleased to.

Mr. MELCHER. I thank the chairman.

My question is simply this, and it follows directly what the Senator from Texas was just speaking about. It deals in part with the budgeting and the appropriations process. The Senator was speaking about effects. I want to address the Commodity Credit Corporation on this question. As I understand, it says each contract entered into after the sequester order, et cetera, and covers the Commodity Credit Corporation. I think I am correct on that; am I not?

Mr. DOMENICI. Yes, the Senator is correct.

Mr. MELCHER. In that, in the process on this discussion of cutting across the board, the Commodity Credit Corporation involves the farm programs, so what language is there in this proposal that says that the President, or whoever is doing this for the President, will cut each program so much rather than pick and choose?

In other words, if they wish to take more out of dairy or more out of wheat. What is there in the package that says——

Mr. DOMENICI. Can I give a citation on it?

Mr. MELCHER. If you will give me a citation, it would help immensely on a question we have had hanging over us since last night.

Mr. DOMENICI. Let me just say with reference to the CCC, the Senator has the language and he knows how it applies. There was an intent to exclude very little from that sequestering and to make the cuts in outlays uniform, to the extent that the dollars were necessary to reach the deficit reduction title. There was no intention that CCC be treated differently. We will get the language in just a moment.

Mr. MELCHER. We understand that. But the question is, when there is a cut, what prevents taking more out of this particular program than out of the other programs?

Mr. DOMENICI. Page 24, line 20, I am told. The words are "uniform percentage." Page 37, the definition of the term controllable expenditures makes reference to the same kind of uniform percentage language.

SEVERAL SENATORS. Will the Senator yield?

Mr. MELCHER. Let me clear up another question first.

This does not seem to show in the RECORD. Is there somebody who can explain this? I am sure the intentions of the Senator from Texas are to do that, but I do not know how——

Mr. GRAMM. If the Senator will yield, I will explain.

The PRESIDING OFFICER. The Senator from New Mexico has the floor.

Mr. DOMENICI. Mr. President, I do not know how much time I have here. I do want to have these questions answered. Where Senator GRAMM wants to answer them, I want him to answer them.

If the Senator will let me, I want to talk about one other section that I think everyone is concerned about. I will get back to this.

Perhaps in the meantime, the extra language could be shown to the distinguished Senator.

For those who have the modified bill, I refer to page 30, line 5, through page 35, line 22. I would like to talk about that entire section.

Let me just tell you how the original language, which we adopted just a while ago, deals with the U.S. Congress.

Mr. HART. Mr. President, could we have order?

The PRESIDING OFFICER. The Senator is correct. The Senator from New Mexico will suspend.

Will those Senators conversing in the aisle please retire to the cloakrooms or remain silent so we can hear the debate?

The Senator from New Mexico.

Mr. DOMENICI. The chairman of the Finance Committee alluded to the point awhile ago, to the fact that a substantial portion of this work was done in order to make sure that the Finance Committee and all the authorizing committees were not denied their rightful jurisdiction as part of any of these procedures, however accelerated we wanted to make it.

Well, there was a provision that we were seeking to amend whereby the Budget Committee, all by itself, in each House, would issue a joint resolution altering the sequestering order.

Mr. HART. Mr. President, may we have order in the Chamber?

The PRESIDING OFFICER. The Senator is correct. Will those Senators in the back of the Chamber retire to the cloakrooms so Senators can hear the debate?

Mr. DOMENICI. In that language that was in the original draft, which is presently at the desk and adopted by the Senate, the joint resolution of sequestering would have given the Budget Committee the sole jurisdiction, as we interpret it, to draft an alternative to a President's sequester order.

I did not draw that language. I have enough difficulty from time to time making sure that I do not have too much jurisdiction, much less putting some more in.

Mr. LONG. Will the Senator yield?

Mr. DOMENICI. I am pleased to yield.

Mr. LONG. For my part, I just want to make clear that the changes the Senator is talking about, so far as this Senator knows, are almost entirely in response to requests for changes that were made by Senators, mainly on this side of the aisle, having to do with

some criticisms that were made of the original proposal.

We looked at the criticisms and we came up with proposals like that of Mr. LEVIN, who wanted greater specificity on how the cut was to be made if it was an automatic cut.

Some of us on the Finance Committee also looked at it and said, with regard to the programs in our jurisdiction, that if we do not want the automatic cut to go into effect, we want the opportunity to write how we think the cut ought to take place in the area that we think we understand the best, the programs in the Finance Committee's jurisdiction.

We would also like to have more flexibility by being able to at least recommend a tax, subject to whether the Senate would go along with us or not.

In good faith negotiations, the managers of the bill, the principal sponsors, the chairman of the Budget Committee and others met with us and we did the best we could to work out the modifications that we thought would make this a proper, workable proposal and meet some of the objections that we heard here on the floor.

We studied the document and our staff studied the document. Where we could find something that we thought ought to be changed, we suggested that it ought to be changed.

May I say that the chairman of the Budget Committee and the principal sponsor of the bill in our judgment have been considerate, when they had the votes to pass their amendment anyway, in saying that they were willing to propose changes in their own amendment in order to accommodate what those in the various committees who have responsibility in connection with much of this had sought, because we thought it would help to make it more workable and more fair.

Mr. JOHNSTON. Will the Senator yield?

Mr. DOMENICI. Let me finish my thought and I will then yield.

What you will find on the pages I alluded to was an effort, even under accelerated reconciliation at the end of this process, to delegate to the respective committees of the Senate their portion of the mandatory reconciliation that would be the alternative to the President's sequestration, or even the ratification of it in whole or in part.

The only thing we have left with the Budget Committee is what we now have, I say to my friend from Louisiana, the ministerial function and one other. If a committee fails to respond at all, does literally nothing, the Senate Budget Committee can recommend what should have been offered but only within the jurisdiction of that committee that did not offer anything. If they do not come up with enough, we can only take it to the floor and tell the Senate they did not do it. So I believe that the Senator from Louisiana is right. From the standpoint of using the committees, making sure they are involved, that whole section is an effort to do a better job of making sure we do not keep it all in one committee, which we did not want.

Now I would be pleaded to answer the question of the Senator from Louisiana.

Mr. JOHNSTON. I thank the Senator.

May I first say the summary of changes put out by the staff is helpful, but if I may suggest overnight you index those to the page in the bill. It is rather hard to find (b)(4)(A)(i)(II), (ii)(II) and (B) in the bill. If you can do that overnight, that would be helpful. Second, if you could take this bill and do it as they do, as we do amendments from the House, strike through that which has been stricken from the original bill and put in italics that which is new and been added, that way we would know what is new and what is not new. Because it is uncommonly difficult to tell what has been changed and what has not been changed.

Now, if I may ask a question about something which I believe has been changed and ask about the meaning of it, the word, "sequester" is defined on page 37 to mean, "the permanent cancellation of budget authority, obligation limitations, other budgetary resources, or loan limitations, to the extent necessary to reduce each controllable expenditure by a uniform percentage."

Now, Mr. President, my question is, suppose it is a slow spendout program and in order to get the outlay reduction, we have to reduce more in budget authority than in outlays. Is that permitted by the President?

Mr. DOMENICI. Mr. President, this may happen many times.

Mr. JOHNSTON. I say, is it permitted?

Mr. DOMENICI. Yes.

Mr. JOHNSTON. Is it required?

Mr. DOMENICI. Let me say that I do not think budget authority and outlays would be the same on very many. The President would have to sequester sufficient budget authority to produce required outlay savings.

Mr. JOHNSTON. Let me give an example. Let us say you have a line item appropriation for the Stealth bomber and let us say it is $10 billion in budget authority, which is going to spend out at the rate of $500 million the first year, which I would guess would be the way it would work, and let us say that you have a 5-percent reduction required, which means you have to save $500 million in budget authority. Is the President permitted to permanently cancel $10 billion in budget authority in order to get the requisite $500 million in outlays?

Mr. DOMENICI. Well, Mr. President, he has to sequester. Under the Senator's hypothetical, if the line item that he has described is a sequesterable item within this budget and if in order to get $500—and he is charged with getting $500 million in savings, all of that being hypothetical now, because I am not saying that would ever occur; it may only be $50 million of it that he has to get, I assume that the budget authority would be canceled provided it fits the line-item description within this bill.

Mr. JOHNSTON. Can he cancel budget authority temporarily, say, for 1 year in order to get the outlay effect or must it be permanent?

Mr. DOMENICI. Let me say he would have to be reducing outlays by 100 percent. And I assume that is the question of the Senator—that there is some circumstance when he is reducing outlays by 100 percent.

Mr. JOHNSTON. I guess some line items may spend out—I do not know about at 100.

If I may repeat the question, I think there are some accounts that would spend out at close to 100 percent. Certainly most personnel costs spend out at about 90 percent at least. But there are many, many others that spend out very slowly and most of your military procurement accounts are of that kind.

Mr. DOMENICI. Yes, but the reason I keep saying hypothetical, for there to be a 100-percent reduction in outlays, the sequester order would have to be cutting controllable outlays across the board 100 percent.

Mr. JOHNSTON. No. No. My question is this: Your even cut is in outlays. There is no requirement of an even cut in budget authority, is there?

Mr. DOMENICI. That is correct.

Mr. JOHNSTON. Very well. So my question has to do with those situations where you must cut $2 or $3 or maybe $5 in budget authority in order to get a $1 cut in outlays. My question is: Must the President cut the $5 in budget authority permanently in order to get the $1 required in outlays?

Mr. DOMENICI. Mr. President, I answered that early on. If that is one of those items that is sequesterable, he has to reduce outlays by a percent. And if it takes five times as much budget authority to get that percent in outlays, he must do it. But the Senator then posed another one saying if he had to cut all the outlays in the program, would he have to terminate because there is no budget authority.

Mr. JOHNSTON. No, no, I did not ask that question.

Mr. DOMENICI. And that cannot happen——

Mr. JOHNSTON. I did not ask that question. I said if he had to cut all the budget authority.

Mr. DOMENICI. You will never cut all the budget authority unless you cut 100-percent outlays. There will be some budget authority left because no program, project, or activity can be eliminated.

Mr. JOHNSTON. Some of that outlay may very well be from prior years and may not be reachable. In fact, it usually is in most of the defense contracts.

Mr. DOMENICI. You cannot cut prior year outlays. That is not in this.

Mr. JOHNSTON. It is only new outlay the Senator is talking about?

Mr. DOMINICI. Yes.

Mr. JOHNSTON. No prior year outlays are involved in that?

Mr. DOMENICI. The Senator said outlays or prior——

Mr. JOHNSTON. I say no outlays for prior years are involved?

Mr. DOMINICI. That is correct.

Mr. JOHNSTON. Very well. Now, if the President cancels BA, must he cancel it permanently or may he cancel it temporarily if that is all that is necessary in order to get the outlay result?

Mr. DOMENICI. Mr. President, the way I interpret it, the amount that is canceled is canceled permanently. I am not suggesting that that means he can terminate a program, but the BA is terminated in the sequester order.

Mr. JOHNSTON. BA would be permanently canceled. Now, the term sequester means, "permanent cancellation of budget authority, obligation limitations, other budgetary resources or loan limitations." My second question is, does he have the choice of either permanently canceling budget authority or obligation limitations? In other words, if he can achieve the same result by limiting obligations, for example, maybe by putting off the program for a year, may he do that?

Mr. DOMENICI. Mr. President, he has to reduce outlays. Whatever outlays are being cut, the source of it is reduced sufficiently to cut the outlays.

Mr. JOHNSTON. Just one more question, if I may, because I know this question is going to come up time and time again.

I guess my third question is this: Where the President has a number of tools, I guess he can reduce budget obligational limitations, whatever that is, and he can reduce budget authority. Does he have a choice as to which one he will take? May he postpone a program rather than permanently——

Mr. DOMENICI. Let us take one. I am not there doing an appropriation bill with all these line items, but I am told that in very few cases we know of, that the staff knows of, would there be a choice, because it would be flowing from one to the other.

What is the other part of the question?

Mr. JOHNSTON. Could he put off the program? If you are going to cancel budget authority for a reference program, that means you are not going to have enough budget authority to fund fully the weapons program. So that would seem to be a requirement to cancel it.

Mr. DOMENICI. That amount would have to be reduced, and in his sequester order he would have to do it and tell us what he had done. Obviously, he can make alternative recommendations to us, and we have that accelerated process on the tail of this with the reconciliation we have described. It would go back to the committees, and they could make decisions.

Mr. JOHNSTON. That is the alternative determination at the early part of the process. Once you get the order, he has no choice, but he sends a choice if he wants to. He has to sequester it. He says: "Here is what I have done, because you ordered me to do it under the law. Here is what I prefer to do." That has no effect, other than he sends it to us at that point. We have to decide, as Congress, what we want to do about the sequestration and the alternative. But, in all events, absent this law, we have to wind up with something that puts you back into the budget.

In one iteration of this, it said that no program, project, or activity, I believe, could be canceled by this section. Is that still in the bill?

Mr. DOMENICI. Yes, it is. I referred to it early on as part of Senator LEVIN's amendment which was adopted here and incorporated in the same language. It refers to the committee report, too.

Mr. JOHNSTON. I hope the Senator lists the amendment as I suggested, in italics, so that we know what has been changed, between now and tomorrow.

Mr. DOMENICI. We will try the latter suggestion, if it is still important to the Senate. I do not know that we can accomplish the Senator's first suggestion. To go through this and try to strike as he suggested, we will try to do it. It is difficult, but we will try overnight, if it is still important overnight.

Mr. GRAMM. Mr. President, if the Senator will yield, let me get the Senator from Louisiana to take note that we also added additional language to strengthen the priorities of Congress, and it is on page 28, line 6:

> Nothing in subclause . . . shall be construed to give the President new authority to alter the relative priorities in the Federal budget that are established by law.

Then it says:

> And no person who is, or becomes, eligible for benefits under any provision of law shall be denied eligibility by reason of this section.

In other words, we specifically say in here that nothing contained in the provisions of this bill dealing with sequestering can be construed as giving the President any new discretionary power, nor can any of these provisions in any way, under any circumstances, deny anybody eligibility for a program.

Mr. HART. Mr. President, will the Senator from New Mexico yield for a question?

Mr. DOMENICI. I yield.

Mr. HART. Mr. President, the Senator from Colorado has a sense that the majority leader is going to appear on the floor and talk about filibusters and people who do not want to pass this bill. Other opponents are going to suggest that if you raise a question about this modification, you are looking for a reason to be against it. I voted against it. I am not looking for a reason. I think the reasons are apparent on the face. I think it is important, by asking this question, to let our colleagues and the American people know what is going on here.

Mr. MOYNIHAN. Mr. President, may we have order?

The PRESIDING OFFICER. The Senator is correct.

Will all those staff personnel and Senators who are speaking in the Chamber please retire to the Cloakroom?

Mr. HART. Mr. President, I should like to ask a question to try to figure out where we are.

We just adopted an amendment that comprehensively rearranges authority in the Federal Government.

Immediately upon adopting that amendment, we have been offered a document untitled, but a copy of which I have in handwriting, the final copy of the proposed substitute, with somebody's initial on it. That document is 44 pages long.

We do not know, on a line-by-line basis, how this document relates to the one we just enacted, except for an accompanying four-page document entitled "Summary of Changes to the Pending Gramm Amendment." Certainly this does not mean the pending Gramm amendment. It means the Gramm amendment just adopted.

The 4-page document contains 25 items of difference between the proposed modification and the amendment we have just adopted, one of which has 4 separate parts.

I ask the Senator from New Mexico this question: In reading this document called Summary of Changes, he got to subpart 2 of No. 6, which says, "To make it clear that reduction"—whatever that is—"does not apply to payments required by existing contractual agreements."

At that point, the Senator from Colorado rose to ask a question. The question was whether that proposed change meant that the President could impound funds of multiyear military contracts or not. The Senator from New Mexico said he cannot and

the Senator from Texas appeared to say, "We don't know."

I reiterate my question, either to the Senator from New Mexico or the Senator from South Carolina or the Senator from Oregon, the chairman of the Finance Committee, or anyone else who can answer the question.

Mr. DOMENICI. The Senator from Colorado kept asking me whether I said "can" or "cannot." I am saying "cannot."

Mr. HART. Am I correct in understanding that the Senator from Texas said "perhaps?"

Mr. DOMEINICI. I cannot recall what he said. He is here. I think the Senator is referring to a book that has 109 billion dollars' worth of contracts, and he was asking whether those were the same as I was saying "cannot."

Mr. HART. The book I am referring to is the Budget of the U.S. Government.

Mr. DOMENICI. I understand.

I am not going to tell the Senator that the $109 billion "can" or "cannot." I am going to tell him that, under his question, they cannot. I am not familiar with that list.

Mr. HART. It is not a list. I referred to it. It is the Budget of the United States.

Mr. DOMENICI. I understand.

Mr. HART. It is table 18, Controllability of Budget Outlays 9-44, outlays for prior contracts and obligations, national defense, $109.2 billion.

The Senator from Texas says he does not know or "perhaps," or something. It depends on the contract, he says.

I wonder if the Senator from South Carolina can answer the question.

Mr. HOLLINGS. Mr. President, what is the question exactly?

The PRESIDING OFFICER. Does the Senator from New Mexico yield to the Senator from South Carolina?

Mr. DOMENICI. I am pleased to yield.

Mr. HART. The question is whether either under the document called modification or under the Gramm amendment as enacted the item in the Budget of the United States called outlays for prior-year contracts and obligations, national defense, is included under what the President can impound or not?

Mr. HOLLINGS. The answer is yes.

Mr. HART. He can?

Mr. HOLLINGS. Yes. Does the Senator have a copy of the bill?

Mr. HART. I finally got it.

Mr. HOLLINGS. All right. Turn to page 24.

Mr. HART. Yes.

Mr. HOLLINGS. Permit me to read the following provision:

> Subject to clauses (ii), (iii), and (iv) of this subparagraph, eliminates one-half of such excess by sequestering from each affected program, project, or activity (as defined in the most recently enacted relevant appropriations Acts and accompanying committee reports) or from each affected account if not so defined, for funds provided in annual appropriations Acts or, otherwise from each budget account, such amounts of budget authority, obligation limitation, other budgetary resources . . .

If you read on down the rest of that page, you will read that the President must cut "by a uniform percentage."

To find out what the "other budgetary resources" in that passage means, jump from page 24 to page 37. On page 37 you will find at the bottom of the page that "other budgetary resources" means "unobligated balances, reimbursements, receipts credited to an account, and recoveries of prior-year obligations."

We have tried to make it as understandable as possible in that definition. The best example I can think of for the moment is the Divad.

Mr. HART. May we have order in the Senate?

Mr. MOYNIHAN. I regret to interrupt the Senator from South Carolina, but we want to hear him.

The PRESIDING OFFICER. Will those Senators in the Chamber who are busy please retire from the Chamber? We have Senators here engaged in a very important debate.

Mr. HOLLINGS. I thank the Chair.

The PRESIDING OFFICER. The Senator will please suspend until we can get some more order.

Mr. HOLLINGS. Yes.

The PRESIDING OFFICER. Those Senators in the back of the room please retire from the Chamber.

Mr. HOLLINGS. Mr. President, I thank my distinguished colleagues from New York and Colorado.

I will try my best to explain by using the example of the Divad. We asked President Reagan and Secretary Weinberger about the status of Divad, and as of August 15, they would not touch the programs on October 15 we asked the same distinguished officers about Divad and all of a sudden, the answer was yes. That becomes a prior-year obligation and can be subjected to recovery.

I hope the answer I have given does not make the process seem nebulous. If there is a better way to specify what the procedure would be, I am open to it. But we have tried our best to make it clear in the present language.

Mr. HART. Mr President, will the Senator yield for one further question?

Mr. HOLLINGS. Yes.

Mr. HART. Is the language contained on page 44 that the Senator read of the modification the same as its equivalent section in the amendment we just passed?

Mr. HOLLINGS. No, I do not think so. I think that is one of the amendments that the Senator from New Mexico will include as an elaboration of "other budgetary resources." The sheet has been given out by the Senator from New Mexico.

Mr. HART. It is item 62.

Mr. HOLLINGS. The Senator from Colorado is ahead of me.

Mr. HART. How does it differ?

Mr. GRAMM. Will the Senator yield on that question?

Mr. HOLLINGS. You see a new subsection (d)(4)(i) has been added to define the term "other budgetary resources" as unobligated balances, reimbursements, receipts credited to an account, and recoveries of prior-year obligations.

Mr. HART. This is not one of those changes designed to clarify the relationship of committees.

Mr. GRAMM. Mr. President, if the Senator will yield, I think I can clarify this. His question was the language on page 24 new language.

Mr. HART. No. In what respect does it differ from the language in the amendment we just passed?

Mr. GRAMM. It is the language of the Levin amendment which was offered to the bill which has just passed. So this language is the same.

Mr. HART. The same as Gramm?

Mr. GRAMM. The same as the bill which has been adopted as an amendment to the debt ceiling.

Mr. HOLLINGS. That was one of the big reasons, as the distinguished Senator from Colorado suggests, that since last Saturday we have been trying to clarify it the best we can. That is why we agreed to that particular amendment—to be able to give the distinguished Senator a definite answer, or as definite as possible.

Mr. MOYNIHAN. Mr. President, I have a number of remarks, which will be basically in the form of questions to the distinguished chairman from New Mexico, and my learned Senator from Colorado and the Senator from South Carolina.

It is the fact that this legislation—this extraordinary document, this change in procedures came to us very suddenly unprinted—is ill-understood by those who had not been its author and, indeed, is sometimes ill-understood or differently understood by those who are cosponsoring it.

I wonder if the Senator from Colorado and the Senator from South Carolina will recall the occasion last Friday when I suggested that as the amendment then read, it excluded from the category of relatively controllable expenditures the whole of the farm price support programs.

The PRESIDING OFFICER. The Senator will suspend. Will those Senators in the Chamber who are visiting retire to the cloakroom? It is hard to hear the speaker.

The Senator from New York has the floor.

Mr. MOYNIHAN. I made clear I was not speaking in any invidious way

about farm programs, but simply to say it was only one of the many programs, and to ask why it should be put over into the category of entitlements as against the ordinary controllable outlays.

At that time we went round this floor and I asked if the farm price support programs were in the category of relatively uncontrollable expenditures? And some said yes, and some said no.

On Saturday, October 5, in the New York Times Mr. Jonathan Fuerbringer, who has been reporting this debate, had this statement in his story. He said,

Senator Daniel Patrick Moynihan of New York argued that farm price supports would not be subject to the President's across-the-board cut because of the way the proposal was designed. Senator Gramm disagreed but several other Senators suggested that Mr. Moynihan might be right.

In the course of several days it turned out I was right and I approached my learned and distinguished friend from Texas and said that I would like to offer an amendment that would specifically include farm price support programs among the other relatively controllable programs. I was then told that this was most agreeable to the sponsors and that they would draft language on this matter.

We saw that language last night and it did not strike us as at all what we intended.

That language is here in what Senator Hart has suggested is the final form of the amendment on page 27, section 2, and it is also referred to in the "Summary of Changes to Pending Gramm Amendment" under item No. 10.

Let me tell you what has been done in response to my suggestion that we might include farm price support programs along with other relatively controllable programs. Item 10 of the "Summary." New subsections (d)(2)(A)(v) (I) and (II) have been added to make clear that Medicaid, Aid to Families with Dependent Children, Commodity Credit Corporation programs, and guaranteed student loans are now in the area that may be reduced in the across-the-board manner from which they had been protected previously.

Now, Mr. President, I would have thought it not beyond our ability as drafters to write a simple amendment, which I will offer later and which it is understood that I will have the opportunity to do, that simply says:

Notwithstanding any other provision of law, amounts made available for a fiscal year to the Secretary of Agriculture or the Commodity Credit Corporation to carry out a program to provide price support to producers of an agricultural commodity (including any program under which payments are made to producers as target price payments or for participation in a reduced acreage, acreage set-aside, or acreage diversion program) shall be reduced by the same percentage as relatively controllable expenditures are reduced under subsection (d)(2)(A)(i)(II) of this section for such fiscal year.

That is straightforward language, not complicated.

Mr. President, it is not within the powers of this residual group of 24 Senators to change the will of this body. But do I understand it to be the will of this body that across-the-board cuts will now be made in the following programs? Well, I would like to read two things in particular.

We have inquired of this matter from the general counsel of the Congressional Budget Office and asked what programs would the language in the amendment to be offered by the Senator from New Mexico affect.

He offers, for example, "the guarantee of student loans."

Now, if Senators will listen for just one moment. No one asks too much. The general counsel of the Congressional Budget Office reports that the guarantee of the student loans, and Treasury borrowings, which involve a contract to pay interest and to repay principal at a stated date, might be affected by the pending amendment.

I mean, we have from the general counsel of the Congressional Budget Office the proposition that we have now put Treasury bonds into the category of those matters that the President and Congress together can reduce by across-the-board percentage rates.

You know, that might solve the deficit problem.

Mr. BRADLEY. Will the Senator yield for a question?

Mr MOYNIHAN. I am happy to yield for a question.

Mr. BRADLEY. If that is true, does the Senator hope that at least that is kept quiet in the fragility of the world financial markets?

Mr. MOYNIHAN. No, I do not. I think it is time to balance the budget by seeing the credit of the United States disappear overnight and, perforce, we will be living on what we could get. It could be a pretty tumultuous day in Tokyo, I grant the Senator from New Jersey.

But we are about to declare, if need by, that we reduce the face value of a $1,000 Treasury bond by 8 percent across the board, and that will show the Saudis, I guess.

This is a bit astounding. This is astounding.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point the letter from the general counsel, Mr. Alfred B. Fitt, with his list of possibly affected programs.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL BUDGET OFFICE,
Washington, DC, October 9, 1985.

Hon. LAWTON CHILES,
Ranking Minority Member, Committee on the Budget, U.S. Senate, Washington, DC.

DEAR SENATOR: This is in response to your question as to what accounts would be affected and how by a proposed amendment to the pending amendment entitled as "Balanced Budget and Emergency Deficit Control Act of 1985." The language proposed to be inserted is:

"Any contract entered into after the sequester order has been promulgated for the applicable fiscal year by which any federal department or agency shall agree to make payments out of an entitlement account to any person, lender or guarantee entity shall be deemed controllable expenditures and shall be subject to reduction under the Presidential order, and any such contract shall explicitly provide for such reduction for the entire contractual period."

We assume that the word "entitlement" in the proposed amendment has the meaning contained in Section 401(C)(2)(c) of the Congressional Budget Act of 1974, namely, the "authority to make payments (including loans and grants), the budget authority for which is not provided for in advance by appropriations acts, to any person or government if, under the provisions of the law containing such authority, the United States is obligated to make such payments to persons or governments who meet the requirements established by such law."

The Congressional Budget Office over the years has worked with the Senate Budget Committee to develop a list of accounts falling under the defintion of Section 401(C)(2)(c). I enclose a copy of that list, which ranges from military retired pay to Medicaid grants to veterans pensions to interest on the public debt.

The proposed amendment is directed to contracts to make entitlement payments. Most entitlements result not from contract, but from an application and approval thereof. At this juncture there is insufficient time to determine exactly which of the accounts on the enclosed list involve the making of contracts, but some clearly do so, for example, the guarantee of student loans, and Treasury borrowings (which involve a contract to pay interest and to repay principal at a stated date).

To the extent that an entitlement payment is made pursuant to a contract, the proposed amendment would bring the payment within the definition of controllable expenditure subject to being sequestered. Literally read, this would mean that if the applicable percentage to be sequestered were 5 percent, then the government's obligation on a guaranteed student loan issued after a sequester order would be 95 percent rather than 100 percent, thus effecting a substantive change in the underlying law. The issues affecting government borrowings are considerably more complex; the amendment would appear to raise the possibility of altering agreed interest rates downward, with consequent adverse effects on the government's borrowing costs in the first instance.

There are other uncertainties posed by the language of the amendment, but time does not permit their exploration.

Sincerely,

ALFRED B. FITT,
General Counsel.

Accounts considered to be entitlements by the Senate Budget Committee

Account title	Account No.
Defense retired pay [1]	97 0030 01 051.
Defense claims [1]	97 0102 01 051.
Payment where energy credit exceeds liability for tax [1].	20 0907 01 271.

[3] Split account; only part of account considered entitlement.
[4] Excludes limitation on administrative expenses.
[5] Part of account annually appropriated by Congress.

Mr. MOYNIHAN. Mr. President, let me give you some other programs that might be affected. I think Senators might want to know this. Guaranteed student loans, I have mentioned; the black lung disability trust fund; advances to the unemployment trust fund; the Supplemental Security Income Program; the assistance payments program under AFDC; the old age survivors insurance trust fund, which is another way of saying Social Security; veterans' burial benefits; and salaries of judges.

It has been remarked on the floor that this legislation may take years of litigation to clear up. I suggest that it won't, at least, not if we stop paying the judges. They might stop coming to work, then it will never be cleared up. Now, that is a thought. That is a strategy.

I am not here to be playful. I am here to say one thing: I ask that I be allowed to offer an amendment—I have a right to offer that amendment; I indicated I would—that would transfer the farm program to that category of relatively controllable expenditures, in which all other general Government programs are to be found.

In response to that, I was told that language would be included and has been included. Now we learn that the chosen language extends to Social Security, guaranteed student loans, and the debt of the United States.

I mean, what is going on here? Somebody tell me. What is going on here? This is not the way we normally behave.

Mr. GRAMM. If the Senator will yield, I would be happy to say what is going on here.

Mr. MOYNIHAN. Of course, I do.

Mr. GRAMM. The Senator posed a question concerning whether or not the Farm Program was covered in sequestering. The Senator from Texas sought to determine exactly to what degree it was covered. And so the Senator went through the whole agricultural program and found that Federal crop insurance, water bank program, watershed planning, marketing service, forest fire service, Office of the Secretary, Foreign Assistance Program, rural housing, rural development, agriculture credit insurance fund, National Forest System, Perishable Agricultural Commodities Act fund, packers and stockyard programs were directly covered, leaving CCC.

Mr. MOYNIHAN. May I just ask: In the category of relatively uncontrollable spending?

Mr. GRAMM. Under the bill that is currently——

Mr. MOYNIHAN. Could I ask that question: Leaving CCC in that category of relatively uncontrollable expenditures?

Mr. GRAMM. Leaving CCC in the questionable category, to which I am about to move.

Now under the bill that is pending at the desk that has been affixed to the debt ceiling by a vote of 75 to 24, these entitlement programs which are not indexed are part of the sequester. In trying to assure the Senator from New York that farm programs were not getting a bye in this whole process, they were not getting off the hook, I sought the advice and help of Senator BOREN in coming up with language

that would make it clear that, first of all, in a CCC contract people get their money and under others—I am not trying to give Senator BOREN the credit or the blame—people get their money up front in a CCC contract. And it is a contract. So you cannot change it during the middle of the year. You can change it at the end of the year.

So we thought, in trying to respond to the Senator from New York, we would do something which assures that no part gets off and that is we assure that if we are sequestered during this year and we are under contract in that year, that, for all of these nonindexed entitlements, the sequester would apply the next year. In other words, nobody escapes sequester. We do not deny them eligibility. If they are getting a COLA, we reduce the COLA proportionally. But, in essence, what we did in CCC is this: If I am a farmer and I am under a contract, the Government has already paid me my money, and we cannot go get the money back. The farmer probably does not have any. But what will happen is when the contract expires, the sequester will go into effect on the next contract. So that CCC now, subject to contract, will be included, just as guaranteed student loan programs will be.

If I am going to college and I got my loan in September, I cannot very well go and catch the guy at Texas A&M or New York University and shake his jeans down and try to get the money back. But at the beginning of the next year, I can reduce, as part of sequester, if we do not do our job, I can reduce the overall loan amount.

And that is exactly what we do here in terms of the clear intent of the bill that is before us. What we have done is added an extra power to broaden the sequestering to assure that CCC is included. Being a rural Senator, I want to make it clear to people that our intention is to have it as applicable as possible. Because there are only two ways of getting fairness: No. 1, include nobody, or, No. 2, include everybody. And our objective, within the constraints we faced with Social Security on budget and the constraints we faced with existing contracts, was to include everybody to the maximum extent possible.

I do not know how to be more fair than that.

Mr. MOYNIHAN. I believe the Senator from Iowa——

Mr. HARKIN. I thank the distinguished Senator for yielding to me.

Mr. MOYNIHAN. Mr. President, I do not believe I had the floor. If I have the floor, I would like to yield for a question. I thank the Senator from Texas.

Mr. HARKIN. I thank the distinguished Senator for yielding. I do have a question. It is prompted by this last discussion between the Senator from New York and the Senator from Texas. On page 27 of this new package we have, modification, it says any contract entered into after a sequester order has been issued, et cetera, is deemed to be controllable, and, therefore, would be in the category that would be cut. The distinguished Senator from Texas said that these contracts are entered into up front and therefore they could not be cut afterward. My question really is this: sequestering, if I am not mistaken, takes place on October 1.

Mr. MOYNIHAN. Yes, as I understand it.

Mr. HARKIN. Take the case of soybeans. You have a low trade on soybeans of whatever, let us say $5 a bushel. Those farmers who harvest their crop of soybeans before October 1, let us say they happen to live in the warmer climates of our country and are able to harvest their soybeans prior to October 1. They will get the low rate of $5 per bushel. Farmers who happen to live in a little bit colder climates up north, in Illinois, Iowa, who may harvest them after October 1 would get a loan rate of much less. I ask what could be fair about that? We are dividing up the farmers of this country, and pitting one section and one region against another.

Mr. MOYNIHAN. I would like to quote the Secretary of the Treasury at the time he introduced the Treasury tax plan. He said "Vote with your feet." Why live up there in the cold country?

Mr. HARKIN. Does this sound like that would happen in this?

Mr. MOYNIHAN. It sounds exactly like what would happen—that the October 1 date intervenes between the harvest time in one-half of the country and harvest time in the other half of the country.

The Senator from Oklahoma may be able to help.

Mr. HARKIN. I think this needs to be cleaned up.

Mr. MOYNIHAN. Are we jeopardizing the credit of the United States of America? Let us not forget this other matter. Are we going to separate the farmers in the Sun Belt from farmers in the frozen belt?

Mr. HARKIN. This looks like what is happening.

Mr. MOYNIHAN. It would be the same with winter wheat.

Mr. HARKIN. The same thing. I thank the Senator for yielding. I hope this is cleared up because this seems to be a glaring defect.

Mr. BRADLEY. Will the Senator from Texas yield?

Mr. MOYNIHAN. I believe I have the floor. The Senator cannot yield to the Senator. I yield the floor.

Mr. BRADLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. I would like to ask the Senator from Texas several questions about the summary of changes. If I can have the attention of the Senator from Texas, No. 3 of the changes in the sheet given us, in subsection B(5)(a) has been modified to include a point of order against consideration of the committee's legislation unless and until that committee files section 302(b) suballocation. Could the Senator please explain his interpretation of that paragraph?

Mr. GRAMM. Let me begin by asking the Senator to clarify. Someone had asked me a question. As I heard the question, it had to do with the allocation of the 302 allocation.

Mr. BRADLEY. In the document that was handed out by the distinguished chairman of the Budget Committee, the third item on the list states: "Subsection B(5)(a) has been modified to include point of order against consideration of the committee's legislation."

Mr. GRAMM. I am with the Senator now. I can answer it.

Mr. BRADLEY. What is your interpretation of that paragraph?

Mr. GRAMM. My interpretation of that paragraph is that it is a straightforward paragraph, that once the budget is adopted by the Congress it should be based on the committee report allocation down to the 302(b) level. That basically is down to the subcommittee level. At that point, if any bill comes to the floor that makes appropriation, authorization, or entitlement and if that bill violates the 302(b) allocations, that bill shall be upon challenge ruled out of order and only by simple majority can that bill be brought to the floor because it is in violation of the budget.

Mr. BRADLEY. That a point of order lies against that bill?

Mr. GRAMM. That is correct.

Mr. BRADLEY. Would the 302(b) suballocations in this case track the budget targets in Gramm-Rudman?

Mr. GRAMM. There are no budget targets in Gramm-Rudman. They are only maximum allowable deficits. It would track the budget adopted by Congress.

Mr. BRADLEY. May I ask you one last question? That is, how that third paragraph interacts with the 20th paragraph. That is the simple majority required. Is it the Senator's understanding that if an appeal is made to the ruling of the Chair under point of order that it would take 60 votes to override?

Mr. GRAMM. If I may remind the Senator, our distinguished colleague from West Virginia, a student of the rules of the Senate, raised questions about setting out this procedure in law which made the rules of the Senate subject to law. The distinguished Senator from West Virginia has not in any

way signed off on this. In attempting to respond to the Senator, we took the restrictions out of law, and brought them into the Senate and to the House so that the point of order would require a three-fifths vote of those duly chosen and sworn to be overcome. That is the vote required for cloture.

Mr. BRADLEY. So the answer to the question that I pose is that we need 60 votes to sustain?

Mr. GRAMM. That is correct. If you bring a bill to the floor that is in violation of a budget adopted under this procedure, it will be out of order and can be brought to the floor against the rules of the Senate only by three-fifths vote of those duly chosen and sworn. That is the binding element of this budget that means we are going to be moving toward budgets that have meaning.

Mr. BRADLEY. A second question: As I look at this list, No. 12 on the list, define negative real economic growth for the purpose of this amendment to be when such negative growth occurs from two consecutive calendar quarters of the entire fiscal year. In the original bill, I understand it was four quarters. Is that not correct?

Mr. GRAMM. No. In the original bill it was the projection of negative real GNP growth. That could have been only one quarter that was a real downturn and three flat quarters. What we have done to try to deal with the concern that was raised by numerous Members on your side of the aisle was we put this trigger in so it would pull either way. If you had a negative real growth, it is pulled, even though you may not have technically a recession. Under the current definition, recession is two continuous quarters of negative real GNP growth. Or even if you have a positive real GNP growth for the year, if you have two consecutive quarters, then it is a recession.

Mr. BRADLEY. May I follow with one last question?

Mr. DOLE. Mr. President, I would like to file a unanimous consent request.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, about 1½ hours ago I indicated we ought to discuss the Domenici amendment for 15 minutes. I know there are still a number of questions with reference to it. I have been trying to determine whether there is still an effort to kill the bill or not. But I think with the vote we have there should be some indication of the majority of Members on both sides supporting the legislation. So I am going to propound a unanimous consent request that we include everything except the Domenici amendment, and the time for final passage. There is cloture filed on the bill already. So I will not need to file another cloture petition. But these are all things we agreed to yesterday. So I hope when I propound this request we will not have to go through the whole litany again.

Mr. President, I say that I am advised by Members of both parties of the House that they would like to have the temporary extension by 6 o'clock because they have, I think, some function to attend.

So I ask unanimous consent that the Senate now turn to the consideration of H.R. 3453, the vehicle to which a short-debt limit extension will be offered; that one amendment be in order, and one amendment only to be offered by Senator PACKWOOD to increase the debt limit through October 18, 1985; and, that there be 30 minutes of debate total to be equally divided. Further, I ask unanimous consent that following amendments be the only amendments in order to House Joint Resolution 372, and that they be limited to the following time agreements in the usual form. These are the same time agreements we agreed on last night. Bradley, defense cuts, 30 minutes, 20 and 10; Glenn, balanced budget, 30 and 10; Leahy, budget surpluses, 30 and 10; Boren, Social Security, 30 and 10; Bradley, gas tax, 20 and 10; Moynihan, CCC, 20 and 10; Zorinsky-Mattingly, 2½ and 2½.

That would leave, when we finish at that point, the Domenici amendment. We have not agreed on any time for final passage. Then I think that should satisfy anyone who has a concern about having more time to review.

Mr. METZENBAUM. Mr. President, the majority leader did not tell us what Zorinsky-Mattingly is. What is it?

Mr. DOLE. No tax increase.

Mr. METZENBAUM. It is not line item.

Mr. DOLE. No, unless you would like to have it.

Mr. METZENBAUM. No. I do not think so this afternoon.

[Laughter.]

Mr. CRANSTON. Reserving the right to object, is there no Armstrong amendment?

Mr. DOLE. There is no Armstrong amendment, nor a Cranston amendment. In fact, we have dropped five amendments. We made progress by not doing anything.

Mr. CRANSTON. I accept that arrangement.

Mr. METZENBAUM. As I understand the request, there will be a time certain for final passage?

Mr. DOLE. No.

Mr. METZENBAUM. On the Domenici amendment, I have no objection to it, but I do not know what it is. I think we are entitled as Members of this body to be able to deal with it as an actual amendment so we know what we are being called upon to vote on. I have no desire to slow the action of the Senate.

Mr. DOLE. I have requested the Senator from New Mexico that he and the distinguished ranking member on the Budget Committee, and others who have been involved in these amendments, ought to be around talking to people who seem to have some concerns. If they are major concerns, just forget about it.

There are areas of the Domenici that I think there are no objections to. The important thing is to get this show on the road and get on to other business.

Mr. CHILES. Mr. President, what this is, in effect, is right now we are trying to sit down with our staffs and see which of the changes are what we would call procedural changes to either make the Budget Act conform to some of the other changes that have already been made in the bill or some that look like there is a general agreement upon. That would be one list.

Others would be substantive changes as opposed to procedural.

We are talking about putting this time agreement in to give time to see if even though it is a substantive change, is it something where there is a general agreement on this side about and on that side about. If so, it could be made a part of it.

If there is not a general understanding on it, what I would do is say that it is something that should be dropped.

Mr. METZENBAUM. I think Senators understand I am not now addressing myself to the substantive issue. I am addressing myself to the procedural question that every Senator is entitled to at least have the opportunity to try to understand.

Mr. CHILES. I understand. I was going to say that there is no way right now that I can tell him what would be in the amendment because I do not know what would be agreeable.

Mr. DOLE. Mr. President, I have propounded the unanimous-consent request. We agreed to all of this yesterday with the one exception that Senator LONG had a question about. We resolved that question. I do not know why we have to start through the entire exercise again. If you want to object, object, and we will stay here tonight.

Mr. HART. Reserving the right to object, might I ask the leader might it be proper to offer a 20-minute amendment on the underlying amendment?

Mr. DOLE. As I understand, we have agreed to amendments listed yesterday and they would be the only amendments in order.

I know you are trying to kill the bill.

Mr. HART. No. As much as you would like to suggest that, it is not true.

Could I have an answer? If you are not on the list, you are out; is that it?

Mr. DOLE. No. After these amendments are disposed of, the bill would be open to amendment. There is no agreement on time. I hope we do not hold it up or we will be here all weekend. I promise that.

Mr. BUMPERS. That is not an exclusive list.

Mr. DOLE. It is an exclusive list. If we start getting amendments from all over the place, I will withdraw the request and we will work on them.

Mr. MELCHER. Reserving the right to object, I think I understand that this is not an exclusive list and that further amendments will be in order to Gramm-Rudman-Hollings.

Mr. DOLE. You have already had two amendments and we have taken care of them.

Mr. MELCHER. I am not trying to delay things.

Mr. DOLE. You are trying to delay it. You are obviously trying to delay it.

Mr. MELCHER. Reserving the right to object, did I understand the answer is no?

Mr. DOLE. The answer is it is open to further amendment. We are going to try to complete it tonight.

Mr. MELCHER. I thank the majority leader.

The PRESIDING OFFICER. The unanimous-consent request was that the following amendments be the only amendments to House Joint Resolution 372 and may be limited to the following time agreements in the usual form, and then the rest.

Mr. MELCHER. Reserving the right to object. I will ask a parliamentary inquiry. Did I understand the Chair to say that these would be the only amendments in order and that the bill would be closed to further amendment?

The PRESIDING OFFICER. That was the agreement.

Mr. MELCHER. Reserving the right to object, and I will mention to the majority leader, that does not seem to leave the bill open for further amendment. Is that correct?

Mr. DOLE. Let me modify it by excluding the word "only."

"The following amendments be in order."

The PRESIDING OFFICER. Is there objection?

Mr. GRAMM. Reserving the right to object, Mr. President, I am going to have to reserve the right to object. I would like to pose a question to the distinguished majority leader.

The question is, If we accept this unanimous-consent request, other than the amendments which we have agreed to basically on and off for the last 3 days, will any other amendments be in order?

Mr. DOLE. Other amendments will be in order, including the amendment of the distinguished Senator from New Mexico. I hope there are no other amendments offered, but they would be in order. If people want to offer amendments, I am not going anywhere this weekend. We can talk about them.

Mr. MELCHER. Reserving the right to object, Mr. President, I want to simply state that it appears that under the Gramm-Rudman-Hollings amendment as it now stands that the farm bill be $400 million out of budget according to the Gramm-Rudman, not budgeted in here. Although complying with the budget reconciliation process, it appears as if right now that the Gramm-Rudman-Hollings would say that the entire farm bill was out of order and there could be a budget waiver. Therefore, we cannot consider it.

This may be very serious. If I understand the majority leader correctly, that is, that if there needs to be an amendment of that nature or some nature like that, there will be no further amendment.

Mr. DOLE. The Senator will have the opportunity to offer an amendment.

Mr. LONG. Will the Senator yield?

Mr. DOLE. Yes.

Mr. LONG. I honestly do not believe we are going to accomplish anything by staying here until 3:30 tomorrow morning the way we did last night. I would hope that the Senator would seek an agreement. Those who want to offer amendments should let him know the nature of their amendments so he can know what we are talking about. We should try to get some agreement where we can see the light at the end of the tunnel, where we can say, "If you want to offer an amendment having to do with the farm bill, okay," and reserve the right to offer an amendment on the farm bill. See if we cannot get a limit to amendments so that if we have to take several more amendments being offered in addition to those that people have typed up. But I urge the Senator to see if he cannot get an agreement that we have at least some specified number of amendments to vote on before we finally vote on the bill.

Mr. DOLE. I am trying to get the same agreement we almost had last night. The same people who wanted the agreement last night are objecting to it.

Mr. LONG. Not necessarily.

Mr. DOLE. Not the Senator from Louisiana, because he had a legitimate objection. We have satisfied that. I think if we can get an agreement on these, we can go ahead and start working on them tonight. And then, if people want to offer amendments tomorrow, we will be open for business tomorrow.

Mr. BUMPERS. Will the Senator yield?

Mr. DOLE. Most of these amendments will not take 15, 20, or 30 minutes.

Mr. BUMPERS. Mr. President, reserving the right to object—and I do not object; I have no quarrel with the agreement at all—on this list that has been furnished us of the proposed modifications by the Senator from New Mexico, I would hope that the Budget Committee, the Senator from New Mexico, would furnish the body a considerably more detailed explanation of those modifications, what the intent is and the effect of them.

But what we have before us now is pretty arcane. It is impossible to tell. In certain instances where we have debated here, some of us know what the Senator is trying to accomplish, but if we could get a more thorough explanation of what those modifications are, it would be very helpful to us.

Mr. DOMENICI. Let me say to my friend——

Mr. BUMPERS. There are 25 of them.

Mr. DOMENICI [continuing]. We have just decided here that even though 90 percent of that amendment that I have before the body you have already adopted by 79 votes—was that the vote? How many affirmative votes were there?

Mr. DOLE. Seventy-five.

Mr. DOMENICI. Seventy-five. About 90 percent has remained the same.

Now we are getting questions about it. I was trying to offer some amendments that I thought people would like more than what they have already voted. Now I am not going to do that right now.

We could try another deal. We could offer one amendment or a series of amendments that are mutually satisfactory to LAWTON CHILES and PETE DOMENICI. And that could take care of this. We do not intend to offer this right now.

We have tried to clear up procedural shortcomings, committee jurisdictions, and those kinds of things that many people have talked to us about, and that is what that language means.

If we did not have that kind of amendment, we would not offer it.

Mr. BUMPERS. Mr. President, if those are modifications in accordance with the agreement that was made as modified—we have heard a lot about that term here—how were those in the bill that we just adopted? The Senator says we have already adopted 90 percent of them. None of those things, as I understood it, were in the bill. Nothing could be put in the bill since it was introduced last Friday.

Mr. DOMENICI. Mr. President, the Gramm-Rudman amendment, as modified and amended on the floor in its entirety, is in that amendment that I offered, as well as some amendments to it that we thought were in order. Now it is very confused because Senators are asking questions about the amendment we just adopted.

We could offer straight amendment to the pending legislation that the Senate already adopted by 75 votes. It could be one simple amendment, it could be two. It could be along the lines I have described and mutually acceptable to Senator CHILES and Senator DOMENICI. And we do not have a time limit on that.

Mr. BUMPERS. Mr. President, let me say one other thing. All of us here have the utmost respect for Senator CHILES, but just because it meets his approval does not mean it is going to meet the approval of another 46 Senators.

Mr. DOMENICI. That is correct, and Senators do not have to vote for it and there is no time agreement on it.

Mr. BUMPERS. Mr. President, let me ask the Senator, what does this mean—and I will not take up the majority leader's time on this consent agreement, but we have here on the note handed out, "Changes described below are relative to the pending Gramm amendment, as modified, as it appeared in the CONGRESSIONAL RECORD of October 4"?

Mr. DOLE. Will the Senator yield to me on that?

Mr. BUMPERS. Yes.

Mr. DOLE. That is the reason we have tried to set that amendment aside, give everybody time to discuss it. What I am attempting to do now is get to the House before 6 p.m. the temporary debt extension so that Treasury will not have to go into the Federal Financing Bank, and agree to the amendments we agreed to yesterday. Then, if we cannot agree to the Domenici amendment, it probably will not come up.

Mr. BUMPERS. To satisfy the majority leader, I will not debate that now. I understand he is under a time constraint. I do want to pursue it later, but I will pursue it with the Senator privately.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, I want to be sure that the language of the request, which as far as I am concerned can be granted, is in accordance with what the distinguished majority leader has just said. I understood him to say that other amendments would be in order?

Mr. DOLE. Right. I revised it. It now reads: "The following amendments be in order." I have taken out "only" and hopefully clarified the record. Hopefully it will not encourage any.

Mr. BYRD. And the Senator agreed to it being in the usual form?

Mr. DOLE. Yes.

Mr. BYRD. Which takes care of germaneness, division, and control of the time. I have no objection to this.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF SUPERFUND TAXES

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 3453) to amend the Internal Revenue Code of 1954 to extend the Superfund taxes for 46 days.

The Senate proceeded to consider the bill.

AMENDMENT NO. 756

The PRESIDING OFFICER. The Senator from Oregon is recognized.

Mr. PACKWOOD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oregon [Mr. PACKWOOD] proposes an amendment numbered 756.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

Mr. BRADLEY. I object.

The PRESIDING OFFICER. Objection is heard.

The legislative clerk continued reading as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. Section 9(a) of the Federal Financing Bank Act of 1973 is amended by substituting "$5,000,010,000" for "$15,000,000,000."

SEC. 2. (a) Section 3101 of title 31, United States Code, is amended by adding at the end thereof the following:

"(d) the face amount of obligations issued by the Federal Financing Bank under Section 9(a) of the Federal Financing Bank Act of 1973 that are outstanding shall be included in the amount taken into account in determining whether the limitation imposed by subsection (b) has been exceeded."

(b) The amendment made by subsection (a) shall take effect on October 18, 1985.

Mr. PACKWOOD. The Senator has now heard the amendment. Does he have any questions?

Mr. BRADLEY. Yes; I wish to ask the distinguished chairman of the committee a question. This I understand is the temporary debt limit extension?

Mr. PACKWOOD. That is correct.

Mr. BRADLEY. Where does it say, "an extension of the debt limit"?

Mr. PACKWOOD. We are at that debt limit now. What this bill does is authorize the Government between now and October 18 to borrow up to $5 billion from the Federal Financing Bank. They can under present law borrow up to $15 billion. So this limits it to $5 billion, which is roughly what we estimate is needed to get us to October 18, roughly.

But just to make sure, when we get to October 18, that is as far as we are going, what we have said in this is that whatever amount they have borrowed up to $5 billion—they cannot go more than that—on October 18, whatever amount they have borrowed up to that time, the debt ceiling goes up that much. And so on that date whatever they have borrowed is the debt ceiling and they cannot borrow any more.

Mr. BRADLEY. Up to this point they have not borrowed from the Federal Financing Bank?

Mr. PACKWOOD. That is correct. And we limit them in this amendment to borrowing $5 billion.

Mr. BRADLEY. I was reading in the paper that that is how we are paying our bills.

Mr. PACKWOOD. They have not done that yet.

Mr. BRADLEY. They have not done that yet?

Mr. DOLE. Not yet.

Mr. BRADLEY. So this would authorize borrowing up to $5 billion from the Federal Financing Bank, and it would allow this to cover debt?

Mr. PACKWOOD. Let me make one correction. This is what they borrowed today, and this is what we limit them to for the week.

Mr. ARMSTRONG addressed the Chair.

Mr. PACKWOOD. I yield to the Senator from Colorado.

Mr. ARMSTRONG. Mr. President, if the Senator will yield, I am going to have to back up on something I asked him privately. I understood that this was a measure to temporarily increase the borrowing authority of the Government, and on that basis I asked who was going to manage the time in opposition and volunteered to do so, but I cannot oppose this. I think this is a good idea. In fact, I must really congratulate the Senator from Oregon and the majority leader for coming up with this particular formulation. It is ingenuous and truly a restriction on existing borrowing power, and yet it gets us off the hook.

Mr. PACKWOOD. As a matter of fact, it reduces their borrowing power $10 billion.

Mr. ARMSTRONG. Exactly so.

Mr. President, if the Senator will yield to me for a brief moment more, I cannot resist the sweet temptation to say, "I told you so," because for days—indeed, for weeks—we were promised that when we got to the "drop-dead" date, as it was termed, when we got to doomsday, the sky was going to fall; and there were at least some of us in the Chamber who said, "Oh, no, it's not going to be as bad as they are making out. They have greatly exaggerated the seriousness of the problem."

In fact, it turns out that that was true. If they want to exercise their full legal borrowing authority they now have, they could probably go on for quite some time. The effect of the measure proposed now by the chairman of the Finance Committee is to

clip their wings a little, and I endorse that.

I predict this: I may not be on a roll, but having had one successful prediction, I will hazard one more. Once this is passed, I will predict that there are still some avenues of cash management, accounting practice, and inherent powers of the Presidency which can be used in an emergency.

Mr. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senator is correct. The Senate will be in order. Will Senators conversing please retire to the cloakroom?

Mr. ARMSTRONG. I thank the minority leader.

Mr. President, I think I have made the point I wanted to make, other than the next time the administration or the Treasury Department comes around here crying wolf, just remember tonight. It is not true now, it was not true the last time when we went through this drill, and it will not be true the next time we go through this exercise.

Mr. PACKWOOD. As a matter of fact, there is a certain degree of humor to it. We have been getting letters from the Treasury Department indicating when the end of the world is coming, and it has been coming for about 10 days, and it came last Monday. The Senator missed it. [Laughter.]

Mr. ARMSTRONG. I notice that the Sun still came up this morning. I was up when it started to rise.

Mr. PACKWOOD. It came up, and we got to Wednesday.

The Senator is correct: it turns out that they had the authority to borrow $15 billion if they wanted. Now they will only have authority to borrow $5 billion, so they will not be able to go as far as they would but for this amendment.

Mr. ARMSTRONG. I compliment the Senator, and I appreciate his explanation.

Mr. DOLE. Mr. President, the amendment to H.R. 3453 is the so-called short-debt authority extension which makes clear that Treasury has the authority to issue $5 billion more in U.S. securities. I am advised by the Treasury Department that they intend to close a Treasury bill activity today for $5 billion in new borrowing.

The amendment provides that the borrowing authority under the authority of the Federal Financing Bank would be limited to approximately $5 billion to be issued today. This provision is intended to remove any doubt that the Treasury may use the FFB as source of direct or indirect national debt funding.

But it also provides that after October 18, any FFB debts will become subject to the normal debt limit incorporated in the Second Liberty Bond Loan Act. Thus, any authority to use the FFB to provide debt authority subject to limit will terminate on October 18.

With the passage of this bill it will relieve any doubt, at least on a temporary basis, about the ability for Treasury to issue an additional $5 billion in debt through October 18.

Mr. HART. Will the Senator yield for a question?

Mr. PACKWOOD. I yield.

Mr. HART. I wonder why the Senator from Oregon did not do what we always have done, and that is simply raise the debt ceiling? Does not this amendment authorize the practice which was authorized before?

Mr. PACKWOOD. We did not do it because we had an objection from a Member on the other side of the aisle.

Mr. HART. Since when does that matter?

Mr. DOLE. It was an incentive.

Mr. PACKWOOD. I will not indicate who it is, but we anticipated a filibuster on that issue.

Mr. HART. I thank the Senator.

Mr. PACKWOOD. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 756) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. RIEGLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, I say to the distinguished majority leader that when I suggested a little while ago that the word "only" be stricken, what I was doing was trying to protect the majority leader so that he would not be ruling out the Domenici amendment.

Mr. DOLE. Yes.

Mr. BYRD. I am concerned that with the word "only" out in that respect, and without other protecting language, some other amendment could come in and be offered to any one of the list of eight amendments there, and there would be no time limitation.

Mr. DOLE. Mr. President, I ask unanimous consent that there be no amendments.

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOLE. Mr. President, I think the distinguished minority leader raises a good point. I ask unanimous consent that no amendments to amendments be in order.

The PRESIDING OFFICER. Is there objection?

Mr. HART. Mr. President, reserving the right to object——

Mr. BYRD. To any of the amendments listed, seven—Bradley through Zorinsky-Mattingly.

Mr. DOLE. Would not be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. I thank the majority leader.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. HART. Mr. President, a parliamentary inquiry. Third reading of the temporary extension of the debt ceiling as amended by Gramm?

Mr. DOLE. No. We have taken the Superfund vehicle and stricken it all out.

Mr. PACKWOOD. This is by itself a temporary extension. We have an extension of the Superfund bill here for 45 days and struck the 45 days and put in the short extension, and Gramm is not part of it.

The PRESIDING OFFICER. The question is on final passage.

Mr. METZENBAUM. Mr. President, are we talking about final passage of the Packwood bill?

Mr. PACKWOOD. Yes.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 3453) as amended, was passed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. PACKWOOD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PACKWOOD. Mr. President, I send a title amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

Amend the title so as to read "An Act to temporarily increase the public debt limit."

The PRESIDING OFFICER. Without objection, the title is so amended.

INCREASE IN PERMANENT PUBLIC DEBT LIMIT

The PRESIDING OFFICER. The question recurs on House Joint Resolution 372.

Mr. BYRD. Mr. President, what is the question?

The PRESIDING OFFICER. The question is on House Joint Resolution 372.

Mr. BYRD. On what?

The PRESIDING OFFICER. House Joint Resolution 372.

Mr. BYRD. Mr. President, what is the question the Chair is putting? I

am getting so many noises I cannot hear.

The PRESIDING OFFICER. The Senate will be in order. The Senator from West Virginia is correct. Senators who wish to converse should retire to the cloakroom.

The question is on House Joint Resolution 372.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, what is the pending question before the Senate?

The PRESIDING OFFICER. House Joint Resolution 372.

Mr. BYRD. This is open to amendment?

The PRESIDING OFFICER. It is open to amendment.

Mr. BYRD. Mr. President, I take the floor at this time to ask the distinguished majority leader what the program is for the remainder of the day and for tomorrow.

PROGRAM

Mr. DOLE. Mr. President, if the Senator will yield, there will be no more votes today. I think we made good progress. We have a number of amendments lined up tomorrow. We wish to come in about 9:30 tomorrow.

We have a special order and maybe get on the bill at 10 or 10:15 a.m.

The first amendment will be the Bradley amendment under a time agreement, and we have about seven amendments that we have agreed to take up all under time constraints.

I would be willing, if there is a disposition, since amendments are coming from that side, to stack the votes on amendments if that were something desirable so the first vote might come as late as 12 o'clock.

There will be no more votes this evening, and we will come in at 9:30 a.m. There could be a vote as early as 10:30 a.m., but I am perfectly willing, if the offerer of the amendment is willing, to stack the votes until some time around noon or 1 p.m.

Mr. BYRD. Mr. President, I thank the distinguished majority leader.

ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business not to extend beyond 6:15 p.m. with statements limited therein to 5 minutes each

The PRESIDING OFFICER. Without objection, it is so ordered.

MILITARY PREPAREDNESS

Mr. GOLDWATER. Mr. President, Senator SAM NUNN and I have been speaking every morning now for over a week relative to some mistakes we have found through our dedicated task force and study group working on the subject relative to the Pentagon.

In reading the excellent magazine, Military History, the other evening, I came across what I think is a pretty good example of what we have been talking about, and I would like to pass it along to my colleagues. This applies to the Inchon landing, probably one of the most successful and brilliant of any action ever taken by an American military organization.

Alexander Cochran, Jr., was interviewing Maj. Edwin H. Simmons, a World War II veteran, and who was, at the time of the invasion, a company commander. He has since gone on to a successful career, both as a line officer and historian of amphibious operations. He retired as a brigadier general and served as a Director of the U.S. Marine Corps Historical Center.

General MacArthur had asked for a marine division, but what he was actually going to get, was quite a bit different. Major Simmons said, in answer to the question relative to the Marine division:

> In California, we began to fill up to wartime strength with reserves that had been called to active duty and regulars drawn from post and stations. For example, we had only two rifle companies in the battalion, each with about 100 men. We activated a third rifle company, and doubled the size of the battalion. In my weapons company, I had 90 men, no heavy machine-gun platoon, two sections of an anti-tank assault platoon, two sections of an 81-mm mortar platoon. Going on to wartime tables, I had to create a heavy machine-gun platoon, add sections of anti-tank assault and mortars. We were only at Camp Pendleton for 10 days, coming up to strength, drawing our war reserves. We had been promised good equipment, but it didn't turn out that way. This stuff had been packed up hurriedly at the end of World War II, and, when you opened up a box marked "bayonets," you would find gas masks. It has been said by others that Korea was fought with World War II surplus, and that is essentially accurate.

Simmons went on to say after further questioning, particularly, that amphibious doctrine specified 90 days for training, rehearsals, and like preparation for a complex operation. His answer was

> This was all telescoped together. We didn't do systematically the things that you needed to do for an amphibious operation. We did not have a rehearsal, which is considered the "sine qua non" of an amphibious operation. We did not even have any regimental-sized maneuver or exercise. We did not have a battalion exercise. All we were able to do after we got up to our wartime strength in California was to have conditioning marches in Japan. We only had ten days there, and we were trying to make up for last-minute deficiencies, such as additional canteens, because we liked to land with two canteens and we only had one. We went to the Army Quartermaster Depot, and everything was chaotic there, as the 25th Division had cleaned it out before they went to Korea. So we had all kinds of problems trying to get topped-off on our last-minute requirements.

I have used these quotations from the article to show that the man in uniform is not the target of our reorganization study. The civilians responsible for planning and equipping our forces, for setting up the requirements, et cetera, are the guilty parties. While I must admit there are men in uniform who also perform those duties, I thought this was rather typical of how, in such a short time, we can become so unprepared to fight a war.

THE BENEFITS OF TAX REFORM FOR THE NATION

Mr. DECONCINI. Mr. President, I want to share with my colleagues, the lead editorial that appeared in the September 12, Wall Street Journal. The article begins "What's good for America * * * is good for General Motors." More generally, it is saying that what is good for America is good for American business. The article takes issue with some leaders of the business community whom the Journal feels have not properly understood the net benefits of tax simplification and reform. The article goes on to praise other leaders of the business community such as Finn M. Casperson, chairman of Beneficial Corp. The article points out that Casperson supports tax reform not out of a namby-pamby sense of sacrifice, but because he feels that reform will benefit his customers—thereby benefit his company.

Mr. Casperson is quoted as saying:

> Beneficial supports tax reform even though its corporate income-tax payments will increase in the aggregate by $100 million over the next 5 years. . . . Our reason for supporting tax reform in the form submitted by the president is very simple. We believe it will benefit our customers. Most of our customers will pay less taxes and, therefore, have more disposable income to save and invest.

I am pleased to see this enlightened view of corporate self-interest being expressed by Mr. Casperson and other business leaders such as Jack Albertine of the American Business Council and companies such as GM, IBM, and General Mills.

I might add that I am not surprised by the position taken by Mr. Casperson. I have come to know him and his energetic, forward-looking style well in the past few years as we have served together on the board of the National Water Alliance. He is a most impres-

sive corporate leader and I can only hope that the vision and altruism he brings to corporate America can become more pervasive.

I also want to reiterate my support for some form of meaningful tax reform that will have the result of liberating the entrepreneurial energy that the present Tax Code is so successful in diverting and suffocating. A number of tax reform proposals have been introduced in recent months and I believe they probably all are better than our present system. Included in those bills, is S. 529, which I authored and which is based on the indepth and creative work of Drs. Rabushka and Hall of the Hoover Institute. I continue to think that the approach of that bill—a straight 19-percent tax on all business and individual income above a generous exclusion level—is the simplest, fairest, and most liberating path we can take to assuring increased productivity and acceptance of the tax burdens.

As discussions of tax reform progress, it is my hope that further attention and support for S. 529 will evolve as the problems associated with the half fixes of the other reform proposals are understood. If individuals and corporate America became aware of the simplicity and merits of S. 529, I believe they would overwhelmingly endorse it and urge its support. I ask unanimous consent that the editorial referred to appear in the CONGRESSIONAL RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

WHAT'S GOOD FOR AMERICA • • •

• • • is good for General Motors. General Motors builds cars; a growing U.S. economy will buy more of them. Yet from much lobbying on the Treasury II tax proposal, this general truth has been forgotten by too many people, from major corporations to the National Education Association.

This is an old problem. As Machiavelli wrote, the general interest in a given reform, like a tax cut to expand the economy generally, always runs into the concerted interests of losers. These losers are organized, vehement, and better able to recognize their stake than are the dispersed "winners" from a given change. Then, too, many winners fail to perceive that they stand to gain—or, out of a general, healthy mistrust of government, worry that what seems a gain could be twisted into a loss by, say, the House Ways and Means Committee.

All of which makes the following development impressive: Large numbers of U.S. businesses favor the Reagan tax plan—even though they are losers if its provisions are considered in a superficial sense. Consider, for example, the following House testimony by Finn M. Casperson, chairman of Beneficial Corp.:

"Beneficial supports tax reform even though its corporate income-tax payments will increase in the aggregate by $100 million over the next five years. • • • Our reason for supporting tax reform in the form submitted by the president is very simple. We believe it will benefit our customers. Most of our customers will pay less taxes and, therefore, have more disposable income to save and invest."

In other words, Mr. Casperson supports tax reform not out of a namby-pamby sense of sacrifice but because he sees that reform will benefit Beneficial. Such thinking may be spreading. A broad group of companies, organized by Jack Albertine of the American Business Council, now takes the same stand as Mr. Casperson. The companies include such giants as GM, IBM and General Mills. With some American companies pleading for trade barriers and other special treatment, it is a pleasure to see so many taking a broad view of corporate self-interest.

One of the main concerns business leaders had about the Reagan plan was that its curbs on depreciation allowances and other forms of business saving would damage capital formation. But often those concerns took insufficient note of the offsetting benefit to capital formation of lower personal rates, which could be expected to expand personal savings. Moreover, savings in the hands of individuals often are applied more efficiently than business savings, since each individual is seeking the best possible return. This instinct liberates the entrepreneurial energy that serves so well to develop new production methods, new products, new markets, and hence greater economic efficiency.

Of course, not everyone has balanced, broad interests against narrow considerations. The teacher lobby led by Mary Hatwood Futrell of the NEA and the state spending lobby mobilized by New York Gov. Mario Cuomo fear that with more income, and more discretion over how it's spent, Americans will help the poor less and cut funding for schools. Yet Mr. Cuomo is the beneficiary of a state budget surplus that can be traced to cuts in both state and federal tax rates that were made before he took office. These low estimates of American generosity are not borne out by figures on charitable giving or the longstanding support for public education and other programs with clearly defined social benefits.

The main special-interest threat to tax reform is from those politicians who have made a career out of pretending that favors for the poor and the middle class can somehow be paid for by "The Rich." Ways and Means Chairman Dan Rostenkowski now hints he will retain Mario Cuomo's favored loophole, the state and local tax deduction, and pay for it by increasing tax rates on the wealthy. Yet experience clearly shows that if the rich don't want to be soaked, they can usually find ways to avoid it. Higher rates produce less. Lower top rates since 1981 have brought in a gush of revenue from the rich. Cutting top rates to 35% would expand that effect; leaving them at 40% or more, as Mr. Rostenkowski now hints, would bring in relatively less.

Like too many corporations in the past, these Democrats may misunderstand their own interests. Perhaps they need to lose several more presidential landslides, and control of the House, to scuttle class warfare and achieve the same understanding folks like Finn Casperson have: What's good for America is good for General Motors—and for the poor, the middle class and the Democratic Party.

MINORITY ENTERPRISE DEVELOPMENT WEEK

Mr. DOLE. Mr. President, this week is Minority Enterprise Development Week—the week we pay tribute to the dramatic strides made by minority entrepreneurs—men and women who have defied the odds, and broken down longstanding barriers to establish their own businesses—businesses which represent an increasingly important source of goods, services, and jobs in our economy.

In observance of this important week, the Department of Commerce and the Small Business Administration are sponsoring a series of special activities, including speeches by top administration officials and industry leaders, seminars on a number of business topics, and a trade fair. In addition, the Departments of Commerce and Energy and the SBA are holding special ceremonies to honor over two dozen minority business men and women for their contributions and achievements.

Mr. PRESIDENT, I ask unanimous consent that the names of each of these outstanding individuals and their background be printed in the CONGRESSIONAL RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL MINORITY ENTREPRENEUR OF THE YEAR

(John Mariotta, Wedtech, Bronx, NY)

Wedtech specializes in the manufacturing of high-tech defense systems. This $50 million a year company is located in a devastated area of the Bronx, where Wedtech is training low income residents in high technology jobs.

In ten years, Mr. Mariotta has taken Wedtech from a 50 employee-$150,000 company to 750 employees and $50 million dollars in gross sales. Last year the company went public and is now being traded on the American Stock Exchange (AMEX).

Wedtech builds major tank components for TACOM, military standard engines for TSARCOM, and their most recent project is powered and non-powered engines for the Rapid Deployment Force.

NATIONAL MINORITY ENTREPRENEUR OF THE YEAR

(Jolyn Robichaux, Baldwin Ice Cream Co., Chicago, IL)

Baldwin Ice Cream Company was originally founded in 1922 by seven black postal service workers. In 1961, Joseph and Jolyn Robichaux acquired the firm. Ten years later Mrs. Robichaux was widowed with two children and vowed "I will become the damnedest CEO this company has ever seen." In 1985 Baldwin anticipates $4.8 million in gross sales. Major customers include Jewel Food Stores, Independent Certified Stores, Dominick's, Buddy Bear, White Hen Pantry, hospitals, cafeterias, restaurants, government/military installations, and Baldwin also has two retail stores while serving over 400 accounts.

Baldwin became the first black-owned concessionaire at O'Hare International Air-

port. Three of those concessions are open with two more due for completion in 1986.

NATIONAL MINORITY MANUFACTURER OF THE YEAR

(Dr. Albert Wey, Advanced Fiberoptics Corp., Tempe, AR)

Advanced Fiberoptics (AFO) is a rapidly growing company specializing in the development and manufacturing of fiberoptic systems, subsystems, and components. Within three years of the company's inception, Dr. Wey has multi-million dollar contracts. Staff for the 1986 year is anticipated at over 90 employees, AFO's products are used in hospitals, universities, banking, communications, military applications and numerous other industries.

NATIONAL MINORITY RETAIL FIRM OF THE YEAR

(Gilberto Gonzalez, International Wholesalers/Retailers Corp., Washington, DC)

Gilberto Gonzalez opened his first store, a small grocery store, in Baltimore back in 1964. The following year he sold the store to open a slightly larger one in Washington, D.C. In subsequent years after opening stores in Maryland and Virginia, he founded the International Wholesalers Corporation. Today, Mr. Gonzalez and his family own a chain of five stores in the District of Columbia, Maryland, and Virginia with an estimated annual gross sales of $11,000,000.

NATIONAL MINORITY SERVICE INDUSTRY OF THE YEAR

(Frank Flores, Marsden Reproductions, New York, NY)

Marsden is a diversified communications service firm with current revenues in excess of $25 million. Mr. Frank Flores purchased the firm in 1972 and began an extensive diversification. This came by adding a full range of reproduction services including audio and video tape production.

Today, Marsden is a 300 employee operation which ranks 64th among the top 100 Hispanic-owned firms. Clients include AT&T, Pepsi, Metropolitan Life, Citicorp and Shearson-American Express.

NATIONAL MINORITY CONSTRUCTION COMPANY OF THE YEAR

(Mat Lucero, Mat Lucero Construction, Los Lunas, NM)

Mat Lucero is from the Isleta Indian Reservation located in New Mexico. After many years of working in the construction trade, Mr. Lucero began his own company. His determination to improve the quality of workmanship in the construction business has helped his sales go from $27,000 in 1982 to a projected $2 million for 1985.

Mr. Lucero's company performs road construction and general building services. His company's employment consists of 26 employees at peak business times, 95 percent from Indian Reservations.

NATIONAL MINORITY SUPPLIER OF THE YEAR

(William Davis, Eagle Steel Products, Inc., Louisville, KY)

Eagle Steel Products is a steel processing plant that was incorporated in 1982. The corporation produces strip steel to a variety of industries including automotive, appliances, and office products.

In 1983, employment stood at 3, (2 of which were minority). Today Eagle has 12 employees, nine of which are minority. Eagle went from $400,000 in sales in 1983 to projected sales of $7,000,000 in 1985. The only obstacle holding Eagle back from becoming even larger is their own plant facility, which is at capacity. Plans are under way for a new larger facility.

Some of Eagle's customers include General Motors, General Electric, and General Tire & Rubber Co.

MINORITY TRADE ASSOCIATION OF THE YEAR

(Ibero-American Chamber of Commerce)

The Ibero-American Chamber of Commerce was founded by Washington's leading Hispanic business persons in 1976. Today, its members cover the spectrum of Hispanic business, from major corporations to family-owned and operated firms.

Over the years the Chamber has earned an outstanding reputation as a "connector of opportunities" for the Hispanic business community.

The Chamber has become an economic development vehicle, and have helped to establish more than 100 Washington area Hispanic firms. In addition, it has channeled millions of dollars in loans and contracts to Hispanic business.

NATIONAL ADVOCATE OF THE YEAR

(Frito-Lay, Inc., Dallas, TX)

In 1983, Frito-Lay, Inc. established an in-house Minority Business Development Task Force, headed by Senior Vice President James O'Neal. This task force included senior managers of all functions within the company. What began as an effort to involve more local minority businesses, ended up expanding well beyond Dallas to the entire country. Frito-Lay expects to spend approximately $100 million with minority businesses in the next five years.

MINORITY GOVERNMENT CONTRACTOR OF THE YEAR

(Joshua I. Smith, Maxima Corp., Bethesda, MD)

This award is presented to Maxima for their outstanding service to the U.S. Department of Energy. For both 1983 and 1984, they were ranked within the top 100 contractors for the Department.

Maxima is a seven-year-old information technology services company. In May of 1985, Maxima was named the fastest growing black-owned company in the country by Black Enterprise magazine.

Maxima was also listed number 98 on INC. Magazine's 1984 roster of the 500 fastest growing, privately held companies in the United States.

DIRECTOR'S AWARD OF EXCELLENCE

(Thomas F. Gilbane, Jr., Gilbane Building Co., Landover, MD)

The Director's Award of Excellence is being presented to Gilbane because of their unequaled support of minority enterprise. Over 75 percent of Gilbane's employees are minorities.

SBA REGION I WINNER

(John B. Cruz Construction Co., Inc., Boston, MA, John B. Cruz III, President)

John B. Cruz Construction Co., Inc. was started 36 years ago with three employees. It is a family-owned and operated business. The company is noted for the design and construction of housing developments in Massachusetts. Cruz Construction served as the contractor on the renovation and development of two buildings in Boston that have been placed on the National Register of Historic Places: the Cox Building and the Sarah Jane Baker School. The Cox Building, which consists of nine adjacent buildings, six are historically designated, was developed into a commercial and residential complex. Cruz Construction is located in the complex. The Sarah Jane Baker School now serves as housing for the elderly. The firm now employs between 50-60 full-time employees, of which 85 percent are minorities. On the average, more than 50 percent of the contracts on their projects are with minority firms. Total sales for the fiscal year which ended April 30 were $20.7 million.

SBA REGION II WINNER

(Laminaire Corp., Rahway, NJ, Charles J. Garay, President)

Charles J. Garay started Laminaire in 1964 following four years in the U.S. Air Force. He began with three employees designing and manufacturing clean room equipment. In 1974, Garay expanded his company to include an electronics division. Today, the firm designs and fabricates ultra-clean laminar flow work stations and modules using the latest technology developed in the micro-electronics, aerospace and biological industries. Laminaire also manufactures components such as receiving antennas, power supplies, printed circuit boards and harness assemblies. There are now 113 employees, of which 40 are disadvantaged. Through an agreement with the local government, the company provides on-the-job training to prospective young people interested in learning about the field of electronics and clean room operation. Several minority employees were hired from this program and have now moved into management positions in the firm. Laminaire Corporation had sales worth more than $5.9 million in 1984.

SBA REGION III WINNER

(Creative Associates, Inc., Washington, DC, M. Charito Kruvant, President; Diane Dodge, Vice President; Cheryl Jones, Vice President; Mimi Tse, Vice President-Treasurer)

Creative Associates, Inc., a women-owned firm, provides consulting expertise in Third World development and cross-cultural education in three major areas: (1) education and social sciences, (2) information management and systems, and (3) private enterprise development. Charito Kruvant, Diane Dodge, Cheryl Jones and Mimi Tse started the firm in 1977 in Kruvant's basement. Among the first projects performed by the firm was the production of six manuals on family education for children. Current projects include running a Peace Corps farm school in Guatemala to teach its volunteers Spanish, animal husbandry, nutrition and agriculture and evaluating the contribution of the Agency for International Development (AID) to Egypt's basic-education program. In addition to its headquarters in Washington, D.C., there are offices in Guatemala, Rwanda, Botswana, Egypt and Cameroon. Creative Associates has won several awards including being named the fifth fastest growing Hispanic firm by Hispanic Business Magazine in 1984 and the Bronze Award from the Information Film Producers of America, Inc., for its audio-visual production on Family Violence. The staff of Creative Associates reflects the ethnic diversity of the owners and is multilingual. The company maintains a commitment to employ refugees and hires staff from agencies that work with special needs

populations. Sales volume in 1984 was more than $4 million.

SBA REGION IV WINNER

Bamsi, Inc., Titusville, FL, Hugh M. Brown, President

Bamsi, Inc. provides management support services to several federal government agencies and private sector companies. Hugh M. Brown started the company in 1979 and in the same year was certified under the SBA 8(a) program. The firm is scheduled to be graduated from the program in March 1986. During fiscal year 1984, the firm had 83.4 percent ($3.5 million) of its contracts through non-8(a) sources such as Boeing, Lockheed and Raytheon Services Corporation. Bamsi, Inc. is the first firm to obtain a superior rating by the Marshall Space Flight Center in Huntsville, Alabama. During the past three years, the company has grown from less than 100 employees to a current full-time workforce of 500, of which approximately 26 percent are minorities. Bamsi, Inc. also is involved in the summer youth employment programs.

SBA REGION V WINNER

General Railroad Equipment and Services, Inc. (GRES), East St. Louis, IL, Donald L. Thompson, President

General Railroad Equipment & Services, Inc. (GRES), a manufacturer of railroad cars and metal fabrication, began operations in 1980. Just six months after opening its doors, the company had to overcome a significant decline in the market for railcar repairs. Sales volume fell 33 percent, but the company was able to survive by respositioning its productive capability into manufacturing products for new markets. Despite its limited experience, the company received acclaim for the high quality of its manufactured products. The firm has been awarded a contract with the Coast Guard to produce telescopic helicopter hangars, making it the first American manufacturer of these hangars for the Department of Transportation. The firm also is one of two companies manufacturing sea sheds for the U.S. Navy. In addition, GRES has obtained competitive contract awards from the Military Traffic Management Command, Amoco, Illinois Power Company and the Trailer Train Company. Sales during the first 11 months of FY 1985 were worth $8 million, a 67 percent increase over last year's sales. Employment in the firm has increased from five in 1980 to its present level of 160. GRES was named Manufacturer of the Year by the St. Louis, Missouri, Minority Business Forum in 1983 and received the Subcontractor of the Year Award from McDonnell Douglas Company, 1982-83.

SBA REGION VI WINNER

Desco Steel Products, Inc., Houston, TX, Jose Edward deSantiago, President

Jose Edward deSantiago became a U.S. citizen in 1976. His first job was making doughnuts at a bakery in Donna, Texas. Moving to Houston, he got work as a welder's helper which helped him gain expertise as a top welder. In 1979 at the urging of a friend, he started Desco Steel Products, Inc. His first jobs were erecting buildings for that same friend; later jobs came from asking his former employer for work. He then decided to manufacture and sell his own buildings. He applied for and received a $100,000 loan from SBA which was used to purchase some land and equipment and build a fabricating plant. From that modest beginning (sales were $250,000 the first year), deSantiago had sales in 1984 worth more than $1.5 million. He employs 12 full-time employees of whom 10 are Hispanic. Desco Steel Products, Inc. was listed among the 50 fastest-growing companies by Hispanic Business Magazine.

SBA REGION VII WINNER

Midwest Maintenance Co., Inc., Omaha, NE, Paul Gutierrez, President

Paul Gutierrez started the Midwest Maintenance Company in 1965. He was 22 and had completed four years in the U.S. Air Force. When his military service was completed, he purchased a portion of the accounts and some equipment and Midwest Maintenance was born. He struggled for about 12 years providing building maintenance to very small office buildings. In 1979, he became involved in the SBA set-aside program, whereby a percentage of government contracts are allotted to small firms. The contracts resulting from the set-aside program enabled the firm to hire additional people and initiate a sales and marketing program. Now the company provides building maintenance for large corporate buildings, but has not ignored the smaller clients. Last year the firm doubled its sales volume. Gutierrez operated the business from his home until 1973, when he purchased the building where the company is now located. It is near the freeway making it accessible to any part of Omaha. The firm has won two awards this year: Minority Business of the Year Award from the Omaha Chamber of Commerce Small Business Council and Goodwill Industries Employer of the year for employing seven Goodwill-trained maintenance employees. The company has a special program to identify employees for upward mobility positions. Currently, out of eight lead positions, three are filled by women.

SBA REGION VIII WINNER

(Joe's Smoke Ring, Arlee, MT, Dorothy Clinkenbeard, President)

With the help of an SBA loan, Dorothy Clinkenbeard was able to become sole owner of Joe's Smoke Ring in 1980. The firm has developed a wholesale business with three retail locations on the Flathead Indian Reservation which sell groceries and gasoline. Through aggressive marketing, the firm has developed highway and transient trade in the area. Sales in 1980 amounted to $1.9 million and have increased to its present level of $8.9 million. In addition, Clinkenbeard, along with her husband, Larry, raises mules which are sold to outfitters, guides, packers and the U.S. Forest Service. The Clinkenbeards have sponsored a mule race for several years which draws regional competitors and attention and has been a major attraction for the area. There were 12 full-time employees when Clinkenbeard took over the firm. Now there are 31—all of whom are Native Americans.

SBA REGION IX WINNER

(Jaykim Engineering, Inc., Brea, CA, Jay C. Kim, President)

Jay C. Kim, president of Jaykim Engineering, Inc., started the firm in 1977 with two employees. Through determination and dedication, Kim has developed his firm to one that had sales of $20.7 million at the end of the firm's fiscal year (April 30, 1985). Jaykim Engineering offers a variety of engineering services including project management, project planning, engineering design and surveying. In addition to headquarters in Brea, California, the firm has offices in San Diego and San Francisco. A loan from SBA in the amount of $100,000 provided much needed capital for the firm. Jaykim Engineers has completed over 200 public works projects. Among its clients are municipalities, federal, state and county agencies and private corporations. Kim was named Asian Businessman of the Year, 1984, by the Asian Business Association of Los Angeles; his firm received an Engineering Excellence Award for Design by the Portland Cement Association in 1983 and the "Caballero de Distinction" award by the Mexican and American Foundation in 1985. The firm now has 50 employees—22 are minorities and 13 women. The award of two contracts under SBA's 8(a) program assisted in gaining access to the federal market for the firm. However, 97 percent of its sales are from non-8(a) sources.

SBA REGION X WINNER

(Dirt & Aggregate Interchange, Inc., Troutdale, OR, Henry Hookaaku Pelfrey, President; Baltazar Flores Ortex, Vice President)

In its nine years in business, Dirt & Aggregate Interchange, Inc. has grown from a one division paving contractor to a multiple division general contractor including heavy excavation, guardrial, median barrier, underground utilities and crack sealing. The Contractors Management Association, Inc. presented the company the First Quality Award for Outstanding Performance in Minority Business Enterprise from 1977-80. The company donated time and equipment to building a barrier-free park for handicapped children. Henry Pelfrey, president, was recognized as a major inspiration for the motivation of underprivileged young people to excel in private business enterprise. At the end of the firm's fiscal year in February 1985, sales exceeded $7 million. Dirt & Aggregate has 80 full-time employees and is working hard to increase the number of women in the company.

DIRECTOR'S SPECIAL RECOGNITION AWARD

(C.J. Patterson)

Mr. C.J. Patterson has dedicated over 25 years in assisting minority entrepreneurs in their efforts to establish viable businesses. Mr. Patterson's involvement as the Chairman of the National Business League, the Golden State Business League, the California Black Republican Council, and a member of the Small Business Advisory Council illustrates many of his achievements.

One of Mr. Patterson's biggest achievements is his contribution to bringing about an active private sector involvement in minority enterprise development.

Mr. President, it should also be mentioned that Augusta, GA, has received this year's State or local government award from the Department of Commerce, and the University of Pittsburgh has received a special recognition award for its comprehensive program to involve minority students in business. Finally, those corporations which have been honored for their commitment to minority enterprise should also be mentioned and I ask unanimous consent that their names also be printed in the RECORD.

MINORITY BUSINESS DEVELOPMENT AGENCY CORPORATE AWARDS

Industrials: The Boeing Co., Borden Inc., Ford Motor Co., General Motors Corp. (Packard Division), Motorola, Inc., The Procter & Gamble Co., Standard Oil Co., The Upjohn Co., Westinghouse Electric Corp. (Defense Group).

Insurance: Metropolitan Life Insurance Co.

Commercial banking: Citibank, N.A.

Utilities: NYNEX (New York Telephone Co.), Pacific Gas & Electric Co.

Construction: Turner Construction Corp.

Trade associations: Edison Electric Institute.

Companies honored for outstanding performance in supporting minority enterprise: AT&T Technologies, Aluminum Company of America, E. I. du Pont de Nemours & Co., General Motors Corp., J.C. Penney, Inc.

U.S. SMALL BUSINESS ADMINISTRATION CORPORATE AWARDS

Boeing Military Airplane Co., Wichita, KS, parent company: The Boeing Co, Seattle, WA.

Boeing Vertol Co., Philadelphia, PA, parent company: The Boeing Co., Seattle, WA.

Bulova Systems and Instruments Corp., Valley Stream, NY, parent company: Bulova Watch Co., Flushing, NY.

The Coca-Cola Co., Atlanta, GA.

J. E. Dunn Construction Co., Kansas City, MO.

General Electric Co., Military Electronic Systems Operation, Syracuse, NY, parent company: General Electric Co., Fairfield, CT.

Indiana Bell Telephone Co., Indianapolis, IN, parent company: Ameritech, Chicago, IL.

InterFirst Bank Fort Worth, N.A., Fort Worth, TX.

Martin Marietta Aerospace, Denver, CO, parent company: Martin Marietta Corp., Bethesda, MD.

McDonald's Corp., Oak Brook, IL.

McDonnell Aircraft Co., McDonnell Douglas Corp., St. Louis, MO.

Michigan Consolidated Gas Co., Detroit, MI, parent company: Primark, McLean, VA.

Pro-Line Corp., Dallas, TX.

Rockwell Hanford Operations, Richland, WA, parent company: Rockwell International Corp., Pittsburgh, PA.

Sargent Industries, Huntington Park, CA, parent company: Dever Corp., New York, NY.

Teledyne McCormick Selph, Hollister, CA.

Westinghouse Hanford Co., Richland, WA, parent company: Westinghouse Electric Co., Pittsburgh, PA.

NATIONAL 4-H WEEK

Mr. DOLE. Mr. President, the week of October 6 has been designated as National 4-H Week and I would like to take this opportunity to commend both the leaders and participants of these clubs for their numerous achievements.

For over 75 years, 4-H clubs have been providing educational training and guidance for our Nation's youth. The participants of these programs contribute to an array of areas, including community service, agriculture, energy conservation, ecology, health and nutrition. Through active participation in community and family based projects, youth between the ages of 9 and 19 have an opportunity to develop skills and acquire knowledge which will make them productive members of society.

This year's theme, "4-H for Youth for America" shows the breadth of their mission. By influencing the direction and attitude of our youth, 4-H clubs contribute to the shape of America, as the youth of today will lead us into the future of tomorrow.

Mr. President, I salute all those who participate in this educational program, including the 600,000 volunteer leaders, 5 million boys and girls and the cooperative extension system of the U.S. Department of Agriculture which administers 4-H clubs.

NATIONAL EMPLOY THE HANDICAPPED WEEK

Mr. DOLE. Mr. President, on August 11, 1945, the Congress, by joint resolution, designated the first full week in October of each year as the "National Employ the Handicapped Week." Since then, this week has served as a time for us to recognize the vast employment capabilities of the 36 million Americans we refer to as disabled.

THE KEY TO SELF-RELIANCE

Persons with disabilities can become either dependent or independent; lacking in confidence, or possessing self-esteem. They can become tax users or taxpayers; self-supporting or supported by others. What becomes of persons with disabilities will depend on whether they have the opportunity to use their skills and talents. A job can be the single most important factor in determining the direction of a disabled person's life.

While we have made great progress as a nation in bringing disabled workers into the economic mainstream, we still have a long way to go. Too often, disabled persons are denied employment because their disabilities are perceived as a limitation, when in fact, they are fully capable of doing the job. This type of attitudinal barrier can prevent a disabled person from achieving and living up to his full potential far more effectively than the physical or mental impairment itself.

CONTINUED RESOLVE

Mr. President, of the more than 36 million disabled persons living in America, approximately 15 million are of working age. Of that 15 million, 10 million have been unemployed for so long that the Department of Labor no longer includes them in its monthly unemployment report. This week, and every week, we must be mindful of the many obstacles that remain in the path of economic opportunity for Americans with disabilities. Progress must continue, for disabled Americans deserve a fair chance to be judged by their abilities, not their disabilities, to achieve meaningful employment and lead productive lives.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting a nomination, which was referred to the Committee on the Judiciary.

(The nominations received today are printed at the end of the Senate proceedings.)

ANNUAL REPORT OF THE RAILROAD RETIREMENT BOARD—MESSAGE FROM THE PRESIDENT—PM 87

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

I hereby submit to the Congress the Annual Report of the Railroad Retirement Board for Fiscal Year 1984, pursuant to the provisions of Section 7(b)6 of the Railroad Retirement Act, enacted October 16, 1974, and Section 12(1) of the Railroad Unemployment Insurance Act, enacted June 25, 1938.

Railroad Retirement Board actuaries inform me that, while the Railroad Retirement Solvency Act of 1983 has removed immediate cash-flow problems threatening the rail pension fund, "the long-term stability of the railroad retirement system is still questionable." Despite the 1983 legislation, the rail sector unemployment fund is insolvent and currently owes some $700 million to the rail pension fund. Extending Federal/State unemployment insurance coverage to rail employment, as proposed, would provide comprehensive, soundly financed unemployment insurance coverage for rail workers, and would ensure that rail pensioners' assets are protected and all debts to the rail pension are repaid.

RONALD REAGAN.

THE WHITE HOUSE, *October 9, 1985.*

MESSAGES FROM THE HOUSE

At 10:30 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed

the following bills, in which it requests the concurrence of the Senate:

H.R. 1483. An act to authorize the Smithsonian Institution to plan and construct facilities for certain science activities of the Institution, and for other purposes;

H.R. 1904. An act to provide for the use and distribution of funds appropriated in satisfaction of judgements awarded to the Chippewas of the Mississippi in Docket Numbered 18-S before the Indian Claims Commission, and for other purposes;

H.R. 2698. An act to designate the United States Courthouse in Tucson, Arizona, as the "James A. Walsh United States Courthouse"; and

H.R. 3174. An act to amend chapter 171 of title 28, United States Code, to allow members of the Armed Forces to sue the United States for damages for certain injuries caused by improper medical care.

At 3:51 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House disagrees to the amendments of the Senate to the bill (H.R. 2942) making appropriations for the legislative branch for the fiscal year ending September 30, 1986, and for other purposes; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. FAZIO, Mr. OBEY, Mr. ALEXANDER, Mr. MURTHA, Mr. TRAXLER, Mrs. BOGGS, Mr. WHITTEN, Mr. LEWIS of California, Mr. CONTE, Mr. MYERS of Indiana, and Mr. PORTER as managers of the conference on the part of the House.

The message also announced that the House disagrees to the amendments of the Senate to the bill (H.R. 3036) making appropriations for the Treasury Department, the United States Postal Service, the Executive Office of the President, and certain independent agencies for the fiscal year ending September 30, 1986, and for other purposes; it agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. ROYBAL, Mr. ADDABBO, Mr. AKAKA, Mr. HOYER, Mr. COLEMAN of Texas, Mr. YATES, Mr. WHITTEN, Mr. SKEEN, Mr. LOWERY of California, Mr. WOLF, AND Mr. CONTE as managers of the conference on the part of the House.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1903. An act to provide for the use and distribution of funds appropriated in satisfaction of judgements awarded to the Chippewas of Lake Superior in Dockets Numbered 18-S, 18-U, 18-C, and 18-T before the Indian Claims Commission; and

H.R. 2174. An act to provide for the transfer to the Colville Business Council of any undistributed portion of amounts appropriated in satisfaction of certain judgements awarded in the Confederated Tribes of the Colville Reservation before the Indian Claims Commission.

MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 1483. An act to authorize the Smithsonian Institution to plan and construct facilities for certain science activities of the Institution, and for other purposes; to the Committee on Rules and Administration.

H.R. 1904. An act to provide for the use and distribution of funds appropriated in satisfaction of judgements awarded to the Chippewas of the Mississippi in Docket Numbered 18S before the Indian Claims Commissions, and for other purposes; to the Select Committee on Indian Affairs.

H.R. 3174. An act to amend chapter 171 of title 28, United States Code, to allow members of the Armed Forces to sue the United States for damages for certain injuries caused by improper medical care; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HATFIELD, from the Committee on Appropriations:

Special Report on Allocation to Subcommittees of Budget Totals from the First Concurrent Resolution for Fiscal Year 1986 (Rept. No. 99-155).

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs, without amendment:

S. 1752: An original bill to authorize the mining of gold bullion coins, and to award special congressional gold medals to Jan Scruggs, Robert Doubek, and Jack Wheeler.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. STAFFORD, from the Committee on Environment and Public Works:

Jennifer Joy Manson, of Virginia, to be an Assistant Administrator of the Environmental Protection Agency.

Lawrence J. Jensen, of Virginia, to be an Assistant Administrator of the Environmental Protection Agency.

(The above nominations from the Committee on Environment and Public Works were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

Roger William Jepsen, of Iowa, to be a Member of the National Credit Union Administration Board for the remainder of the term expiring August 2, 1987

(The above nomination from the Committee on Banking, Housing, and Urban Affairs was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. HATCH, from the Committee on Labor and Human Resources:

Craig C. Black, of California, to be a Member of the National Science Board, National Science Foundation, for a term expiring May 10, 1990;

William J. Merrell, Jr., of Texas, to be an Assistant Director of the National Science Foundation;

Charles L. Hosler, of Pennsylvania, to be a Member of the National Science Board, National Science Foundation, for the remainder of the term expiring May 10, 1988.

(The above nominations from the Committee on Labor and Human Resources were reported with the recommendation that they be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. WILSON:

S. 1751. A bill to authorize the Secretary of the Interior and the Secretary of Energy to enter into an agreement with the city of Redding, CA, regarding the Lake Reddin power project; to the Committee on Energy and Natural Resources.

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs:

S. 1752. An original bill to authorize the minting of gold bullion coins, and to award special congressional gold medals to Jan Scruggs, Robert Doubek, and Jack Wheeler; placed on the calendar.

By Mr. DOMENICI (for himself and Mr. DECONCINI):

S. 1753. A bill to amend title II of the Trade Act of 1974 to eliminate the discretion of the President to grant import relief, and for other purposes; to the Committee on Finance.

By Mr. GLENN (for himself and Mr. ROTH):

S. 1754. A bill to ensure adequate verification of peaceful uses of nuclear exports from the United States to the People's Repubic of China, and for other purposes; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. WILSON.

S. 1751. A bill to authorize the Secretary of the Interior and the Secretary of Energy to enter into an agreement with the city of Redding, CA, regarding the Lake Redding power project; to the Committee on Energy and Natural Resources.

REGARDING THE LAKE REDDING POWER PROJECT

Mr. WILSON. Mr. President, today I am introducing legislation designed to facilitate the construction of a proposed hydroelectric facility known as the Lake Redding power project. This project involves the construction by the city of Redding, CA, of a new 27-foot-high dam and powerplant capable of generating 15 megawatts of power.

Located on the Sacramento River in north/central California, this pro-

posed project does not involve any Federal lands and does not require any Federal financing. The city of Redding is prepared to proceed on its own without Federal help and—in addition to the matter addressed by the bill I am introducting today—needs only the blessing of the Federal Energy Regulatory Commission in order to proceed to construction.

The one matter that does need to be addressed by Congress has to do with a Bureau of Reclamation project located upstream of the city of Redding's proposed dam. It has been determined that once the Lake Redding project comes online, its forebay will likely back up the Sacramento River all the way to the upstream Bureau project known as the Keswick Dam. This dam has a generating capacity of 75 megawatts which is marketed by the Western Area Power Administration.

The problem with the proposed Lake Redding project is that its forebay, which will reach all the way upstream to the Keswick Dam, will raise the tailwater elevation of the Keswick Powerplant and result in a loss of Keswick power generation. The city is prepared to compensate the Western Area Power Administration with replacement in kind of any losses in power generation at the Keswick Dam and has, in fact, successfully negotiated a draft agreement to this end with WAPA and the Bureau of Reclamation. However, congressional authorization is required before the Federal Government can formally become a part of this proposal agreement.

The bill I am introducing today authorizes the Secretaries of Interior and Energy to enter into this agreement conditioned upon the Federal Government being fully compensated for any reduction of electric energy generated at the Keswick facility.

I commend this bill to my colleagues for its favorable consideration and ask unanimous consent that it be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1751

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior and the Secretary of Energy are authorized to enter into an agreement with the City of Redding, California, regarding the non-Federal Lake Redding Power Project—

(1) to allow the combined operation of the Keswick hydroelectric facility operated by the Bureau of Reclamation and the Lake Redding Power Project; and

(2) to provide that the United States is fully compensated, either monetarily or in energy as determined by the Administrator of the Western Area Power Administration, for any reduction of electric energy generated at the Keswick facility caused by the combined operation of the Keswick facility and the Lake Redding Power Project pursuant to the agreement.

By Mr. DOMENICI (for himself and Mr. DECONCINI):

S. 1753. A bill to amend title II of the Trade Act of 1974 to eliminate the discretion of the President to grant import relief, and for other purposes; to the Committee on Finance.

IMPORT RELIEF

Mr. DOMENICI. Mr. President, the bill I am introducing today is an overdue reform of a very important part of our trade laws. I have thought for a long time that section 201 does not work. The lack of a viable 201 has contributed to dismantling American industry. This is a trend we cannot allow to continue. The standard of proof is very difficult to meet. In fact, the standard is so high that many industries will not file a case, even when it is the only cause of action they have. In New Mexico, the potash industry and the uranium industry both continue to suffer losses, to mothball workers and to padlock the entrance to mines, but they won't bring a 201 case because of the tough standard.

Added to that burden is the uncertainty of any relief even if the industry prevails. The President has elected to give the industry relief substantially similar to what the ITC recommended, only once. The message is a clear, "Don't even bother."

If our criminal justice system worked like our section 201 law has been working, we would have the prosecutor file cases, call witnesses, have the jury find guilt, and then let the judge turn the convicted criminals loose. Fortunately, our criminal justice system does not work that way. Unfortunately, our 201 law has been letting imports run wild. Instead of turning criminals loose during a crimewave, we are turning our backs on U.S. industry during a relentless import wave. It doesn't make sense. The problem is the law and it needs to be reformed.

I am convinced that 201 needs to be totally redone because justice requires it; otherwise we will experience the perils of deindustrialization. I think this poses a very serious threat.

Given the surge of imports, especially in the mining and manufacturing sectors, there is a need for a strong and workable section 201 if this country is going to save the remnants of many American sectors of our economy.

Grants, NM, was the Pittsburgh of uranium, producing one-third of the U.S. uranium. Today, every mine but one is closed. Carlsbad was the Detroit of potash because New Mexico produced 97 percent of our domestic potash. Today, New Mexico's potash industry plunges toward extinction. It doesn't take a Ph.D. economist with an econometric model to figure out that these industries are being hurt by imports, but the industry representatives tell me that filing a 201 case is just a waste of money.

The original purpose for a section 201 case is to prove that an industry is being injured by imports and then to provide a remedy in the form of a breathing space from the imports. There are three parts to such a case. They are filed before the International Trade Commission which takes evidence on two issues. First, whether the industry has been injured and, if so, whether the substantial cause of the injury has been imports. If the substantial cause is found to be imports, then the ITC takes evidence on what would be the best remedy. They can recommend quotas, tariffs, or orderly marketing agreements. The Commissioners make their recommendations, but the decision is ultimately with the President. He has the option to do nothing.

Section 201 has a history of being a long shot. However, as the copper case, and recently decided shoe case clearly illustrate, petitioning for 201 relief is presently an exercise in futility.

There are three things wrong with section 201. First, the standard is too high; second, the choice of remedies is too limited; and third, the present law gives the President too much discretion. The result is too much of nothing getting accomplished.

The "substantial cause" standard was implemented when the United States had a competitive edge over everyone. The United States made a decision to make it very difficult for an industry to prove the cause of its problems is imports. If there is a general recession, industries have lost cases, if it is because of the strong dollar, they have lost. I don't think good trade policy requires us to have such a difficult standard.

GATT only requires that imports be a "cause," not a substantial cause. This bill would make our 201 standard GATT consistent, and would make it easier for industries to win their case.

Another section of the bill would eliminate the President's discretion to do nothing. Right now, the law gives him four choices: Quotas, tariffs, open marketing agreements, or no relief. That is the way the law is written; the way it is applied is a de facto, no relief.

My bill would expand the list of remedies to include negotiations for voluntary restraint agreements as well as other types of negotiations. This is necessary because oftentimes the best remedies are those that can be negotiated either bilaterally or multilaterally to meet the conditions in the marketplace.

In addition to expanding the list of remedies, my bill also eliminates the possibility of no relief because it eliminates the President's alternative of granting no relief.

Since the law hasn't been working, I think industries that have unanimous-

ly won their cases before the ITC should be given a second chance to receive a remedy. The bill provides for a fast track, mini-201 for cases filed after January 1, 1984, if the petitioner received a unanimous finding of injury before the ITC. After a hearing to prove that the injury is still continuing, the case would go to the President. He would have to choose from the menu of remedies. Under this new section 201, he would have to give the industry some relief.

This fast track would provide an opportunity for the shoe industry and the copper industry to repetition without duplicating the evidence that was submitted in their unsuccessful 201 cases. The fast track would conclude the process—from filing date to final resolution within 3 months.

Lowering the standard would make section 201 an important tool in dealing with our trade deficit. It would mean that more industries could file and win. We would be making our trade laws work better, and would be restoring legitimacy to this important part of our trade statutory scheme.

Thank you Mr. President.

By Mr. GLENN (for himself and Mr. ROTH):

S. 1754. A bill to ensure adequate verification of peaceful uses of nuclear exports from the United States to the People's Republic of China, and for other purposes; to the Committee on Foreign Relations.

SINO-AMERICAN NUCLEAR VERIFICATION ACT

● Mr. GLENN. Mr. President, I rise to introduce the Sino-American Nuclear Verification Act of 1985.

Mr. President, the Senate has before it a proposed nuclear Agreement for Cooperation between the United States and the People's Republic of China [PRC] that is of potentially far reaching consequence. The Congress has 90 days of continuous session to review it and possibly act on it before the agreement goes into effect. This 90-day period began on July 24, 1985.

Mr. President, this agreement has been marked by controversy from the very beginning. Negotiations over the agreement were reportedly lengthy and difficult, and appeared on the surface to be stalemated more than once. Suddenly, just prior to Mr. Reagan's visit to Beijing, a breakthrough was announced, and an agreement initialed. During this period, there were briefings by the State Department that Chinese nuclear behavior had become almost exemplary; that China's previous policy of supporting the proliferation of nuclear weapons had changed; that China's entry into the IAEA—accomplished by Taiwan's expulsion—was the sign of a new day; that no longer would we see China send unsafeguarded nuclear materials to countries such as South Africa or Argentina, or possibly provide Pakistan with bomb design information, as has been alleged. And do you know on what this was based? It was based on a one line statement in a toast made by Mr. Zhao at a White House dinner.

We all know what happened next. Reports surfaced that there were Chinese technical personnel at Kahuta, the site where the Pakistanis are clandestinely building a gas centrifuge nuclear enrichment plant whose ultimate purpose is patently evident—to produce highly enriched uranium for nuclear weapons.

Since two administrations, including this one, had been struggling for a period of 5 years to try to stop or at least slow down the Pakistani march to the bomb, the administration was more than a little upset by this apparent inconsistency between word and deed by the Chinese. So the signing of the agreement by the President was postponed for more than a year while additional clarification was sought on Chinese nonproliferation policy.

Once again, fortuitously, on the eve of a visit by Vice Premier Li Peng to the United States, the stalemate was resolved to the State Department's satisfaction, and President Reagan signed the agreement—a 30-year agreement on nuclear trade with a country that has gone through two major internal upheavals over the past 36 years, whose change of heart on nonproliferation matters has yet to be tested, and who has already, in the case of the Shanghai communique on the Taiwan question, provided us with an example of a situation where what we thought was understood was not.

Now, Mr. President, I am not about to argue that there should be no United States nuclear agreement with China. There are, however, those who believe that even though China is a nuclear weapon state, the transfer of United States nuclear technology for power generation will make a contribution to China's military capability; and that a country that has experienced such severe internal political instability may move in the future in unpredictable ways, including ways that could threaten United States national security. But I am not one of those who believe that trade agreements with potential adversaries ought to be avoided in every case. There are benefits to be obtained, both economic and political.

But, Mr. President, these trade benefits will be illusory if they are purchased at the expense of clarity of understanding of the conditions under which such trade is to proceed. We need only recall the difficulties we have had with India over disputed interpretations of nuclear trade agreements, and these disputes have not ended yet. Do we want to repeat that unhappy story with the Chinese? I think not.

Now, just what are the problems with this agreement? There are four problem areas:

1. VERIFICATION OF PEACEFUL USES

The agreement provides for no specific verification of peaceful uses of U.S.-exported nuclear equipment, materials, or technology. Instead, there are to be diplomatic discussions for the purpose of agreeing on visits to the exported facilities and for exchanges of information. There are no goals or standards regarding what would constitute an acceptable arrangement to the United States. Since the diplomatic discussions will not begin until after the agreement goes into effect, the Congress, in essence, is being asked to accept an agreement which still requires further negotiation on one of its most important provisions. This is, indeed, the proverbial pig in a poke. But it is salvageable. Since the Chinese have already announced that they will make a voluntary offer to the IAEA to allow safeguards on some of their nuclear facilities, there is no reason for the U.S. position on verification of peaceful uses of U.S.-exported nuclear items to be so vague.

2. U.S. CONSENT RIGHTS

The U.S. consent rights over reprocessing and enrichment required under the Nuclear Nonproliferation Act of 1978 are contained in the agreement, although the language is unusual, unorthodox, and convoluted.

Of particular concern, however, is the possible interpretation of this language in article 5 to the effect that although the United States possesses the required consent rights, the United States is obligated to exercise them in a manner favorable toward the reprocessing of spent fuel. Although the State Department has issued a legal brief claiming the U.S. rights are completely unfettered, the question is, Do the Chinese agree? If not, we are setting ourselves up for a potential future confrontation that will do nothing good for Sino-American relations or nonproliferation policy.

3. THE RELATIONSHIP OF THE AGREEMENT TO FUTURE U.S. EXPORT LAWS AND REGULATIONS

The last sentence of article 2(1) refers to the attitudes of both countries toward treaties and the relationship of internal legislation to the latter. In essence, the statement says that neither party can use internal legislation as a justification for abrogation of a treaty. There are two things to be said about this. First, agreements for cooperation are not treaties, although it might not be a bad idea to give them treaty status in the future so the Senate would have to approve them before they went into effect. Second, the United States is not obligated to transfer anything under the agreement, so any U.S. laws

concerning, say, export license requirements cannot legitimately be viewed as abrogating the treaty. But, the insertion of this language into the agreement is troubling, because it resonates with complaints leveled at the United States in years past that changing nuclear export licensing requirements or the rules on exercise of U.S. consent rights during the life of an agreement is somehow unfair or not in keeping with standard legal practice. Despite the presence of language in article 2(1) that the agreement will be implemented by each party in accordance with its respective applicable national laws, regulations, and license requirements, the last sentence of article 2(1) is a potential source of trouble without further clarification. In particular, it should be understood by the Chinese that any future export laws or rules enacted by Congress or promulgated by a future administration will be applicable to any nuclear transfer or retransfer requests made by or on behalf of the Chinese at the time. And, that such change in export or retransfer requirements do not constitute a violation of the agreement by the United States.

4. CHINA'S NONPROLIFERATION POLICIES

The last item of concern I have about the agreement involves not the actual provisions of the latter, but the supplementry documentation describing China's nonproliferation policies. The State Department has provided, on a classified basis, a summary of discussions between Ambassador Richard T. Kennedy and Chinese officials concerning China's nonproliferation policies. The Chinese did not sign this document, but have made oral statements to the effect that the document basically reflects their position. Now, Mr. President, if the State Department document truly reflects China's nonproliferation policy, then, looking at the history of both Chinese nuclear involvement with other nations and Chinese nonproliferation philosophy, one can only conclude that an almost complete about-face has occurred in China over the past year or two in this area.

I would like to spend a few moments indicating the dimensions of this turnabout, if that is what it is. For example, on August 16, 1963, in the Peking Review, an official statement contained the following passages:

> Whether or not nuclear weapons help peace depends on who possesses them. It is detrimental to peace if they are in the hands of imperialist countries; it helps peace if they are in the hands of socialist countries. It must not be said indiscriminately that the danger of nuclear war increases along with the increase in nuclear powers. . . . Nuclear weapons in the possession of a socialist country are always a means of defense against nuclear blackmail and nuclear war. So long as the imperialists refuse to ban nuclear weapons, the greater the number of socialist countries possessing them, the better the guarantee of world peace.

Please note that in this timeframe we had concluded the Partial Test Ban Treaty with the Soviets, a treaty that was criticized severely by the Chinese and which they have not signed to this day.

Now, of course, the statement I quoted from was made before China became a nuclear power herself in 1964. Did that event change her attitude about proliferation of weapons? No, it did not.

In 1966, Chou En-Lai stated that the draft Nuclear Nonproliferation Treaty [NPT] was a great conspiracy against all peace-loving countries and peoples. In 1977, the Chinese News Agency Xinhua described a Comprehensive Test Ban [CTB] as a new starting point for another round of the nuclear race. The hegemonic practice of prohibiting the small- and medium-sized countries from developing their own nuclear weapons can deceive nobody. In 1981, a Chinese delegate declared to the United Nations Commission on Disarmament that a CTB can only tie the hands of those countries with weaker defense capabilities.

Well, Mr. President, we have seen many newspaper reports in recent years that the Chinese proproliferation stance was backed up by more than words. China was reported as helping Pakistan with the latter's nuclear weapons program, and China was reported to have sent heavy water to Argentina and enriched uranium to South Africa without requiring safeguards.

Now we are told that times have changed, and so have Chinese policies. Last year, as I mentioned at the beginning of my statement, a public declaration was made by Premier Zhao Ziyang that "• • • we by no means favor nuclear proliferation, nor do we engage in such proliferation by helping other countries to develop nuclear weapons." The problem with this statement—besides the fact that it was preceded by criticism of the NPT and a reiteration of China's refusal to accede to it—was that not long after it was made, Chinese scientists were discovered at the Kahuta site in Pakistan which, as I said earlier, is the site where a clandestine nuclear enrichment plant is being built—a plant that will have the capability of producing weapons-grade high enriched uranium. It was that discovery that put this agreement on hold for over a year.

Now we are asked to accept, as a definitive description of Chinese nonproliferation policies, a summary of discussions on the subject prepared by U.S. negotiators, and not signed by the Chinese.

Mr. President, over the past year we have observed Chinese entry into the IAEA, its voluntary offer to allow safeguards on some of its nuclear power exports to nonweapon states. These acts do suggest that the Chinese see value in behaving more responsibly on nuclear matters. But the Pakistani incident took place during the period when it was believed by our negotiators that Chinese policy had changed significantly. Given this history, should we depend on a written summary of subsequent discussions that the Chinese have not formally subscribed to as a basis for judging the adequacy of present Chinese nonproliferation policy? I say no. We need a comprehensive description prepared by the Chinese themselves so we see whether what they say is consistent with what the State Department believes and, also, so we have a formal basis for comparing future Chinese actions to Chinese words in the area of nuclear nonproliferation.

Mr. President, the four areas of concern I have outlined can be dealt with without rejecting this agreement and without any special reopening of negotiations on the agreement.

Article 5 of the agreement requires the United States and China to engage in diplomatic discussions for the purpose of settling the issue of visits for verifying peaceful uses of projected United States nuclear transfers to China. During this period, all the issues I have raised can be settled with the Chinese.

The bill I am introducing says simply that there will be no nuclear transfers or retransfers to China under the agreement until these issues are settled satisfactorily. Moreover, the bill is precise in describing what constitutes a satisfactory resolution of these issues.

PROVISION ON VERIFICATION

In the case of verification of peaceful uses, the bill requires that verification be equivalent to that provided under so-called INFCIRC/66/Rev. 2 safeguards of the IAEA. These are the safeguards arrangements that the IAEA enters into with nations that have unsafeguarded as well as safeguarded facilities. Now that China has made a voluntary offer to the IAEA to accept safeguards on some of its facilities, this provision is appropriate and is in keeping with the Chinese voluntary offer.

I should point out, Mr. President, that the Chinese have signed nuclear trade agreements with Japan, Argentina, and Brazil in which IAEA safeguards on all exported items are provided for. I am sorry that our negotiators failed to achieve a similar provision before deciding to initial and before the President signed the proposed agreement, but I believe that we can salvage the situation through enactment of this legislation.

PROVISION ON CONSENT RIGHTS

The second area of concern, U.S. consent rights, simply requires that we

redress an imbalance of language in the agreement in order to avoid any misunderstanding on the part of the Chinese. Thus, while the agreement does say "the parties undertake the obligation to consider such activities—that is reprocessing, et cetera—favorably," the State Department has stated in an explanatory brief that "the United States has the right to withhold its agreement to any activity that is proposed," and claims that this is sufficient to satisfy the requirements of U.S. law. But, Mr. President, it is evident to any person, even lawyers, that a right that is circumscribed in some way cannot be freely exercised. If I tell someone he cannot enter my home without my permission, but guaranty that I will give my permission at 7 p.m. on Saturday night, the State Department might claim I still retain my consent right because my home cannot be entered until my permission is given. But having tendered a guaranty, I have—if I am an honorable person—effectively circumscribed that right and, some might argue that I have effectively given it up. Certainly, at the least, the other party could feel rather aggrieved if the guaranty were not honored. I do not believe it was the intent, nor would it be wise, for the Chinese to be given the impression that the United States was biased in favor of allowing the reprocessing of any spent fuel covered by this agreement. Accordingly, my bill would simply restore some balance to this area by requiring the President to elicit from the Chinese their recognition that the language of article 5 does not favorably or unfavorably dispose the United States to approve any reprocessing or enrichment of spent fuel or other alterations in form or content of fuel covered by the agreement. In other words, the language of the agreement should be seen as completely neutral in terms of any predisposition by the United States toward approvals of future Chinese requests for reprocessing or other activities governed by U.S. consent rights.

PROVISION ON FUTURE EXPORT CONTROLS

Similarly, it is important to clarify the status of the agreement with respect to future legislation on U.S. export controls, and to have Chinese recognition of such status.

My legislation would require the President to elicit recognition from the Chinese Government that any future Chinese requests for transfers or retransfers of nuclear equipment, materials, or technology will be subject to all the rules and regulations mandated by domestic law and policy at that time, regardless of whether such laws and policies were implemented before or after this agreement went into effect.

The purpose of this provision is to emphasize that the agreement is only a framework for engaging in nuclear trade, but that the detailed structure within this framework is variable and at any given time is determined by all the export laws and regulations in existence at that given time. If the United States, for example, decided to require an additional export criterion in 5 years, then any Chinese export license request 5 years from now would be subject to that criterion. We must be sure that the inappropriate language in the agreement referring to treaties and domestic legislation is not interpreted by the Chinese to mean that our requirements for nuclear transfers or retransfers to China will be unchanged once this agreement goes into effect.

PROVISION ON CHINESE NONPROLIFERATION POLICIES

Finally, Mr. President, my legislation would require that, prior to initiating any trade under this agreement, the United States have a public detailed description of Chinese nonproliferation policies written by the Chinese themselves, and that this description correspond in all essential details with the summary of United States/China discussions on Chinese nonproliferation policies provided to the Congress by the State Department on a classified basis. This will ensure that we have a clear and unambiguous Chinese commitment to those policies.

Mr. President, as I said earlier, this agreement provides for diplomatic discussions to work out the details of visits for purposes of establishing verification of peaceful uses of future U.S. nuclear exports to China. These diplomatic discussions allow an opportunity for the United States to engage the Chinese in discussions that would lead to clarifying the agreement in accordance with the requirements laid down in the legislation I have introduced.

I believe that with these clarifications, including the publication of Chinese nonproliferation policies and the establishment of an appropriate system of verification of peaceful uses in accordance with IAEA Document INFCIRC/66/Rev. 2, we will have a framework for nuclear trade with the People's Republic of China that most of us in the Senate can support and be comfortable with.

But let us make no mistake about what may await us down the road if these clarifications and verification conditions are not issued or adopted. We will have a situation similar to that which occurred and is still occurring with the Indians; we will risk having thorny diplomatic problems that will prevent the advances in the United States/China relations that this agreement is supposed to bring; we will have provided another example of how to undermine one's own nonproliferation policy, with an attendant loss of our credibility on the issue; and we may even end up putting our national security in jeopardy.

I urge my colleagues to support this legislation, and ask unanimous consent that the legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1754

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Sino-American Nuclear Verification Act of 1985".

FINDINGS

SEC. 2. The Congress finds that—

(1) the international nuclear nonproliferation regime, including the safeguards system of the International Atomic Energy Agency (IAEA), and the domestic laws of the United States controlling nuclear exports, are important elements in the struggle against the spread of nuclear weapons;

(2) nuclear trade involving nonsensitive safeguarded equipment, materials, and technology can be a useful component in an effective nuclear nonproliferation policy, is of economic value to the United States, and helps to fulfill the obligations of the United States under the Treaty on the Non-Proliferation of Nuclear Weapons, done on July 1, 1968;

(3) nuclear agreements for cooperation between the United States and other nations should be without ambiguity as to meaning or implementation and should be in keeping with the letter and spirit of the Nuclear Proliferation Act of 1978 and the Atomic Energy Act of 1954;

(4) agreements for cooperation, including the agreement between the United States and the People's Republic of China, signed on July 23, 1985, do not constrain the United States from applying all laws and regulations regarding nuclear exports which are in effect at the time of the export or the licensing thereof;

(5) the national security of the United States may be put at risk by nuclear trade with nations whose nuclear nonproliferation policies are either unsatisfactory or are not sufficiently specific or detailed to judge whether they are satisfactory;

(6) the transfer or retransfer of nuclear equipment, materials, or technology to any nation without adequate verification of their peaceful uses undermines the international nuclear nonproliferation regime and is inimical to the common defense and security of the United States; and

(7) the Agreement for Cooperation Between the United States and the People's Republic of China Concerning Peaceful Uses of Nuclear Energy, signed on July 23, 1985 (hereafter in this Act referred to as the "Agreement for Cooperation"), together with the Department of State document entitled "United States Summary of Discussions" (relating to China's nuclear nonproliferation policy), do not provide a sound basis for nuclear trade between the two countries without further clarification of—

(A) the verification of peaceful uses covering exported items;

(B) the rights of consent and the exercise thereof by the United States over the enrichment of United States supplied fuel, the reprocessing of United States-origin spent fuel, or the reprocessing of other spent fuel

arising from a United States supplied reactor;

(C) Chinese nuclear nonproliferation policies; and

(D) the relationship of the Agreement for Cooperation to future United States export control laws.

PURPOSES

SEC. 3. The purposes of this Act are to—

(1) provide for the clarification of understandings regarding the implementation of the Agreement for Cooperation;

(2) strengthen the nuclear nonproliferation regime by providing an example of United States leadership in fostering more equal treatment of nuclear-weapon states and nonnuclear-weapon states regarding conditions of nuclear trade;

(3) encourage commitments by nuclear-weapon states to formal or tacit adherence to the principle of safeguards for nuclear materials, equipment, and technology used for peaceful purposes; and

(4) protect United States national security interests through strict verification of peaceful uses and full retention of United States rights of consent concerning transfers or retransfers of United States nuclear equipment, materials and technology as well as materials derived from United States facilities.

SEC. 4. (a) Notwithstanding any other provision of law, including any international agreement, no license may be issued for the export to the People's Republic of China of any nuclear equipment, materials, or technology, and no approvals for the transfer or retransfer to the People's Republic of China of any nuclear equipment, materials, or technology may be given by the United States until the expiration of a period of 30 days of continuous session of Congress after the President has certified to the chairman of the Foreign Relations Committee of the Senate and to the chairman of the Foreign Affairs Committee of the House of Representatives that—

(1) the verification of peaceful uses on exported items covered by the Agreement for Cooperation will be essentially equivalent to that provided by the materials accounting and inspection standards normally applied by the International Atomic Energy Agency in accordance with its document INFCIRC-66-Rev. 2 entitled "The Agency's Safeguard System (1965, as provisionally extended in 1966 and 1968)";

(2) the Government of the People's Republic of China has communicated its recognition that the Agreement for Cooperation neither favorably nor unfavorably disposes the United States toward approving or agreeing to any enrichment, reprocessing, or alteration in form or content of material transferred pursuant to the Agreement for Cooperation or material used in or produced through the use of any material or facility transferred pursuant to the Agreement for Cooperation;

(3) the Government of the People's Republic of China has provided a public, written, detailed statement of its nuclear nonproliferation policies, and those policies correspond in all essential elements and details to the description of such policies contained in the Department of State document entitled "United States Summary of Discussions" (relating to China's nuclear nonproliferation policy); and

(4) the Government of the People's Republic of China has communicated its recognition that all proposed exports of nuclear materials, equipment, or technology under the Agreement for Cooperation are subject to such laws and regulations of the United States which are in effect at the time of each such export or the licensing thereof.

(b) For purposes of subsection (a), the continuity of a session of Congress is broken only by adjournment of the Congress sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the period indicated.●

ADDITIONAL COSPONSORS

S. 524

At the request of Mr. ARMSTRONG, the name of the Senator from South Dakota [Mr. ABDNOR] was added as a cosponsor of S. 524, a bill to recognize the organization known as the "Retired Enlisted Association, Inc."

S. 925

At the request of Mr. HUMPHREY, the names of the Senator from Florida [Mrs. HAWKINS] and the Senator from Michigan [Mr. RIEGLE] were added as cosponsors of S. 925, a bill to deny most-favored-nation trading status to Afghanistan.

S. 1233

At the request of Mr. DOLE, the name of the Senator from California [Mr. WILSON] was added as a cosponsor of S. 1233, a bill to amend the Animal Welfare Act to ensure the proper treatment of laboratory animals.

S. 1382

At the request of Mr. CHAFEE, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 1382, a bill to amend the Securities Exchange Act of 1934 with respect to insider trading.

S. 1544

At the request of Mr. MOYNIHAN, the name of the Senator from Massachusetts [Mr. KENNEDY] was added as a cosponsor of S. 1544, a bill to extend the Trade Adjustment Assistance Program to place such program on a sound financial basis and to reform such program to emphasize the retraining of workers.

S. 1570

At the request of Mr. NICKLES, the name of the Senator from Vermont [Mr. STAFFORD] was added as a cosponsor of S. 1570, a bill to amend the Fair Labor Standards Act of 1938 to exclude the employees of States and political subdivisions of States from the provisions of that act relating to maximum hours, to clarify the application of that act to volunteers, and for other purposes.

S. 1629

At the request of Mr. GRASSLEY, the names of the Senator from Arkansas [Mr. PRYOR] and the Senator from Arkansas [Mr. BUMPERS] were added as cosponsors of S. 1629, a bill to amend the Tariff Act of 1930 to treat certain agricultural products as like products for purposes of antidumping and countervailing duty investigations.

S. 1645

At the request of Mr. STEVENS, the name of the Senator from Alabama [Mr. HEFLIN] was added as cosponsor of S. 1645, a bill to delay a postal rate increase for subscription publications.

S. 1680

At the request of Mr. QUAYLE, the names of the Senator from Rhode Island [Mr. PELL] and the Senator from Rhode Island [Mr. CHAFEE] were added as cosponsors of S. 1680, a bill to phase out the Honey Price Support Program.

S. 1722

At the request of Mr. ARMSTRONG, the names of the Senator from Iowa [Mr. GRASSLEY] and the Senator from South Carolina [Mr. HOLLINGS] were added as cosponsors of S. 1722, a bill to amend the Internal Revenue Code of 1954 to eliminate the separate mailing requirement for statements relating to interest, dividends, and patronage dividends, and for other purposes.

SENATE JOINT RESOLUTION 74

At the request of Mr. THURMOND, the name of the Senator from Nevada [Mr. LAXALT] was added as a cosponsor of Senate Joint Resolution 74, a joint resolution to provide for the designation of the month of February 1986 as "National Black (Afro-American) History Month."

SENATE JOINT RESOLUTION 193

At the request of Mr. SYMMS, the name of the Senator from Alabama [Mr. DENTON] was added as a cosponsor of Senate Joint Resolution 193, a joint resolution to authorize the President to issue a proclamation designating the week beginning October 20, 1985, as "The Lessons of Grenada Week."

SENATE JOINT RESOLUTION 199

At the request of Mr. MURKOWSKI, the names of the Senator from South Dakota [Mr. PRESSLER] and the Senator from Georgia [Mr. MATTINGLY] were added as cosponsors of Senate Joint Resolution 199, a joint resolution to designate the month of November 1985 as "National Elks Veterans Remembrance Month."

SENATE JOINT RESOLUTION 213

At the request of Mr. FORD, the names of the Senator from Utah [Mr. HATCH], the Senator from North Dakota [Mr. ANDREWS], the Senator from Hawaii [Mr. MATSUNAGA], the Senator from South Dakota [Mr. ABDNOR], and the Senator from Minnesota [Mr. BOSCHWITZ] were added as cosponsors of Senate Joint Resolution 213, a joint resolution to designate January 19-25, 1986, "National Jaycee Week."

SENATE CONCURRENT RESOLUTION 68

At the request of Mr. DURENBERGER, the names of the Senator from New

Mexico [Mr. DOMENICI], the Senator from Iowa [Mr. HARKIN], the Senator from South Carolina [Mr. HOLLINGS], and the Senator from Missouri [Mr. DANFORTH] were added as cosponsors of Senate Concurrent Resolution 68, a concurrent resolution expressing support for Chile's National Accord for the Transition to Full Democracy.

SENATE CONCURRENT RESOLUTION 77

At the request of Mr. CRANSTON, his name was added as a cosponsor of Senate Concurrent Resolution 77, a concurrent resolution deploring the intention of the United States to withdraw from the compulsory jurisdiction of the International Court of Justice.

AMENDMENTS SUBMITTED

INCREASE IN PUBLIC DEBT LIMIT

LEVIN (AND OTHERS) AMENDMENT NO. 745

Mr LEVIN (for himself, Mr. GRAMM, Mr. RUDMAN, and Mr. DODD) proposed an amendment to amendment No. 730 proposed by Mr. DOLE (for Mr. GRAMM and others) as modified and amended to the joint resolution (H.J. Res. 372) increasing the statutory limit on the public debt; as follows:

On page 25, strike lines 12 through 21, and insert in lieu thereof: "(II) subject to clauses (ii), (iii), and (iv) of this subparagraph, eliminates one-half of such excess by sequestering from each affected program, project, or activity as defined in the most recently enacted relevant appropriations Acts and accompanying committee reports, or from each affected account if not so defined, for funds provided in annual appropriations Acts or, otherwise from each budget account, such amounts of budget authority, obligation limitation, other budgetary resources, and loan limitation, and by adjusting payments provided by the Federal Government not required by existing contractual agreements, to the extent necessary to reduce the outlays for each controlable expenditure by a uniform percentage;"

KERRY (AND LEAHY) AMENDMENT NO. 746

Mr. KERRY (for himself and Mr. LEAHY) proposed an amendment to amendment No. 730 proposed by Mr. DOLE (for Mr. GRAMM and others), as modified and amended, to the joint resolution (H.J. Res. 372), supra; as follows:

At the end of amendment No. 730 (modified and amended), add the following new section:

SEC. . The Directors of the Office of Management and Budget and the Congressional Budget Office and the Secretary of the Treasury shall jointly report to the President and the Committees on Finance and Ways and Means on the projected level of revenues which would be raised by increased and improved tax enforcement and collection through audits, examinations, and other methods designed to eliminate tax cheating and increase revenue collections from individuals and corporations evading Federal taxation. The report shall include an analysis of measures which can be implemented to increase voluntary compliance with tax laws, including increased staff for taxpayer assistance, speedier processing of returns, improved information processing and collection, and public education designed to increase public trust and understanding of the Internal Revenue Service enforcement efforts. The report shall also include an estimate of the level of increased expenditures for Internal Revenue Service enforcement and compliance efforts at which additional expenditures would not yield additional revenues of at least $2 of revenue for every $1 in expenditures. The report shall be issued on an annual basis no later than the date on which the President submits a proposed budget for each fiscal year to the Congress.

EXON (AND KERRY) AMENDMENT NO. 747

Mr. EXON (for himself and Mr. KERRY) submitted an amendment to amendment No. 730 proposed by Mr. DOLE (for Mr. GRAMM and others) as modified and amended, to the joint resolution (H.J. Res. 372), supra; as follows:

At the end of the amendment, add the following:

( ) PERIODIC REPORTING REQUIRED.—Notwithstanding the second sentence of subsection (d)(1) of this section, the Directors shall jointly report to the President and the Congress the matters described in such subsection on October 1, February 15, and May 1 of each fiscal year, except that with respect to fiscal year 1986, the Directors shall jointly report to the President and the Congress the matters described in such subsection on November 1, February 15, and May 1 of such fiscal year.

( ) STATISTICAL SIGNIFICANCE OF DEFICIT.—Notwithstanding the second sentence of subsection (d)(4)(H) of this section, if, in any report submitted with respect to fiscal year 1986 by the Directors under subsection (d)(1) and subsection ( ) after November 1, 1985, the Directors state that the deficit for fiscal year 1986 exceeds the maximum deficit amount for such fiscal year by an amount which is greater than 5 percent of such maximum deficit amount, such excess shall be treated as "statistically significant" for purposes of this section.

MELCHER AMENDMENT NO. 748

Mr. MELCHER proposed an amendment to amendment No. 730 proposed by Mr. DOLE (for Mr. GRAMM and others) as modified and amended, to the joint resolution (H.J. Res. 372), supra; as follows:

At the end of the Resolution add the following new section:

SEC. 1. IMPOSITION OF CORPORATE MINIMUM TAX.

(a) IN GENERAL.—Section 56 of the Internal Revenue Code of 1954 (relating to corporate minimum tax) is amended to read as follows:

"SEC. 56. ALTERNATIVE MINIMUM TAX ON CORPORATIONS.

"(a) TAX IMPOSED—

"(1) IN GENERAL.—A tax is hereby imposed (in addition to any other tax imposed by this subtitle) on each corporation in an amount equal to the excess (if any) of—

"(A) 20 percent of so much of the corporate alternative minimum taxable income of the taxpayer for the taxable year as exceeds $100,000, over

"(B) the regular tax for the taxable year.

"(b) CORPORATE ALTERNATIVE MINIMUM TAXABLE INCOME.—For purposes of this title, the term 'corporate alternative minimum taxable income' means the taxable income (determined without regard to the deduction allowed by section 172) of the taxpayer for the taxable year—

"(1) reduced by the corporate alternative minimum tax net operating loss deduction provided by subsection (d), and

"(2) increased by an amount equal to the corporate alternative minimum tax preference items.

"(c) CORPORATE ALTERNATIVE MINIMUM TAX PREFERENCE ITEMS.—For purposes of this section, the corporate alternative minimum tax preference items are those items applying to corporations under section 57(a).

The flush language at the end of section 57(a), stating what preferences do not apply to corporations, is amended by striking the reference to paragraphs 3, 6, and 12(A); and by adding a reference to paragraph 8.

Further, paragraph (9) of section 57(a) (relating to capital gains as items of tax preference) is amended by adding at the end thereof the following new subparagraph:

"(E) SPECIAL RULE FOR CERTAIN INSOLVENT TAXPAYERS.—

"(i) IN GENERAL.—The amount of the tax preference under subparagraph (A) shall be reduced (but not below zero) by the excess (if any) of—

"(I) the applicable percentage of gain from any insolvency transaction, over

"(II) the applicable percentage of any loss from any insolvency transaction which offsets such gain.

"(ii) REDUCTION LIMITED TO AMOUNT OF INSOLVENCY.—The amount of the reduction determined under clause (i) shall not exceed the amount by which the taxpayer is insolvent immediately before the transaction (reduced by any portion of such amount previously taken into account under this clause).

"(iii) INSOLVENCY TRANSACTION.—For purposes of this subparagraph, the term 'insolvency transaction' means—

"(I) the transfer by a taxpayer of real property used by the taxpayer in the active conduct of a trade or business of the taxpayer to a creditor in cancellation of indebtedness, or

"(II) the sale or exchange by the taxpayer of property described in subclause (I) under the threat of foreclosure,

but only if the taxpayer is insolvent immediately before such transaction.

"(iv) INSOLVENT.—For purposes of this subparagraph, the term 'insolvent' means the excess of liabilities over the fair market value of assets.

"(v) APPLICABLE PERCENTAGE.—For purposes of this subparagraph, the term 'applicable percentage' means that percentage of net capital gain with respect to which a deduction is allowed under section 1202(a).".

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to transfers or sales or exchanges made after December 31, 1981, in taxable years ending after such date.

"(d) CORPORATE ALTERNATIVE MINIMUM TAX NET OPERATING LOSS DEDUCTION.—For purposes of this section—

"(1) IN GENERAL.—The term 'corporate alternative minimum tax net operating loss deduction' means the net operating loss deduction under section 172 for the taxable year for purposes of the regular tax, except that in determining the amount of such deduction—

"(A) in the case of taxable years beginning after December 31, 1985, section 172(b)(2) shall be applied by substituting 'corporate alternative minimum taxable income' for 'taxable income' each place it appears, and

"(B) the net operating loss (within the meaning of section 172(c)) for any loss year shall be adjusted as provided in paragraph (2).

"(2) ADJUSTMENTS TO NET OPERATING LOSS COMPUTATION.—

"(A) POST-1985 LOSS YEARS.—In the case of a loss year beginning after December 31, 1985, the net operating loss for such year under section 172(c) shall be reduced by the amount of corporate alternative minimum tax preference items arising in such year.

"(B) PRE-1986 LOSS YEARS.—In the case of loss years beginning before January 1, 1986, the amount of the net operating loss which may be carried over to taxable years beginning after December 31, 1985, for purposes of paragraph (1) shall be equal to the amount which may be carried from the loss year to the first taxable year of the taxpayer beginning after December 31, 1985.

"(e) SPECIAL RULES RELATING TO CREDITS.—For purposes of this section—

"(1) CREDITS NOT ALLOWABLE.—For purposes of determining any credit allowable under subpart A, B, or D of part IV of this subchapter (other than the foreign tax credit allowed under section 27(a))—

"(A) the tax imposed by this section shall not be treated as a tax imposed by this chapter, and

"(B) the amount of the foreign tax credit allowed under section 27(a) shall be determined without regard to this section.

"(2) FOREIGN TAX CREDIT ALLOWED AGAINST ALTERNATIVE MINIMUM TAX.—

"(A) DETERMINATION OF FOREIGN TAX CREDIT.—The total amount of the foreign tax credit which can be taken against the tax imposed by subsection (a) is the amount determined under subpart A of part III of subchapter N (section 901 and following).

"(B) INCREASE IN AMOUNT OF FOREIGN TAXES TAKEN INTO ACCOUNT.—For purposes of the determination provided by subparagraph (A), the amount of the taxes paid or accrued to foreign countries or possessions of the United States during the taxable year shall be increased by an amount equal to the lesser of—

"(i) the foreign tax credit allowable under section 27(a) in computing the regular tax for the taxable year, or

"(ii) the tax imposed by subsection (a).

"(C) SECTION 904(A) LIMITATION.—For purposes of the determination provided by subparagraph (A), the limitation of section 904(a), shall be an amount equal to the same proportion of the sum of the tax imposed by subsection (a) against which such credit is taken and the regular tax as—

"(i) the taxpayer's corporate alternative minimum taxable income from sources without the United States (but not in excess of the taxpayer's entire corporate alternative minimum taxable income), bears to

"(ii) the taxpayer's entire corporate alternative minimum taxable income.

For such purposes, the amount of the limitation of section 904(a) shall not exceed the tax imposed by subsection (a).

"(D) DEFINITION OF CORPORATE ALTERNATIVE MINIMUM TAXABLE INCOME FROM SOURCES WITHOUT THE UNITED STATES.—For purposes of subparagraph (C), the term 'corporate alternative minimum taxable income from sources without the United States' means taxable income from sources without the United States, adjusted as provided in paragraphs (1) and (2) of subsection (b) (taking into account in such adjustment only items described in such paragraphs which are properly attributable to items of gross income from sources without the United States).

"(E) SPECIAL RULE FOR APPLYING SECTION 904(C).—In determining the amount of foreign taxes paid or accrued during the taxable year which may be deemed to be paid or accrued in a preceding or succeeding taxable year under section 904(c)—

"(i) the limitation of section 904(a) shall be deemed to be the amount of foreign tax credit allowable under section 27(a) in computing the regular tax for the taxable year increased by the amount of the limitation determined under subparagraph (C), and

"(ii) any increase under subparagraph (B) shall be taken into account.

"(3) CARRYOVER AND CARRYBACK OF CERTAIN CREDITS.—In the case of any taxable year for which a tax is imposed by this section, for purposes of determining the amount of any carryover or carryback to any other taxable year of any credit allowable under section 30 or 38, the amount of the limitation under section 30(g) or 38(c) (as the case may be) shall be deemed to be—

"(A) the amount of such credit allowable for such taxable year (determined without regard to this paragraph), reduced (but not below zero) by

"(B) the amount of the tax imposed by this section for the taxable year, reduced by—

"(i) the amount of the credit allowable under section 27(a), and

"(ii) in the case of the limitation under section 38(c), the amount of such tax taken into account under this subparagraph with respect to limitations under section 30(g).

"(f) DEFINITIONS AND SPECIAL RULES.—For purposes of this section—

"(1) REGULAR TAX.—The term 'regular tax' means the taxes imposed by this chapter for the taxable year (computed without regard to this section and without regard to the taxes imposed by sections 47(a), 531, and 541).

"(2) TAXABLE YEAR IN WHICH ITEM ARISES.—In the case of any amount which is taken into account for regular tax purposes in more than 1 taxable year, such amount shall be treated as an item arising in the first such taxable year.".

(b) ESTIMATED TAX.—Sections 6154(c)(1) (defining estimated tax) and 6655(f)(1) (defining tax) are each amended by inserting ", 56," after "section 11".

(c) CONFORMING AMENDMENTS.—

(1) Section 26 (relating to definition of tax liability) is amended—

(A) by striking out subparagraph (A) of subsection (b)(2) and by redesignating subparagraphs (B) through (H) of subsection (b)(2) as subparagraphs (A) through (G), respectively, and

(B) in subsection (c)—

(i) by striking "(1)" before "For" and by adding at the end thereof the following new paragraph:

"(2) For treatment of tax imposed by section 56 as tax not imposed by this chapter, see section 56(e).",

and

(ii) by striking out the heading and inserting in lieu thereof:

"(c) SPECIAL RULES FOR MINIMUM TAXES.—".

(2) Section 57 (relating to items of tax preference) is amended—

(A) by striking out the last sentence of subsection (a),

(B) by striking out subsection (b), and

(C) by striking out subsection (e).

(3) Section 58 (relating to rules for application of past) is amended—

(A) by striking out "$10,000" in subsection (b) and inserting in lieu thereof "$100,000",

(B) by striking out "respective regular tax deductions (within the meaning of section 56(c))" and inserting in lieu thereof "respective corporate alternative minimum taxable incomes (within the meaning of section 56(b))",

(C) by striking out subsection (d),

(1) by striking out paragraph (1) of subsection (f) and

(2) by striking out "the item of tax preference set forth in section 57(a)(9) and" in paragraph (2) of subsection f.

(4) Section 882(a) (relating to tax on foreign corporations connected with United States business) is amended by striking "section 11 or 1201(a)" in paragraph (1) and inserting in lieu thereof "section 11, 56, or 1201(a)".

(5) The table of sections for part VI of subchapter A of chapter 1 is amended by striking out the item relating to section 56 and inserting in lieu thereof the following new item:

"Sec. 56. Additional minimum tax on corporations.".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1985.

BRADLEY AMENDMENTS NOS. 749 THROUGH 753

(Ordered to lie on the table.)

Mr. BRADLEY submitted five amendments intended to be proposed by him to the joint resolution (H.J. Res. 372), supra; as follows:

AMENDMENT No. 749

At the end of the amendment, add the following:

( ) NATIONAL DEFENSE.—Notwithstanding any other provision of this Act or of law or any provision of the Standing Rules of the Senate or the Rules of the House of Representatives, the total amount appropriated for programs, projects, and activities under the functional category National Defense (050) for fiscal year 1987 may not exceed $298.8 billion.

AMENDMENT No. 750

At the end, add the following:

( ) NATIONAL DEFENSE.—Notwithstanding any other provision of this Act or of law or any provision of the Standing Rules of the Senate or the Rules of the House of Representatives, the total amount appropriated for programs, projects, and activities under the functional category National Defense (050) for fiscal year 1987 may not exceed $298.8 billion.

AMENDMENT No. 751

At the end of the joint resolution add the following:

( ) NATIONAL DEFENSE.—Notwithstanding any other provision of this Act or of law or any provision of the Standing Rules of the

Senate or the Rules of the House of Representatives, the total amount appropriated for programs, projects, and activities under the functional category National Defense (050) for fiscal year 1987 may not exceed $298.8 billion.

AMENDMENT No. 752

At the end of the pending question, add the following:

( ) NATIONAL DEFENSE.—Notwithstanding any other provision of this Act or of law or any provision of the Standing Rules of the Senate or the Rules of the House of Representatives, the total amount appropriated for programs, projects, and activities under the functional category National Defense (050) for fiscal year 1987 may not exceed $298.8 billion

---

AMENDMENT No. 753

At the end of the resolution add the following new section:

SEC. —. TAX ON MOTOR FUELS INCREASED 18 CENTS A GALLON.

(a) TAXES ON GASOLINE, DIESEL FUEL, AND SPECIAL MOTOR FUELS INCREASED 18 CENTS A GALLON.—

(1) GASOLINE.—Subsection (a) of section 4081 of the Internal Revenue Code of 1954 (relating to tax on gasoline) is amended by striking out "9 cents a gallon" and inserting in lieu thereof "27 cents a gallon".

(2) DIESEL FUEL AND SPECIAL MOTOR FUELS.—Section 4041(a) of such Code (relating to tax on diesel fuel and special motor fuels) is amended—

(A) by striking out "15 cents" in paragraph (1) and inserting in lieu thereof "33 cents", and

(B) by striking out "9 cents" in paragraph (2) and inserting in lieu thereof "27 cents".

(3) NONCOMMERCIAL AVIATION.—Paragraph (1) of section 4041(c) of such Code (relating to noncommercial aviation) is amended by striking out "14 cents" and inserting in lieu thereof "32 cents".

(b) RATES OF TAX FOR GASOHOL.—

(1) AMENDMENTS OF SECTION 4081.—Section 4081(c) of such Code is amended—

(A) by striking out "9 cents" each place it appears and inserting in lieu thereof "27 cents",

(b) by striking out "3 cents" each place it appears and inserting in lieu thereof "21 cents",

(C) by striking out "3⅓ cents" and inserting in lieu thereof "10 cents", and

(D) by striking out "5⅔ cents" and inserting in lieu thereof "17 cents".

(2) AMENDMENTS OF SECTION 4041.—Paragraph (1) of section 4041(k) of such Code (relating to fuels containing alcohol) is amended—

(A) by striking out "9 cents" and "15 cents" in subparagraph (A) and inserting in lieu thereof "27 cents" and "33 cents", respectively, and

(B) by striking out "3 cents" and "9 cents" in subparagraph (B) and inserting in lieu thereof "21 cents" and "27 cents", respectively.

(3) GASOLINE USED TO PRODUCE CERTAIN ALCOHOL FUELS.—Paragraph (1) of section 6427(f) of such Code (relating to gasoline used to produce certain gasoline fuels) is amended

(A) by striking out "9 cents" and inserting in lieu thereof "27 cents", and

(B) by striking out "5⅔ cents" and inserting in lieu thereof "17 cents".

(c) PARTIALLY EXEMPT METHANOL OR ETHANOL FUEL.—Paragraph (1)(A) of section 4041(m) of such Code (relating to certain alcohol fuels) is amended by striking out "4½ cents" and "9 cents" and inserting in lieu thereof "22½ cents" and "27 cents", respectively.

(d) USE IN CERTAIN TAXICABS.—Paragraph (1) of section 6427(e) of such Code is amended by striking out "4 cents" and inserting in lieu thereof "22 cents".

(e) FLOOR STOCK TAX ON GASOLINE.—

(1) IN GENERAL.—On gasoline subject to tax under section 4081 of such Code which, on January 1, 1986, is held by a dealer for sale there is hereby imposed a floor stocks tax at the rate of 18 cents a gallon.

(2) OVERPAYMENTS OF FLOOR STOCKS TAX.—Section 6416 of such Code shall apply in respect to the floor stock tax imposed by this subsection, so as to entitle, subject to all provisions of section 6416 of such Code, any person paying such floor stocks tax to a credit or refund thereof for any of the reasons specified in section 6416 of such Code.

(3) DUE DATE ON TAX.—The tax imposed by this subsection shall be paid at such time after February 15, 1986, as may be prescribed by the Secretary of the Treasury or the delegate of the Secretary.

(4) TRANSFER OF FLOOR STOCKS TAX TO HIGHWAY TRUST FUND.—For purposes of determining the amount transferred to the Highway Trust Fund for any period, the tax imposed by this section shall be treated as if such tax was imposed by section 4081 of such Code.

(5) DEFINITIONS.—For purposes of this subsection.—

(A) The term "dealer" includes a wholesaler, jobber, distributor, or retailer.

(B) An article shall be considered as "held by a dealer" if title thereto has passed to such dealer (whether or not delivery to such dealer has been made) and if for purposes of consumption title to such article or possession thereof has not at any time been transferred to any person other than a dealer.

(f) EFFECTIVE DATE.—The amendments made by this section shall take effect on January 1, 1986.

DODD (AND OTHERS) AMENDMENT NO. 754

Mr. DODD (for himself, Mr. KERRY, Mr. GRAMM, Mr. LEVIN, Mr. HOLLINGS, Mr. RUDMAN, and Mr. LEAHY) proposed an amendment to amendment No. 730 proposed by Mr. DOLE (for Mr. GRAMM and others) as modified and amended; as follows:

At the end of the pending amendment, add the following new section: "During the time in which a sequester order is in effect, any cost of living adjustment for Social Security shall not count as income for purposes of determining Supplemental Security Income payments or payments from any other program, which are offset as a consequence of cost of living adjustments for Social Security."

ZORINSKY-MATTINGLY AMENDMENT NO. 755

(Ordered to lie on the table.)

Mr. ZORINSKY (for himself and Mr. MATTINGLY) submitted an amendment intended to be proposed by him to the joint resolution House Joint Resolution 372, supra; as follows:

At the appropriate place in the joint resolution, insert the following new section:

SEC. . (a)(1) Notwithstanding any other provision of law, it shall not be in order in the Senate or the House of Representatives to consider any concurrent resolution on the budget for any fiscal year beginning after September 30, 1986, or any amendment thereto or any conference report thereon if—

(A) the adoption of such concurrent resolution as reported;

(B) the adoption of such amendment; or

(C) the adoption of the concurrent resolution in the form recommended in such conference report, would cause—

(i) the appropriate level of total budget outlays set forth in such concurrent resolution for such fiscal year to exceed the appropriate level of total budget outlays set forth for the preceding fiscal year in the most recently agreed to concurrent resolution on the budget for that preceding fiscal year;

(ii) the appropriate amount of the deficit set forth in such concurrent resolution for such fiscal year to exceed the appropriate amount of the deficit set forth for the preceding fiscal year in the most recently agreed to concurrent resolution on the budget for that preceding fiscal year.

(2) Notwithstanding section 904(b) of the Congressional Budget Act of 1974, or any other provision of law, paragraph (1) of this subsection may be waived only by a two-thirds vote of the Members of each House of Congress, duly chosen and sworn.

(b) Notwithstanding any other provision of law, the budget transmitted pursuant to section 1105 of title 31, United States Code, for the following fiscal year shall not contain—

(1) an estimate of total budget outlays for such following fiscal year that exceeds the appropriate level of total budget outlays for the current fiscal year set forth in the most recently agreed to concurrent resolution on the budget for the current fiscal year;

(2) an estimate of total revenues for such following fiscal year that exceeds the recommended level of revenues for the current fiscal year set forth in the most recently agreed to concurrent resolution on the budget for the current fiscal year; or

(3) an estimate of the deficit for such following fiscal year that exceeds the appropriate amount of the deficit set forth for the current fiscal year in the most recently agreed to concurrent resolution on the budget for the current fiscal year.

(c) For purposes of this section, no cost-of-living adjustment under any provision of Federal law shall be taken into account.

(d) For purposes of this section—

(1) the term "budget outlays" has the same meaning as in section 3(1) of the Congressional Budget and Impoundment Control Act of 1974;

(2) the term "concurrent resolution on the budget" has the same meaning as in section 3(4) of such Act; and

(3) the term "deficit" means, with respect to any concurrent resolution on the budget for a fiscal year, the amount by which the appropriate level of total budget outlays set forth for such fiscal year in such concurrent resolution exceeds the recommended level of Federal revenues set forth for such fiscal year in such concurrent resolution.

SUPERFUND TAX EXTENSION

PACKWOOD AMENDMENT NO. 756

Mr. PACKWOOD proposed an amendment to the bill (H.R. 3453) to amend the Internal Revenue Code of 1954 to extend the Superfund taxes for 45 days; as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. Section 9(a) of the Federal Financing Bank Act of 1973 is amended by substituting "$5,000,010,000" for "$15,000,000,000."

SEC. 2. (a) Section 3101 of title 31, United States Code, is amended by adding at the end thereof the following:

"(d) The face amount of obligations issued by the Federal Financing Bank under Section 9(a) of the Federal Financing Bank Act of 1973 that are outstanding shall be included in the amount taken into account in determining whether the limitation imposed by subsection (b) has been exceeded."

(b) The amendment made by subsection (a) shall take effect on October 18, 1985.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, October 9, 1985, in order to conduct a hearing on United States/China Nuclear Agreement.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Wednesday, October 9, in closed executive session in order to conduct a hearing on phase II of the development of National Intelligence Strategy.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, October 9, in order to receive testimony concerning S. 1140, Motor Fuel Sales Competition.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Wednesday, October 9, to conduct a meeting on the nominations of Karen Pryor and Robert Elsner to members of the Marine Mammal Commission, to be followed by a meeting on Oversight of the Pelagic Driftnets.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FINANCE

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on Wednesday, October 9, to hold a hearing to consider the nomination of Ronald Robertson to be general counsel at the Department of Health and Human Services.

The PRESIDING OFFICER. without objection, it is so ordered.

ADDITIONAL STATEMENTS

TIME FOR NEW STEEL LEGISLATION?

● Mr. HEINZ. Mr. President, W.R. Wilson, president and chief executive officer of Lukens Steel, in a recent article in the New York Times laid out in some detail the impact of the President's program on the domestic steel industry. In a word, that impact has been inadequate. While imports have declined, they have not gone down far enough fast enough to have the intended impact. With current import penetration over 25 percent, the President's target of 18.5 percent remains a remote possibility. Mr. Wilson's article explains why the President's program is not working and what the likely consequences for the industry will be.

The question the article arouses in my mind, Mr. President, is whether it might be time for legislation to ensure the President's objectives are met. Clearly they are not being met as the program is currently being administered, and the likely intransigence of the European Community in reaching agreement on an extension of its restraint program makes the case for legislation even stronger.

Mr. President, I ask that Mr. Wilson's article be printed in the RECORD, and I urge all Senators to begin to consider the likelihood that additional legislation will be needed soon.

The article follows:

[From the New York Times, Oct. 1, 1985]

IMPORT RESTRAINTS DON'T HELP INDUSTRY

(By W.R. Wilson)

COATESVILLE, PA.—To understand the frustration that fuels the protectionist fervor in Congress, it is instructive to examine why voluntary restraints on imports favored by President Reagan do not help American industry. The case of steel producers is a good lesson.

Charles Blum, a United States trade negotiator, said this month that the 14 voluntary restraint agreements negotiated this year with foreign steel makers gave "the American steel industry a chance—probably its last chance—to put its house in order." He said: "The monkey is now on the back of the domestic industry."

The truth, however, is that the ballyhooed voluntary restraints have offered more monkey business than real relief, even where modernized and restructured steel companies—those that have already put their houses in order—are concerned.

One year ago, the President derailed an attempt by Congress to impose quotas on steel imports. Mr. Reagan pressed for voluntary restraints on imports that would reduce imports to 18.5 percent of the domestic market. In response, the steel industry agreed to drop its legal efforts to end unfair trade despite a finding by International Trade Commission that domestic steel makers had, in fact, been injured by imports.

Nevertheless, the President's trade enforcers, through a complex array of exceptions, delays and compromises, have managed to snatch failure from the jaws of success. The Administration's program is not working, for the following reasons:

First, overall import levels have not declined in the way the Administration promised. Through the middle of 1985, steel imports were still skimming 26 percent of our domestic market, some 7.5 percentage points above the level the President targeted last year. Each percentage point represents roughly a million tons of steel, and, according to the Congressional Research Service, for every million tons that are imported, 9,400 American jobs in steel and related industries are lost.

The chief culprit is the so-called front-end loading process. In anticipation of the import restrictions, foreign producers saturated their order books. United States negotiators let them fill these last-minute orders by loading exports in the first years of the five-year arrangements.

A second reason the program has not worked is that every time an unfair exporter is brought under control, another abuser takes its place. The Administration has negotiated arrangements with 14 steel-producing countries, but imports in the first half of this year came from 76 countries, including 18 without steel mills.

By far the largest increase has come from Eastern bloc countries. With respect to steel plate, for example, Rumania, East Germany, Poland, Hungary, Czechoslovakia and Yugoslavia accounted for 35.6 percent of total imports through June 1985, up from 2.6 percent in the same period in 1984.

Even people who argue that trade relationships with our European and Japanese allies justify some sacrifice of American jobs find it difficult to explain why Eastern bloc nations should be allowed to profit so handsomely at our expense.

Perhaps the program's greatest deficiency is that it undermines a guding principle of steel stabilization—that import relief would enable American industry to modernize in order to compete more effectively with foreign steel makers. The President's program has the opposite effect: Companies that have already paid the price of modernization are being hurt the most.

Consider the Lukens Steel Company, a Pennsylvania corporation with annual sales of $300 million. Since 1979, Lukens has streamlined its operations by cutting the salaried workforce in half, increasing furnace productivity by 150 percent, reducing energy use by 24 percent and improving worker productivity by more than 23 percent. It uses the most modern electric furnaces.

Luken's chief products are carbon-plate steel and a higher valued alloy-plate steel. When President Reagan restricted exports, his trade negotiators did not differentiate

between carbon and alloy plates, thus allowing foreign mills to fill their import allotments with a greater percentage of high-value, alloy-plate products. The effect on the domestic alloy-plate market has been dramatic: Import penetration of alloy-plate steel has risen from 7.9 percent in 1983 to the current annualized level of 32 percent, thereby completely undermining the intent of the negotiated steel arrangements.

These imports threaten to knock the legs from under even modernized American companies just as they begin to recover from the recession. Demand for steel, which perked up in the recent recovery, is beginning to fade. By permitting foreign competitors to import these high-value steel products, all in the early years of the five-year contracts, the Administration has allowed foreign mills to skim the cream off the recovery.

Modernized American steel companies such as Lukens can compete on equal terms with foreign mills that sell their products at prices that cover production and marketing costs. Domestic companies cannot hope to compete with subsidized and government-controlled steel industries. And they certainly cannot justify additional capital expenditures if subsidized imports depress prices below costs for even the most efficient American manufacturers.

Unless voluntary restraints can truly reduce imports and in a way that is fair to producers in the United States, it is likely that the clamor for protectionism will grow even louder.●

LESTER THUROW AND THE U.S. DEBT

● Mr. SIMON. Mr. President, one of the most thoughtful writers on the American economic scene is Lester Thurow, a professor of economics at Massachusetts Institute of Technology.

Recently in the New York Times he had an article in which he talks about our plunge into indebtedness. Among other things he tells us that:

America is plunging into debt at a rate that makes the Brazils of the world seem positively prudent by comparison.

At another point he says this:

American industry is being crushed by the high-valued dollar. The companies being driven out of business are not the dregs of American industry but some of its finest specimens, such as the Caterpillar Corporation and those in the semiconductor industry.

What is America doing about this twin disaster? Nothing. What will Monday morning economic quarterbacks say about America? Exactly what they said about Third World indebtedness and Britain's industrial demise.

And then later in the article he says:

Unless one believes that a country can go on forever running up a debt, the overvalued dollar problem will eventually cure itself. But there are substantial costs to simply letting the process run its normal course.

Clearly we have to get hold of our situation.

I am putting into the RECORD his complete article.

I hope we have the courage to act during this congressional session.

The article follows:

[From the New York Times, Sept. 3, 1985]

AMERICA'S PLUNGE INTO THE DEBT ABYSS

(By Lester Thurow)

CAMBRIDGE, MASS.—What does a Monday morning economic quarterback say about the indebtedness of third world countries? They should have seen that they were borrowing more than they could repay and should have taken actions to prevent themselves from sinking ever deeper into debt.

What does a Monday morning economic quarterback say about Britain's 75-year slippage from one of the richest to one of the poorest of industrial countries? It should have taken actions to prevent the high-valued pound from crushing British industry.

America is plunging into debt at a rate that makes the Brazils of the world seem positively prudent by comparison. At the end of 1982, the United States had net foreign assets of $147 billion. Sometime in April 1985, it became a net debtor nation for the first time since World War I. Early in 1986, it will pass Brazil to become the world's largest net debtor.

American industry is being crushed by the high-valued dollar. The companies being driven out of business are not the dregs of American industry but some of its finest specimens, such as the Caterpillar Corporation and those in the semiconductor industry.

What is America doing about this twin disaster? Nothing. What will Monday morning economic quarterbacks say about America? Exactly what they said about third world indebtedness and Britain's industrial demise.

Why isn't America following the advice that it so easily gives to others? The answer is to be found in a conflict between what theoretically should be happening and what empirically is happening.

Theoretically, the value of the dollar, or any other currency, is supposed to adjust to maintain an approximate balance between exports and imports. As a result, governments do not need to have explicit adjustment policies. But empirically this hasn't happened. The value of the dollar rose consistently from 1980 until early 1985 despite the fact that the United States was generating ever larger trade deficits.

To explain this conflict between theory and reality, economists point to the development of world capital markets. In today's integrated capital markets, the value of the dollar is determined by capital flows, not trade flows. If people want to move their money into the United States because of high interest rates, the value of the dollar will rise no matter how large the trade deficits.

If one believes the proposition that currencies no longer adjust to trade imbalances, then some other mechanism must be used to adjust trade flows. If a country does not want to fall even deeper into debt, it must develop alternative public policies for maintaining a balance between exports and imports.

Theoretically, one should not worry about the demise of American companies and industries caused by the high-valued dollar. In the standard economic models used to analyze world trade, there are no "transition costs" (it costs nothing to go in or out of business) and everything is "reversible" (if a company goes out of business because the value of the dollar is too high, it will come back into business when the value of the dollar falls).

But reality is marked by very large transition costs and lots of irreversibilities. Given severance pay, early retirements and low prices for used machinery, the costs of going out of business can be enormous. Given the need to acquire and train a labor force and to develop distribution and marketing networks, the costs of getting back into business are even larger. Once a market position is lost and customers have developed relationships with foreign suppliers, it can be virtually impossible to get back into business.

As a result, countries have to worry about the long-run industrial costs of intermediate-run overvaluations of their currency. Unless one believes that a country can go on forever running up a debt, the overvalued dollar problem will eventually cure itself. But there are sustantial costs to simply letting the process run its normal course.

What does a Monday morning economic quarterback say about the process of bringing imports and exports into balance? Most of the pressure for adjustment should fall on countries with surpluses in their balances of payments. If surplus countries adjust by raising their imports, the volume of world trade expands and the world economy grows. If deficit countries must adjust, they can do so only by reducing their imports, and this leads to a contraction in world trade and a stagnant world economy.

Put all of these considerations together, and America needs something like the recent propoal, by Senator Lloyd Bentsen of Texas, Representative Dan Rostenkowski of Illinois and Representative Richard A. Gephardt of Missouri, for a 25 percent import surcharge on the exports of those countries where exports exceed imports by 55 percent. This proposal has been widely condemned as simple protection, but it is in fact a trade expansion act.

Surplus countries are to be forced to expand their imports to avoid having to pay a 25 percent surtax in the American market. The purpose of the bill is not to impose a 25 percent surtax but to force countries to reduce their surpluses. If the act worked perfectly, the tax would not be levied on anyone, since each surplus country would take effective measures to eliminate its surplus by expanding its imports.

To describe this proposal as simple protectionism would be to describe drunken driving laws as bills for simply putting people in jail. The purpose is not to put people in jail but to encourage—or force—good behavior. Those who do not drink and do not run large truck surpluses are not put in jail and do not have to pay 25 percent import surcharges.

One can argue about the details of the Bentsen-Rostenkowski-Gephardt proposal, but something like it is needed if the United States is not to sink ever deeper into debt, if it is to preserve its industrial base and if the world economy is to expand rather than contract.●

A TRIBUTE TO JACK BUELL

● Mr. SYMMS. Mr. President, today I should like to call attention to problems facing my State's No. 2 industry, some of the reasons for those problems, and recognize one of the special people that gives us reason to hope that the problems will be overcome.

51-059 O-86-44 (Pt. 19)

On July 27, one of Idaho's major firms, Potlatch Corp., announced the indefinite closing of a sawmill, a plywood plant, and an end to the supporting logging operations. It means, in the aggregate, the loss of about 1,250 jobs. This is only the latest manifestation of erosion of one of our basic industries.

Basically, it seems that the timber industry faces both a short-term and a long-term threat of major proportions. The short-term threat is a flood of imported lumber coming in from Canada aided by supportive Canadian policies, the long-term threat—which makes the short-term threat a reality—continues as a result of American economic and environmental policies that unreasonably increase the cost of public timber in this country. With all the handicaps besetting them, our industry simply can't compete.

Our best hope for a short-term solution is either a highly unlikely voluntary restraint by our northern neighbors, or U.S. legislation forcing that restraint. Along with this we must, of course, pressure the forest service to adopt more realistic policies and programs for marketing forest service timber.

That's only the temporary band aid. For the long term, the solution is to lower the deficit and ever-increasing government spending which will lower interest rates and in turn aid in revitalizing our economy.

This is a tall order and it won't be accomplished overnight. Challenging days are ahead for the lumber industry. fortunately, Idaho and the industry have people equal to the challenge.

One of the best examples is Jack Buell, the proverbial self-made man. Some 31 years ago Jack graduated from St. Marie's High School in a small northern Idaho lumber town and saved enough money to buy a used logging truck. It is easy to make money on paper with a logging truck. Real life is something else. Keeping the truck running, making the payments, and having enough left over to live on is a big order. It involves continual long hours, driving skill, the creative genius to make major repairs out of baling wire, and the financial touch of a Rothschild. It also requires unbounded optimism and unlimited faith in the future.

Jack Buell must have these qualifications. Today, some 30 years after a shaky start with a used truck, Jack operates 85 trucks, employs 100 people, and is, by all odds, the biggest log hauler in Idaho. His life is a replay of the American success story. He must be a happy man. Recently he told a newspaper interviewer "I've always wanted to drive a truck—that's all I ever wanted to do."

With his energy and ability Jack hasn't, of course, limited himself to his own business. He has served as Benewah County commissioner for 11 years and is currently chairman of the board. In 1977 Jack took on another challenge, accepting a position on the State scaling board. He was selected by his peers to be one of two representatives of the logging industry. It's not a simple task. It is the board's responsibility to determine acceptable methods of measuring forest products. Since logs come in all shapes, kinds, and sizes, and the measurement methods affect every operator's bottom line, the pressures on the board are tremendous.

Jack tends to spot problems early and take quick action to correct them. As an example, he recognized the importance of the Forest Service planning process to the economy of the area and the average logger's disinterest in letter writing, public input is a vital ingredient of the Forest Service planning process. The simple solution—Jack hired three secretaries and persuaded his crew members, plus a few extra people, to get their views on paper. As a result the public input process was strengthened significantly.

The Buell philosophy for business success is simple: "Its all just a day's work for a day's pay; we all try to do the best job possible." Jack will continue to follow that philosophy and the trucks—every one the distinctive yellow-green color and looking for a showroom model—will keep going up and down the road until his three sons eventually grow into taking over the business.

In the meantime it is a little easier to remain optimistic about a sorely troubled business—one of my State's economic mainstays—with people like Jack Buell involved.●

THE DEFICIT

● Mr. SIMON. Mr. President, debate over the Federal deficit has taken center stage in Congress. Industry, agriculture, and other sectors of the economy have much to gain if Congress shows discipline and makes significant cuts in the deficit. While distortion of the dollar's value is one obvious impact of our failure to balance revenue with spending, other effects are more elusive and not as easily understood. In a weekly column I write for newspapers in my State, I have examined two adverse results of our huge Federal budget imbalance—a massive redistribution of wealth and high real interest rates. I ask consent to have it printed in the RECORD.

The column follows:

DIGGING FOR OIL AT THE STOCK EXCHANGE

(By Senator Paul Simon of Illinois)

The dangerous tentacles of the huge federal budget imbalance reach into our lives in a host of ways not immediately obvious.

I will discuss these dangers from time to time in this column. Two I will mention today.

First, there is a massive redistribution of wealth that is taking place, almost unnoticed by the media. It is the largest redistribution of wealth in modern history, taking from middle- and low-income Americans and giving to those who can afford Treasury bills.

In the days of feudal lords the reverse Robin Hood characteristics were more blatant, but the results were similar. The serfs in those days did not choose their government; we do.

But to pay $181 billion for interest this next fiscal year, we will take primarily from people of limited income and give to those with substantial income, a government-sanctioned redistribution of such immensity that no feudal lord of the Middle Ages could have dreaded anything like it.

Until we stop the deficit-hemorrhaging, there is no way to halt this inequity.

The second adverse result I mention today is that the high real interest rates are causing a depressed stock market, and that encourages corporate mergers that are taking jobs away from American citizens and harming this nation's ability to compete in international markets.

Real interest rates are what economists call the difference between inflation and interest rates. Historically that difference is between 2 and 3 percent. So if we have about 3 percent inflation, interest rates should be around 5 or 6 percent. I don't need to tell you how far we are from that.

The major reason for these historically high real interest rates is the government deficit. The government is creating too much demand for money.

Those high interest rates cause investment in government bonds rather than common stocks.

The result is a depressed stock market. If the Dow Jones Industrial Average were at its 1966 level today, allowing for inflation it would be over 3,000 points, rather than around 1,300.

And when stocks are too low they are attractive to the merger kings. Stocks as a whole now sell for about 80 percent of the breakup value of their corporations, some for considerably less.

Since 1981 there have been more than 40 takeovers of huge businesses with market values of over $1 billion each and thousands of smaller takeovers.

Instead of investing in research and development and expansion, too many businesses find it more profitable to gobble up other businesses.

It pays more to explore for oil on the floor of the New York Stock Exchange than in the fields of Illinois or Indiana.

When U.S. Steel spent $6.5 billion to buy Marathon Oil, that did not help the much-too-archaic steel industry; it did not create one new job; it did not dig one new oil well. It created tax write-offs that all of us pay for and it concentrated economic power unnecessarily.

I am willing to give tax breaks to companies that invent, that improve their productivity, that explore new ways to build and trade and improve our standard of living.

But the present path of huge investments in mergers is bad for the country.

Part of the cause for our merger mania is lack of strong enforcement of anti-trust laws.

But the biggest culprit is the $200 billion government deficit that has depressed stock prices and made huge profits on takeovers uncomfortably simple.

These are only two of many reasons for curbing the deficit. I'll examine other reasons on another occasion.●

PHILEMON TUTIAKOFF

● Mr. MURKOWSKI. Mr. President, I would like to take a few minutes to honor the memory of a distinguished Alaskan who recently passed away. Mr. Philemon Tutiakoff of Unalaska, AK, contributed many years of untiring effort and dedicated service to the community of Unalaska.

His service exemplifies the values which we all admire and strive to attain. His concern and care for others will be well remembered by all who knew him.

I ask that the resolution from the city of Unalaska honoring Phil be printed in the RECORD.

The resolution follows:

RESOLUTION 85-30: A RESOLUTION HONORING PHILEMON TUTIAKOFF

Whereas: Philemon Tutiakoff has, through his foresight, zeal, hard work, dedication and caring for this community, earned the affection and respect of the people in the City of Unalaska, and

Whereas: The stature he attained in this community by his contributions and achievements was recognized during his lifetime;

Now therefore be it resolved, That the Mayor and City Council of the City of Unalaska, Alaska, does by this resolution and public record, recognize the many important contributions that Philemon Tutiakoff contributed to our community, recognizing further that his death is a distinct loss to the community in which he lived.

Be it further resolved, That this resolution be spread upon the minutes of the Council and a copy thereof be presented to his wife, Flora Tutiakoff, in recognition of Philemon's respected place in this community.●

TOM PUGH AND THE COMMISSION ON CIVIL RIGHTS

● Mr. SIMON. Mr. President, Tom Pugh, a long-time editorial writer for the Peoria Journal Star and more recently a lecturer and journalist at the University of Illinois, has written an article for the National Catholic Reporter suggesting that we do away with the Commission on Civil Rights.

While I do not agree with that conclusion, there is a great deal in the article by Tom Pugh that we ought to be paying attention to.

It is clear that in the area of civil rights, whether it is the Civil Rights Commission or the Department of Justice or whichever agency of the Federal Government, there has been a decided step backward.

That is not good for the Nation.

I believe my colleagues will find the Tom Pugh article of interest.

The article follows:

[From the National Catholic Reporter, Sept. 6, 1985]

CIVIL RIGHTS AS PR RITES FOR THE RIGHT

(By Tom Pugh)

The politicization of the United States Commission on Civil Rights is now so complete there is no point in trying to salvage the agency.

President Reagan has taken a useful force for equal rights and turned it into a public relations operation to defend his administration against the chorus of complaints that it is anti-black, anti-Hispanic and anti-woman. It took Reagan four years, but he now has a commission that says what he and other conservation want to hear. It has become silent on school desegregation and has concentrated its publications on the theme that no special employment breaks should be given to minorities or women.

Three summers ago, when Reagan's actions were exasperating civil rights leaders across the nation, the chairpersons of 33 of the commission's 50 state advisory committees sent a letter to the president, asking him to meet with us and discuss "our conclusion that the integrity, indeed the future, of the basic civil agencies of the federal government (were) in grave doubt." When we disclosed that the president had refused to meet with us the *New York Times* made it front-page news. Reagan's commission chairman, Clarence Pendleton, perhaps stung by the letter's implication that his appointment was "distressing," stormed that the critics ought to quit if they didn't like the new direction in which the commission was going. Some did, but most stayed for a fight that has lasted three years.

By the summer of 1984, the Reagan commission found itself facing not 33, but 49 unhappy state chairpersons at a conference in Nashville, Tenn. Original complaints had dealt with the mediocrity and incompetence of some Reagan appointees to the Civil Rights Commission, the Equal Rights Opportunity Commission and the Civil Rights Division of the Department of Justice. But the Nashville meeting turned into an argument about the Civil Rights Commission staff's suppression of state reports and the commission's redefinition of "civil rights" so that no studies of "social problems" would be carried on.

The "reconstituted commission"—that's what it has called itself since Reagan destroyed the independence of the commission by stacking it with conservative—waited until after Reagan's reelection to sack its disagreeable state committee leaders. The May 26 *New York Times* added up the carnage. An astounding 46 of the new leaders were men and 36 were white, compared to the 31 men and 15 whites who headed the deposed panels. The numbers of women, black and Hispanic leaders had been slashed in half. In Illinois, where the problems of Hispanics had been a priority, all Hispanics were eliminated from the committee.

Linda Chavez, the staff director of the "reconstituted commission," who has just gone to the White House as Reagan's deputy assistant for public liaison, defended the changes with the observation that "many of those white males were Jews who have been active in the civil rights movement." In Michigan, five of that state's 11-member committee are Jews. Some of them, like U.S. commission Vice Chairman Morris Abrams, may pass the litmus test of Reagan conservatism because they oppose the use of "goals, quotas and timetables" as tools to achieve results in efforts to increase fair employment opportunity. They remember when reverse "quotas" were used to exclude Jews from schools and jobs.

Abrams, who had little success convincing the state leaders at Nashville they should give Reagan's new policies a chance, had 50 new chairpersons, many perhaps of his own choosing, to set on course for Reagan when they met June 26 and 27. Abrams, who is said to want a Supreme Court seat, may have acquired enough power with Reagan to displace Pendleton as commission chairman, a job that would look good on Abrams' vita. Pendleton has been an embarrassment to Reagan as well as black leaders. Pendleton has made more headlines insulting other blacks than he has made urging black advancement. Columnist Carl T. Rown recently urged Congress to abolish the commission, which, he said, under Pendleton's leadership has "become an arrogant enemy of the most abused, most miserable, most hopeless people in the land."

Now, it seems that Reagan has a choice. He can stay with his "game plan" and use the substitute team he has put on the floor to produce propaganda for his new perspectives on civil rights in America—*New Perspectives* is the title of the "reconstituted" commission's right-leaning magazine. On the other hand, he might decide that he has already won the game and realize that most Americans don't know or care whether he changed the rules and cheated in the process. He could move to abolish the commission itself and use its paltry $12.1 million budget to cut future federal deficits. Few civil rights leaders would object.

It is possible that the liberal leadership in Congress will make another attempt during Reagan's declining days to restore the commission to the nonpolitical status it had before Reagan decided that a "photo opportunity" in a ghetto school was more important than listening to the leaders of America's minority people. But Congress committed such a botch of the effort last year to limit Reagan's power over the commission—Reagan tricked Congress by appointing conservative Democrats such as Abrams to do his demolition work—that it will proabably wait until after the 1986 election to try again. But that time, however, Reagan may have found other jobs for Pendleton and Abrams and put the commission to sleep.●

COACH EDDIE ROBINSON THE WINNINGEST COACH

● Mr. JOHNSTON. Mr. President, with the victory of the Grambling State University Tigers over the weekend, my dear friend and constitutent, Coach Eddie Robinson, became the winningest coach in the history of college football.

This milestone documents, for the record books, what Coach Robinson's many friends and admirers have known all along. He is a winner, on the playing field and off.

Not content to merely teach the skills of the sport and lead his team to victory after victory, year after year, he has pursued an even higher goal. He has instilled in those around him an ambition to excel in all aspects of life, to strive for personal best, to acknowledge that potential for greatness that lies within each of us and to reach for it.

Now, with 324 career victories, his talents as a football coach have earned Coach Eddie Robinson a place in the record books.

Along the way, his qualities as a teacher, a leader, and a friend of young people, have earned an even more special place in the hearts of all who know him.

Mr. President, for the information of my colleagues I ask that a profile of Coach Robinson, written by O.K. "Buddy" Davis, sports editor for the Ruston Daily Leader, be printed in the RECORD.

The profile follows:

ABOUT COACH EDDIE ROBINSON

(By O.K. "Buddy" Davis)

During the summer of 1941, then-known Louisiana Negro Normal College hired itself a football coach for the grand sum of $63.75 per month.

The coach was a young man by the name of Edward Gay Robinson.

There were no assistants, a non-existent budget to acquire equipment and not much to look back on. And, apparently, very little to look ahead to. The best high school players in the state and south weren't exactly rushing to this little-known North Louisiana institution to suit up.

But today, 45 years after the one-time quarterback at now defunct Leland College arrived on the Lincoln Parish campus, both Robinson and the school are synonymous with success. More appropriately, they are legends in their own right.

The ever-youthful Robinson, among those inducted into the Louisiana Sports Hall of Fame in June, is on the brink of becoming college football's all-time winningest coach. With 320 victories, he lacks only three to equal and four to break the long standing mark set by the late "Bear" Bryant.

By the time the 1985 campaign is half over, Robinson should own that distinction. He is 320-106-15 in 44 years, all at Grambling, where he has produced one of the most successful collegiate football programs in history.

More than 200 ex-Tigers have gone on to the professional ranks. Two have wound up in the Pro Football Hall of Fame and more than 60 different players have received all-Southwestern Athletic Conference or all-America honors.

The first player from a predominantly black school to sign a standard National Football League contract played at Grambling—bruising fullback Paul "Tank" Younger, who went on to stardom with the Los Angeles Rams.

Grambling has had 25 consecutive winning seasons, most among the NCAA's Division 1-AA members.

And the man behind the incredible success—this small school is located five miles west of Ruston and 60 miles east of Shreveport and has an enrollment of just over 4,000—is Eddie Gay Robinson.

He has been honored, re-honored and praised by an unending list of dignitaries, from President Reagan to Jake Gaither, the former coaching wizard from Florida A&M, and opposing SWAC coach Marino Casem and from ex-Grambling players such as Willie Davis and Willie Brown, who went on to their own heroics in the pro ranks.

"Any success that Eddie Robinson has enjoyed has been only because of the support I have received from Grambling fans, administrators, friends, players, assistant coaches and others," he said. "Eddie Robinson sure hasn't done it alone. If there's been anything I've regretted through my long association in this great sport is that there isn't enough plaques and awards and other ways of recognition to go around to all of the many people who have helped me."

Among other notable awards that Robinson has received include induction into the NAIA Hall of Fame, Pop Warner Hall of Fame and the Sugar Bowl Hall of Fame. He was recognized in 1966 by the Football Writers Association of America as "the man who has done the most for college football in the last 25 years." He also is a recipient of the coveted Amos Alonzo Stagg Memorial Award.

Robinson has served as president of the American Football Coaches Association and the NAIA.

The trophy cases in the Grambling Athletic Department have long been overcrowded because of this famous coach's achievements.

Robinson has come a long ways to enjoy such recognition.

Prior to being hired as the school's football coach in 1941, he was working in a Baton Rouge feed mill.

"I had a wife (former Doris Mott) to support and a child was on the way," he recalled. "To get extra income, I also delivered ice and worked on a coal truck."

But coaching football was his ambition. From the third grade on, that's all he dreamed about.

He played at McKinley High in Baton Rouge, then went on to play for four years at quarterback for Leland College, near his hometown of Baker.

His last coach at Leland was Rubin S. Turner, who was a Baptist preacher on Sundays after coaching his team on Saturdays. He had the greatest influence on Robinson's desire to go into coaching, letting his young pupil call most of his own plays and even making suggestions on various strategic moves during the course of a game.

Robinson's aunt, Grace Jackson, knew about his long-range hopes of getting into coaching and had attended the little college in Grambling. While there, the previous coach left and she began mentioning her nephew's name to President Ralph Waldo Emerson Jones as a possible replacement.

"Dr. Jones never had a chance," laughed Robinson, recalling how his aunt constantly threw his name out to the Grambling president. "She kept pressure on him all the time. Before I knew it, he showed up at the feed mill and said he wanted to interview me for the job.

"Well, the first thing we talked about was how much 'Prez' loved baseball. He let me know right off that baseball was the main sport, but that he wanted to start building a good football team."

The day President Jones hired Eddie Robinson as his new football coach, both got into an argument as to who was the best baseball player.

"There we were, out on the Grambling practice field, and 'Prez' said he was the best pitcher around," remembered Robinson. "I told him I could hit anything he threw me. But I got to thinking when we started, that if I wanted the job, I had better let him strike me out a few times. I went down swinging, but I signed the contract and I was Grambling's football coach."

Robinson struggled through his first year, however. The Tigers were 3-5. "I began to have serious doubts if coaching was really for me," he said. "But the players we had were enthusiastic and willing to sacrifice and we had a winning record the next year. And then things just kept getting better and better."

Traditionally, Grambling has ranked among the most prolific producers of professional football talent in the country. They have been the Notre Dame of black colleges, perennially ranking near the top with the larger schools for most players sent on to the play-for-pay ranks.

"Our players in the pros probably give us more publicity and recognition than anything else," said Robinson. "Every weekend during the season, you can turn on the television and see a lot of our players performing. And so many of them return to Grambling during the off-season to complete their studies or obtain additional degrees or talk to our younger players."

Robinson requires his players, coaches and managers to wear coats and ties on road trips, jeans, glittering jewelry and horseplay are no no's.

When the National Anthem is being played, he demands strict attention and reverence toward the flag.

"I'm proud to be an American," said Robinson, who's been recognized for his patriotism by the American Legion, VFW and other veteran organizations. "There's no greater country in the world. The things that have happened to me couldn't have happened in any other country than America.

"Nobody is going to give you anything here, but you receive a lot when you work for it. Only in America is an athlete able to play a sport and be so well paid for it and recognized for it. Coaches and players are revered. Because of it, we have an obligation to the youth of our country to present the right image."

Robinson is strictly a clean living, churchgoing gentleman who encourages and expects his players and assistants to be in the pew every Sunday, too.

"When Coach Robinson told my mom that he was going to see that I would be in church every Sunday morning," recalled Pro Football and Louisiana Sports Hall of Fame inductee Davis, "then she was convinced that Grambling was the place for me to play my college football."

Despite his success, Robinson has never had a yearning to leave Grambling for larger and more lucrative jobs.

"Grambling is my home and always will be," he said. "I've never cared to seek other jobs. I enjoy being able to render a service to people in our community and area. I am of the belief that a man doesn't always have to go on to supposedly bigger and more enticing jobs to be successful. If a man finds his place in this world, he should pursue it with all the talent the good Lord has given to him, no matter where it might be."

This year, of course, will be the most publicized in Robinson's coaching career. Because of his pursuit of "The Bear" and his 324 victory total, there will be constant attention focused on him and the Grambling program.

"It's going to be pretty much of a fishbowl atmosphere, I guess," he said. "It could get pretty hectic, but the way I look at it, it's recognition for this fine institution and the people have made it successful over the years. I have an obligation to the media of our state and the nation to be available and am ready to talk about our programs, our administration, our players. My duty is one of making Grambling the best possible football program in the nation. But anything

that furthers the pride and recognition of our school is an honor, certainly not a duty."

And certainly, Eddie Gay Robinson has done more than his duty in helping make Grambling one of the most successful football teams in college history.

VERY PARTIAL GRAMBLING PRO LIST SINCE 1959

"You've got to be an achiever, I mean be someone (for me) to stop practice," says Robinson, who will stop football practice when a professional player shows up to talk to the Grambling players. "You'll hear people say now and again, 'I'm going to come back someday and stop practice.'"

Paul 'Tank' Younger, L.A. Rams (first from black college in the pros); James Harris, Chargers; Doug Williams, Tampa Bay; Willie Davis, Packers (member of Hall of Fame); Everson Walls, Cowboys; Ernest Sterling, Cowboys; Fred Collins, Chargers; Ernie Ladd, Chargers; Charlie Joiner, Chargers; Dwight Scales, Chargers; Buck Buchanan, Chiefs; Alphonse Dotson, Oakland; Billy Newsome, Bears; James Hunter, Lions; Guy Praither, Packers; Sammie White, Vikings; Frank Lewis, Bills; Woody Peoples, Eagles; Mike St. Clair, Bengals; Mike Smith, Falcons; Robert Pennywell, Falcons; Carlos Pennywell, Patriots.

Richard Harris, Eagles, Bears, and Seahawks; Essex Johnson, Bengals and Tampa Bay; Gary Johnson, Chargers; Willie Brown, Raiders; Steve Dennis, Toronto; Charles Smith, Eagles; John MendenHall, Giants; William Bryant, Giants; Bobby Simon, Oilers; Ron Singleton, Chargers; Jesse O'Neal, Saskatchewan; Matt Reed, Calgary; Vernon Robinson, Dolphins; Sam Holden, Saints and Saskatchewan; Orville Walton, Edmonton; Mike Williams, Toronto; Ezill Bibbs, Giants; Robert Barber, Packers; Willie Zimmerman, Giants; Mike Harris, Steelers; Clifford Martin, Patriots; Solomon Freelon, Houston; Bruce Radford, Broncos.

Kerry Parker, Raiders; Troy Thomas, Packers; Reggie Irving, Raiders; Greg Fields, Colts; Frank Cornish, Bears; Lane Howell, Englands; Al Dennis, Browns; Norman Davis, Colts; Roger Williams, Rams; Rosey Taylor, Bears; Willie Williams, Giants; Goldie Sellers, Broncos; Charles Johnson, 49ers; Sammie Taylor, Chargers; Henry Dyer, Rams; Peterson Mathews, Giants; J.D. Garrett, Patriots; James Cale, Browns; Mike Howell, Browns; Delles Howell, Saints; Virgil Robinson, Packers and Saints; Henry Davis, Steelers and Giants.

TRIBUTE TO SISTER MARY DEPAUL

● Mr. EAGLETON. Mr. President, Sister Mary DePaul Gluns of Independence, MO, will soon receive special recognition by her friends at St. Mary's High School for over 58 years of service to the academic and christian community. I know that my colleagues in the U.S. Senate join me in extending my best wishes for her health and happiness.

Sister Mary DePaul Gluns was born in 1910 in Oklahoma, and then moved to St. Louis with her family. She graduated from the convent in 1927, and has since dedicated her life to teaching and community work. Sister Mary has received outstanding recognition for her work with the poor and elderly.

A classroom of Sister Mary's is easily distinguished by her hard work and an abundance of enthusiasm. Students learn more than just the bookwork from Sister Mary; they learn practical lessons about life and the world outside the classroom. Sister Mary's students leave St. Mary's better prepared for the challenges they face.

Fifty-eight years is indeed a significant milestone and I am glad to share Sister Mary's recognition with the Senate.●

HIJACKING OF THE OCEAN LINER

● Mr. CHAFEE. Mr. President, terrorism is a disease that has reached epidemic proportions around the world. It is a contagion that all people of the world are equally susceptible to. It is not merely that there has been a steep annual increase in international or domestic attacks, nor is it simply a question of terrorism spreading into Third World countries that were previously free of this plaque—but that terrorism has become commonplace and far more lethal.

In the recent past, terrorism has taken a large toll including: 3 vacations at Frankfort airport, 13 people at a cafe in San Salvador, 75 bystanders in Tripoli, 1 murdered marine in the Beirut hijacking, a Soviet diplomat executed in Beirut and now an Italian ocean liner taken over by pirates.

I am pleased to announce to you, however, that this afternoon the pirates surrendered to a joint group of PLO and Egyptian forces on the ocean liner, when it was 8 kilometers out of Port Said. The captured terrorists, along with the PLO and Egyptian forces, are no longer on the ship. Their current location is unknown. Presently, there are no confirmed deaths or injuries. An American passenger, Mr. Leon Klinghoffer, is yet unaccounted for. The liner is headed for Ashtaad, Israel, the ship's next stop on its scheduled Mediterranean pleasure cruise, per the request of the liner's owners.

The motives behind these acts of barbarism may have differed, but their consequences were identical. The victims have little or no connection with the causes the killers espoused.

Terrorism remains effective, as classical reactions to the recent plethora of massacres attest to. Outrage and disgust give way to a feeling of helplessness. Only the victims are visible; the faceless killer vanishes either in the international underground or under cover provided by a cooperating government.

A quest for sense and punishment soon follows. As members of a social state governed by the rule of law, we begin to wonder what the true reasons for terrorism are. Accustomed to seeking motives for more mundane crimes, some grow prepared to show understanding to the murderer with ostensibly political motives.

The quest always follows the same pattern. When people resort to violence we believe it might be a cry for help from people who are oppressed and otherwise unable to gain a hearing.

At first glance the logic of this argument seems striking. Yet it carries no weight because it merges guilt with innocence. We have almost absolved of blame that which is inexcusable. Worse still, this argument brings us dangerously close to the logic of the terrorists themselves.

We may feel political sympathy with one group or another and sound out the root causes of violence, but we must never fall into the moral trap terrorists set. The injustice cannot be offset by understanding—and by fresh injustice, nor is terrorism a stroke of fate that must be borne like an earthquake or flood.

Terrorism need not be understood. The pirating of this ship need not be understood. I join my colleagues in denouncing this latest act of terrorism. Our hearts go out to the family of Mr. Leon Klinghoffer who has yet to be accounted for. Perhaps this latest act will start a dialog between all countries to find a strategy for combating terrorism. The fight must be persistent and backed by international cooperation.●

SECRETARY HERRINGTON'S VIEWS ON THE FUTURE OF THE SYNFUELS CORPORATION

● Mr. HUMPHREY. Mr. President, for the last several days, this body has been debating a proposal to balance the budget by 1991.

Today, in the Wall Street Journal, the Secretary of Energy, Mr. John Herrington, offered us what he calls "a unique opportunity to make an early downpayment on deficit reduction."

As Secretary Herrington points out, next Wednesday, on October 16, the Board of Directors of the Synthetic Fuels Corporation "plans to lock up more than $1 billion in taxpayer supported subsidies for two uneconomical

and unneeded oil-shale demonstration projects."

The Secretary appropriately asks if Congress will put a halt to these projects before the SFC allocates the money for them next year.

Mr. President, it is my hope that the Senate will act within the week to put a stop to the Synthetic Fuels Corporation and its projects. The House of Representatives has overwhelmingly voted to end the Synthetic Fuels Corporation. The Synthetic Fuels Corporation has responded with impunity to this mandate. It is time for the Senate to act and give more credence to our efforts to balance the budget than just the rhetoric of the past week.

I commend Secretary Herrington's byline in the Wall Street Journal to my colleagues and ask to have the full text of his article printed in the RECORD immediately following my remarks.

The article follows:

[From the Wall Street Journal, Oct. 9, 1985]

THE SYNFUELS ENERGY DINOSAUR

(By John S. Herrington)

This week, Congress is struggling to agree on a plan to reduce the deficit. Regardless of the outcome, in the next few days members of both houses will have a unique opportunity to make an early downpayment on deficit reduction. Next Wednesday, the Synthetic Fuels Corporation's board plans to lock up more than $1 billion in taxpayer-supported subsidies for two uneconomical and unneeded oil-shale demonstration projects.

These projects are telling examples of why the SFC was, this July, targeted for extinction by a 312-111 vote in the House. The question now is: Will Congress as a whole put a halt to these projects before the SFC allocates the money for them next week?

The projects in question—$900 million in price supports and guarantees for a Union Oil project in Parachute Creek, Colo., and $184 million in like guarantees for Seep Ridge's Vernal, Utah, project—reflect more than their dollar amounts. They are a microcosm of what is wrong with the SFC. In an era when everyone is striving to reduce the deficit, the SFC could not have picked two more wrongheaded projects to pilot, nor could it be championing them at a more pivotal time in its short lived history.

Parachute Creek has major technological weaknesses. Both Parachute Creek and Seep Ridge have technologies applicable to only a small portion of U.S. oil-shale resources. Both would have guaranteed price supports at a level several times the market price. Neither would make a lasting contribution to U.S. energy security.

I am opposed to these projects, and these circumstances have raised strong reservations about continued funding of the SFC. Terminating these projects would salvage at least $1 billion—and perhaps more, since the SFC will soon consider additional projects totaling $2.5 billion.

Congressional opponents of these projects need only to look to Union Oil's Parachute Creek operation for ammunition.

Union Oil first began acquiring oil-shale lands in Western Colorado in 1920. Sixty-five years later, its Parachute Creek project still has not been operated successfully beyond a period of a few days, despite the investment of $800 million by the company over the past six years.

Parachute Creek's problems are enormous. The price per barrel of the hoped-for 10,000 barrel-per-day plant is pegged at $72, in an economy where our Strategic Petroleum Reserve is buying oil at about $25 a barrel. Parachute Creek's retort scraper system—a mechanism that ejects spent shale—failed and still hasn't continuously worked as advertised. When it does work, the spent shale is coming out at a too-high temperature (900 degrees Fahrenheit) with an excessively high carbon content, a sign of inefficiency. Its fluid bed combustor, a component that would burn the carbon in the spent shale, is only in conceptual design, both unproved and untested.

The financial terms of the SFC agreement are such that six to 10 years from now, when subsidies are exhausted, Union could walk away from the project.

Union has failed to produce the oil that would allow it ultimately to earn $400 million in price supports. Nonetheless, the SFC plans to reward Union with an additional $500 million in loan and price guarantees to support the development of a combustor—and wants to extend Union's right to earn the $400 million in price supports. The total cost to taxpayers: $900 million.

Hand in hand with the Parachute Creek project, the SFC plans to provide $184 million in loan and price guaranteeing for Seep Ridge. SFC is guaranteeing its price per barrel at $55, more than twice the market rate.

Why the SFC is so ardently interested in Seep Ridge is something of a mystery. The project will offer no technological advance for synfuels development; the technology is already developed, and at full production Seep Ridge will produce only 1,000 barrels per day.

Supporters of these projects will no doubt weave their defense into the cloth of our energy future and national security through energy security.

The fact is that national-security and energy-security arguments do little to justify the Parachute Creeks and the Seep Ridges. When Congress established the Synthetic Fuels Corporation in 1980, oil prices were projected to reach $75 to $125 per barrel by 1990. Since oil prices peaked in 1981 following President Reagan's decontrol of oil prices, the world energy outlook has improved substantially: In nominal terms oil prices are down more than 30% from the 1980 levels.

As a result of these fundamental changes in the energy marketplace, virtually no projects pending before the SFC are likely to become economical in the foreseeable future. Thus, the development of a commercial synthetic-fuels industry at a pace envisioned by Congress in 1980 would require huge expenditures of federal tax dollars that would not be offset by economic benefits.

There is little point in building demonstration projects when the fuel costs are two, three or four times that of current and anticipated market prices. There is no compelling reason to subsidize construction of model synfuels plants when advanced technology, now under research and development by industry and the Department of Energy, will ultimately surpass these plants, existing technologies. Finally, there is little merit to the national-security argument advanced by supporters of synfuels. Were all the SFC projects currently planned ulitmately able to produce at their maximum capacity, they would only supply substantially less than 0.5% of U.S. energy requirements over the next 10 years.

The sensible approach for U.S. energy development is to let the free market work its way up to the next band of energy opportunities. And in this respect, the synthetic-fuels industry is several decades away from practicality. Synthetic fuels are not competitive with the next generation of fuels or expected energy gains through conservation and efficiency. Moreover, more exotic techniques such as enhanced oil recovery and the potential application of coal in slurries, advanced clean-burning combustors and high-efficiency turbines are today closer to the realities of the marketplace.

When the Synthetic Fuels Corporation was created in the late 1970s, its founders were acting with vision and patriotism during a time of rising oil prices and limited supplies. But times have changed and so have the circumstances that gave rise to these projects. Now we must adjust to the new realities. The proposed SFC projects offer Congress an opportunity to make meaningful budget savings with little acrimony and without compromising the public trust, national security or our energy future.●

RETIREMENT OF MAJ. GEN. DANIEL W. FRENCH

● Mr. LUGAR. Mr. President, in June of this year, Maj. Gen. Daniel W. French retired from his post at Fort Benjamin Harrison. General French has provided indefatigable service to the people of Indianapolis and the Department of the Army during his time at Fort Benjamin Harrison.

General French came into the Army as a second lieutenant in 1950. His extraordinary military career included service in Korea and Vietnam. Among his many decorations and badges are the Silver Star and the Legion of Merit.

In June 1981, General French assumed command of the U.S. Army Soldier Support Center and Fort Benjamin Harrison. From the very beginning General French worked to maintain and strengthen the relationship between the military command and the surrounding Indianapolis and Marion County communities. He also concentrated on improving conditions for those who live and work at Fort Benjamin Harrison.

Other achievements of General French's at Fort Benjamin Harrison included accreditation of the Hawley Army Hospital, the conversion of Delaware Lake into a swimming and camping area, the remodeling of building 31 to house the post library, the opening of a child care center, the timely construction and opening of the new post commissary, the construction of a new physical fitness center and a network of running trails and many other projects which are either under construction or completed.

General French initiated programs in combat development, including a

TRADOC coordination center for the military application of artificial intelligence and robotics. He has also directed efforts to improve personnel service support, training opportunities, and reorganization of the command structure.

I want to commend and honor General French for the dedicated and selfless service he has provided over the years to our community. He is moving on to a position in which he will serve the people of Indiana and the Nation—executive vice president of the Pan American Games. I am pleased that he will be continually dedicated to his country and his community.●

NATIONAL 4-H WEEK

● Mr. COCHRAN. Mr. President, I rise today to commend all 4-H members, volunteer leaders and cooperative extension service staff across the country on the occasion of the observance of this week, October 6-12, 1985, as "National 4-H Week."

As a former 4-H club member, I remember, with pleasure, working with other 4-H club members on our projects and the pride we share in their successful completion.

I know of no organization that does more to promote good citizenship and to help equip our Nation's young citizens for a productive life than 4-H.

This nationwide program has also been an important economic asset for our country. For more than 75 years, 4-H achievements have influenced U.S. food production and marketing, promoted conservation of our natural resources, and improved our nutrition habits.

Today's 4-H program has expanded far beyond the days when it was nothing more than corn, cows, and cooking. In 1985, 4-H is filled with very ambitious projects and activities. And, while thousands of youngsters in rural communities across our Nation are continuing to enjoy programs similar to those in which their parents participated, there also are many young people in our large cities who are enrolled in 4-H programs designed especially for their life styles.

The theme of this year's National 4-H Week is "4-H for Youth for America." This theme depicts the broad outreach of 4-H to youth and reflects the positive impact of the program on American society.

Because we must look to our youth to provide for a safe and prosperous future for this country, I think it is appropriate for the Congress to salute the outstanding role 4-H is playing in making our future better; 4-H members spend time learning skills that will help them throughout their lives. In this way, 4-H teaches them a most valuable lesson: How to be contributing members of society.

In this country, there are over 4½ million 4-H'ers, and almost 5 million worldwide. I think we can truly say there is nationwide respect for 4-H and that the impact of the program is being felt throughout the world.

I would like to add a special world of thanks to the more than 600,000 volunteer leaders who serve countless hours and who share their talents for the development of our youth.

Mr. President, I salute the members of 4-H and the volunteer leaders, and I congratulate 4-H on its many fine achievements.●

THE MEXICAN ECONOMY

● Mr. SIMON. Mr. President, Cathryn Thorup is the director of the United States-Mexico Project for the Overseas Development Council.

She has been one of the more thoughtful observers of the Mexican-American Scene and recently had a story in the New York Times that we would do well to heed.

I urge my colleagues to read the Thorup observation on the Mexican situation.

I ask that the Cathryn Thorup article be printed in the RECORD.

The article follows:

[From the New York Times, Sept. 30, 1985]

PLAY IT SMART WITH MEXICO

(By Cathryn Thorup)

WASHINGTON—The devastating earthquakes that rocked Mexico earlier this month were a severe blow to that country's effort to put its house in order economically and financially. But the natural disaster also served as a sobering reminder of the depth and breadth of United States ties to its troubled neighbor. Both factors argue for a new United States approach to Mexico.

The first of the quakes occurred on Sept. 19, just as the Senate passed a new immigration bill that will further tax the Mexican Government's dwindling economic resources. The next day, the press reported that the International Monetary Fund might cut off lending to Mexico. Against this background, the natural disaster could easily be the coup de grace that sends the Mexican economy into a tailspin.

Its impact will be felt in falling tourist revenues and higher unemployment. The damage to the country's infrastructure and the need to divert scarce resources to reconstruction will also make for a fall in productivity. Added to declining oil prices, a debt burden of overwhelming proportions, the specter of renewed United States protectionism and the physical and mental exhaustion of a people whose standard of living has fallen more than 30 percent since 1982, this unexpected challenge is indeed staggering.

The Mexican Government will be hard pressed to deal with the new crisis. Even before the disaster, it was having difficulty meeting accumulated pressure from a populace weary of austerity, a hostile international economic environment and a demanding neighbor to the north. The current Government looks more favorably on the United States and the private sector than any Mexican administration in the last 15 years, and since 1982 it has gone to great lengths to reduce friction with Washington. Yet relations between the two countries have deteriorated significantly.

Why? The blame lies in large part with the United States. The Reagan Administration has seemed dissatisfied with Mexico's traditional role as a reliable ally of last resort and has pressed instead for a more pliable and acquiescent partner. Neither public nor private sector in the United States has fully recognized Mexico's great effort to honor its debt and open its economy: On the contrary, many bankers and officials have continued to raise the hoops through which they require the Mexicans to jump.

Beyond this, few people in the United States seem to understand Mexico very well, despite our long and close relationship. Officials are baffled and frustrated by the complexities of a political system that has been ruled for more than 50 years by one party. They find it difficult to deal with the Mexican bureaucracy and make little effort to look beyond superficial press reports about Mexico's problems. As a result, the United States has tended increasingly to lose sight of its broader objectives—political stability and economic development—in Mexico.

The debt question is a case in point. If United States creditors, both public and private, continue to press Mexico as they have been doing, the Mexicans may well decide that the political costs of trying to play by the rules outweigh the costs of abandoning the international financial system. The result could be a temporary suspension of payments or a moratorium—with obvious catastrophic consequences.

To avoid this, Mexico's determination to honor its financial obligations must be met by an equal effort by the international financial community. Cosmetic solutions and repeated rescheduling will not solve the problem. What's needed is a far-ranging redistribution of the costs of adjustment among debtors and creditors alike.

The Mexican people are facing their natural disaster with unity and determination, and the effort to rebuild the capital city may do much to mend the national spirit. Drawing on international relief assistance and a deep well of national strength, Mexico can be expected to meet the immediate demands of this catastrophe. In the meantime, however, the United States should be rethinking its response to Mexico's long-term development plans. We have played hard over the last three years. It is time to play it smart.●

EXTENSION OF VETERAN'S HEALTH BENEFITS

● Mr. CHAFEE. Mr. President, today I am pleased to join Senator ANDREWS in cosponsoring S. 1446. This bill will improve and extend veteran's health benefits for those men who were taken as prisoners of war while serving our Nation.

This past September, I had the pleasure of hosting the Rhode Island Veteran's Forum, which I created to advise me on issues of concern to the veterans community. Among the issues raised was the need to expand the scope of illnesses, for which POW's may be treated under the Veteran's

Health Care Program. This bill does exactly that.

American veterans deserve the finest and most comprehensive medical care available, and with this bill, their coverage will be extended to include care for injuries associated with the pains and illnesses that POW's often suffer as a result of extended incarceration at enemy hands. This legislation helps compensate our former POW's for the sacrifices they have made while defending democratic institutions abroad.

I urge all of my colleagues in the Senate to join Senator ANDREWS and myself in helping American POW's by supporting this bill.

IN HONOR OF ALFRED KIRCHHOFER

● Mr. D'AMATO. Mr. President, it is with great sadness that I call the attention of this body to the recent death of one of the Nation's most distinguished newspapermen, Alfred Kirchhofer.

Some in this town may remember his as the first in a series of fine Washington correspondents for the Buffalo Evening News. Others may remember his work as top editor of that publication for almost four decades. His contributions to American journalism were vast and varied.

As Washington correspondent for the Buffalo Evening News, Alfred Kirchhofer and two other reporters instituted the format of Presidential press conferences. That format remains in place today.

Members of the National Press Club may remember Kirchhofer as a past president of the club and one of the people who made construction of the National Press Building a reality. He was also an active member of the Gridiron Club.

Eventually Mr. Kirchhofer returned to Buffalo to take over the paper as managing editor. He stayed with the paper until 1966 when he retired as editor and executive vice president.

There can be no better description of Alfred Kirchhofer's work than the one offered by the current editor and senior vice president of the Buffalo News, Murray B. Light:

AHK was without doubt the most dominant figure in the Buffalo area media in the twentieth century. His foresight was remarkable. As an editor, his demand levels were so great they produced fine journalism and spawned hundreds of fine journalists over the years. * * * The legend of AHK will always remain here at The News. We who have succeeded him and who have inherited his love for this newspaper and what it stands for will remain in his debt.

There can be no doubt that Kirchhofer strove to raise the standards of newspapers by fostering communication between national media organizations and schools of journalism. Prior to the 1920's, most big city periodicals were often devoted to sensationalism, and seemingly biased reporting. As editor of the News, Kirchhofer settled for nothing less than factual, objective reporting. He demanded that every fact in a story be personally checked and double checked by the reporter.

In addition to his work on the print side of the news business, Mr. Kirchhofer played a major role in founding and managing the radio and television holdings of the Buffalo News: WBEN-FM and WBEN-TV, now WIVB-TV.

Mr. Kirchhofer was always available to serve charitable, civic and health causes. Among his activities were a devotion to cancer research and the Roswell Park Memorial Institute. In 1944 Gov. Thomas E. Dewey appointed him to the Board of Visitors of the State Institute for the Study of Malignant Diseases, where he helped draft programs to facilitate research on a cure for cancer. He also served as secretary of the board for a number of years.

Mr. Kirchhofer has been awarded numerous honorary degrees and has received many civic awards and his reputation reached far beyond the city of Buffalo and western New York. He was revered and respected by all who knew him.

I would like this body to remember Alfred Kirchhofer, for all his contributions to American journalism and to the city he loved so well, Buffalo, NY. Though he is gone, his contributions still remain, a constant reminder of this remarkable man.●

ORDERS FOR THURSDAY, OCTOBER 10, 1985

RECESS

Mr. PACKWOOD. Mr. President, I ask unanimous consent that once the Senate completes it business today it stand in recess until the hour of 9:30 a.m. on Thursday, October 10.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF CERTAIN SENATORS

Mr. PACKWOOD. Mr. President, following the recognition of the two leaders under the standing order I ask unanimous consent that the following Senators be recognized for not to exceed 15 minutes each: Senators CHAFEE, BAUCUS, LEAHY, and PROXMIRE.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. PACKWOOD. Mr. President, there is still scheduled at 10:30 a.m. tomorrow a live quorum. Following the live quorum, there is a cloture vote due on the bill. That is still in the standing order so far.

Following morning business, the Senate will resume consideration of House Joint Resolution 372, the debt limit bill. We will have rollcall votes throughout the day.

RECESS UNTIL 9:30 A.M.

Mr. PACKWOOD. Mr. President, I move that the Senate stand in recess in accordance with the previous order.

The motion was agreed to; and, at 6 p.m., the Senate recessed until Thursday, October 10, 1985, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate October 9, 1985:

THE JUDICIARY

William J. Zloch, of Florida, to be U.S. district judge for the southern district of Florida vice a new position created by Public Law 98-353, approved July 10, 1984.

DEPARTMENT OF LABOR

Dennis Eugene Whitfield, of Virginia, to be Under Secretary of Labor, vice Ford Barney Ford.

HOUSE OF REPRESENTATIVES—*Wednesday, October 9, 1985*

The House met at 10 a.m. and was called to order by the Speaker pro tempore [Mr. FOLEY].

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
October 8, 1985.

I hereby designate the Honorable THOMAS S. FOLEY to act as Speaker pro tempore on Wednesday, October 9, 1985.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Make a joyful noise to the Lord, all the lands!

Serve the Lord with gladness! Come into his presence with singing!

Know that the Lord is God! It is He that made us, and we are His; we are His people, and the sheep of his pasture.

Enter His gates with thanksgiving, and His courts with praise! Give thanks to Him, bless His name.

For the Lord is good; His steadfast love endures forever, and His faithfulness to all generations.—Psalm 100.

Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

RECESS

The SPEAKER pro tempore. Pursuant to the order of the House of October 3, 1985, the House will stand in recess, subject to the call of the Chair.

Accordingly (at 10 o'clock and 2 minutes a.m.), the House stood in recess subject to the call of the Chair.

During the recess, beginning at about 10:15 o'clock a.m., the following proceedings were held:

JOINT MEETING OF THE HOUSE AND SENATE TO HEAR AN ADDRESS BY THE RIGHT HONORABLE LEE KUAN YEW, PRIME MINISTER OF THE REPUBLIC OF SINGAPORE

The SPEAKER of the House presided.

The Doorkeeper, the Honorable James T. Malloy, announced the Vice President and Members of the U.S. Senate who entered the Hall of the House of Representatives, the Vice President taking the chair at the right of the Speaker, and the Members of the Senate the seats reserved for them.

The SPEAKER. On the part of the House, the Chair appoints as members of the committee to escort the Prime Minister of the Republic of Singapore into the Chamber: The gentleman from Washington, Mr. FOLEY; the gentleman from Florida, Mr. FASCELL; the gentleman from Arkansas, Mr. ALEXANDER; the gentlewoman from Ohio, Ms. OAKAR; the gentleman from Illinois, Mr. MICHEL; the gentleman from Mississippi, Mr. LOTT; and the gentleman from Michigan, Mr. BROOMFIELD.

The VICE PRESIDENT. On the part of the Senate, the Chair appoints as members of the committee of escort, the Senator from Kansas, Mr. DOLE; the Senator from Wyoming, Mr. SIMPSON; the Senator from South Carolina, Mr. THURMOND; the Senator from Indiana, Mr. LUGAR; the Senator from Rhode Island, Mr. CHAFEE; the Senator from Georgia, Mr. NUNN; and the Senator from New York, Mr. MOYNIHAN.

The Doorkeeper announced the ambassadors, ministers, and charges d'affaires of foreign governments.

The ambassadors, ministers, and charges d'affaires of foreign governments entered the Hall of the House of Representatives and took the seats reserved for them.

The Doorkeeper announced the Cabinet of the President of the United States.

The members of the Cabinet of the President of the United States entered the Hall of the House of Representatives and took the seats reserved for them in front of the Speaker's rostrum.

At 10 o'clock and 33 minutes a.m., the Doorkeeper announced the Prime Minister of the Republic of Singapore.

The Prime Minister of the Republic of Singapore, escorted by the committee of Senators and Representatives, entered the Hall of the House of Representatives, and stood at the Clerk's desk.

[Applause, the Members rising.]

The SPEAKER. Members of the Congress, it is my great privilege and I deem it a high honor and personal pleasure to present to you the Right Honorable Lee Kuan Yew, Prime Minister of the Republic of Singapore.

[Applause, the Members rising.]

ADDRESS BY THE RIGHT HONORABLE LEE KUAN YEW, PRIME MINISTER OF THE REPUBLIC OF SINGAPORE

Prime Minister LEE. Mr. Speaker, Mr. President of the Senate, distinguished Members of the U.S. Senate and House of Representatives, I am greatly honored by your invitation to address this joint meeting of the U.S. Congress. It cannot be often that someone representing 2½ million people, coming from a small country in the Third World, is offered the opportunity to address the representatives of 240 million people who form the world's most wealthy, and most advanced nation. America is a great nation not just because of its power and wealth, but mainly because it is a nation moved by high ideals. Only the elevating power of her idealism can explain the benign manner in which she has exercised her enormous power since the end of World War II and with magnanimity and generosity has shared her wealth to rebuild a more prosperous world. This idealism which inspired the Founding Fathers of this Nation has, down the ages, also affected and inspired free men and women throughout the world.

The decisions made in this august Chamber, especially in the decades since the 8th of December 1941, have determined the course of human history and settled the shape of the contemporary world. If the era after the war has seen a world relatively at peace, much of the credit must go to American leadership.

At a time of domestic disquiet over large imports and possible loss of jobs, the attention of America's legislators has been drawn away from the fundamentals. These fundamentals, which successive administrations and congresses have successfully pursued for four decades from 1945 are: A world in which all peoples can seek to fulfill themselves without having to conquer or to dominate or to exploit other people.

America has encouraged a world which respects the sovereignty and the dignity of all, the great and the small, the mighty and the weak—a world which enables all to work and to be rewarded for their efforts because what they produce is desired by others willing to pay for such goods and services under fair rules of exchange.

For many months now troubled voices come from the U.S. Congress.

I want to refocus your attention, distracted by the problems of trade imbalance, job loss, high value of the U.S. dollar and budget deficits, back to the basic issues of war and peace.

Since World War II, the United States has been involved in two major wars, both in the Western Pacific: Korea, 1950-53, Vietnam, 1965-73. This was not accidental. East Asian societies are on the move, seeking to transform their ancient civilizations into modern industrial societies. All are seething with restless energy. Their people want to catch up with the rest of the world and have the better life. If Japan can do it, they believe they, too, can.

In the 1950's and 1960's, trade with the United States of all countries in the Western Pacific, except Communist China, North Korea and North Vietnam, increased. Many received U.S. investments. By the late 1960's, Japan had emerged as a second dynamo. The countries of East Asia, the Association of Southeast Nations, ASEAN, Australia and New Zealand list the United States and Japan as either their first or their second single most important trading partner with between 10 to 45 percent of their total trade.

Mr. Speaker and Mr. President, I suggest that the 40 years of relative peace the world has enjoyed since World War II is not just because of the atomic bomb. It is because the United States had learned the lessons of World War I and II, understood the desire for the better life through industrialization and trade that had caused the squabbles over markets and expansion of empires in order to build up larger markets and acquire resources. So at the end of World War II and the emergence of the Cold War, the United States put determined pressures on the European empires to decolonize.

More pertinent, when the war ended in 1945, the United States set out, with her European allies, to establish an open and fair trading system under the General Agreement on Tariffs and Trade [GATT] in force since the first of January 1948. With it was a stable system of currency exchange under the original IMF agreement at Bretton Woods. These agreements led to a huge growth in trade, banking and finance throughout the world.

Indeed, political leaders in the former colonial territories watched in wonderment as the British, French, Belgian, and Dutch Governments dismantled their empires from 1945-65, and saw these peoples grow more prosperous in the 1960's and 1970's. Their former subject peoples had expected them to decline into relative poverty after they lost their empires, as Spain and Portugal. The secret lay in GATT and the IMF which ensured that trade and investments continued and expanded after decolonization.

Mr. Speaker, Mr. President, the East Asian phenomenon of high growth is well reported. Japan took off; the South Koreans, the Taiwanese, and then Hong Kong followed in her trail, picking up steam in her wake. They supplemented the Japanese economy, and followed the Japanese into the American and European markets. With investments both from the United States and Japan, they exported their manufactures to Europe. By the early 1970's, the countries of Southeast Asia in ASEAN also joined in this fast-growth group.

These developments have had a most profound impact on the leaders of China after Mao. After nearly three decades of Maoist seclusion and self-sufficiency, Deng Xiaoping decided that closing China's doors on the world was the cause of stagnation. China needs and wants to modernize. China has opened her doors to trade, investments, technology, and tourism. She wants to get the same economic uplift that Japan, South Korea, Taiwan, Hong Kong and the ASEAN countries have had from the free market economies of the West by plugging into their trading and investments power grid. In the few years since this decision, China's trade with the United States and Japan has gone up many times, 13 times with the United States from half a billion in 1975 to $6.4 billion in 1984; and three times with Japan from nearly $4 billion in 1975 to nearly $14 billion in 1984. China is seeking growth through trade, not territorial aggrandisement. Her quest for a better life for her people is through peaceful cooperation in trade, investments, transfer of technology and knowhow, not the use of force for territorial conquests and the carving out of a sphere of influence or a trading bloc.

Now, the North Koreans too have been impressed by the market economies of the West. They want to emulate what they see of the transformation of the South Korean economy. They have borrowed an estimated $1.4 billion from Japanese/Western banks in the 1970's. Unfortunately, the investments were not successful and their debts had to be rescheduled.

But China's decision is a most significant factor for peace, stability and growth in Asia. For nearly 30 years, from 1949 when the Communists took power until Mao died in 1976, an ideologically fervent China was a ceaseless spoiler of other countries' economic plans as she undermined their stability. She was an exporter, a proud exporter, of revolution. She provided the arms, the ideology, and the radio support to guerrilla insurgencies throughout Southeast Asia. But now China has, for the present, discontinued such support.

Every Chinese schoolboy knows how China's civilization began: Through the Emperor Qin Shihuang unifying the seven warring states by conquest and diplomacy. The Chinese know from their own history that the time-proven method for a dynamic, vigorous people to achieve greater economic power is to carve out a larger territory with a larger population to form a greater base on which peace and order in the Empire are established. Then with a wide range of soil, climates, and peoples, there will be more wealth from a greater diversity of goods and services for exchange.

The Vietnamese also know this. Fortunately for Asia, Vietnam's attempt to carve out an empire for itself, Cambodia, and Laos has resulted in her economic stagnation. Vietnam gets no investments or trade from the West. She is bogged down in a guerrilla war in Cambodia and will be worn down in a clash of wills on the Sino-Vietnamese border with an immensely larger neighbor.

A younger generation of Americans may not know that it was the carving out of empire that Japan undertook when in 1931 she set up the state of Manchukuo in Manchuria. In fact, Japan had embarked on a modern empire earlier in 1895 when she annexed Taiwan, and in 1905 when she annexed Korea.

The success of the countries in East and Southeast Asia has caused much of the Third World to rethink their policies. Once infatuated with socialist economic policies of nationalization and autarchy, Third World nations and their leaders know and have come to see that stagnation and decay have followed these policies. More and more Third World leaders are seeking a better life for their peoples by opening up their doors to trade and investments.

Putting up barriers to America's markets would halt the economic advancement of the free market-oriented developing countries. It would send a signal that the model provided by the countries of East and Southeast Asia is no longer available as an option. It would set off a chain reaction which would result in a downward spiral of the world economy.

China was a founder member of GATT, the China of 1948. The present Government of the PRC abandoned its membership in 1950, a year after they took over in 1949. Recently, she

has sent out feelers for re-admission as a developing country member of GATT. If the United States cuts down China's growing trade with her, then China has to rethink her economic strategy. Shutting out China's products, especially textiles, which is the one commodity she produces in abundance from America's markets, has far-reaching implications for she must then look for other ways of getting foreign exchange to pay for modernization. If, as is likely, she cannot get enough alternative markets to make up for the loss of her American markets her modernization will slow down. She will become restive.

And Japan squeezed in such a protectionist trap, has few attractive options. After thrashing around looking for market extensions in Latin America, Africa, West Asia, Japan will turn back to her two major options: Closer links with the Soviet Union, or closer ties with China. She could try to do both and reconcile or postpone the conflicts inherent in such a policy. In the end, she will have to choose one of the two. Either choice conjures up disquieting consequences for the rest of Asia, and for the world.

Mr. Speaker, Mr. President, Singapore has been an independent country for only 20 years. Whether it will be allowed to remain so, to work, to thrive and prosper, to pay its way in this world depends on the rules under which big and small states are allowed to compete and to cooperate in trade and finance. Forty-three years ago in 1942 the British could not prevent the Japanese from capturing us and our neighbors in the ASEAN countries. We were incorporated as part of Japan's "Greater East Asia Co-prosperity Sphere." I suggest the present multilateral economic cooperation offers so much more to all of us, to Singapore, to ASEAN, to Japan, and for the rest of the world.

The irony is that is was the United States and Europe that forced a reluctant China and a hermit-like Japan to open up their countries to trade with the West. They were two oriental societies happy to be self-sufficient and to keep out the outside world. It seems preposterous that because America has temporary difficulties with her balance of trade, due in part to an overvalued dollar, resulting from high interest rates and a budget deficit, that the United States should begin to close her markets. And that now it is the Japanese and the Chinese instead who may have to come knocking at America's door to get in to trade. What a bitter-sweet irony of role-reversals.

Whatever might have been the position today had American policies been different since 1945, the rapid changes in the trade in the Western Pacific will not stop. It is the result of the resurgence of dynamism in these societies as they recover their balance and forge their will to compete and to get on the move. They are societies capable of organizing themselves, of implementing and achieving high standards of universal education, of mastering the skills and the knowledge of industrial societies, of acquiring new technology, of improving product design and marketing, and of carrying out research and development. They have strong cultural bases to build modern technological societies upon.

Mr. Speaker, Mr. President, there are two scenarios for the 21st century. The first is bleak: If, because of domestic problems, the United States loses the will to maintain open and fair trade—there are I understand over 300 bills in Congress dedicated to the protection of the U.S. market—protectionism and retaliation will shrink trade and so reduce jobs. Is America willing to write off the peaceful and constructive developments of the last 40 years that she has made possible? Does America wish to abandon this contest between democracy and the free market on the one hand versus communism and the controlled economy on the other, and this at a time when she has very nearly won this contest for the hearts and minds of people in the Third World? Never in the history of this world have peoples enjoyed such high standards of living. For 40 years the maintenance of the political boundaries that have emerged after the war has been made possible because trusting, and usually aggressive, peoples have been able to fulfill their drive to better their lot through trade. If this method for adjustment and accommodation between societies moving at different speeds is no longer possible, then a return to traditional ways of conquest and spheres of influence is most likely.

Therefore America will find that the putting up of trade barriers alone is not enough. She will have to go one step further: She will have to be the policeman, to enforce order over her sphere of influence of the world outside the Soviet bloc.

After World War I, the United States left the League of Nations and withdrew into isolationism. Nevertheless, inexorably, she was drawn into the vortex of war by December 1941.

The Soviet Union, since 1948, has a different philosophy. She dominates her allies as satellites in Comecon. It is a simpler structured order. The Soviets maintain the balance between them and other aspiring Communist societies like Cuba, Vietnam, and Ethiopia. In like manner, without adjustments through open and fair trade, the United States must enforce some kind of dominance over her own allies in Europe and Japan. And America and Europe must together police and keep the peace between the jostling and contending societies in Asia, Africa, and Latin America. The more dynamic societies, prevented from thriving through trade, must also be prevented from rechannelling their energies toward expansion of their territories or of their spheres of influence to get assured markets. Unfortunately, or perhaps fortunately for the rest of the world, the American Constitution enshrines a system of open government which does not allow its leaders to exercise such dominion over other countries and governments in the same way that leaders of totalitarian states can.

Let us then not forget, Mr. Speaker and Mr. President, that protectionism and less trade means less growth for the developing countries. This also means that debt burdens cannot be discharged. Defaults may be inevitable, with incalculable consequences for the international banking system. Even if the banks survive these upheavals, these developing countries will have to abandon all thoughts of liberalization toward plurality and more democratic freedoms. For severe and repressive government is the other side of austere or negative economic growth.

An over-strong dollar has caused the huge deficits. A volatile and speculative foreign exchange market has exaggerated the factors working toward a strong dollar. The recent meeting in New York of the G5, Finance Ministers of five largest industrial nations, has given grounds for optimism that over-valued dollar can be brought down by concerted actions of the G5 Finance Ministers and their Central Bankers. Congress may wish to stay their hand and allow these efforts time to work.

Mr. Speaker, Mr. President, in case lobbyists for Japanese interests believe that they are going to be joined by some one from Singapore who ought to register his interests, let me add that I do not suggest that the Japanese should not be cajoled, and if necessary coerced, with all the powers at America's command, to open up their markets. America can legitimately and justly use all means to knock down Japanese barriers and obstacles to imports. There was a time in the 1950's and 1960's when Americans looked with amusement and tolerance at the ingeniousness of Japanese obstacles to imports. But, after Japan has become the second largest economic power, as a result of open and fair trade, it is right that she should be made to abide by the rules that have brought her to such unprecedented prosperity.

The rest of Asia will cheer with joy, for then their goods will also get into Japan without going through an obstacle course. Let me add and declare my position that 96 percent of United States goods enter Singapore duty free and quota free. And for 14 out of the

last 15 years, the United States has enjoyed trade surpluses with Singapore and we are not complaining. But for America to put up tariffs and barriers to Japanese goods, instead of tearing down Japanese barriers to American exports, will hurt the rest of Asia twice over. First, by having these same tariffs and barriers to overcome in America, and second, by not being able to sell to Japan because the Japanese will be selling less to America.

It is right to compel not only the Japanese, but also the others, to help the system function better. And if threatening retaliation for unequal access to markets is part of this process toward open and fair trade, then so be it. America has the right to ask that those who have benefited from America's markets open up their own. Some countries, like those in the Association of Southeast Nations, have supported the U.S. initiative to have GATT begin a new round of discussions for lowering barriers to trade in goods and perhaps also to regularize trade in services. The answer to job losses is more, not less trade.

America can upgrade her declining low value-added industries or they will continue to decline whether America goes protectionist or not, just as the ancient agricultural societies of pre-industrial China and Japan, with their self-sufficient, subsistence economies based on buffalo and manpower, had to change with the advent of steam and the industrial age. Rapid and profound change is the kind of world Americans have created by their inventiveness. American legislators now have the awesome responsibility of deciding under what rules the peoples of so many different countries should undergo rapid changes in their ways of making a living, and yet avoid violent conflicts.

In every age, the leading power has to carry the burden of encouraging the peaceful acceptance of the status quo. This is done by punishing aggression and rewarding peaceful cooperation. The British carried this burden for over 100 years after they had pioneered the industrial revolution. This responsibility passed to America after the second World War.

It is inherent in America's position as the preeminent economic, political and military power to have to settle and to uphold the rules for orderly change and progress. Americans are still leaders in a marathon for technological change and product innovation. American enterprise is blazing the trail into the microchip and computerized world of tomorrow. It is in the interests of peace and security that America upholds the rules of international conduct which rewards peaceful cooperative behavior and punishes trangressions of the peace. A replay of the depression of the 1930's which led to World War II would be ruinous for all. All major powers in the West share this responsibility for not repeating this mistake. But America has the primary responsibility, for she is the anchor economy of the free market economies of the world. In your hands, therefore, lie the future of the world. Thank you.

[Applause, the Members rising.]

At 11 o'clock and 15 minutes a.m., the Prime Minister of the Republic of Singapore, accompanied by the committee of escort, retired from the Hall of the House of Representatives.

The Doorkeeper escorted the invited guests from the Chamber in the following order:

The members of the President's Cabinet.

The ambassadors, ministers, and charges d'affaires of foreign governments.

JOINT MEETING DISSOLVED

The SPEAKER. The purpose of the joint meeting having been completed, the Chair declares the joint meeting of the two Houses now dissolved.

Accordingly, at 11 o'clock and 16 minutes a.m., the joint meeting of the two Houses was dissolved.

The Members of the Senate retired to their Chamber.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The House will continue in recess until the hour of 12 o'clock noon.

□ 1200

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore [Mr. FOLEY] at 12 o'clock noon.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries, who also informed the House that on the following dates, the President approved and signed bills and joint resolutions of the House of the following titles:

On September 23, 1985:

H.J. Res. 128. Joint resolution designating the month of October 1985 as "National High-Tech Month."

On September 27, 1985:

H.J. Res. 218. Joint resolution to designate the week beginning September 15, 1985, as "National Dental Hygiene Week"; and

H.J. Res. 229. Joint resolution designating the week beginning September 22, 1985, as "National Adult Day Care Center Week."

On September 30, 1985:

H.J. Res. 388. Joint resolution making continuing appropriations for the fiscal year 1986, and for other purposes;

H.R. 3414. An act to provide that the authority to establish and administer flexible and compressed work schedules for Federal Government employees be extended through October 31, 1985; and

H.R. 3452. An act to extend for 45 days the application of tobacco excise taxes, trade adjustment assistance, certain medicare reimbursement provisions, and borrowing authority under the railroad unemployment insurance program.

On October 1, 1985:

H.J. Res. 299. Joint resolution recognizing the accomplishments over the past 50 years resulting from the passage of the Historic Sites Act of 1935, one of this Nation's landmark preservation laws;

H.J. Res. 305. Joint resolution to recognize both Peace Corps volunteers and the Peace Corps on the Agency's 25th anniversary, 1985–86; and

H.R. 3454. An act to extend temporarily certain provisions of law.

On October 4, 1985:

H.J. Res. 287. Joint resolution to designate October 1985 as "Learning Disabilities Awareness Month"; and

H.J. Res. 394. Joint resolution reaffirming our historic solidarity with the people of Mexico following the devastating earthquake of September 19, 1985.

On October 7, 1985:

H.R. 1042. An act to grant a Federal charter to the Pearl Harbor Survivors Association.

On October 8, 1985:

H.J. Res. 393. Joint resolution to provide for the temporary extension of certain programs relating to housing and community development, and for other purposes.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will receive 1-minute speeches at this time.

CONTINUING RECORD TRADE DEFICITS HURT AMERICAN ECONOMY

(Ms. KAPTUR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, continuing record trade deficits mean the American economy is not running on all cylinders. Last month's unemployment numbers were as loud as bad engine knock. In September, we lost another 110,000 manufacturing jobs—30,000 just in the automobile industry. This is the worst 1-month drop since the 1982 recession. The total job loss in manufacturing for 1985 stands now at 340,000. A total of 1½ million jobs have been lost since 1980. No question about it, the manufacturing engine in America is stalling.

The President and the Secretary of Labor are ecstatic about the increase in service sector jobs. Well, we need service sector jobs too, but not as a replacement for manufacturing jobs. One is not a substitute for the other. In the long run, service sector jobs depend on manufacturing jobs. When will this administration wake up and recognize what is happening to our manufacturing base so our economy hums once again?

PARLIAMENTARY INQUIRY

Mr. WALKER. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. WALKER. Mr. Speaker, would it be in order at this moment to request a call of the House?

The SPEAKER pro tempore. The Chair would advise the gentleman that we have 1-minutes which have been requested, and perhaps after that time the gentleman would like to make such a motion.

Mr. WALKER. At the end of the 1-minute requests, at that point it would be in order to move a call of the House?

The SPEAKER pro tempore. The gentleman is correct.

Mr. WALKER. I thank the Chair.

A TRIBUTE TO E.B. WHITE

(Ms. SNOWE asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. SNOWE. Mr. Speaker, on October 1, E.B. White died of Alzheimer's disease in North Brooklin, ME, his principal residence for almost 50 years. He was 86, but for those who loved his work, he was ageless. For the millions of us who alternately smiled and wept over the life and death of a spider in "Charlotte's Web" and who struggled with the complexities of the English language in "The Elements of Style," his is a loss we will all mourn.

Some literary critics have called him the best American essayist of this century. For most of us, he was a friend who wove images with words. Thus, it was the greatest of ironies that this man would die from a disease that robs the words and thoughts from its victims. Fortunately, it could not steal from us that which is etched in our hearts and minds. It is with deep regret that we say goodbye to a dear friend.

THE ADMINISTRATION SHOULD COME CLEAN ON AID TO THE CONTRAS

(Mr. LEVINE of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVINE of California. Mr. Speaker, yesterday's Washington Post carried a story alleging that, when he was faced with a cutoff of military aid to the Contras, President Reagan approved a secret plan to replace CIA funds with assistance from American citizens and U.S. allies. According to the article, administration officials maintain that the White House role in establishing an aid network ended by October 1, 1984, when the Boland amendment went into effect.

I do not know whether the story's allegations are true. But I do know that Congress and the American people have the right to know the facts. The Subcommittee on Western Hemisphere has requested the National Security Council to supply all materials relating to this matter so Congress can determine the truth. Unfortunately, the administration has refused to comply.

I call upon the administration to provide the documents Congress has requested. Administration denials are simply not good enough.

The administration should come clean on aid to the Contras.

COMPARABLE WORTH AND PAY EQUITY—BAD LEGISLATION

(Mr. ARMEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ARMEY. Mr. Speaker, shortly we will be addressing H.R. 3008 which has been variously called by its proponents comparable worth and pay equity. There seems to be a good deal of confusion about this bill and what it may or may not do.

Let me clear up two points. First, what is this legislation? It is bad legislation, and it is bad economics that runs the risk of throwing this Nation into a lawsuit that would enforce wage administration by a Government organization or agency that would disrupt our labor markets and result in a new inflationary spiral in America.

What is it not? It is not just a harmless study. That story has been fought before by at least 11 State legislatures that have franchised the study, and once the study has been completed, with a biased methodology and generally a loaded commission, as is the case in this legislation, the study has resulted in automatic lawsuits being brought as a followup, at enormous expense and risk to the States.

This body ought to study the deliberations today very, very carefully, and I know it will then act in a responsible manner and defeat this legislation which threatens only cost to the Government and disruption to America's labor markets.

IT IS TIME TO MOVE FORWARD WITH THE PAY EQUITY ACT

(Mr. TORRES asked and was given permission to address the House for 1 minute.)

Mr. TORRES. Mr. Speaker, I am happy to note today that this body will be taking under consideration the Pay Equity Act. I think it is a time in America when the Congress of the United States must move forward on what I think is precedent setting legislation for this Nation; to the benefit and to the positive aspects of this Nation.

Moreover, I am happy to note that that study will also include the treatment of Hispanics, blacks, and women, and their treatment as Government workers.

I think this bodes well for the American Government. I think this bodes well for the American people so that we can begin to move out and move into the 20th century and see to it that there is equity across the board.

I thank the Speaker.

WE SHOULD BALANCE OUR BUDGET BY 1991

(Mr. BARTON of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BARTON of Texas. Mr. Speaker, as we meet today in this body, our Government is in danger of running out of funds to meet its financial obligations.

The other body in our Nation's Capitol is expected to vote this afternoon to provide for a temporary deficit extension, and hopefully next week when we come back from the Columbus Day recess this body will have the opportunity to seriously address and permanently end the deficits that have been plaguing our Nation for many years. You see, in the other body there has been an amendment attached to the debt ceiling legislation that would require that we balance our budget by 1991. This is serious legislation. It has been introduced in this House by Congressman CONNIE MACK of Florida. One hundred and fifteen Members have cosponsored this legislation.

Mr. Speaker, I would hope that when we come back from the Columbus Day recess the House of Representatives will have the opportunity to vote up or down on whether we want once and for all to end the deficits that have plagued our country and get back to a balanced budget.

Mr. Speaker, I urge the other Members of this body who have not cosponsored this legislation to do so, and to come back to the Capitol next week prepared to vote in a positive fashion on this legislation.

PRINTING OF PROCEEDINGS HAD DURING THE RECESS

Mr. ALEXANDER. Mr. Speaker, I ask unanimous consent that the proceedings had during the recess be printed in RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

BALANCED BALONEY ACT OF 1985, A QUAGMIRE OF BUDGET DEFICITS

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, as we have heard today during the 1-minute period, the Nation is bogged down in a quagmire of budget deficits, trade deficits, fiscal confusion, and

lack of direction by our Nation on the future that we should take economically, which includes trade. Many quick-fix schemes have been proposed; one from the other body which has been referred to as the Balanced Baloney Act of 1985. But today we were privileged in this Congress to receive an address by the Prime Minister of Singapore, Lee Kuan Yew, who gave us a direction which had not heretofore been stated.

I urge my colleagues who were not in attendance to hear this address to read it, because it states that the fundamental problem that we have in our economy today is an overvalued dollar which prevents us from trading and also prevents us from balancing our budget.

I urge my colleagues to consider that address and for all who have immediate answers to these problems I would ask of you only the indulgence to consider the point of view of an enlightened man.

Mr. Speaker, I yield back the balance of my time.

WE ARE TIRED OF STUDIES AND WAITING FOR CONGRESS TO ACT ON THE DEFICIT

(Mr. DIOGUARDI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DIOGUARDI. Mr. Speaker, the time of reckoning has finally arrived and we now have the opportunity to act on the deficit. Unfortunately, some of our colleagues as well as the New York Times and Washington Post are saying that the Balanced Budget and Emergency Deficit Control Act is a gimmick and that we need more time to study the deficit issue.

My constituents are tired of studies and tired of waiting for Congress to act on the deficit. The time to act is now and it is unconscionable that some are dragging their feet.

The balanced budget legislation is a clear blueprint and plan to achieve deficit reduction by fiscal year 1991. It will send a signal to the financial markets and the American people that we mean business.

The effect of the Mack-Cheney balanced budget legislation is that it will finally place an institutional bias on saving, not spending. It will force Government bureaucracies to be more efficient and productive. There's nothing wrong with this—businesses do this every day and I believe its time for Government to clean house. No one can argue that over the years public sector bureaucracies have grown with little apparent benefit to what should be their bottom-line concern: Accountability to the taxpayer.

The Mack-Cheney House version of the Balanced Budget and Emergency Deficit Control Act will bring some fiscal discipline to Government and I urge my colleagues to support this legislation.

TRICKLE-DOWN ECONOMICS RESULT IN DEVASTATION OF THE AMERICAN ECONOMY

(Mr. WILLIAMS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILLIAMS. Mr. Speaker and my colleagues, 5 years ago some Republicans here in the Congress developed an economic plan which they said would balance the Federal budget within 5 years.

Well, here we are. It's 5 years later. We quickly accepted their plan, their half-baked notion which has been called a lot of things but which is best called trickle-down economics. The result is devastation of America's primary industries, an unemployment rate that is apparently stuck at far too high, 7 percent, a trade deficit that is out of control, and a Federal deficit, which they promised would not exist, is now the greatest in history.

□ 1215

We have stacked up more deficits in these last 4½ years than were created under all previous Presidents, George Washington through Jimmy Carter, combined.

The same people who brought you that now have a new budget plan to balance the Federal budget within the next 5 years. Their plan again is simple, their plan again appears to be popular, and once again they are dead wrong, and this Congress should have none of it because the American people cannot afford gimmicks that do not work, are politically sound in the short run and economically disastrous in the long run.

BALANCED BUDGET AND EMERGENCY DEFICIT CONTROL ACT

(Mr. MCMILLAN asked and was given permission to address the House for 1 minute.)

Mr. MCMILLAN. Mr. Speaker, nothing is more important to this Nation than the compelling necessity for this Congress to forcefully express its commitment to bring this budget into balance in a specified time under a plan that convinces this Nation, the administration, and even ourselves that we mean business.

While crossing Independence at New Jersey, yesterday, my light was green, but one policeman was motioning cars to move ahead on Independence while the other was directing traffic through on New Jersey. Fortunately they got together before we had a disaster.

The confusion on Independence matched that of this House. Congress is at a vital intersection on Federal spending. Too many Congressmen with fiscal schizophrenia are advocating a balanced budget with one hand and voting ongoing spending increases with the other. You can't have traffic flowing on both streets at the same time.

Like the policemen at Independence and New Jersey, we are directing a fiscal collision.

There is an answer. If we really are willing to put the taxpayers' money where our mouths are, I urge your support of the Balanced Budget and Emergency Control Act.

ADMINISTRATION SHOULD PRESENT FACTS REGARDING CONTRA FORCES IN NICARAGUA

(Mr. MRAZEK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MRAZEK. Mr. Speaker, I rise today to express the outrage of Americans who are appalled at the alleged attempt by this administration to cover up its role in illegally supporting the Contra forces now attempting to overthrow the Government of Nicaragua.

This administration's active recruitment of rightwing zealots to finance the Contras would be an intentional subversion of the laws of this Nation, which at that time banned direct or indirect U.S. military aid to the rebels. We are a Nation of law. This is what separates us from the closed societies we often condemn.

If, as this administration claims, they did not violate any U.S. law, I would question why National Security Adviser Robert C. McFarlane has continually refused to respond to a congressional request for documents on the National Security Council's contacts with the Contra forces.

Mr. Speaker, the disillusionment of the people of this Nation after our defeat in Vietnam rested in large part on our discovery that our leaders had consistently lied to us. We must require that this administration present us with the facts, to clear itself from blame if that may be the result. But most important, we must compel the leaders of our Nation to respect the laws of a moral society whose ideals we are attempting to export to countries where democratic institutions do not exist.

PALAUNI M. TUIASOSOPO ELECTED SECRETARY GENERAL OF THE SOUTH PACIFIC COMMISSION

(Mr. SUNIA asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. SUNIA. Mr. Speaker, the South Pacific Commission is an international organization which is made up of 27 countries and territories in the Pacific. The United States, France, Great Britain, Australia, and New Zealand were the founding members. Today, all of the new independent nations of the Pacific are members as well as all of their territories. It is a mini-United Nations.

Last week, this organization unanimously elected an American Samoan, Mr. Palauni M. Tuiasosopo, to the top post, the Secretary General.

I believe this is an achievement worth noting, both for Mr. Tuiasosopo and to our country. This marks the first time a national of the United States, from any of its territories, has been elected to head the SPC.

I applaud Mr. Tuiasosopo's achievement and commend the countries and territories of the Pacific plus France and Great Britain for making such a wise choice. I am confident Mr. Tuiasosopo, a constituent and a dear friend, will give a good account of himself and his country.

"Browine", as he is known both in American Samoa and amongst members of the South Pacific Commission, is a graduate of the Samoana High School, the Puhahou School of Hawaii, and the University of Oregon. He has held several important posts in the American Samoa government and was a special assistant to the Governor for several years.

He is identified with the territory's efforts in the development and preservation of arts and culture.

As the Secretariat General of the South Pacific Commission is located in Noumea, New Caledonia, Mr. Tuiasosopo, his wife, Tupu, and family will live there for the 3-year term.

Congratulations and Malo Lava!

ANTICOMPETITIVE ASSUMPTIONS ABOUT RAILROADS AND ELECTRIC UTILITIES

(Mr. SHUSTER asked and was given permission to address the House for 1 minute.)

(Mr. SHUSTER. Mr. Speaker, I was surprised to learn that there is transportation related legislation being considered by the Judiciary Committee, H.R. 1140, which would place into law the sweeping assumption that any railroad line that does not have a competitive railroad nearby is in violation of the antitrust laws and must offer the use of its trackage to a competitor.

I understand that it is the big electric utilities who are pushing this legislation. Now, what's good for the goose is good for the gander, so if this legislation comes to the floor, it is my intention to offer an amendment to extend this sweeping antitrust assumption to include electric utilities. If forced competition is the appropriate way to control rail rates, then the same method should be used to control utility rates. Let the utilities open up their transmission lines to their competitors. In the last 4 years the price of electricity to consumers rose 38 percent, while the rail transportation costs to electric utilities rose only 27 percent. Moreover, all fossil fuel costs (oil, gas, and coal) accounted for only 5 percent of the utilities' increased operating costs in those years. If we want to start legislating anticompetitive assumptions about any industry, the electric utility industry is a good place to start.

Mr. Speaker, I'm inserting a more detailed statement in today's extensions of remarks.

UNITED STATES FOREIGN POLICY TOWARD NICARAGUA

(Mr. BEDELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEDELL. Mr. Speaker, yesterday, I read with great distress a report in the Washington Post indicating President Reagan's direct participation in approving a secret plan to supplant CIA funding of Contra operations with private financing. White House officials appear confident that this latest stratagem against the Sandinista government remains within the confines of existent law. While this may be true, I believe these actions are in clear violation of at least the spirit and intent on congressional actions barring continued U.S. military assistance to the Contras.

It seems to me that we are once again faced with the question of executive branch disregard of congressional participation in the formulation of United States foreign policy toward Nicaragua. National Security Adviser Robert McFarland denies that his staff has violated the Boland amendment yet ignores our requests for documentation on National Security Council contact with the Contras. I believe it is up to the Congress to determine whether or not such violations have occurred and would urge my colleagues on the appropriate investigating committees to insist upon receipt of all relevant documents pertaining to this particular episode, especially the logs of Lt. Col. Oliver L. North.

LEGISLATION BROUGHT TO HOUSE FLOOR WITHOUT NOTICE

(Mr. WALKER asked and was given permission to address the House for 1 minute.)

Mr. WALKER. Mr. Speaker, the American people wonder why we get such lousy legislation out of this House. Well, one of the reasons we do is because we do not do what the American people want. And if you listened to some of my colleagues on the other side of the aisle here this morning, you will hear them saying we should not be trying to balance the budget right now, we ought to be doing other things. Evidently, they have a better plan, and from what I gather from what they are saying is, their plan is to spend us into oblivion. And maybe we have no better example than the bill that we are going to have before us today. It is going to be paraded out here as an innocent study, a little bit of a study of something that ought to be done in the future. However, it has the potential for becoming a multibillion-dollar add-on to the deficits of this country.

How did it get here? Well, it got here with 15 minutes notice. We pulled the bill that was supposed to be on the schedule today and then finally came up with this bill. And why did we come up with this bill? Well, because evidently they want to sneak it past the House. It is brought to the floor without notice, and we are supposed to take it up here without much preparation.

We should be embarrassed, Mr. Speaker, to bring legislation to the House of this type, and particularly embarrassed to bring it before us under these kinds of circumstances.

PERMISSION FOR COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO SIT TOMORROW DURING 5-MINUTE RULE

Mr. BOSCO. Mr. Speaker, I ask unanimous consent that the Committee on Public Works and Transportation may be permitted to sit on Thursday, October 10, 1985, during the 5-minute rule of the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

FAIR TRADE

(Mr. JENKINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JENKINS. Mr. Speaker and my colleagues, do you believe it is the responsibility of this great Nation to lead and defend the free world? If your answer is yes—and I believe and assume that it is—can we accomplish this without an industrial base? For the past several months, I have traveled in your States, in many of your districts. I have heard your people, I have seen your press releases, I have read reports of your speeches. You say that what we want is fair trade, you

say what we want is a level playing field. Well, at some point within the next week you are going to get the opportunity in the textile bill that is coming up to put your words into action. It will probably be the only trade bill that will come up this year.

I serve on the Trade Committee. I know how difficult it is. And when this bill comes up I would hope that all of the heads of state and all of the people involved would get in the room at one time because I would like to talk to them about the third worlds of this Nation, the 2 million people who are employed in this industry. But there will be no place to hide when this comes up. You have expressed your support for fair trade, a level playing field. I expect you to measure up when you have the opportunity to vote.

IF EGYPT WANTS OUR CASH, EGYPT SHOULD BUY OUR GOODS AND USE OUR SHIPS

(Mrs. BENTLEY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BENTLEY. Mr. Speaker, for fiscal 1985 and 1986, Congress has authorized $601 million in cash transfers to Egypt. Now the Agency for International Development [AID] is disbursing this cash without a guarantee to buy and ship American.

In 1979, when the first cash transfers were made to Israel, Congress legislated that the President was to ensure exports to Israel would not decline below what had occurred under its commodity imports program [CIP] arrangement. As a result, Israel has given the United States a side letter each year guaranteeing that Israel would continue to buy manufactured products and grains in the same proportions it did when using credits, and half the grain shipments would be on American vessels. Israel is expected to sign a similar letter for 1986.

We should expect no less from Egypt, even though the Congress failed to include the requirement when it approved the cash transfers.

For Egypt's first cash transfer in 1984, Egypt only agreed to try to buy grain from the United States. No commitment was made for manufactured goods nor for U.S. shipping. Since there is no accounting, no United States Government agency knows whether Egypt did or did not.

There must be more than an understanding that Egypt or any country receiving cash transfers will continue to buy and ship American. As it stands, the United States has provided cash funds to be spent anywhere in the world.

Let us put this agreement in writing, like we did for Israel, so there will be no mistakes on how the cash will be used.

□ 1230

HEARING ON CRUISE SHIP SECURITY

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, it appears that the hijacking and hostage taking aboard the *Achille Lauro* is now over. It also appears that the passengers aboard, including the Americans, are safe and unharmed. Though under very strange circumstances.

There must be a lesson learned from this incident. It is imperative that we tighten security aboard cruise ships—which can now be best described as inadequate if not nonexistent.

As chairman of the House Merchant Marine Subcommittee the subject of cruise ship security will be the primary focus of a hearing I have scheduled for October 22.

I remain concerned about the copycat syndrome which we have seen practiced so often by terrorists. It is, therefore, vital that steps be taken now to improve security before another vessel is seized.

For the good of the millions of passengers who use these ships as well as for the good of the industry, which can only suffer if people are apprehensive about security, let us move forward and improve security. I hope my hearing can make a positive contribution toward an early solution to this new but highly dangerous problem.

AMERICAN HOSTAGE CRISIS IN 571ST DAY

(Mr. O'BRIEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'BRIEN. Mr. Speaker, today is the 571st day Americans have been held hostage in Lebanon.

William Buckley was kidnaped on the streets of Beirut on March 16, 1984, 571 days ago today.

Today marks the beginning of the 9th month of captivity for Father Lawrence Jenco, a priest from Joliet, IL.

Two hundred and six days ago today, Terry Anderson, the Associated Press bureau chief in Beirut, was taken hostage in Lebanon.

David Jacobsen, director of the American University Hospital in Beirut, was kidnaped 133 days ago.

Thomas Sutherland, dean of the American University School of Agriculture, was taken hostage in Lebanon 121 days ago.

Today also marks the 308th day since the kidnaping of Peter Kilburn, the American University librarian.

Mr. Speaker, the American hostage crisis is now in its 571st day. The crisis didn't begin with the hijacking of the Italian cruise ship. It won't end until the Americans held hostage in Lebanon are returned to the United States safe and sound. It won't end until every last one of them is secure, alive, and well, free of all constraints. With Jeremy Levin and Ben Weir home, we are still two down, six to go.

LET US HAVE COMMON SENSE BEFORE WE FURLOUGH EVERY JOB WE HAVE

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, during the election, the President continued to say that if we flood the country with cheap imports, it will bring the price down for the American consumer. Even if these foreign entities are in fact subsidizing their industry, that is money in the pocket for Americans.

No one has yet to say that the American consumer is the American worker. If the American worker does not have a job, who is going to consume over here?

Many people believe that it is impossible for America to fall into the throes of financial collapse. I am not quite so sure that is true. The Americans are starting to speak up and there is a Member here that said he was speaking on behalf of all Americans. If he was speaking on behalf of all Americans, what Americans are saying is, "Protect my job; quit letting my job go overseas with these crazy types of trade policies."

It is true that Americans are concerned about tax reform, but they are really concerned about trade reform. It is true America is concerned about the budget deficits, but America is critically concerned about the trade deficit and their jobs. So all these free traders who continue to say that protectionism is a dirty word, I might like to say it is a little bit of common sense that should be practiced by our administration before we furlough every job that we have.

SUPPORT URGED FOR THE BALANCED BUDGET AND EMERGENCY DEFICIT CONTROL ACT OF 1985

(Mr. KOLBE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KOLBE. Mr. Speaker, as a new Member of Congress, I am constantly dismayed as the budget process collapses into a mire of partisan spending feuds. Many of us are committed to re-

ducing the Federal deficit, yet it would seem that Congress as a whole has abandoned the single most important goal for which we were sent to Washington last November. We are now facing a public debt limit in excess of $2 trillion. Irresponsible spending is swiftly and tirelessly rotting the fabric of the American economy.

Mr. Speaker, both national polls and visits with constituents show deficit reduction to be a high priority. We in Congress now have an opportunity to show our constituents that we, too, are concerned and that we are going to do something about this problem. In the Balanced Budget and Emergency Deficit Control Act of 1985, we have a proposal that—at last—puts teeth to our bark about deficits.

The legislation mandates annual reductions in the Federal deficit to produce a balanced budget by fiscal 1991. If Congress and the President fail to make the mandated reductions, automatic, across-the-board spending cuts would go into effect, with the exceptions of Social Security and payments on the national debt. Adoption of this bill will indicate to the American people—our constituents—that Congress is serious about ending our deficit problems. I urge my colleagues to support the Balanced Budget and Emergency Deficit Control Act of 1985.

MR. ARAFAT OWES THE WORLD SOME EXPLANATIONS

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, Americans in the world are overjoyed at the reports that the hostages aboard the *Achille Lauro* have been released unharmed. But the incident raises many questions that must be answered. Indeed, it seems that there is something fishy in the Mediterranean this morning. How did Yassir Arafat negotiate so quickly with the same terrorists he was yesterday calling his most dire enemies. When the terrorists stated, as they released the hostages, that they were releasing them because world opinion had come out so quickly about the Israeli raid and the bombing of Tunis, they ignore the fact that the mission was planned weeks before that bombing and world opinion had actually congealed days before the terrorists started their action.

It seems indeed, Mr. Arafat, there is certainly more, or should I say less, than meets the eye. Your already minuscule credibility in the world is on the verge of disappearing. Mr. Arafat, you owe the world, the hostages, and their families some explanations.

EMERGENCY DEFICIT CONTROL ACT OF 1985

(Mr. SCHAEFER asked and was given permission to address the House for 1 minute and to revise and extend his remarks).

Mr. SCHAEFER. Mr. Speaker, throughout this Coangress we have heard countless pledges, from both sides of the aisle, to reduce our enormous deficit and eventually balance the Federal budget. Fellow members, talk is cheap. The time has come to show the American people that these discussions are not merely political rhetoric, but express our genuine concern and commitment to fiscal responsibility. The Emergency Deficit Control Act of 1985 does just that.

I am pleased to have the opportunity to place my name on this bill as an original cosponsor. Through the establishment of gradually decreasing budget deficit limits, the Emergency Deficit Control Act offers a realistic approach to achieving a balanced budget by 1991. It has become apparent that only through passage of such legislation will Congress match expenditures with revenue and finally make significant strides in reducing our deficit.

Supporting this measure is not taking a partisan stance; it's taking a responsible one. While searching for solutions to our economic woes on an international front, let's not overlook those in our own backyard. I strongly urge my colleages to join me as a cosponsor of the Emergency Deficit Control Act and make a balanced Federal budget a reality.

COMPARABLE WORTH

(Mr. DELAY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DELAY. Mr. Speaker, in just a few moments, we will take up the bill, H.R. 3008, the so-called pay equity bill. Now, the proponents of this bill will tell you that this is not comparable worth. Mr. Speaker, let me read from section 6(a) of the bill.

> The Commission shall provide, by contract with the consultant selected under section 5(b) for the conduct of a study under which job-content analysis and economic analysis shall be applied with respect to a representative sample of occupations in which either sex is numerically predominant.

Mr. Speaker, that is comparable worth.

□ 1240

REPUBLICAN'S "OPERATION OPEN DOOR" FLOPS IN HAWAII

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. AKAKA. Mr. Speaker, my fellow colleagues may have seen a story that appeared in the Washington Post this Saturday concerning the recall election of three Honolulu City councilmen who switched their affiliation from the Democratic to the Republican Party.

The Honolulu recall has attracted nationwide attention. That attention was due to the White House and Republican National Committee efforts to defeat the recall attempt and to spotlight the defection of our Honolulu city councilmen as part of their "Operation Open Door"—a program to convert Democratic elected officials. If the situation in Hawaii is any indication, "Operation Open Door" must be considered a flop.

Despite a last-ditch media blitz involving an Oval Office address by President Reagan, Saturday's recall was conclusive—all three Honolulu city councilmen who switched parties in the middle of their terms were recalled by their constituents. Many voters in Hawaii felt betrayed because these officials ran for office and were elected as Democrats but switched their party affiliation after the mandate the voters gave them in their election.

While I have been and remain good friends with these three individuals, their recall demonstrates that every elected official must heed the demands of their constituency or suffer the consequences.

RECIPROCITY IS BASIS OF TRADE PARTNERSHIP ACT

(Mrs. JOHNSON asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. JOHNSON. Mr. Speaker, the Trade Partnership Act introduced yesterday is based on the bipartisan idea of reciprocity—that we should demand equity in the treatment of American goods and services.

This comprehensive legislation does that in part by strengthening the USTR's authority in 301 cases and by shortening the timeframe by half. The Trade Partnership Equity Act allows the President only 15 days to override the USTR's decision, and it provides for a fast-track procedure by which the Congress can overturn the President's decision.

Perhaps the most important aspect of this bill is that it requires that an overall reciprocity test be included for the first time in determining our trade relationships.

Mr. Speaker, I urge my colleagues, particularly those on the other side of the aisle with whom I have worked on trade issues and whose interest in those issues goes well back before they were so popular, to join in cosponsor-

ing the Trade Partnership Equity Act. Trade policy must be bipartisan. America must speak with one voice to our trading partners.

OPEN AND FAIR TRADE IS GOAL OF HOUSE MAJORITY

(Mr. LEVIN of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVIN of Michigan. Mr. Speaker, we were honored this morning by the presence of the Prime Minister of Singapore. He called for the end or for the avoidance of protectionism, and we welcome that call.

He also said, and I quote: "If threatening retaliation for unequal access to markets is part of this process toward open and fair trade, then so be it." That has been the major purpose of legislation introduced by the majority in this House.

Then he went on to say: "The answer to job loss is more, not less, trade."

But the question is, what if more trade leads to a further imbalance between the United States and our trading competitors? And what if more trade leads to the further erosion of this country's industrial base? Up until now the administration's position has been not so benign neglect.

Mr. Speaker, we are glad the minority is now joining in this effort, and we on the majority side in the House intend to persevere until there is a policy that protects America's basic economic interests.

COMPARABLE WORTH BACK ON THE AGENDA

(Mr. MONSON asked and was given permission to address the House for 1 minute.)

Mr. MONSON. Mr. Speaker, the comparable worth concept keeps creeping its way back into this Chamber and many of our respectable colleagues are buying off on this idea of recasting pay practices and offering equal pay for different work.

I've accused Congress before of wasting valuable time on worthless issues, but with so many critical matters before us, we should not be delving into the nonsense of comparable worth. Those who examine it with any degree of seriousness and apply even a small dose of common sense, will find it to be one of the most preposterous ideas floating around Washington.

Too many people have bought off on the rhetoric characterizing it as a vehicle for correcting unfair pay practices. As the U.S. Court of Appeals in San Fransico recently confirmed: This bill is not a pay equity issue, it is not a civil rights issue. It is a guise for expanding an already bloated bureaucracy. It will not equalize pay, it will complicate the labor market and keep the courts of this country forever tangled in its web of confusion. I suggest we act on the important issues of the day and recognize comparable worth for what it's worth and it's not worth our time.

UNITED STATES POLICY IN NICARAGUA

(Mr. AuCOIN asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. AuCOIN. Mr. Speaker, we all know how good the Republican Party is at fundraising. It can raise funds for virtually anything and everything except perhaps for balancing the Federal budget. Now we have learned that this vaunted fundraising machine has been put to a deceitful and illegal use by the White House, namely, to raise money to support a mercenary army in Nicaragua, despite a clear ban imposed by the people's Congress.

In the President's view, this is a "voluntary program." In my view, that is Orwellian doubletalk.

With the consent of the President, members of the National Security Council have formed a Contra booster club. Most booster clubs hold bake sales or car washes to finance their activities, but not this one. No, this one solicits so-called "charitable" contributions to feed and arm a mercenary army fighting a war the American people do not support.

This is a clear violation of the law of the land. Congress has been trying to formulate a firm but responsible and reasonable policy toward Nicaragua, but the President, by going behind our backs, shows that he would rather play an underhanded game of hide-and-seek. I think he is wrong.

SUPERFUND LEGISLATION PREEMPTED BY COMPARABLE WORTH

(Mr. SMITH of New Hampshire asked and was given permission to address the House for 1 minute.)

Mr. SMITH of New Hampshire. Mr. Speaker, if rhetoric could balance the budget around here, we would have a $2 trillion surplus.

This Congress talks about bureaucrats causing problems. Who created the bureaucrats?

This Congress talks about taxes being too high. Who created the high taxes?

This Congress talks about deficits being too high. Who created the deficits?

We talk about a trade deficit. Who created that?

Mr. Speaker, we were supposed to debate a textile bill this morning. Now we are going to take up comparable worth. We were supposed to reauthorize Superfund. Even though hazardous waste contamination is the most serious health and environmental threat facing the United States today, with the United States generating 650 million metric tons of it per year, even though there may be 10,000 hazardous waste sites nationwide, we did not reauthorize Superfund; we gave it a 45-day extension.

Mr. Speaker, we were supposed to deal with a balanced budget. We are trying to deal with a balanced-budget proposal that is to come over here, but we want to have more study, even though we have a national debt now approaching $2 trillion and deficits approaching $150 billion annually.

Mr. Speaker, a frustrated constituent said to me on my last trip home that "The difference between the Congress and the Boy Scouts is that the Boy Scouts have adult leadership."

TRACKING THE GROWTH OF THE DEFICIT

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute, and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, the President came to power promising a major increase in defense spending. He was also promising that he would balance the budget and he would cut taxes. Now, the average 10-year-old in America knew that did not add up. Even with new math, it did not work.

Now the President professes that he has no idea where this deficit came from, this deficit that has escalated to an all-time high, this deficit that is causing us all sorts of trouble in trade negotiations and leading to a trade imbalance, this deficit that really clouds our children's future, because if we ever have any kind of a downturn in this economy, this deficit impairs our ability to act at all.

□ 1250

I think now we need a thoughtful approach to trying to cure this whole deficit problem and not theatrics. Unfortunately, we are seeing theatrics, and we are seeing promises that they will balance the budget by 1991. The promises are not new. We have had them before, but we have never done it.

I think all the rhetoric needs to be turned down. I think the President has to stop pretending like he is so surprised by this deficit that everybody else could have predicted was going to happen, and try to come to the table with some real meaningful solutions rather than just trying to blame other people.

COME LISTEN TO ALVARO JOSE BALDIZON AVILES IN 2200 RAYBURN BUILDING TODAY

(Mr. DORNAN of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORNAN of California. Mr. Speaker, I have taken note of the last few 1-minute speeches where colleagues are concerned about the manner in which the White House is trying to prevent the establishment of yet another Communist bastion in this hemisphere, this time in Nicaragua upon our own continent of North America.

One of the saddest things that I have witnessed on Capitol Hill over 9 years, is the refusal of some people to get educated to the hard facts about Communist expansionism and oppression. If we had ever had a chief investigator of the Soviet KGB defect while Mr. Andropov was head of that agency, and was involved in such evils as plotting to kill the Pope, we would, obviously, have had a human treasure trove of priceless intelligence information.

Well we have testifying on Capitol Hill this afternoon the Nicaraguan equivilant. An intelligence treasure trove—a chief investigator of Tomas Borge's Ministry of Interior. The intelligence officer who sought asylum July 1 is Alvaro Jose Baldizon Aviles. I beg my colleagues on the other side of the aisle, before they continue their policy of ripping apart our President's Central American policy, go to the Foreign Affairs subcommittee room in the Rayburn Building, 2200, and listen carefully to Mr. Baldizon. Put your toughest questions to him. He says there are seven times the political prisoners under the Sandinistas as was imprisoned under the Dictator Samoza. He says the torture is worse and capital punishment is institutionalized.

I beg you to get smart. Smart about communism and terror. I hope you will be there, Mr. Speaker.

CALL OF THE HOUSE

Mr. WALKER. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members responded to their names:

[Roll No. 348]

□ 1305

The SPEAKER pro tempore (Mr. HEFNER). On this rollcall, 389 Members recorded their presence by electronic device, a quorum.

Under the rule, further proceedings under the call were dispensed with.

□ 1315

PERSONAL EXPLANATION

Mr. BURTON of Indiana. Mr. Speaker, yesterday, I was not in Washington, DC, and so I was unable to cast some votes on H.R. 2100, the Food Security Act of 1985. If I had been here I would have voted:

For the Petri amendment;

Against the Stangeland amendment;

Against the Alexander substitute;

Against the Miller amendment; and

Against final passage of the H.R. 2100.

PERSONAL EXPLANATION

Mr. SMITH of Florida. Mr. Speaker, yesterday, I missed the vote on the farm bill, H.R. 2100. I was coming into the door of the Chamber when the machine was closed. Had I been present, I would have voted "aye."

ANNUAL REPORT OF THE RAILROAD RETIREMENT BOARD FOR FISCAL YEAR 1984—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Energy and Commerce and the Committee on Ways and Means:

(For message, see proceedings of the Senate of today, Wednesday, October 9, 1985.)

FEDERAL EQUITABLE PAY PRACTICES ACT OF 1985

The SPEAKER pro tempore. Pursuant to House Resolution 241 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 3008.

□ 1316

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 3008) to promote equitable pay practices and to eliminate discrimination within the Federal civil service, with Mr. TORRES, (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. When the Committee of the Whole House rose on Thursday, August 1, 1985, section 1 was open for amendment at any point.

Are there any amendments to section 1?

Ms. OAKAR. Mr. Chairman, I move to strike the requisite number of words.

I yield to the distinguished chairman of the Black Caucus, the gentleman from Texas [Mr. LELAND].

Mr. LELAND. I thank the gentlewoman for yielding, and I want to commend the gentlewoman form Ohio [Ms. OAKAR] for her outstanding leadership as she has displayed in carrying forth this issue of pay equity for not only women, but also minorities.

I think that there is something awry in this House. If I am not mistaken, and the gentlewoman may correct me if I am wrong, just last year there was a vote on this very issue except in the expanded version including minorities now, of 413 Members of the House voting in the affirmative for this very same study, and only 6 Members voting against this issue. Is that not correct?

Ms. OAKAR. That is correct.

Mr. LELAND. If the gentlewoman will yield further, through the committee process and the reintroduction of this legislation, if I am not again mistaken, the gentlewoman from Ohio [Ms. OAKAR] further expanded the issue to include minorities and not just women in this study. Is that not correct?

Ms. OAKAR. That is correct.

Mr. LELAND. Then can one assume that in this body that after this body had voted 413 to 6 last year when only women were included, and now that minorities are included, that this matter tends to smack of some kind of racial overtones?

I do not necessarily want the gentlewoman to respond, but I am very disturbed, because we in the Congressional Black Caucus, and I know my brothers in the Hispanic Caucus and those minorities who are in the Federal work force today and those who would want to work in the Federal work force have arrived at certain conclusions at this time in our history.

I know for a fact, through the Congressional Black Caucus Foundation's findings as well as other statistics that have been made available to us that things have not changed drastically for either women or minorities in 1 year.

It seems to me that it ought to be, in this body, a favorable consideration as it was last year, at least in the same proportion; that the Members of this body should support the legislation as they had last year. I do not understand what is going on in this House.

Have the Members of this body lost compassion for women and minorities in 1 year?

Ms. OAKAR. I yield to the gentleman from New York [Mr. GARCIA].

Mr. GARCIA. I will be brief, Mr. Chairman.

I would like very much to associate myself with the remarks of the gentleman from Texas [Mr. LELAND], also chairperson on the Congressional Black Caucus.

I think, having said what he said, what I would like to now say to my colleague from Ohio [Ms. OAKAR] is that we are all deeply appreciative for the work that the gentlewoman has put into this pay equity.

There is no question in my mind that it is long overdue, and necessary. I am just sorry that the debate has taken the form and shape that it has this year, when in reality last year we really did not have a problem with it.

On behalf of those persons that I represent, we are deeply grateful to the gentlewoman from Ohio.

Ms. OAKAR. I thank the gentleman from New York [Mr. GARCIA] for his input and for pointing out to the Chair of the subcommittee that there was a necessity to include Hispanics in the study, since we have not done a study of this kind since 1923 when less than 5 percent of the work force were minorities and women.

It seems reasonable, as the work force has changed so dramatically, that we do a study and include Hispanics and blacks and other minorities in the study. The gentleman is a distinguished member of the committee, and I am deeply grateful.

I now yield to the gentleman from Arkansas [Mr. ALEXANDER].

Mr. ALEXANDER. I thank the gentlewoman from Ohio [Ms. OAKAR] for yielding and I associate myself with the remarks of the gentlewoman and congratulate her on her leadership to bring about a study in an area that has long been neglected, as reported.

The CHAIRMAN. The time of the gentlewoman has expired.

(By unanimous consent, Ms. OAKAR was allowed to proceed for 5 additional minutes.)

Ms. OAKAR. I yield to the gentleman.

Mr. ALEXANDER. The last time a study of this type was conducted was 1923.

Mr. Chairman, I believe the confusion that has arisen that is associated with the legislation pending stems from the fact that allegations have been made that the bill would do more than conduct a study. For the purpose of those who are confused by those allegations, would the gentlewoman from Ohio [Ms. OAKAR] state clearly and succinctly the scope and impact of the legislation that is pending, when enacted?

Ms. OAKAR. As the gentleman knows, I chair a subcommittee related to employee benefits and compensation for Federal workers; no one else. It is those Federal employees who are under the classification system, GS-18 to 1.

Now, many Members are not quite as familiar with that, not being on that committee. We believe very strongly that the Federal work force has changed. As a result, members of the committee on both sides of the aisle voted overwhelmingly last year and again this year, to conduct a study on the classification system of Federal employees.

That is what it is; it does not relate in any way, shape or form to the private sector. I would not want a study on Federal classified employees be applied to the private sector just as when AT&T did their study on their employees, I would not want their study to apply to our classified Federal employees.

□ 1325

We have a responsibility in this Congress because we do in fact set the wages and the benefits of classified Federal employees. We vote on this all the time. We are, indeed, the employers. So we have an obligation, just as every good corporation. Forty-five States have done studies on their State employees, corporations, fine corporations, have done studies on their employees. We have an obligation to do a study on our employees. That is simply what it is, no more, no less.

I hear outrageous assumptions about costs and so forth. The Chair does not think or presume to know the results of the study, and I think there has been an awful lot of exaggeration, an awful lot of misleading on the issue, and I think it is very, very unfortunate.

More essentially, it is unfair to Government employees.

Mr. ALEXANDER. Mr. Chairman, will the gentlewoman yield further?

Ms. OAKAR. I yield to the gentleman from Arkansas.

Mr. ALEXANDER. I thank the gentlewoman for yielding further.

Mr. Chairman, I congratulate the gentlewoman on her leadership, and I appreciate her explanation.

Mr. Chairman, it is clear to me that in no way what we are debating today applies to the private sector.

I thank the gentlewoman for yielding.

Mr. FAZIO. Mr. Chairman, will the gentlewoman yield to me?

Ms. OAKAR. I yield to the gentleman from California.

Mr. FAZIO. I thank the gentlewoman for yielding.

Mr. Chairman, I was very impressed by the arguments made momentarily by Mr. GARCIA of New York and the gentleman from Texas [Mr. LELAND], and the concern that they have for the major change, apparently, in the thinking that the body seems to be exhibiting on the issue of pay equity for women.

I am reminded of an experience I had just several weeks ago when I was driving in my district and saw on the highways a young woman driving in an automobile with a bumper strip, a Reagan-Bush official campaign bumper strip, that said, "Women's equality is pay equity. Reagan-Bush."

It seems to me perhaps some of the people who campaigned on this issue, who tried to tell the American public, if women who may even characterize themselves as feminists, that it was possible for women to support the Reagan-Bush team, because even though there may be some questions about ERA there was no question about where the administration and the Republican Party stood on the issue of equality for women in terms of their compensation.

Mr. BURTON of Indiana. Mr. Chairman, will the gentleman yield?

Mr. FAZIO. I would be happy to yield.

Mr. BURTON of Indiana. I thank the gentleman for yielding.

I think the attitude of the administration was very well stated by the President, and he stated on a number of occasions that he was for equal pay for equal work. Pay equity, as you call it, is comparable worth, comparing eggs with apples, and nobody is for that.

Mr. FAZIO. I would reclaim my time.

The bumper strip was very clear. I think probably it deluded some people into thinking that we would find the same kind of support from the Republican Party now that we found before the election on an issue that is so basic to women of all economic brackets.

The CHAIRMAN pro tempore. The time of the gentlewoman from Ohio has expired.

(By unanimous consent, Ms. OAKAR was allowed to proceed for 30 additional seconds.)

Mr. FAZIO. Mr. Chairman, will the gentlewoman continue to yield?

Ms. OAKAR. I yield further to the gentleman from California.

Mr. FAZIO. I thank the gentlewoman for yielding.

Mr. Chairman, this issue is so basic to women who may have some questions about the other implications of ERA, never had any doubt about the benefits to them, to their children, their families that pay equity would bring about. So I think it is very disturbing that we see this marked change in the views, I think, of Members of the other body and of the other party in this instance on an issue that is so basic to the future of women in this country.

I hope that we would see more than the projected 20 or 30 votes from the other side of the aisle that the gentlewoman estimates to be all we can count on at this time. It would seem to me that without a sizable vote from the Republican Party, we have seen people going back on their political commitments from the last election.

The CHAIRMAN pro tempore. The time of the gentlewoman from Ohio has again expired.

Mr. GILMAN. Mr. Chairman, I ask unanimous consent that the gentlewoman from Ohio be given an additional 2 minutes.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

Mr. LUNGREN. Mr. Chairman, reserving the right to object, I shall not object, but certain comments were made by Members on the other side of the aisle close to characterizing the motivations of Members on this side of the aisle as to the way they are going to vote. Reference has been made three times now, and I think a timely response would be appropriate. I have been waiting here for that. I will not object at this time, but I will object to any further requests for time so that we might have some equality of debate here.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN pro tempore. The gentleman from Ohio is recognized for 2 additional minutes.

Mr. GILMAN. Mr. Chairman, will the gentlewoman continue to yield to me?

Ms. OAKAR. I yield to the gentleman, my distinguished minority member of the Post Office and Civil Service Committee, the gentleman from New York [Mr. GILMAN].

Mr. GILMAN. I thank the gentlewoman for yielding.

Mr. Chairman, I commend the gentlewoman for undertaking her extensive work on the pay equity issue and for bringing this measure to the floor. I understand the gentlewoman has been trying to meet many of the objections that have been raised to this bill.

So that we are all quite clear, would the gentlewoman state if the fundamental objectives of this bill are to promote equitable pay practices and to eliminate discrimination within the Federal service? And that this bill does not apply to the private sector, is that correct?

Ms. OAKAR. The gentleman is correct. This study in no way, shape, or form applies to the private sector. And I would oppose the bill if it did.

Mr. GILMAN. And as I understand it, the gentlewoman is about to revise the measure on the floor today to meet some of the further objections that have been raised with regard to the bill?

Ms. OAKAR. The gentleman is correct. As a matter of fact, with the gentleman's help, along with the distinguished minority member of the committee, the leader of the committee on your side of the aisle, Mr. MYERS of Indiana, we have changed the bill initially meeting the objections that were raised during some of our hearings.

For example, we put an economic analysis into H.R. 3008, which is the marketplace factors that some individuals wanted. We revised the membership of the commission to truly make it a bipartisan commission. This was done with the able assistance of Mr. MYERS and other members of the committee like the gentleman from New York.

Mr. GILMAN. If the gentlewoman would yield further, it is our understanding from what the gentlewoman reports that there are some 46 States at the present time studying pay equity and that the Federal Government is yet to undertake its first study.

Ms. OAKAR. Forty-five States have either completed or are in the process of doing studies on their State employees only, and a number of others.

The CHAIRMAN pro tempore. The time of the gentlewoman from Ohio has again expired.

(On request of Mr. GILMAN and by unanimous consent, Ms. OAKAR was allowed to proceed for 1 additional minute.)

Ms. OAKAR. Forty-five States have either completed or are in the process of completing their studies along with many other fine municipalities. Again, their studies are limited to their own employees, just as our study is limited to classified employees, classified Federal employees, something that we have a responsibility to take a look at.

Mr. GILMAN. Mr. Chairman, if the gentlewoman would yield further, I urge my colleagues to support H.R. 3008. This bill promotes pay equity

and seems to eliminate certain discriminatory wage-setting practices within the Federal civil service. I feel confident that the legislation addresses the Federal Government's role in providing fair and equitable pay and classification systems for women and men in the Federal work force. Incorporated in H.R. 3008 are the best possible elements required to identify discrimination, if it exists, in the Federal Government. Fair treatment and equality at the worksite are goals every employer and employee should strive to attain. It is as vital today to eliminate discrimination as it was over 20 years ago when the Civil Rights Act of 1964 was adopted by this body.

The State of New York and 45 other States have already undertaken action to address the issue of pay equity. Sixteen have initiated or completed studies of their pay systems. The Federal Government's role in pay equity has been far less progressive than the States. It is time for the largest employer in the Nation—our Federal Government—to examine any discrimination practices in its own structure.

H.R. 3008 maintains a high level of objectivity. I believe that the legislation will result in a thorough study of the Federal pay and classification system to determine if they are influenced by discriminatory practices. Such a study has never been conducted in the 60-year history of the classification program. Our Federal workers are entitled to know that they are being treated fairly and that their pay is not subject to discrimination.

Accordingly, in the interests of promoting equitable pay practices and to eliminate discrimination within the Federal civil service I therefore urge my colleagues to support H.R. 3008, and I thank the gentlewoman for yielding.

Ms. OAKAR. I thank the gentleman. He is a very valuable member of the committee, and I thank him for his questions and his remarks.

Mr. LUNGREN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, comment was made on this floor a moment ago that because we had such an overwhelming vote a year ago and since there are some new elements to this bill that perhaps the reason now for people changing their minds is related to the racial inclusion or the minority inclusion.

I am sorry that that was injected into the debate here on the floor. I am sorry that this is what the general debate evidently is going to be, to create the atmoshpere for the discussion of this bill.

By the very admission of the chairman of the relevant committee that we have before us bringing this bill, there were things wrong with the bill that we voted for overwhelmingly. I am astonished. If the bill was go good last time that anybody who would now vote against a version of the bill after last year's edition, if that is the reason why we should not even consider a reconsideration of our vote, why they would change one word, one sentence, one phrase. By their very admission, last year's bill was seriously flawed. Some of us believed that there are other flaws existing, and maybe or maybe not those flaws would be taken care of with the amendments.

But to somehow come here and characterize those of us who want to rethink our position, those of us who may have more knowledge now, those of us who may have paid attention to a ninth circuit ruling on the case in the State of Washington, is astonishing.

What we are talking about here is whether the Federal Government will venture into a new area for the Federal Government, whether it will now attempt to devise some sort of subjective system which says that by these criteria which we establish we will determine the ultimate worth of a particular job.

In fact, in this country the marketplace establishes that and has established that. Where we cannot show specific discrimination with respect to a particular job, where people who are of different sexes are being treated differently within the confines of a specific job, where we are not talking about that particular area, we have never tried to determine how you compare one to the other.

I mean, I may think that football players and basketball players are outrageously paid. I once suggested to someone that when I voted for a pay increase for Members of Congress that there was nothing wrong with Members of Congress being paid one-third of what the average person in the NBA is paid.

I told that to a player who happened to be related to a Member of Congress, and he assured me that that was no longer the case because in the ensuing 6 months we were then paid one-fourth of what the average NBA player was paid.

I mentioned that to someone in my district, and the response of the person in the district was, "Yes, but those people are highly talented."

So what I am suggesting here is that it is in the eye of the beholder.

I went home to my son one day, and I said to him, "Did you see what Moses Malone got paid? Two millon dollars a year." And he said, "Yeah, Dad, but he plays 48 minutes a game."

What I am saying is, we have all sorts of quote/unquote disparities from one job to another that I do not think any subjective panel can go out and therefore decide how you make the comparison if what you do is take out the idea of the marketplace making certain decisions.

So let us not have this debate be in terms of rhetoric about Members or against minorities, Members are against women because they don't adopt the plan that the committee has come forward with.

If I had the truth, if I saw the light, I would present it to you here on this floor. I do not see the truth, I do not have the light in all things.

I try to do the best I can with the issues that are before me.

So let us not characterize this as so black and white that if anybody now changes his or her mind from last year they are doing it and activated by some racial motivation or some ill concern for minorities.

That ill serves this House.

I already thought we had the general debate on this issue some time ago. Evidently that general debate created a construct in which the proponents of the bill do not think they can be successful. So now we have a new atmosphere being created here.

I am very sorry to see it. I hope that we will not see it from now on. Let us look at the amendments as they come forward. Let us look at the substance of the bill, let us do what we are paid to do, even though we are not paid as much as people in the NBA or the NFL or the NHL, we are paid for what we do, make well-reasoned judgments on the facts before us as we see them, and let us not use scare tactics on one side or the other.

I thank the Chairman.

Mr. BURTON of Indiana. Mr. Chairman, will the gentleman yield?

Mr. LUNGREN. If I have any time left I will be happy to yield.

Mr. Chairman, I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. I thank the gentleman for yielding.

Mr. Chairman, I would like to make just one quick observation here, and that is, the gentlewoman in her discussion a while ago indicated that this study was kind of an innocuous thing that we should not be concerned about.

A very similar study was alluded to by my colleague from California.

The CHAIRMAN pro tempore. The time of the gentleman from California has expired.

(On request of Mr. BURTON of Indiana and by unanimous consent, Mr. LUNGREN was allowed to proceed for 2 additional minutes.)

Mr. BURTON of Indiana. Mr. Chairman, will the gentleman continue to yield?

Mr. LUNGREN. I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. I thank the gentleman for yielding further.

Mr. Chairman, a similar study was conducted in the State of Washington,

and because of that study a suit was filed and a $1.1 billion judgment was made, and it was subsequently repealed in a higher court. Now I talked to people at the Justice Department, and they told me that there is absolutely no doubt if this legislation passes that a suit will be filed immediately. And we have 30 times the number of employees that they have in the State of Washington.

Mr. LUNGREN. If I can reclaim my time, can the gentleman tell me who was to pay that $1.1 billion? Was it not the taxpayers of the State of Washington?

Mr. BURTON of Indiana. It was the taxpayers of the State of Washington.

Mr. LUNGREN. So if we are going to talk about something much larger than that, we must presume it is very important and it may very well have severe impact on that person rarely talked about here, the lowly taxpayer.

Mr. BURTON of Indiana. Exactly.

Mr. LUNGREN. I thank the gentleman, and I yield back the balance of my time.

Mr. FORD of Michigan. Mr. Chairman, I move to strike the requisite number of words.

□ 1340

Mr. FORD of Michigan. Mr. Chairman, I rise to support H.R. 3008, the Federal Pay Practices Act of 1985.

There are many misconceptions about this bill that I would like to clear up once and for all.

First, it provides only for a study and nothing more. It does not mandate any new pay system. All we are doing here is taking a long overdue look at the pay classification system, something that has not been done for decades, in an attempt to determine if it discriminates on the basis of sex, race, or Hispanic origin. This is all it does, despite some rather reckless allegations to the contrary.

Earlier this year the Committee on Post Office and Civil Service, by a recorded vote of 18 to 4, ordered the bill reported with an amendment, requiring a Commission on Equitable Pay Practices to include in its report a determination as to whether any portion of any differential in pay between or among occupations may be discriminatory.

The legislation establishes an 11-member bipartisan Commission consisting of representatives of the administration, the Congress, the Federal employee unions, women's organizations, and civil rights groups.

The Commission, in turn, would hire a consultant to conduct a job content analysis of the Federal pay and classification system.

With the Commission acting as overseer, it is contemplated that the study would take 18 months and would determine whether, or to what extent, the classification and wage systems are affected by discrimination based on sex, race, and Hispanic origin. It will include information on pay differentials between male- and female-dominated occupations.

After completing the study, the Commission will submit it to the President and the Congress, along with recommendations for changes. The Commission will cease to exist within 90 days after submitting its report.

So this bill in no way creates a national pay policy or creates a bureaucracy on pay. It does not set down any policy. All it does is say that we should look into pay practices, with professional help, to determine if there is discrimination.

Frankly, I don't see how anyone can object to this, unless there is something that we are trying to hide.

There is no doubt in my mind that the Federal Government has an obligation to determine whether there is discrimination in its pay practices and what can be done to make the system more responsive to the exigencies of our times.

To oppose this measure is to deny even a professional look into pay practices—to deny an enlightened examination of how we as a government determine whether we are treating people fairly when it comes to how we pay them.

I cannot stress enough that this bill is not going to tell anyone how people will be paid. It does not make any changes in pay. It will provide us with nothing more than a guide on which to base later decisions.

It affects only executive branch employees of the Federal Government, not State and local entities or the private sector. It does not create a pay czar to mandate wages for all American workers. It does not establish a stacked commission that will rubberstamp findings of a study. It will not set off a wave of lawsuits against the Federal Government.

It will do only one simple thing—allow us to take a hard, cold look at what is going on so that we in this body can determine if we want to make any changes.

To me, that objective seems both fair and necessary.

Mrs. ROUKEMA. Mr. Chairman, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentlewoman from New Jersey.

Mrs. ROUKEMA. I thank the chairman of the committee and also the author of the amendment for yielding me this time.

For purposes of this discussion, I have two or three what I consider to be friendly questions.

The CHAIRMAN pro tempore. The time of the gentleman from Michigan [Mr. FORD] has expired.

(On request of Mrs. ROUKEMA and by unanimous consent, Mr. FORD of Michigan was allowed to proceed for 3 additional minutes.)

Mr. FORD of Michigan. If the gentlewoman will permit me to let the gentlewoman from Ohio tell me how to answer them, I will be glad to answer them.

Mrs. ROUKEMA. Then I will address them to my good friend from Ohio, and she is my good friend, but she also may know that I have some lingering questions. I listened with interest to your response to Mr. ALEXANDER on the subject of the confusion that has arisen over this bill because of the definition of what is comparable worth and what is pay equity.

So I would like to ask the gentlewoman from Ohio: How do you explain the differences between the two concepts? I ask because I think it is the crux of confusion of many Members of this Congress. Is this comparable worth? If not, what is pay equity, as defined in this piece of legislation? What is the charge of the Commission?

Mr. FORD of Michigan. I yield to the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. First of all, comparable worth is not in the legislation.

Mrs. ROUKEMA. I understand that.

Ms. OAKAR. And, second, if I wanted to do a comparable worth bill, it would not be done in the way the Civil Rights Commission defined comparable worth.

Part of the misinformation, even about that concept, which I heard on the floor today in a 1-minute speech, is that if you take the disparity between a man's wages and a woman's wages, then it is comparable worth, and it is all due to sex-based wage discrimination. Nobody, not even the most zealous advocate of comparable worth, says that, although the Commission on Civil Rights defined the concept in that way.

But the point is, we are talking about a classification system the highest of Federal employees—not basketball players, football players or corporate people, just our classification system—the highest level is a person who is at a GS-18 level, who makes $67,800. The lowest level is a person at the GS-1 level, making $9,000.

We have to take a look at the classification system because we know that certain categories, for example—and this has nothing to do with comparable worth, by the way—are capped. A nurse, for example, who has a doctorate in immunology working at NIH has a cap level of her salary. She can work 40 years for the Federal Government and never make more than $18,000 a year, and because she is classified as a nurse and not an immunologist, she makes $22,000 less.

Mrs. ROUKEMA. If the gentleman from Michigan will yield further, I ap-

preciate what the gentlewoman is saying, and it is for that purpose, I think, that the gentlewoman put in a job content analysis definition.

Ms. OAKAR. Right.

Mrs. ROUKEMA. It is, as I understand it, to take into consideration marketplace pressures.

Ms. OAKAR. That is right. We have two factors. We have the marketplace factor, which is the economic analysis. And, by the way, most of the studies done around the country do not include the marketplace factor we do.

Mrs. ROUKEMA. Now, I have another question.

The CHAIRMAN pro tempore. The time of the gentleman from Michigan [Mr. FORD] has again expired.

Mrs. ROUKEMA. Mr. Chairman, I ask unanimous consent that the gentleman may be allowed to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentlewoman from New Jersey?

Mr. ARMEY. Reserving the right to object, Mr. Chairman, I will not object now, but I would like to make the point, Mr. Chairman, that I, too, like others, did not come here today to repeat the general debate on this bill. But since it has begun, I have, I think, been fairly patient awaiting my turn to be recognized. I would hope I will be recognized very soon after this.

Mrs. ROUKEMA. Mr. Chairman, in light of that, I ask unanimous consent that the gentleman from Michigan [Mr. FORD] be allowed to prceed for 3 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentlewoman from New Jersey?

There was no objection.

Mrs. ROUKEMA. Mr. Chairman, I think it is perfectly legitimate to reopen this discussion because there has been a change of circumstances since we had this original debate. For example, the court of appeals decision has come up, and that is a significant difference, and that is to the point of my second question.

It appeared to me, when the appeals court made its decision, that this would negate or open to further question, in my mind, whether or not it was wise to have such legislation, and I want to hear the gentlewoman's response to this, because the appeals court has now reversed the decision of Washington State, and therefore it is my understanding that the issue will be appealed to the Supreme Court. Pending a Supreme Court decision, it seems to me that we do not yet know whether the study per se will be used as an avenue for further litigation or prima facie evidence in further litigation. So I would like to hear a response to that.

Mr. FORD of Michigan. If I could reclaim my time, let me comment on that.

The study in Washington, or anyplace else, does not create a new cause of action for anybody. The study was simply cited in evidence during the trial. You may know that United Airlines was successfully sued by its female flight attendents a couple years ago and had to pay several million dollars in back pay. Michigan Bell Telephone Co. a few years ago had a similar problem because of discrimination against female telephone operators.

The cause of action is already there for people. All that the study was used for in Washington was evidence of the fact that in some classifications in Washington certain circumstances exist from which the court in evaluating the evidence drew the conclusion that it constituted a violation of their constitutional rights.

Ms. OAKAR. If the chairman will let me quote from the decision—and you should be relieved by the decision—it says:

> A study which indicates a particular wage structure might be more equitable should not categorically bind the employer who commissioned it.

If anything, that court case should relieve you. But the point is, nobody wants to abdicate a Member of Congress responsibility. We have the responsibility to deal with classified Federal employees, not the courts, and it is not my intention in any way, shape or form to see this study be used as a court case; but, if anything, that court case should relieve you.

Mrs. ROUKEMA. If the gentleman will yield further, I understand the court of appeals decision. My concern was with the appeal to the Supreme Court and the pending Supreme Court decision and its application to the results of this study.

Ms. OAKAR. First of all, the whole case had a lot more to do with other things than a study.

Mrs. ROUKEMA. I thank the gentlewoman for her comments, and I thank the gentleman from Michigan for yielding.

Mr. ARMEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. BURTON of Indiana. Mr. Chairman, will the gentleman yield?

Mr. ARMEY. I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. I thank the gentleman from Texas for yielding.

Mr. Chairman, I just want to make a comment about the comment of my distinguished chairman, the gentleman from Michigan [Mr. FORD], that this would not precipitate additional litigation.

The Justice Department told me at one of our hearings, committee meetings, that it is very likely that if we pass the comparable worth or pay equity bill, or whatever you want to call it, that there will be immediate litigation. As a matter of fact, I have here from Mr. William Bradford Reynolds, Assistant Attorney General for the Civil Rights Division of the U.S. Department of Justice, a statement concerning information about this legislation. And on page 5, there are 2 paragraphs I would like to read into the RECORD. It says:

> By mandating a "comparable worth" study of the federal pay structure dependent neither on proof of equal work nor on proof of intentional discrimination, such a bill disregards the long-established principles of pay discrimination under the Equal Pay Act, and goes well beyond the Supreme Court's interpretation of the reach of Title VII in Gunther. In so doing, such a bill gives rise to the very problem Congress sought to avoid in imposing an equal (rather than "comparable") work requirement in the Equal Pay Act.

Then he goes on to say;

> Any such study could be the basis for class-action litigation seeking a judicially mandated restructuring of the Federal Government's pay and classification system.

So litigation is very likely to occur. We have 30 times the number of employees as the State of Washington, and we could conceivably be involved in a $30 billion lawsuit and the taxpayers will bear the brunt of this suit if one should occur, and it very likely will, according to the Justice Department.

Mr. FORD of Michigan. Mr. Chairman, will the gentleman yield?

I will get the gentleman some more time.

Mr. ARMEY. I appreciate that, and I yield to the gentleman from Michigan.

Mr. FORD of Michigan. Did the gentleman say Mr. Reynolds signed that opinion?

Mr. BURTON of Indiana. Yes.

Mr. FORD of Michigan. I am puzzled by the suggestion that he thinks, as an Attorney General and in a very high position over there, that a citizen can bring suit to force the Congress to do anything. Nobody in the Federal Government in the executive branch has the authority to establish pay, grades, or classifications. We do that by statute. And in the absence of congressional action, you cannot change them.

□ 1355

You can bring action against a member of the Government who was applying them improperly, and that has been done from time to time; as a matter of fact, it happens quite frequently. But you cannot bring a suit against the President and tell him to change it.

Mr. ARMEY. If the gentleman would allow me to reclaim my time before it runs out.

Mr. FORD of Michigan. Mr. Chairman, I ask unanimous consent that

the gentleman may have an additional 2 minutes.

The CHAIRMAN pro tempore. Without objection, the gentleman from Texas [Mr. ARMEY] is granted an additional 2 minutes.

Mr. BURTON of Indiana. May I just respond?

I would be very happy to give my distinguished colleague, the chairman of the committee, a copy of this statement and he can read it. I would assume that the U.S. Department of Justice knows a little bit about this problem since they——

Mr. ARMEY. If the gentleman would please allow me to reclaim my time. You know, I am a patient fellow.

Mr. Chairman, I ask unanimous consent that I be restored to my original 5 minutes.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. ARMEY. I thank the Chair. I appreciate that.

Mr. Chairman, I listened with a great deal of interest. As you may know, I am interested in this bill. I first became interested in this bill when I was not a Member of this body during the 98th Congress, and I have followed it with a great deal of interest and I might add, a professional interest, since I still indeed consider myself a practicing economist.

In any event, I think there was a very interesting and important question that was raised in the early moments of this cryptogeneral debate that we have gotten ourselves into. The question is what has changed from the 98th Congress, when indeed there were only six dissenting votes, to this Congress, where there is some concern that perhaps there may not even be enough votes in favor of this proposition to pass it.

Let me address this question of what has changed. Three things have changed, Mr. Chairman. One, time. If you review the experience of this legislation in the 98th Congress, it came and it went like a fleeting dart. The Members scarcely knew what it was they were voting on. They did not understand the proposition, and they saw it as an issue of social policy and never really had the time to understand it as an economic policy issue.

The second thing that has happened, and I might add, by the way, with respect to that, that time has worked on our side in this case, those of us who are concerned about it as an economic issue. Even when I came back from the July recess and we began to debate and work on this issue, most of the Members saw it as only a harmless study designed to promote social policy, and it was only after hours and hours of persuasion that we were able to get them to understand that this is a very serious economic issue that we are dealing with here. Now that is understood.

Second, experience. Will there be lawsuits? Will there not be lawsuits? The fact is, experience tells us there have been lawsuits. Every time a State legislature has passed a study and received that study, there has been a lawsuit.

Ms. OAKAR. Would the gentleman yield?

Would the gentleman name me the 45 State lawsuits that there are——

Mr. ARMEY. If the gentlewoman would—Mr. Chairman, I do not believe I have yielded.

The CHAIRMAN pro tempore. The gentleman from Texas [Mr. ARMEY] controls the time.

Mr. ARMEY. If the gentlewoman would please allow me, because I suffered through a good deal of smoke earlier. If indeed I am creating smoke, let it be my own.

Now, at this point, I am suggesting to the Members look at the experience we have observed. What has it cost the State of Washington already to just find their way back after the lawsuit? How about the State of Illinois where female workers and nontraditional employments had to incur the expense of filing a counterlawsuit to protect the rights to wage increases they had won through normal, collective bargaining practices from the imposition of this kind of bill in Illinois.

So, yes, indeed, our experiences have told us this is a dangerous business we are up to here.

The third thing, of course, is understanding. With the passage of time and the observation of what is really happening in that real world out there, where this kind of a comparable-worth concept is taken too lightly by State legislatures. We understand that it imposes a risk and an expense to the taxpayers, where indeed, even the State will have to incur an enormous expense of taxpayers' money just to prove that they should not be brought under the jurisdiction of such legislation by the courts irrespective of any enacting legislation by the governing bodies of that State. That is the risk that we put the entire government in if we pass this legislation. That is an expense that not only we cannot afford in dollars and sense, but we cannot afford in terms of disruption and discrimination unhappily, against the most courageous and least traditional, most innovative women in the working force today.

The CHAIRMAN pro tempore. Are there further amendments to section 1?

If not, the Clerk will designate section 2.

The text of section 2 is as follows:

SEC. 2. STATEMENT OF PURPOSE.

(a) PURPOSE.—It is the purpose of this Act to determine whether the Government's position-classification system under chapter 51 of title 5, United States Code, and prevailing-rate system under subchapter IV of chapter 53 of such title, are designed and administered in a manner consistent with the general policy, as expressed in title VII of the Civil Rights Act of 1964 and section 6(d) of the Fair Labor Standards Act of 1938, that sex, race, and ethnicity should not be among the factors considered in determining the rate of pay payable to any individual or for any position.

(b) LINKAGE WITH GENERAL SCHEDULE.—In the performance of any comparisons or analyses pursuant to this Act, subchapter III of chapter 53 of title 5, United States Code, under which General Schedule pay rates are established, shall be considered to be part of the position-classification system referred to in subsection (a).

AMENDMENTS OFFERED BY MR. SIKORSKI

Mr. SIKORSKI. Mr. Chairman, I offer several amendments.

The Clerk read as follows.

Amendments offered by Mr. SIKORSKI: Page 2, line 8, insert "(1)" before "whether".

Page 2, line 16, strike out "position." and insert in lieu thereof "position; and (2) whether the Government's appointment and promotion practices with respect to individuals applying for or occupying positions covered by either of the systems referred to in paragraph (1) are generally consistent with applicable provisions of law prohibiting discrimination on the basis of sex, race, or national origin.".

Page 3, line 3, strike out "(a)" and insert in lieu thereof "(a)(1)".

Page 4, line 11, strike out "(2)" and insert in lieu thereof "2(a)(1)".

Page 5, line 17, strike out "(2)" and insert in lieu thereof "2(a)(1)".

Page 10, line 20, strike out "of this Act," and insert in lieu thereof "set forth in section 2(a)(1),".

Page 11, line 6, strike out "2(a)" and insert in lieu thereof "2(a)(1)".

Page 11, after line 9, add the following:

(c) APPOINTMENTS AND PROMOTIONS.—Under the contract, the consultant shall also be required to perform a separate study to carry out the purpose set forth in section 2(a)(2).

Page 12, after line 12, add the following:

The consultant shall also report any findings and conclusions of its study relating to appointment and promotion practices of the Government.

Page 13, line 15, strike out "2(a)" and insert in lieu thereof "2(a)(1)".

Mr. SIKORSKI (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD, and that they be considered en bloc. I do so because the first amendment goes to section 2, but there are additional technical amendments.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. SIKORSKI. Mr. Chairman, the amendment would expand the scope of H.R. 3008 to include a separate study of hiring and promotion practices in the Federal Government to determine whether discrimination exists based upon sex, race, or national origin.

My colleague from Indiana has a substitute amendment which would replace the study set forth in H.R. 3008 with a study of hiring and promotion practices. I disagree with the hiring and promotion study for job content and economic analysis. I do believe, however, that performing a hiring and promotion study is a worthwhile undertaking and would afford the most comprehensive review of possible discrimination in the Federal work force ever undertaken.

It is my intention that the hiring and promotion study should be performed separately from the job content and economic analysis and that the results of the study should be reported separately by the consultant to the Commission on Equitable Pay Practices. The Commission should also set forth any recommendations based upon this part of the study distinct from those which may result from the job content and economic analysis. It is important that the studies proceed independently, since they are designed to review areas of possible discriminatory practices. I have been advised that the same consultant who performs the job content and economic analysis could also undertake the hiring and promotion study without incurring additional costs or requiring a more lengthy study period.

It is also important to note that the hiring and promotion study would include national origin, as well as sex and race. National origin should be interpreted to include those of Hispanic origin and other ethnic groups who may have historically suffered discrimination. In deciding which ethnic groups should be included in the study, the Commission should pay particular attention to applicable court rulings defining the term "national origin." It is my intention that this term be construed as broadly as possible within the limitations of title VII of the Civil Rights Act of 1964.

By adopting this amendment, we will make certain that H.R. 3008 will result in the most exhaustive analysis of possible discriminatory practices within the Federal civil service ever initiated. The current classification and wage systems have not been the subject of a thorough analysis since they were established in 1923, nor has there been a study of hiring and promotion practices of the magnitude set forth in my amendment. For these reasons, this amendment should be adopted and I urge my colleagues to vote for it.

□ 1405

Mr. LIPINSKI. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise for the purpose of entering into a brief colloquy with the floor manager of the bill, the gentlewoman from Ohio [Ms. OAKAR].

Is it the understanding of the chairwoman that the meaning of the term "national origin" in this amendment includes individuals of all ethnic backgrounds that have been historically discriminated against, such as Italian, Polish, German, Irish, Lithuanian, Ukrainian, Yugoslavian, Czechoslovakian, or other ethnic backgrounds?

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. LIPINSKI. I yield to the gentlewoman from Ohio.

Ms. OAKAR. Yes; that is my understanding.

Mr. LIPINSKI. Is it also the understanding of the chairwoman that the consultant selected by the Commission will use this meaning of "national origin" while conducting the study mandated under this amendment?

Ms. OAKAR. That is my understanding, yes.

Mr. LIPINSKI. Mr. Chairman, I thank the gentlewoman from Ohio [Ms. OAKAR]. I stand in strong support of the Sikorski amendment, and ask all my colleagues to support it.

Ms. OAKAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I simply want to commend the gentleman from Minnesota [Mr. SIKORSKI], and the gentleman from Illinois, [Mr. LIPINSKI] as well, for the amendment.

Basically the amendment is a two-part amendment. It includes the amendment that the gentleman from Indiana [Mr. BURTON] has filed in the RECORD which is a review of hiring and promotion practices so that it be an integral part of the study. We think that ought not be a substitute for the study but that is important and we accept that.

Second, there are many other individuals besides those mentioned in the legislation that have come before our committee like custom workers, for example, most of whom are men of various origins, that we ought to take a look at, and I want to commend Mr. SIKORSKI and Mr. LIPINSKI for including that area. We really should do an in-depth analysis with respect to the whole issue of national origin.

So, Mr. Chairman, I accept the amendment. I think it is a good one, and I hope that the members of the minority will agree to accept it.

Mr. ARMEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am trying to make sure that I understand this amendment. I have just recently had it placed in my hands.

As I understand it, what we will do, then, is we will divide the study into two parts. One part will deal with the traditional kind of study that I at least tend to associate with comparable worth—the question, as I think is defined very nicely on page 10 of the bill, that we would examine occupations that have numerical predominance of either sex in juxtaposition to one another, and the second part being the part that returns to existing civil rights legislation that addresses the question of equal access to employment opportunity and equal pay for equal work.

May I ask the framer of the amendment, Is my understanding correct?

Mr. SIKORSKI. Mr. Chairman, will the gentleman yield?

Mr. ARMEY. I yield to the gentleman from Minnesota.

Mr. SIKORSKI. Mr. Chairman, if I understand the gentleman's question, yes, it is a two-part study. It is presumed to be done by the same consultant, with no additional cost and no requirement for time, and so that the results of the hiring promotion study be reported back to the Commission independently and distinct from the economic analysis or the pay equity portion.

In response to the second thrust of the gentleman's question, the study embraces, as set out in the amendment, the goal of looking at whether the Government's appointment or promotion practices with respect to individuals applying for or occupying positions covered by either of the systems, the civil service systems, is generally consistent with applicable provisions of law prohibiting discrimination on the basis of race, sex, or national origin.

Mr. ARMEY. Mr. Chairman, I thank the gentleman for that clarification.

Mr. Chairman, it does appear, then, that we have, I think, the appearance that there is some change here. But we fall back on a problem, at least to me, with the fact that we would still have the study carried out by that one single consultant who would be employed or chosen by that one single Commission comprised primarily of a biased group of people who are already biased themselves in favor of comparable worth. So we still end up ignoring the numerous studies that have been done, and indeed we still ignore the one that is currently under review within the OPM.

I think the intent of the amendment is a very good intent, and might I suggest that given that you have this concern and have expressed this intent, perhaps this would be an excellent time for us to withdraw this bill from consideration and have the committee return to consideration of that study that is currently on the desk of the Office of Personnel Management rather than to have all of that work that has been undertaken in the 30-some-odd studies totally ignored in this process. Perhaps we do intend to move a little too hastily in this area.

Mr. SIKORSKI. Mr. Chairman, will the gentleman yield to me?

Mr. ARMEY. I yield to the gentleman from Minnesota.

Mr. SIKORSKI. If we did that, we would not have the benefit of the gentleman's counsel.

Mr. FORD of Michigan. I would just like to observe that I would be happy to get right on with it.

Mr. ARMEY. Mr. Chairman, a point of order. I understand that I had yielded to the framer of the amendment.

Mr. FORD of Michigan. Mr. Chairman, would the gentleman yield to me?

Mr. ARMEY. I yield to the chairman of the committee.

Mr. FORD of Michigan. Mr. Chairman, if this bill does not pass, I would be left with no alternative than to do what I am being pressed, and have been for 2 years, to do, and that is to begin legislating on the issue. I felt that we ought to have this bipartisan commission give us a basis upon which we might do that legislating.

If you want to have a chance to vote here on legislation on classifications, with the women's groups and the chambers of commerce and everybody else fighting in your office and mine about which amendment they want and which one they do not, we can bring you a bill like that, and that would be the alternative to undertaking this 2-year study. We have that kind of legislation pending before the committee, and I have promised the sponsors of the legislation that if we do not have the study, we will take it up.

Mr. ARMEY. Mr. Chairman, reclaiming my time, neither of us would want to engage in such a disastrous and urgent action.

If I may return to another point, yes, on my part I would like to make this offer. If indeed you did decide to withdraw this bill and go back into the subcommittee and study all of these things, I would be more than happy to come before the committee and provide you with my testimony and give you the benefit of my considerable expertise in the field.

The CHAIRMAN pro tempore. The time of the gentleman from Texas [Mr. ARMEY] has expired.

The question is on the amendments offered by the gentleman from Minnesota [Mr. SIKORSKI].

The amendments were agreed to.

The CHAIRMAN pro tempore. Are there amendments to section 2?

Mr. ERDREICH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to engage the gentlewoman from Ohio [Ms. OAKAR] in a colloquy on the bill.

Some of the earlier colloquy I have heard answers some of the concerns I have had about the impact of what this study would do, and I appreciate those earlier comments. You have made it quite clear that this study would have no impact or is not intended to have impact upon the private sector. I would like to ask a further question, and the question is this:

Does H.R. 3008 create a new standard of discrimination or expand the current civil rights law in any way?

Ms. OAKAR. Mr. Chairman, if the gentleman will yield, again the answer is no. The purpose of the study is to determine whether the Federal Government's pay and classification systems are being administered in a manner consistent with current laws, which prohibit discrimination on the basis of race, sex, and ethnicity. Any new standard would have to be authorized separately by law. This bill does not authorize any corrective action, should the study show that discrimination in the Federal civil service does exist. I would emphasize to the gentleman that this bill authorizes a study, and a study only of the classified employees of the U.S. Government.

Mr. ERDREICH. Mr. Chairman, I thank the gentleman for that response, and I have a final question, if the gentlewoman will continue to respond. On page 15 of the bill, section 10(2)(c) mentions that other factors which are unnamed may be included in an economic analysis of the Federal pay and classification system. Might "other" be considered to include an examination of prevailing market rates as a factor for comparison with Federal wage scales, recognizing that market forces, the competitive market, may be the reason for pay differences?

Ms. OAKAR. I think, yes, that prevailing market rates of pay would be a factor included in the study, as would supply and demand. It is my expectation that these factors would be analyzed by the consultant. Pay scales can reflect the market and be nondiscriminatory.

Mr. ERDREICH. Mr. Chairman, I thank the gentlewoman from Ohio for her clarification.

□ 1415

Mrs. JOHNSON. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the bill.

I thought it might be helpful if early in this discussion, I shared with my colleagues the experience that I had as a State senator and have continued to have as a resident of the State of Connecticut with regard to this matter.

We did some years ago pass a bill entitled "the Objective Job Evaluation Bill," precisely the same study that we are considering passing here today, and I hope we will pass with very broad and overwhelming support as we did in the last session of Congress.

We passed that bill in Connecticut and, as a result of its passage, those people who sat at the collective bargaining table representing the State employees in Connecticut had at their fingertips the data that indicated that there was indeed a discrepancy between the compensation offered to certain categories of employees and the skills required to qualify for those jobs and the responsibilities required of those employees.

Now, it is not difficult to understand why there are such discrepancies. Indeed, my colleague from Texas comments about the influence of the market explain why there were discrepancies. Many years ago when women only had the option of applying for two or three jobs out there in the public and the private sector, there was indeed an oversupply for the limited numbers of opportunities that were available for women. Consequently, the base salary in the 1800's and the 1900's started low. Thereafter, and particularly in States where there has been collective bargaining, salary increases were generally granted on an across-the-board percent increase basis. So you started with an unreasonably low base because the market set that low base, because there was discrimination in our society as to what jobs women could apply for. You started from that base, and then a more enlightened society that finally even gave women the remarkable right to vote did allow them all to apply for other jobs. But by this time, you were stuck with pay traditions that reflected a different attitude and outlook many decades ago in our history.

So what we are seeking through this kind of setting is to gain the information that we need to identify those compensation discrepancies that are the result, in fact, of historic bias in our hiring system which allowed the market indeed to distort the established wage practices. Those of us who have been the recipients of that system are well aware of the disadvantage that it put us at.

What happened in Connecticut is even more important than what you believe were the causes of the original situation. What happened in Connecticut was very simply that instead of agreeing to collective bargaining agreements that provided across-the-board wage increases of 2 percent or 3 percent or 4 percent, the negotiators agreed to across-the-board increases of 2 percent, set aside the rest of the money in what they called in "equity pot," and used the "equity pot" to address the identified disparity between compensation and responsibility that resulted from the information brought to life by the study. In the course of about 6 years now, we have rectified the problems that we identified.

It has been rational process, a fair process. It has dealt with very real problems, and it promises a healthier future for all the employees in Connecticut.

What we are trying to do in this study is merely to study the Federal employees, classification system and to

look at those issues, including market education, merit, seniority and all those other things and how they have influenced and do influence current compensation, and to provide ourselves with the information that we need to evaluate whether or not some factors that historically had influenced compensation schedules continue to influence those schedules at this time in our history.

Mr. ARMEY. Mr. Chairman, will the gentlewoman yield?

Mrs. JOHNSON. I yield to the gentleman from Texas.

Mr. ARMEY. Mr. Chairman, I appreciate the gentlewoman's point of view and I think she has expressed it very well.

There is no question about it, we do look at and understand the tradition and the history of occupational choice and the impact that that has had, giving us the often-cited pay differential.

One of the things that I would admonish the gentlewoman to understand is that, for example, even today as we look at the statistics, that differential if we look at it long enough is diminishing.

The CHAIRMAN pro tempore. The time of the gentlewoman from Connecticut [Mrs. JOHNSON] has expired.

(At the request of Mr. ARMEY, and by unanimous consent, Mrs. JOHNSON was allowed to proceed for 2 additional minutes.)

Mr. ARMEY. Mr. Chairman, will the gentlewoman yield further?

Mrs. JOHNSON. I yield to the gentleman from Texas.

Mr. ARMEY. I just wanted to point out that the younger and the unmarried woman worker in America is diminishing this differential to practically nothing.

What I am suggesting as I respond to this is that change is taking place in an orderly fashion, thanks largely to the civil rights legislation we have had earlier. We do have now, as Newsweek pointed out 2 weeks ago, women moving into nontraditional occupations in droves. We see this.

My concern is if we move to the implementation of the recommendations of a study of this nature that we will remove the pay differential that is now the existing incentive for women to make that jump into the nontraditional occupations and we will thwart this movement and it will have the result of more than ever before locking women into traditional female-dominated occupations, but even under more serious circumstances where they suffer even more competition from men for those jobs. Indeed, you would have a risk then of a de facto compromise of their equal access to work which is guaranteed to them under civil rights legislation.

My point is that I certainly do not want to have anyone suppose that I am indifferent to this historical experience. I am very much aware of it, but this legislation cannot resolve history. It can only affect the future and the future impact on all workers in general, but women workers in particular is indeed a very important concern that I have as I address this legislation.

Ms. SNOWE. Mr. Chairman, will the gentlewoman yield?

Mrs. JOHNSON. Yes, I yield to the gentleman from Maine.

Ms. SNOWE. Mr. Chairman, I thank the gentlewoman for yielding. I want to congratulate her on her statement, because I think she raises an important point here today with respect to this debate and that is what has taken place in the State of Connecticut and 44 other States throughout this country in addition to many, many local governments, who have initiated and implemented pay equity studies.

The CHAIRMAN pro tempore. The time of the gentlewoman from Connecticut [Mrs. JOHNSON] has again expired.

(At the request of Ms. SNOWE, and by unanimous consent, Mrs. JOHNSON was allowed to proceed for 2 additional minutes.)

Ms. SNOWE. Mr. Chairman, if the gentlewoman will continue to yield, it is difficult to understand here today why we have complicated this issue with respect to a job evaluation study of the Federal wage scale, when women are concentrated in lower grades and in some of the lowest salaries offered by the Federal Government.

The fact of the matter is that even the Court of Appeals' decision that was rendered in the AFSCME versus State of Washington, they applauded using job evaluation studies as a diagnostic tool. They applauded employers for using that as a way of evaluating the salaries that are given to employees.

Mrs. JOHNSON. Mr. Chairman, the gentlewoman from Maine is clarifying that this tool has been used in both the public and private sectors fruitfully; is that correct?

Ms. SNOWE. Absolutely. My understanding, in fact, is that it is predominantly in the private sector as a tool for evaluating.

We compare jobs every day. I do not understand why we have decided to complicate this issue on a study of the Federal wage system. We need to know if discrimination does exist. There is no presumption that it does.

The fact is, I think the court case that was rendered with respect to AFSCME versus Washington made some very important points in our favor.

So I thank the gentlewoman for pointing out to us here today what has taken place in the State of Connecticut. I do not understand why we are so afraid to act when 100 State and local governments have taken such actions. There are no adverse consequences to knowing what is there and what we need to address in future years.

Mrs. JOHNSON. Mr. Chairman, I thank the gentlewoman from Maine. I appreciate her point.

The purpose of this whole bill is to develop information and certainly a democracy is based on the fundamental belief that education will lead to enlightened decisions.

I think for us to fear the development of information is for us to contradict our own most basic traditions and beliefs.

I would also like to comment, though, on the earlier statement made by the gentleman from Texas.

The CHAIRMAN pro tempore. The time of the gentlewoman from Connecticut has again expired.

(By unanimous consent, Mrs. JOHNSON was allowed to proceed for 2 additional minutes.)

Mrs. JOHNSON. The comment made by my colleague, the gentleman from Texas, earlier that this might interfere with the motivation of women to move into nontraditional jobs is a complicated one.

First of all, I am delighted with the progress women are making, moving into the nontraditional jobs, and I would not for a moment do anything that would undercut their motivation for doing so; however, I do not want them to make that decision because they are underpaid in a job in which they are assuming a great deal of responsibility and that required them to get a lot of education to get that job.

The gentleman also alluded to the fact that in the private sector adjustments are going on and, indeed, they are. One of the problems in the public sector is that we have classification systems that are more rigid, and it is more difficult for those classifications to respond to change in the contemporary world than in the private sector. That is one of the reasons why it is very important that we do this study in order to reflect contemporary knowledge and information and use it to change the classification system, which is more rigid than the compensation system that most companies in the private sector use to determine compensation for their employees.

Mr. ARMEY. Mr. Chairman, will the gentlewoman yield?

Mrs. JOHNSON. Yes, I yield to the gentleman.

Mr. ARMEY. Mr. Chairman, I appreciate the gentlewoman's point. Indeed, we do want to be very careful about all these things.

I think perhaps the gentlewoman from Ohio used a rather unfortunate example of the kind of problems the gentlewoman is trying to correct. She talked about a Ph.D. who found herself stuck in an $18,000 a year job.

Now, the normal thing that we would expect anybody with the credentials of a Ph.D. to do if they did not like their $18,000-paying job would be to use those credentials to move on to another one.

I would hate to think that we would study the possibility or the feasibility of reworking the entire Federal system in order to relieve Ph.D.'s from the burden of taking their credentials and seeking out another job, perhaps in the private sector. This is indeed the problem that I have encountered many times in the university.

The CHAIRMAN pro tempore. The time of the gentlewoman from Connecticut has again expired.

(By unanimous consent, Mrs. JOHNSON was allowed to proceed for 2 additional minutes.)

Mrs. JOHNSON. I yield to the gentleman to complete his statement.

Mr. ARMEY. I might also point out that indeed where we have seen this methodology employed, for example, the Willis methodology employed in Washington, we have seen the bias in favor of white-collar workers with as it were paper credentials, as opposed to blue-collar workers with the credentials that one gets in the school of hard knocks or on-the-job training; so we do have risks here of hurting the very people we are most concerned to try to help.

Ms. OAKAR. Mr. Chairman, will the gentlewoman yield?

Mrs. JOHNSON. I yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Chairman, first of all, I want to commend the gentlewoman from Connecticut and the gentlewoman from Maine [Ms. SNOWE] and my minority leader, the gentleman from Indiana [Mr. MYERS], the gentlewoman from Rhode Island, CLAUDINE SCHNEIDER, and others. This is truly a bipartisan bill and we always intended it to be that. I really appreciate the work that they have done on the bill.

I wanted to comment about the gentleman's remarks relative to having women have opportunities in so-called nontraditional jobs. The fact of it is that we have had testimony from a number of States who have implemented their study, like the State of Minnesota. They found that it cost the State payroll less than 1 percent per year phased in over a 4-year period.

One of the interesting things they found was that 15 percent of those individuals who had their salaries adjusted did in fact move into the so-called nontraditional jobs. That was an incentive for them, once their morale and productivity was picked up, because they were treated more fairly. They in fact pursued nontraditional jobs; so in no way does this factor to correct inequities limit the opportunities for women and minorities, and men, for that matter.

Mrs. JOHNSON. Mr. Chairman, I thank the gentlewoman from Ohio.

I think it is absolutely true that we cannot shrink from our responsibility to develop information and to develop a fair compensation system because someone might not be motivated to get a different job. We must do what is right and just for our employees.

□ 1430

The CHAIRMAN pro tempore. The time of the gentlewoman from Connecticut [Mrs. JOHNSON] has again expired.

(On request of Mr. ARMEY, and by unanimous consent, Mrs. JOHNSON was allowed to proceed for 2 additional minutes.)

Mr. ARMEY. Mr. Chairman, will the gentlewoman yield?

Mrs. JOHNSON. I yield to the gentleman from Texas.

Mr. ARMEY. I thank the gentlewoman for yielding.

Mr. Chairman, I believe that is an important observation, but yet there is a larger observation because, as we know, as the price of anything goes up there will be less of it purchased, the law of downward sloping demand, one of the first things we generally learn in our economics courses.

Indeed, even in San Francisco, as we know, the mayor of San Francisco had to veto the legislation because she foresaw that the $76 million deficit that would come as a consequence of that to her city would result in a possible layoff of 800 employees. If, indeed, we raise costs, cause inflation, lay off workers, then indeed we reduce employment opportunities for all people, and especially within a rigid system such as ours, the first-in/first-out would probably damage a good many people.

Ms. OAKAR. Mr. Chairman, will the gentlewoman yield?

Mrs. JOHNSON. I yield to the gentlewoman from Ohio.

Ms. OAKAR. I thank the gentlewoman for yielding.

Mr. Chairman, the gentleman mentioned San Francisco and what the mayor vetoed. What she vetoed was not a pay equity study or changing salaries. She vetoed a meal program. They apparently wanted meals paid and she said no, that was asking a little too much, and that is pretty much what she vetoed.

Ms. SNOWE. Mr. Chairman, will the gentlewoman yield?

Mrs. JOHNSON. I yield to the gentlewoman from Maine.

Ms. SNOWE. I thank the gentlewoman for yielding.

Mr. Chairman, I would like to make a further point here, because I know the issue has been raised with respect to what the consequences are of implementing a study of the Federal wage system.

I might suggest that we do not need a study to sue the Federal Government. We do not need a study to sue others. Individuals can initiate those actions on their own, irrespective of any study that might be conducted. So that is the issue here today.

One thing further: I think we are overlooking the major objective, and that is to undertake a study that will analyze why women are concentrated in the lowest grades and in the lowest salary positions in the Federal Government. I think that is a respectable objective that this Congress could support.

The CHAIRMAN pro tempore. Are there further amendments to section 2? If not, the Clerk will designate section 3.

The text of section 3 is as follows:

SEC. 3. COMMISSION.

(a) ESTABLISHMENT.—There shall be established a commission to be known as the Commission on Equitable Pay Practices.

(b) COMPOSITION.—The Commission shall be composed of—

(1) the Comptroller General of the United States;

(2) the Director of the Office of Personnel Management:

(3) 5 members appointed by the President, of whom—

(A) 2 shall be appointed upon the recommendation of the Speaker of the House of Representatives in consultation with the minority leader of the House of Representatives; and

(B) 2 shall be appointed upon the recommendation of the majority leader of the Senate in consultation with the minority leader of the Senate; and

(4) 4 members appointed by the Director of the Office of Personnel Management, of whom—

(A) 2 shall be appointed to represent the respective labor organizations representing (as exclusive representatives) the largest and the second largest numbers of individuals in Government service;

(B) 1 shall be appointed to represent employee organizations having as a purpose promoting the interests of women in Government service and composed primarily of women holding positions covered by either of the systems referred to in section 2(a); and

(C) 1 shall be appointed to represent employee organizations having as a purpose promoting the civil rights of individuals in Government service and composed primarily of minority group members holding positions covered by either of the systems referred to in section 2(a).

To the extent practicable, appointments under this section shall be made with a view toward maintaining a fair balance in the interests represented and the functions to be performed by the Commission.

(c) CONDITIONS FOR MEMBERSHIP.—(1)(A) Members of the Commission appointed under paragraph (3) or (4) of subsection (b) shall not be officers or employees of the United States.

(B) If any member of the Commission referred to in subparagraph (A) becomes an officer or employee of the United States, that individual may continue as such a

member for not longer than the 15-day period beginning on the date that such individual becomes such an officer or employee.

(2)(A) A member of the Commission appointed under subsection (b)(4) shall be the highest elected official (other than an officer or employee of the United States)—

(i) of the organization (or 1 of the organizations, if that individual represents 2 or more organizations) which that individual represents;

(ii) who agrees to serve.

(B) If any member of the Commission referred to in subparagraph (A) ceases to be the highest elected official from an organization who is eligible to serve on the Commission, that individual may continue as such a member for not longer than the 15-day period beginning on the first day that such individual ceases to be so eligible.

(3) An individual on leave without pay from the Government shall not, for purposes of this subsection, be considered an officer or employee of the United States.

(d) COMPENSATION.—(1) Members of the Commission shall receive no pay on account of their service on the Commission (except as provided in paragraph (2)), but while away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service under section 5703 of title 5, United States Code.

(2)(A) Subject to subparagraph (B), a member of the Commission appointed under subsection (b)(3) may be paid at a rate not to exceed the daily equivalent of the rate of basic pay payable for level IV of the Executive Schedule for each day (including travel time) the member is engaged in the performance of services for the Commission.

(B) A member of the Commission appointed under subsection (b)(3) shall receive no additional pay by reason of service on the Commission for any period during which that individual continues to serve after becoming an officer or employee of the United States.

(e) TIMING OF APPOINTMENTS; QUALIFICATIONS.—All appointments under paragraphs (3) and (4) of subsection (b) shall be made within 20 days after the effective date of this Act and shall be made from among individuals who are especially qualified to serve on the Commission by virtue of their expertise and experience.

(f) VACANCIES.—A vacancy in the Commission shall be filled in the manner in which the original appointment was made and shall be subject to any conditions which applied with respect to the original appointment.

(g) CHAIR AND VICE CHAIR.—The Chair and Vice Chair of the Commission shall be elected by the members of the Commission.

(h) QUORUM.—Six members of the Commission shall constitute a quorum.

(i) MEETINGS.—The Commission shall meet at the call of the Chair or a majority of its members, but at least once every 2 months.

(j) NONAPPLICABILITY OF LIMITATION.—Appointments under this section shall not be considered for purposes of section 5311(b) of title 5, United States Code.

(k) TERMINATION OF COMMISSION.—The Commission shall cease to exist 90 days after completing the applicable requirements of section 7.

The CHAIRMAN pro tempore. Are there any amendments to section 3?

AMENDMENT OFFERED BY MR. BURTON OF INDIANA

Mr. BURTON of Indiana. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BURTON of Indiana: In section 3, strike out subsections (b), (c) and (d) and insert in lieu thereof the following:

(b) COMPOSITION.—The Commission shall be composed of 14 members, of whom—

(1) 7 shall be appointed by the President in consultation with the majority leader of the Senate and the minority leader of the House of Representatives; and

(2) 7 shall be appointed by the President upon the joint recommendation of the Speaker of the House of Representatives and the minority leader of the Senate.

To the extent practicable, appointments under this section shall be made with a view toward maintaining a fair balance in the interests represented and the functions to be performed by the Commission.

(c) CONDITION FOR MEMBERSHIP.—(1) Members of the Commission shall not be officers or employees of the United States.

(2) If any member of the Commission becomes an officer or employee of the United States, that individual may continue as such a member for not longer than the 15-day period beginning on the date that such individual becomes such an officer or employee.

(3) An individual on leave without pay from the Government shall not, for purposes of this subsection, be considered an officer or employee of the United States.

(d) COMPENSATION.—Members of the Commission shall receive no pay on account of their service on the Commission, but while away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service under section 5703 of title 5, United States Code.

In section 3(e), strike out "paragraphs (3) and (4) of".

In section 3(h), strike out "Six" and insert in lieu thereof "Eight".

Mr. BURTON of Indiana (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. BURTON of Indiana. Mr. Chairman, I would like to introduce an amendment to H.R. 3008. My amendment would eliminate the Commission bias, in the bill. The present Commission is obviously stacked in favor of those who would use the comparable worth standard to ratify their current presumption of discrimination. Instead of having a Commission tilted toward one side, I propose that Democrats appoint seven members, and that Republicans appoint seven members.

In H.R. 3008 the President and the Director of the Office of Personnel Management must appoint people from specified groups. The result of this is to set up a loaded Commission.

We should have an open-minded Commission. The appointment of seven members by each party is as fair as possible. How can either party honestly justify more than an equal share for themselves? I hope that all of us can support this evenhanded approach.

This amendment takes an already political process and makes it reasonable. The goal of this amendment is "A fair balance in the interests represented." We should all be in favor of that goal and this amendment.

Mrs. BOGGS. Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Indiana because I think that with the exception of committee amendments, we should oppose the various amendments to this bill.

The gentlewoman from Ohio has worked very hard within the committee to make certain that the bill that has come out is a simple, well-balanced bill that is very bipartisan in its approach. The Commission that has been authorized by the bill is a bipartisan Commission with an independent consultant who will, indeed, offer the findings of the Commission to the Congress and to the President in a very unbiased manner.

I feel that we have gone a little astray from what this legislation truly does, and I think the time has come, before we consider any other amendments, to have a pithy explanation of the essential elements of this bill.

Mr. Chairman, I would like to yield to my colleague, the gentlewoman from Louisiana [Mrs. LONG] for an explanation of what H.R. 3008 portends to do.

Mrs. LONG. I thank my colleague for yielding.

Mr. Chairman, I do think we are getting a little off the track and I would like to go back and review exactly what it is we are talking about.

Today, the House will be completing its consideration of H.R. 3008, the Federal Equitable Pay Practices Act of 1985. This bill is an amended version of legislation which passed in the last Congress by an overwhelming vote of 413 to 6.

H.R. 3008 calls for a study of the Federal pay and classification systems to determine whether discrimination based on sex, race, or Hispanic origin is present. The language contained in H.R. 3008 is consistent with civil rights policies enacted 20 years ago which prohibit sex and race-based wage discrimination. The bill is designed to provide information and guidance to policymakers on pay practices within the Government. As a study of the Federal Government, it will have no effect on any private corporation or any State or local government. The study will use both job content analysis and economic analysis methods of

job evaluation as was recommended by the General Accounting Office.

I think the bipartisan Commission established in the bill is a very fair one. It is responsible for reporting to the President and Congress on findings made by an independent consultant. It is a fair Commission and I think, too, that we are forgetting that this bill is a result of a need demonstrated by the fact that extensive hearings were held on it. We would not be here today working so hard for this were it not for the fact that the need has been demonstrated.

I think that a study is in order. It has been a long time in coming and I certainly commend the staff and the gentlewoman from Ohio for the very hard work she has put into this effort.

Mrs. BOGGS. I thank the gentlewoman for her comments and I would like, Mr. Chairman, to say that the bipartisan aspect of this bill was certainly demonstrated by the 18-to-4 vote by which it was reported out of committee.

When we consider that 45 States, including our own State of Louisiana, have indeed undertaken this kind of study that the bill urges, the overwhelming show of support is not surprising. I might say that the gentlewoman from Connecticut and the gentlewoman from Maine represent the north and northeastern part of the United States, and my colleague, the gentlewoman from Louisiana and I perhaps represent the southern axis, so we know the bill has nationwide support. It is not surprising that it has this support.

What is surprising is the campaign of distortion that has been waged against the Federal Equitable Pay Practices Act. The reaction from the bill's opponents is way out of proportion to what this simple, straightforward and just legislation aims to accomplish—a study to ensure that our civil service wage and classification systems are free of bias.

I urge my colleagues to defeat any amendments that are not committee amendments to this bill.

Mr. ARMEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to thank the gentleman from Indiana [Mr. BURTON] for his amendment. I know he has worked very hard on this legislation and, of course, I realize that the committee has worked very hard in drafting that bill which will give them exactly what they want. Indeed, that begins in this section of the bill with exactly that Commission they want. One does not have to have a Ph.D. in anything to read this bill and to realize that when we get done with this Commission, we will have six members of the Commission who are already on record as being proponents of the concept of comparable worth and five who may or may not be.

□ 1440

Obviously, there is no desire for a fair commission.

But I was distressed about another thing I heard just a moment ago, the recommendation that we reject all of the amendments that might be offered. It seems to me fairness, which is something obviously we are all clamoring for here, begins with an open mind, a consideration.

Is it possible we do not have the perfect bill? We did not have it in the 98th Congress. We did not have it in the committee and some changes were made. There have been changes brought to the floor by the committee today to make further changes.

Is it conceivable, is it conceivable that some of us who have taken so much of our time and our interests and our expertise to study this bill with respect to its alleged objectives, is it conceivable that some of us might have a better idea, and perhaps those ideas, having been heard, might be acceptable to this body. Or should we just at the outset, before we hear them, draw a conclusion that we will accept none of them?

Let me talk about a couple of other points. Will this be confined to the Federal sector or not? Eleanor Smeal does not think so. Eleanor Smeal said at a press conference called by the distinguished gentlewoman from Ohio, Ms. OAKAR, Eleanor Smeal said first the Federal Government, then we will move on the private sector.

And in yesterday's New York Times, the distinguished gentlewoman is quoted as saying that she believes the Federal Government should be a bellweather for the private sector. I understand that there is legislation regarding the private sector that has already been submitted to this body.

Yes; we have real concerns about the extent to which this idea spreads. You know, I have been a student of the behavior of the private sector, and going back at least to World War II, one of the things we can see is every bad habit you see, every bad business practice you see in the private sector is an idea they have gained from the public sector, from the Government. And this looks like the genesis of another bad idea for the private sector.

Is there widespread support? In a poll taken just last July, we find that over 80 percent of the women that were polled favor enforcement of existing civil rights legislation and only 18 percent would choose the passage of additional laws.

I am suggesting to you that not only do the Members of this body have a better understanding of this legislation, but the public at large understands this legislation and in particular, the working women of America understand this legislation, and they do not want this legislation.

But if indeed the legislation should be passed, let us at least examine the amendments and see if it is possible that we might find a way to make it less pernicious to the public interest.

Mr. BURTON of Indiana. Mr. Chairman, will the gentleman yield?

Mr. ARMEY. I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. Mr. Chairman, I want to follow up on one comment you made, and that is that this is going to be the catalyst for legislation involving the private sector on the comparable-worth issue. I just wanted to get your opinion on what that would do, as an economist, to the entire private sector, and whether or not this would end up in socializing the private sector to a degree?

Mr. ARMEY. Well, yes, as a matter of fact, and it is because I am an economist that I have been concerned over this legislation. One, it will be inflationary, irrespective of any testimony to the contrary. One of the best definitions is paying people more money for the same or less work. This will do that. And two, it will be disruptive.

But more than anything else, it will give an agency or an organization of the Federal Government the authority to set wages by job classification, and that is a dangerous precedent for us to set in the public sector.

The CHAIRMAN pro tempore. The time of the gentleman from Texas [Mr. ARMEY] has expired.

Mr. BURTON of Indiana. Mr. Chairman, I ask unanimous consent that the gentleman have 30 additional seconds.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Indiana.

Mr. ROBINSON. Mr. Chairman, I object.

Ms. OAKAR. Mr. Chairman, in fairness, I would ask my friend not to object at this point.

Mr. ROBINSON. With all due respect, I have heard enough. I object.

The CHAIRMAN pro tempore. Objection is heard.

Ms. OAKAR. Mr. Chairman, I move to strike the requisite number of words.

I yield to the gentleman from Indiana [Mr. BURTON] for 30 seconds.

Mr. BURTON of Indiana. I thank the gentlewoman for yielding. I do not understand the gentleman's concern about this, but he has the right to object.

My concern is that we are heading in a direction where we are going into uncharted waters, and nobody in this country wants to see socialism. When you start putting a Government agency or commission in charge of deciding what different jobs are worth, I think you are treading in very precari-

ous waters, and I think this is a mistake. That is one of the reasons I pursued this with the previous speaker.

Ms. OAKAR. Mr. Chairman, I rise in opposition to the amendment, as a capitalist Member of Congress.

Let me just say that one of the things we did was work out a compromise with my friend from Indiana.

In the original bill last year, which was passed overwhelmingly, the makeup of the Commission was comprised of five labor organizations representing Government workers and OPM.

This year, with the help of the minority leader of the committee, we changed the makeup of the Commission. The Commission's current composition ensures that it is a balanced group representing all interests. As outlined in the bill, the Commission would consist of the Comptroller General of the United States, who, by the way, is appointed by the President; the Director of the Office of Personnel and Management, who, by the way, is appointed by the President; five members appointed by the President, two upon recommendation from the Speaker, two upon recommendation from the majority leader of the Senate. After consulting with the minority leaders of both bodies, four members appointed by the Director of OPM, again appointed by the President, representing Federal labor groups, women's groups, representing federally employed women and civil rights organizations with an interest in Federal employees.

The bill also stipulates that the members of the Commission should have expertise and experience in Federal compensation practices.

The amendment offered by the gentleman from Indiana [Mr. BURTON], my friend, would base the selection of the Commission on party affiliation, ensuring that the Commission would be partisan. We do not want to do that.

In addition, the Commission proposed by my friend from Indiana would preclude participation by the Director of the Office of Personnel Management and the Comptroller General of the United States. OPM has responsibility for Federal personnel practices and policies and should be represented on the Commission. The GAO has the experience and expertise because of its prior work in this area to facilitate the study.

Furthermore, the amendment of my friend, the gentleman from Indiana [Mr. BURTON] does not require or recommend that the Commission members be experienced in conducting studies of this nature. So the gentleman's amendment, which was previously rejected by the Committee on Post Office and Civil Service, and disrupts the nonpartisan balance of the present composition of the Commission, is unacceptable.

I therefore urge the rejection of the amendment offered by the gentleman from Indiana [Mr. BURTON] because frankly we changed the makeup of the Commission in compliance with my friend from Indiana, Mr. MYERS.

Mrs. SCHNEIDER. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I yield to the gentlewoman from Rhode Island [Mrs. SCHNEIDER].

Mrs. SCHNEIDER. I thank my colleague for yielding. I would like to commend her on her reasonable approach and her analytical and thorough assessment of the makeup of this Commission, because I think it has been a point of some confusion.

I also want to congratulate the gentlewoman for her willingness to compromise and to come forward with what I believe to be one of the most fair and equitable approaches to structurally providing a mechanism whereby we can accomplish the ultimate goal, and that is of doing a study. So I commend my colleague, and I likewise urge the defeat of this amendment.

Ms. OAKAR. I thank my friend.

Mr. MYERS of Indiana. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I am happy to yield to the minority leader of the subcommittee.

Mr. MYERS of Indiana. I thank my Chair for yielding. To confirm what she has said, the original bill that you did introduce was unsatisfactory as far as I was concerned in composition. I must admit, if I had sole responsibility of appointing a commission, this would not be the composition of a commission that I would appoint. However, this was a compromise. It is not what you would have liked, either. The authors of this legislation did not like this, either.

But since legislation is an art, if that is what it is, of compromise, it is the best that either side could come out with.

I thank the gentlewoman for yielding.

The CHAIRMAN pro tempore. The time of the gentlewoman from Ohio [Ms. OAKAR] has expired.

Mr. ARMEY. Mr. Chairman, I ask unanimous consent that the gentlewoman from Ohio [Ms. OAKAR] be given 2 more minutes.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. ROBINSON. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. MYERS of Indiana. Mr. Chairman, I move to strike the requisite number of words.

I yield to the gentleman from Texas [Mr. ARMEY].

Mr. ARMEY. I appreciate the gentleman yielding.

I suppose I may border on the facetious here, and I certainly do not mean to. I take this as a very serious subject. But we have heard so much talk about compromise, and we combine that talk with fairness and, of course, we all like compromise, and we all like fairness. But look at what we are talking about here.

First of all, we have a committee that has a disproportionate number of members on your side of the aisle to the membership in the House, and so in effect you outnumber us. And we have a committee that has a sense of unified position with a minority of members of that committee taking that position, which is generally the case.

So in effect, what we have done is to obtain a majority compromise with a minority to create a commission that has a majority of membership that represents the point of view of the majority of the committee, and that, in my estimation, is hardly a fair compromise.

Mr. FORD of Michigan. Mr. Chairman, will the gentleman yield?

Mr. MYERS of Indiana. I yield to the chairman of the Committee on Post Office and Civil Service, the gentleman from Michigan [Mr. FORD].

Mr. FORD of Michigan. I would like to correct one thing on the record. I believe that the ratio of the Committee on Post Office and Civil Service is below the ratio in the House. We have one more Republican to Democrat than we should have, but as the chairman, I have no objection to it because I have full confidence in the Republican Members of that Committee. And nobody on my side has complained that the Republicans are theoretically overrepresented on the committee.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. MYERS of Indiana. I yield to the gentlewoman from Ohio.

Ms. OAKAR. I just wanted to say one of the things that we attempted to do in working closely with the minority Members was to have witnesses who opposed the bill and those who are for the bill appeal at our hearings, and we tried to be eminently fair about it. Frankly, it is true that I had the votes to work my will through the committee, but I do not think we should operate that way. That is why we worked out this compromise, and I think the Commission is not drafted the way I would have wanted. But it is a compromise. It was equally compromised in this case, and I appreciate my distinguished minority leader yielding on that.

Mr. ARMEY. Mr. Chairman, will the gentleman yield?

Mr. MYERS of Indiana. I yield to the gentleman from Texas.

Mr. ARMEY. If you would please, I would like to at least reclaim my face a little bit. I think the distinguished chairman of the committee made a very good point and I commend him for his failure to raise an objection to that. This is indeed one of the few committees, and I did not realize there were any committees where such ratios existed. And I have to say in all fairness, you did get me on that one.

But, in fact, on the committee, the majority of the members do, indeed, support the comparable-worth concept, and a compromise worked out by the committee membership, as evidenced by the number of Republicans speaking on behalf of the bill. We are still a little edgy and I appreciate it.

I do want to be sure that we do not make too big a thing of a compromise with the odds stacked in that favor.

Mr. MYERS of Indiana. Reclaiming my time, I do not think necessarily because you have a majority and a minority party, that there must be differences of opinion. There need not be an adversary and a proponent in every case.

There are going to be some areas here, and as I researched it, there are some areas that I do not agree with in the legislation and we have talked about it. But again, this legislation was a compromise. It is not the ideal.

But I am going to talk about this later. This is certainly not the dangerous bill that some have portrayed it to be, and I am concerned and alarmed by the misrepresentation by some organizations throughout the country and some from within this body.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. MYERS of Indiana. I yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Chairman, I will submit for the RECORD, as long as one organization has been mentioned, a list of 31 different women's organizations from the League of Women Voters, to the American University Professors and the National Commission on Working Women, which endorse H.R. 3008. The list shows a real cross section of women across this country who suport this bill.

Mr. Chairman, I submit that for the RECORD:

The Congressional Caucus for Women's Issues.
The Congressional Black Caucus.
The Congressional Hispanic Caucus.
AFL-CIO.
The National Federation of Business and Professional Women.
National Education Association.
American Nurses Association.
League of United Latin American Citizens.
National Political Congress of Black Women.
Amercian Federation of Government Employees, AFL-CIO.
American Association of University Women.
Communication Workers of America, AFL-CIO.
Service Employees International Union, AFL-CIO.
Leadership Conference on Civil Rights.
Federally Employed Women.
National Federation of Federal Employees.
National Women's Political Caucus.
League of Women Voters.
National Commission on Working Women.
Mexican American Women's National Association.
American Federation of State, County, and Municipal Employees, AFL-CIO.
Public Employees Department, AFL-CIO.
Industrial Union Division, AFL-CIO.
Women's Equity Action League.
National Organization for Women.
National Treasury Employees Union.
Americans for Democratic Action.
American Civil Liberties Union.
International Ladies Garment Workers Union, AFL-CIO.
National Committee on Pay Equity.
Federal Managers Association.
National Association of Social Workers.

□ 1455

Mr. MYERS of Indiana. And I do not belong to a single one of those organizations, but I still support the legislation.

Mr. BARTON of Texas. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in strong support of the Burton amendment. I had not intended to speak on its behalf, but due to the debate that has just transpired, I thought it might be educational for the Members of this body to see just what this Commission is composed of.

Remember that there are going to be a total of 11 members. Two of those members are going to be appointed upon the recommendation of the Speaker of the House; one would assume that those two members would be predisposed to voting in favor of the gentlewoman from Ohio's idea about what comparable worth is.

Four are going to be appointed by the Director of the Office of Personnel Management. On the surface, one would think that they might be open minded and fair; but when we look at the four that the Office of Personnel Management director must appoint, we see a different story. We find out that two of those members must represent the respective labor organizations representing, the largest and the second largest number of individuals in Government labor unions. One shall be appointed to represent the employee organization, having as a purpose promoting the interests of women in Government service, and composed primarily of women holding positions covered by either of the systems referred to. One shall be appointed to represent employee organizations having as a purpose promoting the civil rights of individuals in government service, and composed primarily of minority group members.

Now, these four members that the Director of OPM is going to appoint are honest individuals; they are individuals of highest integrity; but the very fact that they represent labor organizations and organizations of this type indicate they are going to be predisposed to make recommendations that may not be nonbiased in the truest sense of the word.

Therefore, I think that Mr. BURTON's amendment to appoint a more equitable and fairer Commission should be supported and we should vote in favor of it.

Mr. FORD of Michigan. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I find an interesting sort of an anomaly involved in me constantly defending the Republicans here today, but the implication of what is being said is that if you have seven Democrats and seven Republicans appointed by some test that establishes that fact, that the Republicans would not appoint anyone who is a representative of a labor organization, representing Government employees, and the Republicans would not appoint anybody from an employee organization promoting the interests of women, and the Republicans would not appoint anybody representing employee organization promoting civil rights.

Now I submit that that is not what the experience we have had with Republican nominations to commissions of this kind is, and I think it is unfair to suggest as some have that the makeup of the commission indicates that these would be more Democrats than Republicans.

For that reason, I rise to the defense of the Grand Old Party, which is having enough trouble these days.

Mr. BURTON of Indiana. Will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman.

Mr. BURTON of Indiana. I think the point that my colleagues were trying to make was that because the selections by OPM and by the President would be limited to certain categories, that the Commission would be stacked; and my amendment says seven Republicans and seven Democrats, and gives the President a lot more latitude in who he can pick.

Now I have a great deal of confidence in the President's judgment, and I am sure that the people he picks are going to have expertise in this area; he is not going to just pick somebody off the street.

So seven Republicans and seven Democrats would give us a fair Commission, I feel confident.

Mr. FORD of Michigan. The gentleman does not believe that he can find a Republican woman associated with women's rights or a member of a minority group associated with civil rights who is a Republican?

51-059 O-86-45 (Pt. 19)

Phyllis Schlafly would not take very kindly to what the gentleman is saying.

Mr. BURTON of Indiana. Do not put words in my mouth.

Will the gentleman yield further?

Mr. FORD of Michigan. One of the groups involved is the National Federation of Business and Professional Women. When last checked, that was a woman president, a Republican woman. Open and overt. Practices it in public.

Mr. BURTON of Indiana. If the gentleman will yield further.

Mr. FORD of Michigan. I yield to the gentleman.

Mr. BURTON of Indiana. I am sure that there are going to be some competent people picked for that Commission, as it is currently preceived.

What I am saying is, as the gentleman from Texas [Mr. BARTON] said earlier, that the selections are so limited that it is bound to be stacked if we follow the proposed legislation.

Mr. MYERS of Indiana. Will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman.

Mr. MYERS of Indiana. I hesitate to prolong this, Mr. Chairman, but I think if you had seven and seven you would have a deadlock and probably not accomplish anything; maybe that is what is wanting to be done here, but in fairness, if you want anything at all you almost have to have one over a balance; one way or the other. I do not know which way this will roll out; I will suspect it will roll out the way that the proponent of this amendment is suggesting.

Nevertheless, the minority members, if they are unsatisfied or dissatisfied with the report, can always write minority views as we do in committee. My goodness, we get rolled here all the time as minority Members, but we have every right to still write minority views; and then we, after the report comes back to us, we as individual Members of this Congress, if we ever have to act on the suggestions from this report, then we can side with the minority if we want, or you in the majority can side with the minority, or we can side with the majority; but at least every view will be expressed, and we are not precluded from doing so.

Mr. FORD of Michigan. I thank the gentleman for those comments, and I would simply like to observe that this Commission's final product, it seems to me, will have more credibility if it is on its face made up of people selected by the President because of the positions of presumed knowledge and background that they have than because of their particular party preference.

In the one case the gentleman has them branded right off the bat as people who got their jobs because they could be identified with one of the two major political parties, as distinguished from people who were selected because they run the Office of Personnel Management or they run the GAO or anything else.

It just does not seem rigth to denigrate this kind of a Commission, which we are trying to give the outline of and the structure of a group that would have credibility when you look at the report, that they know what they are talking about; that they know how to develop something like this that will mean something.

I would not like to legislate and have somebody, say by a 7-to-5 vote, the Democrats decided that this recommendation ought to be done with this class, and by a 7-to-5 vote the Republicans decided something else.

The CHAIRMAN pro tempore. The time of the gentleman from Michigan [Mr. FORD] has expired.

(On request of Mr. BURTON of Indiana, Mr. FORD of Michigan was allowed to proceed for 1 additional minute.)

Mr. BURTON of Indiana. Will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman.

Mr. BURTON of Indiana. The gentleman brought up one interesting point in your comments just now, Mr. Chairman, and you mentioned the GAO. There is going to be a member of the GAO possibly serving on the Commission.

My question is, if you have a member of the GAO serving on the Commission, how can they be expected to audit the Commission if requested to do so by Congress? Is not that a conflict of interest?

Mr. FORD of Michigan. If I said that, I misspoke. I am not talking about a member of GAO or an employee of GAO sitting on the Commission.

Mr. BURTON of Indiana. If the gentleman will continue to yield, I think the bill provides that a member of the GAO can be appointed to the Commission. Is that not correct?

Mr. FORD of Michigan. Well, the Comptroller General will designate a person, and presumably somebody he knows.

Mr. BURTON of Indiana. If the chairman will yield further, I am not trying to raise a red herring here. I feel there would be a possible conflict of interest if there was somebody from GAO on that Commission and we wanted to have an audit. How would it be done?

Mr. FORD of Michigan. Well, the President appoints the Comptroller General, and I am sure that if he thought there was any conflict of interest going on, he would take care of it.

The CHAIRMAN pro tempore. Is there further discussion?

The question is on the amendment offered by the gentleman from Indiana [Mr. BURTON].

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. BURTON of Indiana. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 150, noes 272, not voting 12, as follows:

[Roll No. 349]

NOT VOTING—12

Addabbo	Early	Marlenee
Brown (CA)	Gingrich	Savage
Dickinson	Kildee	Wright
Dingell	Lungren	Wyden

□ 1520

Mr. COMBEST changed his vote from "no" to "aye."

Mr. ERDREICH changed his vote from "aye" to "no."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN pro tempore. Are there further amendments to section 3? If not, the Clerk will designate section 4.

The text of section 4 is as follows:

SEC. 4. POWERS OF THE COMMISSION.

(a) DIRECTOR; TECHNICAL ADVISORS; DETAILS FROM OTHER AGENCIES.—(1) The Commission—

(A) may appoint and fix the pay of a director without regard to chapter 51 and subchapter III of chapter 53 of title 5, United States Code, except that the rate of basic pay payable to the director may not be equal to or exceed the rate payable for GS-18 of the General Schedule; and

(B) shall procure the services of not less than 3 and not more than 5 experts under section 3109 of title 5, United States Code, to serve as a source of technical advice for the Commission.

(2) Upon request of the Commission, the head of an agency may detail, on a nonreimbursable basis, any of the personnel of such agency to the Commission to assist the Commission in carrying out its responsibilities under this Act.

(b) HEARINGS; OBTAINING INFORMATION; SUBPOENA POWER; MAIL; SUPPORT SERVICES.—(1) The Commission may, for the purpose of carrying out this Act, hold such hearings and sit and act at such times and places, take such testimony, and receive such evidence, as the Commission considers appropriate. The Commission may administer oaths or affirmations to witnesses appearing before it.

(2) The Commission may secure directly from any agency any information necessary to enable it to carry out this Act. Upon request of the Commission, the head of such an agency shall, to the extent permitted by law, furnish such information to the Commission.

(3)(A) The Commission may issue subpoenas requiring the attendance and testimony of witnesses and the production of any evidence that relates to any matter under investigation by the Commission. Such attendance of witnesses and the production of such evidence may be required from any place within the United States at any designated place of hearing within the United States.

(B) If a person issued a subpoena under subparagraph (A) refuses to obey such subpena or is guilty of contumacy, any court of the United States within the judicial district within which the hearing is conducted or within the judicial district within which such person is found or resides or transacts business may (upon application by the Commission) order such person to appear before the Commission to produce evidence or to give testimony relating to the matter under investigation. Any failure to obey such order of the court may be punished by such court as contempt thereof.

(C) The subpoenas of the Commission shall be served in the manner provided for subpoenas issued by a United States district court under the Federal Rules of Civil Procedures for the United States district courts.

(D) All process of any court to which application may be made under this section may be served in the judicial district in which the person required to be served resides or may be found.

(4) The Commission may use the United States mails, and receive administrative support services from the administrator of General Services, in the same manner and under the same conditions as other agencies.

(5) Any member of the Commission may, if so authorized by the Commission, take any action which the Commission is authorized to take under this subsection.

Mr. BONER of Tennessee. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in strong support of H.R. 3008, the equitable pay practices in the civil service.

I commend Representative MARY ROSE OAKAR for sponsoring this important measure and I would like the record to show that I was a cosponsor of Representative OAKAR'S original measure this session, H.R. 27. Unfortunately, I missed the chance to have my name listed as a cosponsor of H.R. 3008.

Mr. Chairman, according to the Census Bureau, the average earnings for year-round, full-time female workers were only 66 percent of the earnings of men. Women employed by the Federal Government earn an average of 62.8 percent of the wages of their male counterparts. In addition, Office of Personnel Management data indicate that women working in the Federal Government are concentrated in fewer occupations than are men, and that these positions are ranked at lower grade and pay levels. This data are quite startling.

We cannot merely assume away the possibility that these wage gaps are the result of discrimination. Certainly we owe it to our Federal employees to explore this issue. There has never been a full and complete study of the Federal pay and classification system since its inception and, like many of my colleagues, I believe it is time we had such a study.

H.R. 3008 mandates such a study—a study to determine whether Federal employees are affected by discrimination on the basis of sex, race, or ethnic origin.

Only Federal job classifications will be studied and the recommendations will be limited to the Federal civil service. The study will be conducted by an 11-member bipartisan Commission which, after 18 months, will report its findings and recommendations. I do not believe that this study will be an easy one to conduct. The issue of discrimination and the ways by which it can be measured are admittedly difficult. But we should not shrink from a challenge to explore what is clearly evidenced by the Census and Office of Personnel Management data.

With the Commission's report, Congress will be provided with a complete and accurate review of the wage gap which exists between men and women in the Federal civil service and whether that gap is the result of factors of sex, race, or ethnicity. If the Commission finds that the Federal civil service is marked by discrimination, Congress should move quickly to end it. As already stated by many of the propo-

nents of this measure, equity and fairness must continue to be our goal.

I again commend Representative OAKAR and the other members of the Post Office and Civil Service Committee for bringing this important measure to the floor.

AMENDMENT OFFERED BY MR. KINDNESS

Mr. KINDNESS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KINDNESS: On page 8, line 23, strike the language beginning with the word "that" through to "Commission" on line 24, and insert in lieu thereof: "to which the Commission is entitled under subsection (b)(2)"

Mr. KINDNESS. Mr. Chairman, this will not take very long. If I may just take a moment to focus on it, I appear before the committee at this point as a watchdog from the Committee on the Judiciary.

Mr. Chairman, the purpose of this amendment is simply to limit the materials that can be required to be produced pursuant to a subpoena issued by the Commission to that kind of information to which the Commission is entitled under existing law under the preceding paragraph under which they are authorized to request information.

I think it is questionable whether a temporary commission should have subpoena power, to begin with; and as a member of the Committee on the Judiciary I do concern myself with such things, but I am satisfied that the Commission does have, under the terms of this bill, to go to court in order to enforce a subpoena, and there is an opportunity at that point for anyone questioning the scope of the subpoena to have a hearing. Therefore, I do not feel that the subpoena power is excessive here. I would only have questioned initially whether a temporary commission should have such subpoena power at all.

This amendment, however, Mr. Chairman, does not go so far as to question that subpoena power, but only to limit it to that information to which the Commission is entitled under existing law. I believe it is important for the amendment to be offered and for the bill to be corrected in this respect because we are dealing essentially with personnel records here. The Privacy Act comes into play, the Freedom of Information Act interplays with the Privacy Act, and we want to be assured that personnel records of Government employees are sufficiently protected in accordance with existing law and that we do not create an exception here.

I have discussed the amendment with the gentlewoman from Ohio and the gentleman from Indiana on each side of the aisle, and I would yield to the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. Mr. Chairman, I would like to just say to the gentleman that I agree with his analysis. It was never the intent of the legislation to in any way go beyond the existing law. So I am certainly willing to accept the amendment. It is a reasonable amendment. I would be happy to accept it.

Mr. KINDNESS. I thank the gentlewoman.

Mr. MYERS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Indiana.

Mr. MYERS of Indiana. I thank the gentleman from Ohio for yielding. The minority does accept the amendment. As the gentlewoman from Ohio has said, it was never the intent of the committee to ever give any extra authority to the Commission, and what the gentleman is doing here was the intent of the committee but the gentleman clarifies and certainly limits that authority to subpoena, and we support it.

Mr. KINDNESS. I thank the gentleman for that support.

I yield to the gentleman from Texas [Mr. ARMEY].

Mr. ARMEY. I thank the gentleman for yielding.

Mr. Chairman, if I might inquire of the gentleman, when he limits the Commission to subpoena authority to information they are entitled to under law, does that prohibit them, then, from making a subpoena to obtain information from the private sector, from private-sector employers?

Mr. KINDNESS. The Commission is authorized under subsection (b)(2) to request information from any agency to enable it to carry out this act, so it is limited to the purposes of this act and information that is in the possession of any agency of the U.S. Government; therefore, it does not reach the private sector.

Mr. ARMEY. Is the gentleman satisfied that that limits it to the Federal Government, as opposed to State and local governments?

Mr. KINDNESS. I understand the meaning of "agency" to be codified in title 5 of the United States Code, whereas it is defined very specifically to include the agencies of the U.S. Government and does not include State or local government agencies or any private entity.

Mr. ARMEY. I thank the gentleman.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Ohio [Mr. KINDNESS].

The amendment was agreed to.

The CHAIRMAN pro tempore. Are there further amendments to section 4? If not, the Clerk will designate section 5.

The text of section 5 is as follows:

SEC. 5. CONSULTANT.

(a) LIST OF QUALIFIED CONSULTANTS.—The Comptroller General of the United States shall prepare and, as soon as practicable after the Commission is established, submit to the Commission a list of at least 5 consultants which, on the basis of their impartiality, expertise, and experience, the Comptroller General considers appropriate to conduct the study under this Act. Selections under this subsection shall be made in accordance with the laws and regulations governing procurements by agencies generally.

(b) FINAL SELECTION.—The selection of a consultant to conduct the study under this Act shall be made by the Commission from among the consultants included on the list prepared under subsection (a).

AMENDMENTS OFFERED BY MR. ARMEY

Mr. ARMEY. Mr. Chairman, I offer two amendments, one of which is to section 6, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN pro tempore. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. ARMEY: Page 10, strike out lines 4 through 21, and insert in lieu thereof the following:

SEC. 5. CONSULTANTS.

(a) LISTS OF QUALIFIED CONSULTANTS.—(1) The President, the Comptroller General of the United States, and the committee of employee representatives under paragraph (2) shall each prepare and, as soon as practicable after the Commission is established, shall each submit to the Commission a list of at least 5 consultants which, on the basis of their impartiality, expertise, and experience, are considered by the authority involved to be appropriate to conduct a study under this Act. Selections by each authority under this subsection shall be made in accordance with the laws and regulations governing procurements by agencies generally and shall be made by each such authority acting independently of the others.

(2) In order to prepare one of the lists under this subsection, there shall be established by the Director of the Office of Personnel Management a committee consisting of 3 individuals, each of whom shall be the highest elected official (agreeing to serve) from the employee organization representing (under exclusive recognition of the Government) the first, second, and third highest numbers of Federal employees, respectively. An individual shall not be deemed to be an employee of the Government, and shall not receive pay, by reason of being a member of the committee.

(b) SELECTION OF 3 CONSULTANTS TO PERFORM INDEPENDENT STUDIES.—(1) The Commission shall select 3 consultants under this subsection, with 1 consultant being selected from each of the lists prepared under subsection (a). Each consultant so selected shall (acting independently of the other 2 consultants) conduct a study in accordance with the requirements of section 6 of this Act.

SEC. 6. STUDY REQUIREMENTS.

(a) METHODOLOGY.—In order to carry out the purpose of this Act, the Commission shall provide, by contract with each of the consultants selected under section 5(b), for the conduct of

Page 11, strike out lines 14 through 20, and insert in lieu thereof the following:

(1) a copy of the report prepared by each of the consultants selected to perform a study under this Act; and

(2) comments of the Commission relating to each such report.

(b) INFORMATION TO BE PROVIDED IN EACH CONSULTANT'S REPORT.—Included in each report referred to in subsection

Page 13, line 19, strike out "the" and insert in lieu thereof "each".

Page 13, line 20, insert "accompanying" before "comments,".

Mr. ARMEY (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Ms. OAKAR. Mr. Chairman, I reserve a point of order, because I want to make sure I have all copies of the amendments we are talking about here.

The CHAIRMAN pro tempore. The gentlewoman from Ohio [Ms. OAKAR] reserves a point of order on the amendments.

Mr. ARMEY. Mr. Chairman, the gentlewoman's concern is that she has both amendments. They are here. The amendment to section 5 relates to the consultants, and the other relates to the study requirements. I believe the gentlewoman should have them together. They should be attached to one another.

Mr. Chairman, my problem here is with respect to the use of only one consultant and the methodology that would be applied. Instead of using only one consultant, this amendment would use three consultants acting independently. The President, the Controller General and a group of employee representatives chosen from the three largest Federal employee unions will each prepare a list of five consultants based upon experience and expertise. From those three groups of five, the Commission will choose one from each group. Each consultant acting independently will conduct a study in accordance with the requirements of section 6.

Now, the reason I offer these amendments is that, indeed, as a professional economist who has done considerable research in this area, I realize how subjective such work must necessarily be. Indeed, it is very difficult to come up with a scientific methodology by which we could conduct such studies. I think, if nothing else, the Willis methodology employed in Washington State demonstrates the dangers of such subjectivity and the extent to which even the criteria employed by a single consultant might have a substantial bias in favor of one work classification as opposed to another. In this case, blue-collar workers were considerably disadvantaged by the methodology of this single consultant. In this case, we would have three studies. As we employed these three studies, we could use various methodologies and various forms of empirical data bases. I am very concerned about the extent to which the data itself can be objectively obtained. But to the extent that we are able, we should have every possible effort.

□ 1535

Now, as I looked at the Commission's makeup and the amendment we just passed, I am concerned that we would still have a Commission that has a membership that has a bias in favor of the comparable worth concept. Who would they select for that one consultant? I am deeply concerned that indeed they may select, for example, Mr. Willis.

If Mr. Willis, whose name has gotten around and who is probably the most well known consultant in this area were to be selected, he would carry that bias that he displayed in his methodology in Washington State against blue-collar workers into the Federal level. I think this would be a terrible disadvantage for large numbers of workers, and end up with difficulties like we have seen for example in the Illinois case, where female employees were compelled to file a countersuit to assure that their rights would not be overridden by the methodology.

The empirical base is extremely important. Where does it come from? As we consider this bill and review the hearings that have been before it, I am concerned about the large quantities of research and study that have been done largely from the academic community with respect to such things as time use analysis and so forth, that have been overlooked already. I see no evidence of a great deal of research that has been carried out in this whole area from across the Nation, having been presented in the Willis methodology.

Indeed, what bothers me most about the Willis methodology is that it seems that Mr. Willis is more of a practitioner of scenario than he is of science. We run that risk.

In this case, we have three alternative consultants from whom we could compare results and come up with some kind of an analysis, one even regarding the feasibility and the possibility of achieving any degree of science in this whole area. We would avoid the possibility of the procedures necessarily locking us into a consultant and a methodology that would automatically come to a conclusion. These are the kinds of things I think we need to do.

The CHAIRMAN pro tempore. The time of the gentleman from Texas [Mr. ARMEY] has expired.

(By unanimous consent, Mr. ARMEY was allowed to proceed for 30 additional seconds.)

Mr. ARMEY. The proponents have emphasized that they want only a study. What I am suggesting then is let us get the maximum opportunity for science to be involved in that study. I am afraid this bill does not present that opportunity.

The CHAIRMAN pro tempore. Does the gentlewoman from Ohio [Ms. OAKAR] insist on her point of order?

Ms. OAKAR. Mr. Chairman, just to make sure, are we speaking of the Armey amendment No. 38?

The CHAIRMAN pro tempore. The Chairman understands that is the one the Clerk read; yes.

Ms. OAKAR. Mr. Chairman, I withdraw my point of order.

Mr. FORD of Michigan. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I have heard the gentleman in our committees and elsewhere indicate that he considers himself to be the most fiscally conservative Member of this body. I think I have heard him say that with some sense of pride, and he has been rapidly, since the first of the year, convincing me that that is true. I am somewhat shocked.

Here we authorize people to go out and spend money to hire a consultant. Now that means a consulting firm. I do not know how many people it is going to be, what it is going to cost, but we have been hiring consultants with my committees and I want to tell you, they do not come cheap.

Here the gentleman wants us to hire three companies to do this for the Commission. There is no committee around here that has the gall to try to hire three sets of consultants at one time. We just never would get that through the House Administration Committee. So what he does is literally triple the cost, because that is the most costly part of the conduct of this study; the professional assistance that the consultant will have.

Why is it necessary to have this kind of check and balance of conflicting or at least contrary potential results from the studies? Where does the Commission get its consultant? If you look at page 10 of the bill, you will see section 5, "Consultant." The Comptroller General of the United States shall prepare, and, as soon as practicable after the Commission is established, submit to the Commission a list of at least five consultants which, on the basis of their impartiality, expertise, and experience, the Comptroller General considers appropriate to conduct the study under this Act."

We do not even let the Commission decide who is an appropriate person to do the study. The Comptroller General will give them a list of people that

he will qualify by their expertise and experience and lack of bias, and from that list, they will select their consultant.

Now, that seems to me to provide all the protections that the gentleman thinks or seems to think he would get by having three competing consultants working at the same time. A few moments ago the gentleman expressed a notice of concern about the possibility of having subpoenas bothering people. Well, how would you like to be an agency head that has on Monday, consultant "A" coming into your agency saying I want 10 people to give me all your personnel records and go over them with me. On Wednesday, consultant "B" comes in, and then the following Monday consultant "C" comes in and you have to go over the same ground three times. That is like having the Internal Revenue visit your place of business three times. That then becomes also cumbersome because we are going to have three sets of consultants taking up time necessarily with the Federal agencies that they are going to get the information from their personnel records.

I think that at best, amendment adds nothing but expense and would be, I suppose, characterized as being good in the sense that it spreads more wealth around amongst the kind of people who sell this consulting, and at worst, it is mischievious.

Final Selection. The selection of a consultant to conduct the study under this Act shall be made by the Commission from among the consultants included on the list prepared under subsection (a).

They cannot appoint anybody except someone who is on the list prepared by the Comptroller General. I can think of no more responsible agency in the Government to give that authority to and no agency that is more highly trusted, regardless of what administration is in, no one has ever questioned the integrity of the Comptroller General in handling matters of this kind. I think that the committee has wisely reposed that authority in the Comptroller General to make those determinations. They are particularly well equipped professionally to do this better than any of the members of a commission perhaps, individually or collectively might do it on their own. It is a reasonable protection; I think that it is adequate. Therefore I urge the body to vote down the amendment.

Mr. Chairman, I yield the balance of my time to the gentleman from Texas [Mr. ARMEY].

Mr. ARMEY. I thank the gentleman for yielding to me.

Mr. Chairman, I would first like to address the gentleman's point about my fiscal conservatism. No doubt about it. There are two costs we incur here; up front, the study costs, and then later the implementation costs. If we come up with the wrong study, we can make that implementation cost several times over what it can be with a better study. We need to guard against the possibility of unnecessary and grossly inflated implementation costs.

The second point is the gentleman's remarks regarding the Comptroller General. I suppose the Comptroller General and his agency is as highly regarded, respected, and trusted by the American people as any agency of the Federal Government.

The CHAIRMAN. The time of the gentleman from Michigan [Mr. FORD] has expired.

(On request of Mr. ARMEY and by unanimous consent, Mr. FORD of Michigan was allowed to proceed for 30 additional seconds.)

Mr. FORD of Michigan. I continue to yield to the gentleman.

Mr. ARMEY. Mine allows the President, at least, who is clearly much more highly trusted by the American people to offer up one of the consultants. Where I come from, we just do not trust Federal agencies too much to either be competent or dependable.

□ 1545

Ms. OAKAR. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendment offered by the gentleman from Texas [Mr. ARMEY], and I associate myself with the chairman's remarks.

Mr. Chairman, I believe that it would be contradictory to have competing consultants. The consultant, as outlined in the bill, is going to be chosen by the Commission. I am not going to be part of the Commission, nor is the gentleman, but we do not tell the Commission what consultants to choose. The gentleman mentioned a couple of consultants that I have never heard of, and frankly it would not be the decision of this body as to who the consultants would be.

The gentleman may not trust Federal agencies, but Dr. Donald Devine headed up OPM. I am assuming the gentleman had some confidence in the former OPM Director and has some confidence in the current OPM Director, who would be part of the makeup of that group which would choose the consultant.

So I think what the gentleman is really doing is adding on a triple layer of bureaucracy that is unnecessary. I think the gentleman is really adding to the cost, of the study. The cost by the way, would be folded in on OPM's budget.

Furthermore, we do have a provision in the bill for technical assistance, three to five people are included. So I really think that this is being expensive. The gentleman's amendment would cost a lot of money in adding three as opposed to one consultant by this bipartisan Commission.

Mr. Chairman, I certainly hope we defeat this. I think it adds to the bureaucracy and certainly adds a lot to the cost.

Mr. HORTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I have served on two Commissions, one the Procurement Commission, and then I served on the Paperwork Commission, and I was elected the Chairman of the Paperwork Commission, which completed its work in 1977.

In most instances Commissions appointed by the Congress do not have this restriction on them, namely, the restriction that the Comptroller General, who is the head of the General Accounting Office, which is an arm of the Congress, is to make a list, and as was said by the chairman of the committee, the gentleman from Michigan [Mr. FORD], the statutes specifically provide that the Comptroller General shall select five, based on their impartiality, expertise, and experience, and that is a very important requirement that the legislation has provided. Then they make that list, and it is from that list there is selected a consultant. And so I think that this is an unusual requirement, taking it away from the Commission but leaving the selection to the Commission from a list made up by the Comptroller General.

Then the other point is that it does duplicate, and I think it would be very counterproductive to have three groups of people trying to act in this capacity.

Mr. Chairman, I oppose the amendment, and urge its defeat.

Mr. Chairman, today we are considering legislation that would require a study of the Federal work force to determine if discrimination exists, and to what degree, within the Federal work force. Stronger legislation passed this body last year by a vote of 413 to 6. But a court decision in Washington State has caused many to distort both the intention and the implications of H.R. 3008.

This legislation has been criticized as being everything from "unnecessary" to "the first step toward socialism." It isn't either of these. It is a study. It is a study designed to examine what may be a problem within the Federal work force. Quite honestly, I am surprised at the campaign being waged against its enactment. We in this body and in this country should not be afraid to study an issue, an issue that may point out some very serious problems. And then, again, it may not. I have heard criticism of the Commission, of definitions in the bill, and the like. I worked with Congresswoman OAKAR in revamping areas where criticisms were leveled. Many of these were addressed, which is why we are today considering H.R. 3008 instead of the

earlier version of this legislation, H.R. 27. H.R. 3008 incorporates improvements that were suggested and then accepted by proponents of this bill.

And on the issue of Washington State, many people contend that this State's "comparable worth" study was implemented by the courts. That decision was appealed. It was overturned. It isn't valid anymore. But that isn't the point. If we refuse to study this or any area out of fear over possible court action, the implications extend far beyond a study of discrimination in the Federal work force. Perhaps we shouldn't study or investigate anything. If we do, a court somewhere may implement its findings, or may use the information as a basis for all or part of its decision, or the study may be used as a basis for litigation.

Litigation is a fact of life in this country, and I am thankful that it is. Regardless of what we do, discrimination will continue to be the focus of attention in the courts. And it should be. Maybe there is a problem in the Federal work force. Maybe we should do something to correct the problem. Maybe there isn't, and maybe we shouldn't. We won't know for sure, or to what extent, unless and until we examine this area. Such a study of the Federal work force hasn't been conducted in decades. I'm not afraid of a study, and I'm voting for the bill. I hope my colleagues will do the same.

Mr. ARMEY. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I am glad to yield to the gentleman from Texas [Mr. ARMEY].

Mr. ARMEY. One of the things that I am confident you will find if you have three different studies is that you will have three different conclusions.

Mr. HORTON. Well, that may be.

Mr. ARMEY. In scientific inquiry, whenever you have that result, you have a measure of the degree to which you are not dealing with a scientific subject. This is a subjective process. The final decision under this bill concerning who will carry out the process of study is biased in favor of final selection by an already existing biased Commission, and I can almost guarantee you that we are going to end up in this case with a study that recommends the implementation of a very, very costly program of Government wage administration.

Mr. HORTON. Mr. Chairman, reclaiming my time, the point I am making is that the Commission makes the decision, not the consultant. All the consultant is going to do is make recommendations to the Commission, and for us to require the Commission to have three consultants is, I think, very expensive and not necessary. I think it is counterproductive, and I urge the defeat of the amendment.

Mr. ARMEY. Mr. Chairman, if the gentleman will yield for one further point, he is exactly right, and my point, too, is that the Commission, which is loaded six to five in favor of comparable worth, will make the decision.

Mr. MYERS of Indiana. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Years ago, when I first came here, one of the senior Members of Congress, one that we all remember, told me that if you want to kill an issue, if you really want to kill an issue, provide for a study. I guess this study might kill the issue, I do not know.

It has been said here by many people that it is a bad idea to have this study, that it is not good. If that is true, then if three consulting firms make three studies, it would be three times as bad.

We are all concerned about the cost of this study or any other study. I do not know how many consulting firms there are in the country, but for the life of me, I do not know how in the world we can come up and say that three studies by consulting firms are better than one if one is already bad.

If there is nothing else, the direct cost of three studies by three consulting firms is going to be tremendous. But there is an indirect cost, and that is the cost by the agencies that will have to testify before the consulting firms or at least provide information, as the committee chairman, the gentleman from Michigan, has provided here. Those of us who serve on committees are often told by agencies that have to come before us as committees of this Congress of the tremendous number of hours that it takes them in preparing for their testimony to come before our subcommittees and our committees, of the number of hours it takes to appear before several committees in this body, and then they have to duplicate it to go to the other body. They tell us of the preparation time as well as the time to come down here. Now we are asking those agencies that are going to have to present their criteria and their information to these consulting firms to do it three times. I think it is unreasonable, and I do not think we should vote yes for this amendment.

I am not trying to criticize the gentleman from Texas. I am sure he means well, and possibly he has more experience than any of us here. He has advised us that he is the most senior Member here as an economist. But I would have to question this. I am not an economist. I am just an old country farmer, but I would not want to plow a field three times, I am telling you that. Once it has been plowed, it has been plowed, and I am not going to waste my fuel plowing it three times. That is what we are asking here, for them to plow it three times.

Mr. BARTON of Texas. Mr. Chairman, will the gentleman yield?

Mr. MYERS of Indiana. I yield to gentleman from Texas.

Mr. BARTON of Texas. Mr. Chairman, I am not an old country farmer, but my grandparents were, and it has been my experience that sometimes my grandfather had to plow more than once to get the weeds out.

Mr. MYERS of Indiana. Well, we have other systems here to get the weeds out if you find them out there, and that is what this committee is all about, to find where the weeds are. If you cannot see them, you cannot plow them out. That is what this Commission and this consulting firm is doing. It identifies where the weeds are, if they are there. That is all we are asking. Let us find the weeds.

The CHAIRMAN pro tempore. The question is on the amendments offered by the gentleman from Texas [Mr. ARMEY].

The amendments were rejected.

The CHAIRMAN pro tempore. Are there further amendments to section 5?

If not, the Clerk will designate section 6.

The text of section 6 is as follows:

SEC. 6. STUDY REQUIREMENTS.

(a) METHODOLOGY.—In order to carry out the purpose of this Act, the Commission shall provide, by contract with the consultant selected under section 5(b), for the conduct of a study under which job-content analysis and economic analysis shall be applied with respect to a representative sample of occupations in which either sex is numerically predominant, any race is disproportionately represented, or either ethnic group is disproportionately represented.

(b) COMPARISONS.—In performing the study, comparisons shall be made—

(1) both within the same system (as referred to in section (2)(a)) and between the respective systems (as so referred to); and

(2) both on an intra-agency and on an interagency basis.

The CHAIRMAN pro tempore. Are there any amendments to section 6?

If not, the Clerk will designate section 7.

The text of section 7 is as follows:

SEC. 7. REPORTING REQUIREMENTS.

(a) DEADLINE.—The Commission shall, not later than 18 months after the date of its establishment, submit to the President and each House of Congress—

(1) a copy of a report which shall be prepared by the consultant selected to perform the study under this Act; and

(2) comments of the Commission relating to such report.

(b) INFORMATION TO BE PROVIDED IN CONSULTANT'S REPORT.—Included in the report referred to in subsection (a)(1) shall be a detailed statement of the findings and conclusions of the consultant, pursuant to its study, with respect to differentials in rates of basic pay between or among occupations compared on the basis of sex, race, and ethnicity, including—

(1) a list of any groups of occupations with respect to which differentials were found although the work performed in the respective occupations comprising any such group involved skills, effort, responsibilities, qualification requirements, and working

conditions which, while not identical, were equivalent in totality;

(2) the extent to which any differentials identified under paragraph (1) can be accounted for by the application of job-content and economic analyses; and

(3) the extent to which any differentials identified under paragraph (1) cannot be accounted for by the application of job-content and economic analyses.

Any portion of a differential identified under paragraph (1) which cannot be accounted for by the application of job content and economic analyses is inconsistent with the general policy expressed in section 2(a) that sex, race, and ethnicity should not be among the factors considered in determining any rate of pay.

(c) COMMISSION COMMENTS.—(1) Included under subsection (a)(2) shall be recommendations by the Commission concerning appropriate measures for eliminating any differentials under subsection (b) if, and to the extent that, such differentials cannot be accounted for by the application of job-content and economic analyses.

The Commission shall identify which (if any) of the measures under paragraph (1) may be carried out pursuant to any authority available under existing law, and shall make recommendations for any legislation or administrative action needed to carry out the other measures under such paragraph.

(3) The Commission may not make any recommendation under this Act which involves a reduction in any rate of pay or grade.

(d) ADDITIONAL REQUIREMENT.—The Commission shall furnish a copy of the consultant's report, together with the Commission's comments, to each appointing authority in the legislative branch of the Government.

COMMITTEE AMENDMENTS

The CHAIRMAN pro tempore. The Clerk will report the first committee amendment.

The Clerk read as follows:

Committee amendment: Page 12, strike out line 13 and all that follows through line 18.

The CHAIRMAN pro tempore. Does the gentlewoman from Ohio [Ms. OAKAR] seek recognition on the committee amendment?

Ms. OAKAR. Mr. Chairman, I ask unanimous consent that the reading of the committee amendments be dispensed with, and that they be considered en bloc and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

The text of the remaining committee amendment to section 7 is as follows:

Committee amendment: Page 13, after line 9, add the following:

(4) Also included under subsection (a)(2) shall be the Commission's determination as to whether any portion of any differential identified under subsection (b)(1) which cannot be accounted for by the application of job-content and economic analyses may be inconsistent with the general policy expressed in section 2(a) that sex, race, and ethnicity should not be among the factors considered in determining any rate of pay.

The CHAIRMAN pro tempore. Does the gentlewoman from Ohio [Ms. OAKAR] seek recognition on the committee amendments?

Ms. OAKAR. Yes; Mr. Chairman, I do.

The CHAIRMAN pro tempore. The gentlewoman from Ohio [Ms. OAKAR] is recognized for 5 minutes.

Ms. OAKAR. Mr. Chairman, the amendment to page 12 strikes out language which provides that any differential in rates of basic pay between or among occupations which cannot be accounted for by the application of job content or economic analysis is inconsistent with the policy that sex, race, and ethnicity should not be among the factors considered in determining any rate of pay.

The second committee amendment to page 13 requires the Commission on Equitable Pay Practices to include in its report its determination as to whether any portion of any differential in rates of basic pay between or among occupations not accounted for by the application of job content or economic analysis may be inconsistent with the policy that sex, race, and ethnicity should not be among the factors in determining any rate of pay.

□ 1555

Mr. Chairman, these were amendments that we had in committee and hopefully they are not too controversial.

As a matter of fact, I think that these amendments will relieve some of the concerns expressed by Members.

The CHAIRMAN. The question is on the committee amendments.

The committee amendments were agreed to.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: In section 7, page 12, after line 6, insert the following new subsection and renumber succeeding sections accordingly:

"(b)(2) Such study shall include and measure the impact on wages in similar jobs negotiated under collective bargaining agreements."

Mr. WALKER. Mr. Chairman, I do not think there should be very much controversy about this amendment. We have a longstanding tradition and policy in this country that collective bargaining agreements once entered into should be held as sacrosanct within the employment process. In this particular instance all I am suggesting is that the study ought to include the impact upon the wages of the people involved as it relates to their collective bargaining agreements. I do not think that we ought to allow this study to go forward without some kind of an understanding of how it is going to impact upon the collective bargaining process and upon the collective bargaining agreements.

I do not think it is the intent of the committee, I do not think it should be such certainly the intent of this House to have a study that would have the potential effect of negating what has been won in collective bargaining agreements.

All I am suggesting in this particular amendment is that the study ought to include some indication of what the impact is upon the collective bargaining arrangements within the Government and that we ought to have some feel for that overall impact within the process.

Mr. MYERS of Indiana. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I am glad to yield to the gentleman from Indiana.

Mr. MYERS of Indiana. Mr. Chairman, what does the gentleman mean in his amendment when it says, "shall include and measure the impact on wages in similar jobs?" What is a similar job? Could the gentleman define what he means by a similar job?

Mr. WALKER. It is my understanding that what you are attempting to do is evaluate the similarity of jobs, or at least the equity between jobs. All I am saying is that as you establish those equities that we ought not to allow that kind of equity to impact upon the collective-bargaining process.

Let us say we find that there is equity between one type of job and another particular type of job, within the structure we ought not to allow that determination to be made as opposed to collective-bargaining agreements, at least without defining what the impact would be.

All I am suggesting is that when you have that kind of situation that arises, I think we ought to know the impact as a part of this study.

Mr. MYERS of Indiana. Mr. Chairman, will the gentleman yield further?

Mr. WALKER. Certainly, I am glad to yield.

Mr. MYERS of Indiana. The thing that bothers me with "similar jobs," the concept or the ideal of what the gentleman is talking about here sounds like it is something I could support; but what bothers me is that we have taken out comparable worth in this bill, tried to take everything out related to comparable worth, because I think that would be an impossible thing. If we start comparing jobs here, we handle this tool here and somebody else down the line still handles it, it is still the same job. Obviously, it is not.

Comparable worth is so difficult to define and to enforce, so we have taken comparable worth out, which I think would make it absolutely unworkable; but I am afraid "similar jobs" is bringing back in that old comparable worth thing.

Mr. WALKER. Mr. Chairman, the gentleman from Indiana, of course, interprets the bill somewhat differently than I do. I do not think we have abandoned comparable worth. That is one of this gentleman's concerns about the bill.

We are, in fact, staying with the pay equity concept. Pay equity implies throughout this bill that we are in fact evaluating different jobs in different locations in the Government.

The fact is that in different jobs in different locations in the Government, they may well be covered by different collective bargaining agreements.

I think we ought to know what the impact is on those collective bargaining agreements as a part of this study. That is all the amendment does. It says that as you evaluate all this, that we ought not to have a study that does not include an analysis of the impact on those collective bargaining agreements.

Mr. MYERS of Indiana. Mr. Chairman, will the gentleman yield one more time?

Mr. WALKER. Certainly, I am glad to yield.

Mr. MYERS of Indiana. What about similar jobs, one is negotiated, contracted, the other is not. Would the gentleman bring both of them in under the same wage that was negotiated?

Mr. WALKER. The amendment directly refers to collective bargaining agreements. It is my intent to simply assure that the study could not at some point in the future be used to break a collective bargaining agreement without us at least having some idea of what the impact would be. That is the only intent behind the amendment.

Mr. MYERS of Indiana. Mr. Chairman, if the gentleman will yield one more time, I think that would be understandable; but when it gets into similar jobs is the part that bothers me.

Mr. WALKER. But it also relates directly to the whole collective bargaining arrangement. It seems to me to turn this down is to say that what we are doing is having a study which in fact could have an adverse impact on collective bargaining arrangements, and I cannot imagine that is what the committee wants to do.

POINT OF ORDER

Ms. OAKAR. Mr. Chairman, I raise a point of order on the amendment.

The CHAIRMAN pro tempore. The gentlewoman from from Ohio will state her point of order.

Ms. OAKAR. Mr. Chairman, the amendment offered by the gentleman from Pennsylvania [Mr. WALKER] proposes to expand greatly the scope of the bill under consideration. As such, the amendment violates clause 7 of House Rule XVI and is nongermane.

Mr. Chairman, the bill before us is very limited in scope. It relates only to employees of executive agencies, as defined in 5 U.S.C. 105. The bill is further limited in scope in that the study it mandates is limited to salaries and wages of executive agency employees in positions under the Government's position classification system under chapter 51 of title 5, and the prevailing rate system under subchapter IV of chapter 53 of title 5. Clearly the bill relates only to certain employees in the executive branch and their salaries and wages. It in no way concerns salaries or wages of private-sector employees.

Mr. Chairman, I am frankly surprised that the gentleman would want to expand this study to private-sector employees, which we are not trying to do. Maybe this Chamber ought to get after the gentleman from Pennsylvania.

The amendment offered by the gentleman from Pennsylvania [Mr. WALKER] on the other hand would expand the scope of the study mandated by the bill to "include and measure the impact on wages in similar jobs negotiated under collective bargaining agreements." This obviously would expand the study to cover Government agencies not presently covered, such as the Postal Service and the Tennessee Valley Authority. It also apparently expands the study to cover private-sector wages, which unlike most wages in the executive branch are negotiated under collective bargaining agreements. Thus, the amendment greatly expands the scope of the study and the bill. As such, it is nongermane.

Mr. Chairman, I insist on my point of order.

The CHAIRMAN pro tempore. Does the gentleman from Pennsylvania wish to be heard on the point of order?

Mr. WALKER. I certainly do, Mr. Chairman.

Mr. Chairman, I am a little at a loss to understand to what part of the bill the gentlewoman from Ohio thinks I am amending, because the part of the bill that I am amending refers directly to the consultant's report. In that particular language, it is very, very broad in its coverage as to what the consultant should report about. He is to report on basic pays between or among occupations compared on the basis of sex, race, ethnicity. That is a fairly broad definition.

Then we go over to the section that I am directly amending and we find out that it is going to have a list of groups of occupations, occupations comprising any such group involved in skills, efforts, responsibilities, qualification requirements, working conditions, all kinds of broad categories.

The only thing that my amendment does suggest is that another one of the determinants within that ought to be the existence of a collective bargaining agreement. It has absolutely nothing to do with the private sector, unless this bill involves the private sector, because it refers back to the study that the bill requires be done; so therefore, if we are going to have something in this amendment that refers to the private sector, then we have suddenly learned something new about this bill that it includes the private sector, because my amendment speaks directly to information to be provided in the consultant's report, and so therefore the only way that the private sector could get involved in this would be if that is the intent of the committee to have that consultant's report refer to private sector activities. This language goes directly to that particular aspect of the bill. That particular aspect of the bill is very broad and this would simply be additional language that relates to collective bargaining agreements.

The CHAIRMAN pro tempore. Does the gentlewoman from Ohio wish to be heard further?

Ms. OAKAR. Yes; Mr. Chairman.

Mr. Chairman, on page of the bill, so that there is no confusion about the purpose of the bill, even though there has been a deliberate attempt to distort it, it says in section (3), "occupation" means any grouping of positions within an agency, as identified or defined under chapter 51 of title 5, United States Code, or subchapter IV of chapter 53 of such title.

It is very clear which employees we are referring to. It is a very, very specific group.

The CHAIRMAN pro tempore. Does the gentleman from Pennsylvania wish to be heard further on the point of order?

Mr. WALKER. Yes; Mr. Chairman.

Mr. Chairman, it is very clear in my amendment which employees I am referring to. I am referring to those included under collective bargaining agreements and it therefore is within the scope of the bill, because those specific employees that would be covered under chapter 51, title 5, United States Code, include employees who are in fact covered under collective bargaining arrangements; so we are in fact talking about the same people.

So if that is the gentlewoman's point, then she has just the case for my amendment.

Ms. OAKAR. Mr. Chairman, I insist on my point of order.

The CHAIRMAN (Mr. TORRES). The Chair is prepared to rule.

The Chair believes that the amendment as drafted may be interpreted to apply to a different category of employees from those covered by the bill. If the Chair may cite from the precedents of the House on the germanness rule, the Chair cites as such:

To a bill dealing with a certain class of Federal employees (the U.S. civil service in this case), an amendment to bring other classes of employees within the scope of the bill is not germane.

Therefore, the Chair sustains the point of order in this case.

Are there further amendments to section 7?

AMENDMENT OFFERED BY MR. BARTON OF TEXAS

Mr. BARTON of Texas. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BARTON of Texas: Page 13, strike out lines 7 through 9 and insert in lieu thereof the following:

(3) The Commission shall include a cost estimate for each measure under paragraph (1).

Mr. BARTON of Texas. Mr. Chairman, we have a saying in Texas and I am told that it is prevalent throughout the United States, that "when something is not broken, you don't fix it."

Well, we have in my opinion a pay equity system in the Federal Government that is not broken and does not need to be fixed, but since we do have a bill before us that proposes to redo this system and make some changes, I think it is important that we fix the bill, and in my opinion the bill is definitely broken and it is broken for one very important reason.

Currently, under the bill, under section (7), which is titled "Reporting Requirements," most of section (7) is fairly straightforward until it gets to the provision that says: "The Commission may not make any recommendation under this Act which involves a reduction in any rate of pay or grade."

Now, think about that for a minute. We are saying that we are going to have a study to review the Federal pay system, but we cannot make any recommendation that would lower a pay rate or a pay grade. Now, that is not a study. If you think about that for a minute, what that is telling us is that the commission is going to go in and it is going to hire these consultants, whether it is one, five, three or whatever, they are going to make this study, but if they find an inequity where somebody in the Federal Government is being paid too much, they cannot make a recommendation that that grade be lower or that that pay rate be changed.

Now, what you are saying there is that everybody in the Federal Government is either being paid exactly the right amount or they are not being paid enough. I do not think that is right. If we are going to have a study, it ought to really be a study and if it finds something that is too low, let us recommend that it go higher. If it finds a pay rate or a pay grade that is too high, let us make the recommendation that it go lower.

Now, the second point, if we allow this study to take place and to make these recommendations, whether they are to go higher or to go lower, I think we also desperately need to know what these recommendations would cost us if they were to be implemented.

□ 1610

There have been several estimates of what this bill that is before us would cost if the recommendations were made, as we expect they would be, and the changes would have to be made. They range just for Federal employees alone in the neighborhood of from $5 billion to $8 billion. That is per year for the Federal Government.

When we are trying to do everything we can to reduce the deficit and to get Government spending under control, it does not make sense to me to come in and pass a bill where we do not even refer to what it might cost. We at least ought to have the recommendations to know what it would cost if we wanted to implement these recommendations.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. BARTON of Texas. I would be happy to yield to my distinguished colleague, the gentlewoman from Ohio.

Ms. OAKAR. I thank the gentleman for yielding.

Mr. Chairman, that part of the gentleman's amendment I do not have any problem with in terms of indicating if, in fact, there are to be some changes to be made and how much it would cost. I think that would be a natural thing to do.

The part that the gentleman wants to cut, though, is in compliance with title VII, which says that if there is any form of discrimination that you cannot remedy it by lowering anybody's wages. That is what we were trying to do, so that we did not build up this confrontation between men and women.

What the gentleman is trying to do is have me take off that section. I would be happy to compromise with the gentleman about the cost factor. I do not have a problem with that. But when the gentleman says that we cannot comply with title VII, which is the law of the land, then I have a problem with that because we cannot mandate that we automatically lower wages, and so on. No State has ever done that when they implemented their studies, and I do not think we want to get into a confrontation between men and women. I have a feeling that is not the gentlemen's intent, but that is what I think this amendment would do.

So if the gentleman wants to take the portion of it that relates to the cost factor, I would certainly go along with the gentleman asking unanimous consent and I would accept that, but if it includes the whole thing, rather than build up this confrontation between men and women I would oppose the amendment strongly.

Mr. BARTON of Texas. I appreciate the gentlewoman informing me of her objection to the first part of my amendment. I would agree with her that I do not want to mandate that anybody's pay rate be lowered or their pay grade be lowered, but as the gentlewoman has said herself in the debate today and in previous days on this bill, we are trying, in her opinion, to actually do a study.

The CHAIRMAN pro tempore. The time of the gentleman from Texas [Mr. BARTON] has expired.

(By unanimous consent, Mr. BARTON of Texas was allowed to proceed for 1 additional minute.)

Mr. BARTON of Texas. If, in fact, we actually want to do this study, the study should do the best it can to find the truth, and in my opinion the truth is going to be that there are some recommendations that would be made that pay rates and pay grades should be lowered, just as there would be some recommendations that pay rates and pay grades be higher.

Ms. OAKAR. If the gentleman will yield further, the gentleman is aware of the President's commission's report that the President signs that says that the average government worker makes about 19.1 percent lower than the private sector. A GAO report confirmed a very similar thing. We have been working on the retirement system led by the chairman, and so forth. Furthermore, this would conflict with title VII of the Civil Rights Act, to mandate that we look at that.

So that is why we reinforced that and that is why that portion was in the bill.

Mr. BARTON of Texas. Mr. Chairman, I urge my colleagues to vote "aye" on my amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Texas [Mr. BARTON].

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mr. BARTON of Texas. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 148, noes 276, not voting 10, as follows:

[Roll No. 350]

NOT VOTING—10

Addabbo	Carney	Parris
Bonker	Early	Wright
Broomfield	Kildee	
Brown (CA)	Lungren	

□ 1620

The Clerk announced the following pair:

On this vote:

Mr. Lungren for, with Mr. Kildee against.

Messrs. WIRTH, TAYLOR, SAXTON, MOLINARI, and HAMMERSCHMIDT, Mrs. BENTLEY, and Messrs. ROWLAND of Connecticut, GALLO, and FISH changed their votes from "aye" to "no."

Mr. MOORHEAD and Mr. ENGLISH changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. DASCHLE. Mr. Chairman, today the House is considering H.R. 3008, the Federal Equitable Pay Practices Act of 1985, which authorizes a study of the Federal pay and classification systems to determine whether they are operated and administered in a manner consistent with current antidiscrimination law.

This measure has generated a certain degree of controversy based largely on misunderstanding of its content. I think it would be valuable as the House begins debate to step back and separate fact from fiction as to what the measure actually does.

I understand the concerns raised by the opponents of this legislation. However, a dispassionate assessment of the bill should dispel those concerns.

The opponents of the Federal pay equity study contend that, no matter how well intentioned, the authority contained in H.R. 3008 extends far beyond fair and legitimate economic practices and would interfere with private sector management decisions. This fear is unfounded.

Any misunderstanding about the Federal Equitable Pay Practices Act can be cleared up by an accurate reading of its provisions. Nowhere in the bill are the words "comparable worth" mentioned. Nowhere in the bill is authorization granted to implement or act upon in any way the recommendations of the Commission study. Nowhere in the bill is the Commission empowered to subpoena or prosecute any person or party in the Federal pay and classification system. The bill will have no effect on the private sector.

H.R. 3008 simply authorizes a nonbinding study of Federal pay and job classification practices to determine if the Federal Government, our country's largest employer, is upholding current laws prohibiting discrimination on the basis of sex, race, or ethnicity. When its work is done, the Commission which oversees the study will disband and its findings will be transmitted to the administration and Congress. No further action is mandated or allowed by the bill.

This examination of Federal practices is much needed and long overdue. I urge my colleagues to support this measure.

□ 1635

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: In Section 7, on page 12, after line 6, insert the following new subsection and renumber succeeding sections accordingly:

"(b)(2) Such study shall include and measure the impact on wages in occupations as defined in SEC. 10(3) which have been negotiated under collective bargaining agreements."

Mr. WALKER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALKER. Mr. Chairman, this is essentially the same amendment that I had brought to the floor just a few minutes ago. It has been modified to meet the questions raised in the point of order of the gentlewoman from Ohio [Ms. OAKAR], and I would be glad to yield to the gentlewoman at this point.

Ms. OAKAR. I thank the gentleman for yielding.

Mr. Chairman, as redrafted, I have no problem with the amendment offered by the gentleman from Pennsylvania [Mr. WALKER]. I am happy to accept it.

Mr. WALKER. I thank the gentlewoman, and I yield to the gentleman from Indiana [Mr. MYERS].

Mr. MYERS of Indiana. I thank the gentleman for yielding and for modify-

ing the language, to carry out the intent that he originally had, and we accept it.

Mr. WALKER. Mr. Chairman, I thank the gentleman, and I yield back the balance of my time.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. WALKER].

The amendment was agreed to.

The CHAIRMAN. Are there further amendments of section 7?

AMENDMENT OFFERED BY MR. STENHOLM

Mr. STENHOLM. Mr. Chairman, I offered an amendment.

The Clerk read as follows:

Amendment offered by Mr. STENHOLM: In section 7(c), strike out paragraph (4).

Ms. OAKAR. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN pro tempore. The gentlewoman from Ohio [Ms. OAKAR] reserves a point of order on the amendment.

Mr. STENHOLM. Mr. Chairman, the amendment that I offer continues in what I believe a constructive way what the committee has already done with a committee amendment.

Might I say in the beginning that I regret very much that Members of this House have chosen to interject racism or some other inferences on those of us who have had a change of mind regarding this legislation since the last time it was voted upon.

I would remind my colleagues that when this particular issue was voted upon before, it was a part of another bill. This is the first time that we have had opportunity to focus purely and simply on this particular legislation.

When we voted on this issue before, it was a part of a much bigger legislative package. It is always easy for we Members of Congress to vote for a study; that is easy. What has created problems for many of us with the legislation that was originally proposed is that it was going much further than the proponents were saying that they intended to.

Like most Members of Congress, I certainly believe that equal work should receive equal pay. When a man and a woman or individuals of different races or ethnic background perform the same work—I strongly agree that they should be paid fairly and we already have laws that deal with that particular issue.

My concern, and the gentlewoman from Ohio [Ms. OAKAR] has met the first part of this concern by striking, on page 12 from the bill, line 13 through line 18; that met a large part of the concerns that this individual Member has.

My amendment strikes the rest of the concern that we have, and it is my understanding the gentlewoman will also agree to striking from report language that same language that is in the bill that has created problems for many of us. If she agrees to do that, that too removes a large part of the opposition that this individual has had with the legislation before us.

I would remind my colleagues that there is one other thing that has occurred since we last voted upon this issue; the courts have gotten involved in this particular issue; and there are those and not the chairwoman from Ohio [Ms. OAKAR]; certainly she has convinced me in our private conversations and I have been on the floor most of the day listening to the debate; that it is not her intent to utilize this legislation for comparable worth purposes. That is a step in the right direction.

My concern, and why I offer this particular amendment at this time to complete doing that which I believe the gentlewoman has agreed to do with what she has already done, is to completely and totally do that which we have all agreed; and that is remove the possibilities of legal challenge as a result of this Commission. Remove the possibilities of legal challenge as a result of this Commission on the comparable worth issue.

That is the reason behind my offering this amendment. Might I further say, in conclusion, the difficulty that I have with a commission doing what has been suggested we need to do is the experience that I have had as a manager of a rural electric cooperative with 30 employees, and a Member of Congress with 20 employees; of dealing fairly with pay equity, of making those decisions on a day-to-day basis that fairly define the worth of an individual and of determining the pay scale of that individual and seeing that fairness in fact is prevalent.

It is extremely difficult to do, and I personally believe that a much better way to do it is the way that I had thought and hoped that we were already doing it within Government, and that is to allow individual branches of Government to deal with that particular question in their own area, as we Members of Congress have the right to do on a daily basis.

I have been told that that is not quite the way it is, so if a study to help in the setting of the pay qualifications and the pay standards and the differentiations is in need today, and it would be something that would be in addition to those 20 studies that we have already had, the last of which occurring in 1985, this year.

If there is additional study needed in order to more fairly treat our Federal employees in handling this difficult job, quite possibly, with the adoption of this amendment that I am proposing, this is what would be done and what should be done.

Ms. MIKULSKI. Mr. Chairman, will the gentleman yield?

Mr. STENHOLM. I yield to the gentlewoman from Maryland.

Ms. MIKULSKI. Mr. Chairman, I disagree with the thrust of the gentleman's amendment.

Mr. Chairman, women are making progress. We can see it in some of our "superstars" like Sally Ride and Geraldine Ferraro. One took us into the far reaches of outer space. The other took us higher than we've ever gone in politics.

We've also made legislative gains. We've reformed our pension system. We've enacted tough child support enforcement programs.

Best ideas that have become legislative victories came from the grassroots. Trickle Down doesn't work economically and it doesn't work to bring about change.

The best ideas come from the bottom up.

The ERA must continue to be the keystone of our movement. It must be the number one goal of our political action.

As I told Rev. Jerry Falwell on "Nightline," what if John Adams had told Abigail that he was going to have independence without the declaration. Suppose Abe Lincoln had told Harriet Taubman, we're going to emancipate the slaves but we're going to do it one plantation at a time.

If we have to get our equal rights one issue at a time, we're prepared to do it. The first issue we're going to deal with is the wage gap that exists between men and women.

We want equal pay for work of equal value. We want that money in our checkbooks and in the lawbooks. Working women today earn 63 cents for every dollar a man makes. But when we go to the grocery store or the shoe store, we don't get to pay only 63 cents of the prices.

We must move head on issues of economic equity for women. We must do so not because it's chic or trendy. We must do so because it is a matter of survival.

Women remain concentrated in low-paying jobs, not because we are afraid of pressure—as any nurse can tell you.

Not because we fear responsibility—as any teacher can tell you.

And not because we dread new technology—as any computer programmer can demonstrate to you.

Our salaries remain low because sexism still exists. One of our first targets for eliminating this sexism is the Federal Government.

As the largest employer in the Nation, the Federal Government has an obligation to set an example. It shoud take immediate steps to ensure that it's pay system is free of bias.

I am one of the Members of Congress who has introduced the "Federal Equitable Pay Practices Act of 1985." This bill will establish a bipartisan

commisison that will study the Federal Government's pay and classification systems.

One of the most important ways to lead women out of poverty is to pay them. Money is the secret to ending poverty for women who've been abandoned by their husbands and abandoned in the marketplace.

Joining us in the fight for pay equity has been our good friends at organized labor. Especially the folks at AFSCME. They have been the collective bargaining agents for women in the private sector who need help.

We in Congress have to, now, be the collective bargainers with our own Federal Government, on behalf of our own Federal employees. We have to set the benchmark legislation, for all those women who don't have the opportunity to be represented by the American labor movement.

The steps we're taking are small steps. They are modest steps. But at least they are first steps. And they're steps in the right direction.

The CHAIRMAN pro tempore. The time of the gentleman from Texas [Mr. STENHOLM] has expired.

(On request of Mr. BURTON of Indiana, and by unanimous consent, Mr. STENHOLM was allowed to proceed for 2 additional minutes.)

Mr. STENHOLM. Mr. Chairman, I will yield to the gentlewoman from Ohio is she wishes me to yield.

The CHAIRMAN pro tempore. The Chair would inquire of the gentleman from Texas if he desires to conclude in his 2 minutes.

Mr. STENHOLM. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN pro tempore. The gentlewoman from Ohio [Ms. OAKAR] will state her point of order.

POINT OF ORDER

Ms. OAKAR. Mr. Chairman, I raise a point of order at this time. I appreciate the work that the gentleman and I have done together on this issue, and we were happy to meet some of his concerns, but the amendment offered by the gentleman from Texas [Mr. STENHOLM] proposed to amend the committee amendment to section 7 previously agreed to.

Accordingly, it is not in order. I call to the Chair's attention section 27.1 of chapter 27 of Deschler's Procedure which provides, quote:

"It is fundamental that it is not in order to amend an amendment already agreed to."

Mr. Chairman, at this time, although I do look forward to working with the gentleman before we have final passage, I insist on my point of order.

The CHAIRMAN pro tempore. Does the gentleman from Texas [Mr. STENHOLM] desire to be heard on the point of order?

Mr. STENHOLM. Mr. Chairman, it is obvious that when I was out of the Chamber working on some budget matters, the committee revised their original committee amendment, and I was instructed as to this fact just prior to the offering of my amendment.

□ 1645

I assume that the gentleman cites the correct rules, and if that is the case we have been effectively shut out from offering what I believe to be some very helpful and constructive words on this issue.

Other than that, I can make no further comment.

The CHAIRMAN pro tempore. The Chair then would be prepared to rule.

According to precedents, chapter 27, section 28.1 it is not in order to offer an amendment merely striking out an amendment previously agreed to.

Therefore the Chair would rule that the amendment of the gentleman is out of order.

Are there further amendments to section 7?

The Clerk will designate section 8.

The text of section 8 is as follows:

SEC. 8. CONSTRUCTION

Nothing in this Act shall be construed to limit any of the rights or remedies provided under the Civil Rights Act of 1964, section 6(d) of the Fair Labor Standards Act of 1938, or any other provision of law relating to discrimination on the basis of race, color, religion, sex, national origin, handicap, or age.

The CHAIRMAN pro tempore. Are there any amendments to section 8?

AMENDMENT OFFERED BY MR. SIKORSKI

Mr. SIKORSKI. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment Offered By Mr. SIKORSKI: Page 13, strike out line 22 and insert in lieu thereof the following:

SEC. 8. CONSTRUCTION: ADVISORY NATURE OF STUDY.

Page 13, line 23, insert "(a)" before "Nothing".

Page 14, after line 3, add the following:

(b) ADVISORY NATURE.—The consultant's study and any findings, conclusions, recommendations, or comments by the consultant or the Commission under this Act with respect to such study shall be considered to be of an advisory nature only.

Mr. SIKORSKI (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. SIKORSKI. This amendment simply reaffirms the intent of the legislation by stating that the consultant's study and any findings, conclusion, recommendations, or comments by the consultant or the commission shall be considered to be of an advisory nature only.

There has been much discussion even a little bit indirectly relevant on the possibility that this study would subject the Government to potential litigation, in fact, an avalanche of litigation and liability under the current civil rights laws of this country.

In fact, the study will have the opposite effect, demonstrating to the courts that the Government is acting in good faith to examine its own policies and practices for discrimination.

It is absolutely the intention of the sponsors of the bill that the President and the Congress have sufficient time to review the consultant's study and the Commission's recommendations in order to formulate appropriate policy if, in fact, discrimination is found to exist.

Mr. Chairman, my own State of Minnesota conducted a similar study a number of years ago. The Governor and the legislature reviewed the study, agreed upon implementation policies and changes in the State personnel program, and, with a great deal of support, these changes have been implemented without litigation, without lowering the wages of any men, in fact, some men's wages were raised; without great cost, and in the collective bargaining structure without all the hypothetical horribles that we hear about.

Mr. Chairman, I urge support of the amendment.

Ms. OAKAR. Mr. Chairman, I move to strike the last word, and I rise in support of the amendment.

Mr. Chairman, this is an amendment, and I hope my colleagues are really paying attention to this one, because what we are trying to do is relieve anyone's anxiety about a possible lawsuit, or that the intent is to create lawsuits. I feel we have a responsibility as Members of Congress who have jurisdiction over the classification system of our employees that we deal with it. I would never abrogate my responsibility to the courts and never have.

So to reaffirm that that is not our intent, in case there is any misunderstanding, the intent of the Sikorski amendment is that the legislation be a study that is advisory, and advisory only, in nature.

It simply sets forth the recommendations for the President and the Congress to serve as a basis for whatever action we may or may not deem necessary.

Mr. Chairman, it is my hope that we would act responsibly, and that is all we are trying to do with this study. So I hope we support Congressman SIKORSKI's amendment. It is meant specifically to reaffirm the fact that this is only advisory, nothing is binding, and we are the ones that will be called upon to act or not act, and that is all there is to the study. It was never intended to be pursued by courts and all

that other business. So I hope we can accept this on both sides.

Mr. ARMEY. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I would be happy to yield to the gentleman from Texas.

Mr. ARMEY. I thank the gentlewoman for yielding.

Mr. Chairman, I had a similar amendment drafted and decided not to offer it. The reason I did not was that I really do not, I am not confident that the amendment will achieve what it sets out to achieve. Nevertheless, I think it is a good amendment, and I would be happy to accept it.

Mr. MYERS of Indiana. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I would be happy to yield to the distinguished minority Member.

Mr. MYERS of Indiana. I thank the gentlewoman for yielding.

Mr. Chairman, we on the minority side accept this amendment. The intent, of course, of the amendment is to preclude any lawsuits, which really you cannot do. There is no way possible this Congress or anyone else, short of absolute prohibition, can stop someone from litigation if they feel they have a case. However, the intent here of the author is that anything in the report itself should not be the basis of a lawsuit. They can bring action under title VII of the Civil Rights Act, any individual who feels aggrieved. We cannot touch that, nor should we. Certainly the intent here is an admirable one, one that is desirable, I think we all support, and that is that nothing in this report shall be used as a basis for a lawsuit, and it is to advise the Congress of any need for future legislation, if there is a problem.

Mr. Chairman, I do support the amendment.

Ms. OAKAR. Mr. Chairman, I support the amendment.

The CHAIRMAN pro tempore. The question is on the amendment offered by the gentleman from Minnesota [Mr. SIKORSKI].

The amendment was agreed to.

the CHAIRMAN pro tempore. Are there further amendments to section 8?

Mr. STENHOLM. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I take this time to finish the point that I was trying to make on the amendment that I was offering and would announce to the House that it is my intent when we go into the House that I will ask for a separate amendment on the committee amendment to achieve the purpose which I was attempting to do with the amendment before we were effectively precluded from doing that through a legitimate parliamentary move.

I will do that when we go into the House.

The CHAIRMAN pro tempore. Are there any other amendments to section 8? If not, the Clerk will designate section 9.

The text of section 9 is as follows:

SEC. 9. FUNDING.

Sums appropriated to the Office of Personnel Management for general operating expenses shall be available to carry out this Act.

The CHAIRMAN pro tempore. Are there any amendments to section 9?

If not, the Clerk will designate section 10.

The text of section 10 is as follows:

SEC. 10. DEFINITIONS.

For the purpose of this Act—

(1) "job-content analysis", as applied with respect to occupations, means an objective, quantitative method of rating representative entry-level positions within such occupations in order that—

(A) composite values may be established with respect to such occupations based on factors such as the skill, effort, responsibilities, qualification requirements, and working conditions involved; and

(B) comparisons may be made with respect to the positions and occupations involved;

(2) "economic analysis", as applied with respect to 2 or more occupations, means an objective method for analyzing differentials in pay between or among those occupations in order to determine if, and the extent to which, those differentials are attributable to—

(A) job-related factors such as seniority, merit, productivity, education, work experience, or veteran status;

(B) geographic factors; and

(C) other factors, exclusive of sec, race, and ethnicity;

(3) "occupation" means any grouping of positions within an agency, as identified or defined under chapter 51 of title 5, United States Code, or subchapter IV of chapter 53 of such title;

(4) "position" means the work, consisting of the duties and responsibilities, assignable to an individual;

(5) "ethnicity" refers to the quality of being, or not being, of Hispanic origin;

(6) "ethnic group" refers to a grouping based on ethnicity;

(7) an individual shall be considered to be of Hispanic origin if such individual is of Mexican, Puerto Rican, Cuban, Central American, South American, or other Spanish origin;

(8) "consultant" includes an organization which provides consultant services;

(9) "Commission" means the Commission on Equitable Pay Practices established under section 3;

(10) "labor organization" has the meaning provided by section 7103(a)(4) of title 5, United States Codes;

(11) "exclusive representative" has the meaning provided by section 7103(a)(16) of title 5, United States Code;

(12) "agency" means an executive agency within the meaning of section 105 of title 5, United States Code (other than the General Accounting Office); and

(13) "Government" means the Government of the United States.

The CHAIRMAN pro tempore. Are there any amendments to section 10?

AMENDMENT OFFERED BY MR. GEKAS

Mr. GEKAS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered By Mr. GEKAS: Page 15, strike out lines 13 and 14 and insert in lieu thereof the following:

(5) "ethnicity" refers to the country where a person was born or the country from which his or her ancestors came;

Mr. GEKAS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. GEKAS. For purposes of this amendment I would ask the gentlewoman from Ohio to engage in a colloquy so that I may place certain remarks in the RECORD.

I had intended, and want to make it clear, that this amendment goes to the definition of ethnicity which I wanted to make sure was broader than just to include those of Hispanic origin. In my judgment, that constituted an insult to the Hispanic community and did not cater to the requirements of all the other people who can say that they have ethnicity as part of their work theme.

So I have been informed by the gentlewoman from Ohio that in the previous actions on the floor through an amendment and through a colloquy that was placed in the RECORD that my concerns have been met. To that end, I now yield to the gentlewoman from Ohio so that she can explain to me how that was accomplished. And, Mr. Chairman, if I am satisfied I will withdraw the amendment.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. GEKAS. I yield to the gentlewoman from Ohio.

Ms. OAKAR. I thank the gentleman for yielding.

Mr. Chairman, I would be happy to try to satisfy the gentleman's concerns. There was an amendment offered by Mr. SIKORSKI that dealt with the applicable provisions of the law prohibiting discrimination on the basis of sex, race, or national origin.

Mr. LIPINSKI and I engaged in a colloquy, and here is what he said, and here is my response:

It is the understanding of the chairwoman that the meaning of the term "national origin" in this amendment includes individuals of all ethnic backgrounds that have historically suffered discrimination such as Italians, Poles, Germans, Irish, Lithuanians, Ukranians, Yugoslavians, Czechoslovakians and so forth, of ethnic background.

My answer was, "Yes."

Then we proceeded to go into a further discussion of that.

So that I think the gentleman's concern has been met by the Sikorski amendment as reaffirmed by the Chair that indeed all origins will be looked at because, the gentleman is right, there are some custom workers

and other workers who are classified, they believe, indiscriminately, and they are not classified properly, and they would not necessarily be female, minority, or Hispanic.

Mr. GEKAS. Is the gentlewoman from Ohio telling me that that amendment was adopted?

Ms. OAKAR. Yes, yes, it was adopted.

Mr. GEKAS. It was a voice vote?

Ms. OAKAR. Yes, that is right.

Mr. Chairman, I applaud the gentleman's concern, and I think his concern has been met.

Mr. GEKAS. I will recapture my time and say that, based on the colloquy that I have now conducted with the gentlewoman from Ohio, I am satisfied my concerns have been met.

Mr. Chairman, I ask unanimous consent that my amendment be withdrawn.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The CHAIRMAN pro tempore. The amendment is withdrawn.

Are there further amendments to section 10?

The Clerk will designate section 11.

The text of section 11 is as follows:

SEC. 11. EFFECTIVE DATE.

This Act shall take effect 30 days after the date of the enactment of this Act.

The CHAIRMAN pro tempore. Are there any amendments to section 11?

Are there any further amendments to the bill?

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. BURTON OF INDIANA

Mr. BURTON of Indiana. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. BURTON of Indiana: Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Federal Anti-Discrimination Act of 1985".

SEC. 2. ESTABLISHMENT OF COMMISSION.

(a) ESTABLISHMENT.—There shall be established a commission to be known as the Commission on Equitable Pay Practices.

(b) COMPOSITION.—The Commission shall be composed of—

(1) the Director of the Office of Personnel Management;

(2) the Chairman of the Equal Employment Opportunity Commission;

(3) 8 members appointed by the President, of whom—

(A) 1 shall be appointed upon the recommendation of the Speaker of the House of Representatives;

(B) 1 shall be appointed upon the recommendation of the minority leader of the House of Representatives;

(C) 1 shall be appointed upon the recommendation of the majority leader of the Senate;

(D) 1 shall be appointed upon the recommendation of the minority leader of the Senate; and

(E) 2 shall be appointed to represent the interests of taxpayers; and

(4) 5 members appointed by the Director of the Office of Personnel Management, of whom—

(A) 2 shall be appointed to represent the respective labor organizations representing (as exclusive representatives) the largest and the second largest numbers of individuals in Government service;

(B) 1 shall be appointed to represent employee organizations having as a purpose promoting the interests of women in Government service and composed primarily of women holding positions covered by the provisions of chapter 51, or subchapter IV of chapter 53, of title 5, United States Code;

(C) 1 shall be appointed to represent employee organizations having as a purpose promoting the civil rights of individuals in Government service and composed primarily of minority group members holding positions covered by any of the provisions referred to in subparagraph (B); and

(D) 1 shall be appointed from among individuals with expertise in Federal personnel management. To the extent practicable, appointments under this section shall be made with a view towards maintaining a fair balance in the interests represented and the functions to be performed by the Commission.

(c) TIMING OF APPOINTMENTS; QUALIFICATIONS.—All appointments under paragraphs (3) and (4) of subsection (b) shall be made within 20 days after the effective date of this Act and shall be made from among individuals who are especially qualified to serve on the Commission by virtue of their expertise and experience.

(d) VACANCIES.—A vacancy in the Commission shall be filled in the manner in which the original appointment was made.

(e) CHAIR AND VICE CHAIR.—The Chair and Vice Chair of the Commission shall be elected by the members of the Commission.

(f) QUORUM.—Eight members of the Commission shall constitute a quorum.

(g) MEETINGS.—The Commission shall meet at the call of the Chair or a majority of its members.

(h) NONAPPLICABILITY OF LIMITATION.—Appointments under this section shall not be considered for purposes of section 5311(b) of title 5, United States Code.

SEC. 3. CONDUCT OF STUDY.

(a) STUDY.—The Commission shall provide for the conduct of a study under which the following shall be examined:

(1) Whether the Government's position-classification system under chapter 51 of title 5, United States Code, and compensation systems under subchapters III and IV of chapter 53 of such title, are in compliance with section 6(d) of the Fair Labor Standards Act of 1938., relating to equal pay for substantially equal work.

(2) Whether the Government is in compliance with title VII of the Civil Rights Act of 1964 in matters relating to hirings and promotions of Federal employees.

(3) The effectiveness of any policies or programs of the Government (including those involving education or the dissemination of information) designed to encourage—

(A) the integration of individuals into occupations in which persons of a particular sex, race, or ethnic group have been traditionally underrepresented; or

(B) the promotion or other advancement of such individuals in Federal employment.

(4) Any trends or patterns relating to promotions or other advancement in Federal employment with respect to individuals belonging to any underrepresented group referred to in paragraph (3).

(b) METHODOLOGY.—In carrying out the study under this Act—

(1) the methodology to be used shall be subject to Commission determination or approval, as the case may be; and

(2) particular consideration shall be given to matters relating to women in Government.

SEC. 4. RECOMMENDATIONS AND REPORT.

(a) RECOMMENDATIONS.—The Commission shall develop recommendations (including proposals for legislation or administrative action) for enhancing Government efforts to achieve equality of opportunity in Federal employment with respect to sex, race, and ethnicity and to improve the efficiency of Government compensation practices under subchapters III and IV of chapter 53 of title 5, United States Code. Included with such recommendations shall be an estimate of the cost anticipated in carrying out those recommendations.

(b) REPORT.—The Commission shall submit its report and recommendations under this Act to Congress not later than 18 months after the date of the establishment of the Commission.

SEC. 5. ADMINISTRATIVE PROVISIONS.

(a) COMPENSATION.—Members of the Commission shall receive no pay on account of their service on the Commission, but while away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service under section 5703 of title 5, United States Code.

(b) DETAILS FROM OTHER AGENCIES.—Upon request of the Commission, the head of an agency may detail, on a nonreimbursable basis, any of the personnel of such agency to the Commission to assist the Commission in carrying out its responsibilities under this Act.

(c) OBTAINING INFORMATION.—The Commission may secure directly from any agency any information necessary to enable it to carry out this Act. Upon request of the Commission, the head of such an agency shall, to the extent permitted by law, furnish the information requested by the Commission.

(d) EXPERTS AND CONSULTANTS.—The Commission may procure temporary and intermittent services under section 3109(b) of title 5, United States Code.

(e) MAIL AND SUPPORT SERVICES.—The Commission may use the United States mails, and receive administrative support services from the Administrator of General Services, in the same manner and under the same conditions as other agencies.

SEC. 6. TERMINATION OF COMMISSION.

The Commission shall cease to exist 90 days after submitting its report under section 4(b).

SEC. 7. CONSTRUCTION.

Nothing in this Act shall be construed to limit or expand any of the rights or remedies provided under title VII of the Civil Rights Act of 1964, section 6(d) of the Fair Labor Standards Act of 1938, or any other provision of law relating to discrimination on the basis of race, color, religion, sex, national origin, handicap, or age.

SEC. 8. FUNDING.

Sums appropriated to the Office of Personnel Management for general operating expenses shall be available to carry out this Act.

SEC. 9. DEFINITIONS.

(1) "agency" means an executive agency within the meaning of section 105 of title 5, United States Code (other than the General Accounting Office);

(2) "employee" and "Federal employee" each means an individual employed in or under an agency;

(3) "ethnicity" refers to the quality of being, or not being, of Hispanic origin;

(4) "ethnic group" refers to a grouping based on ethnicity;

(5) an individual shall be considered to be of Hispanic origin if such individual is of Mexican, Puerto Rican, Cuban, Central American, South American, of other Spanish origin;

(6) "Commission" means the Commission on Equitable Pay Practices established under section 2;

(7) "occupation" means any grouping of positions within an agency, as identified or defined under chapter 51 of title 5, United States Code, or subchapter IV of chapter 53 of such title;

(8) "position" means the work, consisting of the duties and responsibilities, assignable to an individual;

(9) "labor organization" has the meaning provided by section 7103(a)(4) of title 5, United States Code;

(10) "exclusive representative" has the meaning provided by section 7103(a)(16) of title 5, United States Code; and

(11) "Government" means the Government of the United States.

SEC. 10. EFFECTIVE DATE.

This Act shall take effect 30 days after the date of the enactment of this Act.

Amend the title so as to read: "A bill to promote equitable personnel practices and to eliminate discrimination within the Federal civil service.".

Mr. BURTON of Indiana (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. BURTON of Indiana. Mr. Chairman, I yield to the gentlewoman from Nevada.

Mrs. VUCANOVICH. I thank the gentleman from Indiana for yielding.

Mr. Chairman, I rise in support of this substitute.

As many of you already know, I do not support the comparable worth theory which holds that wage disparities between male and female workers and the heavy concentration of women in certain jobs is proof of discrimination. I do support equal pay for equal work, and this substitute sets up a study based on that theory. We want a Society that is gender-blind for employment purposes, not gender-conscious. Comparable worth is a direct attack on an economic system which values individual opportunity and individual liberty. This substitute will focus on employment and pay discrimination in a manner which is consistent with current law.

This substitute has the objective of eliminating discrimination, and promoting fair personnel practices for women, blacks, and Hispanics in the Federal Government. This substitute is similar to H.R. 3008 in that it would establish a study commission known as the commission on equitable pay practices. And, as with H.R. 3008, the purpose of the study is to determine whether Federal practices are in compliance with existing law. However, this substitute uses a methodology which is completely in line with existing law. Thus the substitute does not seek to discover discrimination by using the comparable worth methodology which, as numerous courts have observed, is not a formula for proving discrimination.

The study in H.R. 3008 is one which asks a consultant to make subjective assessments of the relative worth of different jobs, and to then compare the wage rates paid for these different jobs. Regardless on one's personal view of the usefulness of such comparisons, the fact is that such comparisons do not provide a means for determining whether a particular pay system is in compliance with existing law. Existing law—that is title VII of the Civil Rights Act of 1964 and the Equal Pay Act of 1963—does not require an employer to pay equal wages to different jobs. Courts have made this clear in a variety of decisions, including the case of Spaulding versus University of Washington and the recent and much publicized case of AFSCME v. State of Washington, decided by the Ninth Circuit Court of Appeals on September 4, 1985.

What needs to be understood about comparable worth studies of the type done in Washington State and of the type being proposed by H.R. 3008 is that, as the ninth circuit court recognized in the State of Washington decision, the results of such studies "will vary depending on the number and types of factors measured and the maximum number of points alloted to each factor." Thus, even in ideal circumstances, such studies can be of only limited use in determining whether a particular wage structure is discriminatory or not.

This substitute, however, is directed at precisly those practices which can produce discrimination under existing law, and those practices which can result in women being treated differently from men in the Federal workforce. The results of the study set forth in this substitute will give us a meaningful picture of Federal employment and compensation practices and whether those practices are fully in line with the requirements of existing law. Such a study will indeed be more useful than the H.R. 3008 proposal in assuring us that the Federal Government is a leader in eliminating discriminatory employment practices.

In conclusion, if we have to do a study of wages in the Federal workforce, I believe this substitute is the best means to ensure that current law is upheld. I do not believe comparable worth is the answer to alleviating the problem of discrimination in the Federal Government. The Equal Pay Act and title VII of the Civil Rights Act currently provides broad and effective remedies to gender-based discrimination occurring in the labor market. Advocates of comparable worth, and H.R. 3008, would change all that and impose a radical new definition of discrimination which would have far-reaching ramifications for public and private sector employers alike.

I, therefore, urge my colleagues to support this substitute.

□ 1700

Mr. ROBINSON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from Indiana [Mr. BURTON].

I have sat very patiently today and listened to all of the debate on both sides. I would be remiss if I did not say that I am disappointed not only in the way that we have presented our communications on the floor today but disappointed in the way this whole issue has evolved, starting with the many misrepresentations, even starting back in Little Rock, AR, with one of my newspapers, the Arkansas Gazette, the oldest newspaper west of the Mississippi, that wrote an article that this was comparable worth. This is not comparable worth. But going on from there, I have had numerous "Dear Colleague" letters misquoting the Washington State case. I even had a letter from the National Association of Manufacturers, which really disappoints me, in that this is more than a study.

Earlier on today, when I objected to the unanimous consent request of the gentleman from Texas [Mr. ARMEY] for more time, I objected in a symbolic way because I think 62 years is long enough in not looking at the way we treat our Federal employees. Yes; it has been 62 years since we studied pay equity. Yes; we have passed other bills that some thought would look at that; for example, the Fair Labor Standards Act of 1938, and subsequently the Civil Rights Act of 1964. But none of these studies called for a real pay equity study.

Now, in the Burton amendment, he and others would have you believe that he is adding to this. Well, the gentleman from Minnesota [Mr. SIKORSKI] has already added what the gentleman from Indiana wants in this amendment.

The truth of the matter is simply this: The gentleman is attempting to gut this bill.

Aside from my responsibilities as a legislator for the Second District of Arkansas, representing Federal employees, females and minorities who are not being paid the same as some of their male counterparts, I am also a father. I have three daughters and three sons. I can unequivocally tell you today that my three daughters will not be treated the same as my three sons if they go to work for my Government, the one government worldwide that is supposedly setting the proper example for all others to follow.

I could go on and on and on about the debate. I am sorry that I do not have a Ph.D. I only went as high as the Masters level. But I am beginning to understand what a Ph.D. stands for. It is piled higher and deeper as we debate this issue.

I would just like to close by saying this: We owe it to our females who work for the Federal Government, we owe it to our blacks, we owe it to our Hispanics, we owe it to all workers who are employed by the U.S. Federal Government to treat them fairly. And that is what this issue is all about. It is not about Democratic versus Republican ideals and concepts. It is not being a conservative versus a liberal. It is about fairness. It is about justice.

Mr. BURTON of Indiana. Mr. Chairman, will the gentleman yield?

Mr. ROBINSON. I will yield in just a minute.

Mr. BURTON of Indiana. It was brought to my attention some time ago that the Democrat-controlled House of Representatives pays their employees on an improper basis.

The CHAIRMAN pro tempore. Does the gentleman from Arkansas [Mr. ROBINSON] wish to yield time?

Mr. ROBINSON. I yield to my colleague.

Mr. BURTON of Indiana. There is discrimination in employment in this Chamber by the Democrat majority. And for somebody to stand here and say that we are talking about fairness and equality, I think the gentleman ought to start in this Chamber, in his majority party and deal with the problem of fairness.

Mr. ROBINSON. I will reclaim my time. I know the females in my office are watching. Louise, I pay you $47,000 a year. I do not discriminate in my office. I do not know about the rest of my Democratic colleagues. But I pay my employees based on their ability to do the job.

The CHAIRMAN pro tempore. The gentleman will suspend for a moment.

In accordance with the procedure of the House, the gentleman should not refer to any television audience.

Mr. ROBINSON. I was referring to the in-house audience, Mr. Chairman, and not the larger audience. Just the in-house audience.

The CHAIRMAN pro tempore. The gentleman may proceed in order.

Mr. ROBINSON. All of you know that I am a conservative, and some have questioned why I would be down here today talking for such a liberal concept. Let me just say this: I am proud to be a conservative. I am also proud to be an American. I am proud to be a father. But most importantly, I have enough sense to realize that we have to treat people fairly. I can look you in the eye and tell you: I treat my employees fairly, I always have.

Something was mentioned today by my colleague from Texas saying that he once supervised 30 employees. Well, I was in Governor Clinton's first administration in Arkansas, as his director of public safety, and I had 1,100 employees under my control, and I can tell you that when you have an operation as large as a State agency and/or as large as the Federal Government, we need a study to determine whether or not we are paying our employees fairly. There is no way that I can decide whether or not we are doing that. I can do it in my own office. There is no way any of us have the ability, whether we have a Ph. D. or not, to make that determination.

I urge the Members to vote down the Burton amendment.

The CHAIRMAN pro tempore. The time of the gentleman from Arkansas [Mr. ROBINSON] has expired.

Ms. OAKAR. Mr. Chairman, I ask unanimous consent that the gentleman be given additional time.

The CHAIRMAN pro tempore. Is there objection to the request of the gentlewoman from Ohio?

Mr. BURTON of Indiana. Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

Ms. OAKAR. Mr. Chairman, I move to strike the requisite number of words, and I yield to the gentleman from Arkansas [Mr. ROBINSON] for his eloquent words.

Mr. ROBINSON. Mr. Chairman, I would just like to say to my colleagues—with no disrespect to my colleague, the gentleman from Indiana [Mr. BURTON]—I like you, I respect you—I think the gentleman is wrong. I think the gentlewoman from Ohio [Ms. OAKAR] and the committee are right. I ask the Members to vote your conscience, vote your convictions, do what is right for our working females and working minorities who, in my opinion—and I do not know what the study will show—are not being treated fairly.

Ms. OAKAR. Mr. Chairman, I vigorously oppose this amendment.

Essentially, what the gentleman from Indiana [Mr. BURTON]—not the gentleman from Indiana [Mr. MYERS], but the gentleman from Indiana [Mr. BURTON]—is attempting to do is gut the bill. Part of what he is trying to do we already included in the bill by the amendment of my friend, the gentleman from Minnesota [Mr. SIKORSKI].

Let me just go over what we are trying to do. I chair a subcommittee that relates to Federal employees' compensation and benefits. We have jurisdiction over their benefits, their retirement plan, their health benefits. It is a classification system that has people in classifications from GS-18 to GS-1, the GS-1 being the person who makes about $9,000 a year as a minimum.

The problem that we have is that we have not looked at the classification system with respect to the issues in this bill since 1923. What the gentleman would have us do is remain at the status quo, do not look at the classification system, do not do what 45 States are doing with respect to their own State employees, what many fine corporations have done, like United States Steel and AT&T and J. Byron and Son, in conducting their own study.

We are told by the gentleman from Indiana [Mr. BURTON] that, no, we have jurisdiction, but leave the system the way it is, because what was right in 1923 is right in 1985.

Now, I say that is wrong, that is negating our responsibilities. We are trying to take the responsible approach. The responsible approach is to not implement a new pay system. The responsible approach is to take a look at the system comprehensively and study it over an 18-month period by objective individuals in a bipartisan spirit, and that is the spirit in which we are trying to pass this legislation.

There has been absolutely, positively gross misrepresentation of this legislation. I think it has been very, very unfortunate, because the groups that oppose it, in my judgment, do a great disservice to the business community. I want to submit for the RECORD some letters that I have received from various corporations who do not want to associate with the misinformation that has been given out by members of the national organizations that are supposed to be worrying about the trade deficit; they are supposed to be worrying about the deficit of this country and enhancing our great businesses, and instead, they have focused on misrepresenting what this bill does.

This bill only relates to classified Federal employees. It relates to a study that we have not done since 1923 when less than 5 percent of the Federal work force were minorities and women.

Now, my friends, if we cannot support a study that we have a handle on—they have to advise Congress, and my chairman, the gentleman from Michigan [Mr. FORD], can choose

whether to hear the recommendations of the study or not to hear the recommendations of the study—we dealt with this issue, we have had countless hearings for 4 years, and I want to tell the Members of this Congress something, because I feel deeply about it: If we cannot pass a simple study on how we treat classified Federal employees, then we will never do anything that relates to fairness in this Congress because that is an easy step to undertake.

I think it is extraordinarily unfortunate that this has been made into a huge political issue that it was not last year when we passed this bill, with only six people voting against it. I personally think it is unfortunate that it has been so distorted and that it has caused Members on both sides of the aisle the kind of anguish that some people who do not know what is in this study and do not know what we are trying to do and in good faith have written to them, I think it is very, very unfortunate that Members have had to explain what this is in simple English, when in fact the issue has been terribly distorted.

The CHAIRMAN pro tempore. The time of the gentlewoman from Ohio [Ms. OAKAR] has expired.

(By unanimous consent, Ms. OAKAR was allowed to proceed for 2 additional minutes.)

Ms. OAKAR. Frankly, I think the National Chamber of Commerce ought to be absolutely ashamed of itself for distorting this issue. That is what they have chosen to do in a fundraising effort. I think it is a shame.

My business community, I am proud to say, in Cleveland, OH, took great issue with what they were trying to do, and, in a letter from the director of my chamber, said, "Congresswoman OAKAR, I think you not only should do a study; you have an obligation to do a study, because we have jurisdiction over these employees."

So I hope we can pass this bill and I hope we can go on to bigger and better things, frankly. I always believe, as my mother said, that the truth will win out. I think it will win out today.

Mr. SEIBERLING. Mr. Chairman, will the gentlewoman yield?

Ms. OAKAR. I yield to my friend, the gentleman from Akron, OH.

□ 1715

Mr. SEIBERLING. I thank the gentlewoman for yielding.

Mr. Chairman, I think the gentlewoman has made a very fine statement. When I started hearing some of the rhetoric that we have heard on this bill, I did what is a good rule: When all else fails, read the bill. It just blows my mind that anybody would even oppose this bill. This is an extremely modest, reasonable effort to find out if indeed there are some areas where there is no rational basis for differentials in pay. It does not require any action, but merely factfinding. I cannot imagine anybody opposing such a study.

Ms. OAKAR. I thank the gentleman.

Mr. Chairman, I just want to conclude by thanking the minority leader of the subcommittee, Mr. MYERS of Indiana. We worked together in a spirit of compromise. That was the way I wanted the bill to come out, and I think it did come out as a bill that had some compromises, and I want to thank my friend from Indiana, Mr. MYERS, for hanging tight. It showed a lot of courage.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in favor of the substitute. I must say I have listened to most of this debate, too, and for people who are on the floor propounding a point of view, the proponents of this bill have been the most defensive group I have ever heard. The entire case has been defensive and negative out here today with very little positive said about their bill.

I have got to guess that there must be something awfully wrong in a bill that they simply pound upon the opponents who have raised points of view. It seems to me that all of this talk that the opponents are somehow engaging in distortion and so on is simply an attempt to raise a smokescreen about this bill. What we have is we have an honest difference of opinion about the potential impact of this legislation. It seems to me that that is entirely legitimate for people to have a difference of opinion about legislation that encompasses this kind of scope. That is precisely what we have here.

We have heard an awful lot of talk here today that somehow there is something rather sinister about people who may have changed their mind in the last year about this particular approach. Well, I would suggest that there is nothing sinister in it; there is just a little bit of education that has taken place in the last year or so.

There have been three separate events since we last voted that some of us focused on a little bit. For example, there was the court of appeals that said that comparable worth is an invalid concept. It seemed to some of us, having looked at that particular opinion, that that made some sense and we ought to look at that in terms of what we were doing in the House of Representatives.

You had the Civil Rights Commission that did a study of the comparable worth, and they came to the conclusion, and they said, that this is the looniest idea since "Looney Tunes." That made somewhat of an impression at least on this gentleman that maybe we ought to take a look at what we are doing in this House.

We also have, I would say to the people who tell us that we have had no studies in the last 62 years, we have had a study by the Office of Personnel Management. Right here is the study. It evidently cost us a lot of money because there is an awful lot of paper there, and you can bet that bureaucrats that generate that kind of paper cost us a little bit of money to do this study. What is the study called? It is called "Equal Worth, Comparable Worth, and the Market Worth of Federal Jobs." It is precisely what we are talking about here has already been done by the Office of Personnel Management. They came to the conclusion that the comparable worth idea is illogical, imprudent, and injust.

In other words, there are some people who have studied this thing and studied it within the last year since we last voted, that have come to the conclusion that this is a pretty whacko scheme that we are dealing with here. Some of us think that maybe that is not what we ought to be voting for in this House.

Now, it seems to me what we have is that kind of opposition that is distorted through a compaign of negativism here on the floor. As far as I am concerned, this is a bill that says something in particular to young people. It says to young people who are about to graduate from high school and college, young people, both young men and young women, that the politicians and the bureaucrats are now going to decide their worth in the job market. Their talent, their education, their skills, their enthusiasm and their dreams all become secondary because what we have is the politicians and the bureaucrats determining their worth.

I do not think that is the way we want to go in the future. I do not think that we ought to be endorsing that even in a study in this particular House of Representatives.

The substitute by the gentleman from Indiana gets us to a concept that I think we can all endorse. The substitute gets us to the concept of equal pay for equal work for everyone. It seems to me that if we are going to have a study, that is what we ought to be doing; we ought not be doing what the bill purports to do.

I ask for a vote "yes" on the substitute.

Mrs. VUCANOVICH. Mr. Chairman, I move to strike the requisite number of words.

Mr. BURTON of Indiana. Mr. Chairman, will the gentlewoman yield?

Mrs. VUCANOVICH. I yield to the gentleman.

Mr. BURTON of Indiana. I thank the gentlewoman for yielding.

Mr. Chairman, we are for equal pay for equal work. Make no mistake about that. That is what my substitute is all about. The bottom line in this ar-

gument is do you want comparable worth? Do you want some commission established that will sit down and compare one job with another and decide whether or not they should be paid the same?

You are talking about, that is the argument. The legislation that was passed, the study that was passed in the State of Washington resulted in a $1.1 billion lawsuit. We have 30 times the number of employees as the State of Washington. The Justice Department has told me personally that there is no doubt in their minds there will be a lawsuit filed if we pass this study as it is written right now. That could result in a $30 billion lawsuit and the taxpayers of the United States are going to have to pay for the legal expenses in that suit, and may end up having to pay $30 billion. I do not think they will, because I think the same conclusion will be reached on an appeal that was reached in the appeal in the Washington suit. Nevertheless, this mischief is going to end up in the courts.

Now, my substitute really studies whether or not there are inequities as far as equal pay for equal work is involved in the U.S. Government and the Federal Government. Now, I think the one thing that has not been stated clearly enough here today is something that we should state right now and that is this is going to be the catalyst for going into the private sector. The people who want this study at the Federal level in the Federal Government want the same principles to apply in the private sector of our economy. My friends, make no mistake about it, that heads us in the direction of socialism.

Are we going to have bureaucrats, commissions deciding who get paid what salary and what jobs are equal to other jobs? That will end up in endless litigation in the private sector as well, and that is why the National Chamber of Commerce opposes this legislation as well as probably 200 or 300 other national organizations.

They have studied this issue, they have studied this legislation and they think it is bad. Now, if you really want to look at the Federal pay system to make sure there is equal pay for equal work, then I submit to you support my substitute because that is exactly what it is intended to do.

Mrs. VUCANOVICH. Mr. Chairman, I thank the gentleman, and I yield back the balance of my time.

Mr. HYDE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong support of the substitute offered by the gentleman from Indiana. The bill in chief offered by my dear friend from Ohio, the gentlewoman, is labeled a pay equity bill. My admiration for the gentlewoman is increased as I stand in awe of her ability to coin euphemisms, because what we are talking about is comparable worth. Calling it pay equity does not change the reality. It is something that we indulge in these euphemisms a lot. We call illegal aliens "undocumented workers," and I often have thought that was like calling a drug peddler an "unlicensed pharmacist," or a bank robber a "holder not in due course."

We are talking about comparable worth so let us not indulge in any self-deception.

□ 1725

I also think it is important to remember that the history of freedom is the history of resisting excessive governmental intrusion. That is what freedom is all about. It is resisting the leviathan government which is so intrusive in so many aspects of our lives where it really does not belong. And I think if comparable worth ever gets a foothold in the economy and the politics of this country, you will have a massive intrusion in what was once a successful, albeit not perfect, free enterprise system.

The courts are already clogged. They will be congealed once this becomes the law, and there will not be such a thing as a poor lawyer left in this land. You may search far and wide, you may ransack the poorhouses, you will never find a lawyer who is this side of being considerably wealthy once this enforcement mechanism takes effect. And that will be something to behold. I suggest that Monty Python draw up the plans for the enforcement mechanism for comparable worth.

Now, I do not want to suggest that there is not discrimination. I do not know, there probably is. Wherever human nature exists, discrimination is going to be a part of it. And should we avert our eyes from this discrimination? Absolutely not. The gentlewoman from Ohio has raised our consciousness on this issue, and I applaud her for that. But having gone that far with her, I beg to take another direction as we search for ways to educate ourselves on this issue.

I suggest that the substitute offered by the gentleman from Indiana is a far more workmanlike and sensible, if I may use such a word, approach to this problem. It establishes a commission that is, in my judgment, much more likely to be objective than the Commission that the gentlewoman suggests in her bill.

And, by the way, I want to throw this in parenthetically. Since male longevity is much shorter than female longevity, if this Commission ever looks at this problem, I hope the stress factor that we males have to undergo on jobs can be cranked into whatever marvelous formula emerges so that the fact that men die a lot sooner than women on the average will give us a few more points in this comparable pay schedule.

The gentleman from Indiana has a study that seems to me to be much more objective. It does not require a list of occupations demanding equivalent skills and responsibilities, because those are subjective and different people will have different approaches on this. But the approach of the gentleman from Indiana wants to know whether the Federal pay and classification systems are in compliance with the existing law, the Fair Labor Standards Act of 1938, and title 7 of the Civil Rights Act of 1964.

And not as an afterthought, I am sure, what about an estimate of the cost of these recommendations in their implementation? There is such a thing as voluntary ignorance, somebody saying, "I don't want to know what this will cost." It seems to me that the gentlewoman, I am sure through an omission, has neglected that in her study.

What will the recommendations cost this poor taxpayer that we bleed through every pore about every day in 1-minute speeches?

So, Mr. Chairman, I suggest that wisdom, prudence, and common sense dictate that we support the substitute offered by the gentleman from Indiana, which I intend to do enthusiastically.

Mr. MONSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I do not want to belabor this subject, but I do think that a few more points need to be made.

I have listened to the complete proceedings today, and it has been very educational, but it has also been disappointing at times. To be accused of being a racist when I oppose this bill is something that I have never been accused of before, and I do not appreciate that accusation. But I think there are some things that still need to be brought out, so I choose to take this time now.

I think I can best bring these things out by reading from an article by Robert J. Samuelson that appeared in Newsweek magazine on April 22, 1985.

He said in this article:

> Comparable worth's illusion is that the relative worth of different skills, working conditions and responsibilities can be distilled into formula. They can't. So comparable worth leads to the wrong questions about jobs. In Wisconsin state government, where the ideas is being studied, a legal secretary is paid $14,800 and a public-defender investigator (level 3) $20,600. The experimental job-evaluation system rates the jobs almost equal; 92 percent of the investigators are men and 100 percent of the secretaries are women. To eliminate "sex bias," the recommendation is to raise the legal secretary 33 percent to $19,600.

Mr. Chairman, continuing the quote:

If I lived in Wisconsin, I would want to know whether the legal secretaries are competent. If so, why isn't $14,800 adequate? If not, I would not reward them with a $4,800 raise without first assuring their competence. I would ask the same question of investigators. The right question is not: do we pay women's (or men's) jobs enough? But do we pay enough for specific jobs—say teachers, men or women—to get qualified workers, And, if not what combination of higher salaries and qualifications is needed?

Mr. Chairman, I think that is what the issue boils down to. We need to make sure that we are asking the right questions. When we approach this based totally on our assumption that if there is a difference in pay between a job that is normally occupied by women and a job that is normally occupied by men, that is based strictly on discrimination, then we are asking the wrong questions. We need to ask the right questions.

Mr. Chairman, I hope we will adopt this substitute, because I believe that better asks the right questions than the bill before us.

Mr. ARMEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I will be brief, because I know we are all anxious to complete this matter. The gentleman from Utah did raise a good point, and indeed I had my name raised by the gentleman from Arkansas. I understand that folks in Arkansas are not always crazy about folks from Texas, and I understood, when I decided after the July recess that I would have to come into this body and work very hard and provide a great deal of information, that that information may be characterized, as it has been so often today, as misinformation.

I understood that the question of race might be raised, and that a finger might be pointed either directly or indirectly. I suspected that maybe some of us might be called "sexist," and yesterday in the New York Times I was referred to by one of the Members of this body as a sexist operating outside the fringe.

It is for that reason that I perhaps did the deplorable thing and emphasized that I am an economist and even indeed that I have a Ph.D. in economics, not that I am so proud of my Ph.D. but because from the outset I realized that I had to make it clear that as a professional economist I was addressing an economic issue, not an issue of race or not an issue of sex, and that I was trying to get information out.

Yes, we are concerned. We are not unrealistic in our concerns. We do not have a free-floating anxiety. Our concerns are reality based. Take the Washington State case or the Illinois State case, take any case, the lawsuits follow when these things are passed. We are concerned about those things. We tried today to offer amendments, and by rejection of our amendments the majority has demonstrated that they do not want a fair commission. They want one stacked 6 to 5. They do not want a fair study. They want a single consultant with a single methodology that has been proven faulty already.

There is a question of fairness. Will we stamp out discrimination? Some of us honestly believe implementing this kind of study, with the policy changes that could be recommended, will create more discrimination, and particularly discrimination toward blue-collar workers. Numerous studies have been done, and they have been discounted. It is not a question so much of misinformation—and indeed, if there were a question of misinformation, that is on both sides—but what information has never been taken into consideration, that has been left totally out of the hearings, out of the study, and out of the discussion.

□ 1735

The bill still risks judicial implementation. We have seen it in every case where a study has been authorized by a legislative body, before that body could act to legislate implementation suits have been filed and countersuits have been filed by those people against whom discrimination is found by the implementation of these kinds of procedures.

I think it is only fair that there be some recognition of the fact that those of us on this side of the issue are serious in our consideration of the impact of this on the American economy, on the American working man and the American working woman, in the interest of fairness and in the interest of trying to save this Nation's governing body from moving in the direction of a Government administered system of wages in this country. That has been characterized by the gentleman from Indiana [Mr. BURTON] as socialism. I know of no other way to characterize the government administration of prices in any nation.

Ms. OAKAR. Mr. Chairman, in accordance with an agreement we had with the minority and the desire to rise at 6 o'clock, I ask unanimous consent that we conclude debate, after the minority Member, the gentleman from Indiana [Mr. MYERS] speaks, in 10 minutes.

The CHAIRMAN pro tempore. Is the gentlewoman requesting that on the amendment of the gentleman from Indiana [Mr. BURTON] and all amendments thereto?

Ms. OAKAR. All amendments thereto, yes.

The CHAIRMAN pro tempore. Is there objection to the request of the gentlewoman from Ohio [Ms. OAKAR]?

Mr. BURTON of Indiana. Reserving the right to object, Mr. Chairman, I have a question that I would like to ask.

Ms. OAKAR. Mr. Chairman, I was speaking specifically of the Burton amendment.

The CHAIRMAN pro tempore. The gentleman from Indiana has reserved the right to object.

Mr. BURTON of Indiana. Reserving the right to object, Mr. Chairman, my question is if we limit the time on this amendment and all subsequent amendments thereto, after the Committee rises, does the gentlewoman not have a substitute or an amendment? Will this affect that?

Ms. OAKAR. No; if the gentleman will yield, I was not really referring to anything else.

Mr. BURTON of Indiana. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentlewoman from Ohio [Ms. OAKAR]?

Mr. MYERS of Indiana. Reserving the right to object, Mr. Chairman, it is my understanding that there shall be 5 minutes on this side and then 10 minutes on that side; in effect, we are talking about 15 minutes from now the Committee will rise. Is that correct?

Ms. OAKAR. Mr. Chairman, if the gentleman will yield, I will say yes to my minority Member.

Mr. MYERS of Indiana. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentlewoman from Ohio [Ms. OAKAR]

There was no objection.

The CHAIRMAN pro tempore. The gentleman from Indiana [Mr. MYERS] will be recognized for 5 minutes.

Members standing at the time of the request by the gentlewoman from Ohio will be recognized for 2 minutes each. The Chair recognizes the gentleman from Indiana [Mr. MYERS].

Mr. MYERS of Indiana. Mr. Chairman, I regret taking this 5 minutes at this late hour for a number of reasons. First, we have an agreement that we will be out of here by 6 o'clock and I think everyone has heard enough about this; but I am concerned about this issue because there have been so many misstatements made about what is in this act.

I have been around here for a number of years and I do not remember any legislation, even major legislation, and I do not consider this major legislation, that has been as poorly talked about, as poorly presented throughout the country.

I know I have been threatened. I have been intimidated. I have been impugned by I guess some serious people back home.

I asked them, "Have you read the bill?"

And they say, "Well, no, but we have heard about it and we have heard it is comparable worth."

Now, my name is not on here as a cosponsor to the bill. You may wonder why I am up here. I do not have to take my credentials as a conservative second to anyone here, but I am in support of this legislation for several reasons.

First, I thank my chairperson for making concessions. I say concessions, because the gentlewoman did not have to. She had the votes in the committee and probably on this floor to come forth with a comparable worth bill, but it did cause me problems, as it did many of you, so we have taken out the comparable worth concept in this bill.

Now, I was at a point a few years ago when I did not call a coin by its first name. It was a lot more popular calling it high tax. I always referred to it as a high tax because it got more votes.

Calling this comparable worth, it gets some opposition, but that does not change the bill or the concept here.

What we are talking about, is there gender-based wage discrimination within the Federal Government, is there? Can anyone today say there is or is not a wage discrimination because a person happens to be a female instead of a male? I do not know, but that is all this bill does is to cause a study.

Now, we have an amendment here in the form of a substitute that is another study. I regret to have to oppose my friend, the gentleman from Indiana. He and I most often vote together, but I think the gentleman is ill-advised on this and I do not agree with him.

Now, some of the opponents here today have brought up a number of ideals or suggestions, talking about this is a new area, and then the same people come back later in the debate and say, "Well, we have studied this for years in the Federal Government." Is it or is it not a new idea? I do not know, not until we examine it further.

Others have said it is a cause of litigation. They have been advised, my friend says he has been advised by the Justice Department that this for certain will cause lawsuits.

There is nothing, nothing in this bill that would give any sanction, any reason whatsoever for a lawsuit. Lawsuits can be brought now, and are, under title 7 of the Civil Rights Act, but nothing in this act provides for any lawsuit, not in the least.

Then they talk about the cost to the taxpayers. It may be, but what is the cost to the taxpayer who happens to be a female today, and there are female taxpayers, too, because they do not get paid as much for doing the same job? How about the single parent?

I talked to one just today who is looking for a better job. She said she has three children to support. She is looking for a better job, but if she cannot get the same pay, she is not paying Federal taxes. She is not supporting her children.

This is what we are talking about here. It is not the issue of liberal versus conservative or sexist, racist, and all the other suggestions that have been thrown around here. It is too bad to give that kind of a tag to this needed legislation.

Now, title 7 of the Civil Rights Act provides that the private sector of our country, the business out there, cannot discriminate because of a number of things, including because of the gender of the employee.

Should we in the Federal Government not live within the same rules? We passed title 7.

This is what this says. Is the Federal Government living within the same rules and laws that every taxpayer out there has to live with? This is what we are saying here. It does not write new legislation. It is an examination if the Federal Government, the one that we run here, is doing the same thing that it is requiring everyone else in this country to live with. Should they not be held to that?

Last and most importantly, I am supporting this legislation because I believe in justice. To use a personal experience, my wife came to our little town in Indiana a number of years ago as a teacher. That little town hired four new teachers that year, two women and two men, both of equal education, both first-year teachers, both men made more than either one of the women made. Each of them made more money.

Do you say that is justice?

My wife and I have two daughters. Because they were born female, should they go through life not earning as much because they were born female? They are both professionals now. I do not think so.

We are not talking about racist or sexism or anything else. We are talking about justice and you have a chance to vote for it today.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Chairman, first of all, I want to commend the gentlewoman from Ohio [Ms. OAKAR] on the stand the gentlewoman has taken here and brought forward, the legislation that would produce the justice that people are concerned about.

Mr. Chairman, we have had talk of economics. This is not an economic matter. The greatest work of free men was the Constitution and in 1964 it had to be updated to provide in fact rights for people in America, the greatest nation of all.

We are in a constant state of flux and there are changes that have to be made. This is certainly one of those particular changes.

I want to talk just a minute about the economic discussions that seem to abound on the floor. Are we saying here today that cost and dollars should preclude fairness and justice? If in fact, what are we afraid of with this study?

I think the comments of the gentleman from Ohio, Mr. JOHN SEIBERLING, were right to the point. He said all you need to do is read the bill and it will allay those particular fears.

But do we have fears that in fact this study will document that sex discrimination, yes; does exist, and if it does, that there may in fact be lawsuits that may cause an economic situation in our country? Yes; that is true; but are we to say because of that factor that we should leave matters as they are, with possible discrimination still in existence? Do economics and cost preclude justice?

I think the Founding Fathers would turn over in their graves if they would in fact hear the discussion that has taken place here on the House floor here today. We have belabored this for many hours. This is a matter of justice.

Mr. Chairman, I commend the commitment of the previous speakers to that particular concept. I think all Members of the House should vote their conscience on justice today, not economics and dollar costs.

So again, I commend the gentlewoman from Ohio [Ms. OAKAR] for her stand, and to all the Members of the House who look at it as it exists, a consideration of justice.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Washington [Mr. MILLER].

Mr. MILLER of Washington. Mr. Chairman, I rise in support of the amendment. I speak because I am from a State that has had some experience with this, Washington State.

Because of the lack of time, however, I have asked to revise and extend my remarks.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Texas [Mr. STENHOLM].

Mr. STENHOLM. Mr. Chairman, I want to again make the point that I have been trying to make and I want to ask the gentlewoman from Ohio if she would respond to my question.

In light of the committee amendment that was stricken at the urging of those of us who are concerned about the comparable worth issue, does the gentlewoman also agree to strike all references in the committee report that refer to that same problem?

I yield to the gentlewoman.

Ms. OAKAR. I do not have a problem with that, as I told the gentleman.

Mr. STENHOLM. Well, it is very important to those of us who are concerned about the wording of this legislation. I do not, and I want to make it clear, I do not intend to vote for the substitute, because I felt that we were getting extremely close to settling the comparable worth issue. Unfortunately, we were not able to resolve it yet, but we will attempt to do it when we go into the House, when we rise.

To complete what I had hoped to do, and that is to strike all references to that which some of us believe refer to comparable worth, all the other speeches, and I certainly would like to associate myself with the gentlewoman's fine remarks as far as the intent of what the gentlewoman has consistently said to me and I have heard the gentlewoman say in the floor of the House today. I do not believe we are that far apart.

What we are talking about is what some of us believe is extremely important wording of the intent because of the court case that has arisen and that is creating some enormous economic problems and potential future problems; so it is very important to me, and I understand the gentlewoman's reluctance to answer, but the committee report language is extremely specific in doing that which the gentlewoman has contended and has stricken with the committee amendment.

Ms. OAKAR. Mr. Chairman, if the gentleman will yield, as the gentleman knows, we struck that section out through an amendment that I offered, in effect. It was a committee amendment, and that is what is really binding; but I said that I would take out the report language that refers to that section.

Mr. STENHOLM. The report language, that is what I wanted, the report language that deals with that section, and I would encourage support for my amendment to strike the remaining one-third of this issue and that takes comparable worth completely out of the debate and will make this particular bill worthy of support.

The CHAIRMAN. The Chair recognizes the gentleman from Indiana [Mr. BURTON].

Mr. BURTON of Indiana. Mr. Chairman, I think I will just sum up by saying we are all for equal pay for equal work. I think my substitute will provide a study mechanism to make sure that equal pay for equal work prevails throughout the Federal employment system of the United States and I hope everybody will see fit to support it.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Missouri [Mr. GEPHARDT].

Mr. GEPHARDT. Mr. Chairman, I urge Members to vote against the substitute. The reason is that the substitute effectively guts this study and the reason for passing this bill. It calls for a completely different kind of study. That study may be worth doing at another time and another place, but it is not a real substitute for what is being asked for in this bill. It is a study of affirmative action. It is not a substitute for a study of pay practices.

□ 1750

If Members are concerned about the basic facts, if they are concerned about whether or not there is discrimination and they do not know, listen to these facts:

While women comprise 46 percent of the Federal work force, 85.5 percent of women are concentrated in just the lower civil service job classes and make 63 percent of what their male counterparts make. My colleagues may not accept those facts, the facts may not be right, but the point is that we need this study. We need to know what the facts are, and if the facts are anything like that, we need to take action.

I was interested that the gentleman from Illinois [Mr. HYDE] said that the Government should not be involved. That same gentleman makes eloquent arguments about why the Government should be involved in the question of abortion, but yet he makes the argument today that it is not appropriate for the Government to be involved in standing for and worrying about this basic, basic human right, the right of all people in this country to be able to participate in this economy in an equal way.

It is time for this commission, it is time not to vote for a substitute that guts it, and I hope Members will stand strong against the substitute and for the bill for equal rights.

The CHAIRMAN pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from Indiana [Mr. BURTON].

The question was taken; and the Chairman pro tempore announced that the noes appeared to have it.

RECORDED VOTE

Mr. BURTON of Indiana. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 142, noes 277, not voting 15, as follows:

[Roll No. 351]

NOT VOTING—15

Addabbo	Fowler	Manton
Brown (CA)	Gray (IL)	McKinney
Carney	Green	Rudd
Conyers	Kildee	Williams
Early	Lungren	Wright

□ 1800

The Clerk announced the following pairs:

On this vote:

Mr. Lungren for, with Mr. Kildee against.
Mr. Carney for, with Mr. Green against.

Messrs. JENKINS, FRENZEL, and LENT changed their votes from "aye" to "no."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

Mr. HAWKINS. Mr. Chairman, I rise in strong support of H.R. 3008; legislation which calls for a study of the Federal pay and classification systems to determine whether discrimination based on sex, race, or national origin exists.

Title VII of the Civil Rights Act of 1964, as amended, specifically prohibits wage discrimination. Section 703 of that act (42 U.S.C. Section 2000e-2(a)(1)) states that "It shall be an unlawful employment practice for an employer (1) to discriminate against any individual with respect to his compensation * * * because of such individual's race, color, religion, sex, or national origin * * *."

The discrimination which we seek to eradicate through this proposed study is a direct by-product of occupational segregation. The issue raised concerns whether work done primarily by women and minorities is systematically undervalued primarily, if not solely, because that work continues to be done for the most part by women and minorities. There is strong evidence that wages paid to women and men engaged in historically female or minority work are artificially depressed relative to what those wages would be if the jobs were being performed by white males.

Data which describes and, indeed, supports the fact of job segregation is compelling. For example, 80 percent of all women work in 25 of the 420 census occupational categories. Women constituted 44 percent of all workers in 1980, but filled 81 percent of clerical jobs, 97 percent of private household jobs, and 61 percent of other service jobs. 59.5 percent of black women and 53 percent of white women are concentrated in only 2 of the 12 major occupations.

Of equal importance is the combined presence of a significant wage gap within occupations. In sales jobs, for example, women earned 42 percent of men's salaries. In general, while the proportion of women in managerial positions has increased since 1960, their earnings relative to men declined from 58 to 55 percent. To ignore the role of discrimination in producing these disparities is to ignore reality.

During hearings held in 1980, the Equal Employment Opportunity Commission explored the issue of whether wages for jobs historically segregated on racial, sex or other unlawful basis have been discriminatorily depressed because those jobs were held by minorities and women. This remains one of the most significant and most difficult issues left unresolved under title VII today. While a constructive dialog has ensued for several years, little progress has been made toward any meaningful conclusions. The most often cited reason for this lack of progress is the complexity of the issue. We must ensure that this valid concern does not become an excuse for unwarranted and unwise delay. For notwithstanding the complexity of the issue, its resolution has major ramifications for millions of individuals throughout the American work force. H.R. 3008 constructs a forum in which to conduct a study, assess the available evidence and proceed in a prudent and deliberate manner to understand the scope and character of the problem and, subsequently, to fashion an appropriate and effective response. It is that all important first step. For these reasons, I applaud and support the introduction of this important legislation and urge your support for its passage and enactment.

Mr. SENSENBRENNER. Mr. Chairman, recently, allegations have been made that H.R. 3008, the Federal Equitable Pay Practices Act, is fully consistent with the Ninth Circuit decision in AFSCME versus State of Washington, on the issue of comparable worth. These allegations place little importance on the appellate court's decision to reverse Judge Tanner's original decision. I call your attention to an analysis of the case and its effect upon H.R. 3008 conducted by the U.S. Commission on Civil Rights. Mr. Pendleton, the Chairman of the Commission, states that H.R. 3008 is "fundamentally inconsistent with AFSCME." Chairman Pendleton further notes that the Ninth circuit's reversal of AFSCME invalidates "the only decision to give support to the job evaluation methodology that H.R. 3008 would employ to prove discrimination." The Commission analysis centers on the inconsistency in finding that AFSCME and H.R. 3008 are in accord by noting that the bill purports to authorize "a study to determine whether the Federal Government's wage setting and position-classification practices are consistent with title VII and the Equal Pay Act." However, such a study would "authorize use as a standard which is legally insufficient as a means of proving discrimination."

Below is a copy of the Commission's analysis. I hope that it will help enlighten my colleagues as to the apparent inconsistencies between AFSCME and the proposed legislation, H.R. 3008.

U.S. COMMISSION ON CIVIL RIGHTS,
Washington, DC, October 7, 1985.

Hon. F. JAMES SENSENBRENNER, JR.,
House of Representatives, Rayburn House Office Building, Washington, DC.

DEAR CONGRESSMAN SENSENBRENNER: This will respond to your request for a staff analysis of the claim that the Ninth Circuit decision in *AFSCME* v. *State of Washington* is consistent with H.R. 3008, the Federal Equitable Pay Practices Act of 1985. The opinion expressed herein is that H.R. 3008 is fundamentally inconsistent with *AFSCME*, and that claims to the contrary serve only to draw attention from the many legitimate objections to the bill.

H.R. 3008 would employ a comparable worth job evaluation for purposes of determining whether the Government's wage setting and position-classification systems are designed and administered in a manner consistent with Title VII and the Equal Pay Act, that is, whether they are discriminatory within the meaning of these statutes. *AFSCME* clearly indicates that such an inquiry is not within the scope of these statutes.

In reversing Judge Tanner's decision upholding job evaluation as a means of determining compliance with Title VII, the Ninth Circuit invalidated the only decision to give support to the job evaluation methodology that H.R. 3008 would employ to prove discrimination.

The Ninth Circuit held in that case that comparable worth theory did not afford AFSCME a basis for recovery under Title VII of the Civil Rights Act of 1964. AFSCME had argued that discriminatory intent could be inferred from the Willis study, which found that the State's practice of setting wages in reliance on the market created wage disparities among jobs of comparable worth disproportionately represented in terms of gender. This argument fails, said the Court:

"Neither law nor logic deems the free market system a suspect enterprise. Economic reality is that the value of a particular job to an employer is but one factor influencing the rate of compensation for that job. Other considerations may include the availability of workers willing to do the job and the effectiveness of collective bargaining in a particular industry."

Citing its own precedent in *Spaulding* v. *University of Washington*, the Court noted that employers may be constrained by market forces to set salaries under prevailing wage rates for different job classifications. "We find nothing," said the Court, "in the language of Title VII or its legislative history to indicate Congress intended to abrogate fundamental economic principles

such as the laws of supply and demand or to prevent employers from competing in the labor market."

H.R. 3008 is thus in conflict with itself. It purports to authorize a study to determine whether the Federal Government's wage setting and position-classification practices are consistent with Title VII and the Equal Pay Act, but in doing so would authorize use of a standard which is legally insufficient as a means of proving discrimination.

The claim that the Ninth Circuit decision is consistent with H.R. 3008 is usually expressed by drawing out of context language from the Court's opinion to the effect that a comparable worth job evaluation, "like other job evaluation studies, . . . may be useful as a diagnostic tool." This language is dicta, and as such is not important to the Court's holding. The missing context, moreover, supplies its true meaning. The Court did not say that a comparable worth job evaluation is a useful diagnostic tool, but rather, *"[a]ssuming"* that it is, an employer should not be bound by its results. The Court gave reasons for this, stating:

"The results of comparable worth studies will vary depending on the number and types of factors measured and the maximum number of points allotted to each factor. A study which indicates a particular wage structure might be more equitable should not categorically bind the employer who commissioned it. The employer should also be able to take into account market conditions, bargaining demands, and the possibility that another study will yield different results."

The Ninth Circuit's reasoning reinforces the argument of opponents of H.R. 3008 that job evaluation is highly subjective. In fact, it is significant in this regard that the trial court in *AFSCME* had refused to hear testimony concerning the Jeanneret job evaluation, which arrived at findings opposite those of the Willis job evaluation even though Jeanneret used the same data and job descriptions.

The Ninth Circuit's view of the merits of a comparable worth job evaluation were similarly expressed by U.S. District Court Judge Kocoras last April in *American Nurses' Association* v. *State of Illinois.* Wrote Judge Kocoras:

"Aside from the problems inherent in the implementation and administration of a comparable worth standard by the courts, any criteria of pay equity ultimately rests on value judgments. Although some correlation between sex-segregated jobs and lower wages no doubt exists, the job characterization factor is undeniably only one among many of the determinatives of pay scales. Because jobs do not have an intrinsic value that can be scientifically measured, the limitations inherent in job evaluation techniques prohibit the proposed extension of Title VII."

The Ninth Circuit decision in *AFSCME* casts light on the question of how job evaluation studies may be done. While they may not be done to prove discrimination, as is the intent of H.R. 3008, they may of course be conducted as a means of arranging pay scales within an organization consistent with the labor market. This has been the practice of the Office of Personnel Management, and it is there that the responsibility to conduct job evaluations of Federal wage-setting and position-classification practices should remain.

Sincerely,

CLARENCE M. PENDLETON, Jr.,
Chairman.

Mr FEIGHAN. Mr. Chairman, in New York City, police dispatchers are paid $4,000 to $6,000 more than their counterparts in the fire department. In Montgomery County, MD, liquor clerks, who need not possess a college degree, earn the same amount as schoolteachers. In Denver, nurses make less than hospital maintenance men and gardeners.

What unites these examples of seemingly irrational variations in pay? In each case, the occupation dominated by women receives lower pay than that held largely by men. The reason for much of the disparity is not hard to identify. Historically, women have been largely segregated into a narrow band of the occupational spectrum, and the jobs where they have been concentrated have been relatively lower paying—regardless of the skills, training, or knowledge required. These jobs have been deemed by society to be "women's work" and thus the rewards attached to them have been lower than those accorded to occupations dominated by men.

Which particular jobs are identified as women's work may vary from culture to culture. But the placement of a higher value on the work of men seems to be a nearly universal phenomenon. "There are villages in which men fish and women weave and in which women fish and men weave," the anthropologist Margaret Mead observed, "but in either type of village, the work done by the men is valued higher than work done by women."

In an effort to redress the sex discrimination imbedded in occupational and wage classifications, four States and more than 15 cities have negotiated pay adjustments with their employees. Another 25 States have established commissions to determine whether this sort of discrimination persists in their civil service compensation scales.

The bill before us today, of which I am proud to be a cosponsor, would bring the Federal Government into line with a majority of the States by mandating a study of lingering sex discrimination in the Federal civil service pay system.

Hardly the radical measure that its opponents depict, this bill would require a bipartisan commission to study the problem of pay equity in the Federal civil service, not dictate a particular result for that study nor specify a particular remedy.

The Federal Government is our Nation's largest employer, yet its pay structure has not been reviewed for more than 60 years. This bill would take an important first step toward the elimination of the historic inequities that plague that structure and deprive women who work for the Federal Government of a fair return for their labors.

Mrs. COLLINS. Mr. Chairman, I rise today in strong support of H.R. 3008, the Federal Equitable Pay Practices Act of 1985.

H.R. 3008 would provide for a study of the Federal pay and classification systems to determine whether they are marred by wage discrimination, based on race, sex, and ethnicity. I am an original cosponsor of this bill, as I feel it contains the most-needed ingredients to find discrimination in the Federal work force, should it exist.

Let me say loud and clear that in recent months there has been a gross misrepresentation of this legislation on the part of a number of people. We are not doing anything radical here. Keep in mind that what we are talking about is a study of where we stand in the Federal sector; what we must do to ensure equal employment treatment under the law. Alternatives have been suggested. They have not been effective. In fact, the full committee has rejected one alternative proposal that would have cut back on the Commission's effectiveness.

Let me share some facts which you—facts about the measure we are considering.

H.R. 3008 does not mention the words "comparable worth."

The study applies only to classified employees of the Federal civil service. It does not apply to any other employer in the private sector or States.

The bill does not create a new definition of discrimination. It mandates a study of all compensable factors, including, job content and market factors, to determine if Federal pay practices are consistent with title VII and the Civil Rights Act of 1964 and section 6(d) of the Fair Labor Standards Act of 1938.

H.R. 3008 prohibits the Commission from recommending pay or grade reductions for Federal classified employees.

H.R. 3008 does not encourage multimillion-dollar lawsuits against the Federal Government.

Women in the Federal work force earn an average of 62.8 cents for every dollar a federally employed man does. Furthermore, black women in the Federal Government earn only an average of 62.2 cents when compared to a man. In looking at all sectors—Federal, State, and local governments, as well as private—white women bring in 59.2 cents for every dollar paid to a man: black women earn 54.7, and Hispanic women earn 51.2 cents.

Despite the fact that almost half of the people in the Federal work force are women, about 70 percent of the female employees are grouped in grades 1 to 6. A full 85 percent are in grades 10 to 15.

Mr. Chairman, let me stress that opponents of this legislation have repeatedly alleged that it would presume any wage gap would be called discrimination. It would not.

Mr. Chairman, pay equity is a concrete, solid practice taking place all over this great Nation. Pay equity plans are being initiated in moderate terms at very minimal costs to State and local governments. The Federal Government should follow the example taken by these governments. This bill seeks to demonstrate that the Federal Government, as an employer, is acting responsibly in examining its own personnel policies for discrimination.

Mr. Chairman, if H.R. 3008 does not pass here today, we are putting ourselves on record in denying our daughters, granddaughter, nieces, and the women in our

constituencies a chance at equal opportunity. There are certain organizations in the last few days who shout that we are already saying there is rampant discrimination in the Federal work force. This is not true. All we are trying to do is study whether it does exist. The Federal Government cannot operate by shutting its doors to such a study. We owe it to the women and minorities of this country to find out if they are getting a fair shake. America is the land of the free and the brave and much opportunity. We must not close doors when they have not even been opened yet.

Mr. Chairman, I urge my colleagues to support H.R. 3008 without substantive amendments.

Mr. DORNAN of California. Mr. Chairman, today it seems certain that consideration of comparable worth legislation will be completed. Therefore, at this time I would like to commend the gentleman from Texas, DICK ARMEY for his leadership in mounting the opposition to this impossible bill.

Throughout all the debate and all the speeches on this issue, I have heard many fine technical and theoretical arguments raised in opposition to the concept of comparable worth. But in my view, the issue boils down to a simple case of arrogance on the part of the supporters of comparable worth.

What could be more arrogant than the belief that a commission of Government bureaucrats knows more than, and can outguess, the marketplace? If these people are as smart as all that, perhaps we should send them to the negotiating table in Geneva to outguess the Russians.

I have a little free advice for all my colleagues still determined to support this ill-advised measure. I suggest they leave Congress and take full-time jobs on Wall Street, where the ability to outguess the marketplace can result in untold fortunes. But let me also warn my colleagues who decide to take that advice that the poor house is full of people who thought they could outguess the market.

In closing, why don't we put an end to this attitude of "we know better than the people do" that so permeates this Chamber. The American people are not children and don't deserve to be treated like them. In fact, many even go so far as to enter into business arrangements—without asking Washington's permission first! I know to many of you enamored with comparable worth this is a staggering revelation, and an infuriating one at that.

So let's do the right thing and defeat the arrogant comparable worth legislation, H.R. 3008.

Mr. RICHARDSON. Mr. Chairman, I rise in firm support of H.R. 3008, the Equitable Pay Practices Act of 1985. This bill provides for a study of Federal pay and classification systems to determine whether they discriminate according to sex, race, or hispantic origin.

Three generations of Americans have entered the Federal work force under a wage plan implemented in 1923. The system has yet to be reviewed. It is undeniable that the composition of our Nation's work force has changed drastically since 1923. Not only has the number of women wage earners increased by 600 percent but the percentage of minorities in the work force has also increased significantly during the past 63 years. Census Bureau statistics show that the earning capacity of households headed by women and minorities has been severely restricted. Certainly careful scrutiny of the pay and classification practices of our Nation's largest employer, the Federal Government, is in order, Now.

The general schedule divides Federal positions according to difficulty, responsibility, and the qualifications necessary to perform them. H.R. 3008 would establish a bipartisan commission to determine whether pay equity is a reality in the Federal Government or whether occupations in which women and minorities are concentrated have been undervalued.

It would study only policies appecting the Federal Government's civil service: Local and private sector hiring and payment practices are not provided for in H.R. 3008 nor is a national wage scale created.

Job content and economic analysis will be carefully reviewed with full recognition of seniority and merit factors; market factors are an essential consideration in an accurate study of this nature.

Lastly, H.R. 3008 does not presume that any existing wage gap is due to discriminatory practices; it merely seeks an explanation for the wage differential evident in the income of men and women Federal employees.

The Federal Government should take a leadership role in investigating its wage setting process. Pay equity for women and minority employees in the Federal work force deserves the full support of Congress. I urge my colleagues to vote in favor of H.R. 3008.

Mr. BEDELL. Mr. Chairman, I rise today in support of H.R. 3008, the Federal Equitable Pay Practices Act of 1985.

H.R. 3008 is an important effort which certainly warrants our strong support. We cannot deny that there is a definite gap between the average earnings of women and the average earnings of men in the Federal civil service pay classification system. As we cannot continue to ignore this, H.R. 3008 mandates that we look more closely at the factors that contribute to this gap seen too often in the lower salaries of women and minorities. It is the purpose of this study to determine whether or not discriminatory wage practices, based on gender or racial/ethnic origins, exist in Federal Government. As the Federal Government is the Nation's largest employer, I firmly believe that its wage and classification systems should not remain outside our scrutiny. This legislation simply calls for a study of this matter. What can possibly be wrong with studying an issue.

Pay equity simply means that wages and classifications are based on skill, effort, responsibility, and the working conditions of an occupation. It requires that jobs not be evaluated on the basis of sex or race. This study will address the presence or absence of pay equity in our Federal wage and classification system. It is only fair to our Federal employees that such a study be conducted.

It is clear that this legislation is an important step toward a better understanding of the wage gap in our Federal civil service pay classification system, and what we might do to correct it.

Mr. MARTINEZ. Mr. Chairman, I rise today to encourage my colleagues on both sides of the aisle to support H.R. 3008, the Equitable Pay Practices Act of 1985. As you may recall, on August 1, H.R. 3008 was briefly debated, and an open rule was adopted.

I am concerned about the barrage of misinformation that had surrounded the pay equity study during the 2 weeks prior to the debate. Some of my colleagues, in an attempt to scare away supporters of this vital piece of legislation, sought to distort the pay equity issue by calling it a national comparable worth program. The notion that authorizing a study to examine discrimination in the Civil Service System will automatically lead to the implementation of a national comparable worth classification scheme, is as ridiculous as the notion that passing an equal rights amendment will automatically lead to coed public restrooms. Unfortunately, those who spread such misinformation are effective in their job, and the unfounded fears of comparable worth and a pay czar seem very real among certain sectors of our business community.

May we set the record straight? H.R. 3008 is not a comparable worth classification scheme, nor does it create any new legislation. Simply put, the Federal Equitable Pay Practices Act mandates a study of the Federal pay and classification systems to determine whether they are affected by discrimination based on sex, race, or Hispanic origin. H.R. 3008 only applies to the Federal Government. Only Federal, classified jobs and salaries will be examined, and any resulting recommendations will be confined solely to the Federal Civil Service System.

As I have stated to you before, the Federal Government should not be afraid to examine its hiring practices to determine whether or not discrimination exists. Shunning this social responsibility indicates that the Federal Government is not truly serious in its commitment to civil rights. I would like to remind my colleagues that the Federal Government is not above the law, and should be subject to those very laws it passes to govern the rest of our society.

For the past 20 years the Federal Government has been one of the driving forces behind the advancement of civil rights in this Nation. The Supreme Court took a leading role in 1954 with its decision in Brown versus the Board of Education which ruled that segregation was unconstitutional. With this landmark ruling came a commitment on the part of the Federal Government to protect the rights of all its citizens, regardless of sex, race, or ethnicity. The Pay Equity Act of 1963 and the Civil Rights Act of 1964 are tangible exam-

ples of this commitment, and illustrate the pivotal role the Federal Government can play in eliminating discrimination from our society.

In closing let me state that as legislators, we are responsible for the rights of all our fellow citizens, regardless of their sex, race, or ethnicity. Defeating H.R. 3008 would represent an abandonment of our commitment to the civil rights, and to the trust our constituents put in us to see that they are all treated fairly and equally.

Mr. LANTOS. Mr. Chairman, today's working women are concentrated in low paying, unskilled to semiskilled clerical and service positions. This is true despite the fact that women have entered the work force in record numbers in recent decades and more than half of the women in the United States are now employed. The consequences of this are shocking. The 1980 census showed that women working full-time, year-round earn an average of only 59 cents for every dollar earned by men.

Furthermore, Mr. Chairman, this injustice continues despite the fact that for two decades now the Equal Pay Act has been the law of the land. This act prohibits employers from paying female workers less than male workers performing the same job. Clearly, however, this legislation has not been successful. Clearly, enormous and unacceptable differences remain between the compensation received by male and female workers. Clearly, action to reduce those differences is essential.

Although the Federal Government has made great strides in some areas of assuring equal treatment of women, pay equity is not one. The Federal Government is the largest employer in our Nation with 2.8 million workers on its payroll. Of that number, 46 percent are women. As in so many other areas, the majority of these women held the lowest-paying positions. Last year, women employed by the Federal Government earned an average annual salary of $17,000, while male workers earned an average annual salary of $28,000—a gap of $9,000.

Mr. Chairman, I fully and enthusiastically support the Federal Equitable Pay Practices Act (H.R. 3008) being considered by the House. This legislation is an essential first step toward remedying pay inequity. The bill mandates study and review to identify discriminatory wage setting practices and discriminatory wage differentials. The study will determine to what extent discrimination on the basis of sex, race, and ethnicity is present in the Federal pay and classification systems.

Women employed by the Federal Government are paid less than men because of a classification system which is biased against the skill, responsibilities, and duties of predominantly female jobs. This trend must be reversed. The Federal Government must take the lead in establishing gender-neutral compensation.

In approving this bill, however, the Congress is doing more than mandating a study. It is also making a moral commitment to take action to deal with the inequities that are found. This bill puts the Federal Government on record in favor of action on pay equity, both the Federal Government and elsewhere throughout our economy.

Mr. Chairman, the massive increase in the number of women in the labor force over the past two decades has made the continuation of sex-based discrimination untenable. The Federal Government has the responsibility to set the pace in achieving pay equity. The Federal Government must lead the way to reduce and eliminate this unacceptable gap. I urge support of this bill.

The CHAIRMAN. Are there further amendments?

Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker, having resumed the Chair, Mr. TORRES, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3008) to promote equitable pay practices and to eliminate discrimination within the Federal civil service, pursuant to House Resolution 241, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

DEBT CEILING EXTENSION

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent to speak out of order.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

Mr. MICHEL. Mr. Speaker, reserving the right to object, I do so because I understand the distinguished chairman of the Ways and Means Committee, the gentleman from Illinois [Mr. ROSTENKOWSKI], has asked for unanimous consent to explain some action having to do, I am sure, with the extension of the debt ceiling and what action may or may not have taken place in the other body that would affect us, and only for the purposes of having the distinguished chairman explain to us what he has in mind would I make this reservation at this time.

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Illinois.

Mr. ROSTENKOWSKI. Mr. Speaker, I wish to explain the thinking behind our decision not to agree to the limitation on the authority of Treasury to use Federal Financing Bank Act borrowings. Members should be aware that what the other body has done does not, in our opinion, amount to an extension of the Federal debt limit.

However, it does limit the authority the Treasury Department has to borrow from the FFB.

H.R. 3453, as passed by the House of Representatives, provided a short 45-day extension of the Superfund taxes the Congress enacted in 1980. Those taxes expired on September 30, 1985. H.R. 3453 would have continued the taxes through November 14, 1985, so that the Congress would have adequate time to act on a long-term reauthorization of the Superfund Hazardous Waste Cleanup Program.

The Senate amendment deletes the Superfund tax extension and puts in its place an amendment to the Federal Financing Bank Act of 1975. The amendment decreases the authority of the FFB to borrow from $15 billion to $5,000,010,000. Earlier today, the Treasury used this authority to increase FFB borrowings by $5 billion in order to prevent default on U.S. Government obligations.

□ 1815

The Senate amendment would require that beginning October 18, all FFB borrowings be counted toward the public debt subject to limit. The effect of this amendment then is to retain the current debt limit of $1,823.8 billion but require action to increase that limit by October 18. The $5 billion borrowed by the Treasury today using the FFB authority is expected to provide the Treasury with sufficient cash only through October 17.

The present debt crisis has resulted from the failure of the other body to pass House Joint Resolution 372, the debt ceiling bill passed by this House in August when the final budget resolution was agreed to. Failure to extend the debt ceiling has denied interest earnings to various trust funds and will result in higher future interest payments when the Treasury eventually goes back into the market with larger than anticipated issues. The securities sold today undoubtedly carry a higher interest rate because of the unprecedented use of FFB authority and the uncertainties created by the current crisis.

The effect of the Senate's action in sending H.R. 3453 back to this body is to shorten the time period before a difault must occur. That is because as amended H.R. 3453 would restrict the availability of FFB borrowing authority by roughly two-thirds of its current account. It would virtually insure that on or very shortly after October 18, we would face an absolute up or down decision on extending the debt. For those advocating the so-called Gramm-Rudman amendment as passed by the Senate, without much or any significant review by this body, that is a desirable end. For those in this Chamber, however, who feel that this body should have sufficient time to carefully scrutinize this major change in our budget process, it could truly mean a disaster.

By not agreeing to restricting Treasury's access to FFB authority, we effectively lengthen the time available

to this body to consider the Gramm-Rudman amendment in conference until approximately the end of this month. that is not an unreasonable amount of time given the face that Gramm-Rudman amounts to a fundamental restructuring of the Budget Act. In short, this is why the decision has been made not to accept the other body's action in this matter.

The long and short of it is that what the amendment offered by the Senate did was restrict the time available to the House on Gramm-Rudman and give us more time constraints. Effectively this shortens the opportunity for us to look into what actualy Gramm-Rudman means.

Mr. MICHEL. If I might inquire of the distinguished chairman, the chairman is saying that at this time at least, the majority side would not want to accept the proposal of the other side that we authorize the financing of further obligations under that Federal Financing Bank by some $5 billion. Is that correct?

Mr. ROSTENKOWSKI. Well, what I understand the amendment to do is to restrict to $5 billion all the amounts that the Treasury could borrow.

What the gentleman from Illinois is suggesting is that there is now $15 billion in FFB authority, and that money should be available for the Treasury to continue to operate until approximately the 1st of November.

I have discussed this with the Secretary, and he has agreed that there is $15 billion there.

Mr. MICHEL. Would the gentleman be able to wager a guess as to what additional amount this is going to cost us in interest, then, to do what the gentleman suggests as distinguished from what the other body has proposed that we do?

Mr. ROSTENKOWSKI. I do not know exactly what in interest payments the increase would mean. I do know, however, that it would cost more; and then again when, after October 1, the Treasury was to go to the market, there will be the increased debt of $15 billion plus a higher market rates for the Treasury notes due to heavier borrowing.

Mr. MICHEL. Now, for Members' education here with respect to timing, here we are on Wednesday and we will be in session tomorrow, but we had earlier agreed that we would be off Friday, we would be off Monday and Tuesday. What does this suggest for the Members of the timing of when we would enjoin this isue?

Mr. ROSTENKOWSKI. Well, it is actually, Mr. Leader, up to the Senate. When the Senate gets to us the measure that we will consider, I am sure that this body will go to conference as fast as possible.

Mr. MICHEL. If the gentleman could hypothesize for a moment, if what the other body has done is at odds with what this body would do, and there would be a necessity for going to conference, when would the gentleman suggest that there might be a conference on the difference between what this body might do as against what the other body might do expectedly tomorrow?

The SPEAKER. Can the Chair intervene at this time? As I understand it, the Senate is still debating the legislation and will be doing so until tomorrow; we do not know a time certain.

Mr. MICHEL. I understand.

The SPEAKER. Until the matter comes to the House, you are asking something out of the question.

Mr. MICHEL. Mr. Speaker, I was just attempting to try to give Members a sense of what the timing might be beyond tomorrow.

Let me pose this question, then: Is there any possibility or prospect of the Members having to be here Friday?

The SPEAKER. The Chair would hope that if and when the bill gets here, at a reasonable hour tomorrow, that the gentleman from Ways and Means would come to the floor and ask for a conference on the matter; we would go forth with naming the conferees.

Mr. ROSTENKOWSKI. And the conference would meet, Mr. Speaker, as soon as possible; but we cannot make a judgment until such time as we receive the document from the other body.

Mr. MICHEL. Let me pose just one other question to the distinguished chairman.

Does the distinguished chairman agree that it is appropriate for the Treasury to borrow from the Federal Financing Bank without our formalization?

Mr. ROSTENKOWSKI: As I understand the Treasury's position, it has an obligation to borrow, to meet the Treasury's warrants, and this is an unusual situation, and certainly they prefer not to, but they have an obligation.

Mr. MICHEL. Well, from what little this gentleman knows about the subject, having discussed it somewhat during the course of the past week in some degree, it was not altogether clear that there was authorizing authority for the Treasury to do that. There was some question on the part of those downtown that they really had that authority, and then would run afoul of what legislative intent and authority was.

Mr. ROSTENKOWSKI. Well, evidently that has been resolved, because the Treasury did borrow $5 billion today.

Mr. MICHEL. But I would like to have the gentleman's expression as to whether or not he thinks that is appropriate.

Mr. ROSTENKOWSKI. Whether it is or not, the other body has postured the Treasury Department into this position, and the Treasury has borrowed.

Mr. MICHEL. Well, I will not press the case any further other than that the Federal Financing Bank, of course, is under the gentleman's authority or jurisdiction in the Committee on Ways and Means, and I want to make absolutely sure that we were not running afoul of the law in doing that, and that we were on good, sound grounds if that is what the Treasury has decided to do; and the question certainly would not come after the fact that you went ahead and did something that was counter to what this Congress would like to have you do.

Mr. ROSTENKOWSKI. Well, the Treasury Department, on Thursday of last week made the observation that they had the authority; and the gentleman from Illinois would have to accept what has happened today because the Treasury went out and borrowed, of the $15 billion, $5 billion today.

Mr. MICHEL. Well, Mr. Speaker, I assume we are going to be here tomorrow and then we will probably—overnight with what takes place in the other body, probably have a little better picture on exactly where we go from there, and undoubtedly we will require another dialog at that time between whomever, the majority leader or the Speaker himself, that we might know to better advise our Members, then, what to expect in the next week or so.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. The minority leader withdraws his reservation of objection.

Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. STENHOLM. Mr. Speaker, I demand a separate vote on the Committee amendment inserting in section 7(c), paragraph 4.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The Clerk will report the amendment on which a separate vote has been demanded.

The Clerk read as follows:

Amendment: Page 13, after line 9, add the following:

(4) Also included under subsection (a)(2) shall be the Commission's determination as to whether any portion of any differential identified under subsection (b)(1) which cannot be accounted for by the application of job-content and economic analyses may be inconsistent with the general policy expressed in section 2(a) that sex, race, and ethnicity should not be among the factors considered in determining any rate of pay.

The SPEAKER. The question is on the amendment.

□ 1825

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that if a rollcall vote is ordered on this amendment, it be a 15-minute vote to be followed by a 5-minute vote on final passage.

The SPEAKER. The Chair does not think it is necessary.

Mr. FORD of Michigan. Excuse me, Mr. Speaker. I am informed that the gentleman will not ask for a rollcall. Mr. Speaker, I ask unanimous consent to withdraw my request.

The SPEAKER. The question is on the amendment.

The question was taken, and on a division (demanded by Mr. STENHOLM) there were—ayes 181, noes 141.

So the amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

RECORDED VOTE

Mr. ARMEY. Mr. Speaker, on that I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 259, noes 162, not voting 13, as follows:

[Roll No. 352]

NOT VOTING—13

Addabbo	Fowler	McKinney
Brown (CA)	Green	Solomon
Carney	Kildee	Wright
Conyers	Lent	
Early	Lungren	

□ 1840

The Clerk announced the following pairs:

On this vote:

Mr. Kildee for, with Mr. Lungren against.

Mr. Green for, with Mr. Carney against.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Ms. OAKAR. Mr. speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous material, on H.R. 3008, the bill just passed.

The SPEAKER pro tempore (Mr. BRUCE). Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3453. An act to amend the Internal Revenue Code of 1954 to extend the Superfund taxes for 45 days.

DESIGNATING A CHANNEL IN COLORADO AS THE "FRANKLIN EDDY CANAL"

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 3443) to designate the Closed Basin Conveyance Channel of the Closed Basin Division, San Luis Valley Project, Colorado, as the "Franklin Eddy Canal."

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. STRANG. Mr. Speaker, reserving the right to object, I will not object, but I take this action to ask the gentleman to explain what is involved.

Mr. SEIBERLING. Mr. Speaker, if the gentleman will yield, this measure simply dedicates a portion of the

Closed Basin Division of the San Luis Valley Project in Colorado to Franklin Eddy, a man who dedicated many years of his life in helping to bring this project into reality. It involves no expense to the Federal Government.

Mr. STRANG. Mr. Speaker, I want to compliment and commend the chairman of the committee, the distinguished gentleman from Arizona [Mr. UDALL], and the distinguished chairman of the Subcommittee on Water and Power Resources, the gentleman from California [Mr. MILLER], for their courtesy in recognizing this great public citizen of this country.

(Mr. STRANG asked and was given permission to revise and extend his remarks.)

Mr. STRANG. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the bill, as follows:

The bill ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

H.R. 3443

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION OF CLOSED BASIN CONVEYANCE CHANNEL AS THE "FRANKLIN EDDY CANAL."

The Closed Basin Conveyance Channel of the Closed Basin Division, San Luis Valley Project, Colorado, constructed, operated, and maintained under Public Law 92-514, as amended, hereafter shall be known and designated as the "Franklin Eddy Canal.".

SEC. 2. REFERENCES TO CHANNEL.

Any reference in any law, regulation, document, record, map, or other paper of the United States to the channel referred to in Section 1 is hereby deemed to be a reference to the "Franklin Eddy Canal.".

USE AND DISTRIBUTION OF FUNDS AWARDED TO MDEWAKANTON AND WAHPEKUTE EASTERN OR MISSISSIPPI SIOUX

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate bill (S. 1349) to provide for the use and distribution of funds awarded in docket 363 to the Mdewakanton and Wahpekute Eastern or Mississippi Sioux before the U.S. Court of Claims and Claims Court.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

Mr. STRANG. Mr. Speaker, reserving the right to object, will the gentleman explain what is involved?

Mr. SEIBERLING. If the gentleman will yield, Mr. Speaker, S. 1349 authorizes the distribution of certain funds awarded to the Mississippi or Eastern Sioux Indians by the Court of Claims in docket No. 363.

The total amount of the award in this docket exceeds $4,800,000. Funds to satisfy the award have already been appropriated by Congress and only await enactment of this legislation for their distribution.

The successors-in-interest to the historical Mississippi Sioux Tribes involved are the Santee Sioux of Nebraska, the Flandreau Santee Sioux of South Dakota, the Lower Sioux Indian Community of Minnesota, the Prairie Island Sioux of Minnesota, and the Shakopee Sioux of Minnesota.

All relevant parties support enactment of this legislation. The administration supports this bill as amended by the Senate.

Mr. STRANG. Mr. Speaker, I support the legislation.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1349

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. (a) That notwithstanding any other law, except as provided in subsection (b) of this section, the funds for awards to the Mdewakanton and Wahpekute Sioux appropriated on January 30, 1981 ($800,000), on October 15, 1982 ($591,058), and one-half of the funds appropriated on March 2, 1981 ($7,500), all in docket numbered 363 before the United States Court of Claims, and the funds appropriated on August 1, 1983 ($3,468,246.48), in docket numbered 363 before the United States Claims Court, less attorney fees and litigation expenses, and including all interest and investment income accrued, shall be divided by the Secretary of the Interior (hereinafter the "Secretary") as follows:

	Percent
(1) Santee Sioux Tribe of Nebraska...	58.69
(2) Flandreau Santee Sioux Tribe.....	15.84
(3) Prairie Island Sioux, Lower Sioux, and Shakopee Mdewakanton Sioux Communities of Minnesota to be divided on the basis of the respective members of each of the three communities, born on or prior to and living on the date of this Act.....	25.47

(b) To the share of the Santee Sioux Tribe of Nebraska in subsection (a) of this section shall be added $172,363.20, and to the share of the Flandreau Santee Sioux Tribe $135,244.32, both sums appropriated on August 1, 1983, in docket numbered 363, less attorney fees and litigation expenses, and including all interest and investment income accrued.

SEC. 2. The share of the Santee Sioux Tribe of Nebraska shall be used and distributed as follows:

(a) Eighty per centum of the funds appropriated shall be used and distributed as follows:

(1) the Secretary shall make a per capita distribution of $300 to each tribal member born on or prior to and living on the date of this Act, except that those members at least sixty years of age on that date shall be paid $900.

(2) the balance of the 80 per centum portion of the funds shall be invested by the Secretary for a tribal investment fund designed to yield periodic dividend payments to all tribal members born on or prior to and living on the dates such dividend payments are declared. Only the interest and investment income accrued shall be available for dividend payments. The amounts and payment dates shall be determined by the tribal governing body with the approval of the Secretary, and the first of such payments shall not be made earlier than five years from the date of the per capita payment in paragraph (1) of this subsection.

(b)(1) Twenty per centum of the funds shall be utilized for tribal social and economic development purposes, and for the establishment of a tribal burial fund; $200,000 of such program funds shall be invested by the Secretary for the purpose of establishing a burial fund utilizing the interest and investment income accrued. Such funds shall not be available for burial services until two years after the date of initial investment. The tribal governing body, with the approval of the Secretary, shall develop criteria for the implementation of tribal burial services.

(2) The balance of the 20 per centum portion shall be invested by the Secretary and the interest and investment income accrued shall be utilized by the tribal governing body on a budgetary basis, with the approval of the Secretary, for programs designed to enhance the social and economic development of the tribe. None of the 20 per centum programming portion of the funds shall be available for per capita or dividend payments.

SEC. 3. The share of the Flandreau Santee Sioux Tribe shall be used and distributed as follows:

(a) Twenty-five per centum of the funds shall be distributed in the form of per capita payments to each tribal member born on or prior to and living on the date of the enactment of this Act, except that those members at least sixty years of age as of that date shall be paid twice the amount of other per capita recipients.

(b) Seventy-five per centum of the funds (which includes funds previously advanced to the tribal governing body) shall be used by the tribal governing body on a budgetary basis, with approval of the Secretary, for programs designed to enhance the social and economic development of the tribe. None of the 75 per centum programming portion of the funds shall be available for per capita payments.

SEC. 4. The share of the Prairie Island Sioux Community shall be used and distributed as follows:

(a) Eighty per centum of the funds shall be invested by the Secretary for a Tribal Investment Fund designed to yield periodic dividend payments to all tribal members born on or prior to and living on the dates such dividend payments are declared. Only the interest and investment income accrued shall be available for dividend payments. The amounts and payments dates shall be determined by the tribal governing body with the approval of the Secretary.

(b) Twenty per centum of the funds shall be utilized by the tribal governing body on a budgetary basis, with the approval of the Secretary, for programs designed to enhance the social and economic development

of the tribe. None of the 20 per centum programming portion of the funds shall be available for per capita or dividend payments.

SEC. 5. The share of the Lower Sioux Indian Community shall be used and distributed as follows:

(a) Eighty per centum of the funds apportioned shall be used and distributed as follows:

(1) the Secretary shall make a per capita distribution of $300 to each tribal member born on or prior to and living on the date of the enactment of this Act;

(2) one year from the date that the per capita payments in paragraph (1) of this subsection are made, an additional per capita payment of $300 shall be made to each tribal member who is at least sixty years of age living on such date;

(3) the balance of the 80 per centum portion of the funds shall be invested by the Secretary for a Tribal Investment Fund designed to yield periodic dividend payments to all tribal members born on or prior to and living on the dates such dividend payments are declared. Only the interest and investment income accrued shall be available for dividend payments. The amounts and payment dates shall be determined by the tribal governing body with the approval of the Secretary, and the first of such payments shall not be made earlier than five years from the date of the per capita payment in paragraph (1) of this subsection.

(b) Twenty per centum of the funds shall be invested by the Secretary and the interest and investment income accrued shall be utilized by the tribal governing body on a budgetary basis, with the approval of the Secretary, for programs designed to enhance the social and economic development of the tribe. None of the 20 per centum programming portion of the funds shall be available for per capita or dividend payments.

SEC. 6. The share of the Shakopee Mdewakanton Sioux Community shall be used and distributed as follows:

(a) Eighty per centum of the funds shall be invested by the Secretary for a Tribal Investment Fund designed to yield periodic dividend payments to all tribal members born on or prior to and living on the dates such dividend payments are declared. Only the interest and investment income accrued thereon shall be available for dividend payments. The amounts and payment dates shall be determined by the tribal governing body with the approval of the Secretary.

(b) Twenty per centum of the funds shall be invested by the Secretary and the interest and investment income accrued shall be utilized by the tribal governing body on a budgetary basis, with the approval of the Secretary, for programs designed to enhance the social and economic development of the tribe. None of the 20 per centum programming portion of the funds shall be available for per capita or dividend payments.

GENERAL PROVISION

SEC. 7. (a) No person shall receive benefit payments as a member of more than one of the tribes under this Act. An individual who is a member of more than one of the tribes under this Act must designate the tribe from which he or she will receive per capita or dividend payments prior to receiving a per capita or dividend payment under this Act.

(b) The per capita shares or dividend payments of living, competent adults shall be paid directly to them. The shares or payments of deceased individuals, legal incompetents and minors, shall be determined and distributed under regulations prescribed by the Secretary pursuant to the Act of October 19, 1973 (87 Stat. 466), as amended (96 Stat. 2512; 25 U.S.C. 1401 et seq.).

SEC. 8. Per capita and dividend payment distributions made pursuant to this Act shall be subject to the provisions of section 7 of the Act of October 19, 1973 (87 Stat. 466), as amended, (96 Stat. 2515; 25 U.S.C. 1407).

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the two bills just passed, H.R. 3443 and S. 1349.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

WORLD FOOD DAY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 72) to designate October 16, 1985, as "World Food Day," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but I would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation, I yield to the gentleman from New York [Mr. GILMAN], who is the chief sponsor of Senate Joint Resolution 172, World Food Day.

Mr. GILMAN. I thank the gentleman for yielding.

Mr. Speaker, I want to commend the gentleman from New York [Mr. GARCIA] and the gentleman from Utah [Mr. HANSEN] for bringing this measure to the floor at this time.

Mr. Speaker, recent events such as the "Live Aid" Concert and the U.S.A. for Africa production of "We are the World" only in part document the incredible contribution thousands of Americans are making toward ending world hunger.

Since 1979, the National Committee for World Food Day under the leadership of its chairwoman, Patricia Young, has undertaken hundreds of projects and programs related to the world's hunger problem. Without "World Food Day" and the organizations involved with its celebration, the ground swell needed that made the recent media events possible would never have existed.

Americans can be proud of the fact that one-half of all the food committed this year to Africa has been donated by the United States. Individuals have sent over $120 million to private voluntary organizations such as "CARE" and "Save the Children."

Additionally, the U.S. Government has sent a total of $125 billion for the drought since the emergency first came to national attention last October. This is in addition to $1 billion the U.S. Government is spending on nonemergency projects in Africa this year.

Yet, despite this impressive outpouring of support, the problem of world hunger persists. Some 17 countries in Africa are still being impacted by drought—150 million people. And 13 million are at immediate risk of dying. Every 24 hours, 42,000 children under the age of 5 die as a result of hunger and related diseases.

These grim statistics make a strong case for a continued commitment of private and Government funds to ending hunger. But emergency relief aid is not enough. A concerted effort must be made to improve the deteriorating conditions that result in tragedy after tragedy—the same conditions that allow famine and starvation to persist and remain a reality in a world with more than enough resources to feed its population. It is time to work to prevent disasters from occurring—to solve the problems which face Africa now.

Recently, I introduced H.R. 2782, legislation to prevent famine in Africa. H.R. 2782 responds to the root of the problem that faces a continent whose population is growing at the fastest rate in the world—3 percent per year—while at the same time the productivity of the land is declining rapidly. Since 1967, Africa's grain output per person has dropped by nearly one-third and 40 percent of the continent's people live in countries where grain yields are lower than a generation ago.

In order to help Africa become self-sufficient and economically independent, there must be a global effort made to restore and preserve its own productive resources.

Reversing Africa's decline will involve immediate response to the crisis of desertification—that is, degeneration of land's productivity—which results from overly intensive and exploitative use of land in response to the needs of the growing population. At this point in time, 77.2 percent of the 4,500 million hectares of dryland in the world are already affected by desertification and 21 million of these per year are reduced to near or total

uselessness. If this trend is not reversed, there will be no end to Africa's dependency on more developed countries for food and economic assistance.

A major cause of Africa's current problems is the lack of a renewable energy supply. Firewood, the most widely used source of fuel, is becoming increasingly scarce due to the overharvesting of trees. Forests in coastal west Africa were being cleared at a rate of 5 percent per year in the early 1980's; at that rate, in 13 years those forests will be half of their original size. The scarcity of trees also has implications for soil and crop quality. Trees help to prevent soil erosion caused by damaging winds and floods. Without any protection, soil ceases to be fertile enough to produce significant quantities for food.

Simply to maintain Africa's present per capita food consumption, agricultural output will have to grow 50 to 60 percent between the years 1980–2000. Considering the monumental suffering that exists with the present level of food consumption, it is clear that drastic measures must be undertaken to revive Africa's capacity to produce.

The time has come to begin to turn back the tide of the degradation of Africa's agricultural resource base that should be providing food for that continent's people. The desertification and deforestation which have played a major role in causing the present catastrophe in Africa needs our immediate attention if we are to put an end to this cycle of famine.

□ 1855

Mr. HANSEN. Mr. Speaker, under my reservation I yield to the gentleman from Texas [Mr. LELAND].

Mr. LELAND. I thank the gentleman for yielding to me.

Mr. Speaker, I would like to associate myself with the remarks made by the gentleman from New York [Mr. GILMAN]. I would also like to thank the gentleman from New York [Mr. GARCIA] for his expediting this legislation in the manner in which he did.

Mr. Speaker, I am pleased to rise in support of House Joint Resolution 172, a resolution to designate October 16 as World Food Day. I have worked for many years with the sponsor of this resolution, my esteemed colleague from New York, Representative BEN GILMAN. Together we supported the establishment of the House Select Committee on Hunger to provide a congressional forum for the important issues of world food and world hunger. This resolution, by calling attention to these critically important matters every year on October 16, serves as a unique opportunity to join hundreds of organizations around the world in focusing attention on world food and hunger issues.

There are already over 240 cosponsors of this resolution. I appreciate the leadership and support of Representative BEN GILMAN in this effort, and encourage all of my colleagues to join in support of designating October 16 as World Food Day. Together we can be effective in the struggle to provide food and alleviate hunger in our world.

Mr. Speaker, I associate myself with the remarks of the gentleman from New York [Mr. GILMAN].

Mr. HANSEN. Mr. Speaker, under my reservation, I yield to the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. I thank the gentleman for yielding.

Mr. Speaker, I want to associate myself with Mr. LELAND and Mr. GILMAN. I have worked with Mr. LELAND many, many times on this hunger problem around the world. I want to commend the gentleman.

Mr. LELAND. I thank the gentleman.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 72

Whereas hunger and chronic malnutrition remain daily facts of life for hundreds of millions of people thoughout the world and famine is again afflicting so many of the countries of Africa;

Whereas the children of the world suffer the most serious effects of hunger and malnutrition, with millions of children dying each year from hunger-related illness and disease, and many others suffering permanent physical or mental impairment, including blindness, because of vitamin and protein deficiencies;

Whereas Congress is particularly concerned by the rise of hunger, recurring natural catastrophes, and inadequate food production and distribution now affecting a large number of African countries and the need for an appropriate United States response to emergency and long-term food needs of that continent;

Whereas there is growing recognition that improved agricultural policies, including farmer incentives, are necessary in many developing countries to increase food production and national economic growth;

Whereas there is a need to increase the involvement of the private voluntary and business sectors, working with governments and the international community, in the search for solutions to food and hunger problems;

Whereas although progress has been made in reducing the incidence of hunger and malnutrition in the United States, certain groups, notably Native, Americans, migrant workers, the elderly, and children, remain vulnerable to malnutrition and related diseases;

Whereas national policies concerning food, farmland, and nutrition require continuing evaluation and should consider and strive for the well-being and protection of all residents of the United States and particularly those most at health risk;

Whereas there is widespread concern that the use and conservation of land and water resources required for food production throughout the United States ensure care for the national patrimony we bequeath to future generations;

Whereas the United States has always supported the principle that the health of a nation depends on a strong agriculture based on private enterprise and the primacy of the independent family farm;

Whereas the United States, as the world's largest producer and trader of food, has a key role to play in efforts to assist countries and people to improve their ability to feed themselves;

Whereas the United States has a long tradition of demonstrating its humanitarian concern for helping the hungry and malnourished;

Whereas efforts to resolve the world hunger problem are critical to the maintenance of world peace and therefore to the security of the United States;

Whereas Congress is acutely aware of the paradox of immense farm surpluses and rising farm foreclosures in the United States despite the desperate need for food by hundreds of millions of people around the world;

Whereas a key recommendation contained in the 1980 report of the Presidential Commission on World Hunger is that efforts be undertaken to increase public awareness of the world hunger problem;

Whereas the member nations of the Food and Agriculture Organization of the United Nations designated October 16 of each year as World Food Day because of the need to alert the public to the increasingly dangerous world food situation;

Whereas the Food and Agriculture Organization was conceived at a conference in Hot Springs, Virginia, with a goal of freedom from hunger and 1985 marks the fortieth anniversary of the organization's existence;

Whereas past observances of World Food Day have been supported by proclamations of the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States, by resolutions of Congress, by Presidential proclamations, by programs of the United States Department of Agriculture and other Government departments and agencies, and by the governments and peoples of many other nations; and

Whereas more than three hundred and thirty private and voluntary organizations and many thousands of community leaders are participating in the planning of World Food Day observances for 1985: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 16, 1985, is hereby designated as "World Food Day", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that day with appropriate activities to explore ways in which our Nation can further contribute to the elimination of hunger in the world.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL HOSPICE MONTH

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 155), to designate the month of November 1985, as "National Hospice Month," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but I would simply like to inform the House the minority has no objection to the legislation now being considered.

Mr. GILMAN. Mr. Speaker, I rise in support of House Joint Resolution 288, designating November 1985, as "National Hospice Month." As a cosponsor of this bill, I would like to commend the gentleman from Ohio [Mr. GRADISON], and the gentleman from California [Mr. PANETTA], for bringing this bill before us today. November is a particularly appropriate month to be "National Hospice Month" since November 1, 1985, marks the second anniversary of the creation of the Medicare hospice option. Adoption of this bill will also provide deserved recognition to the increasing role of hospices in the care of our Nation's elderly and terminally ill.

As you may know, the percentage of our population over the age of 65 is steadily growing. The average age to which Americans are living is also growing. Most of the credit for these encouraging trends is owed to our medical professions. I would like especially to draw your attention to the credit and praise due the medical professions for their increased attention and sympathy toward the plight of the dying. Despite all of the advances made in prolonging life, it is only relatively recently that we have fully appreciated the importance of treating death with concern and dignity. Hospices have evolved and rapidly increased in numbers because the medical community has become more acutely aware of the need to give specialized care to the terminally ill.

Hospice care allows the dying to spend the remainder of their lives at home with loved ones, or at least in comfortable inpatient facilities which are not nearly as sterile or forlorn as hospital settings. Hospices allow our elderly and terminally ill to be attended to by a staff that is specially trained to meet their unique emotional and physical needs.

Yet hospices not only console the dying, but they also provide immeasurable emotional relief to the families and friends of the hospice patients. There are roughly 1,400 hospices in our Nation, and each one is staffed with a skilled team of professionals and dedicated volunteers trained to help the dying and their loved ones cope with the traumatic experience of death.

Clearly, hospices are offering valuable and needed services, and the Medicare hospice option permits people who previously could not afford treatment in a hospice to receive those services. Both the concept of the hospice and the able people who staff them have greatly advanced medical care for the dying, and these contributions truly deserve our recognition. Accordingly, in order to better educate the American public and draw national attention to the merits of hospices, I urge my colleagues to adopt House Joint Resolution 288, designating the month of November, 1985, as "National Hospice Month."

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 155

Whereas hospice care has been demonstrated to be a humanitarian way for terminally ill patients to approach the end of their lives in comfort with appropriate, competent, and compassionate care in an environment of personal individuality and dignity;

Whereas the hospice concept of care advocates care of the patient and family by attending to their physical, emotional, and spiritual needs, and specifically the pain and grief they experience;

Whereas hospice care is provided by an interdisciplinary team of physicians, nurses, social workers, pharmacists, psychological and spiritual counselors, and other community volunteers trained in the hospice concept of care;

Whereas hospice care is rapidly becoming a full partner in the Nation's health care system;

Whereas the recent enactment of the medicare hospice benefit makes it possible for many more elderly Americans to have the opportunity to elect to receive hospice care;

Whereas private insurance carriers and employers have recognized the value of hospice care by the inclusion of hospice benefits in health care coverage packages; and

Whereas there remains a great need to increase public awareness of the benefits of hospice care: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of November 1985 is designated "National Hospice Month".

SEC. 2. The President is requested to issue a proclamation calling upon all Government agencies, the health care community, appropriate private organizations, and the people of the United States to observe such month with appropriate forums, programs, and activities designed to encourage national recognition of and support for hospice care as a humane response to the needs of the terminally ill and a viable component of the health care system in this country.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL SUDDEN INFANT DEATH SYNDROME AWARENESS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 322) to provide for the designation of the week beginning October 6, 1985, as "National Sudden Infant Death Syndrome Awareness Week," and ask for its immediate consideration in the House.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. GARCIA. Mr. Speaker, will the gentleman yield?

Mr. HANSEN. I yield to the gentleman from New York.

Mr. GARCIA. I thank the gentleman for yielding.

Mr. Speaker, sudden infant death syndrome [SIDS] is the leading killer of infants between 1 week and 1 year in this country. This devastating disease comes on suddenly, without warning, striking its victims indiscriminately—whether they are black, white, Hispanic, or Asian. I know because last December I lost a grandson to SIDS.

There is nothing more tragic than to see an otherwise healthy, happy baby die. An increased awareness of SIDS will stimulate interest and support for research on its causes and eventually its cure. Hopefully, this resolution will bring attention to SIDS and its victims.

I want to thank my colleague from California for his efforts in introducing this resolution and seeing that this terrible disease is brought to the attention of the public. I would like to add that on November 14 at 10 a.m. in room 304 Cannon, my subcommittee, the Subcommittee on Census and Population, and GEORGE MILLER's Select Committee on Children, Youth, and Families will be holding a joint hearing on SIDS. I hope some of you will have the time to attend.

As part of my statement, I would like to include an essay from the May 20, 1985, edition of People magazine by another grandfather, Mr. Jess Birnabaum, who also lost a grandson to SIDS.

The article follows:

[From People magazine, May 20, 1985]

ELEGY FOR A LOST BABY

(By Jesse Barnbaum)

I had intended to write a humorous piece about first grandfatherhood. My son David and his wife, Nancy, had just produced a

healthy baby boy, and suddenly I was embarked on a rite of passage. I imagined myself a kindly sage, baiting a hook for a freckle-faced tyke—but I didn't know anything about fishing. Perhaps he could watch me whittle a stick—but I couldn't whittle, either. I'd go on in this vein, striking just the right self-deprecating tone, peppering my conceits with sly satire. Finally I'd conclude that these Norman Rockwell images were out of character. I'd be myself, take my grandson to the zoo, buy him Cracker Jacks. I'd bring him to the office, where he'd make paper-clip chains and send silly messages through the pneumatic tubes. I'd build him a darkroom and teach him to make pictures.

My funny piece would also tease the new grandmothers, who were seriously engaged in a ritual of their own, trying to find suitable names for themselves—Nana, Nanny, Mimi, Mumu, Baba, Mama, anything but Grandma—but, by gosh, I'd stick to good old Gramps, or Grandpa. No big deal. Twenty years from now my grandson would read this piece, and maybe he'd say, "Good old Gramps, rest his soul. He didn't know anything about fishing or whittling, but we sure had some fine times."

I was still ruminating when the news came. This little baby was gone, dead at 46 days of age. Sudden infant Death Syndrome—SIDS—crib death. No cry, no gasp. He lay asleep one moment, stopped breathing the next. Born on St. Valentine's Day, died on April Fool's Day, buried on Good Friday. A precious promise wiped out by a wanton prank. In America, as many as 8,000 babies die of SIDS every year, and nobody really knows why.

He was called Benjamin after my dad, William after Nancy's, and he was nicknamed Jamie. I'd seen the red, funny little thing in his first week, looking grumpy, like a tiny Churchill. Seen him again the fifth week, showing a bit of personality, the hint of a smile. Watched the happy, hovering parents delighting in the new nursery, the little electric swing, the high-tech car seat, all the latest in the best equipment, all the best in a sturdy strong-lunged baby. Born, mind you, on the 14th of February! Such timing, such a blessing! Such fun we were going to have, making paper-clip chains, going to the zoo.

Such devastation, now, such tears. Friends and family descending into the gloom. The clergyman appearing swiftly, serious and consoling, helping the bereft parents find their courage. The flowers, the calls, the gifts of food, the wordless embraces. The mourners shifting to and fro, angry and helpless, dabbing eyes, trying to understand. We prepare for the death of contemporaries and parents; even a sickly child sends us a red alert. But how can you accept the death of a sleeping infant? There are parents who wired the nursery and carried a receiver into the garden, their nerves and ears engaged, ready to spring at a cry. How can a child be denied his life? One afflicted parent tells me you never get over it. It's easy to believe.

There would be an autopsy, then cremation. David and Nancy, grieving all the while, make the "arrangements," choosing a burial place beneath a live oak tree in the children's graveyard at the cemetery. The gravediggers are on strike; supervisors will dig the hole. Not a major job, after all; a small hole, perhaps two feet deep, for a canister, scarcely bigger than a flowerpot, that will hold a plain, little paper box with a few ounces of ashes.

We drive through the cemetery gate, ignoring the glum faces of the picketers. At the graveside David kneels and places the ashes in the canister, the clergyman leads the prayers and reads a few lines from Blake. We set flowers in fresh water. Retreating, we pause to read the markers at graves nearby. This baby, 1 day old. That one, 2 weeks old. Here, a baby a month old. There, siblings, born two years apart, each living only a few days. Another baby, gone 20 years, has fresh flowers on his marker. On and on, you study the stones, intoxicated by the sorrow of parents who wept here, wondering for an instant if you aren't witnessing the end of the whole world. All those babies, those lives, all those infants' graveyards.

At the memorial service we hear spare, comforting words from the minister. He reads from the Old Testament and the New. He finds thoughtful passages from Thoreau, William James, John Muir, and we are lofted mercifully beyond mundane concerns, but only briefly. The organist plays Sheep May Safely Graze.

At the house later, when the visitors have gone, we pass photographs among ourselves. A strange little thing, at the moment of delivery. Here he is at 2 days, 5 days of life. Look: There he is, his eyes focused at last, at 5 weeks or so. Smiling, would you believe, at 6 weeks! A person at 6½ weeks. A chronicle complete in 46 days.

Next day the two grandmothers, an uncle and the parents go to work in the garden, planting flowers everywhere, igniting life into the soil, hope to the heart. David and Nancy, strong and determined, will join a group of other parents who have lost babies, sharing their sadness, consoling one another. Like those parents, they will return to their jobs, pick up their lives and start soon to have another baby. This time, we know, things will be better. Nancy's widowed mother and my wife and I will be grandparents again, making all our plans afresh—the zoo, the Cracker Jacks, everything once more, only more so. It will be my second grandchild, by gosh.

You know how a melody sometimes gets stuck in your head? A bit of a jingle, a pop tune, a snatch of a symphony,—and you can't get rid of it? Sheep May Safely Graze has that sort of tune, a simple, repetitive melody. Try as you will, you can't get it out of your mind.

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objections to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 322

Whereas Sudden Infant Death Syndrome is a recognized disease entity which kills thousands of infants each year in the United States;

Whereas Sudden Infant Death Syndrome is the leading killer of infants between the age of one week and one year.

Whereas Sudden Infant Death Syndrome knows no boundaries of race, ethnic group, region, class, or country;

Whereas the victims of Infant Sudden Death Syndrome are babies who appear healthy but who nonetheless die without warning during sleep and nap time;

Whereas the parents and siblings of Sudden Infant Death Syndrome often suffer anguish because many people are unaware of the existence of the pernicious killer;

Whereas research is underway throughout the world to identify the causes and process of the syndrome and to treat infants who can be identified as potential victims; and

Whereas an increase in the national awareness of the problem of Sudden Infant Death Syndrome may ease the burden of the families of victims and may stimulate interest in increased research into the causes and the cure of Sudden Infant Death Syndrome: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning October 6, 1985, is designated as "National Sudden Infant Death Syndrome Awareness Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe this week with appropriate activities.

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA: Amend line 3 so as to read: "That the month of October 1985 is designated as".

The SPEAKER. The question is on the amendment offered by the gentleman from New York [Mr. GARCIA].

The amendment was agreed to.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

TITLE AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. GARCIA: Amend title so as to read: Joint resolution to provide for the designation of October 1985 as "National Sudden Infant Death Syndrome Awareness Month"."

The title amendment was agreed to.

A motion to reconsider was laid on the table.

NATIONAL CHILDREN'S WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 79) to designate the week beginning October 6, 1985, as "National Children's Week," and ask for its immediate consideration in the House.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 79

Whereas there are approximately 65 million children in the Nation;

Whereas the children of the Nation are its most precious resource and its greatest hope for the future; and

Whereas a week designated for the purpose of focusing on the needs of children and the community services available to them will be beneficial both to children and to the future of the Nation: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning October 6, 1985, hereby is designated "National Children's Week", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL HOUSING WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 197) to designate the week of October 6, 1985, through October 13, 1985, as "National Housing Week," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object but simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. GILMAN. Mr. Speaker, I rise in support of Senate Joint Resolution 197, designating the week of October 6, 1985, as "National Housing Week." As a cosponsor of the House companion bill, House Joint Resolution 350, I thank the gentleman from Oregon, [Mr. AUCOIN] for bringing this bill before us today. Adoption of this resolution will help bring the housing industry, which is the backbone of both the American economy and the American dream, the recognition it justly deserves.

The desire for a comfortable yet affordable home is at the core of the American dream—a home to raise a family in, a home to be proud of, a home in a strong and caring community. The housing industry provides the homes Americans strive for, it helps to build the communities which together form this great Nation, and it helps millions to realize the American dream.

For most Americans, purchasing a home is the single biggest and most important investment of their lives. Even for those who never actually own their own homes, housing costs represent a significant portion of their income. These investments and expenditures are a proven stimulus of the economy. Indeed, the housing industry is a major driving force of the economy and is vital to our national economic health. Since World War II, the housing industry has lead the recovery from each economic recession we have suffered. Housing industry growth produces tremendous benefits for the lumber and construction industries, and it creates demands in many markets, such as the furniture, appliance and real estate markets, to name but a few.

This year's figures for the housing industry are illustrative of this very point; and 1.7 million houses and apartments are expected to be started this year. These figures translate into 2.4 million jobs, $95.2 billion in wages, and $20.7 billion in Federal, State, and local tax revenues. Clearly, the housing industry is a leading and essential component to our continued economic recovery and growth.

During my 13 years in the House of Representatives, and previously as a New York State assemblyman, I have paid special attention to the housing needs of my constituents. Just recently I was able to secure a rental rehabilitation grant from the Department of Housing and Urban Development for my constituents in Westchester County. These funds will be used to make much needed improvements in housing units that have, with the passage of time, deteriorated and are in substandard conditions. These funds will also be used to make the housing accessible to the handicapped and will create jobs. The housing industry plays an integral role in our communities as well as in the national economy.

A week of recognition is a fitting appreciation for an industry that so positively affects both the economy and the quality of life in America. Accordingly, I urge my colleagues to adopt Senate Joint Resolution 197, establishing the week of October 5, 1985, as "National Housing Week."

Mr. HANSEN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 197

Whereas the combined commitment of the Federal Government with the strength and ingenuity of private enterprise has brought decent housing to an overwhelming majority of all Americans;

Whereas the opportunity to own a home and live on decent housing strengthens the family, the community, and the Nation, giving individual Americans a stake in the local community and stimulating political involvement;

Whereas the housing industry has led the Nation to economic recovery following every recession since World War II by creating millions of productive jobs for the unemployed, generating billions of dollars worth of tax revenue, and creating demand for goods and services;

Whereas shelter is one of the basic needs for all individuals, and the production of affordable housing is an important concern at all levels of government; and

Whereas it is appropriate to reaffirm the national historical commitment to housing and homeownership and to recognize the economic opportunities created by the present housing recovery: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled. That the week of October 6, 1985, through October 13, 1985, is designated as "National Housing Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MYASTHENIA GRAVIS AWARENESS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 183) to provide for the designation of the week of October 6 through October 12, 1985, as "Myasthenia Gravis Awareness Week," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object. I would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation, I yield to the gentleman from Massachusetts [Mr. CONTE], who is the chief sponsor of the resolution.

Mr. CONTE. Mr. Speaker, I want to thank Mr. GARCIA and Mr. HANSON from the Post Office and Civil Service Committee for bringing this bill to the floor today.

Mr. Speaker, this resolution designates the week of October 6-12 as Myasthenia Gravis Awareness Week. This disease—also known as Erb-Goldflam disease—is a neuromuscular disease affecting men and women of all ages and races. Currently there are over 100,000 victims in America.

The disease weakens the victim to the extent that some have to use both

hands just to brush their teeth. MG can strike any area of the body at any time—and because of the small amount that is known about this disease, it is often mistakenly diagnosed as chronic fatigue. Until very recently, the disease has been fatal for 85 percent of its victims. There is still no prevention or cure, but there has been progress.

This resolution, in the past, has played a major role in alerting the public to the symptoms and the problems connected with the disease. This increased awareness has not only made potential victims more sensitive to the dangers, but has served to further research in a quest for the cure.

Resolutions such as these play an important role in the search for a solution to the problems of many debilitating diseases. I have been proud—over the years—to have been the sponsor of this commemorative resolution to focus increased awarness on Myasthenia Gravis. I urge my colleagues' support for the resolution.

□ 1905

Mr. HANSEN. Mr. Speaker, I thank the gentleman from Massachusetts [Mr. CONTE] for his comments.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 183

Whereas the incidence and prevalence of myasthenia gravis present a significant health problem in the United States;

Whereas myasthenia gravis is a severe neuromuscular disorder, characterized by weakness of the voluntary muscles of the body;

Whereas an estimated one hundred thousand to two hundred thousand diagnosed, and over one hundred thousand undiagnosed, Americans of both sexes, and all races and ages, are afflicted with the disease;

Whereas the Nation faces a continuing need to support innovative research into the causes, treatment, and cure of myasthenia gravis; and

Whereas it is appropriate to focus the Nation's attention upon the problem of myasthenia gravis; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 6 through October 12, 1985, is designated as "Myasthenia Gravis Awareness Week" and the President of the United States is authorized and requested to issue a proclamation calling upon all government agencies and the people of the United States to observe the week with appropriate programs, ceremonies, and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

COMMEMORATING THE 50TH ANNIVERSARY OF THE CONGRESSIONAL STAFF CLUB

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the concurrent resolution (H. Con. Res. 195) commemorating the 50th anniversary of the Congressional Staff Club, and ask for it immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object. I would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

Mr. MICHEL. Mr. Speaker, I am pleased to rise in support of this resolution commending the Congressional Staff Club for a half century of service to the U.S. Congress, its Members, and its staff.

It is a particular pleasure for me because during my service as an administrative assistant to Representative Velde of Illinois, I was a member of this great organization, then called the Congressional Secretaries Club.

Through the past 50 years the club has provided many services and benefits to us all. The Daily Digest in the CONGRESSIONAL RECORD, for example was an innovation by the club. So was the development of staff ID cards and better bus service to the Hill.

The club, of course, is bipartisan in nature and its executive board is always closely balanced between staffers of each party. The club president must rotate each year between the two parties.

The club also engaged in many social and charitable activities which include parties, trips, sports activities, and blood and charity drives.

All in all, I would say the club has done real well for its first half century, so it is indeed my pleasure today to wish the CSC a happy birthday.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 195

Whereas the effective, efficient, and contructive operation of the offices of Members of Congress, Committees of the Congress and related offices relies heavily upon their able and dedicated employees;

Whereas the Congressional Staff Club encourages and promotes high ideals in Government and individual self-improvement, professionalism, and responsibility among all employees of the United States Congress;

Whereas the Congressional Staff Club fosters and promotes educational opportunities, charitable programs, and social events for employees of the Congress; and

Whereas the Congressional Staff Club is a nonpartisan, nonprofit organization which is composed of active and retired employees of the United States Congress and which for fifty years has been dedicated to improving the quality of life for all those persons who are, and who have been, employed by the Congress: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That—

(1) the Congress of the United States recognizes the special contributions of the Congressional Staff Club to cooperation, professionalism, and community spirit among employees of the Congress; and

(2) the Congress of the United States commends the Congressional Staff Club for fifty years of dedicated service to the legislative branch of the Government of the United States and encourages and supports the continued contributions of the Congressional Staff Club as a nonpartisan, nonprofit charitable organization created by and for the benefit of, the employees of the Congress.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

NATIONAL BUY AMERICAN WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 194) to designate the week of October 1, 1985, as "National Buy American Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York.

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object. I would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 194

Whereas the Nation accumulated record merchandise trade deficits in 1982, 1983, and 1984, and a record deficit is predicted for 1985;

Whereas we have become a debtor nation for the first time since the onset of World War I;

Whereas in many cases the prices of imported goods are artificially low because of illegal subsidies by foreign governments; and

Whereas record merchandise trade deficits cause loss of jobs, loss of productivity, loss of tax revenues, and a decline in the

American standard of living: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning October 1, 1985, hereby is designated "National Buy American Week", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

THE LESSONS OF GRENADA WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged for further consideration of the joint resolution (H.J. Res. 313) to authorize the President to issue a proclamation designating the week beginning October 20, 1985, as "The Lessons of Grenada Week," and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object. I simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation of objection, I yield to the gentleman from Georgia [Mr. GINGRICH], who is the chief sponsor of House Joint Resolution 313.

Mr. GINGRICH. Mr. Speaker, I just want to thank the gentleman from New York [Mr. GARCIA] and the gentleman from Utah [Mr. HANSEN] and say that the gentleman from Missouri [Mr. SKELTON] and I are very appreciative of their action in bringing this legislation to the floor. We think that taking this third week of October and studying "The Lessons of Grenada" document and looking at the lessons Americans can learn about the nature of Leninism and of Communism will be very helpful to the country. We appreciate the efforts of these gentlemen in bringing it to the floor.

Mr. HANSEN. Mr. Speaker, I appreciate the comments of the gentleman from Georgia [Mr. GINGRICH].

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 313

Whereas following the October 1983 invasion of the island of Grenada, the United States captured 35,000 pounds of documents relating to the Communist Party and the Communist government of Grenada and to Grenada's relations with Cuba, the Soviet Union, and Nicaragua;

Whereas it is appropriate for the American people to learn the lessons of actual Communist behavior as revealed in the Grenadian documents;

Whereas the Department of State has published a collection of key documents entitled "Grenada Documents: An Overview and Selection"; and

Whereas the week of the anniversary of the events in Grenada is an appropriate time for the American people to focus on the dangers of Leninism and the lessons of Communist behavior; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the week beginning October 20, 1985, as "The Lessons of Grenada Week" and to urge the Governors of the several States and the people of the United States to observe such week with appropriate ceremonies and activities.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL MARK TWAIN DAY

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 259) to designate November 30, 1985, as "National Mark Twain Day," and ask for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object. I simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation, I yield to the gentleman from Missouri [Mr. VOLKMER], who is the chief sponsor of House Joint Resolution 259, National Mark Twain Day.

Mr. VOLKMER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, first I wish to thank the gentleman from New York [Mr. GARCIA], the gentleman from Utah [Mr. HANSEN], and all the members of the Committee on Post Office and Civil Service for bringing this joint resolution before the House.

As we all know, Mark Twain, also known by many by his original name of Sam Clemens, had his boyhood home in my hometown of Hannibal, MO. Many of his writings which are read throughout the world were based upon his boyhood experiences and the things he learned while being raised in Hannibal, MO. This joint resolution will bring the attention of the people of the United States to the fact that this is the 150th anniversary of the birth of Samuel Clemens, better known as Mark Twain, who has brought enjoyment not only to this country but throughout the world with his writings.

Mr. HANSEN. Mr. Speaker, I thank the gentleman from Missouri [Mr. VOLKMER] for his excellent remarks.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 259

Whereas American journalist and author Mark Twain was born Samuel Langhorne Clemens in Florida, Missouri, and Hannibal, Missouri, was his boyhood home;

Whereas Mark Twain is recognized as one of America's greatest authors;

Whereas Mark Twain achieved international fame and his works have been translated into more than fifty languages;

Whereas Mark Twain is also widely recognized as a humorist of extraordinary wit and as a social critic of rare perception;

Whereas the experiences of Mark Twain in Hannibal became the basis of two novels, The Adventures of Tom Sawyer and The Adventures of Huckleberry Finn;

Whereas Mark Twain's travels and experiences in other regions of the United States became the basis of many of his other works, including The Celebrated Jumping Frog of Calaveras County, A Connecticut Yankee in King Arthur's Court, Life on the Mississippi, and Roughing It;

Whereas Mark Twain succeeded in portraying the American spirit in a way which no other author has been able to duplicate;

Whereas the city of Hannibal maintains the Mark Twain Home and Museum as a historic site;

Whereas the city of Hannibal will be the site of special events and entertainment, beginning in May 1985 and culminating in November 1985, to celebrate the one hundred and fiftieth anniversary of the birth of Mark Twain; and

Whereas November 30, 1985, is the one hundred and fiftieth anniversary of the birth of Mark Twain: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That November 30, 1985, hereby is designated "National Mark Twain Day", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL COMMUNITY COLLEGE MONTH

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 158) designating February 1986 as "National Community College Month," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object. I simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 158

Whereas, in the fall of 1981, there were over one thousand two hundred and nineteen community, technical, and junior college students in which 40 per centum of all undergraduate college students in the United States were enrolled;

Whereas such colleges prepare people for employment in over one thousand four hundred different occupations or for transfer to four-year colleges and universities;

Whereas such colleges are within reasonable commuting distance for more than 90 per centum of all Americans;

Whereas such colleges provide an opportunity to obtain a post-secondary education at low cost for many people who could not otherwise afford one; and

Whereas such colleges are community-based institutions which provide flexible and diverse programs and services tailored to fit the needs of their local populations and industries: Now, therefore be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That February 1986 is designated as "National Community College Month", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such month with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CENTENNIAL YEAR OF LIBERTY IN THE UNITED STATES

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 407) designating the 12-month period ending on October 28, 1986, as the "Centennial Year of Liberty in the United States," and ask for its immediate consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object. I simple would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 407

Whereas the Statue of Liberty (originally called "Liberty Enlightening the World") was a generous gift from the people of France to the people of the United States;

Whereas the Statue of Liberty has, since its dedication on October 26, 1886, held high the beacon of freedom, hope and opportunity to welcome millions of immigrants and visitors from foreign lands;

Whereas the Statue of Liberty and Ellis Island are in the process of being restored from the ravages of time and weather by the Statue of Liberty-Ellis Island Centennial Foundation, Incorporated; and

Whereas this Nation will celebrate the Statue of Liberty's one hundredth anniversary through commemorative events scheduled to take place during the Fourth of July weekend in 1986 and on October 28, 1986: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the twelve-month period ending on October 28, 1986, is designated as the "Centennial Year of Liberty in the United States", and the President is requested to issue a proclamation calling upon the people of the United States to observe that year with appropriate ceremonies and activities.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table

NATIONAL CPR AWARENESS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 175) to designate the week of October 20, 1985, through October 26, 1985, as "National CPR Awareness Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object. I simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 175

Whereas, heart attacks are the leading cause of death in the United States;

Whereas as many as 1,500,000 Americans may be stricken by a heart attack during 1985;

Whereas cardio-pulmonary resuscitation, commonly referred to as CPR, is a first aid procedure which significantly reduces the incidence of sudden death due to a heart attack; and

Whereas the death rate due to heart attacks would be reduced if more Americans received training in CPR: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 20, 1985, through October 26, 1985, is designated as "National CPR Awareness Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate programs and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL DAY OF FASTING TO RAISE FUNDS TO COMBAT HUNGER

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the joint resolution (H.J. Res. 386) to designate November 24, 1985, as "National Day of Fasting to Raise Funds to Combat Hunger," and ask for its immdiate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object. I simply would like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation of objection, I yield to the distinguished gentleman from California [Mr. PACKARD], who is the chief sponsor of this very worthy piece of legislation, H.J. Res. 386, National Day of Fasting to Raise Funds to Combat Hunger.

Mr. PACKARD. Mr. Speaker, I thank the gentleman from Utah for yielding.

Mr. Speaker, I would simply like to use this time to thank the chairman of the committee, the gentleman from New York [Mr. GARCIA], for expediting this piece of legislation. Certainly I also thank my colleague, the gentleman from Utah [Mr. HANSEN], and the 219 cosponsors who have joined with me in moving this piece of legislation through.

I am excited about the possibilities offered in this bipartisan joint resolution which will call upon the President to declare the Sunday before Thanksgiving of this year, the 24th of November, as a national day of fasting to raise funds to combat hunger. It encourages the people of the United States to skip one or more meals on that day and to contribute the value of those meals to hunger programs and hunger relief organizations of their own choice.

What better way do we have to celebrate the Thanksgiving period of time than to celebrate our own blessings by going without a meal or two and contributing to someone in the world who is going without food?

□ 1915

I hope that the Members of this House will unanimously join me in passing this resolution and declare November 24 as a national day of fasting for the purpose of raising funds to combat hunger.

I'd like to take this opportunity to thank Chairman GARCIA, my colleague Mr. HANSEN, the 219 Members who cosponsored this resolution, and others who so expeditiously moved House Joint Resolution 386 through the House and to the floor for consideration. I am excited about the possibilities offered in this bipartisan resolution which requests the President to issue a proclamation delcaring November 24, the Sunday before Thanksgiving 1985, as the "National Day of Fasting to Raise Funds to Combat Hunger." It encourages the people of the United States to skip one or more meals—if they can—on that day, and to contribute the money saved from those meals to a hunger relief organization of their choice.

This resolution is designed to encourage people from all income levels to give, since the money contributed to feed the victims of famine would have been spent on meals for the giver's own table. The idea is "Skip a meal, give a meal." If each American gives an average of $1, over $250 million will be raised to combat hunger. I fully anticipate that many people will give more than is saved from the forfeited meals—generosity has proven to be "the American way."

What better way is there to celebrate our blessings in the season of Thanksgiving than to voluntarily share with those less fortunate? I hope the Members of this House will join me in unanimously passing the resolution to declare November 24 the "National Day of Fasting to Raise Funds to Combat Hunger."

Mr. HANSEN. Mr. Chairman, if I may say to the gentleman from California, do I understand this correctly that the people called upon would actually take the cost of those two meals that it would cost them and their families and fast and donate that money to these worthy causes?

Mr. PACKARD. The whole purpose is to ask people to first experience the feeling of going without food. That will certainly give them a feeling of what people in the world experience who are starving.

Second, it should not cost them anything, unless they choose to pay more, because they are already foregoing the cost of the meal. They are simply contributing the cost of that meal or two for hunger throughout the world. That is a very simple way of assisting people that go without food.

Now, we hope that there will be many people who will contribute far and above the cost of two meals; but it does allow us to get to those small contributors in this country that would like to join with all of us in helping the hungry around the world, but at the same time feel that it is left to the big contributors. The cost of the two meals may be only $10 or $15 and if every citizen in this country would do that, you can imagine how many hundreds of millions of dollars we could raise toward hunger programs.

It is a worthy cause and at the same time allows the American people to experience hunger that might let them empathize with some of the starving in the world.

Mr. HANSEN. It seems like an excellent principle. I appreciate the gentleman's remarks.

Mr. Speaker, I yield to the gentleman from New York.

Mr. GARCIA. Mr. Speaker, I just would like to take 30 seconds to say that my colleague, the gentleman from California [Mr. PACKARD] has been so gosh darn persistent on this matter, getting this resolution to the floor, that I think the gentleman deserves a round of appreciation from all of us, because this is a very important item. I think that gentleman deserves that consideration.

Mr. PACKARD. Well, again, if the gentleman from Utah will yield just so I may respond, I want the chairman to know how grateful I am that they have expedited this, because it will now allow us enough time to get the message out through the media and the President and others to give emphasis to this special day of fasting. It is not just a commemorative day. It is a day to raise money for hunger around the world and it will give us a chance to do the appropriate advertising.

Again, I thank the gentleman from Utah.

Mr. HANSEN. Mr. Speaker, I would like to asscciate myself with the excellent remarks of the chairman and also the gentleman from California [Mr. PACKARD].

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 386

Whereas the famine in Africa has caused the death of hundreds of thousands of people and has endangered the lives of millions;

Whereas the solution to such famine involves not only rushing emergency food and medical supplies to the areas stricken, but also improving agricultural policies and instituting more sophisticated famine prevention practices in such areas;

Whereas people from all walks of life and every part of the United States have responded quickly and effectively to every famine which has occurred since World War II and have already raised more than $120,000,000 for emergency relief of the famine in Africa;

Whereas the generosity and compassion of the people of the United States should be recognized and commended;

Whereas in Africa, 24 people die of starvation each minute;

Whereas more remains to be done to fight starvation in Africa and in other parts of the world;

Whereas our Nation has enough resources to save many lives;

Whereas hunger in the United States is a pressing domestic problem that must be addressed through food relief and economic development for those in need; and

Whereas fasting is one of the strongest symbolic acts by which solidarity with the plight of fellow human beings may be demonstrated: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That November 24, 1985, is designated as "National Day of Fasting to Raise Funds to Combat Hunger", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to fast, to contribute generously to relief organizations fighting hunger, and to observe such day with appropriate ceremonies and other activities.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

VACATING THIRD READING AND PASSAGE OF HOUSE JOINT RESOLUTION 313, THE LESSONS OF GRENADA WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent to vacate the third reading and passage of the joint reso-

lution (H.J. Res. 313) to authorize the President to issue a proclamation designating the week beginning October 20, 1985, as "The Lessons of Grenada Week."

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA: Page 2, amend the first clause of the preamble to read as follows:

Whereas, following the October 1983 liberation of the island of Grenada, the United States and six Caribbean nations (Antiqua, Barbados, Dominica, Jamaica, Saint Lucia and Saint Vincent and the Grenadines) captured 35,000 pounds of documents relating to the Communist government of Grenada and to Grenada's relations with Cuba, the Soviet Union, and Nicaragua;

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from New York [Mr. GARCIA].

The amendment was agreed to.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise their remarks on the various resolutions just considered and passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

COMMUNICATION FROM THE HONORABLE NORMAN D. SHUMWAY, MEMBER OF CONGRESS

The SPEAKER pro tempore laid before the House the following communication from the Honorable Norman D. Shumway, Member of Congress:

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House, Washington, DC.

DEAR MR. SPEAKER: Pursuant to Rule L(50) of the Rules of the House, I am notifying you of the receipt of a subpoena issued by the Municipal Court of California, County of San Joaquin, to Mr. Jack Sieglock of my district office staff and myself. After consultation with the General Counsel to the Clerk of the House, I will reach the determinations required by Rule L(50) and will notify you of those determinations.

Sincerely,

NORMAN D. SHUMWAY,
Member of Congress.

DRILLING FOR OIL MONEY IN CONGRESS

(Mr. McCAIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. McCAIN. Mr. Speaker, I would like to call to the attention of my colleagues yesterday's lead editorial in the New York Times. It is entitled "Drilling for Oil Money in Congress." Recent action in the House Interior and Merchant Marine Committees indicates some coastal State Members believe they have found a "gusher." The budget reconciliation package we will be considering shortly contains one of the worst distortions of the budget process I have witnessed. In the name of deficit reduction and budget savings, we transfer $4 to $6 billion from the Federal Treasury to those of seven relatively well off coastal States. This is money derived from activity in Federal waters, water belonging to all the people of this Nation, which should go to benefit all the people. Instead, if the reconciliation package is not changed, it will go to benefit only those of our citizens fortunate enough to live in one of the seven priviledged States. I am joining with my colleagues Mr. UDALL and Mr. SHARP in an attempt to prevent this mockery of the budget process. I hope the Members of the House will take the time to read this editorial and join us in our efforts. I have included a copy of it for your review.

DRILLING FOR OIL MONEY IN CONGRESS

Congress: Please reduce the deficit by raising it. That's the solemn urging of a handful of states with offshore oil wells. They greedily propose an accounting trick that would credit the Treasury with $4 billion it has already received in return for a commitment to give away as much as $6 billion. They should be quickly rebuffed by the House.

In 1953 Congress assigned to the states all the royalties earned from oil and gas production within three miles of the coast. Then came complaints that producers were draining oil and gas from reservoirs beneath the state-Federal boundary. So in 1978 Congress created another three-mile band as a buffer, the royalties to be held in escrow till a distribution formula could be devised.

About $6 billion has now accumulated in this fund. According to the Interior Department, about 4 percent of that, at most, represents earnings from state properties. But as long as the fair division is in dispute, the Federal share cannot legally be counted as belonging to Washington.

This year, in their haste to raise revenue to narrow the budget deficit, the Administration and Senate and House budget committees agreed to give the states involved a whopping 27 percent of the $6 billion—about $1.6 billion, instead of $240 million. That would allow applying about $4.4 billion against the Federal deficit.

But only on paper. Since the money is already in the Treasury, the transaction would not reduce private purchasing power or Federal borrowing needs by even a nickel. The only money to change hands is the $1.6 billion the Treasury would have to hand over to the states. That would actually increase Government spending—precisely the opposite of the advertised effect.

There is apparently no hope of reversing the initial deal. Dumb as it is, Congress bought it and that would have been the end of the story—but for the exceptional greed of the oil-producing states. They persuaded the House Interior Committee and the Senate Energy Committee to sweeten the deal further by adding $500 million more to the promised $1.6 billion, and obligating the Treasury to pay them 27 percent of all future royalties from the buffer zone. According to Interior, the total cost to the Treasury would exceed $6 billion.

Democrats Morris Udall of Arizona and Philip Sharp of Indiana are asking the House to limit the loss to the original $1.6 billion. A sense of decency should be their strongest ally against giving away any more.

WE FROM MINNESOTA ARE PROUD OF SENATOR HUBERT HUMPHREY

(Mr. PENNY asked and was given permission to address the House for 1 minute and to revise and extend his remarks, and include extraneous material.)

Mr. PENNY. Mr. Speaker, I was pleased this morning to read in the Washington Post an editorial commemorating the 25th anniversary of the Peace Corps. In that editorial, they gave mention and credit to Minnesota's Senator Hubert Humphrey.

In part, the editorial reads:

The late Democratic Senator from Minnesota introduced the Kennedy administration Peace Corps bill in the Senate in 1961 because President Kennedy asked him to. President Kennedy asked him to because Mr. Humphrey had in fact proposed the Peace Corps idea 3 years before JFK espoused it in the 1960 campaign speech whose silver anniversary is now being commemorated.

We think JFK would not mind us calling this to your attention or even sharing the credit with his friend Hubert.

On the wall here in the House Chamber is a quote from Daniel Webster:

Let us develop the resources of our land, call forth its power, build up its institutions, promote all its great interests, and see whether we also in our day and generation may not perform something worthy to be remembered.

Mr. Speaker, the Peace Corps is just one contribution to this Nation for which we remember Senator Hubert Humphrey. We from Minnesota are proud that he was our Senator. We miss him, just as this Nation misses his leadership.

Mr. Speaker, I include, for the Members' attention, this editorial:

REMEMBERING

We have something to add to the celebrations now under way of the 25th anniversary of John F. Kennedy's proposal to establish the Peace Corps. A great deal has been said and done in recent days to honor the extraordinary—and sometimes heroic—

achievements of Peace Corps volunteers all over the world in the decades since the agency came into being.

To all of this we say amen, and we also join in commending President Kennedy himself for having espoused the idea and helped push it into law. The Peace Corps, with its youthfulness, its energy and excitement and commitment, became a kind of symbol of the Kennedy administration at its early best, and this was fitting. The agency got its momentum and its enduring personality in those years, and it reflected what was most innovative and idealistic about the Kennedy administration.

But something is missing here. The something is Hubert Humphrey. It is always a wise idea, when celebrating a proposal of this kind, to check out the Humphrey record. The late Democratic senator (and vice president) from Minnesota introduced the Kennedy administration Peace Corps bill in the Senate in 1961 because President Kennedy asked him to. President Kennedy asked him to because Mr. Humphrey had in fact proposed the Peace Corps idea three years before JFK espoused it in the 1960 campaign speech whose silver anniversary is now being commemorated. We think JFK wouldn't mind our calling this to your attention or even sharing the credit with his friend Hubert—and to this end we will let Mr. Humphrey have what he always loved best: the last couple of hundred words. They are from his memoir, "The Education of a Public Man":

"I introduced the first Peace Corps bill in 1957. It did not meet with much enthusiasm. Some traditional diplomats quaked at the thought of thousands of young Americans scattered across their world. Many senators, including liberal ones, thought it a silly and unworkable idea. Now, with a young President urging its passage, it became possible and we pushed it rapidly through the Senate. It is fashionable now to suggest that Peace Corps volunteers gained as much, or more, from their experience as the countries where they worked. That may be true, but it ought not to demean their work. They touched many lives and made them better. Critics ask what visible, lasting effects there are, as if care, concern, love, help can be measured in concrete and steel or dollars or ergs. Education, whether in mathematics, language, health, nutrition, farm techniques, or peaceful coexistence may not always be visible, but the effects endure."

Again, amen.

WE NEED THE BOLAND AMENDMENT

(Mr. MINETA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. MINETA. Mr. Speaker, today I would like to bring to everyone's attention a story written by Robert Parry, the award-winning reporter for the Associated Press. The AP story reports that last year, when the Boland amendment was U.S. law, the President approved a secret fund to replace CIA funds with assistance from U.S. citizens and U.S. allies.

Mr. Speaker, what this story means is that the President of the United States apparently OK'd nothing less than an international plumbers group. With a wink and a nod, he turned over U.S. Central American policy to a group of extremist right wing organizations, and apparently encouraged U.S. allies to become their arms merchants.

This is why we need the Boland amendment, and this is why we need a similar provision again to become a part of U.S. law. I hope the story of this duplicitous action on behalf of the White House will awaken our colleagues in the House to the need for strong laws in this area.

Mr. Speaker, I am including with my remarks the AP story to be inserted in the RECORD.

[From the Associated Press, Oct. 8, 1985]

PRESIDENT LINKED TO SECRET AID—PLAN TO HELP CONTRAS REPORTED APPROVED

(By Robert Parry)

Facing a congressional cutoff of military aid to Nicaraguan rebels early last year, President Reagan approved a secret plan to replace CIA funds with assistance from American citizens and U.S. allies, according to current and former administration officials.

White House officials picked retired Army Maj. Gen. John K. Singlaub as the chief fund-raising contact and advised him how to structure the campaign within the confines of neutrality and other laws that bar U.S. citizens from supporting foreign wars, said the sources who insisted on anonymity.

White House spokesman Edward P. Djerejian refused to comment on Reagan's reported approval of the plan to go outside U.S. government channels to continue supplying the rebels fighting to overthrow Nicaragua's leftist government.

In the past, the White House has insisted that it "neither encourages nor discourages" the private fund-raising that sprang up after Congress, angered by the mining of Nicaragua's harbors by the Central Intelligence Agency, refused to continue military aid to the contras, or counterrevolutionaries, in the spring of 1984.

But government sources, including one senior administration official, described the behind-the-scenes White House role in organizing and advising the aid network as much more extensive than has been acknowledged.

The aid network, particularly a recent surge of arms and money from allied countries, has allowed the rebels to continue operations during the 15-month cutoff of direct U.S. aid and, thus, circumvent congressional efforts to shut down the CIA-sponsored war. Rebel leaders now say they have enough weapons to arm a 30,000-man force, roughly double their current number.

Three congressional committees are reviewing whether White House National Security Council (NSC) officials violated a year-old ban against "directly or indirectly" aiding the rebels militarily.

But officials interviewed by The Associated Press maintained that the White House role in establishing the aid network had ended by Oct. 1, 1984, when that ban was enacted. Last July, Congress voted $27 million in nonlethal aid to the rebels but maintained the ban on lethal U.S. assistance.

One source, familiar with the earlier program, said the "big three" countries that were expected to help the rebels were Israel, South Korea and Taiwan.

Representatives of those governments denied they helped the rebels. Other U.S. sources said Israel ultimately agreed only to sell the rebels captured Palestine Liberation Organization weapons, and aid from South Korea and Taiwan came from private businessmen and an anticommunist organization with close ties to those governments.

National security affairs adviser Robert C. McFarlane has denied that his staff violated the ban but has ignored a congressional request for documents on NSC contacts with the rebels. As for White House actions before October 1984, McFarlane said, "We did not solicit funds or other support for military or paramilitary activities either from Americans or third parties."

Several sources said McFarlane's statement is technically correct because private citizens in this country and "third parties" in allied countries "volunteered" help supply the rebels.

One source who was close to the program said the plan for accepting the offers was prepared by Lt. Col. Oliver L. North, a deputy director for political-military affairs on the NSC staff. The cource said North presented a brief memo that was backed by related correspondence and biographies of some private individuals.

According to this account, which was supported by two administration officials:

McFarlane reviewed the plan with top NSC officers and White House legal counsel who concluded that creation of the outside aid network violated no laws, if done carefully.

But fearing the plan's disclosure, McFarlane chose to outline it to the president orally at a regular morning briefing. Reagan approved the plan. North was to implement it.

All three sources said creation of the aid network came at about the time of congressional protest in April 1984 over the CIA's mining of Nicaragua's harbors. They did not offer precise dates.

Singlaub, who resigned from the Army in 1978, was selected as the chief "authorized" contract for private fund-raising because of his military background and international connections, the sources said.

THE GOOD NEWS ABOUT CRIME IN AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. IRELAND] is recognized for 5 minutes.

Mr. IRELAND. Mr. Speaker, I don't think I have to remind any of my colleagues here in Congress that we live in a great nation—blessed with an abundance of resources and destined to serve as an example for the rest of the world. But, unfortunately, too often we hear reports that the quality of life in America is declining—that our economy is stagnant—our values are eroding—and our political process is for sale to the highest bidder.

Sure, there are plenty of bad news stories on any given day—but at the same time there are bigger—more prominent—more important good news stories that are having a far greater impact in our daily lives. I would like to take a few moments to examine some of this good news.

Let's talk about crime in America.

The crime rate explosion of the 1960's and 1970's has often been attributed to an erosion of public values. It has been said that there is a cause and effect relationship—eroding public values yield eroding public behavior.

But what do we really know about crime in America and its connection to our system of values?

As the first step in addressing this question, I offer you the evidence released by the Justice Department this week in its National Crime Survey. According to these statistics, crime in America is down 4.1 percent from 1984.

And that's not all—this year we have achieved the lowest level of crime since 1973—the year the survey was begun. By category the statistics are even more promising—violent crime is down 12 percent since its high peak in 1981—personal theft is down 7 percent last year and 26 percent from its peak in 1974—burglaries have dropped 8 percent from 1984 and an incredible 31 percent since their peak in 1974.

I think it is obvious that the 1980's reflect a declining trend in crime rates in America. But again—how does this relate to change in our personal and private values as American citizens facing the 1980's?

Why then is crime declining?

The most immediate answer is one of demographics—crime in America is age and sex specific. Crimes are most commonly committed by young males. As the baby boom generation of the 1950's and 1960's matures, the percentage of criminal-age males declines.

But there is more to it than just demographics. Society has responded.

While soft public attitudes toward crime and criminals triggered the crime wave of the 1970's, the tougher public values of the 1980's have played a major role in curbing crime.

And the statistics are there to prove it.

More money is being spent to combat crime, both public and private; neighborhood crime watch associations are on the increase; more individuals are employed in the criminal justice system; convictions are at an all time high; and more Americans than ever before favor the death penalty for murder.

Public attitude is a great deterrent. As the American people get tougher on crime, the risk-reward ratio changes—making the crime business less profitable.

In addition, with more individuals in jail there are fewer criminals and repeat offenders on the street—fewer crimes are committed.

What we have is evidence that our public law enforcement institutions have responded to tougher public values triggered by the soft on crime attitudes of the 1960's and 1970's. When the public responds, local, State, and Federal officials also respond.

Last year we passed the most comprehensive anticrime package since 1968—we increased penalties for drug offenders—placed restrictions on the insanity plea—reduced disparities in punishments for similar crimes—and approved grants for State anticrime projects.

Tougher legal penalties—reflecting tougher public attitudes.

Although the perception of high crime may continue no matter what the statistics reveal and must continue to take note of them—there is a bright side. Increased public perception of crime toughens public attitudes toward criminals—and this leads to results.

Yes, Mr. Speaker, we can feel good about America.

We have renewed our commitment to traditional American values—I commend my constituents in the 10th District of Florida and Americans across our Nation for bringing about these changes.

CHICAGO'S 1985 COLUMBUS DAY PARADE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, on Monday, October 14, Chicagoans will celebrate the discovery of America by Christopher Columbus 493 years ago with a gigantic parade through the city sponsored by the Joint Civic Committee of Italian Americans.

The voyage of Christopher Columbus marked one of history's most challenging and rewarding explorations in the history of mankind, and this parade commemorates this daring accomplishment, as well as the numerous achievements of those courageous men and women who followed Columbus to the New World. Italians who emigrated to America helped make our Nation the strongest and greatest the world has ever known.

This year, leading the proud parade processional will be my good friend, Jack Valenti, president of the Motion Picture Association of America and former assistant to President Lyndon B. Johnson, who has worked tirelessly on behalf of the Italian American community. Other participants in the parade will include Mayor Harold Washington; Gov. James Thompson; Charles Porcelli, president of the Joint Civic Committee of Italian Americans; Congressman Martin Russo; Dr. Claudio Ferrari, Consul General of Italy; and many other civic and political dignitaries, as well as myself.

The President of the United States, the Honorable Ronald Reagan; the Governor of the State of Illinois, the Honorable James R. Thompson; and the mayor of the City of Chicago, the Honorable Harold Washington, have issued proclamations commemorating the discovery of America by Columbus, and copies of these proclamations follow:

COLUMBUS DAY, 1985—A PROCLAMATION BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

We are privileged each year to pay honor to the great explorer whose epic voyages of discovery led to the development of the Western Hemisphere. Christopher Columbus won an imperishable place in history and in the hearts of all Americans by challenging the unknown and defying the doubters. In doing so he set in motion a chain of events which transformed the world and led to the birth of the great country in which we live.

Columbus' achievement lies not only in his daring navigational exploits but also in the practical outgrowth of his efforts. More than a great seaman, he was a man of vision who could see the opportunities that lay beyond the horizon. Indeed, the results of his quest were far grander than he could have envisioned. Those who followed in the path he had opened built a new world whose economic, political, and social development have been marvels of human energy and ingenuity. People from across the globe have come to America to find freedom, justice, and economic opportunity.

Columbus exemplified a spirit which still inspires all Americans—a spirit of reaching out, expanding the frontiers of knowledge, a spirit of undaunted hope. In the words of Joaquin Miller, "He gained a world; he gave that world its grandest lesson: 'On! Sail on!'" Like Columbus, we Americans are ready to take risks in pursuit of our goals. We understand that boundless opportunities await those who dare to strive.

Our tribute to Columbus has special meaning to Americans of Italian descent. This son of Genoa was the first of many great Italian travelers to the New World. Millions of his countrymen would later settle in the new land, adding their precious contribution to the developments that stemmed from Columbus' voyages. Columbus was the first link in a chain which today binds the United States to Italy in a special relationship.

This remembrance is also particularly important for those of Spanish descent. Columbus' achievement depended on the vision and energy of a newly united Spain. This was only the first of Spain's many cultural and economic contributions to the New World. We share with our Spanish-speaking neighbors this heritage and our debt of gratitude to Spain.

In the coming years this commemoration of the voyage of 1492 will take on heightened significance, because we are approaching the 500th anniversary of that great event. The Christopher Columbus Quincentenary Jubilee Commission, a distinguished group of Americans assisted by representatives from Spain and Italy, will plan, encourage, and carry forward the commemoration of Columbus' great voyages of discovery. The Committee held its initial meeting on September 12, and will report within two years its recommendations for observance of the celebration.

In tribute to Columbus' achievement, the Congress of the United States, by joint resolution approved April 30, 1934 (48 Stat. 657), as modified by the Act of June 28, 1968 (82 Stat. 250), has requested the President to proclaim the second Monday in October of each year as Columbus Day.

Now, therefore, I, Ronald Reagan, President of the United States of America, do hereby proclaim Monday, October 14, as Columbus Day. I invite the people of this Nation to observe that day in schools, churches, and other suitable places with appropriate ceremonies in honor of this great explorer. I also direct that the flag of the United States be displayed on all public buildings on the appointed day in honor of Christopher Columbus.

In witness whereof, I have hereunto set my hand this fourth day of October, in the year of our Lord nineteen hundred and eighty-five, and of the Independence of the United States of America the two hundred and tenth.

RONALD REAGAN.

STATE OF ILLINOIS: PROCLAMATION

Every American knows what historic event occurred in 1492, for in that year the history of the world took a dramatic leap. The voyage of Columbus, which spurred further exploration of the New World, is celebrated annually throughout the land.

Columbus and many other distinguished Italians have contributed to the growth of civilization. The Italian community is joined by Americans of every ethnic background in recognizing Columbus Day.

Italian-American residents in Illinois will be sponsoring their 29th annual Columbus Day Parade to honor their native hero.

Therefore, I, James R. Thompson, Governor of the State of Illinois, proclaim October 14, 1985, as Columbus Day in Illinois.

James R. Thompson.

CITY OF CHICAGO: PROCLAMATION

Whereas, the Joint Civic Committee of Italian-Americans (JCCIA), is sponsoring its annual Columbus Day Parade on October 14, 1985; and

Whereas, the courage and visionary wisdom displayed by Christopher Columbus in his intrepid voyage of discovery is exemplary of the Italian-American community; and

Whereas, those qualities of our Italian-American brothers and sisters are evident in the many contributions to the arts, politics, sports and socio-economic life of Chicago; and

Whereas, this year's parade honoring the great navigator is dedicated to Italian-American sports heroes:

Now, therefore, I, Harold Washington, Mayor of the City of Chicago, do hereby proclaim October 14, 1985, to be Columbus Day in Chicago and urge citizens to be cognizant of the events held in connection with this historical observance in honor of the great navigator, Christopher Columbus.

Dated this 8th day of October, 1985.

HAROLD WASHINGTON,
Mayor.

Mr. Speaker, Chicago's Columbus Day celebration begins with a concelebrated Mass at Our Lady of Pompeii Church at 9 a.m. Before the Mass begins, an introduction will be given by Theresa Petrone, theme coordinator of this year's parade. Anthony Pope will serve as commentator, and the lectors will include Jeannine Riotto and Libby Hannigan. Norman Boccio will offer the prayer of the faithful, and members of the Offertory Procession will be Lisa Ann Taranto, queen of the Columbus Day Parade; Fred Serpe, Christopher Columbus in this year's parade; Marie Palello, JCCIA secretary; and Ann Sorrentino, costume chairperson. Music will be provided by the Italian Cultural Center Choir with Josephine LiPuma as director; and the organists will be Lawrence Salvador and Frank Pugno. Nick Bianco, John DeBella, Anthony Lanzito, Michael Palello, Anthony Pilas, and Lawrence Spallitta will serve as ushers.

The principal celebrant will be the Most Rev. Nevin W. Hayes, auxiliary bishop of Chicago. The homily will be given by Rev. Angelo Garbin and Rev. Angelo Carbone, pastor of Our Lady of Pompeii Church, will host the Mass. Other concelebrants will include Rev. John Bonelli, Deacon Giulio Camerini, Rev. Don Craig, Deacon Frank De Vita, Rev. Charles Fanelli, Rev. Nicholas Marro, Rev. Lawrence Cozzi, Rev. Leonard Mattei, Rev. Pat Murphy, Rev. Ronald Scarlata, and Rev. Kenneth Velo, who recently was elevated to the position of administrative assistant to His Excellency, Joseph Cardinal Bernardin.

As in past years, the Fourth Degree Knights of Columbus will serve as the colorful honor guard, and following the Mass, breakfast will be prepared and served by the Mothers Club of Our Lady of Pompeii Church, with Josephine Messina as chairperson.

Following the Mass, there will be a wreath-laying ceremony at the Columbus statue in Arrigo Park. Thomas Baratta and Sam Garnello of the Order Sons of Italy in America will coordinate this event, aided by the color guard of the Italian American War Veterans.

The parade will step off from the corner of Dearborn and Wacker Drive at 1 p.m. and will include over 200 floats, bands, and marching units depiciting the theme of this year's parade, "Italian American Sports Heroes," as well as demonstrating the many contributions of Italian Americans to our country's greatness. Dr. Franco Colombo, who has the title of "Mr. World," will be riding on the float of the National Italian American Sports Hall of Fame, whose executive director is George Randazzo. This year, the Gruppo Folklorico "Marsala Antica" from Marsala, Sicily, a group of 25 young men and women sponsored by the Sicilian government dressed in historic costumes, will sing and play in the parade. Also, the Gruppo Storico Fizizzano from the city of Tuscana, will display their musical talents, as well as demonstrate their unique skills of flag-throwing and twirling. Fred Serpe of Elmwood Park will portray Christopher Columbus in this year's event. In addition, colorful floats especially designed for the occasion will carry members of the Italian American community wearing authentic costumes from the 19 regions of Italy.

The parade will be televised locally by WGN-TV in Chicago from 1 p.m. to 3 p.m., and with its cable capabilities, reaching more than 30 States, millions of people are expected to watch this year's event. The sponsors for this year's parade include Dominick DiMatteo of Dominick's Finer Foods, Anthony Fornelli of Festa Italiana, Nello Ferrara of Ferrara Pan Candy Co., the Chicagoland Chrysler Dealers Association, Statistical Tabulating Co., Alitalia Airlines, Contadina Foods, True Value Hardware Stores, and Anheuser Busch.

One of the highlights of Chicago's Columbus Day celebration is the selection of the queen of the parade. This year, judged on her beauty, poise, and personality, Lisa Ann Taranto, of Lockport, IL, and a student at Northern Illinois University, was chosen to reign as queen of the parade. She won $1,000 from the Joint Civic Committee of Italian Americans; $100 from Dr. Claudio Ferrari, Consul General of Italy; two dinners at the Como Inn Restaurant, courtesy of Joseph Marchetti; two dinners at Sicily Restaurant courtesy of John Incandela; and two dinners at Stefani's Restaurant, courtesy of Phil Stefani.

The members of the queen's court include Donna M. Varzino, 7836 West Farragut, Chicago, IL; Gina Marie Forcucci, 1616 North Sayre, Chicago, IL; Melissa M. Esposito, 2125 North 74th Avenue, Elmwood Park, IL; and Rosemarie Andolino, 1444 James Court, Elk Grove, IL.

The chairman of the Queen's Contest was Fred Mazzei; the cochairperson was Josephine Bianco, and the judges for the contest included Joseph M. Caliendo, fur fashion coordinator and co-owner of Bruno & Joseph Furs; Gilbert J. Cataldo, executive director of the Chicago Regional Port District; John T. Coli, vice president of Teamsters Local 727; State Representative James A. DeLeo; Paul A. Fosco, executive vice president of Consultants & Administrators, Inc.; James M. Hogan, recording secretary for Teamsters Local 714; Joseph Lizzadro, chairman of Meade Electric Co.; Laura Spingola, president of Trade Resources Ltd.; Dr. Carl Tintari, specialist in cosmetic dentistry; Rose Farina, manager of Daley Center Events in the Chicago Office of Fine Arts; and Dr, John Drammis, cosmetic surgeon and owner of Cosmetic Surgery Center of Chicago, Inc.

The Joint Civic Committee of Italian Americans, comprised of more than 40 Italo-American civic organizations in the Chicagoland area, sponsors the Columbus Day parade and other related activities. Many local groups are cooperating with the Joint Civic Committee of Italian Americans in this community-wide tribute to Columbus, and Anthony Sorrentino, consultant for the Joint Civic Committee of Italian Americans, is again helping to coordinate the various activities of the parade as he has done so energetically over the years.

Our grand Columbus Day celebration will close with a reception at 3:30 p.m. at the Como Inn Restaurant, 546 North Milwaukee Avenue, in Chicago, in honor of our guests, all officers, subcommittee chairmen, and members who are participating in making the 1985 Columbus Day Parade a memorable event. Leaders of the Italo-American organization from Illinois will also be present as well as officials from our State and city government.

As honorary cochairman of this 16th celebration of Columbus Day as a national holiday, I commend the members and officers of the Joint Civic Committee of Italian

Americans for their dedication, careful planning, and hard work that goes into the creation of this annual grand event. Our city and our people are proud of these outstanding citizens and their untiring efforts to make this special occasion another great success.

Mr. Speaker, the officers and members of the 1985 Chicago Columbus Day Parade Committee are as follows:

LIST OF OFFICERS AND MEMBERS OF CHICAGO'S COLUMBUS DAY PARADE

COLUMBUS DAY PARADE COMMITTEE

James Coli, General Chairman 1985.
Joseph Tolitano, Grand Marshall.

HONORARY CHAIRMEN

Congressman Frank Annunzio.
Congressman Martin Russo.
Dr. Claudio Ferrari, Consul General of Italy.

JCCIA OFFICERS

Charles C. Porcelli, President.
Carl De Moon, 1st Vice President.
Leonard Giampietro, 2nd Vice President.
Anthony Terlato, 3rd Vice President.
Fred Bartoli, 4th Vice President.
Fred Mazzei, 5th Vice President.
John de Bella, Treasurer.
Josephine L. Ortale, Secretary.
Joseph Mollica, Sgt.-at-Arms.
Jerome N. Zurla, Special Counselor.
Anthony Sorrentino, Executive Director.

BOARD OF TRUSTEES

Richard Parrillo, Chairman.
Congressman Frank Annunzio, Vice Chairman.
Michael Annecca, Fred Bartoli, Anthony Bertuca, Victor Cacciatore, Jerry Campagna, Representative Ralph Capparelli, Micheal Cardilli, Gilbert Cataldo, Michael Coccia, James L. Coli, Senator John D'Arco, Jr., Representative James De Leo, Pat De Leo, Dominick Di Matteo, Representative Marco Domico, Nello Ferrara, Anthony J. Fornelli, Paul Fosco.
Fire Commissioner Louis Galante, Leonard Giampietro, Dr. James F. Greco, Ernie Kumerow, Joseph Lizzardro, Jr., Steve Lombardo, Charles LoVerde, Joseph Mazza, Joseph Marchetti, Pat Marcy, Jr., Michael R. Notaro, Charles C. Porcelli, Mayor John C. Porcelli, Nunzio Raimondi, Ciro Rossini, Dr. Salvatore Rotella, Dr. Mario O. Rubinelli, John Serpico, Dr. Raffaele Suriano, Anthony Terlato, Joseph Tolitano, Lester Trilla, Phillip Zinni, Jerome N. Zurla, Anthonly Fratto.

CHAPLAIN

Rev. Armando Pierini, C.S.

THEME COORDINATION

Theresa Petrone.

RELIGIOUS PROGRAM & ORGANIZATIONS

Rev. Lawrence Cozzi, C.S., Chairman.
Rev. Leonard Mattei, Co-Chairman.
Rev. Armando Pierini, C.S., Advisor.
Nick Bianco, John De Bella, Michael Fortino, Michael Palello, Elvira Panarese, Chief Anthony Pilas, Anthony Pope, Lawrence Spallitta.

AUTHENTIC ITALIAN COSTUMES

Ann Sorrentino, Chairperson; Elena Frigoletti, Mary Spallitta, Pauline Jo Cusimano.

FINANCE AND SOUVENIR BOOK

Leonard Giampietro, Chairman; Ann Sorrentino, Angeline Annunzio.

LABOR COMMITTEE

Ernie Kumerow, Chairman; James Coli, Robert LoVerde, Angelo Fosco, Charles LoVerde, Tony Judge, Armando Fosco, Chuck Spranzo, John Serpico, Bruno Caruso.

BANDS, MARCHERS, TRANSPORTATION & FLOATS

Marie Palello.

PROGRAM & ARRANGEMENTS

Domenick Di Frisco, Co-Chairman; Theresa Petrone, Co-Chairperson; Jerry Zurla, Gilbert Cataldo, Anthony Fornelli, James De Leo, Charles C. Porcelli.

QUEEN CONTEST

Fred Mazzei, Chairman; Josephine Bianco, Co-Chairperson; Anita Louise Bianco, Norma Battisti, Sam Bruno, Ange Tufano, Marie Palello, Mike Palello, Joseph Mollica, Hugo Panarese.

FLOAT PERSONNEL

Lawrence Spallitta, Chairman.

PARADE MARSHALS

Marco De Stefano, Chairman; Larry Battisti, Rocco Bellino, John De Bella, Nick Bianco, Pasquale Caputo, Ettore Di Vito, Neil Francis, Joe Mollica, Mike Palello, Joseph Pantaleo, Anthony Pilas, Louis Rago, Ron Onesti.

PUBLIC OFFICIALS

Congressman Frank Annunzio, Congressman Martin A. Russo, Senator John D'Arco, Jr., Hon. William J.P. Banks, Frank S. Belmonte, Hon. Phillip Bianco, Jr., Hon. Ralph C. Capparelli, Hon. Frank W. Chesrow, Hon. Elmer Conti, Hon. Jerome A. Cosentino, Hon. John D'Arco, Sr., Hon. Pat De Leo, Hon. Marco Domico, Mayor William J. Francione, Hon. Frank Giglio, Hon. Anthony C. Laurino, Hon. William J. Laurino, Hon. John A. Maloni, Hon. Vito Marzullo, Hon. John Merlo, Hon. Michael Nardulli, Mayor Charles Panici, Hon. Fred B. Roti, Hon. Salvatore Ruffolo, Mayor Alfred Stramaglia, Mayor C. August Taddeo, Mayor Anthony Vacco, Hon. Louis Viverito, Hon. Greg Zito.

STAFF PHOTOGRAPHER

Sam Bruno.

WOMEN'S DIVISION

Jeannine Riotto.

WEST SUBURBAN WOMEN'S DIVISION

Libby Hannigan.

YOUNG ADULT DIVISION

Norman Boccio.

COORDINATOR

Anthony Sorrentino.
Marie Palello.

OFFICE VOLUNTEERS

Russell Anderson, William Travers, Joan Piraino, Rose Ann Rabiola, Nancy Savino, Ann Sorrentino, Ann Yelmini, Josephine Ortale, Rose Ortale.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota [Mr. OBERSTAR] is recognized for 5 minutes.

Mr. OBERSTAR. Mr. Speaker, I was unavoidably detained on official business on Tuesday, October 8, and missed rollcall vote No. 342 on the amendment offered to H.R. 2100 by Mr. PETRI.

Had I been present I would have voted "aye" on this amendment to terminate the tobacco price support program.

THE BALANCED BUDGET AMENDMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Idaho [Mr. CRAIG] is recognized for 60 minutes.

Mr. CRAIG. Mr. Speaker, I have again taken out a special order this evening to talk about an issue that has in just the last several weeks had totally new life bred into it and, of course, that is the issue of a balanced budget for our U.S. Government. For some time a good many Members in this body and the body across the Rotunda have worked very hard to achieve through the constitutional method a balanced-budget amendment that we could send forth to the American public for ratification, that would say to this body that in their budgeting process on an annual basis that they would have to bring receipts and revenues into balance and that the Government could not in fact spend out of balance.

Of course, the American public time and time again has said in polls for the last 10 years that I know of, some 80 percent of them have said that, of course, the Congress of the United States should balance the Government's budget and it should be forced to live within its means, much like every American household, every American business, certainly every American must do or they find themselves at some point in their lives in ultimate bankruptcy.

Over the years, we have tried a variety of methods to force this Congress to be fiscally responsible and in almost all instances those methods have failed. It was for that reason that several years ago I and now nearly 190 Members of this body came together to organize a group called Club Congressional Leaders United for a Balanced Budget in a Bipartisan Way, to issue forth to this Congress a resolution, this year's resolution, House Joint Resolution 27, which is a constitutional amendment to balance the Federal budget.

□ 1930

We now, today, have well over 200 cosponsors. But as our effort worked to bring about the necessary support so that the Committee on the Judiciary here in the House would recognize and hold the proper hearings and allow that legislation to come to the floor for fair and open debate that the American public could witness, and then to send forth the resolution to the American public for its consideration and ratification, on every occasion we have been stopped. We have been stopped in large part because of a faction in this body who simply will not recognize nor do they support nor do they in fact believe in the need for this Government to balance its

budget, to respond in a fiscal way that will send our country the kinds of economic signals that a balanced budget could ultimately send.

So what do we find today? We find ourselves in a situation of attempting to be able to deal with a $200 billion deficit. But more importantly than that, as it has its impact on our economy, we here in this body now and the body across the Rotunda are having to consider something that none of us like, and that is to raise the debt ceiling of our Nation; in other words, its ability to borrow and to spend money to the $2 trillion level.

Throughout the history of this country, since we were a Union, it has taken all of that time except for the last 7 years to arrive at a national debt of $1 trillion, and just in the last 7 years we have now been put in a situation where we must ask the American public to allow us to raise the debt ceiling to $2 trillion.

As a result of that, Members of the Senate and Members here in the House, having been blocked by leadership in the House, because the Senate just 2 years ago sent forth a constitutional amendment to balance the budget which failed in this House, both Members of good will, Republican and Democrat alike, have said if we cannot pass the balanced-budget amendment we must at least try in some way to bring forth an issue, and in this case a form of law, a statute, tied to the debt ceiling that would put into process a system by which we could move toward a balanced budget in a systematic way over a period of years to get to a point of a balanced budget without major disruption in our economy.

The Senate is now deadlocked in trying to debate and vote on an issue that has become known as the Gramm-Rudman amendment, the Emergency Deficit Control Act, or a Balanced Budget Act. To my disappointment, the news media of this country has called it the Balanced Budget Act. Although it would arrive at a balanced budget by 1991, it is not a constitutional amendment to our Constitution which would, in fact, by constitutional law, mandate a balanced budget.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. CRAIG. I have with me some of my colleagues who have been directly involved in this issue, and I would certainly be happy to yield to my colleague, the gentleman from Mississippi [Mr. LOTT], and in doing so I would like to wish him "happy birthday."

Mr. LOTT. I thank the gentleman for that, I guess.

I thank the gentleman for yielding and for those good wishes on my birthday, but I rise to extend my congratulations and appreciation, and I think the appreciation of the American people, for his efforts in support of getting a vote here in the House of Representatives on a balanced budget constitutional amendment. I think it is absolutely essential that we do it. I am convinced that we will succeed in getting that issue forced to a vote in a timely fashion, and hopefully very soon, and I hope that the House of Representatives will show the courage to provide the necessary two-thirds vote when it comes up for a vote here in the House.

I doubt that it is going to happen, based on the record that the House of Representatives has over the years of not voting for this constitutional amendment for a balanced budget and not voting to get spending under control, but it is a very important effort that the gentleman is working on and I join with him in that. I have signed the necessary discharge petition and I urge the gentleman to continue doing that.

Regardless if that happens, in our other effort for our statutory process to set up a procedure to move toward a balanced budget by fiscal year 1991, we need this constitutional amendment. We need this binding process that would force us to have a balanced budget and stick with it, like so many of the States have. I know the gentleman will go into some details about how that works, but I wanted to congratulate him and urge our colleagues here in the House of Representatives to join him in that effort to get a vote on that most important issue of a constitutional amendment for a balanced budget.

But I also want to rise to speak for a moment about what I refer to as the Gramm-Mack amendment to the debt ceiling that is being considered now by the other body and hopefully will be here in the House for a straight up-or-down vote very soon. We each year have these continuing votes that come up to raise the debt ceiling, a very difficult vote for a lot of Members to cast and it will be again this year.

One of the reasons why Members on this side of the aisle and why I am hesitant to vote for this rise in the debt ceiling is because I see no end out there in the future to having to vote to raise it again and again and again. We must have a process to move toward a more balanced budget. It is fraud to say that we are going to balance the budget next week or next month or next year. There must be some orderly process to move in that direction, to force us to do it.

The Budget and Impoundment Act that we now have to work with here in the House of Representatives that was passed in 1974 is in shambles. The House makes a mockery of the process by its own reconciliation bill that will be coming to the floor of the House of Representatives soon. In a bill that is supposed to cut spending, that is supposed to make us comply with our own budget resolution, our friends on the other side of the aisle use it to authorize other bills and, in fact, to raise spending. They are absolutely making a mockery of the process and seem to be saying, "We just cannot get spending under control."

This Gramm-Mack proposal is an orderly process. It will force the President to produce these budget recommendations on a declining basis to a balanced budget in 1991. The Congress must then act, perhaps with a different set of priorities, but to comply with this systematic reduction.

If, though, at the end of the fiscal year in October, the Congress has not lived up to its commitments and the President and the Congress cannot fulfill that commitment of the $35 or $36 billion reduction each year over this period up to fiscal year 1991, then there would be the action-forcing mechanism, a fair mechanism, across the board, equal percentage, 50-50 between the appropriated and nonappropriated accounts.

We need it desperately. I believe the American people are excited about the prospect that we would establish some system to move toward a more balanced budget, and yet our friends, the Democrats, in the Senate and in the House, delay. They say, "We need more time." They start asking questions. They even make the point that we took 15 months to pass the Budget and Impoundment Act. Yes, we did, and maybe that is what is wrong with it and why it is in a heap of ashes now on the floor of this Chamber, because we nickeled and dimed it and picked it to death. We found every possible little loophole that we could dream of so that we could slither through it and avoid facing the issue of cutting spending.

So I think the Gramm-Mack proposal, known in the other body as the Gramm-Rudman proposal, is the most exciting thing we have going right now for the American people, for the taxpayer, for those who pay attention to what we do in spending the people's money here in Washington, DC.

So I would urge my colleagues to look at it closely. Approach it from a positive standpoint. Do not start saying, "What if? What if?" It is a statute that sets up just a procedure to move toward a balanced budget. It does not say how we are going to do it, but it just says that over a period of these years we will have to rein ourselves in.

I am supporting it, and I have a question for the leaders on the other side of the aisle who today refused to take up the issue, even in a minor way, by bringing up the proposal that was passed by the Senate to cap the use of the Federal Financing Bank. They do not want a vote on this issue.

It is clear that the Republicans here in the House of Representatives want a straight up or-down vote on this issue of the Gramm-Rudman-Mack balanced budget procedure. I believe the American people want that effort, that opportunity, and we are going to get it one way or the other here in the House of Representatives and then we can have this type of fiscal responsibility we really should have.

I thank the gentleman for his efforts. I do not think that the two conflict at all; they complement each other. Let us set up a process, but let us also put it in the Constitution. That is where it should be, and then hopefully in future generations they will not be going through this chaos and this mockery that we have now of the budget process.

Mr. CRAIG. I thank the gentleman for those comments.

Let me ask the gentleman a question. I find it unique that in the number of States which by constitution are required to balance their budgets that they have a mechanism in place that monitors the spending of the different agencies of their States so that if at a point during the fiscal year they find themselves spending beyond their limitation that there is a mechanism by which they can cut back and level their spending to maintain a balance with their revenues.

I am told that the Gramm-Mack proposal, the proposal that is currently being debated in the Senate, is in some part not unlike the kind of mechanisms that literally a number of States have across this country, well over 30. Is that true?

□ 1940

Mr. LOTT. It is true. In fact, my own State right now is going through that very process. It is a painful one.

But the revenue coming into the State of Mississippi is below what was anticipated and the State must take action now to begin to make sure that they can have a balanced budget. Here it is, the poorest State in the Nation, and yet our State legislators and our leaders have faced the issue year in and year out, and they have a balanced budget. And yet they look to us and they see our inability to control our insatiable appetite to spend more of the peoples' tax dollars, dollars frankly that should be staying in my own State so that my State of Mississippi and my own hometown would have that opportunity for revenue themselves.

But in the Gramm/Rudman package, there is a requirement that there must be a report to Congress about how the process is working, and the President must also report to Congress what he is doing to carry out his ministerial role, not his role of impoundment in complying with the automatic sequestering if that is forced by Congress' inability to act, but even before that there is the requirement that the Office of Management and Budget and the Congressional Budget Office report to the Congress about what is being done to comply with our own budget resolution while the process is going on.

Mr. CRAIG. Would the gentleman say that his State of Mississippi would be complying or working to comply at this moment if, in fact, they did not have a constitutional amendment that required a balanced budget and had the ability to borrow, in other words, kind of nonstop ad infinitum?

Mr. LOTT. If we had that credit card, and people seem to think the chickens will never come home to roost, then I am sure we would spend much more money trying to provide more things that the people need, trying to create jobs in the State sector, or in the Government sector, which are not the kind of jobs that they need. There is no question that if they could just print the money and continue to raise the debt ceiling without paying any attention to where this money really is going to eventually come from—from our children as a matter of fact—why I think the States would do that.

But the people are closer sometimes to those State legislatures and the government and they would not tolerate it, and they have had the foresight to put that requirement in their State constitutions. There is no question that it keeps the pressure on them.

I think there are only, what, four or five States in the Nation that did not have a balanced budget or a surplus during the past fiscal year, and I think maybe only a couple that actually went into the red. I think there is no question of the fact that having these constitutional amendments that required them to have a balanced budget forces them to do that.

Mr. CRAIG. I certainly thank my colleague for his insight. He took time away from his family tonight to be with us. He must rush home, I am told, to a birthday dinner, and I certainly once again wish you a happy birthday.

Mr. LOTT. I thank the gentleman for yielding me this time.

Mr. CRAIG. I think the point my colleague from Mississippi has just brought up dramatizes why we are here, why we consistently work toward a balanced budget amendment to our Constitution, and why we have looked at the Gramm-Mack proposal as a tool, a device, a mechanism, if you will, to begin to move the Congress of the United States, in other words, the budget of our Government, toward a balance by the year 1991.

My colleague from Mississippi made a very, very important point. Today in the other body, they are debating lifting the debt ceiling, the ability of our Government to spend into debt to the point of some $2 trillion.

Now what does that really mean? My colleague from Mississippi mentioned that it is an unwillingness to be fiscally responsible. In other words, to go ahead and spend now and pass that expense for that debt forward into the future generations.

At our current rate of deficit spending that ultimately becomes part of the national debt what we are really telling the young people of this country is that we are now willingly, without their permission, at least, us here in the U.S. Congress are willingly extending to them a responsibility of an increased debt of nearly $1,000 a year at these kinds of expenditure levels. In other words, this Congress, this Government is saying we do not want to pay for it now, we do not want to take the responsibility to have to pay for the kinds of services that we want to offer to the American people, so we will simply extend that debt forward, and we will say to all of the young people of this country, we are just going to saddle you with the burden, and somewhere down the road, as is typical of all debts, you ultimately will have the responsibility of paying for it. And, of course, as we do that, we constantly add to the budget a requirement to service the debt.

In the 1986 budget as proposed, I know that that debt service, or interest to be paid on the debt is now well over $140 billion annually. It is becoming one of the single largest items in the Federal budget. And of course, that is why so many of us here have worked for so long to bring about a constitutional requirement through the Constitution, through the amendment process to force a balanced budget, and then put into motion the kind of mechanism that is devised and proposed in the Gramm-Mack proposal that will bring us in a progressive way, over a period of time, to that balanced budget.

I am pleased to have my colleague from Pennsylvania [Mr. WALKER] join with me this evening in this special order. He has been a stalwart here on the floor reminding us of our fiscal responsibility, a strong advocate of a constitutional amendment to balance the Federal budget, a cosponsor of House Joint Resolution 27, the Constitutional Amendment Resolution, and a member of the CLUBB organization.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. CRAIG. I am pleased to yield to my colleague from Pennsylvania.

Mr. WALKER. I thank the gentleman. I, too, join with the gentleman from Mississippi [Mr. LOTT], our minority whip, in congratulating the gentleman for all of his work and for helping to drive home the point of how badly we need to move on this

51-059 O-86-47 (Pt. 19)

balanced-budget approach. Because the gentleman has been in the forefront, I know that he understands that what we get on this issue is a lot of rhetoric. There is an intuitive understanding among politicians here that the American people have had it with our spending, that they want something done about deficits, they want something done about our budget overspending, and they are demanding that action be taken.

So as a result, we have Members of Congress parading out to the country telling their constituents exactly what they think their constituents want to hear, that I am down in Washington fighting budget deficits, that I am out there working for you. The fact is that what we have is a lot of flim, and a lot of flam, and a lot of smoke, and a lot of mirrors, but very little action.

The gentleman has been one of those who has been subjected to that process in his work to try to get a balanced-budget amendment out to this floor and passed. We hear all of these people who want to talk about balanced-budget amendments, but when it comes time to actually move toward the vote, move it out of committee, get it to the floor, do something real, well, all of a sudden all of those people fade. They run to the cloakrooms, they run to their offices, they run home, they do something, but let us not vote on it.

Now all of a sudden they are presented with a very, very tough dilemma. There is something moving in the other body that has a chance of coming here that might actually force them to vote on something with teeth in it to balance the budget. And what is happening? We are seeing the flim and we are seeing the flam and we are seeing the smoke and we are seeing the mirrors. We saw it out here on the floor this evening.

The other body sent the bill over here, a House-passed bill in which what they were attempting to do was to put a deadline on the amount of money or the amount of time in which we can borrow from the Federal Financing Bank. In other words, put us up against the wall as of next Friday that we would have to meet. And what did we hear? Well, we heard then, we heard them say, well, no, they did not want that process to go forward. They did not want that kind of deadline. They want more time to study this proposal.

Why do they want more time to study? They want more time to round up all of the special-interest groups out in the country to come pounding on the doors saying, oh, no, do not touch the Federal budget, do not touch the process that keeps these $200 billion deficits in place. Do not do anything that is real. They want a couple of weeks in order to bring those people to this town yelling and screaming again so that they hope that they can avoid a vote. They do not want a vote on that. They do not want to go back to the American people and explain why they voted against a constitutional amendment.

They are even now trying to come up with alternatives, those that are trying to squirm out from underneath, and I was fascinated, I would say to the gentleman, by a "Dear Colleague" letter. I will not mention the name of the colleague. I have not informed him that I was going to mention this. But I happened to come across it as I was reading today.

We have a "Dear Colleague" letter that is headlined "Alternative to Gramm-Rudman," and guess what it is proposing, I would say? A constitutional amendment to balance the budget.

Now where has he heard that before? You know, all of a sudden now we have this constitutional amendment, and I would say to him, having worked on the language for years, it is very, very interesting. This constitutional amendment says, and I read, "Expenditures of the United States Government in any fiscal year shall not exceed its revenues for that fiscal year."

Now where have we heard that before? I will tell you where we have heard that before. That is now the law of the land. We passed that into law almost 10 years ago. That is exactly what the law now says, and we violate it all of the time.

Mr. CRAIG. If my colleague will yield back for a moment, he mentioned the law of the land. We actually have laws now on the books of the Federal Government that mandate a balanced budget.

Let me cite those laws because you bring up a very, very interesting point, and I would like to have you expand on it.

In October 1978, we passed Public Law 95-435 which said that beginning with fiscal year 1981, the total budget outlays of the Federal Government shall not exceed receipts.

Is that not what that "Dear Colleague" letter says?

Mr. WALKER. Yes, it is. It is almost precisely the same language that we are now hearing that is the alternative to Gramm-Rudman that is already the law of the land. We violate it every day and we do it knowingly.

Mr. CRAIG. And again I understand that in April 1979, Public Law 96-5 provided that Congress shall balance the Federal budget. "Pursuant to this mandate, the Budget Committees shall report by April 15, 1979, a fiscal-year budget for 1981 that shall be in balance, and also a fiscal-year budget for 1982 that shall be in balance, and that by April 15, 1980, the fiscal-year budget for 1981 shall be in balance. And the Budget Committee shall show the consequences of each budget on each budget function and on the economy, setting forth its effects on revenues, spending, employment, inflation and national security."

That is the law of the land, and I think I just heard the gentleman say that in reflection to this law of the land that we have consistently violated that. That is obvious or we would not have a $200 billion debt.

Mr. WALKER. That is right, or we would not have a $200 billion debt.

But let me tell the gentleman what has happened out here a couple of times, and he is well familiar with it too. On a couple of occasions I personally have carried amendments to the floor suggesting some new spending program we are putting in place ought not go forward in violation of that public law, and I have brought it out a number of times. Do you know that every single time, when confronted with the reality of the law of the land that required a balanced budget, and confronted with the reality of a new spending program, every single time Congress has voted in favor of the new spending program and against implementing the law of the land, which is the balanced budget, every single time. On one occasion, it was even we were going to build a new memorial here in the city. I felt that was a low-enough priority that maybe we ought to at least obey the balanced-budget law when it came to building a new memorial in the city. No. By about 100 votes, this body decided it was more important to build the memorial than to enforce the balance-budget law.

And so, this kind of language that our colleagues now suggest as an alternative to Gramm/Rudman is no alternative. We have already tried it.

You know, you can put that language into the Constitution, but the fact is that we still need an enforcement mechanism, and that is what the gentleman has been working on.

If these people want to go the constitutional amendment route, all they have to do is join the gentleman in cosponsoring H.R. 27, and go up and sign the discharge petition, because his balanced-budget amendment accomplishes the same thing, except it has teeth. Instead of being a toothless-tiger approach to a balanced budget, which so many on that side want, they want to vote for budget acts like we had in 1974, they want to vote for balanced-budget amendments to the Constitution that are meaningless, they want to vote for language around here that is meaningless because it has no real discipline in it, and they are toothless tigers when it comes to balanced budgets. The only time they want to become real tigers is when it comes to spending, and then they run down onto this floor, roaring like the devil about the spending that they want to do.

I think that it is clear that what happened on the floor here today is one more example of the Democratic leadership making a conscious decision to try to delay, to try to negate, to try to undercut, to try in some way to subterfuge the whole policy of moving toward a balanced budget, and we are going to see more of that in the next several days, and we are going to see the Democratic majority of this body support their leadership. And we are going to see them line up time and time again trying to tell the American people, well, look, we are really for balanced budgets, but this is simply the wrong approach.

Everything to them is the wrong approach. There is no right approach. Every time you bring up something that has any kind of discipline involved in it at all, they figure out a way to get around it.

□ 1955

They figured out a way around the Budget Act; we waive the Budget Act all the time out here; there is always some reason for getting around the idea that we ought to save money rather than spend money.

I thank the gentleman for taking this special order. I hope the American people are finally becoming aware that it is the Republican Party that is the party of balanced budgets; it is the Democratic Party that is the party of spending, and that until they rid themselves, in this body, of big spenders, we are going to continue to have a balanced budget problem in this country; we are going to continue to have a deficit problem in this country, and we are going to continue to pass the bill, as the gentleman has said earlier, along to our children, our grandchildren, and our great-grandchildren.

That is the shame of this; we are spending the money today; we are enjoying the benefits of deficits, and we are passing the bill on to people who did not even have a chance to vote on paying that bill.

Mr. CRAIG. I thank my colleague for joining me in this special order, and pointing out some of the problems that we currently face; some of the problems we have faced in the past; and the tremendous reluctance that we see on almost a daily basis on this floor for our colleagues to respond to what the American public has now said is the number one issue in this Nation, and that is the Federal deficit.

That we must control it; they have told us in almost every possible way they can, and yet, here, on this floor on a day-to-day basis we deny them that response. We do so in a variety of ways including failure to bring out a constitutional amendment to balance the budget, and failure to respond, as my colleague from Pennsylvania mentioned, to respond as we should have responded this evening.

To not only authorize and react, allow the Federal Government to have some flexibility while we continue to debate what is now in my opinion one of the most critical issues, one of the most important issues to come before this session of the United States Congress.

What is that? Well, we have talked about it briefly, and I am now pleased to see my colleague from Florida [Mr. MACK] who has done a yeoman's job in working with Senator GRAMM in putting together the Gramm-Mack proposal that is probably No. 1 in the minds of most legislators at this moment, both here in the House and the other body—some of us in strong support of it, others trying to find out how to get around it, and that of course is that particular piece of legislation that has become known as the Emergency Deficit Control Act, the Balanced Budget Emergency Deficit Control Act.

That would put in motion the very kind of thing that we think is necessary is a responsible, kind of sequential move that brings about the process that would bring us to a balanced budget by the year 1991 and would allow the American public to see that you can balance the budget; that the constitutional amendment mandating a balanced budget is a responsible act; that you do not create some strange, crazy gyration in the Government; that you do not somehow overnight have to be forced to raise taxes by $200 billion or to cut programs by $200 billion, but in a responsible, programmed way, over a period of several years you can arrive at it in large part without changing much of the method by which the Government spends or many of the priorities that the Government has.

I would like to now yield some time to my colleague from Florida [Mr. MACK].

Mr. MACK. I appreciate the gentleman yielding.

Several points came to my mind as the gentleman was talking. One of the things I think we need to concentrate on before we get into maybe the specifics of the proposal is that, why are we talking about it now, and what are the questions that we should be asking.

To put that into context, what I am saying is that the Congress, both the Senate and the House, are being asked to, at some point, deal with the debt ceiling of this Nation; that is, the ability of our Government to borrow funds to pay for the programs that have been authorized in the 1986 budget.

Here we have a situation where we are being asked to go out and borrow additional funds, and I am going to put this, as I did last evening in a special order, in the context of having come from 16 years in the banking business.

Typically, if a family or a business, or for that matter a government, whether that was a city or State, came to a lending institution to borrow funds, depending on what the circumstances were, we would want to find out from them what they were going to do to correct the situation that had caused the problems of that particular business.

If, for example, they wanted to borrow let us say $100,000 for the purpose of working capital for several weeks, I would want to know what it was that happened to create the necessity for borrowing that money. Was there something wrong with the management of the company? Just exactly what was going on?

Once I determined what the problem was, what created the need for the borrowing, I then asked them, "What changes were you going to make in order to put yourself back on the proper direction? In other words, how are your going to be able to repay the loan?"

Very straightforward. I mean, I think if even those of you who have not been in the banking business probably would ask those kinds of questions. In fact, I am sure we have all had the opportunity to have someone come up to us and ask if they could borrow a certain amount of money for a short period of time, and the natural question is: How are you going to pay it back?

All I am saying here is that it seems that we ought to have the same common sense, that when we are being asked to increase the debt ceiling to allow the Government to go out and borrow more money, we ought to be saying, "Under what conditions are you going to provide us with to make us feel comfortable that you have the ability to handle this credit and to be able to eventually reduce and repay that loan?"

So I think that what we are doing with the Mack-Gramm or the Gramm-Mack proposal is we are basically saying, all right, we will increase the debt ceiling of this Nation, but we are going to do it under these conditions, and the conditions are very simple:

You do not borrow any more than $180 billion in the first year; no more than $144 billion in the second year; and right on down until it is zero in 1991. What we are saying is that if you do not put budget proposals together that live within those targets, that there is an automatic sequestering of funds that takes place, that brings the amount of the deficit back down to those targets.

So for the first time what we have really done is we have shifted the emphasis. What we have said is that in the past, why you fellows were arguing whether that was this side of the aisle arguing with that side of the aisle, or

this body arguing with that body, or we were in debate with the executive branch, spending just kept right on growing, requiring more and more taxes.

Mr. CRAIG. Just a moment ago, our colleague from Pennsylvania [Mr. WALKER] and I were talking about passed law; that this body and the other body made public law, that said that this Government would have to balance its expenditures and its receipts by a given year; in other words, a balanced budget.

Now, in the Gramm-Mack proposal, you are saying that from now through 1991 there would be a reduction in deficit to a point that at that time the budget would come into balance.

In 1979, Public Law 96-5 said that, that by 1981 we would have to have a balanced budget.

What is uniquely different about what you are proposing today that has not already been proposed and is in fact now residing in the law of this land?

Mr. MACK. If the gentleman will yield further, there are several points that I would make here. One very specifically is that this legislation has within it an enforcement mechanism that in essence, that cannot be waived by the Congress; waived in the same manner that we waive things out here on the floor of the House on a day-to-day basis.

Second is the power of the Budget Act really is in the rules of the House; and because the power is in the rules of the House, we can come out here—and we see it happen every day, probably every appropriations bill that we have dealt with, many of the authorization bills that we have dealt with, have asked for waivers in the Budget Act—we waive the Budget Act, just the thing that we said we put together to protect ourselves; we waive that, and off we go. Spend more money, send it over to the Senate, have an agreement, and the spending goes on up.

In this particular piece of legislation that we are putting forward, we are saying if those targets are broken, there is an automatic feature that takes place that you and I cannot stop unless there is separate legislation that is passed that changes the targets or changes the sequestering law and allows for the increase.

It would have to be passed by the House, passed by the other body, and signed by the President. Now that is quite a different situation than the previous law that just basically mandated a balanced budget but had no enforcement mechanism in those previous laws.

Mr. CRAIG. In other words, you are saying that you are unique in your approach in that you would require a separate act of Congress to change the process, and that there is an enforcement mechanism?

Mr. MACK. That is correct.

Mr. CRAIG. In other words, you are telling me that all of the consternation that the other body has gone through that we see now building here in reaction to your proposal is over a law or a bill that could become law, an amendment that could become law, that is going to make this body act budgetarily at least responsible, and I guess what the gentleman might also be telling me is that if you had merely proposed as an amendment to the debt ceiling legislation that the budget of the United States or the Government be in balance by 1991, we probably would not be having the battle.

□ 2005

Because there would not be any teeth in it and this body would know, as they have known from at least 1979 and before, in 1978, that you can pass the laws and tell the people that you are going to balance the budget, but knowingly, knowingly at the time you are telling the American public, that you can also break the law and you can break it by getting around it with House rules, by waiving the Budget Act, as the gentleman mentioned, and simply going right on down the road of spending while being able to go home and say, "I voted for a balanced budget amendment, and I am all for fiscal responsibility."

In other words, the bill of the gentleman, his amendment is uniquely different.

Mr. MACK. That is right. The gentleman is right on the point. Again, let me run through some examples, if I could. Let us say that this proposal is passed and becomes law, signed by the President, and in 1987, the next fiscal year budget that we are going to be working on, which will have a target of $144 billion, and let us say that once again the Congress says, "We cannot live with those targets, we are going to waive this provision, and we are going to come out with a budget that is $164 billion." This might shock you. The Congress could do that. They could end up passing a budget for $164 billion even though the law required $144 billion. But you see, there is one mechanism that they cannot change, and that is on October 1 when the Office of Management and Budget and the Congressional Budget Office make their projections for what the deficit is going to be for the forthcoming fiscal year and they state that it is going to be $164 billion, guess what? There is a $20 billion breach of the target. The President has no choice. The law says that he must sign and order sequestering funds across the board. So while the Congress may find a way to waive it in their internal operations, come October 1 when the report is handed out by OMB and CBO, the President will have no choice but to sign this sequester order. That is why people are concerned because it has real teeth in it. It cannot be, other than by passing a piece of legislation to suspend or void or change those targets, passed by both Houses and signed by the President, and that is the kicker, the President could veto that piece of legislation to again mandate those targets.

Mr. CRAIG. Let me get this clear in my mind. Under the current law, two laws on the books of this land, right now, statutes that say that this Congress, this body, must balance its budget on an annual basis, this House, the body on the other side, can amend the Budget Act or by waiving the Budget Act get around it. They bypass the process, in other words, and the President can do literally nothing about it or does nothing, practically, about it simply because it is within the House rules at least in this body. But the gentleman is saying that under Mack-Gramm or Gramm-Mack that the President would have to act by agreeing or concurring with both the House and the Senate in legislation that would, in other words, change the law or a new law that would bypass the law or the amendment that the gentleman is proposing. That is one of the real unique differences.

Mr. MACK. That is right. Again, the President would have a veto over any provision that would change the law that we are talking about passing.

Mr. CRAIG. So that would be a safety net or a check process that currently does not exist in the law.

Mr. MACK. That is right.

Mr. CRAIG. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

It seems to me what the important thing about that mechanism is that Congress would have to affirmatively stand up and say, "We are willing to change the law in order to spend the money." In other words, instead of having some procedural vote out on the floor that people would go back home and say, "Oh, that waiver of the Budget Act, that was just a procedural kind of thing, it didn't mean anything, you can't really say I am a big spender because I voted for that." They would have to define themselves as big spenders who were willing to violate the budget targets in order to spend the money. In other words, they would have to literally enact a law that says we are going to go ahead and spend the money.

Mr. CRAIG. In other words, the gentleman is saying that on an up or down vote you would be able to say, "Yes, I am a budget buster," or, "No, I am not."

Mr. WALKER. Surely. At that point it becomes a budget buster act, and it becomes then something that you can be held accountable for. And account-

ability is the clear thing here. Nobody, nobody around here who has been spending money like a drunken sailor over all these years, wants to be held accountable for it. That is the reason why they are scared to death of the proposal.

Mr. CRAIG. Yes, I am beginning to understand why all the violent opposition from some of our liberal colleagues then.

You mean that for the first time they are going to have to be on record by voting "yes" or "no" as to whether they are willing to break the budget, spend more money than the Congress through this law had agreed was a judicious and responsible way to bring the budget under control. That is why all the reaction.

I yield to my colleague.

Mr. MACK. Let me, if I could, move this to another aspect of this particular proposal because I think there is more to it than just the merit of being able to get spending under control.

Again, my motivation for this is that I do feel that it is something that will mandate the reduction in spending that takes the pressure off of those of us who want to keep revenues at a low level but do not want to see increases in tax rates that usually become higher marginal tax rates that destroy incentive and so forth.

So I think, again, the motivation is to be able to control spending and to take the pressure off of revenues and taxes.

But on the other side, I think there is something of value, especially to those of us who have been in support of the concept of a balanced budget constitutional amendment.

I have heard the argument raised many times, in essence, people say, "Well, that balanced budget idea is a great one, but, you know, how would you get there? You don't have any plan for getting there. You just want to wish that in. Suppose it was passed, what would you do?"

Well, I think what we have here is a very systematic approach to get there. I guess there is also—I ought to make another point here—we all of us, as we get into the discussion about this particular proposal, seem to spend a lot of time on the enforcement mechanism, or the triggering mechanism, or the sequestering order. Let me remind you that that only takes place, that only is triggered, if Congress fails to take its responsibility. I mean, it is not that it is taking any authority away from the House or the other body. We still are going to be coming forward with a budget resolution each year. The President will have a budget proposal to make. All of them will have to live within the targets. But you and I will get involved in the discussion about what the priorities are going to be. That is an interesting point. Won't it be fun to finally talk about priorities around here? I mean to really have to make decisions about what priorities are instead of basically allowing every special interest group in the country to get some form of financial assistance from the Federal Government.

Mr. CRAIG. On that point, I have heard the last several days from several of my friends on the other side of the aisle that this just gives massive powers to the Presidency and that for some reason it is taking away from the Congress their constitutional responsibility to budget for this country, to appropriate moneys, and that is not the responsibility of a President, and that, by voting for the Gramm-Mack amendment, you would give all of these. And yet the gentleman is saying something entirely different. The gentleman is the author of the bill, I trust he knows what he is talking about. He spent a good amount of time crafting this and putting it together. I would like to have the gentleman explain in more detail, if he can, just exactly what he means.

Mr. MACK. There are several other factors that maintain the balance between the legislative and executive branches. That is an issue that all of us are interested in. It is certainly an issue that is raised every time we talk about the line item veto, where people say, "No, we can't have that, it gives too much authority to the President." So we were trying to come up with a way to keep the balance between the executive and legislative branches. I already mentioned to you that even if the sequester order—in fact, I did not mention it. So let me start at the beginning again. Under this proposal, the President and the Congress are required to submit budgets just as we are now, with one difference. Those budgets cannot break the targets. It does not say we are giving our right away to someone else to do that. We are still going to submit the budget within the targets and make the decisions about how those dollars should be allocated. But if we should, if we should fail and the OMB and CBO make the projections that indicate a breaching of the targets significant enough to require the President to sign a sequester order, there is another point; the President has no choice. He must sign it, and he has no discretion. He cannot pick and choose which particular programs are going to be hit and which ones are not.

Defense is going to be treated just like any other program. And I must say that that does cause some problem with some of our colleagues. But our feeling was that what we really ought to try to do, as closely as possible mirror the policy decisions that have been made over the last several years. While many of us disagree with those policy decisions, our feeling was to maintain that balance, that we ought to, in essence, whatever reductions that were going to take place would be even and across the board.

So the second point is that the President has no discretion in that sequestering order. The third point I would make is, even after the sequestering order takes place, if the President or the House or the Senate disagree with what happens as a result of that sequestering order, guess what? We can offer different alternatives, different solutions. We can come back with a different proposal. But, again, the key thing in this is, while we are arguing and debating, spending will be reduced. The sequester order stays in place until we come up with another plan, until there is another idea about how to solve the problem.

If I could, I want to move to one other subject, and then I am also going to be leaving for the evening.

The subject I want to touch on, as it relates to the second question that I think is most often asked, that is the question of, "If you had a balanced budget, how would you keep it?" I mean, once you are there, this idea of having a balanced budget, suppose you made an error in your economic assumptions and all of a sudden you were projecting a deficit, or suppose you miscalculated the spend-out rate on some particular spending program, and all of a sudden you had a larger expenditure than you anticipated, and you have a deficit. This, again, gives you a mechanism to get back down into the range of targets that were set up.

Last point: You said, "Unique," or something like that, "You have a unique idea." This is not a unique idea. Guess where it came from? Roughly 43 States in the country have mechanisms just exactly like this, to deal with a question of how do you live with a balanced budget?

So there are a lot of other things that we get out of this particular piece of legislation other than just setting targets and getting spending down.

Mr. Speaker, I thank the gentleman [Mr. CRAIG] for allowing me to participate in his special order.

Mr. CRAIG. Mr. Speaker, I would like to thank my colleague from Florida [Mr. MACK] not for just the phenomenal work that he has done on this particular amendment now pending in the Senate because I used the word "unique" a minute ago; it is unique to this body, without question. We have tried time and time again over the years, through the passage of law, to mandate a balanced budget only to find that every time we passed it we would violate it by the mechanism of the rules of the House. What my colleague from Florida, Mr. MACK, has done in the crafting of this legislation with his colleague from the Senate, Senator GRAMM of Texas, is to build a mechanism that does not allow

in an automatic way Members of this House to violate the targets that are involved.

One of the reasons I, as a major author of the constitutional amendment to balance the budget, and others have become cosponsors in the Gramm-Mack approach is because it does just exactly what Mr. MACK said a few minutes ago. It provides us with the tool, the process by which we can show and demonstrate to the American public that you can, in fact, move toward a balanced budget, and therefore it makes the constitutional amendment to balance the budget even more real in the mind of those who wish for it to be true.

As I say, it makes it more real because when that question is asked, "How do you get there? How do you move a Government that is now $200 billion in deficit to balance?" Well, of course, I have said time and time again that it could not be done overnight, that it could not be done in the course of 1 year or 2, but it would take a concerned, programmed effort on the part of the U.S. Congress, following a plan, following a procedure that in an orderly fashion could move us toward a balanced budget without major cuts or shifts in Government priorities, the kinds of programs that serve people, the kinds of programs that defend us, the kinds of programs that in large part help the American people to achieve that which they have asked of their Government.

I believe that the Mack-Gramm proposal has done just that. It has said that over a period of years from 1986 to 1991 we would move in that fashion; we would move in 1986 in the budget to reduce the deficit to $180 billion.

□ 2020

By 1987, we would ask that that reduction drop from $180 to $144 billion; in the 1988 budget, that reduction would drop from the $144 to the $108 billion; and so on, until 1991, when we would arrive at balance.

Of course, that, also does not even address the question of while that is going on, it does not mean that the Government's budget would get progressively smaller. Our economy is expanding, and as our economy expands, new revenues come into the Government based on the current tax laws of this land, and what it is only talking about is a reduction in deficit, not a reduction in overall spending per se, because as we reduce the deficit, many of us, including a lot of America's fine economists, say you begin to get a corresponding growth in the American economy that offsets, in a large part, the kind of deficit reductions that we are talking about.

So those of us who support the balanced budget amendment to the Constitution believe that this is not an alternative approach, that the Gramm-Mack approach is not the alternative to a constitutional amendment, but it is in fact the mechanism that can bring us to a balanced budget, and then with a constitutional amendment, ratified by the citizens of this country and placed into the Constitution of this great Nation, we will be at a point where never again, except in those unique cases of war, or in less dire need of this country, we would choose to bring our budget in an unbalanced way for a short period of time, but that we would in fact have a balanced budget, that we would continue to take less and less of the gross national product of this country, that we would continue to indebt in a less way the people of this country to the ever growing Federal debt and the ever growing Federal deficit.

This is what the American people have asked for time and time again. This is what many of us in the House in a bipartisan sense are trying to do at this moment, is to not only put in place the mechanism by which to arrive at a balanced budget but a constitutional mandate in the form of a constitutional amendment that would require a balanced budget on an annual basis and then be able to say, for once and for all, that we are acting fiscally responsible, that it is the responsibility of this Congress to determine what the priorities of government are and in which direction we ought to be spending for the good of the country, but that at no time, except for those unique and special cases, could we go off spending in the mad way we have for the some 20 years that we have been building this phenomenal deficit, to now arrive at historic levels of a nearly $2 trillion national debt and a $200 billion deficit and a Congress that simply wrings their hands and say, in a large part on a day-to-day basis, "We don't know how to control it. The only thing we know how to do is spend money, but we don't know how to cut money or to save money."

That is really the issue that is before this session of Congress. It is the issue that the American public have demanded of us, and I hope we are responsible in our will and in our willingness to address it.

THE UNWISE TEXTILE QUOTA BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota [Mr. FRENZEL] is recognized for 60 minutes.

Mr. FRENZEL. Mr. Speaker, I urge my colleagues to oppose H.R. 1562, a bill to institute drastic, unilateral rollbacks in imports of textile and apparel products. Contrary to the claims of the bill's proponents, H.R. 1562 does not enforce the Multifiber Arrangement [MFA]. Instead, this legislation strikes at the fundamental principles of multilateral cooperation and agreement which allow us to do business and expand our markets the world over.

Supporting this bill means agreeing that the most protected industry in America, textiles and apparel, deserves further protection at the expense of a wide range of other U.S. industries as well as our national economic and strategic interests.

Proponents of H.R. 1562 say that dramatic rollbacks in the current textile import quota program are necessary to forestall further job losses which they blame entirely on import competition. A closer look indicates that economic conditions in this sector, while severe, are neither critical nor unusual. The proponents of the bill, and their constituents, are undeniably distressed, but imports are neither the only, nor the most important problem.

First of all, the 1982–84 import surge was not limited to the textile sector. Many U.S. industries faced rising import levels due to the strong dollar and recessions abroad. Furthermore, during the latter half of 1983 and first half of 1984, the textile and apparel industry participated in the overall U.S. economic recovery with consumption of textiles rising 18 percent over 1982 levels. This brought higher employment and increased profitability. While imports increased in 1983, domestic manufacturers garnered 80 percent of the increase in aggregate consumption.

Textile imports rose again in 1984 but much of this increase, ironically, was due to a general panic in the retailing industry incited by some of the draconian measures taken by the Commerce Department during 1983–84 to control imports. Over 100 "calls" were made in 1984 alone, most of which resulted in further import restraints. Importers and retailers rushed to step up overseas purchases in order to avoid the quotas they knew were forthcoming as a result of administrative directives issued by the Commerce Department. Now that overly high inventories have been drawn down, import levels for 1985 are moderating significantly.

Recent ups and downs in the domestic demand for textile products camouflages the fact that domestic production has steadily increased during the past 10 years. Producers' shipments of apparel and textile mill products have increased from $6.3 billion in 1974 to $109 billion in 1984, even though the ratio of imports to consumption rose from 6 to 14 percent over the same period. Textile mill products and apparel imports in 1984 were still only about 14 percent of domestic consumption. For the first 6 months of 1985, the total was 15 percent. The following tables demonstrate this trend over the last 10 years.

TABLE 1.—APPAREL AND TEXTILE MILL PRODUCTS: U.S. PRODUCERS' SHIPMENTS, EXPORTS, GENERAL IMPORTS, AND APPARENT CONSUMPTION, 1974–84 and JANUARY-JUNE 1985

[In millions of dollars]

Year	Producers' shipments	Exports	Imports	Apparent consumption	Ratio (percent) of imports to consumption
	Apparel (SIC 23) [1]				
1974	30,632	593	2,465	32,504	7.6

[1] Apparel as reported in SIC 23 includes home furnishings other than floor coverings, and some miscellaneous fabricated textile products.
[2] Textile mill products as reported in SIC 22 includes some underwear, hosiery, sweaters, and other garments wholly manufactured in knitting mills.
Source: Compiled from official statistics of the U.S. Department of Commerce.

Employment of production workers since 1974 has dropped about 17 percent not a dramatic job loss over a 10-year period, especially for an industry in a modernization and consolidation phase. It must be pointed out that declines in employment during this time are more fairly attributed to painful, but very necessary, technological improvements and gains in productivity, than to imports. For example, industry management suffered a much higher percentage job loss than production workers over the past decade.

More adjustment is ahead, however, since only 30 percent of the looms in America are of the modern shuttleless variety. It is certainly unfortunate, but probably accurate, to predict further job loss, whether or not imports rise or fall, as the industry continues its modernization.

In my view, if imports were the fundamental problem in the textile and apparel industry, a turnaround in its fortunes would have been witnessed some time ago. For the past 30 years this sector has been amassing an expansive bulwark of protection, culminating in a system of bilateral quotas which today covers two-thirds of U.S. imports.

Furthermore, duties on these goods are generally between two and three times those levied on any other manufactured products. U.S. textiles and apparel tariffs average about 20 percent. All U.S. tariffs average under 4 percent. The United States has the highest textile quotas in the industrialized world. Under the MFA, however, the United States can restrict textile imports to extraordinary levels without suffering retaliation in our export markets.

Designed as a temporary trade measure, and vigorously promoted by the textile and apparel industry, the MFA entered into force in 1974 for 4 years. For this transitional period, the MFA established a balanced framework for managed trade in textiles and apparel which: First, ensures continued trade expansion and the gradual removal of trade restrictions; second, promotes the economic development of textile and apparel industries, and third, affords industries in developed nations the time to restructure and adjust on a gradual basis to the competitive realities in the world marketplace.

The MFA has been extended twice, each time with new provisions that have allowed importing nations to impose ever-increasing restraints. Through its extension, interpretation, and administration the MFA has evolved into a permanent system of expanded protection for the textile and apparel industries of developed nations. Far from achieving its objectives, the MFA and its myriad of quotas have impeded both orderly growth of textile trade and economic development and the process of economic adjustment leading to an open international market for textile and apparel products.

The sponsors of this bill say its intent is to make MFA work. My judgment is that its intent is to subvert the operation of MFA by establishing new stricter quotas which repudiate the provisions of MFA. As we concentrate our attention on H.R. 1562, a bill that provides expanded protection for the domestic textile and apparel industry, a little historical perspective on the Mult-Fiber Agreement may prove helpful. I do not think we fully appreciate the long history of protection already given to this industry and the costly subsidy we will be perpetuating if we pass this bill. The crutch will just become more extensively used. If we don't revise our policies soon, we may never see a textile industry that is a tough international competitor rather than a severe drain on our Nation's economic resources.

Notwithstanding their espoused commitment to free trade principles, successive administrations have agreed to restrictions on international trade in textiles and apparel. Those principles were memorialized in 1947, when the United States and other

major trading nations entered into the General Agreement on Tariffs and Trade [GATT], a multilateral agreement designed to liberalize and govern world trade.

Since then, international trading under the GATT has been governed by two basic principles: First, the imposition of tariffs as well as extension of trade concessions must be made on a most-favored-nation basis; that is, nations must treat all of their trading partners in the same nondiscriminatory manner. Second, contracting nations may impose only temporary quotas to limit trade, and only in cases where increased imports of a particular item are causing or threatening to cause serious injury to a contracting nation's domestic industry. Unfortunately, the regulation of world trade in textiles and apparel—though accomplished under GATT auspices—is inconsistent with these guiding principles.

The initial departure from GATT principles was prompted by a belief that trade in textiles and apparel was a special case and thus deserved preferential treatment. There no longer exists any feature unique to world textile and apparel trade which warrants continuation of discriminatory treatment. In fact, it may now be said that the textile and apparel industries are not unique in their structure or in their foreign competition—only in the unprecedented protection they continue to enjoy.

The origins of the existing U.S. regulatory framework limiting trade in textiles and apparel can be traced to the 1930's when Japan, in response to protectionist sentiments in the United States, began to limit its exports to the United States. In the mid-1950's, calls for new policies to deal with foreign competition increased. In 1956, Japan, once again under pressure, agreed to "voluntarily" restrain exports to the United States. In that same year, Congress gave the President the authority to negotiate limits with exporting countries, as well as to take unilateral action, in order to limit textile and apparel imports.

Early in 1961, the United States proposed that a conference between exporters and importers of cotton textiles and products be convened to find a way to encourage trade without causing undue disruption to the established industries of the importing countries. As a result of this initiative, premised on the assumption that these industries should be accorded special treatment, two forerunners to the MFA were negotiated: the Short-Term Arrangement Regarding International Trade in Cotton Textiles (STA) in 1961 and the Long-Term Arrangement Regarding International Trade in Cotton Textiles (LTA) in 1962. These two arrangements established the right of importing countries to negotiate restrictions on low-cost cotton textile imports. Under the LTA, the United States negotiated bilateral cotton textile and apparel restraint agreements with 31 leading export countries and unilaterally imposed limits on imports from countries with which it had not negotiated such comprehensive agreements.

In 1968, presidential candidate Richard Nixon made a campaign promise to "promptly take the steps necessary to extend the concept of international agreements to all other textile articles involving wool, man-made fibers, and blends." By October 1971, the United States had concluded bilateral agreements covering trade in wool and man-made fiber textile and apparel products with the four largest exporters—Japan, Hong Kong, Taiwan, and South Korea—and also Malaysia, a small supplier. The U.S. Government then sought international acceptance for these new agreements. In July 1972, the GATT Working Party on Textiles called for a new international arrangement covering cotton, manmade fibers, and wool textile and apparel products. This led to the negotiation of the Multifiber Arrangement (MFA), which went into effect on January 1, 1974.

The original purpose of the MFA was to give developing countries guaranteed and growing access to markets in Western Europe and North America but to arrange the growth so as not to disrupt the established textile industries in those markets. Exporting countries were assured of at least a 6 percent annual growth rate. However, exceptions to the 6 percent limit provided a means of restricting particular categories in extraordinary cases, for example, wool.

The special treatment of textiles and apparel initiated earlier—in particular the concept of "market disruption"—was further emphasized in the first MFA. The effects of this concept were far-reaching because it introduced fundamental changes to generally accepted trade principles. Imports from a particular country could be singled out as the source of market disruption, which, in effect, provided a basis for applying additional restrictions in a discriminatory manner. Moreover, price differentials between particular imports and goods of comparable quality sold domestically could be invoked as a cause of market disruption. Having been given the right to invoke the market disruption mechanism, importing countries in return were obligated to pursue appropriate policies to encourage structural adjustment.

After more than a year of difficult negotiations, the MFA was extended in late December 1977 with certain "understandings" included in the protocol of extension. The protocol of the second MFA contained a "reasonable departures" provision, allowing for "jointly agreed reasonable departures from particular elements [of the Arrangement] in particular cases." In essence, the provision allowed the European Community to discriminate between suppliers and to renegotiate downward the basic 6 percent quota level through separate bilateral agreements. The United States did not formally invoke this provision, but nevertheless, held growth below 6 percent for some overseas suppliers. The second MFA resulted in a significant tightening of restrictions on imports from developing countries.

Notwithstanding the additional restrictions, successful efforts were undertaken to further restrict imports into the United States. In 1978, when the Carter administration was prepared to make tariff concessions on textiles and apparel as part of the Tokyo Round of Mutilateral Trade Negotiations, Congress was persuaded to enact legislation that not only would have blocked implementation of these proposed concessions, but threatened the status of the negotiations as they were moving toward a successful conclusion. President Carter vetoed the legislation, but agreed to provide relief administratively in the form of aggressive controls over import surges and tighter controls under bilateral agreements overall. Moreover, the MTN implementing legislation included a "snapback" clause, which provided for the restoration of pre-Tokyo Round textile and apparel tariffs in the event the MFA was not renewed.

Nine days before the second MFA was to expire, negotiators reached agreement on the protocol further extending the arrangement to July 31, 1986. The basic agreement remained unchanged, but the new protocol eliminated the "reasonable departures" provisions, while acknowledging "the good will" expressed by large exporters in bilaterally solving problems related to "particularly large restraint levels." The new protocol provided among other things, for latitude in negotiating bilateral textile agreements to set lower growth rates for the largest suppliers.

Notwithstanding the substantial regulatory mechanisms that continued to be erected under the MFA, the Reagan administration was encouraged to further tighten restrictions on import growth. On December 16, 1983, the Reagan administration expanded the "call" mechanism to take effect if there existed a presumption—rather than proof—of market disruption. A "call" is a governmental action to restrict imports on a category not already under quota restraints. Under these new provisions, calls can be made when total growth in imports in a specific category is greater than 30 percent in the most recent year or the import/domestic production ratio is 20 percent or greater in a specific category, as well as when imports from a supplier equal 1 percent or more of the total U.S. production in that category. By establishing these arbitrary percentage guidelines, the Reagan administration further expanded the scope of protection available to the textile and apparel industries.

In the most recent imposition of restrictions designed to impede trade in textiles and apparel, the Reagan administration issued new country-of-origin regulations on March 5, 1985. The rules changed longstanding regulations governing the standards for determining the country of origin of textile and apparel imports, and were purportedly designed to prevent evasion of existing quotas. In application, however, they will effectively hamper all trade in imported textiles and apparel and further protect the domestic industries from foreign competition.

As is apparent from the foregoing discussion, successive administrations have agreed to further restrictions beyond those initially contemplated by the first negotiated temporary set of ground rules governing

trade in textile products. Although originally intended to help the less developed countries, the MFA has been used to place the greatest relative burden on their exports. Under the MFA, the U.S. Government has imposed quotas on imports of textiles and apparel on a selective, bilateral basis. In addition, the U.S. Government has imposed and negotiated quotas on imports of cotton, wool, and man-made fiber textiles and apparel without proof that imports of these products have caused or threaten to cause serious injury or market disruption to the Nation's domestic producers of textiles and apparel.

Successive administrations have used the MFA to constrain trade in textiles and apparel to the significant detriment of retailers and their customers. Rather than help domestic producing industries to adjust to worldwide competition, however, the MFA and other trade restrictions have merely perpetuated protectionism and distorted investment and consumer spending in the United States.

We must reverse this downward spiral that has layered subsidy upon subsidy for the textile industry at a tremendous cost to consumers and other American producers.

Because this bill is in flagrant violation of the MFA due to its unilateral, discriminatory import restrictions and expanded coverage, all benefits our exporters receive under the MFA will be forfeited if H.R. 1562 becomes law. The 12 major textile exporting nations last year bought $33 billion in U.S. goods, including American soybeans, wheat, aircraft, semiconductor and aircraft parts, cotton, and tobacco. That is three times as much as the value of the textiles they sold us. The following table clearly demonstrates the adverse effects of this bill on U.S. exports.

MAJOR EXPORTING COUNTRIES UNDER H.R. 1562

Country	Percent of total U.S. imports of MFA products	Percent exports currently controlled [1]	1984 MFA exports to United States		Percent reduction under H.R. 1562	1984 purchases of U.S. exports (millions of dollars)
			Millions of dollars [2]	Millions SYE		
Taiwan	13.64	89.80	$2,583	1,335	47.9	$4,658
Korea	11.16	82.39	2,553	1,092	35.1	5,786
Hong Kong	10.55	91.10	3,132	1,033	14.7	2,407
PRC	9.88	84.00	1,272	967	59.1	2,988
Japan	7.53	38.09	1,147	737	20.1	22,692
Pakistan	3.11	91.55	(120T)	305	41.3	666
Indonesia	2.74	74.11	216	268	89.7	1,187
India	2.59	52.82	462	253	22.2	1,544
Philippines	2.47	100.00	435	242	21.1	1,696
Thailand	2.16	75.02	272	211	64.4	1,036
Brazil	1.99	25.44	241	195	80.5	2,585
Singapore	1.43	100.00	300	140	3.2	3,559

[1] (DOC data).
[2] (ITC data).

At the very least, this bill would cripple efforts by many debt-ridden LDC's to increase export earnings and purchase farm and manufactured goods from the United States. On a broader level, we will be compromising our efforts to foster stability and free-market policies in many Asian and South American countries with a direct impact on our national security.

Four special cases stand out. Hong Kong, which has no restrictions on imports, would have a 15-percent rollback. China, with which we have a positive balance, which has already retaliated against us in the past, and which has no other way to earn money to buy our products, takes a 60-percent hit. Thailand, a front-line state and ally in three wars, takes a 65-percent hit. Brazil, a fiscal basket case, takes an 80-percent cut. There is no equity and no sense in these cuts.

Ninety percent of the bill's impact falls on a dozen Asian countries, most of whom have little else to sell us except textiles. It is no wonder that Asians believe the bill is discriminatory. Canada and the European Community, both exempt from H.R. 1562, had textile increases into the United States in 1984 of 85 and 71 percent. The big three Asian exporters, Hong Kong, Korea, and Taiwan, increased only 11 percent. The bill is discriminatory on its face.

Such costs of MFA import restrictions for the U.S. economy are not offset by the small number of low-salaried textile and apparel jobs saved by the textile relief program. In this regard, the evidence shows that the costs of saving these jobs are astronomical. According to a recent Federal Trade Commission study, quotas on nine apparel categories from Hong Kong saved approximately 8,891 United States textile and apparel jobs at a cost of $34,500 per job a year. The jobs which were protected paid, on average, slightly less than $10,000.

The administration has estimated the overall cost per job, if H.R. 1562 were enacted, to be $140,000 per job. That means American consumers, who are already paying $25 billion for textile protection, will, according to the Council of Economic Advisors, pay $28 billion more if this bill is passed. Consumers will then be paying $50 billion more than the normal market value for textiles and apparel in order to protect a few thousand jobs.

Seldom have so many been compelled to sacrifice so much for so few. Also, the domestic industry seeks to expand coverage to currently unregulated products, including silk, linen, and ramie. Since domestic industries do not generally manufacture products with these fibers, there are no U.S. companies, factories, or jobs to protect from extinction. To keep goods which America does not even produce out of the country is a reckless exercise of Federal power that most Americans have regularly and vigorously opposed. It has no legitimate place in American law.

The fact that this outrageous legislation has actually reached the floor, with the MFA up for renegotiation only months from now, reflects the ability of this body to concentrate on any issue except the budget deficit, which should be its highest priority. H.R. 1562 is scapegoating in its worst form. It should be defeated.

H.R. 1562 cannot be justified in terms of the health of the industry, our economic interests, our export interests or our foreign policy interests. It is a further crutch for an industry that has had intensive physical therapy and should by now be learning to walk on its own. I urge my colleagues to resist enacting this additional, unjustified protection for the most protected industry in America. H.R. 1562 richly deserves a "no" vote.

CONFERENCE REPORT ON H.R. 2959

Mr. BEVILL submitted the following conference report and statement on the bill (H.R. 2959) making appropriations for energy and water development for the fiscal year ending September 30, 1986, and for other purposes:

CONFERENCE REPORT (H. REPT. 99-307)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2959) making appropriations for energy and water development for the fiscal year ending September 30, 1986, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4, 7, 9, 10, 28, 29, 30, 39, and 45.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 5, 6, 14, 19, 21, 27, 33, 36, 37, and 38, and agree to the same.

Amendment numbered 1:

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$128,972,000*; and the Senate agree to the same.

Amendment numbered 3:

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$795,865,000*; and the Senate agree to the same.

Amendment numbered 11:

That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$314,760,000*; and the Senate agree to the same.

Amendment numbered 12:

That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,319,973,000*; and the Senate agree to the same.

Amendment numbered 16:

That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$34,035,000*; and the Senate agree to the same.

Amendment numbered 17:

That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$521,700,000*; and the Senate agree to the same.

Amendment numbered 18:

That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$144,950,000;* and the Senate agree to the same.

Amendment numbered 25:

That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,989,671,000*; and the Senate agree to the same.

Amendment numbered 26:

That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

of which $200,000,000 shall be derived by transfer from Uranium Supply and Enrichment Activities provided in prior years, and of which $17,400,000 shall be derived by transfer from Operation and Maintenance, Southeastern Power Administration; and of which $25,000,000 shall be available only for construction of the Advanced Science Center, the Center for Science and Technology, the Center for Energy and Biomedical Technology, the Energy and Mineral Research Center, and the Demonstration Center for Information Technologies as described in the report accompanying this Act; together with not to exceed $6,000,000, to be derived from revenues from activities of the Technical Information Services, which shall be credited to this account and used for necessary expenses and shall remain available until expended

And the Senate agree to the same.

Amendment numbered 31:

That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$7,604,615,000*; and the Senate agree to the same.

Amendment numbered 35:

That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *$95,568,000,*; and the Senate agree to the same.

Amendment numbered 40:

That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$130,000,000*; and the Senate agree to the same.

Amendment numbered 41:

That the House recede from its disagreement to the amendment of the Senate numbered 41, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$85,000,000*; and the Senate agree to the same.

Amendment numbered 42:

That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$2,200,000*; and the Senate agree to the same.

Amendment numbered 43:

That the House recede from its disagreement to the amendment of the Senate numbered 43, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$418,000,000*; and the Senate agree to the same.

Amendment numbered 44:

That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$113,000,000*; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 8, 13, 15, 20, 22, 23, 24, 32, 34, and 46.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2959) making appropriations for energy and water development for fiscal year ending September 30, 1986, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effects of the action agreed upon by the managers and recommended in the accompanying conference report.

Report language included by the House which is not changed by the report of the Senate, and Senate report language which is not changed by the conference is approved by the committee of conference. The statement of the managers, while repeating some report language for emphasis, does not intend to negate the language referred to above unless expressly provided herein.

TITLE I—DEPARTMENT OF DEFENSE—CIVIL

DEPARTMENT OF THE ARMY

CORPS OF ENGINEERS—CIVIL

GENERAL INVESTIGATIONS

Amendment No. 1: Appropriates $128,972,000 for general investigations instead of $133,189,000 as proposed by the House and $120,697,000 as proposed by the Senate.

As part of the ongoing Osage River Basin Study, the conferees direct the Corps of Engineers to study the feasibility of a potential crossing of the lake of the Ozarks in the vicinity of Osage Beach, Missouri.

The conferees have provided the funding to continue detailed design activities in fiscal year 1986 on all elements of the Santa Ana River flood control project, and direct the Corps to include the locally acceptable upstream project element upon submittal of the Upper Santa Ana River Flood Storage Alternatives Study to the South Pacific Division, leading to completion of the Phase II design memorandum. The conferees urge the Corps to expedite that report consistent with procedural requirements so that all components of this project proceed in carefully coordinated fashion.

The conferees share concerns that this project be designed and operated in ways to maximize its contribution to water conservation. They also note the stipulated judgement of the Superior Court of Orange County in the case of the Orange County Water District v. the City of Chino, et al, 1969, and that the Orange County (Ca.) Water District has signed agreements to reimburse the Counties of San Bernardino and Riverside and the City of Corona for any costs associated with operating the Prado Dam at elevation 514, all to facilitate the conservation of water with the project in its present configuration. In furtherance of these efforts, the conferees direct the Corps on its ongoing operation and maintenance of Prado Dam to achieve a reasonable level of water conservation consistent with the flood control purposes of the Dam, provided that any incidental costs of such water conservation storage over and above the ordinary operation and maintenance of Prado Dam shall be reimbursed to the Corps by the Orange County Water District.

The conferees agree with the allocations contained in the House and Senate reports for Coordination Studies with other Agencies except that the allocation for the State of New Mexico for Section 22 technical assistance to States is $5,000, the same as the budget request.

The conferees direct the Corps of Engineers to continue planning and engineering studies for the Atlantic Coast of Maryland and Assateague Island, Virginia, hurricane protection project. The studies are to be accomplished within available funds.

The conferees have provided sufficient funds from the Chesapeake Bay Shoreline Erosion Study, Maryland and Virginia, for the Corps of Engineers to begin low-cost erosion control work incorporating the techniques gathered from section 54 of the 1976 Water Resource Development Act.

The conference agreement includes $500,000 for continued planning and engineering design of a replacement facility for Locks and Dam 52 and 53 on the Ohio River and to advance such critical activities as geotechnical investigations and hydraulic modeling.

The conferees understand that the Wabash River is shifting at Grayville, Illinois, and threatens the City's water supply and sanitary facilities. Therefore, within the amount recommended for General Investigations, funds are provided under the authority of the Wabash River Comprehensive study to investigate the serious problems at Grayville, Illinois.

The conferees direct that the $300,000 included for the Chesapeake Bay-Susquehanna River Drought Management and Low Fresh Water Inflow Study, be used to study all major tributaries entering the Bay due

to their potential impact and importance to the Bay ecosystem.

The conference agreement includes $250,000 under Research and Development for technology transfer to allow the Corps of Engineers to continue and extend its existing demonstration program, and $150,000 to continue the demonstration of economic development planning technology in Southeastern Oklahoma.

The funds are to be allocated as shown in the following table:

Type of project	General investigations—State and project	Budget estimates		Conference allowance	
		Investigations	Planning	Investigations	Planning
	ALABAMA				
(N)	Bayou La Batre	66,000		104,000

Type of project: (N) Navigation; (FC) Flood Control; (BE) Beach Erosion Control; (MP) Multiple-Purpose, Including Power; (FDP) Flood Damage Prevention; (SP) Shoreline Protection; (SPEC) Special; (COMP) Comprehensive; (Phase I) Authorized for Phase I Stage of Advance Engineering and Design in the Water Resources Development Act of 1974 or 1976; (CP&E) Continuation of Planning and Engineering; (AE&D) Advance Engineering and Design; (REVIEW) Review of Authorized Project.

Amendment No. 2: Deletes language proposed by the House and stricken by the Senate relating to the Wabash River Basin Comprehensive study.

CONSTRUCTION, GENERAL

Amendment No. 3: Appropriates $795,865,000 for construction, general instead of $846,958,000 as proposed by the House and $715,881,000 as proposed by the Senate.

The conference agreement includes funding for the following projects in the Continuing Authorities Program:

Section 107—Small Navigation Projects.—Mekoryuk, Alaska, $1,200,000; Sturgeon Point Marina, New York, $220,000; Lorain Harbor, Ohio, $1,880,000; Laupahoehoe Point, Hawaii, $540,000; and Larkspur Ferry navigation channel, California, $1,750,000. Within available funds, the Corps of Engineers is directed to expedite the completion of planning and the initiation of construction of the Morgan County Port, Tennessee River, Decatur, Alabama, project.

Section 205—Small Flood Control Projects.—Salyersville, Kentucky, $300,000; Upper Gordons Creek, Mississippi, $50,000; Puerco River and tributaries at Gallup, New Mexico, $4,000,000; and Passaic River Basin Flood Warning System, New Jersey, $500,000.

Section 14—Emergency Streambank and Shoreline Protection.—Nazline Wash, Chinle, Arizona, $200,000; Amado Bridge, Tubac, Arizona, $150,000.

Section 111—Mitigation of Shore Damages Attributable to navigation projects.—Herring Creek, Tall Timbers, St. Mary's County, Maryland, $850,000.

The Corps of Engineers has completed an Appraisal Report on the serious erosion problem that is occurring along North Sheridan Road in an area known as Burger Park. The Corps has identified an erosion problem that threatens public facilities and is recommending implementation of a revetment alternative to correct the situation. The conferees, therefore, direct the Corps of Engineers to proceed with implementation of an erosion control project for Burger Park, Chicago, Illinois, within available funds, under the authority of Section 14 of the Flood Control Act of 1946, as amended.

Serious erosion is also occurring at Jarvis Avenue, Fargo Alley, North Shore Avenue and Rosemont Avenue in Chicago, Illinois. This erosion situation has and will continue to threaten both public and privately owned property and cause sink holes to develop in some streets. The conferees, therefore, direct the Corps of Engineers to proceed

with an erosion control project to halt the erosion along the above named streets, using available funds.

The conference agreement includes $2,500,000 for the Baltimore Harbor and Channels, Maryland (Connecting Channel to the Chesapeake and Delaware Canal) project. It is understood that a new study is being forwarded to the Office of the Chief of Engineers and expenditure of these funds is subject to a favorable decision by the Chief of Engineers on the new report.

Recognizing the need to limit federal expenditures in the interest of the Nation's overall economic condition, the Conference Committee has deferred $660,000 of the $14,000,000 budget request for the Chief Joseph Additional Units project. This Committee action is not a reflection on the merits of the project and should not be construed to prejudice the right of the Government to collect whatever monies may be due because of the failure of the existing turbines to meet contractual requirements.

The conference agreement includes $2,800,000 to modify the existing breakwater at the Port Austin Harbor of Refuge, Michigan. The total cost of construction and maintenance shall be at full Federal expense since the entire local cash contribution was provided in previous work on the existing project.

The conferees are aware that the Tennessee-Tombigbee Waterway project in Alabama and Mississippi is open for navigation. The remaining navigation related funding, anticipated settlement of contract claims, anticipated real estate judgments and expenses, erosion control measures, tow mooring facilities, and other authorized navigation related work must be performed to assure the integrity and proper operation of the project. In addition, the FY 1985 Supplemental Appropriations Act (P.L. 99-88) directed completion, within available funds, of the remaining recreation facilities for the Tennessee-Tombigbee Waterway project under the same terms and conditions as those recreation facilities initiated prior to FY 1983. These needs are within the previously established cost estimate for the Tennessee-Tombigbee Waterway and consist of necessary work needed to achieve the full range of benefits anticipated from the project. Sufficient funds are available for these authorized activities from within funds available to the Corps.

Funds are available to continue construction of the new starts included in P.L. 99-88 if the criteria set forth in that Public Law are met.

Amendment No. 4: Appropriates $1,500,000 for construction of the Sandy Hook to Barnegat Inlet, New Jersey, project and appropriates $6,000,000 for construction of the Yatesville Lake construction project as proposed by the House.

Amendment No. 5: Earmarks $5,700,000 for construction of Lock and Dam No. 3, Red River Waterway, Louisiana, project authorized by the River and Harbor Act of 1968, as amended (P.L. 90-483), as proposed by the Senate.

Amendment No. 6: Appropriates $18,000,000 for construction of the Elk Creek Lake, Oregon, project as proposed by the Senate.

Amendment No. 7: Appropriates $1,880,000 for construction of the Lorain Small Boat Harbor, Lorain, Ohio, project and appropriates $400,000 for construction of project deficiencies in the First Ward Area Front Street Levee in Binghamton, New York, as proposed by the House.

Amendment No. 8: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate providing for the construction of recreation and management facilities at the Ouachita and Black Rivers, Arkansas and Louisiana, project in the vicinity of the Felsenthal National Wildlife Refuge at full Federal expense.

Amendment No. 9: Deletes language proposed by the Senate relating to the Clarence Cannon and Mark Twain Lake, Missouri, project.

The funds are to be allocated as shown in the following table:

Type of project	Construction, general—State and project	Budget estimate	Conference allowance
	ALASKA		
(FC)	Chena River Lakes	5,000,000	5,000,000

	Small projects for flood control and related purposes (section 205).	27,600,000	32,100,000
	Emergency streambank and shoreline protection (section 14).	7,200,000	7,400,000
	Mitigation of shore damages attributable to navigation projects (section 111).		850,000
	Small snagging and clearing projects (section 208).	1,200,000	1,200,000
	Aquatic plant control (1965 Act)	8,000,000	10,000,000
	Employees compensation	11,200,000	11,200,000
	Dam safety assurance program	4,000,000	4,000,000
	Reduction for anticipated savings and slippage.	−53,061,000	−6,901,000
	Pay amendment	6,530,000	
	Total, construction, general	848,530,000	919,345,000

Type of project: (N) navigation; (FC) flood control; (BE) beach erosion control; and (MP) multiple-purpose, including power.

FLOOD CONTROL AND COASTAL EMERGENCIES

Amendment No. 10: Appropriates $25,000,000 for flood control and coastal emergencies as proposed by the House instead of $10,000,000 as proposed by the Senate.

FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES, ARKANSAS, ILLINOIS, KENTUCKY, LOUISIANA, MISSISSIPPI, MISSOURI AND TENNESSEE

Amendment No. 11: Appropriates $314,760,000 for flood control, Mississippi River and tributaries, Arkansas, Illinois, Kentucky, Louisiana, Mississippi, Missouri, and Tennessee instead of $321,685,000 as proposed by the House and $285,735,000 as proposed by the Senate.

The conferees concur in and strongly support the House report language relating to the Yazoo Basin, Mississippi, Demonstration Erosion Control, a joint program of the Corps of Engineers and the Soil Conservation Service.

The funds are to be allocated as shown in the following table:

Type of project	Flood control, Mississippi River and Tributaries	Budget estimate	Conference allowance
	GENERAL INVESTIGATIONS		
	Surveys:

Type of study or project: (FC) Flood control; (FDP) Flood damage prevention.

OPERATION AND MAINTENANCE, GENERAL

Amendment No. 12: Appropriates $1,319,973,000 for operation and maintenance, general instead of $1,325,195,000 as proposed by the House and $1,302,800,000 as proposed by the Senate.

The conferees are aware of the serious shoaling problem which has developed at Marina del Rey, California. The Corps of Engineers is directed to perform the necessary maintenance dredging to provide access in and out of the harbor.

The conferees agree with the House report language relating to the Columbia River Fish Passage Facilities.

The conferees are aware of a heavy shoaling condition which exists in the navigation channel to the turning basin at Port Orford, Oregon, and direct the Corps of Engineers to use available funds to provide additional

dredging for the existing port and marine facilities.

The conference agreement includes $3,000,000 for the Racine Harbor, Wisconsin, project. These funds are to be utilized by the Chief of Engineers to dredge the proposed harbor/marina area and entrance channel.

The funds are to be allocated as shown in the following table:

Type of project	Operation and maintenance—State and project	Budget estimate	Conference allowance
	ALABAMA		
(N)	Alabama-Coosa Rivers	5,204,000	6,171,000

	Total, operation and maintenance.	976,560,000	1,319,973,000

Type of project: (N) Navigation; (FC) Flood control; and (MP) Multiple-purpose, including power.

Amendment No. 13: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate permitting advance maintenance of the Charleston Harbor navigation channel.

GENERAL PROVISIONS, CORPS OF ENGINEERS

Amendment No. 14: Deletes language proposed by the House and stricken by the Senate relating to a Corps of Engineers learning facility.

Amendment No. 15: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate permitting the Secretary of the Army to remove obstructions and ease bends at the Jacksonville Harbor navigation channel in the vicinity of Blount Island to allow for the free and safe movement of vessels.

TITLE II—DEPARTMENT OF THE INTERIOR

BUREAU OF RECLAMATION

GENERAL INVESTIGATIONS

Amendment No. 16: Appropriates $34,035,000 for general investigations instead of $34,085,000 as proposed by the House and $32,150,000 as proposed by the Senate.

The conference agreement includes $100,000 for the Pima County Santa Cruz River Groundwater study to develop detailed plans and a specific project recommendation.

The conferees are aware that subsidence of ground surface is occurring in areas of Arizona and are equally concerned about the need to conserve water in the State. They are also aware of the successful multipurpose Indian Bend Wash Project and the 1981 Phoenix Urban Study which found that "artificial groundwater recharge appears to be a feasible method of achieving water conservation," and are interested in determining the impact of artificial groundwater recharge on ground subsidence. Therefore, the conferees direct that the Bureau of Reclamation, in cooperation with the U.S. Corps of Engineers as builders of the Indian Bend Wash Flood Control Project, include the Scottsdale, Maricopa County, Arizona area as part of its evaluation under the Phase I provisions of the Groundwater Recharge Demonstration Program authorized by Public Law 98-434, and that funds be made available for such evaluation from the General Investigations account.

The funds are to be allocated as shown in the following table:

Project title	Budget estimate	Conference allowance
GENERAL INVESTIGATIONS		
ARIZONA		
Pima County/Santa Cruz ground water project		100,000
Spring Canyon pumped storage project	240,000	240,000
CALIFORNIA

CONSTRUCTION PROGRAM

Amendment No. 17: Appropriates $521,700,000 for construction program instead of $541,074,000 as proposed by the House and $512,730,000 as proposed by the Senate.

The conferees note that legislation to authorize the study program for long-term solutions to the drainage problems in the Central Valley of California for fiscal year 1986 is still awaiting enactment by the Congress. In addition, the California State Water Resources Control Board and the Secretary of the Interior have mandated strict schedules for the closure of Kesterson Reservoir. In order to respond to this immediate problem and to insure program continuity, the conferees urge that funds available to the Bureau of Reclamation be used for two purposes.

First, the Secretary, acting through the Bureau of Reclamation, is urged under the authority of the Act of October 15, 1966 (42 U.S.C. 1900), to execute a contract to loan up to $3,700,000 to a local government agency for the preparation of feasibility studies for alternative solutions to improve the quality of agricultural wastewater in the Central Valley of California. Such funds shall be repaid under such terms and conditions as prescribed by the Secretary of the Interior. The studies should include: economic feasibility studies (including water trading and marketing opportunities); technical feasibility studies; pilot testing of selenium removal; and, economic feasibility studies and pilot testing of deep well injection and solar pond brine management. Second, funds are made available to the Bureau of Reclamation for the continuation of existing studies under the San Joaquin Valley Drainage Program at the present level (FY 1985) of effort. New study initiatives are to be deferred pending enactment of necessary authorizing legislation.

Funds are available to continue construction of the new starts included in P.L. 99-88 if the criteria set forth in that Public Law are met.

The conferees recognize the extraordinary efforts made by the State of Arizona to develop an upfront cost-sharing proposal for Plan 6 of the Central Arizona Project. The Arizona proposal represents one of the largest cost-sharing plans for a major water development project under the jurisdiction of the Bureau of Reclamation to date. The conferees applaud the Arizona initiative and would encourage the department to carefully review the proposal and render a decision on the proposal as quickly as possible.

Safety problems associated with existing Federal dams in Arizona have continued for much too long. The conference agreement includes funds in the bill to initiate construction activities on two Salt River Dams and the conferees urge the Department to move as quickly as possible to correct safety deficiencies on these structures.

Last year the Secretary of the Interior was directed to proceed expeditiously with safety modifications to dams on the Salt River in Arizona. The conferees understand that the U.S. Bureau of Reclamation has the capability to perform these essential preconstruction activities pursuant to the Federal Reclamation Safety of Dams Act, Public Law 98-404, and have provided funding for this purpose. The conferees further direct that the Secretary of the Interior give priority in reprogramming funds to bring the funding levels for dam safety up to the Bureau of Reclamation's full capability in 1986.

Amendment No. 18: Provides that $144,950,000 shall be available for transfers to the Lower Colorado River Basin Development Fund instead of $147,200,000 as proposed by the House and $141,200,000 as proposed by the Senate.

Amendment No. 19: Deletes language proposed by the House and stricken by the Senate relating to the Animas-LaPlata Participating Project, Colorado and New Mexico.

Amendment No. 20: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that not to exceed $20,000 shall be available to initiate a rehabilitation and betterment program with the Twin Falls Canal Company.

The funds are to be allocated as shown in the following table:

LOAN PROGRAM

Amendment No. 21: Appropriates $39,315,000 for the loan program as proposed by the Senate instead of $42,515,000 as proposed by the House.

Amendment No. 22: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the sum stricken and inserted by said amendment, insert the following: *$48,315,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

ADMINISTRATIVE PROVISIONS

Amendment No. 23: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that not to exceed $6,000,000 may be used for alterations to existing building No. 53 at the Denver Federal Center, Lakewood, Colorado.

GENERAL PROVISIONS

Amendment No. 24: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which establishes a Working Capital Fund for the Bureau of Reclamation.

TITLE III—DEPARTMENT OF ENERGY

The summary table at the end of this section sets forth the conference agreement with respect to the individual appropriations, programs and activities of the Department of Energy. Additional items of conference agreement are discussed below.

ENERGY SUPPLY, RESEARCH AND DEVELOPMENT ACTIVITIES

Amendment No. 25: Appropriates $1,989,671,000 for Energy Supply, Research and Development Activities, instead of $1,947,836,000 as proposed by the House and $1,989,721,000 as proposed by the Senate.

SOLAR AND RENEWABLE ENERGY

Solar Building Energy Systems.—The conferees agree to provide $8,500,000 for solar building energy systems. No funds are available for technology transfer activities, as proposed by the Senate.

Photovoltaic Energy Systems.—The conferees agree to provide $47,800,000 as proposed by the Senate. Funds are to be used to continue operation of the residential experiment stations. Of the amounts provided, $2,000,000 is to be used for the Austin, Texas, project and $1,000,000 is for the Massachusetts Photovoltaic Center.

Ocean Energy Systems.—The conference agreement makes sufficient funds available for the Department to conduct two simultaneous 50 kW apparatus tests under the PICHTR open-cycle project.

ELECTRIC ENERGY SYSTEMS AND STORAGE

Of the funds provided, a total of $1,700,000 is available for the zinc bromine battery research program. The conferees agree to include additional funding for electrochemistry research which is proposed by the Senate.

NUCLEAR ENERGY RESEARCH

CIVILIAN NUCLEAR RESEARCH PROGRAM

The conferees direct the Department of Energy to submit a plan to the Committees on Appropriations of the House of Representatives and the Senate identifying within two years an approach to future civilian nuclear reactor research which identifies research priorities, establishes a process for identifying the appropriate future reactor concepts and indicates funding requirements and objectives for the civilian nuclear reactor program.

Improved LWR Development.—The conferees agree to provide $3,000,000 for the extended burn-up program to close out the Federal involvement in the program.

Advanced Light Water Reactors.—The conferees include $4,750,000 for the Department to utilize in support of the EPRI/Industry Advanced Light Water Reactor Program. This amount is available to the Department to be matched by industry on a 50% cost-shared basis for specific technical studies and component verification and analysis relating to the ALWR program.

High Temperature Gas Reactors.—The conferees agree to provide $31,000,000 for high temperature gas reactor research.

Advanced Breeder Reactor Technology.—The conferees agree to provide $159,800,000 for advanced breeder reactor technology, as follows: $6,000,000 additional for reactor operations at Hanford and $6,000,000 additional at Idaho.

Funds are provided for continuation of the test program for the integral fast reactor, including pre-prototype irradiation test bundles and exploration of reprocessing technology. Not less than 50% of additional funds are to be made available only to Argonne National Laboratory in Illinois.

Advanced Nuclear Systems.—The conferees agree to provide $23,000,000 for advanced nuclear systems, to include: $1,900,000 for thermionics research;

$3,100,000 for other RTG research. Additional funds may be available for the Secure Military Power Project, contingent upon commitment by the Air Force to offset full research and development costs should a decision be made to produce SMPP units.

Defense Nuclear Energy Program.—The conferees agree to provide the budget request for the SP-100 program.

Civilian By-Products and Beneficial Uses.—The conferees agree to provide $5,000,000 as provided by the House. In addition, the Department shall continue initial planning for pork irradiation demonstration in conjunction with Iowa State University.

Remedial Actions.—The conferees agree to provide $95,000,000 for uranium mill tailings remedial action. Full funding at the requested level is included for sites and vicinity properties with completed remedial action plans including Cannonsburg, Salt Lake City, Shiprock and Lakeview.

MAGNETIC FUSION

The conferees agree to provide $383,000,000 for the magnetic fusion program. A panel reporting to the Magnetic Fusion Advisory Committee recently found that ". . . increased emphasis should be given to improving the mass power density in the various concept lines, aiming at a target of 100 kWe/Tonne." In accepting this finding, the Magnetic Fusion Advisory Committee noted that mass power density is a useful index of progress toward a practical application of fusion when combined with plasma confinement efficiency, safety and environmental considerations, and the projected cost of electricity. The conferees request the Department to provide, in conjunction with the FY 1987 budget request, a report showing the progress and potential of the major elements of the current research programs as measured by these factors. No funds are available for development of a generic test facility for compact high-density devices.

SUPPORTING RESEARCH AND TECHNICAL ANALYSIS

Cooperative Programs.—The Department is directed to allocate not less than $1,500,000 to maintain and support the relationship between the Lawrence Berkeley Laboratory, the Ana G. Mendez Foundation and Jackson State University, as identified in the House and Senate reports.

Materials Sciences.—The conferees agree to provide $5,000,000 for preconstruction R&D activities for both 2 GeV and 6 GeV synchrotron radiation facilities. The conferees agree that the addition of these funds does not represent a commitment to construct these facilities.

Chemical Sciences.—The conferees agree to provide an additional $3,000,000 for chemical sciences with the understanding that these funds are not available to establish a center for chemical sciences.

University Research Support.—The conferees agree with the Senate report language and provide $2,900,000 for LEU fuel assistance to universities.

USE OF AVAILABLE BALANCES

Both the House and the Senate provided for the use of prior year balances to offset the requirement for new obligational authority. The conferees agree that $17,822,000 of available funds should be applied to offset pay increases provided for by budget amendment.

The Administration's original FY 1986 budget request assumed a five percent reduction in salary expenses. As contained in House Document 99-89, the Administration has amended the FY 1986 request and increased the budget for the Department of Energy accounts contained in this bill by $17,892,000.

Of this request, $17,822,000 is included in the Energy Supply, Research and Development Activities appropriation. Using the provisions of Section 302 of this bill, the Department of Energy is directed to transfer without further notification to the Congress these funds to the following Department of energy appropriations:

Atomic Energy Defense Activities	$5,500,000
General Science and Research Activities	79,000
Federal Energy Regulatory Commission	3,284,000
Alaska Power Administration	40,000
Southwestern Power Administration	246,000
Western Area Power Administration	1,412,000
Departmental Administration	5,415,000
Geothermal Resources Development Fund	4,000

The $70,000 required by the Southeastern Power Administration should be financed from available prior year unobligated appropriations.

Amendment No. 26: Restores House language amended by the Senate, amended to provide that $200,000,000 shall be derived by transfer from prior year balances in Uranium Supply and Enrichment Activities as proposed by the House instead of $92,600,000 as proposed by the Senate and transfers $17,400,000 from Operation and Maintenance, Southeastern Power Administration as proposed by the House and Senate. In addition, the following scientific research facilities are to be funded from within the Energy Supply, Research, and Development Activities account, as follows:

Center for Science and Technology	$4,500,000
Center for Energy and Biomedical Technology	6,000,000
Energy and Mineral Research Center	8,000,000
Demonstration Center for Information Technologies	5,000,000
Advanced Science Center	8,500,000

URANIUM SUPPLY AND ENRICHMENT ACTIVITIES

Amendment No. 27: Inserts language proposed by the Senate changing the designation of statutory limitation as a technical correction to the House language.

The conferees agree that the Department should proceed as expeditiously as possible to demonstrate the economic and technical feasibility of the AVLIS uranium enrichment technology. The table that appears at the end of this section allocates funds in a manner that will permit prototype development deployment and testing in a manner that would permit early deployment of the advanced technology at such time as it has satisfactorily demonstrated its economic, scientific and technical viability.

Neither the House nor the Senate addressed the Administration proposal to repay appropriations made to the uranium enrichment program in prior years because the authorizing committees had not considered the proposal at the time the bills were considered by the respective bodies. However, sufficient funds are available within the $1,612,700,000 in budget authority provided in this Act to meet the estimated $110,000,000 first-year repayment if necessary authorization action is completed. The conferees have no obligation to the use of these funds for this purpose.

GENERAL SCIENCE AND RESEARCH ACTIVITIES

Amendment No. 28: Appropriates $691,400,000 as proposed by the House instead of $685,400,000 as proposed by the Senate.

The conferees agree that $2,000,000 is provided from within the total General Science and Research Activities appropriation for project 86-R-105, AGS proton-heavy ion booster, Brookhaven National Laboratory, to upgrade the alternating gradient synchrotron facility. The conferees agree that the addition of these funds does not represent a commitment to a larger high energy physics facility at the Brookhaven National Laboratory.

NUCLEAR WASTE DISPOSAL FUND

Amendment No. 29: Appropriates $521,460,000 as proposed by the House instead of $552,460,000 as proposed by the Senate.

The conferees are aware that the States of Washington and Oregon are interested in a joint review of the proposed Hanford high level nuclear waste facility. Because the proposed Hanford site is on the Columbia River, which borders the State of Oregon for such a long distance and has such an important impact on commerce and industry of the State, the conferees support this joint approach. The conferees support the State request for funds to contract with Oregon to study those issues which relate to the Columbia River.

ATOMIC ENERGY DEFENSE ACTIVITIES

Amendment No. 30: Deletes language proposed by the Senate requiring preparation of a report on recent development in the United States' capabilities to monitor a comprehensive nuclear test ban agreement.

Amendment No. 31: Appropriates $7,604,615,000 for Atomic Energy Defense Activities instead of $7,593,415,000 as proposed by the House and $7,647,800,000 as proposed by the Senate.

RESEARCH AND DEVELOPMENT

From within the funds provided, $1,000,000 is available for engineering design of the experimental halls for the weapons neutron research-proton storage ring at Los Alamos. Any future requests for funding of this activity should be included in the Energy Supply, Research and Development appropriation.

INERTIAL CONFINEMENT FUSION

The conferees recommend funding the Inertial Confinement Fusion program as a separate category with $145,000,000 for operating expenses and $10,000,000 for capital equipment.

From within the allowance, the conferees agree with the House and Senate position that $13,800,000 should be available for the KMS Fusion program and $7,800,000 for the program at the University of Rochester. Pending the completion of an ongoing review of the ICF program by the Technical Review Panel, the conferees have not provided an allocation of the remaining operating expenses among the major subprograms. The Secretary of Energy is directed to provide his plan, rationale and distribution of the ICF funds within 30 days of enactment of this legislation.

The conferees request the Technical Review Panel on ICF to review the chroma laser upgrade proposed for the KMS Fusion Facility and provide their findings to the

Department of Energy by January 1986. If this review concludes that the chroma laser upgrade is cost effective, then the conferees recommend that the Secretary of Energy fund the proposal from funds available in the Atomic Energy Defense Activities appropriation.

PRODUCTION AND SURVEILLANCE

The conferees agree to provide $5,000,000 for Project 86-D-130, Tritium loading facility. The recommendation would defer initiation of construction pending the completion of the design to provide a better estimate of scope and total cost of the facility.

The conferees agree to provide the $15,000,000 requested in the budget for facilities to produce the non-ER warhead, W82, for the 155 mm nuclear projectile in strict conformance with the restrictions imposed by Section 1635 of Public Law 98-525.

MATERIALS PRODUCTION

The conferees agree to $4,000,000 for design and engineering for project 86-D-148. However, prior to the obligation of funds for this project the Department should conduct a 120-day process readiness review of the competing Special Isotope Separation (SIS) processes. The process readiness review should be conducted by a competent panel of experts in the fields of production plant operations and engineering design. The process selected should be the most likely for technical success and have the lowest operating and capital costs. If upon completion of the review, the panel agrees that a technology is ready for plant scale implementation, design of the project shall commence utilizing the selected technology.

OTHER DEFENSE ACTIVITIES

The FY 1986 funding for byproducts and beneficial use activities and Defense Nuclear Energy programs are provided in the Energy Supply, Research and Development appropriation.

Amendment No. 32: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment to read as follows:

In lieu of the matter inserted by said amendment, insert the following: , *of which $97,325,000 shall be available for verification and control technology*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

BONNEVILLE POWER ADMINISTRATION

Amendment No. 33: Deletes language proposed by the House and stricken by the Senate approving expenditures for the White River Falls Fish Passage Facilities.

Conservation Program.—The conferees agree to the funding and direction of the BPA conservation program as proposed by the Senate.

Borrowing authority.—In addition to the cumulative $2,003,000,000 available to BPA through fiscal year 1985, the conferees recommend an additional increment of $301,000,000 in borrowing authority in fiscal year 1986 for the construction, conservation, and fish and wildlife programs for a total of $2,304,000,000, including any unused portion from prior years.

Transmission system.—The conferees understand that scheduling difficulties may occur in relation to timely completion of the dc terminal expansion project. It may not be possible for BPA and the participating utilities to complete all fiscal year 1985 procurement actions as originally scheduled. The conferees are highly supportive of this project and wish it to proceed expeditiously.

Amendment No. 34: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

Notwithstanding provisions of Title 5, U.S.C., except for Sec. 5308, no funds approved for Western Area Power Administration shall be used to pay the rates of basic pay and premium pay for power system dispatchers unless such rates are based on those prevailing for similar occupations in the electric power industry.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference language restricts the House proposed language by maintaining the existing Federal salary ceiling and limiting the proposal to the Western Area Power Administration.

FEDERAL ENERGY REGULATORY COMMISSION

SALARIES AND EXPENSES

Amendment No. 35: Appropriates $95,568,000 for the Federal Energy Regulatory Commission, Salaries and Expenses, as proposed by the Senate, instead of $93,068,000, as proposed by the House, and deletes earmarking of $2,750,000 for cumulative impact assessment studies, as proposed by the Senate.

Amendment No. 36: Provides $29,491,000 as a final net appropriation as proposed by the Senate instead of $26,991,000 as proposed by the House.

An additional $3,284,000 related to the pay amendment is provided for and discussed in an earlier section of this Joint Explanatory Statement and shall be made available to the Federal Energy Regulatory Commission.

Amendment No. 37: Deletes language proposed by the House and stricken by the Senate relating to technology transfer activities.

Amendment No. 38: Deletes language proposed by the House and stricken by the Senate relating to purchase of extra high voltage electrical equipment.

	Budget estimate	Conference allowance
Energy supply research and development		
Solar Energy		
I. Solar applications:		
A. Solar building energy systems:		
Operating expenses	9,000,000	8,000,000
Capital equipment	500,000	500,000
Subtotal, solar building energy systems	9,500,000	8,500,000
B. Photovoltaic energy systems:		
Operating expenses	43,600,000	47,800,000
Capital equipment	1,200,000	1,200,000
Subtotal, Photovoltaic energy systems	44,800,000	49,000,000
C. Solar thermal energy systems:		
Operating expenses	28,100,000	26,600,000
Capital equipment	300,000	300,000
Subtotal, Solar thermal energy system	28,400,000	26,900,000
D. Biofuels energy systems:		
Operating expenses	27,800,000	27,800,000
Capital equipment	600,000	600,000
Subtotal, Biofuels energy systems	28,400,000	28,400,000
E. Wind energy systems:		
Operating expenses	20,000,000	13,000,000
MOD-5		12,000,000
Capital equipment	800,000	800,000
Subtotal, Wind energy systems	20,800,000	25,800,000
F. Ocean energy systems:		
Operating expenses	3,500,000	5,000,000
Subtotal, Solar applications	135,400,000	143,600,000
(Operating expenses)	(132,000,000)	(140,200,000)
(Plant and capital)	(3,400,000)	(3,400,000)
II. Other solar energy:		
A. International solar energy program—OE		1,000,000
B. Solar technology transfer:		
Operating expenses	3,100,000	3,100,000
D. Solar Energy Research Institute:		
Capital equipment	261,000	261,000
Construction: General plant projects	2,071,000	2,071,000
Subtotal: Solar Energy Research Institute	2,332,000	2,332,000
F. Resource assessment:		
Operating expenses	950,000	950,000
Capital equipment	50,000	50,000
Subtotal: Resource assessment	1,000,000	1,000,000
G. Program support—OE	1,300,000	1,300,000
H. Program direction—OE	4,900,000	4,900,000
Subtotal: other solar energy	12,632,000	13,632,000
Total, solar energy	148,032,000	157,232,000
(Operating expenses)	(142,250,000)	(151,450,000)
(Plant and capital)	(5,782,000)	(5,782,000)
GEOTHERMAL		
I. Hydrothermal industrialization:		
Operating expenses		2,000,000
II. Geopressured resources:		
Operating expenses	3,600,000	4,600,000
III. Geothermal technology development:		
Operating expenses	20,300,000	20,300,000
Capital equipment	500,000	500,000
Subtotal, Geothermal technology development	20,800,000	20,800,000
V. Program direction—OE	800,000	800,000
Total, geothermal	25,200,000	28,200,000
(Operating expenses)	(24,700,000)	(27,700,000)
(Plant and capital)	(500,000)	(500,000)
HYDROPOWER		
I. Small scale hydropower development—OE	453,000	453,000
III. Program direction—OE	47,000	47,000
Total, hydropower	500,000	500,000
Electric Energy Systems and Storage		
I. Electric energy systems:		
A. Electric field effects research: Operating expenses	3,000,000	3,000,000
B. Reliability research: Operating expenses	3,000,000	3,000,000
C. System technology: Operating expenses	3,630,000	5,630,000
D. Program direction—OE	370,000	370,000
Subtotal, electric energy systems	10,000,000	12,000,000
II. Energy Storage Systems:		
A. Battery storage		
Operating expenses	12,500,000	14,500,000
Capital equipment	200,000	200,000
Subtotal: Battery storage	12,700,000	14,700,000
B. Thermal and mechanical storage: Operating expenses	3,060,000	3,060,000
C. Program direction—OE	340,000	340,000
Subtotal, Energy storage systems	16,100,000	18,100,000
Total, electric energy systems and storage	26,100,000	30,100,000
(Operating expenses)	(25,900,000)	(29,900,000)
(Plant and Capital)	(200,000)	(200,000)
Nuclear		
II. Improved light water reactor technology:		
A. Improved LWR Development	21,000,000	13,000,000

	Budget estimate	Conference allowance
B. Three Mile Island R&D: Operating expenses	32,300,000	32,300,000
Subtotal, Improved light water reactor tech	53,300,000	45,300,000
III. Advanced converter reactor technology:		
A. Advanced light water reactor (LWR)	8,000,000	4,750,000
B. Advanced high temperature gas reactor (HTGR):		
Operating expenses	25,000,000	31,000,000
Capital equipment	1,000,000	1,000,000
Subtotal, Advanced high temperature gas reactor	26,000,000	32,000,000
C. Liquid metal converter reactor:		
Operating expenses	70,000,000	70,000,000
Capital equipment	200,000	200,000
Construction, 86-N-101 Mods to reactors	1,000,000	1,000,000
Subtotal, liquid metal converter reactor	71,200,000	71,200,000
Subtotal, advanced converter reactor tech	105,200,000	107,950,000
IV. Advanced breeder reactor technology:		
A. Breeder component technology	6,700,000	6,700,000
B. Fuel performance and supply:		
Operating expense	15,900,000	22,900,000
Capital equipment	2,000,000	2,000,000
Subtotal, fuel performance and supply	17,900,000	24,900,000
C. Reactor core technology:		
Operating expenses	4,900,000	4,900,000
Capital equipment	2,320,000	2,320,000
Subtotal, reactor core technology	7,220,000	7,220,000
D. Test facilities:		
Operating expenses	86,200,000	98,200,000
Capital equipment	4,480,000	4,480,000
Construction: 86-N-102 GPP	1,800,000	1,800,000
Subtotal, test facilities	92,480,000	104,480,000
E. Nuclear fuel cycle: Operating expenses	17,000,000	16,500,000
Subtotal, advanced breeder reactor technology	141,300,000	159,800,000
V. Water cooled breeder reactor technology:		
A. Defueling	5,100,000	5,100,000
B. Core evaluation	14,600,000	14,600,000
Subtotal: water cooled breeder reactor tech	19,700,000	19,700,000
VI. Civilian reactor development:		
A. Reactor development generic support	11,250,000	2,625,000
B. Safeguards and security:		
Operating expenses	5,750,000	5,750,000
Construction: 85-N-602 ANL-WEST Phys. security upgrade	900,000	900,000
Subtotal, safeguards and security	6,650,000	6,650,000
C. Reduced enrichment res. and test reactors	5,200,000	5,200,000
D. Program direction	7,400,000	7,400,000
Subtotal, civilian reactor development	30,500,000	21,875,000
VII. Advanced nuclear systems:		
A. Space and special applications:		
Operating expenses	17,455,000	20,455,000
Capital equipment	1,700,000	1,700,000
Subtotal, Space and special applications	19,155,000	22,155,000
B. Program direction—OE	845,000	845,000
Subtotal, Advanced nuclear systems	20,000,000	23,000,000
VIII. Defense nuclear energy program		
A. Space reactor project:		
Operating Expenses	12,610,000	12,610,000
Construction: 86-N-105 SP-100 facility modification, site undetermined	2,000,000	2,000,000
Subtotal, space reactor project	14,610,000	14,610,000
B. Terrestrial applications	2,500,000	2,500,000
C. Program direction	390,000	390,000
D. Capital equipment	2,000,000	2,000,000
Subtotal, Defense nuclear energy system	19,500,000	19,500,000
(Operating expenses)	(15,500,000)	(15,500,000)
(Plant and capital)	(4,000,000)	(4,000,000)
IX. Nuclear waste technology:		
I. Low level waste:		
Operating expenses	4,650,000	4,650,000
Capital equipment	100,000	100,000
Subtotal, Low level waste	4,750,000	4,750,000
2. Waste treatment technology:		
Operating expenses	6,000,000	6,000,000
Capital equipment	450,000	450,000
Subtotal, waste treatment technology	6,450,000	6,450,000
3. Civilian byproducts and beneficial uses		5,000,000
4. Program direction—OE	500,000	500,000
Subtotal, nuclear waste technology	11,700,000	16,700,000
X. Civilian waste R&D:		
A. Spent Fuel Storage R&D:		
Operating expenses	7,800,000	7,800,000
Capital equipment	1,100,000	1,100,000
Subtotal, spent fuel storage R&D	8,900,000	8,900,000
B. Alternative disposal concepts:		
Operating expenses	10,500,000	5,500,000
Capital equipment	2,000,000	2,000,000
Subtotal, alternative disposal concepts	12,500,000	7,500,000
C. Generic methods & supporting studies: Operating expenses	1,650,000	
E. Program direction	325,000	325,000
Subtotal, civilian waste R&D	23,375,000	16,725,000
XI. Remedial actions		
1. Management of surplus radioactivity contaminated DOE facilities:		
Operating expenses	38,850,000	41,350,000
Capital equipment	150,000	150,000
Subtotal, management, of surplus radioactivity contaminated DOE facilities	39,000,000	41,500,000
2. Formerly utilized sites remedial action program:		
Operating expenses	17,500,000	19,500,000
Capital Equipment	200,000	200,000
Subtotal, formerly utilized sites remedial action program	17,700,000	19,700,000
3. Grand Junction remedial action OE	900,000	900,000
4. Uranium program mill tailings remedial action program:		
Operating expenses	109,000,000	94,000,000
Capital equipment	1,000,000	1,000,000
Subtotal, uranium program mill tailings remedial action program	110,000,000	95,000,000
5. West Valley: Operating expenses	64,000,000	64,000,000
7. Program direction—OE	1,400,000	1,400,000
Subtotal, remedial actions	233,000,000	222,500,000
Total, Nuclear	657,575,000	653,050,000
(Operating expenses)	(633,175,000)	(628,650,000)
(Plant and capital)	(24,400,000)	(24,400,000)
ENVIRONMENT, SAFETY AND HEALTH		
I. Environment, safety and health:		
Operating expenses	39,866,000	39,866,000
Capital equipment	1,500,000	1,500,000
Total, Environment safety and health	41,366,000	41,366,000
ENVIRONMENT R&D		
I. Biological and environment research:		
Operating expenses	171,700,000	174,700,000
Capital equipment	7,750,000	7,750,000
Construction:		
86-R-120 GPP	3,250,000	3,250,000
General reduction		-1,000,000
Subtotal, biological and environ, research	182,700,000	184,700,000
II. Program direction—OE:		
A. Bio and env. research—PD	3,600,000	3,600,000
Total, Environment R&D	186,300,000	188,300,000
(Operating expenses)	(175,300,000)	(178,300,000)
(Plant and capital)	(11,000,000)	(10,000,000)
FUSION		
I. Magnetic fusion:		
A. Confinement systems:		
Operating expenses	184,900,000	184,900,000
Capital equipment	15,100,000	15,100,000
Subtotal, confinement systems	200,000,000	200,000,000
B. Development and technology:		
Operating expenses	62,500,000	62,500,000
Capital equipment	5,000,000	5,000,000
Subtotal, Development and technology	67,500,000	67,500,000
C. Applied plasma physics:		
Operating expenses	78,100,000	78,100,000
Capital equipment	6,400,000	6,400,000
Subtotal, Applied plasma physics	84,500,000	84,500,000
D. Planning and project:		
Operating expenses	16,900,000	16,900,000
Capital equipment	3,950,000	3,950,000
Construction:		
86-R-GPP	9,108,000	9,108,000
78-3-A Mirror fusion test facility	4,042,000	4,042,000
Subtotal, construction	13,150,000	13,150,000
Subtotal, planning and projects	34,000,000	34,000,000
F. Program direction—OE	4,000,000	4,000,000
General reduction		-8,000,000
Total, fusion	390,000,000	382,000,000
(Operating expenses)	(346,400,000)	(338,400,000)
(Plant and capital)	(43,600,000)	(43,600,000)
SUPPORTING RESEARCH AND TECHNICAL ANALYSIS		
1. Basic energy sciences:		
A. Nuclear sciences:		
Operating expenses	43,338,000	43,338,000
Capital equipment	2,754,000	2,754,000
Construction:		
86-R-401 A I P	1,200,000	1,200,000
86-R-400 GPP	100,000	100,000
Subtotal, nuclear sciences	47,392,000	47,392,000
B. Materials sciences:		
Operating expenses	138,496,000	140,496,000
Capital equipment	15,450,000	12,450,000
Construction:		
86-R-300 Atlanta University Center for Science and Technology		4,500,000
86-R-401 GPP	1,795,000	1,795,000
85-ER-133 Advanced Science Center University of Oregon		8,500,000
84-ER-111 N S L S	7,200,000	7,200,000
84-ER-112 Center for advanced material	17,440,000	11,440,000
84-ER-113 SSRL enhancement	2,560,000	2,560,000
84-ER-115 Natl center for chemical research		8,000,000
Subtotal, construction	28,995,000	43,995,000
Subtotal, materials sciences	182,941,000	196,941,000
C. Chemical sciences:		
Operating expenses	79,495,000	81,495,000
Capital equipment	8,840,000	8,840,000
Construction:		
86-R-400 GPP	3,930,000	3,930,000
85-ER-403 Kansas State Univ	1,900,000	1,900,000
Subtotal, construction	5,830,000	5,830,000
Subtotal, chemical sciences	94,165,000	96,165,000

	Budget estimate	Conference allowance
D. Applied mathematical sciences:		
Operating expenses	28,020,000	39,520,000
Capital equipment	1,070,000	1,070,000
Construction: Information technologies		5,000,000
Subtotal, applied mathematical sciences	29,090,000	45,590,000
E. Engineering and geosciences:		
Operating expenses	26,675,000	26,675,000
Capital equipment	1,500,000	1,500,000
Construction: 86–R– Energy and mineral research center		8,000,000
Subtotal, engineering and geosciences	28,175,000	36,175,000
F. Advanced energy projects:		
Operating expenses	10,602,000	7,602,000
Capital equipment	320,000	320,000
Subtotal, advanced energy projects	10,922,000	7,922,000
G. Biological energy research:		
Operating expenses	12,455,000	12,455,000
Capital equipment	560,000	560,000
Construction: 86–R302 Center for Energy and Biomedical Technology		6,000,000
Subtotal, biological energy research	13,015,000	19,015,000
H. Program direction—OE	4,100,000	4,100,000
Subtotal, basic energy sciences	409,800,000	453,300,000
(Operating expenses)	(343,181,000)	(355,681,000)
(Plant and capital)	(66,619,000)	(97,619,000)
II. Energy oversight, research analy. and Univ support:		
A. Energy research analysis—OE: 1. Assessment projects	2,700,000	2,700,000
B. University research support—OE:		
2. University reactor fuel assistance	1,900,000	3,900,000
3. University laboratory coop. program	6,800,000	6,800,000
5. Energy manpower assessment program	450,000	450,000
6. Education and training	550,000	550,000
General reduction		−1,000,000
Subtotal, University research support—OE	9,700,000	10,700,000
C. Advisory and oversight—OE	2,900,000	2,900,000
D. University research instrumentation	4,500,000	6,500,000
Subtotal, energy oversight, res analy. and Univ sup	19,800,000	22,800,000
III. Multiprogram laboratories facilities support:		
A. Multiprogram general purpose facilities:		
Construction:		
86–R–726 Fire protection improvements (BNL)	500,000	500,000
85–R–701 Central chilled water facility (BNL)	7,100,000	7,100,000
85–R–702 Replace laboratory roofs (ANL)	3,100,000	3,100,000
85–R–703 Electrical dist. system restoration	1,400,000	
85–R–706 Medical facility (LLNL)	2,800,000	2,800,000
85–R–707 Hanford site fire alarm system upgrade	3,550,000	1,775,000
85–R–709 Central chilled water plant (ANL)	1,000,000	1,000,000
85–R–711 Upgrade envir. monitoring system (OR)	2,500,000	2,500,000
85–R–712 Central chilled water system restor	2,200,000	1,100,000
84–ER–103 Road repair (various locations)	4,400,000	3,400,000
80–ES–11 Idaho Lab Facility (INEL)	750,000	750,000
Subtotal, construction	29,300,000	24,025,000
B. Environmental compliance:		
Operation expenses	12,900,000	10,400,000
Capital equipment	1,000,000	1,000,000
Construction:		
86–R–800 GPP	5,000,000	4,000,000
86–R–801 Nonradiological process waste treat	3,000,000	3,000,000
Subtotal, construction	8,000,000	7,000,000
Subtotal, Environmental compliance	21,900,000	18,400,000
Subtotal, multiprogram lab facilities support	51,200,000	42,425,000
(Operating expenses)	(12,900,000)	(10,400,000)
(Plant and capital)	(38,300,000)	(32,025,000)
Total, Supporting research and tech. analysis	480,800,000	518,525,000
(Operating expenses)	(375,881,000)	(388,881,000)
(Plant and capital)	(104,919,000)	(129,644,000)
POLICY AND MANAGEMENT		
I. Policy and Management:		
A. Policy and management—OE—ER	500,000	500,000
B. Policy and management—OE–NE	1,800,000	1,800,000
D. Policy and management—CRE	1,800,000	1,800,000
E. Policy and management—PS&E	798,000	798,000
Subtotal, policy and management	4,898,000	4,898,000
ENERGY APPLICATION		
Technical Information & Management Program:		
Operating expenses	9,200,000	9,200,000
Capital equipment	800,000	800,000
Subtotal, Technical Information & Management Program	10,000,000	10,000,000
II. In-house energy management: Operating expenses	2,000,000	2,000,000
Construction:		
86–A–601 Modification for energy management	15,000,000	5,000,000
86–A–602 Solid waste fired boiler (LANCL)	1,800,000	1,800,000
86–A–603 Energy monitoring and control system	1,700,000	1,700,000
86–A–604 Waste heat recovery (INL)	900,000	900,000
85–A–602 Fuel storage facility, BNL	1,500,000	1,500,000
85–A–604 Combustion air preheaters, energy tech	1,900,000	1,900,000
85–A–606 Cogeneration facility, BNL	10,600,000	5,300,000
General reduction		−5,000,000
Subtotal, construction	33,400,000	13,100,000
Subtotal, in-house energy management	35,400,000	15,100,000
(Operating expenses)	(2,000,000)	(2,000,000)
(Plant and capital)	(33,400,000)	(13,100,000)
Subtotal, Energy applications	45,400,000	25,100,000
(Operating expenses)	(11,200,000)	(11,200,000)
(Plant and capital)	(34,200,000)	(13,900,000)
Subtotal, energy supply research and development	2,006,171,000	2,029,271,000
(Operating expenses)	(1,780,070,000)	(1,799,745,000)
(Plant and capital)	(226,101,000)	(229,526,000)
Adjustments:		
General reduction		−22,600,000
Savings from management initiatives	−17,000,000	−17,000,000
Use of prior year balances	−20,000,000	−217,400,000
Pay amendment	1,842,000	
Total, energy supply research and development	1,971,013,000	1,772,271,000
(Operating expenses)	(1,744,912,000)	(1,565,345,000)
(Plant and capital)	(226,101,000)	(229,526,000)
(General reduction)		(−22,600,000
URANIUM ENRICHMENT		
I. Uranium enrichment activities:		
A. Gaseous diffusion and operations support:		
Operating expenses	1,084,600,000	1,084,600,000
Capital equipment	14,500,000	14,500,000
Construction:		
86–N–501 General plant projects	14,000,000	14,000,000
84–N–404 Power systems protection impr	1,200,000	1,200,000
84–N–405 Utilities upgrading, Phase III	2,200,000	2,200,000
83–N–405 Utilities upgrading, Phase II, gas, dif. plant	1,800,000	1,800,000
Subtotal, Construction	19,200,000	19,200,000
Subtotal, Gaseous diffusion operations and support	1,118,300,000	1,118,300,000
B. Enrichment research and development:		
1. Gas centrifuge operations and support: Operating expenses	72,000,000	18,000,000
2. Atomic vapor laser isotope separation:		
Operating expenses	69,800,000	114,000,000
Capital equipment	7,700,000	15,000,000
Construction: 85–N–501 General plant projects, var. locs	500,000	3,000,000
Subtotal, Atomic vapor laser isotope separation	78,000,000	132,000,000
Subtotal, Enrichment R&D	150,000,000	150,000,000
C. Gas centrifuge enrichment plant:		
Operating expenses	340,000,000	
Construction: 76–8–G Enriched Uranium production facility, Portsmouth, OH		340,000,000
Subtotal, Gas centrifuge enrichment plant	340,000,000	340,000,000
D. Program direction—OE	4,400,000	4,400,000
Subtotal, Uranium enrichment activities	1,612,700,000	1,612,700,000
(Operating expenses)	(1,570,800,000)	(1,221,000,000)
(Plant and Capital)	(41,900,000)	(391,700,000)
III. Offsetting revenues:		
Operating expenses	−1,579,000,000	−1,579,000,000
Capital equipment	−14,500,000	−14,500,000
Construction	−19,200,000	−19,200,000
Subtotal, Total revenues	−1,612,700,000	−1,612,700,000
Total, uranium enrichment		
(Operating expenses)	(1,570,800,000)	(1,221,000,000)
(Plant and Capital)	(41,900,000)	(391,700,000)
(Gross revenues)	(−1,612,700,000)	(−1,612,700,000)
GENERAL SCIENCE AND RESEARCH		
I. High energy physics:		
A. Physics research: Operating expenses	111,300,000	111,300,000
B. Facility operations:		
Operating expenses	187,800,000	187,800,000
Capital equipment	59,200,000	69,200,000
Construction:		
86–R–102 AIP	10,500,000	10,500,000
86–R–103 GPP	10,400,000	10,400,000
86–R–104 Central computer (FERMI)	3,100,000	3,100,000
84–ER–133 SLAC linear collider (SLC)	22,900,000	22,900,000
81–E–218 Tevatron I	8,600,000	8,600,000
Subtotal, Construction	55,500,000	55,500,000
Subtotal, Facility operations	302,500,000	312,500,000
C. High energy technology: Operating expenses	92,400,000	92,400,000
D. Other capital equipment—CE	3,900,000	3,900,000
Subtotal, High energy physics	510,100,000	520,100,000
(Operating expenses)	(391,500,000)	(391,500,000)
(Plant and Capital)	(118,600,000)	(128,600,000)
II. Nuclear physics:		
A. Medium energy physics: Operating expense	76,450,000	76,450,000
B. Heavy ion physics: Operating expenses	52,650,000	52,650,000
C. Low energy nuclear physics: Operating expenses	13,400,000	13,400,000
D. Nuclear theory: Operating expenses	9,400,000	9,400,000
E. Capital equipment	13,200,000	13,200,000
F. Construction:		
86–R–AIP	3,500,000	3,500,000
86–R–GPP	3,500,000	3,500,000
Subtotal Construction	7,000,000	7,000,000
G. Other capital equipment—CE	800,000	800,000
Subtotal, Nuclear physics	172,900,000	172,900,000
(Operating expenses)	(151,900,000)	(151,900,000)

	Budget estimate	Conference allowance
(Plant and Capital)	(21,000,000)	(21,000,000)
III. General Science program direction—OE	2,400,000	2,400,000
Subtotal, general science and research	685,400,000	695,400,000
(Operating expenses)	(545,800,000)	(545,800,000)
(Plant and Capital)	(139,600,000)	(149,600,000)
Adjustments:		
Transfer of appropriation		—6,000,000
General reduction		—4,000,000
Pay amendment	79,000	
Total, Adjustments	79,000	—10,000,000
Total, general science and research	685,479,000	685,400,000
(Operating expenses)	(545,879,000)	(535,800,000)
(Plant and Capital)	(139,600,000)	(149,600,000)
ATOMIC ENERGY DEFENSE ACTIVITIES		
I. Weapons activities:		
A. Research and development:		
1. Research and development:		
Operating expenses	920,300,000	840,300,000
Capital equipment	91,450,000	86,450,000
Construction:		
86-D-101 general plant projects, various locations	22,200,000	20,200,000
86-D-103 decontamination and waste treatment facility, LLNL	1,000,000	3,700,000
86-D-104 strategic defenses facility, SNLA	8,000,000	2,000,000
86-D-105 instrumentation systems lab, SNLA		3,100,000
86-D-106 Laboratory Data Communications Center, LANL		1,000,000
85-D-102 nuclear weapons research, development, and testing facs revitalization, phase I, various locations	81,600,000	35,400,000
85-D-103 safeguards and security enhancements, LLNL and SNLL	27,900,000	16,400,000
85-D-106 hardened engineering test bldgs. LLNL	1,900,000	1,900,000
84-D-102 radiation-hardened integrated circuit lab, SNLA	15,500,000	15,500,000
84-D-104 nuclear materials storage facility, LANL, NM	12,100,000	12,100,000
84-D-105 safeguards and security upgrades, phase I, LANL, NM	7,500,000	7,500,000
84-D-106 security system upgrade, SNLA, NM	1,900,000	1,900,000
83-D-199 buffer land acquisition, LLNL and SNLL	10,000,000	10,000,000
82-D-144 simulation technology laboratory, SNLA	10,300,000	10,300,000
Subtotal, construction	199,900,000	141,000,000
Subtotal, research and development	1,211,650,000	1,067,750,000
2. Testing:		
Operating expenses	544,000,000	531,500,000
Capital equipment	50,000,000	45,000,000
Construction:		
86-D-101 general plant projects, various locations	7,700,000	7,700,000
85-D-105 combined device assembly fac, NTS, NV	40,000,000	7,000,000
84-D-107 nuclear testing facilities revitalization, various locations	14,900,000	12,900,000
Subtotal, construction	62,600,000	27,600,000
Subtotal, testing	656,600,000	604,100,000
Subtotal, research, development, and testing	1,868,250,000	1,671,850,000
B. Inertial confinement fusion:		
Operating expenses		145,000,000
Capital equipment		10,000,000
Subtotal, inertial confinement fusion		155,000,000
C. Production and surveillance:		
Operating expenses	1,942,400,000	1,858,000,000
Capital equipment	136,300,000	125,300,000
Construction:		
86-D-121 general plant projects, various locations	33,700,000	28,700,000
86-D-122 structural upgrade of existing plutonium facilities, Rocky Flats Plant, Golden, CO	3,000,000	3,000,000
86-D-123 environmental hazards eliminations, various locations	8,700,000	7,700,000
86-D-124 safeguards and site security upgrading, phase II, mound facility, Miamisburg, OH	3,000,000	2,000,000
86-D-125 safeguards and site security upgrade phase II, Pantex Plant, Amarillo, TX	1,500,000	1,500,000
86-D-130 tritius loading facility replacement Savannah River, Aiken, SC	5,000,000	5,000,000
85-D-112 enriched uranium recovery improvements, Y-12 plant, Oak Ridge, TN	15,300,000	13,300,000
85-D-113 plant power and steam dist system, Pantex plant, Amarillo, TX	18,500,000	13,500,000
85-D-115 renovate plutonium building utility systems, Rocky Flats, CO	17,700,000	17,700,000
85-D-121 air and water pollution control facs, Y-12 plant, Oak Ridge, TN	14,000,000	14,000,000
85-D-123 Safeguards and site security upgrade, Pantex plant, Amarillo, TX	4,000,000	3,000,000
85-D-124 Safeguards and site security upgrades, Rocky Flats plant, Golden, CO	2,400,000	2,400,000
85-D-125 tactical bomb production facilities, various locations	16,000,000	9,000,000
84-D-112 Trident II warhead production facilities, various locations	60,700,000	60,700,000
84-D-113 antisubmarine warfare/standoff weapon warhead prod facs, var locations	16,000,000	5,000,000
84-D-115 electrical system expansion, Pantex plant, Amarillo, TX	6,300,000	6,300,000
84-D-117 inert assembly & test facility, Pantex plant, Amarillo, TX	5,400,000	5,400,000
84-D-118 high explosive subassembly facility, Pantex plant, Amarillo, TX	40,000,000	33,000,000
84-D-120 explosive component test facility, Mound plant, Miamisburg, OH	9,200,000	9,200,000
84-D-124 Environmental improvements, Y-12 plant, Oak Ridge, TN	12,000,000	12,000,000
84-D-211 safeguards and site security upgrading, Y-12 plant, Oak Ridge, TN	15,000,000	13,000,000
84-D-212 safeguards and site security upgrade, Pinellas plant, FL	5,650,000	4,650,000
82-D-107 utilities & equip restoration, replace & upgrade, phase III, var locations	195,500,000	160,500,000
82-D-109 155mm artillery fired atomic projectile (AFAP) prod facs, var locations	15,000,000	15,000,000
82-D-111 interactive graphics system, various locations	8,500,000	4,500,000
79-7-O universal pilot plant, Pantex plant, Amarillo, TX	15,600,000	
Subtotal: construction	547,650,000	450,050,000
Subtotal: production and surveillance	2,626,350,000	2,433,350,000
D. Program direction:		
Operating expenses:		
1. Weapons program	49,855,000	49,855,000
3. Community assistance	48,845,000	48,845,000
Subtotal: program direction	98,700,000	98,700,000
Subtotal: weapons activities	4,593,300,000	4,358,900,000
(Operating expenses)	(3,505,400,000)	(3,473,500,000)
(Plant and capital)	(1,087,900,000)	(885,400,000)
II. Materials production:		
A. reactor operations:		
Operating expenses	586,380,000	576,380,000
Construction:		
86-D-150 in-core neutron monitoring system N-Reactor, Richland, WA	5,460,000	5,460,000
86-D-152 reactor electrical distribution system, Savannah River, SC	4,000,000	3,000,000
85-D-145 fuel production facility, Savannah River, SC (TEC-TBD)	20,000,000	18,000,000
84-D-136 enriched uranium conversion facility modifications: Y-12 plant, Oak Ridge, TN	14,200,000	12,200,000
82-D-126 reactor safety and reliability: various locations	1,800,000	1,800,000
Subtotal: construction	45,460,000	40,460,000
Subtotal: reactor operations	631,840,000	616,840,000
B. Processing of nuclear materials:		
Operating expenses	493,145,000	483,145,000
Construction:		
86-D-148 special isotope separation plant (design only)		4,000,000
86-D-151 Purex electrical system upgrade, Richland, WA	3,500,000	2,500,000
86-D-153 additional line III tritium furnance, Savannah River, SC	2,000,000	2,000,000
86-D-154 effluent treatment facility, Savannah River, SC	2,500,000	2,500,000
86-D-157 hydrofluorination system, FB-Line, Savannah River, SC	2,200,000	2,200,000
85-D-137 vault safety SNM inventory system, Richland, WA	1,900,000	1,900,000
84-D-135 process facility modifications, Richland, WA	15,000,000	15,000,000
82-D-201 special plutonium recovery facs, JB Line, Savannah River, SC	4,400,000	4,400,000
Subtotal, construction	31,500,000	34,500,000
Subtotal, processing of nuclear materials	524,645,000	517,645,000
C. Supporting services:		
Operating expenses	256,575,000	256,575,000
Construction:		
86-D-146 general plant projects, various locations	34,800,000	32,650,000
86-D-149 productivity retention program, Phase I, various locations	27,200,000	20,700,000
86-D-156 plantwide safeguards systems, Savannah River, SC	3,000,000	3,000,000
85-D-139 fuel processing restoration, IFPF, INEL, ID	15,000,000	15,000,000
85-D-140 productivity and radiological improvements, FMPC Fernald, OH	15,000,000	15,000,000
84-D-134 safeguards and security improvements plant-wide, Savannah River, SC	7,000,000	7,000,000
84-D-137 facility security systems upgrade, IFPF, INEL, ID	5,000,000	5,000,000
83-D-148 non-radioactive hazardous waste management, Savannah River, SC	8,600,000	8,600,000

	Budget estimate	Conference allowance
82-D-124 restoratioin of production capabilities, Phase II, III, IV & V, various locations	44,900,000	43,900,000
Subtotal, construction	160,500,000	150,850,000
Subtotal, supporting services	417,075,000	407,425,000
D. Enriched material	258,900,000	184,000,000
E. Capital equipment	123,440,000	121,440,000
F. Program direction	21,300,000	21,300,000
Subtotal, materials production	1,977,200,000	1,868,650,000
(Operating expenses)	(1,616,300,000)	(1,521,400,000)
(Plant and capital)	(360,900,000)	(347,250,000)
III. Defense waste and byproducts management:		
A. Interim waste management:		
Operating expenses	281,085,000	271,000,000
Construction:		
86-D-171 general plant projects, various locations	26,451,000	24,451,000
86-D-172 b-plant f-filter, Richland, WA	1,000,000	1,000,000
86-D-173 central waste disposal facility, Oak Ridge, TN	1,000,000	1,000,000
86-D-174 low-level waste processing and shipping system, FMPC, Fernald, OH	2,500,000	2,500,000
86-D-175 security upgrade, ID	2,000,000	2,000,000
85-D-157 seventh calcined solids storage facility, INEL, ID	14,500,000	14,500,000
85-D-158 central warehouse upgrade, Richland, WA	5,000,000	5,000,000
85-D-159 new waste transfer facilities H-area, Savannah River, SC	9,000,000	9,000,000
85-D-160 TRA security system upgrade, INEL, ID	2,250,000	2,250,000
82-D-103 waste handling and isolation facs, Richland, WA	2,180,000	2,180,000
Subtotal, construction	65,881,000	63,881,000
Subtotal, interim waste management	346,966,000	334,881,000
B. Long-term waste management technology:		
Operating expenses	96,567,000	94,567,000
Construction: 81-T-105 defense waste processing facility, Savannah River, SC	205,000,000	165,000,000
Subtotal, long-term waste management technology	301,567,000	259,567,000
C. Terminal storage: Operating expenses	25,070,000	25,070,000
D. Capital equipment	38,997,000	35,997,000
E. Program direction	2,400,000	2,400,000
Subtotal, defense waste and byproducts management	715,000,000	657,915,000
(Operating expenses)	(405,122,000)	(393,037,000)
(Plant and capital)	(309,878,000)	(264,878,000)
ALL OTHER		
IV. Verification and control technology:		
A. Verification and control technology:		
Operating expenses	83,475,000	87,225,000
Capital equipment	5,600,000	5,600,000

TITLE IV—INDEPENDENT AGENCIES

APPALACHIAN REGIONAL COMMISSION

Amendment No. 39: Restores language proposed by the House and stricken by the Senate providing for "no-year availability" of funds for the Appalachian Regional Commission.

Amendment No. 40: Appropriates $130,000,000 for the Appalachian Regional Commission instead of $141,500,000 as proposed by the House and $80,000,000 as proposed by the Senate.

Amendment No. 41: Earmarks $85,000,000 for the Appalachian Development Highway System instead of $100,000,000 as proposed by the House and $50,000,000 as proposed by the Senate.

Amendment No. 42: Appropriates $2,200,000 for administrative expenses instead of $2,500,000 as proposed by the House and $1,800,000 as proposed by the Senate.

The conferees agree that of the funds provided for area development activities, $6,000,000 shall be available only for continuation and completion of critical economic development and educational projects that are at a stage where funding can be effectively utilized. An additional $9,000,000 shall be directed toward completion of ongoing port development projects. From the funds earmarked for the highway program $10,000,000 shall be available for continuation of Corridor X west of Jasper, $3,000,000 for continuation of Corridor V from Pontotoc to Oxford, and $7,000,000 is provided for Corridor G in West Virginia.

NUCLEAR REGULATORY COMMISSION

Amendment No. 43: Appropriates $418,000,000 for the Nuclear Regulatory Commission instead of $403,671,000 as proposed by the House and $429,000,000 as proposed by the Senate.

The conferees' recommendation includes $12,000,000 to implement and sustain the research program integration plan developed by NRC's Office of Research.

TENNESSEE VALLEY AUTHORITY

Amendment No. 44: Appropriates $113,000,000 for the Tennessee Valley Authority instead of $118,000,000 provided by the House and $90,861,000 provided by the Senate.

Amendment No. 45: Restores language providing for use of prior year unobligated balances of $9,000,000 as proposed by the House and stricken by the Senate.

The conferees agree that $250,000 from within Economic Technical Assistance is for economic and community assistance in a region of the country similar to the Tennessee Valley and the conferees agree that this is the last year of funding for this type of activity outside of the TVA region. The conferees also agree that a robotics center shall be funded at $1,300,000 in FY 1986.

In order to further refine the reporting procedures that have been followed by TVA in response to the Committees' 1984 reports as modified in 1985 regarding the transfer and reprogramming of funds, effective with the fiscal year 1986 appropriations, only transfers in excess of 20 percent or $500,000, whichever is less, need be reported to the Committees on Appropriations of the House and Senate.

The following table summarizes the conference agreement on the TVA program:

CONFERENCE AGREEMENT

[In thousands of dollars]

	1985	Conference level
CAPITAL INVESTMENT		
New lock at Pickwick Landing Dam	7,000	
Columbia Dam and Reservoir	2,210	
Dam safety modifications	2,900	[1] 2,145
Additions and improvements	4,266	3,559

CONFERENCE AGREEMENT—Continued

[In thousands of dollars]

	1985	Conference level
Recreation facilities	232	250
Land Between The Lakes facilities	90	95
Local flood facilities	180	
Chemical facilities	7,971	5,050
Ammonia-from-coal facility	316	
North Alabama coal-to-methanol facility	4,069	
General facilities	1,907	2,052
Yellow Creek Port	28	
Total capital investment	31,169	13,151
EXPENSES		
Natural resources:		
Water resources	13,227	8,001
Reservoir system operations	21,593	23,081
Land and forest resources	5,052	4,800
Resource managment and development support	4,371	4,805
Land Between The Lakes	7,160	6,900
Total natural resources	51,403	47,587
Economic and community resources:		
Economic resources	17,556	14,010
Community resources	2,144	
Total economic and community resources	23,150	14,010
Agricultural resources development	5,797	5,184
National Fertilizer development:		
Fertilizer research and development	14,760	15,700
Fertilizer technology introduction	12,969	13,037
Ammonia-from-coal process	6,417	
Hardwood fuels	4,060	3,600
Total national fertilizer development	38,206	32,337
	1985	1986
General services	876	731
Total expenses	115,982	99,849
Jobs bill (Public Law No. 98–8)	14	
Unallocated	2,689	
Total appropriations	149,854	113,000
Carryforward	−9,000	
Total	140,854	

[1] Excludes $2,100,000 carried forward from 1985 due to financing change.

Amendment No. 46: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the matter stricken by said amendment, insert the following:

SEC. 506. No funds appropriated in this Act may be used to pay the salary of the Administrator of a Power Marketing Administration or the Board of Directors of the Tennessee Valley Authority unless they award contracts for the procurement of extra high voltage power equipment manufactured in the United States when such agency determines that there are one or more domestic manufacturers offering a product which meets the technical requirements of such agency at a price not exceeding 125 per centum of the bid or offering price of the most competitive foreign bidder. Such agency shall determine the incremental costs associated with implementing this section and defer or offset such incremental costs against otherwise existing repayment obligations. This section shall not apply to any procurement initiated before its effective date or to the acquisition of spare parts.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Language has been included regarding the procurement of extra high voltage (EHV) power equipment by the Power Marketing Administrations and the Tennessee Valley Authority. As defined by the Department of Commerce, the EHV power equipment industry includes, but is not limited to, transformers rated above 10,000 kVA; fuses rated 2,300 V and above; circuit breakers rated 345 kV and above; relays; capacitors; surge arrestors; AC/DC valves and controls; high voltage DC systems; and tapered tubular steel structures or structural units to support overhead electrical transmission lines.

The language adopted by the conferees would have the effect of increasing the so-called "Buy American" differential to twenty-five percent. That is, Power Marketing Administrations and the Tennessee Valley Authority would be required to purchase their EHV power equipment from domestic manufacturers if the domestic equipment meets the agency's technical requirements and the price of such equipment is not more than 25 percent greater than the price of the most competitive foreign bid. In addition, the provision, which would be effective for one year, would not apply to the acquisition of spare parts, or to any procurement initiated prior to the effective date of this Act.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1986 recommended by the Committee of Conference, with comparisons to the fiscal year 1985 amount, the 1986 budget estimates, and the House and Senate bills for 1986 follow:

New budget (obligational) authority, fiscal year 1985	15,602,777,000
Budget estimates of new (obligational) authority, fiscal year 1986	[1] 15,344,118,000
House bill, fiscal year 1986	15,272,935,000
Senate bill, fiscal year 1986	15,206,922,000
Conference agreement, fiscal year 1986	15,251,718,000
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1985	−351,059,000
Budget estimates of new (obligational) authority, fiscal year 1986	−92,400,000
House bill, fiscal year 1986	−21,217,000
Senate bill, fiscal year 1986	+44,796,000

[1] Includes $64,108,000 of budget estimates not considered by the House.

Managers on the Part of the Senate.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. KILDEE (at the request of Mr. WRIGHT), for today, October 9, and October 10, on account of medical reasons.

Mr. HYDE (at the request of Mr. MICHEL), for October 10, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. SMITH of New Hampshire) to revise and extend their remarks and include extraneous material:)

Mr. WALKER, for 60 minutes, today.
Mrs. BENTLEY, for 15 minutes, today.
Mr. FRENZEL, for 60 minutes, today.
Mr. GREEN, for 5 minutes, today.
Mr. MCCOLLUM, for 30 minutes, on October 10.
Mr. PASHAYAN, for 60 minutes, on October 16.
Mr. PASHAYAN, for 60 minutes, on October 17.
Mr. DORNAN of California, for 60 minutes, October 16.
Mr. DORNAN of California, for 60 minutes, October 17.
Mr. DORNAN of California, for 60 minutes, October 23.

(The following Members (at the request of Mr. GARCIA to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. OBERSTAR, for 5 minutes, today.
Mr. BOUCHER, for 10 minutes, today.
Mr. OBEY, for 60 minutes, on October 11.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. SENSENBRENNER, and to include extraneous material, during debate on the bill (H.R. 3008) in the Committee of the Whole, today.

Mr. GILMAN, prior to the passage of Senate Joint Resolution 155.

Mr. GILMAN, prior to the passage of Senate Joint Resolution 197.

(The following Members (at the request of Mr. SMITH of New Hampshire) and to include extraneous matter:)

Mr. SHUSTER.

Mr. LUKEN.

ENROLLED BILL SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 2410. An act to amend the Public Health Service Act to revise and extend the programs under title VII of that act.

ADJOURNMENT

Mr. CRAIG. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 25 minutes p.m.), the House adjourned until tomorrow, Thursday, October 10, 1985, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2118. A letter from the Director, Defense Security Assistance Agency, transmitting the Department of the Army's proposed leases of defense articles to France, Federal Republic of Germany, Italy, Netherlands, and the United Kingdom for a cooperative research and development project (Transmittal Numbers 6-86 through 10-86), pursuant to 22 U.S.C. 2796(a); to the Committee on Foreign Affairs.

2119. A letter from the Acting Comptroller General, General Accounting Office, transmitting a list of GAO reports for the month of August 1985, pursuant to 31 U.S.C. 719(h); to the Committee on Government Operations.

2120. A letter from the Assistant Secretary of the Interior for Water and Science, transmitting notice of a proposed contract with the Wellton-Mohawk Irrigation and Drainage District, Gila Project, AZ, pursuant to the Act of June 13, 1956, chap. 382; to the Committee on Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL. Committee on Interior and Insular Affairs. H.R. 463. A bill to require the Secretary of the Interior to establish a program to insure the stockpiling and replacement of topsoil on public lands and other lands which are moved or covered by surface mining projects, reclamation projects, and other Federal and federally assisted projects, and for other purposes; with amendments (Rept. 99-306, Pt. 1). Ordered to be printed.

Mr. BEVILL. Committee of Conference. Conference report on H.R. 2959. (Rept. 99-307). Ordered to printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MURPHY (for himself, Mr. HAWKINS, Mr. JEFFORDS, Mr. PETRI, Mr. BARTLETT, Mr. CLAY, and Mr. WILLIAMS):

H.R. 3530. A bill to amend the Fair Labor Standards Act of 1938 to authorize the provision of compensatory time in lieu of overtime compensation for employees of States, political subdivisions of States, and interstate governmental agencies, to clarify the application of the Act to volunteers, and for other purposes; to the Committee on Education and Labor.

By Mr. LIPINSKI (for himself, and Mr. ROSTENKOWSKI):

H.R. 3531. A bill to amend section 103(e)(4) of title 23, United States Code, with respect to the determination of the increase of amounts available for substitute highway and transit projects resulting from increased construction costs; to the Committee on Public Works and Transportation.

By Mr. BATEMAN:

H.R. 3532. A bill to require emergency position indicating radio beacons on uninspected U.S. fishing, fish processing, and fish tender vessels; to the Committee on Merchant Marine and Fisheries.

By Mr. BILIRAKIS:

H.R. 3533. A bill to amend the the National Flood Insurance Act of 1968 to permit the provision of flood insurance for properties constructed in unintentional violation of State and local land used requirements, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. DICKS (for himself, and Mr. BONKER):

H.R. 3534. A bill to provide for the disposition of funds appropriate to pay a judgment in favor of the Cowlitz Tribe of Indians in Indian Claims Commission docket numbered 218 and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. DORNAN of California:

H.R. 3535. A bill to amend the Export Administration Act of 1979 to authorize controls on the export of capital from the United States; to the Committee on Foreign Affairs.

H.R. 3536. A bill to repeal the War Powers Resolution; to the Committee on Foreign Affairs.

By Mr. FEIGHAN (for himself, and Mr. WOLPE):

H.R. 3537. A bill to ensure adequate verification of peaceful uses of nuclear exports from the United States to the People's Republic of China, and for other purposes; to the Committee on Foreign Affairs.

By Mr. GRAY of Illinois:

H.R. 3538. A bill authorizing the City of Chester, Illinois, to reconstruct, repair, or improve an existing toll bridge across the Mississippi River at or near Chester, IL; to the Committee on Public Works and Transportation.

H.R. 3539. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income of an individual any discharge of indebtedness with respect to black lung benefits which are required to be repaid to the United States; to the Committee on Ways and Means.

By Mr. HAMILTON:

H.R. 3540. A bill to provide secure job opportunities to workers displaced by imports; to the Committee on Ways and Means.

By Mr. KASTENMEIER:

H.R. 3541. A bill to amend title 18, United States Code, and other laws, to make technical and other minor changes to provision[s] enacted by the Comprehensive Crime Control Act of 1984, and for other purposes; to the Committee on the Judiciary.

By Mr. NELSON of Florida:

H.R. 3542. A bill to provide for regional primary elections and caucuses for selection of delegates to political party presidential nominating conventions and for Federal funding of presidential primary elections; to the Committee on House Administration.

H.J. Res. 419. By Mr. UDALL (for himself, Mr. YOUNG of Alaska, and Mr. SEIBERLING): Joint resolution to Approve Public Land Order No. 6607 of July 8, 1985; to the Committee on Interior and Insular Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

270. The SPEAKER presented a memorial of the Legislature of the Commonwealth of Pennsylvania, relative to Slovak-Americans; to the Committee on Post Office and Civil Service.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BIAGGI:

H.R. 3543. A bill for the relief of Wilana Lerner; to the Committee on the Judiciary.

By Mr. LIVINGSTON:

H.R. 3544. A bill for the relief of Ernst B. Coumou; to the Committee on the Judiciary.

By Mr. SCHUMER:

H.R. 3545. A bill for the relief of Olga Sellares Barney and her children Christian Sellares Barney, Kevin Sellares Barney, and Charles Sellares Barney; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 26: Mr. MCEWEN, Mr. NIELSON of Utah, Mr. HOWARD, Mr. FUSTER, Mr. GOODLING, Mr. LAGOMARSINO, Mr. FROST, Mr. BONIOR of Michigan, and Mr. BEREUTER.

H.R. 362: Mrs. BENTLEY, Mr. GONZALEZ, Mr. LANTOS, and Mr. GROTBERG.

H.R. 380: Mr. CHAPPIE, Mr. FAUNTROY, Mr. FROST, Mr. RALPH M. HALL, Mr. HUGHES, Mr. SAVAGE, Mr. WRIGHT, Mr. COUGHLIN, Mr. MRAZEK, Mr. ECKART of Ohio, Mr. KOLTER, and Mr. MATSUI.

H.R. 585: Mr. SAXTON.

H.R. 903: Mr. LAFALCE, Mr. WEISS, and Mr. SMITH of Florida.

H.R. 1140: Mr. ROBERTS.

H.R. 1156: Mr. MATSUI.

H.R. 1219: Mr. GUNDERSON and Mr. SAVAGE.

H.R. 1348: Mrs. BURTON of California, Mr. FUSTER, and Mr. MARKEY.

H.R. 1356: Mr. ROSE, Mr. RINALDO, Mr. HORTON, Mr. WOLPE, Mr. MARTINEZ, Mr. FOGLIETTA, Mr. GAYDOS, Mr. PURSELL, Mr. GINGRICH, Mr. KILDEE, Mr. HAMMERSCHMIDT, Mr. LIGHTFOOT, Mr. STOKES, Mr. RAHALL, Mr. TRAXLER, Mr. HEFNER, and Mr. JONES of Tennessee.

H.R. 1479: Mr. SAXTON, Mr. GUARINI, Mr. BONIOR of Michigan, Mr. TOWNS, and Mr. HYDE.

H.R. 1659: Mr. COLEMAN of Texas, Mr. GUARINI, and Mr. SENSENBRENNER.

H.R. 1950: Mr. QUILLEN.

H.R. 2525: Mr. ACKERMAN, Mr. BATES, and Mr. SABO.

H.R. 2527: Mr. TOWNS, Mr. WORTLEY, Mr. GINGRICH, Mr. FRANK, Mrs. JOHNSON, Mr. TRAFICANT, Mr. CROCKETT, Mr. HENDON, and Mr. MCKERNAN.

H.R. 2620: Mr. SAVAGE and Mr. WEISS.

H.R. 2854: Mr. FLORIO.

H.R. 2907: Mrs. LONG and Mr. RALPH M. HALL.

H.R. 2936: Mr. ROWLAND of Georgia.

H.R. 2973: Mr. BIAGGI.

H.R. 3006: Mr. WHITLEY.

H.R. 3041: Mr. FEIGHAN, Mr. FISH, Mr. SOLOMON, Mr. ROE, Mr. WAXMAN, Mr. COOPER, Mrs. BENTLEY, Mr. HATCHER, Mr. LEWIS of California, Mr. MILLER of Washington, Mr. ACKERMAN, Mrs. BOGGS, Mr. PASHAYAN, Mr. FAUNTROY, Mr. PRICE, Mr. AKAKA, Mr. FRANK, Mr. SAVAGE, Mr. RAHALL, Mr. WILSON, Mr. GILMAN, Mr. PEPPER, Mr. RICHARDSON, Mr. MORRISON of Connecticut, Mr. DARDEN, Mr. COYNE, Mr. BATEMAN, Mr. MCHUGH, Mr. MRAZEK, Mr. ALEXANDER, Mr. LANTOS, Mr. STARK, Mr. BROWN of California, Mr. LEHMAN of California, Mr. ROYBAL, Mr. HAWKINS, Mr. EDWARDS of California, Mr. DELLUMS, Mr. AUCOIN, Mr. COLEMAN of Texas, and Ms. MIKULSKI.

H.R. 3099: Mr. ECKART of Ohio and Mr. SUNIA.

H.R. 3181: Mr. ROBERT F. SMITH.

H.R. 3232: Mr. MILLER of Washington, Mr. STRANG, Mr. GINGRICH, Mr. ZSCHAU, Mr. SENSENBRENNER, Mr. MORRISON of Washington, Mrs. MARTIN of Illinois, Mr. HYDE, Mr. KASICH, Mr. FISH, Mrs. JOHNSON, Mr. SHUMWAY, Mr. ARMEY, Mr. CAMPBELL, Mr. PACKARD, Mr. BOEHLERT, Mr. HORTON, Mr. FROST, Mr. LIVINGSTON, Mr. MCCAIN, Mr. GALLO, Mr. COURTER, Mr. SILJANDER, Mr. QUILLEN, Mr. BARTLETT, Mr. LAGOMARSINO, Mr. ECKERT of New York, Mr. VANDER JAGT, Mr. DAUB, Mr. CHANDLER, Mr. GROTBERG, Mr. OXLEY, Mr. BILIRAKIS, Mr. SOLOMON, Mrs. HOLT, Mr. HUGHES, Mr. CHAPPIE, Mr. LATTA, Mr. STANGELAND, Mr. SMITH of New Jersey, Mr. MCEWEN, Mr. HILER, Mr. ORTIZ, Mr. BOUCHER, Mr. WORTLEY, Mr. WHITEHURST, Mr. LENT, Mr. ROEMER, Mr. ROE, Mr. YOUNG of Missouri, Mr. NELSON of Florida, Mr. BIAGGI, Mr. LOTT, Mrs. LLOYD, Mr. COBEY, Mr. BATEMAN, Mr. TOWNS, Mr. DREIER of California, Mr. KLECZKA, Mr. PASHAYAN, Mr. WALKER, Mr. YOUNG of Florida, Mr. COATS, Mr. WEBER, Mr. DORNAN of California, Mrs. VUCANOVICH, Mr. MOORHEAD, and Mr. BLILEY.

H.R. 3263: Mr. TRAXLER and Mr. VANDER JAGT.

H.R. 3319: Mr. SIKORSKI, Mrs. SCHROEDER, Mr. SENSENBRENNER, Mrs. COLLINS, Mr. WEAVER, Mr. CONYERS, Mr. SAVAGE, and Mr. WEISS.

H.R. 3438: Mrs. BOXER, Mr. NOWAK, Mr. HENRY, and Mr. GINGRICH.

H.R. 3448: Mr. JACOBS, Mr. CARPER, and Mr. OLIN.

H.R. 3457: Mr. DARDEN and Ms. KAPTUR.

H.R. 3510: Mr. OWENS, Mr. RITTER, and Mr. LEHMAN of Florida.

H.R. 3515: Mr. ANNUNZIO, Mr. MITCHELL, Mr. KINDNESS, Mr. GARCIA, Mr. HUBBARD, Mr. SCHULZE, Mr. MILLER of Ohio, and Mr. FUSTER.

H.R. 3520: Mr. BLAZ, Mr. BROOMFIELD, Mr. CALLAHAN, Mr. CARNEY, Mr. COATS, Mr. CRANE, Mr. DAVIS, Mr. DREIER of California, Mr. DUNCAN, Mr. EMERSON, Mr. GEKAS, Mr. HARTNETT, Mr. HENDON, Mr. HILER, Mr. HILLIS, Mr. IRELAND, Mr. KRAMER, Mr. LEACH of Iowa, Mrs. MEYERS of Kansas, Mr. PORTER, Mr. RAY, Mr. ROBERTS, Mr. SKEEN, Mr. SLAUGHTER, Mrs. SMITH of Nebraska, Mr. SNYDER, Mr. SOLOMON, Mr. SWEENEY, Mr. WOLF, Mr. YOUNG of Florida, Mr. YOUNG of Alaska, Mr. BADHAM, Mr. HUCKABY, Mr. MOORE, Mr. MORRISON of Washington, and Mr. MOLINARI.

H.J. Res. 126: Mr. BARNES, Mr. MCKINNEY, Mr. REID, Mr. ANDREWS, and Mr. STARK.

H.J. Res. 127: Mr. STUMP, Mr. DUNCAN, Mr. SHUMWAY, Mr. ROSE, Mr. SCHUETTE, and Mr. LEVINE of California.

H.J. Res. 183: Mr. ASPIN, Mr. ATKINS, Mr. BEREUTER, Mr. BOUCHER, Mr. BRUCE, Mr. CAMPBELL, Mr. CARPER, Mr. DICKINSON, Mr. DURBIN, Mr. EVANS of Iowa, Mr. FLORIO, Mr. FOLEY, Mr. FRANKLIN, Mr. FRENZEL, Mr. GARCIA, Mr. GRAY of Illinois, Mr. KRAMER, Mr. MANTON, Mr. MAZZOLI, Mr. MOODY, Mr. MORRISON of Washington, Mr. SAXTON, Mr. SCHUMER, Mr. SOLARZ, Mr. STALLINGS, Mr. STRANG, Mr. WEBER, Mr. WIRTH, and Mr. YOUNG of Alaska.

H.J. Res. 221: Mrs. BOXER, Mr. GRAY of Illinois, Mr. JEFFORDS, Mr. JENKINS, Mrs. MEYERS of Kansas, Mr. MINETA, Mr. MOLLO-

HAN, Mr. RAY, Mr. SCHUETTE, Mr. SHAW, and Mr. SMITH of New Hampshire.

H.J. Res. 267: Mr. COBLE, Mr. BOULTER, Mr. MILLER of Washington, and Mr. WALKER.

H.J. Res. 297: Mr. MCEWEN, Mr. PORTER, Mr. FRANKLIN, Mr. SMITH of Iowa, Mr. LELAND, Mr. WALKER, Mr. FAZIO, Mr. EDGAR, Mr. ROE, Mr. GREGG, Mr. HORTON, Mr. MORRISON of Connecticut, Mrs. COLLINS, Mr. SPENCE, Mrs. BOXER, Mr. TAUZIN, Mrs. LLOYD, Mr. CHAPPIE, Mr. YOUNG of Florida, Mr. GRAY of Illinois, Mr. PEPPER, Mr. BLILEY, Mr. MORRISON of Washington, Mr. LEWIS of Florida, Mr. KRAMER, Mr. YATRON, Mr. ERDREICH, Mr. MCCAIN, Mr. BADHAM, Mr. DANNEMEYER, Mr. GORDON, Mr. COBEY, Mr. SABO, Mr. HUTTO, Mr. BROOKS, Ms. OAKAR, Mr. CARR, and Mr. LEHMAN of Florida.

H.J. Res. 308: Mr. AKAKA, Mr. ARCHER, Mr. BATEMAN, Mr. BROWN of California, Mr. CARPER, Mr. CHAPMAN, Mr. COUGHLIN, Mr. CRAIG, Mr. DELLUMS, Mr. DONNELLY, Mr. DYMALLY, Mr. ERDREICH, Mr. FAUNTROY, Mr. FLORIO, Mr. FROST, Mr. GRAY of Illinois, Mr. GREEN, Mr. GREGG, Mr. HARTNETT, Mr. HUNTER, Mr. HYDE, Mr. JEFFORDS, Mr. KEMP, Mr. KINDNESS, Mr. LEVINE of California, Mrs. LLOYD, Mr. LOWERY of California, Mr. LUNGREN, Mr. MARKEY, Mr. MCEWEN, Mr. MOAKLEY, Mr. MOLLOHAN, Mr. MONSON, Mr. MORRISON of Washington, Mr. NEAL, Mr. PERKINS, Mr. REGULA, Mr. RINALDO, Mr. STALLINGS, Mr. STENHOLM, Mr. WAXMAN, Mr. WHITTEN, Mr. WYDEN, and Mr. YATES.

H.J. Res. 326: Mr. SAXTON, Mr. YOUNG of Florida, Mr. KASICH, Mr. HUGHES, Mr. MCHUGH, Mr. NEAL, Mr. PORTER, Mr. MURTHA, Mr. CONTE, Mr. LIVINGSTON, Mr. GRAY of Pennsylvania, Mr. SABO, Mrs. BURTON of California, Mr. THOMAS of California, Mr. WEISS, Mr. STRATTON, Mr. YATES, Mr. GARCIA, Mr. ECKERT of New York, Mr. MATSUI, Mr. GILMAN, Mr. DYMALLY, Mr. FOGLIETTA, Mr. LANTOS, Mr. LEVIN of Michigan, Mr. BROOKS, and Mr. LEACH of Iowa.

H.J. Res. 329: Mr. VALENTINE.

H.J. Res. 334: Mr. DE LUGO, Mr. BERMAN, Mr. DAVIS, Mrs. BYRON, Mr. EARLY, Mr. FUQUA, Mr. PEPPER, Mrs. MARTIN of Illinois, Mr. ROWLAND of Connecticut, Mr. SPENCE, Mr. SUNIA, Mr. ASPIN, Mr. YOUNG of Alaska, Mr. BRUCE, Mr. ANDERSON, Mr. DUNCAN, Mr. LEATH of Texas, and Mr. O'BRIEN.

H.J. Res. 357: Mr. DURBIN, Mr. EVANS of Illinois, Mr. LANTOS, Mr. OWENS, Mr. RICHARDSON, and Mr. VENTO.

H.J. Res. 376: Mr. SYNAR, Mr. LAGOMARSINO, Mr. DWYER of New Jersey, Mr. DYSON, and Mr. GINGRICH.

H. Con. Res. 126: Mr. BADHAM, Mr. BATEMAN, Mr. BLILEY, Mr. BOULTER, Mr. BURTON of Indiana, Mr. DAUB, Mrs. HOLT, Mr. HYDE, Mr. HARTNETT, Mr. KEMP, Mr. LAGOMARSINO, Mr. LOWERY of California, Mr. MONTGOMERY, Mr. PARRIS, and Mr. WILSON.

H. Con. Res. 193: Mr. CHAPPIE, Mr. ARMEY, Mr. WALKER, Mrs. BENTLEY, Mr. CRAIG, Mr. COBEY, Mr. STANGELAND, Mr. MOORHEAD, Mr. BADHAM, Mr. MONSON, Mr. MCCAIN, Mr. GINGRICH, Mr. MILLER of Washington, Mr. BARTON of Texas, Mr. COBLE, Mr. MOORE, Mr. WEBER, Mr. DREIER of California, Mr. PACKARD, Mr. HUNTER, Mr. ROBERT F. SMITH, Mr. KINDNESS, and Mr. ECKERT of New York.

H. Res. 190: Mr. GREGG.

H. Res. 245: Mr. ANNUNZIO, Mr. BUSTAMANTE, Mr. DELAY, Mr. DE LA GARZA, Mr. GINGRICH, Mr. GREGG, Mr. GRAY of Illinois, Mrs. HOLT, Mr. JEFFORDS, Mr. KANJORSKI, Mr. LIGHTFOOT, Mr. ORTIZ, Mr. PRICE, Mr. ROSE, Mr. STENHOLM, Mr. STUMP, and Mr. VANDER JAGT.

H. Res. 270: Mr. MCKINNEY, Mr. LEHMAN of California, Mr. DELLUMS, Mr. FAZIO, Mr. DWYER of New Jersey, and Mr. GEJDENSON.

H. Res. 271: Mr. KANJORSKI, Mr. RUSSO, Mr. RANGEL, Mr. OWENS, and Mr. TORRICELLI.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

231. By the SPEAKER: Petition of the Supporters of the National Democratic Party of Liberia (USA), Brooklyn, NY, relative to friendship; to the Committee on Foreign Affairs.

232. Also, petition of Peter J. Cojanis, Washington, DC, relative to due process of law; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3248

By Mr. FRENZEL:

—On page 33, strike out line 5 and all that follows through 13.

—On page 33, strike out "$21,600,000" on line 10 and insert in lieu thereof "$10,800,000".

—On page 33, strike out "is amended—" in line 7 and all that follows through line 13, and insert in lieu thereof the following:

is amended by striking out "$25,000,000" and all that follows through "fiscal year 1985" and inserting in lieu thereof "$21,600,000 for fiscal year 1986".

—On page 33, strike out "$21,600,000" on line 10 and insert in lieu thereof "$292,000".

EXTENSIONS OF REMARKS

MINOR CRIMINAL LAW AMENDMENTS ACT OF 1985

HON. ROBERT W. KASTENMEIER
OF WISCONSIN
IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. KASTENMEIER. Mr. Speaker, today I am introducing a bill which makes largely technical amendments to the U.S. Criminal Code. These amendments were drafted by the U.S. Department of Justice. These amendments correct allegedly inadvertent errors in the Comprehensive Crime Control Act of 1984. This bill also makes a correction in the role of the United States as a participant in the Interstate Agreement on Detainers. I have appended to this statement a section-by-section analysis of these provisions prepared by the Department of Justice. Parties interested in these amendments should communicate their views to the Subcommittee on Courts, Civil Liberties and the Administration of Justice, 2137 B Rayburn HOB, Washington, DC 20515. Phone (202) 225-2926.

BAIL

Section 1 amends 18 U.S.C. 3142(f)(1), as enacted by section 203 of the Comprehensive Crime Control Act of 1984, to modify the category of prosecutions for which pretrial detention on grounds of dangerousness would be authorized so as to clearly include serious explosives and firearms violations. Chapter I of the Comprehensive Crime Control Act of 1984 revised the bail statutes—18 U.S.C. 3141 et seq.—to authorize pretrial detention on grounds of danger to the community in certain prescribed categories of offenses. The principal category of offenses, apart from those carrying a possible sentence of life imprisonment or death and certain controlled substances violations, is "a crime of violence"—18 U.S.C. 3142(f)(1)(A). The term "crime of violence" is defined to mean an offense that has as an element the use or threatened use of physical force against the person or property of another, or any other felony offense that by its nature involves a substantial risk that physical force against the person or property of another may be used "in the course of committing the offense," 18 U.S.C. 16—as enacted by section 1001 of the Comprehensive Crime Control Act of 1984.

While the definition of "crime of violence" would clearly encompass crimes in which a firearm or explosive is used as a means of committing an offense of broader definition, such as using an explosive to commit arson or to damage a Federal building, or using a firearm to commit a bank robbery, it may not reach other dangerous offenses involving the transfer or possession of firearms or explosives themselves.

For example, while a transfer of explosives and weapons to an organization which evidently intends to use the material in terrorist activities is clearly an offense that poses a danger to human life and property, the offense itself—that is, the transfer of the explosives and firearms from A to B—could be construed not to be an offense that by its nature involves a substantial risk that physical force will be used "in the course of committing the offense," but rather as one in which the risk is that force will be used upon future victims as a consequence of the offense. A similar example is possession of a firearm by a previously convicted felon under 18 U.S.C. App. 1202. The addition of felony firearms and explosives offenses to the categories of offenses listed in 18 U.S.C. 3142(f)(1) would clarify the intended scope of, and is consistent with the types of offenses currently included within, this provision—those underlying offenses that evidence a significant likelihood that the perpetrator pose a danger to the community.

Accordingly, the amendment add to section 31423(f) an enumeration of the felony provisions involving explosives and firearms offenses in the United States Code the perpetrators of which are liable to be dangerous, so that in appropriate cases, such as sales to terrorists or possession offenses involving career criminals, the public may be protected by the invocation of the pretrial detention statute.

Section 1(b) of the proposed bill amends 18 U.S.C. 3142(f)(1)(E), as amended by section 203 of the Comprehensive Crime Control Act of 1984 and as redesignated by subsection (a) of this section of the proposal, to provide that a pretrial detention hearing shall be held upon motion of the Government in a felony case if the defendant has been convicted of two or more offenses of the types described in subparagraphs (A) through (D) of section 3142, regardless of whether the felony in question was committed after the other convictions. Under the act as written, if a person were charged with, for example a felony committed before this commission and conviction of two other violent felonies, the pretrial detention provision would not be applicable.

This is, however, a clear anomalious result not in keeping with the evident congressional purpose, since the reason for permitting pretrial detention of a person with a prior record of violent or drug felonies is that such a person has already established a propensity to commit especially serious crime. The amendments also clarify that a combination of two or more prior Federal, State, and local offenses of the types described in subparagraphs (A) through (D) of section 3142(f)(1) warrants a pretrial detention hearing a felony prosecution.

Subsection (c) makes a purely technical amendment of 18 U.S.C. 3142(f)(2) to add the work or between subparagraphs (A) and (B).

The amendment in subsection (d), explicitly granting the court discretion to reopen the detention hearing, is to clarify that such power exists notwithstanding the time constraints set forth in subsection (f) which require that the hearing be held immediately upon the person's first appearance unless a brief continuance is sought. The overriding purpose of the pretrial detention provision is to determine whether there are conditions that will adequately assure the person's appearance at trial protect the public. If information not known at the time of the hearing that may have a material bearing on the determination becomes known to either the Government or the individual, then common sense dictates that the court should have the power to reopen the hearing to consider the information and to reverse of modify its initial order—if such order has been entered—accordingly. The clarification is needed inasmuch as some lower courts, in unreported orders, have held, that the structure of subsection (f) is such as to preclude the usual authority of a judicial officer to entertain a motion for reconsideration.

Nothing in the proposed amendment is designed to create an implication that a court lacks inherent detention authority to deal with a situation in which, although no detention hearing was initiated at the defendant's first appearance, there is subsequent information that the defendant has threatened or plans to injure or intimidate a juror or witness or plans to flee. Cases arising under the 1966 Bail Reform Act recognized an inherent right of the trial court to protect the integrity of the judicial process by ordering detention if necessary in such circumstances, *United States* v. *Wind*, 527 F.2d 672 (6th Cir. 1975); *United States* v. *Gilbert*, 425 F.2d 3 (D.C. Cir. 1969); *United States* v. *Abrahams*, 575 F.2d 3 (1st Cir. 1978), and nothing in the 1984 act should be deemed to limit that power. In fact, in *United States* v. *Resek*, 602 F. Supp. 1126, 1130 (S.D. N.Y. 1985), the court recognized that under the 1984 act—specifically, 18 U.S.C. 3142(c), which allow the amendment of a release order at—anytime the Government may seek a detention order after the defendant's first appearance if it has new information.

Section 3 amends section 212(a) of the act with regard to 18 U.S.C. 3672, as redesignated from 18 U.S.C. 3656, concerning duties of the Director of the Administrative Office of the U.S. Courts. The amendment authorizes the Director to contract with appropriate public or private agencies or person for the detection of and care in the community for offenders who are addicts or drug-dependent persons. This amend-

ment is necessary because section 218(a)(6) of the act, which repealed the criminal provision of the Narcotic Addict Rehabilitation Act of 1966, 18 U.S.C. chapter 314, also repealed existing authority of the Director of the Administrative Office to contract for drug care in the community. The amendment also authorized the Director to pay for presentence studies and reports by qualified consultant had presentence examination and reports by psychiatric or psychological examiners ordered under 18 U.S.C. 3552 (b) or (c) except for studies conducted by the Bureau of Prisons.

Section 4(a) provides that the Parole Commission shall be abolished effective September 30, 1991, approximately 5 years after the effective date of chapter II as amended by this proposal—October 12, 1986. The September 30 date was chosen since it represents the end of the fiscal year. The amendments in paragraph (2) also provide that the Parole Commission shall have no jurisdiction over an offender who is sentenced after March 31, 1991, who violates a condition of parole after that date, or who is a prisoner transferred to the United States pursuant to chapter 306 of title 18, United States Code, after that date. Paragraph (2) further provides that by May 15, 1991, the Commission must set a presumptive release date for person who will be in its jurisdiction on its last day of business—September 30, 1991. The purpose of this requirement is to assure that the Commission has adequate time to complete its work with respect to those over whom it will have jurisdiction before its abolition. Paragraph (2) also provides that the Commission shall not revise its guidelines in effect on March 31, 1991.

These guidelines will provide substantive rights relative to the parole laws once the Parole Commission is abolished. However, while the Parole Commission's guidelines effective March 31, 1991, will establish the substantive rights to be accorded persons subject to the parole laws after that date, paragraph (3) provides that the same procedureal mechanisms as set forth in the guidelines to implement those rights need not be continued. Wherever this section provides that determinations shall be made in accord with applicable parole guidelines, it should be construed to mean that current practice in applying the guidelines shall continue. It is not meant to imply that all release dates must be within the applicable guideline ranges, as currently provided in section 235(b)(3) of the Comprehensive Act.

Paragraphs (3), (4), and (6) concern the treatment of persons previously within the Parole Commissions' jurisdiction once the Commission is abolished and persons who never come within its jurisdiction despite the fact that their offenses were committed prior to the effective date of chapter II. Certain duties with respect to such persons are to be carried out by the Bureau of Prisons, which will have the authority to issue regulations to implement section 235(b) of the act, and others are to be carried out by the court. The amendment in paragraph (5) provide a mechanism for revoking the parole of a defendant who violated a condition of parole after March 31, 1991.

Section 5 amends 18 U.S.C. sections 1791 and 1792, which were amended by the Comprehensive Crime Control Act of 1984—chapter XI, part H—to strengthen the provisions relating to the introduction or possession of contraband in prisons. At the time the act was enacted, the House had passed a separate bill (H.R. 5910) that contained certain later developed improvements to the provisions in the Comprehensive Act that were supported by the administration. These amendments implement those provisions and made other useful clarifications.

The first amendment made by this section adds specific reference to detention facilities, thus clarifying that such facilities are covered by the prohibitions against introduction or possession of contraband and rioting. The amendments made by subsection (b) (1) and (4) make clear that ammunition—(as defined in 18 U.S.C. 921(a)(17) is encompassed within the category of dangerous weapons or objects whose possession or introduction into a prison is prescribed at a 5-year felony level. This reflects the understanding of the Bureau of Prisons as to the intent of the current law. The amendment in subsection (b)(2) adds the drugs LSD and PCP to the subparagraph prescribing the introduction of narcotic drugs, thereby treating these substances equally for purposes of punishment in section 1791(b). This consistent with amendments made to the underlying drug offenses themselves, in chapter V of the Comprehensive Act, essentially equating the penalties for dealing in LSC and PCP to those applicable to narcotic drugs.

Section 6 amends 18 U.S.C. 3522, as enacted by section 1208 of the Comprehensive Crime Control Act of 1984, concerning probationers and parolees provided protection as witnesses under chapter 224 of title 18, United States Code. Subsection (a) of section 3522 provides that a probation officer may, upon the request of the Attorney General, supervise any person provided protection under chapter 224 who is on probation or parole under State law if the State consents. It further provides that a person so supervised shall be under Federal jurisdiction and subject to all Federal laws pertaining to parolees. The amendment provides that a person so supervised shall be subject to all Federal laws pertaining to probationers or parolees, as the case may be. Such laws would include, for example, provisions relating to the revocation of probation or parole, as well as any provisions applicable following revocation of probation or parole.

The amendment of 18 U.S.C. 3522 also affects subsection (b), which currently provides that the failure of a probationer or parolee to comply with the memorandum of understanding entered into by that person regarding his or her protection shall be grounds for revocation of probation or parole if the protected person is under supervision pursuant to section 3522(a), relating to State probation or parole. The amendment extends section 3522(b) to all probationers and parolees under the witness protection program, including those under strictly federal supervision as the result of a Federal conviction. In addition, the amendment clarifies that the revocation of probation or parole because of the failure to comply with the memorandum of understanding is discretionary.

Section 7 amends 28 U.S.C. 1921, which concerns the taxing as costs of fees of the U.S. Marshals Service. The amendment adds language authorizing the U.S. Marshals Service, to the extent provided in appropriation account all fees, commissions, and expenses collected for the service of civil process and seizures, levies, and sales associated judicial orders of execution by the Marshals Service and to use such credited amounts for the purpose of carrying out these activities. This provision was inadvertently deleted from the final verson of part F of chapter XII of the Comprehensive Crime Control Act of 1984.

SECTION 7—CLARIFICATION OF ROLE OF UNITED STATES UNDER INTERSTATE AGREEMENT ON DETAINERS ACT

Section 2 of the Interstate Agreement on Detainers Act, 84 Stat. 1397, is amended by adding after the words "entered into by the United States on its own behalf" the words "as a Sending State only".

SECTION-BY-SECTION ANALYSIS

This Part would amend the Interstate Agreement on Detainers, codified at 18 U.S.C. Appendix, to limit the participation of the United States to that of a "sending" State, the role which the Department of Justice believes was intended for it by Congress in the original legislation making the United States a party to the Agreement.

The Interstate Agreement on Detainers Act was enacted in 1970 to facilitate the obtaining of defendants incarcerated in other jurisdictions for purposes of prosecution. The legislative history makes clear that the United States was made a party so that States could secure federal prisoners. See H. Rep. No. 91-10181, 91st Cong., 2d Sess. (1970); S. Rep. No. 91-1356, 91st Cong., 2d Sess. (1970). The United States has no need of the Agreement for obtaining State prisoners since, unlike a State which can issue no process or writ requiring obedience outside its borders, the United States still has available the federal writ of habeas corpus ad prosequendum to compel the appearance of a person incarcerated in a State institution for trial.

The Interstate Agreement on Detainers contains very stringent remedies for violation of the Agreement's terms. Thus, the Agreement *requires dismissal with prejudice* of an indictment whenever a prisoner is transferred from custody from the sending to the requesting State and returned to the sending State without being tried, or who is not tried within an enumerated period of time, generally 120 days. See Article IV(e) of the Agreement. This sanction is designed to prevent prisoners from being abused by the lodging of detainers and their transfer to a requesting State unaccompanied by an intent or ability to try the individual.

However neither the separate time-for-trial nor the "no return" requirement is appropriate when the United States is acting in the capacity of a "receiving" State. The provisions of the Agreement calling for trial within 120 days of the prisoner's demand are at variance with the Speedy Trial Act,

18 U.S.C. 3161 et seq., enacted by Congress to implement the Sixth Amendment right to a speedy trial. The Act contains far more detailed provisions than does the Agreement for balancing the various rights and interests involved and represents a general congressional expression of policy in regard to time periods for federal prosecutions. There is no reason for the separate existence and application of a different set of rules for federal defendants procured for trial from State custody simply because of the prior lodging of a federal detainer, and the existence of such rules contributes to a situation in which, because of inadvertence or failure of communication between the United States Marshal and the federal prosecutor as to the existence of a detainer or a prisoner's demand for trial, the Agreement may be unwittingly violated and the federal charges cannot be tried. See, e.g., *United States* v. *Schrum*, 504 F. Supp. 23 (D. Kans. 1980), aff'd, 638 F.2d 214 (10th Cir. 1981). Similarly, the "no return" requirement of the Agreement, which requires disposition of all the outstanding charges against the prisoner prior to his return to the "sending" State, makes little sense when the United States acts as a "receiving" jurisdiction. Unlike the case with States, where a prisoner must be transferred interstate, the federal charges may require only that the prisoner be delivered in the same State, perhaps across the street, for trial. A "return" of the prisoner to State custody in such circumstances, for example following a brief arraignment proceeding, is an innocuous circumstance. It is clearly not harmful to the prisoner and ought not to lead to the drastic remedy of dismissal with prejudice of the federal indictment. See *United States* v. *Thompson*, 562 F.2d 232 (3d Cir. 1977) (en banc). Moreover, a "return" frequently is for the prisoner's benefit and may enable him or her to resume participation in State rehabilitative prison programs whereas, if retained in federal custody, the prisoner might have to be lodged in a federal jail-type institution for a protracted time without comparable treatment or facilities. See, e.g. *Burrus* v. *Turbo*, 743 F.2d 693 (9th Cir. 1984), holding that the Agreement was violated when federal authorities understandably returned a prisoner to the "sending" State following the district court's dismissal of the indictment pending the outcome of a government appeal; although the government won the appeal, the court held that the charges could not be pursued because of the breach of the Interstate Agreement.

In short, the Agreement serves no legitimate purpose insofar as the United States' role as a "receiving" State is concerned, and often operates as a trap for the unwary prosecutor which results in dismissal of federal charges without a trial on a basis unrelated to innocence or indeed to any substantial harm to the defendant.[1]

Because of the Agreement's evident purpose, so far as United States' participation is concerned, to assist States in securing federal prisoners, the Department of Justice for a number of years administratively interpreted it as including the Federal Government only in the capacity of a "sending" State, not a "receiving" State as defined in the Agreement.[2] The Supreme Court in 1978 rejected this contention in *United States* v. *Mauro*, 436 U.S. 340, however. Thus, amendment of the statute by which the United States became a party to the Agreement is necessary to make clear that the United States' role is as a "sending" State only. A similar proposal was included in the Criminal Code Reform legislation approved by the Senate Judiciary Committee in the 97th Congress (S. 1630, § 3201). The United States specifically reserved the right to amend the Agreement upon becoming a party thereto, see section 7 of Public Law 91-538, and the proposed amendment would not adversely affect the rights of the other participating States, which will continue to be able to obtain federal prisoners for trial pursuant to the Agreement.

[1] See *United States* v. *Schrum*, *supra*, 504 F. Supp, at 28 ("We are not pleased by this result, which imposes harsher sanctions upon the government for a trifling violation of a statute than follow from egregious violations of constitutional rights.").

[2] This Understanding of the Agreement is buttressed by its inclusion of a provision allowing the Governor of the "sending" State to refuse to honor the "receiving" State's demand for the prisoner. This provision has never been invoked against the United States, whose demanding writs by virtue of the Supremacy Clause must be honored by States. The presence of the provision confirms the fact that the Congress, in enacting the legislation by which the United States joined the Agreement, did not contemplate United States' participation other than in a "sending" capacity.

Moreover, the 1970 legislation by which the United States became a party was proposed by the Department of Justice and was enacted without opposition. As a number of judges have observed, it is inconceivable that there would have been no opposition if the obvious problems that result from United States' participation as a "receiving" State had been intended. See *United States* v. *Thompson*, *supra*, 562 F.2d, at 239 (dissenting opinion).

ELIMINATION OF STATE AND LOCAL DEDUCTION UNFAIR

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. OBERSTAR. Mr. Speaker, in a "revenue-neutral" approach to tax reform, concessions will have to be, and should be, made by all interest groups. In my congressional district in northeastern Minnesota, the people have overwhelmingly expressed their willingness to pitch in and do their fair share to reduce the exorbitant $210 billion Federal budget deficit, provided others are willing to do the same.

Those who advocate the elimination of the State and local tax deduction seem to have taken my constituents up on their offer. Minnesotans will feel the loss of the State and local tax deduction considerably, while lower-tax States, which may not provide as many municipal services to their residents, will escape comparatively unaffected.

Taxpayers in energy producing, lower-tax States of the South and West will not notice the absence of the deduction because services provided to these States are generally paid for by severance taxes not available to States in the Northeast-Midwest region. Yet in a recent study sponsored by the Democratic Study Group in which 60 members participated, 74 percent polled opposed the repeal of this deduction.

If this deduction is eliminated, States and localities will feel tremendous pressure to reduce taxes and subsequently to reduce services. Minnesota is above the national average in services provided, a fact of which we are justifiably proud. While the Congressional Research Service estimates an average 25 percent, or 47 cents, in cutbacks for each dollar currently spent on services, Minnesota would lose nearly $292 million in services.

It is important to realize just what services would be sacrificed. Education would be hurt significantly—by as much as 18 percent per pupil nationally. In Minnesota we spent $3,408 per pupil last year. Without the revenues generated by the State and local tax deduction we will lost $671, or 20 percent student, next year.

State and local health services, on average, would be cut by as much as 10 percent. Again, Minnesota is above the average and would stand to lose $84 million.

Minnesota would lose $107 million in Medicaid services; $2.9 million in mental health services, and $1.6 billion in State and local bond revenues.

While taxpayers in my State will be forced to accept drastic reductions in services, people in other States will notice little or no change. For Minnesotans, the State and local tax deduction is a nonnegotiable issue. Eliminating this deduction is an injustice this body must not condone.

The adverse effects of eliminating the State and local tax deduction are not justified by any positive effect they may have in making the Reagan tax plan to reduce the top rates more affordable. When we make cuts and eliminations, let's make fairness our No. 1 priority.

THE SINO-AMERICAN NUCLEAR VERIFICATION ACT

HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. FEIGHAN. Mr. Speaker, I rise today to introduce the Sino-American Nuclear Verification Act. I am honored to sponsor this bill in the House at the same time Senator GLENN of Ohio is introducing companion legislation in the other body.

This bill is designed to improve on the recent Agreement for Cooperation Between the United States and the People's Republic of China Concerning Peaceful Uses of Nuclear Energy. That agreement, which has been the subject of intense negotiations for well over 1 year, was signed by both the United States and the People's Republic of China [P.R.C.] on July 23. The Congress now has before it the option of acting on that agreement within 90 days of continuous legislative session.

The purpose of this legislation is not to disapprove the agreement, nor to alter its substance in any way. Indeed, the Agreement for Cooperation should be viewed as a positive step in relations between the United States and the People's Republic of China, but it is also one that can have dramatic consequences. The nature of nuclear technology is such that we have an obligation to national and international security

to insist on certain specific safeguards in such a trade agreement. As currently written, the Agreement for Cooperation falls seriously short of providing concrete assurances for the long-term safety of U.S. nuclear technology.

We are seeing a new attitude in China regarding nuclear nonproliferation. Until recently, China had maintained a disturbing nuclear proliferation policy, even encouraging proliferation, and sending nuclear materials to both Argentina and South Africa. Until recently, China refused to accept IAEA safeguards. Now we are told by the State Department that the People's Republic of China has turned completely around. They have seen China voluntarily accept some IAEA safeguards, subsequent to Taiwan's expulsion. But though these assurances may lead to the signing of an agreement of this nature, they are not the stuff of which nuclear agreements are made.

The legislation which I have introduced today calls simply for a verification from the President of the understandings between the United States and the People's Republic of China regarding the sale of our nuclear technology. On four counts in the Agreement for Cooperation, the President is asked to clarify the intent of the United States and the People's Republic of China. First, the President must certify to the Foreign Affairs Committees of the House and Senate that the People's Republic of China understands and agrees that restrictions on exported technology under this agreement follow IAEA safeguards on accounting and inspection. Second, the President must certify that the People's Republic of China has stated publicly in writing that it is committed to the nonproliferation policies described in the State Department's "U.S. Summary of Discussions" document. Third, the President must certify that the People's Republic of China understands that the agreement in no way binds the United States to respond positively or negatively to a request for enrichment or reprocessing of nuclear fuel. And finally, the President must certify that the People's Republic of China will accept the internal laws of the United States concerning nuclear exports that are in effect at the time of a request, regardless of whether the laws are enacted after the date of the Agreement for Cooperation.

This approach is specifically designed not to interfere with the enactment of the Agreement for Cooperation. I believe it is the only responsible action that can be taken, however, if the agreement is to reap the benefits which it promises. Nuclear proliferation is not a subject to be left to assurances and handshakes. To be effective and secure, this agreement needs the clarifications provided by the Sino-American Nuclear Verification Act.

I hope my colleagues in the House will join me in supporting this measure, and that we may contribute to a clearer understanding of this important new agreement.

AMERICA'S JOBLESS—A STORY OF FEAR AND FRUSTRATION

HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. O'NEILL. Mr. Speaker, Steve P. Matz, of Magna, UT, wrote a moving story of what cheap foreign imports and a massive trade imbalance mean to America's working men and women. He and his wife, Karen, have experienced the fear and frustration that haunts those whose lives are governed by circumstances beyond their control and who feel, as Mr. Matz so eloquently writes, "that no one really cares unless they are directly affected."

I want to take this opportunity to share this fine article with my colleagues.

[From the Salt Lake Tribune, Sept. 1, 1985]

JOBLESS ARE ADRIFT ON A SEA OF FEAR

(By Steven P. Matz)

I, and many others like me, have watched it in the papers and seen it on the news for years, but until it happens to you, you can't really know how it feels. What am I talking about? Unemployment. Not the kind where you accept a job knowing full well that you'll be a member of the unemployed when the job is completed, but the kind that hits you like an electrical shock or a dream that you should be waking up from.

This type of unemployment happens to people who plan their life around a company knowing, or at least believing, it will operate until they retire and beyond. They make their jobs a way of life that locks them into a continuous cycle of familiarities. Their sons and daughters get tied into the company as were their fathers and mothers. Then in one violent swoop it's over. When you look into the faces of these men and women whose dreams have been crushed, it affects you. When you know them personally it hurts. When you're soon to be one of them it draws fear into your soul.

There are a lot of reasons why laboring men tie their dreams to a company. But faith in that company and the secure feeling that the faith gives them has got to be two reasons. The way they feel is that an entire way of life is vanishing. In these men's words, "It's the end of an era, the disappearance of a culture."

When you go to work five days a week for up to 40 years with the same people, you establish more than friendships and companions. Some say its like a second family, and it could be, but I think not. There is too much human emotion among certain individuals to tag it as a family—yet there's something.

The only way I can explain it is to compare it to a crew of a sunken ship. Only this crew and vessel have been together at sea for 40 years. They buried their dead, watched individuals drift away in life boats called retirement, and all this time fought the high seas together.

Close brotherly love among the crew? No, but together they fought against the sea and established a niche in a way of life that gave them a decent living and close relationship only they understand.

A miniculture is a sea for cultures? Maybe, but the end is devastating. The vessel is torpedoed and the crew is set adrift on leaky rafts. Each man to his own, alone. They drift apart, never to work, play or even argue with one another again. Some will sink quickly, others will last longer.

A few will be rescued by other vessels, but very few. You see, these men are branded and they know it. Even though their vessel has sunk, other ships fear it will resurface and steal its crew back. Therefore, the ships will not take them on board no matter what their skills. This misconception leaves the men adrift.

These craftsmen and laborers know all this as they go out the gate for the last time. This knowledge is what sets in the fear. It's bad enough to lose a job, but when you leave it a marked man, it's terrifying.

Most plan never to return, because they know even if the gates are open again the job will never be the same, others must return just to keep from going under. Those lucky enough to establish themselves in good jobs will look back at the hardships and sadness of the last days and know that to return would be madness. No one puts their head on the chopping block twice.

But for now they can't see that far into the future. The just fear the future and all its unknowns. It's not a false fear but a very real, gut-wrenching fear, you could only know by being there yourself.

In the midst of all their troubles they ask themselves what happened, but there is no single, clear answer. They give a lot of answers that they try to adjust around to a logical reason.

The first heard is that the labor unions refused to negotiate concessions. But that isn't a reason for a company's demise; concessions are a reaction to a problem that already exists—they are like patching holes in a sinking ship. The question is, and should always be, what made the holes? Rust? Maybe! Many years of continuous service without putting money back into the company could cause that kind of industrial rust. You can't keep taking profits out without updating, upgrading and overhauling. Not keeping the primary company updated is treacherous, if not suicidal, if it attempts to expand into other companies.

Foreign imports are probably the biggest contribution to a company's downfall, and yet it's not the imports themselves but the manner in which foreign countries are able to market their products so cheaply. If we can't compete with imports on an equal basis then we should shut down. But the problem is we are not equal.

The part that makes competition impossible is that in many cases we, as a country, subsidize their own businesses, who are competing with us. You can't take your profits from a product you're marketing and give them to someone else who makes the same product and expect to stay in business long.

There are more reasons for a company's collapse, the value of the dollar on the exchange market, bankers' loans to foreign countries, interest rates and inflation in our country. They all contribute to a business' downfall. But the sad thing about all of it, is that no one really cares unless they are directly affected. The people who are out of work must struggle on their own until the effects reach high enough for someone in power to take action. By then, for those who are affected now, it is too late. They have been crippled by an unknown assailant in a senseless fight that should never have happened.

ANTICOMPETITIVE ASSUMPTIONS ABOUT RAILROADS AND ELECTRIC UTILITIES

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. SHUSTER. Mr. Speaker, I am seriously considering offering an amendment to a bill, H.R. 1140, pending before the Judiciary Committee which amends the Sherman Act to require a rail carrier to provide competitive access to its customers over any rail facility on which a monopoly control or ownership situation exists. Under H.R. 1140, failure to open up a solely owned facility to a competing source of rail transportation or, in the alternative, to offer a fair rate, would subject the violator to the criminal and civil sanctions of the antitrust laws. My amendment would expand the bill's provisions to include electric utilities. Electricity consumers, for example, as well as railroad shippers, could seek treble damages and/or injunctive relief.

My amendment would be a logical complement to H.R. 1140, now before the Committee on the Judiciary. That bill deals only with the case of a rail facility which is solely owned or controlled by one railroad. Even though railroads are regulated under the provisions of the Interstate Commerce Act, H.R. 1140 opens up antitrust remedies in such captive shipper cases, since the railroad is perceived to enjoy an unfair advantage. The bill mandates that rail carriers either grant trackage rights to competing railroads or charge fair rates as determined by the courts on the theory that "rates and terms of service are best and most efficiently established in a competitive marketplace."

Most of the evidence in support of H.R. 1140 centers on captive shipments to coal-fired electric generating plants. Utilities expect to benefit from forced entry under H.R. 1140 through lower railroad rates on coal traffic. Presumably for that reason, the chairman of the Potomac Electric Power Co., appearing on behalf of the Edison Electric Institute, has testified that the electric utilities do not oppose H.R. 1140.

The same logic which prompted the introduction of H.R. 1140 applies equally if not greater to the electric utility industry. Each electric utility possesses an absolute monopoly within its service territory. Like the railroads, utilities are subject to regulation. It seems that if forced competition is the appropriate way to control rail rates, it is also the appropriate way to control retail electricity rates. As a result, my amendment extends the provisions of H.R. 1140 to that industry.

Isolated segments of traffic are alleged to be captive to the railroads; electric utilities face absolutely no competition for the service they provide. They sell power within precisely defined areas to the total exclusion of potential competitors. The utility customer is a true captive.

If the ultimate consumer is to be protected against monoply power in the provision of electric power, that protection should extend at all levels of the chain of distribution. Otherwise, whatever benefits might flow from H.R. 1140 could benefit utility stockholders rather than ratepayers.

There is every reason to believe that the provisions of my proposed amendment would bring real rather than speculative relief to the consumer. In the 4-year period 1981–84, increases in unit fuel costs—coal, oil, and gas—increased the utilities' operating expenses by about 5 percent. In the same period, the average price of electricity to the consumer rose 38 percent. In 1980, the electric utilities had revenues of $80.6 billion. Over the period 1981–84, their revenues rose steadily to $94.3, $101.7, $109.4, and $118.7 billion, respectively. This means that, in the aggregate, utility ratepayers were charged over those 4 years $101.7 billion in excess of the 1980 level. Looked at another way, the utilities received, on average, $25.4 billion more each year from their ratepayers than they received in 1980. Yet, the kilowatt hours of electricity sole in that 4-year period averaged only 1.6 percent more than the amount sold in 1980. The increase in returns to electric utility investors—dividends and retained earnings—during that 4-year period was $23 billion.

My proposed amendment would give ratepayers new options. By opening up the utility industry to competition, customers could obtain electricity from whatever utility is willing to provide the service at the lowest cost. Some might choose to enter into long term supply contracts with existing or new utilities, with all future rate increases pegged to a mutually agreed upon index. Local industries, which have greater market power to negotiate contracts, might become secondary suppliers, selling excess or cogenerated power at slightly more than their cost but at a lower price than a homeowner can negotiate with the utility. User cooperatives might be formed to negotiate with both electric utilities and local industries for the best deal.

My amendment would go significantly beyond the Supreme Court's 1973 decision on Otter Tail Power. In Otter Tail Power the Court required a utility which had abused its monopoly power in violation of the Sherman Act to either sell or transmit electric power to a would-be competitor. The rates to be assessed by the monopolist were to be subject to regulation by the Federal Power Commission. Railroads today are obligated under the Interstate Commerce Act to interchange traffic over through routes without any showing that they have abused their market power.

By bringing utilities under H.R. 1140, they, like railroads, first, will be required to offer use of their facilities to neighboring power companies to permit the through movement of electric power to consumers in their service area at rates set by the courts (and not a regulatory agency); and second, if no competing power company requests use of their facilities to transmit power to consumers in the utility's service area, the utility will be required to transmit electric power from another power company to any consumer requesting such service at rates set by the courts. Unlike Otter Tail Power and as would be the case for railroads under this bill, this relief will be available to competing power companies and to consumers without any showing that the utility has abused its market power in violation of section 2 of the Sherman Act.

If my amendment is passed, each electric utility will immediately face competition from neighboring utilities and new entrants. Utilities will be answerable to their customers and will have a new incentive to achieve and pass along the lowest-cost means of providing service.

The reasoning that would permit railroad shippers to obtain transportation at reduced rates through use of a railroad's sole facility demands that electric ratepayers be offered the same opportunity. Their need for such protection is at least as urgent as that of the utility investor.

RON PERON

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mrs. SCHROEDER. Mr. Speaker, the economic news from Argentina contrasts sharply with events in the United States.

Argentina has a fiscally responsible and courageous government. The United States is led by Ron Peron, whose idea of economic policy is a $2 trillion national debt leavened with some old movie stories.

Maybe Argentina could provide the United States with some foreign aid: Lend us the services of Mr. Sourrouille.

An article from the Wall Street Journal follows:

[From the Wall Street Journal, Oct. 9, 1985]

SUCCESSFUL ATTACK ON ARGENTINE INFLATION MAKES THE NEW ECONOMIC MINISTER A HERO

(By Everett G. Martin)

BUENOS AIRES, ARGENTINA.—A minor miracle has occurred in Argentina: For the month of September, prices increased by only 2%, the lowest monthly increase in 10 years.

Inflation-weary Argentines hardly can believe it, and local economic columnists are falling all over themselves to explain the magnitude of September's arithmetic. The 2% rate compounded works out to 26.8% for 12 months, which is less than the monthly increase of 30.5% in June alone, when Argentines were roaring along at a 2,340% annual inflation rate.

At that time, international bankers whom the Argentines owe $50 billion were in despair over the economic management of President Raul Alfonsin's government. Then in mid-June, the newly appointed economic minister, Juan Sourrouille, an unknown academic, came out with an anti-inflation scheme called the austral plan. The turnabout began.

Now, says an official of the International Monetary Fund, "Argentina is Camelot," and a U.S. banker stationed here says,

"Sourrouille is the new hero of international finance."

TANGIBLE REWARDS

The IMF has rewarded Argentina with a new $1.4 billion agreement, and the bankers have delivered $2.2 billion in new loans since the austral plan began.

Why does the austral plan seem to be successful when so many other atttempts to halt Argentina's inflation have failed? For one thing, Argentines were desperate. "In June people sensed that there would be an absolute collapse if nothing was done," says a prominent economist.

At first glance, the austral plan didn't look like anything new. Prices, wages, and the official exchange rate were frozen. A new currency called the austral was created by lopping three zeros off the peso. The difference was that Mr. Alfonsin made a bold bid to change the country's inflation psychology by promising publicly to stop printing new money to balance the state budget.

Argentina had reached the stage where its astronomical inflation was fueled by public expectations that prices were going to continue to rise, explains Ricardo Mazzorin, a central bank director. "It was carried along by its own inertia. Businessmen raised prices every month, and workers automatically demanded salary increases," he says. "In the austral plan, we were mostly concerned about what people think causes inflation so we could give them the kind of signals they would believe. If they don't believe a program is going to work, it won't work."

SMART CITIZENRY

The economic team's studies showed that Argentines believe inflation is caused by printing new money to pay for government overspending. "They are really right," says Mr. Mazzorin, "so for the first time an Argentine inflationary policy contained a president's personal promise to balance the budget without printing money."

A U.S. banker stationed in Buenos Aires says, "The key element is their superior management of the situation, and the psychological management is even more important than the economic tactics. Alfonsin went to the balcony and said we are going into a war economy. Then he announced the austral plan and said, 'I'm not going to print any money,' and the people believed him."

To keep his promise, President Alfonsin doubled tax revenues, raised charges for public services and squeezed state spending. The result: Since August, the treasury has actually had a surplus.

Officials at the association of state suppliers say the army has cut purchases of supplies for draftees in half, public works projects have almost stopped and the state railways have cut back heavily on maintenance. The head of the state-owned television channel says he used to get $500,000 a month to balance his books and now he gets nothing. He has raised advertising rates, cut off two hours of broadcasting a day and buys more canned programs from abroad, which is cheaper than producing his own.

But such tactics to balance the budget aren't a permanent solution to budget deficits, critics warn. Newspapers already complain that the highways are deteriorating from a lack of maintenance. And a railroad union official declared, "We have got to make the service better or the public won't know when we are on strike."

But political observers don't expect the president to make any real cuts into the bloated government structure until after the Nov. 3 congressional elections, which, thanks to the surge of popularity for his economic leadership since June, Mr. Alfonsin's Radical Party seems sure of winning.

If he has a comfortable Radical majority in the congress, Mr. Alfonsin is expected to try to get rid of some 350 costly state companies ranging from the railroads and airlines to steel mills and mines. Manuel Tanoira, secretary for the promotion of growth, who has the task of finding ways to sell them, says he has 50 projects in the works such as turning the building of high-volume grain ports over to private developers. "You can't have the state running a grain port," he says. "It's like flying an airplane by decree."

THE UNTOUCHABLES

But other Argentine administrations that have tried to pare away state companies have been thwarted by the combined forces of the bureaucrats and unions at the companies and businessmen who make a comfortable living supplying them. Manuel Solanet managed to sell off some 120 state companies under the military government, but he says they accounted for less than 5% of the sales of public sector firms. "They block you when you try to touch the big companies. Everyone agrees in public that they should be made private, but then they found all kinds of ways to stop everything I tried to do," he says.

Mr. Alfonsin already has been thwarted by Entel, the state telephone company, which is notorious throughout Latin America for its inefficiency. The president announced that to shorten the years Argentines must wait for a telephone, private firms would be contracted to build new phone networks. The Entel bureaucracy somehow twisted the president's privatizing effort into a plan under which each private subscriber finances his own phone hookup by paying Entel the heavy installation costs in advance.

Critics also fear that the gains of the austral plan will blow up when the government lifts its temporary price and wage controls. The price controls have been managed carefully to avoid creating shortages, but wage controls have been strict.

EXTENSION OF THE MANUFACTURING CLAUSE OF THE COPYRIGHT ACT, H.R. 3465

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. FRANK. Mr. Speaker, I introduced H.R. 3465 with my colleagues, Mr. FISH, Mr. RUSSO, and Mr. GILMAN, legislation to make permanent the Manufacturing Clause of the Copyright Act. The legislation will ensure a strong U.S. printing industry, which will continue to be able to employ over a million workers across all 50 States. Many vital U.S. manufacturing industries have declined because of the combined effects of the overvalued dollar and the unfair trade practices of other nations. This bill will help keep our modern, competitive printing industry from suffering a similar fate.

Since 1891, the Copyright Act has contained a "Manufacturing Clause," which requires that material which is preponderantly of a nondramatic literary nature and is written in English by an American author or by an author domiciled in the United States must be printed in the United States or Canada in order to be entitled to the full and unqualified protection of U.S. copyright laws. The clause is currently due to expire on July 1, 1986.

The manufacturing clause has been crucial to the development and continued vitality of the U.S. printing industry. As the Nation's seventh largest industry, printing directly employs 1.2 million persons. Although U.S. printing is a vibrant, modern industry, the process remains highly labor intensive. In fact, 44 percent of all printing costs are directly attributable to wages. For this reason, the printing industry is highly sensitive to the fluctuating wage differential between the United States and the Pacific and Caribbean Basin nations. The present, extremely high wage differential is a destabilizing condition which could have permanent and deleterious consequences if the clause is not extended.

A 1981 Department of Labor study anticipated a loss of up to 172,000 job opportunities in the printing industry and a total loss of as many as 367,000 job opportunities throughout our economy as a result of foreign competition. A Book Manufacturers Institute study indicates that 60 percent of printing industry workers are either unskilled or semi-skilled workers. These workers would be the first victims of foreign competition. While some of them may find replacement jobs, the demand for these workers is declining. I have found, Mr. Speaker, that these job losses would be borne largely by those workers least able to recover.

The case of Australia may be instructive, as to the possible costs to the U.S. Government if the manufacturing clause expires. Over a decade ago, Australia opened its markets to competition from low-wage Pacific Basin competitors. The Australian printing industry sustained such heavy losses that the Australian Government now must provide a 33-percent subsidy for its printing industry. Clearly, the United States cannot afford to follow the Australian example.

The need for extending the manufacturing clause in 1986 is perhaps greater than at any previous point in the life of the clause. If the clause expires, we will see rising unemployment, the loss of an opportunity for an overall fair trade policy, and the destructive effects of the overvalued dollar on an industry which is a vital part of our economy and our culture. In addition, the economy and the Federal budget would be hard pressed to accommodate the projected 367,000 primarily unskilled and semi-skilled workers who may lose their jobs if the clause expires.

The Copyright Act is the only provision of our laws which effectively deals with trade issues as they relate to the printing industry. The Florence Agreement prohibits tariffs on books and other printed material of an educational or cultural nature. Un-

fortunately, foreign competitors have again taken circuitous routes to undermine the Florence Agreement. A maze of tariff and non-tariff barriers has kept American printing from successfully penetrating foreign markets. The expiration of the manufacturing clause would send the wrong signal to foreign nations. For the first time since World War I, America has become a debtor nation. At a time when our trade deficit is ballooning to record proportions, we cannot afford to grant an unreciprocated trade concession. The manufacturing clause remains the most important way to alleviate the destructive influence of these severe international economic conditions on U.S. printing.

The text of H.R. 3465 follows:

A bill to make permanent the requirements of the manufacturing clause of the copyright law

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 601(a) of title 17, United States Code, is amended by striking out "Prior to July 1, 1986, and except" and inserting in lieu thereof "Except".

THE DEBT

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, October 9, 1985, into the CONGRESSIONAL RECORD:

THE DEBT

Soon the Congress and the President will increase the ceiling on the national debt from $1.8 trillion to more than $2 trillion. The national debt will pass the $2 trillion mark in the middle of next year, and possibly could reach $3 trillion by 1990. The national debt is easily one of the strongest growth industries in America.

The debt, which is what the government owes, is a symbol of our inability to control government spending and our unwillingess to increase taxes. It should be distinguished from annual budget deficits. The debt is the sum of money the government has borrowed to finance all the annual budget deficits. Thus even if we miraculously balanced the 1986 budget tomorrow, we would still have almost $2 trillion in debt hanging over us built up by the previous unbalanced budgets.

It is not always easy to get people to focus on the national debt. Many who get worked up about the annual deficits express little concern about the national debt. Most of us simply cannot relate to a trillion dollars, because it is so far removed from our daily experiences. If you had a stack of $1,000 bills in your hand only 4 inches high, you would be a millionaire. A trillion dollars would be a stack of $1,000 bills 67 miles high. That symbolic stack of the national debt four years ago will soon be twice that size.

Yet our limited concern about the national debt may be changing, as more of us come to realize that it is the debt which is behind our high interest rates, the strength of the dollar and our declining exports, the sluggishness of the European economies, and the strains on the debtor nations of Latin America. Serious questions are now being raised about the debt: What is its economic impact? Does it shift the burden of financing government from one group to another? What is the effect of increasing foreign ownership of the debt? Several Hoosiers have spoken to me about the debt's moral dimension. The question for them is whether we can fairly ask our children to pay for government services we now enjoy.

The practice of government borrowing from the public to finance its activities has been controversial for decades. One view is that federal deficits can be productive during times of recession by generating income, satisfying demand for public investment, and using resources that would otherwise be idle. In this view, since public debt activates savings not being invested, it can serve a function by stabilizing the American economy. Another view is that government's role in the economy should be limited, that expenditures should be paid out of current receipts, and that public debt is unproductive and inflationary and imposes interest burdens on future generations.

It is not just the size of the debt that is disturbing. It is also that it has been growing faster than the economy. It took 189 years for the federal debt to reach $1 trillion, and only the last 4 years to double to $2 trillion. In 1974 the debt equalled 25% of gross national product, but it could reach 50% by 1990 if recent spending patterns continue.

Foremost among the problems caused by the mushrooming debt is the prospect of slower economic growth. Heavy federal credit demands drive up interest rates for all borrowers, putting a damper on business growth. The government, like any borrower, finances deficit spending by competing for available funds in the market by offering investors attractive interest rates for its securities. The government thus competes with private borrowers who need funds to invest in other things. In 1974, the federal debt was 17% of private debt; today it is 26%. That absorbs resources that should be going into private investment, and curbs productivity and future income.

Another problem with the debt is that it requires the government to make annual payments solely for interest. That is really the most useless kind of government spending. Half of the income tax revenues collected from individuals now goes to servicing the debt. Federal interest payments now consume 13.5% of the federal budget, costing $155 billion this year alone. That is more than ¾ the cost of the entire social security program. The interest the government must pay to borrowers limits what it can do for other spending or tax-reduction priorities.

Spending on interest to carry the national debt feeds upon itself. Each year we must borrow money to pay interest on the past national debt. That borrowing in turn adds to the next year's deficit and national debt, which means even more borrowing for interest payments, and the process repeats itself. Important federal programs may have to be sacrificed in the future simply to pay for the growing interest payments on the debt.

A large debt may also redistribute income. As the government pays interest on its obligations, income is transferred from U.S. taxpayers to bondholders, a shift of income from lower- to higher-income groups. Moreover, foreigners now hold more than 10% of the government's debt. If they stop investing in U.S. securities, the government would then have to take an even bigger share of domestic savings, bidding up interest rates even more. Still another problem is that the debt increases the risk that the Federal Reserve will increase the money supply to keep rising interest rates from choking off the sluggish recovery. That raises the prospect of more rapid inflation.

For many years there was little consensus on whether the national debt was a serious problem. That has now changed. Most of us have been persuaded that the size and growth of the current debt threatens our economic future. One promising recent step was Congressional passage of a budget mapping out long-range spending cuts that would level off the debt in the next few years. Also promising could be tying passage of the debt-ceiling increase to a plan forcing a balanced budget within 5 years. Congress simply must step up its efforts to check the inexorable growth of the national debt, and then to reduce it.

SECTION 936: A BOON FOR AMERICAN BUSINESS

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. RANGEL. Mr. Speaker, the importance of section 936 of the Internal Revenue Code to the economy of Puerto Rico is a widely recognized fact. For more than 50 years, it has provided a tax credit for income earned in Puerto Rico, a credit which has encouraged mainland firms to locate on the island.

I was very gratified to learn that the Southern Governor's Association issued a policy statement in favor of section 936 at its annual meeting. The statement was proposed by Gov. Bob Graham of Florida, and was adopted by the association as an indication of the section's importance to the Nation as a whole, and to the South in particular.

I hope that my colleagues will read the Governors Association's statement, which I have submitted for inclusion in the CONGRESSIONAL RECORD.

The statement follows:

Proposed Policy Position Regarding

THE IMPORTANCE OF SECTION 936 TO THE SOUTH AND THE NATION

(Submitted by: Governor Bob Graham, Florida, August 9, 1985)

[For Consideration at the 1985 Annual Meeting of The Southern Governors' Association]

The U.S. has recognized that the Caribbean is an important area of the world by enacting the Caribbean Basin Initiative. Special trade and tax advantages have now become law in order to encourage the private sector, spur economic development, and to help insure political stability of eligible Caribbean countries.

That same idea has embodied in the nation's tax code for over fifty years for American citizens living in Puerto Rico. This provision, Section 936 of the Internal Revenue Code, which provides a tax credit for income earned in Puerto Rico, is responsible for encouraging U.S. firms to locate in Puerto Rico, spurring the island's economic devel-

opment, and aiding in the continuance of political stability.

There are great parallels between the economic history of Puerto Rico and that of the South as a whole. The changes wrought over the past quarter century have turned both from rural, labor intensive agricultural areas into urban, high technology centers. Because of proximity, the two-way trade between Puerto Rico and the Southern states has resulted in jobs and income in both locations. Ultimately, this translates into benefits for the nation.

The current tax reform plan proposes to alter Section 936 in such a way as to discourage continued investment in Puerto Rico. Coming at a time of budget retrenchment, this proposal will further harm Puerto Rico, and by extension the South and the rest of the nation. It would present the perplexing problem of having the federal government extending benefits to Caribbean nations while reducing benefits to a part of America in the same geographic area. Finally, the proposed change would make difficult Puerto Rico's own initiative to use 936 monies as a special loan fund for CBI twin-plant manufacturing, with part of the work taking place in Puerto Rico and part in the individual beneficiary country.

Therefore, be it resolved that the Southern Governors' Association opposes any change in the current language of Section 936 of the federal tax code.

CONGRATULATIONS TO DR. ARTHUR G. HANSEN

HON. JOE BARTON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. BARTON of Texas. Mr. Speaker, I would like to offer my congratulations to Texas A&M University System Chancellor Dr. Arthur G. Hansen on the occasion of his receipt of the Texas National Guard Meritorious Service Award. This award was in honor of Dr. Hansen's service as chairman, Texas Committee for Employer Support of the Guard and Reserve, during the period of August 1982 through June 1985.

The citation for the award reads:

Dr. Hansen's leadership of the Committee was marked with accomplishments which enhanced the morale, well-being, public recognition and readiness of the Reserve Components of the U.S. Armed Forces. Beginning with commissioned service with the United States Marine Corps Reserve during World War II and the Korean War era, he has consistently made significant contributions to the national defense.

His appointment to the post of state chairman by Secretary Caspar Weinberger marked a capstone in a career spanning four decades of public service. In an academic career including presidencies of Georgia Tech, Purdue University, to the Chancellorship of the Texas A&M System, Dr. Hansen has remained a major advocate and supporter of campus-based officer procurement programs. He has been a major policymaker on defense-related programs at the Defense Science Board, Air University, and in senior advisory posts at the Department of Energy.

During his tenure as Chairman of the Texas Committee for Employer Support of the Guard and Reserve, Dr. Hansen has devoted countless hours resolving employer-related conflicts, developing active area subcommittees and promoting in the civilian community the value of the citizen-soldier concept. His exemplary accomplishments have greatly benefited the men and women of the Texas National Guard, the other Reserve Components and all of the citizens of Texas.

JANE'S FIGHTING SHIPS

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. BIAGGI. Mr. Speaker, the U.S. merchant marine, as we all know, is rapidly diminishing. But ours is not the only fleet in the world suffering from the practices of Soviet bloc countries and invisible trade barriers erected by other nations. The foreword to the latest edition of Jane's Fighting Ships (1985–86) points out the equally diminishing strength of the United Kingdom's merchant fleet. It states concerns that the United Kingdom would not be capable of meeting its NATO commitments in time of emergency.

At a time when Congress has been debating the necessity of continuing support for our merchant marine, I think the following extract from the Jane's foreword is particularly timely. It should serve to remind us that not only is the U.S. Fleet finding it difficult to remain competitive in today's international shipping markets, but also that the role of the U.S. merchant marine—as a vital national security asset—cannot be forgotten. Our Allies may not be there to help us make up the shortfall in merchant ships when an emergency arises.

The article follows:

[From the 1985–86 Edition of Jane's Fighting Ships]

MERCHANT SHIPPING

Bombardment with figures is a wearisome experience for most readers but, in the matter of merchant shipping, a very necessary one. The fact that 98% by weight of the trade of the democracies is carried by sea has a corollary—any nation, no matter how large, that depends on the sea to exist is an island. If the ships that carry that 98% are not maintained, the state of that island will be diminished.

Under normal domestic conditions the problem is not apparent to the public who see goods from a multitude of countries in their shops and send the exports of their industry to many lands. But a visit to their ports will add a twist to what appears to be a simple tale. In case of a Briton the number of ships registered in the United Kingdom will have diminished greatly over the last few years. Between 1970 and 1982 Britain's share of the world's merchant fleet fell by 50%. From 1982 to 1984 her tanker fleet was reduced by 18%, and breakbulk/general cargo ships by 26%. Unless this trend is arrested the British-registered Merchant Navy will be dissipated completely by 1993 and reliance will have to be placed on foreign or flag-of-convenience ships. This situation has come about, despite a welter of warning cries, because of a number of factors. Eastern bloc shipping companies, owned and pillowed by their states, can undercut Western rates by as much as 40%. British ships' running costs are high, so their companies are susceptible to lower rates. In a number of countries throughout the world maritime protectionism is the norm—own goods in own ships, own oil rigs serviced by own vessels. Lastly British ships often suffer from the twin evils of overmanning and industrial disruption. Whatever the reasons, the stark fact is that in 1982–84 the British Merchant Navy lost one and a half times the gross tonnage that Japan lost by submarine attack in the period December 1941 to August 1945. During the latter crisis the Japanese Cabinet was desperately concerned, but the British Cabinet showed no sign of flinching until 1985.

In the British Statement on the Defense Estimates, 1985 (White Paper, 1985) there is a somewhat tardy reference to the potentially disastrous situation that has been building up at an ever-accelerating pace. "It is of concern that, if the decline continues for several more years at the present rate, it could become increasingly difficult for us to discharge at least some of our NATO obligations." As a result of this discovery consultants are "to undertake a major study into the future trends of availability in those parts of the merchant fleet for which there is a defence need." No mention here of the country's security, merely defence, presumably one of the antique lessons relearned as a result of the Falklands campaign. Just for a moment let history help—in March 1943 three major convoys left Canada for the United Kingdom carrying 600,000 tons of general cargo, 150,000 tons of frozen meat, and 170,000 tons of oil products—nearly a million tons in but three out of the huge number of convoys which sailed to Britain in that year. Thus was the population nurtured as well as the armed forces. Rudyard Kipling spoke truly for the Big Steamers, "If anyone hinders our coming you'll starve."

This is not to say that the defence commitment is not considerable. C-in-C Fleet acknowledged that, without the support of the Merchant Navy, the Falklands campaign would have been impossible. Larger amphibious operations have claimed even greater support. The American invasion of Leyte in 1944 required an initial supply of 1.5 million tons of general equipment, 200,000 tons of ammunition, the same amount of medical equipment, and 235,000 tons of vehicles. The re-storing rate was to be 332,000 tons per month and, meanwhile, there were 836 warships to support. A larger expedition, that over the Normandy beaches in 1944, required three times the monthly quota of supplies which Leyte absorbed but the journey was a very brief one. Even if 100 cargo ships can lift one million tons that is still an impressive number, about one in every 25 of Britain's current total which also includes bulk carriers, oil tankers, and containerships.

One type of vessel which, with the aid of British government grants, will soon be absent from this list is the large deep-water trawler. In five years the total has dropped from 37 to what is, effectively, zero. Britain's fish now comes from a rapidly decreasing inshore fishing fleet and foreign deep-water trawlers. Now that this area of Britain's Merchant Navy has been effectively killed off, the Ministry (White Paper, 1985) remarks that "this has caused a shortfall in the number of trawlers for MCM [mine countermeasures] purposes." What this means is that not only will Britain be hard pushed to meet her minimum MCM takes in

a crisis, but also the country will become fish-less. The next time there won't be enough merchant ships to bring in snoek from South Africa even if the Civil Liberties lobby allowed such an import.

What has been said of the British mercantile fleet is equally true of those of the USA and Canada. The latter is conducting an investigation into (*inter alia*) the need for the government to encourage the expansion of the Canadian deep-sea fleet. As might be expected, such an expansion is oppposed by the shippers and exporters because of suspected higher costs and increased governmental control. On the other hand shipping companies and labour groups are in favour; it is hard to believe that altruism is their prime reason.

The other NATO countries are in much the same pickle, though it is of varying strength. The planners of the future will be wondering, if 50 years of European peace is achieved, not whether convoys are necessary but whether there are sufficient alliance merchant ships to form these convoys. Henry Kaiser did wonders with Liberty Ships in three years; a heightening of tension with a possibility of hostilities would give no such chance. All that will be left will be the people's bitterness towards those governments which failed to achieve any form of maritime policy.

HON B.F. SISK

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. COELHO. Mr. Speaker, I would like to take this opportunity to share with my colleagues an article which appeared in the Fresno Bee about my predecessor and mentor, the Honorable B.F. Sisk. He served in this body for over 24 years and I am sure you will enjoy reading some of the interesting observations he has to make.

[From the Fresno (CA) Bee, Sept. 22, 1985]

SISK'S CONGRESSIONAL EXPLOITS NO ACCIDENT

(By Jim Boren)

For a guy who claimed he was a political accident, B.F. Sisk played congressional politics at the highest levels for almost a quarter of a century.

The Sisk era began in 1954 and the congressman from Fresno became a force in the House of Representatives as the nation dealt with Sputnik, Vietnam, Watergate and providing water to Western farmers.

When he left Washington in 1978, Sisk had a reputation as a tireless legislator and a voice for reconciliation and moderation. He had worked intimately with six presidents and was a senior member of the House's most powerful committee.

But in early 1954, Sisk never suspected his professional career would take him on a path that included dealing with the nation's most serious problems. As the assistant manager of a tire company outlet, Sisk's biggest concern was getting the tire business of major San Joaquin Valley accounts.

But lawyer Kenneth Andreen and Charlie Clough, the editor of a labor paper, met with him one day to talk politics, not tires. They wanted a Democrat instead of a Republican representing Fresno in Congress.

"I just roared and about fell out of the chair," Sisk recalled. "I gave them the big haw haw."

A few months later, he gave Republican Oakley Hunter his congressional retirement papers.

"I was a political accident," said Sisk.

But it was no accident that Sisk stayed in Congress for 12 terms. The transplanted Texan started a winning streak on that cool election night in 1954 that would never end. Republican after Republican took him on, only to find him invincible.

Sisk was so tough that the Republicans made winners out of their losers, like Phillip Sanchez, former Fresno County administrative officer. Sisk beat him in 1970 so President Nixon made Sanchez director of the Office of Economic Opportunity and later an ambassador.

One of Sisk's major legacies is the San Luis Project, approved in 1960 to bring Northern California irrigation water to the arid west side of the San Joaquin Valley.

A survivor of the Dust Bowl with a Texas twang, Sisk acquired the name Tex almost as soon as he set foot in the San Joaquin Valley in 1937 and began working in the orchards around Cutler. Like the Okies and the Arkies, the Texans got less than a warm welcome from the natives.

"But we could be kind of brutal, too," said Sisk, recalling some of the gibes he hurled back in self defense.

He never will forget the first vote he cast, not on the floor of the House but as a young man in Texas. It was for Franklin D. Roosevelt.

His favorite president among the six he served with during his years in Congress was John F. Kennedy.

"I was a disciple of Camelot," he said. "I came to love that guy. I never felt more of a personal attachment for a president."

Sisk had gone to the 1960 Democratic National Convention in Los Angeles as a delegate committed to Lyndon B. Johnson.

"But once Kennedy was nominated, I did everything I could to help elect him," Sisk said.

With his fond memories, however, is the saddest one. He was at the airport in Washington the night of Nov. 22, 1963, when Air Force One flew in from Dallas with the body of the Assassinated president.

"That hurt me more then any one single thing I know of . . . when they brought him back and she had blood on her dress . . ."

Sisk also admired Johnson, not so much for his style, but for his accomplishments.

"In my opinion, he was a great president," Sisk said. "He did more for civil rights, education and for social programs than any other president in my 24 years."

But among House colleagues, Speaker Sam Rayburn of Texas stood out.

"He was my hero; always has been," Sisk said. "I guess blood was thicker than water. I was a naive freshman, a poor lost Texan. He did more for me than anyone."

Rayburn named Sisk to the select House committee on space, making him the junior Democrat on the body, along with junior Republican Gerald Ford. In 1961, Rayburn named Sisk to the Rules Committee, the most powerful body in the House.

Sisk made the best of every opportunity.

Unlike some colleagues, he knew when it was time to go home.

"You know, I never did get Potomac fever," the congressman said upon his retirement.

That may be the reason Sisk never had a serious re-election threat.

"The common people in his district will remember and love Bernie Sisk for his readiness to act as their ombudsman in dealing with gigantic government," says the Congressional Record, a book about Sisk's life.

MINORITY ENTERPRISE DEVELOPMENT WEEK

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. MAVROULES. Mr. Speaker, the land of opportunity has fulfilled its promise to several individuals being honored this week. Over two dozen minority entrepreneurs from across the Nation will be awarded for their achievements as part of Minority Enterprise Development Week. These people are proof that the American dream can still come true, and are a shining example to the 600,000 other small minority run businesses in the United States.

People of all nationalities are drawn to the United States by the promise of opportunities. Often, these promises are not met. Unfortunately, newcomers find they are at a disadvantage and cannot compete in the business world.

Our job, as legislators, is to ensure that everyone has equal access to opportunities in the marketplace. Although we cannot guarantee success to all ventures, we can guarantee a chance for each individual to prove his or her own capabilities. We are responsible for making this Nation truly the land of opportunity for everyone with a dream.

Being alert to the problems and difficulties that minority firms face is an ongoing process for us. We must do even more than that, however. We must take deliberate and gainful steps toward creating an environment that is favorable to small business and promotes their growth.

Set-asides and the 8(a) program of the SBA have made it possible to involve small and minority business in the Government procurement process. Of course these programs must be continually monitored and strengthened to ensure that they are accomplishing their intended objectives. Such programs allow minority firms to prove their capability through Government contracts, and then assist them to move successfully into the private sector.

I am pleased to be able to congratulate the award winners this week, and I extend a helping hand to all minority businesses in an effort to bridge the gap between the dream and the reality of economic success.

IN HONOR OF LOGAN R. COTTON, 1985 CITIZEN OF THE YEAR

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. LEVINE of California. Mr. Speaker, I rise today on behalf of Logan R. Cotton, an exemplary member of the Redondo Beach community who will be named Citizen of the Year by the South Bay Cancer and Health Foundation on October 25, 1985.

Born in Pennsylvania, Logan has lived in southern California for 60 years. Logan and his wide Della have been married for 68 years and have one child, two grandchildren, and seven great grandchildren. A graduate of the University of Southern California, Logan is a life member of the Alumni Association. He has taught accounting and economics at Loyola University. Logan is a former mayor and city councilman for the city of Hermosa Beach. He is one of 48 executives in the United States chosen to make an inspection trip of Radio Free Europe in the Iron Curtain countries. Logan has been and is active in numerous organizations including the Kiwanis Club, Salvation Army Board, South Bay Shrine Club, Al Maliakah Temple of the Shrine, the Redondo Beach Elks Club, City of Hope, and many others too numerous to mention. In 1975, he received the South Bay Citizen of the Year Award; he has received the "Others" Award from the Salvation Army and is not only being honored by the South Bay Cancer and Health Care Foundation, but is an active member and has served as chairman. Logan is also on the advisory board for the University of California at Domingues Hills. He has traveled extensively throughout Europe and Southeast Asia. It is a pleasure to share the outstanding accomplishments of Logan R. Cotton with my colleagues in the U.S. House of Representatives. I ask that they join me in honoring him on this special occasion.

THE BALANCED BUDGET AND EMERGENCY DEFICIT ACT OF 1985

HON. THOMAS F. HARTNETT

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. HARTNETT. Mr. Speaker, the Congress of the United States is about to raise the national debt ceiling to over $2 trillion. To put this figure in perspective, if one possessed a 4-inch stack of $1,000 bills, he would be a millionaire; however, to pay off our $2 trillion national debt, one would need a stack of $1,000 bills approximately 130 miles high. Regardless of this fact, Congress has demonstrated its lack of fiscal responsibility by passing a budget for fiscal 1986 that will result in a $180 billion deficit. This effort clearly demonstrates that the majority of Congress, on its own initiative, is not capable of regulating Federal spending.

Inevitably, my colleagues will argue that each spending program is vital for the prosperity of a specific group in our society. However, as the United States economy approaches a debt of $2 trillion, Congress must address the reality of uncontrolled Federal spending and its economic implications for all American citizens. Furthermore, this is not the time to increase taxes in order to finance our fiscal irresponsibility. Indeed, it is time for my colleagues to stop making toothless political promises and take real steps toward balancing our Federal budget.

For this reason, I have cosponsored the Balanced Budget and Emergency Deficit Act of 1985. Basically, this legislation would require Congress to reduce the deficit by specific amounts each year, culminating in a balanced budget by fiscal year 1990. I am asking my colleagues to end the current dog-and-pony show of writing a Federal budget and then passing endless exceptions to bypass the budgeted spending levels. The American people are disgusted by the idea of paying over $140 billion in fiscal year 1986 merely for the interest on our national debt. This legislation is our chance to eliminate the Federal deficit by 1990 and take the first steps toward reducing this ominous economic burden. I think it's time to show the American citizens that Congress can discipline itself by ceasing to spend taxpayer's money on each Member's favorite program and beginning to work for the national good.

The Federal deficit is the most significant problem facing the American taxpayer this decade. Meaningful legislation must be passed that eliminates this construction to continued economic growth. That is why I urge my colleagues to unify for the benefit of all Americans and pass the Balanced Budget and Emergency Deficit Control Act of 1985.

THE JOB SECURITY BANK ACT OF 1985

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. HAMILTON. Mr. Speaker, today, I am introducing the Job Security Bank Act of 1985. The emphasis of the program is to give the large number of workers displaced by imports the skills they need for jobs with long-term promise. Senator BRADLEY has introduced a companion bill in the U.S. Senate. Much of the language of the bill was incorporated in the reconciliation language recently reported by the Senate Finance Committee.

Trade-related problems are not new, but current trade deficits are unprecedented in recent U.S. history. The $123 billion deficit in 1984 was almost twice the $69 billion deficit in 1983. The 1985 deficit is expected to reach $140 billion or more.

The American economy has generated several million jobs since the trough of the recession in November 1982, but the bulk of these jobs have been in services. The sector most pressured by trade shortfalls, manufacturing, has recovered less than two-thirds of the jobs lost during the recession. Since the first of the year, manufacturing employment has actually fallen. As a result, thousands of American workers have the wrong skills in the wrong place.

The Job Security Bank is designed to give workers who have lost jobs to imports an opportunity to acquire new skills. Participants in the Job Security Bank will get vouchers to pay for up to $3,000 of training. Workers could use the vouchers for training by a new employer or in a certified program while still in a job that is likely to disappear.

For workers who have already lost their jobs, the job security bank offers an additional 3 months of unemployment compensation beyond the basic 26-week program. Workers have the option of taking the additional 12 weeks as a 50 percent supplement to their basic benefits. In either case, the worker will be able to draw unemployment benefits while participating in a certified retraining program. In addition, the job security bank will help with relocation expenses for a worker who has successfully landed a job in another part of the country.

To fund the job security bank, a small tariff would be levied on all imports. About 15 percent of the funds are expected to come from contributions by workers who have benefited from the program. Worker contributions would be determined by their starting salaries and by the size of the benefits they received under the program. The contribution would not exceed 8 percent of the portion of the worker's salary that exceeded the poverty level. The initial import levy would be set at two-thirds of 1 percent. After 2 years, the President would be allowed to raise the levy to 1 percent or to lower it if program needs permit. The President has 1 year to negotiate an agreement under the aegis of the General Agreement on Tariffs and Trade. After the 1-year negotiating period, the President would impose the fee unilaterally.

The country as a whole has gained from the growth in international trade over the past four decades. But there are costs from trade as well. The Job Security Bank Act of 1985 will offer new opportunities to workers displaced by imports while imposing extremely modest costs on the direct beneficiaries of trade. I commend it to my colleagues.

A TRIBUTE TO JAMES CASTLE TURNER, JR.

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. DYSON. Mr. Speaker, I rise today to honor J.C. Turner, a man who has spent a lifetime of service to his fellowman, never

wavering in his commitment to the principles of human dignity and equality. Mr. Turner, recently retired from the presidency of the 370,000-member International Union of Operating Engineers, has for 50 years challenged the powers that be to open the doors of opportunity to all Americans.

A true visionary, Mr. Turner has long been an eloquent and passionate voice in the American labor movement. Just as Mr. Turner has championed the cause of labor, he has also struggled to eradicate poverty and prejudice from our society. In his relentless quest to improve the human condition, Mr. Turner has opined that "the labor movement is a movement of ideals," and for Mr. Turner, no other ideal has been more of a motivating force than the ideal of justice.

As a nationally known labor leader, Mr. Turner has held many distinguished positions including AFL-CIO vice president; Democratic National Committee member; D.C. City Council member; and longtime head of the Washington Central Labor Council. Never content to rest on the laurels of past achievement, Mr. Turner has engaged his energies in a panopoly of public interest projects such as the Washington Housing Association, the Clearing House on Slum clearance, and the Criminal Justice Association. At present, Mr. Turner serves as treasurer of the National Leadership Conference on Civil Rights and as a trustee of the National Urban League.

In many ways, J.C. Turner exemplifies the hope and promise that has made our country great—a spirit of compassion; the belief that we should offer a hand to those less fortunate than ourselves simply because it is the right thing to do; that to stand idly by in the face of injustice, is to condone injustice; that people should be judged not by the color of their skin but by the content of their character; and most of all, that we should dare to dream.

TEXAS A&M UNIVERSITY'S PRO PATRIA AWARD

HON. JOE BARTON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. BARTON of Texas. Mr. Speaker, I would like to pay tribute to Texas A&M University as 1985 recipient of the Department of Defense PRO PATRIA Award. This prestigious award of the Assistant Secretary of Defense for Reserve Affairs is authorized one per State, annually. The PRO PATRIA is presented on behalf of the men and women of the Guard and Reserve for distinguished contributions through exceptional support of the Guard and Reserve. Its presentation recognizes the superior achievement of the recipient in contributing to service to the Nation.

Texas A&M University's civic achievement, union of civil and military tradition and dedication to the well-being of the Nation have been well recognized by the PRO PATRIA.

REWRITING THE ABM TREATY

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. MARKEY. Mr. Speaker, this morning's Washington Post reveals that the Reagan administration wants to revise the established legal interpretation of the ABM Treaty's restrictions on testing and development of space-based ballistic missile defense systems. Senior administration officials, including National Security Adviser Robert McFarlane, now claim that the treaty "authorized and approved" testing and deployment of star wars defenses.

But article V of the ABM Treaty clearly states that—

Each party undertakes not to develop, test, or deploy AMB systems which are sea-based, air-based, space-based or mobile land-based.

Both the United States and the Soviet Union have interpreted this provision to mean just what it says—neither side can test, develop, or deploy anything but the fixed, land-based ABM systems provided for under article V of the treaty.

The Reagan administration agreed with the established interpretations of article V until just this week.

In its 1985 arms control impact statement, the administration reported that—

The ABM treaty prohibition on development, testing and deployment of space-based ABM systems, or components for such systems, applies to directed energy technology (or any other technology) used for this purpose. Thus, when such directed energy programs enter the field testing phase they become constrained by these ABM Treaty obligations.

In its 1986 impact statement—released last April—the administration restated the standard interpretation, reporting that—

The ABM Treaty prohibition on development, testing and deployment of sea-based, air-based, space-based, or mobile land-based ABM systems, or components for such systems, comes into effect when such ABM systems or ABM components enter the field testing stage.

Now the administration has changed its mind. Apparently, some officials within the administration have decided that they no longer want the United States to be bound by article V of the ABM Treaty. So what have they done? They have started to reinterpret the treaty, arguing that agreed statement D exempts star wars from article V's prohibitions.

This may be the most pernicious interpretation of a legal requirement since Plessy versus Ferguson—when the postreconstruction Supreme Court decided that Jim Crow laws were consistent with the 14th amendment to the Constitution. ABM Treaty Negotiator Gerard Smith notes:

It is just impossible that an agreed statement supersedes a provision of the treaty.

Agreed statement D was never intended to exempt exotic space-based ABM technologies from the treaty's prohibitions. Just this morning, SALT I legal advisor John Rhinelander informed me that—

Agreed statement D was explicitly understood by both negotiating partners to confirm that development and testing of fixed land-based exotics (i.e., ground-based lasers) was permitted, but deployment was not. This mirrored the treaty text in article III. It did not add to or detract from the obligations assumed under article V. The negotiating record is crystal clear on this point. Agreed statement D refers to and interprets only article III, not article V.

The kind of legal chicanery that McFarlane and others in the administration are resorting to can only hurt our credibility as an arms control negotiating partner. It is particularly disturbing that this kind of shenanigan is taking place when the United States is just a few weeks away from the Geneva summit, where limitations on star wars testing and development will be one of the main items up for discussion. I can only surmise that the purpose of rewriting the ABM Treaty is to take the issue of star wars testing off the table at Geneva. No doubt there are some irresponsible administration officials who would relish such an outcome, but cooler heads must be aware that completely insulating SDI from arms control is not worth the political and military price of no restraints on Soviet offensive arms and a swift disintegration of the ABM Treaty.

Mr. Speaker, I would like to call the attention of my colleagues to the aforementioned Washington Post article.

[From the Washington Post, Oct. 9, 1985]

WHITE HOUSE REVISES INTERPRETATION OF ABM TREATY

(By Don Oberdorfer)

The Reagan administration, reversing the legal interpretations of previous administrations and some of its own past statements, has decided that testing and development of exotic antiballistic missile systems such as those in the "Star Wars" program are permitted under the 1972 ABM treaty.

The administration's new interpretation of the treaty was confirmed yesterday by a senior White House official who briefed reporters on U.S. objections to the recent Soviet offer of a 50 percent cut in certain offensive missiles in return for a ban on Reagan's Strategic Defense Initiative, or Star Wars. The Soviet offer was described in the briefing as "a place to start" but in its present form one-sided and threatening to U.S. security.

White House national security affairs adviser Robert C. McFarlane volunteered a new interpretation of the 13-year-old Antiballistic Missile Treaty in a television program Sunday. Yesterday the senior White House official, who cannot be identified under the ground rules of the news briefing, confirmed that McFarlane's televised remarks reflected what is now the fixed policy of the administration.

Retired ambassador Gerard Smith, chief U.S. negotiator of the ABM treaty, said the administration's interpretation "makes a dead letter" of the treaty. Smith said he believes it would make possible almost unlimited testing and development under Star Wars, and probably also actual "building" of the space-based antimissile system "as long as you did not deploy."

Administration sources said a new interpretation of the treaty had been under discussion and, at times, intense debate since last summer within the administration's Senior Arms Control Group, or SAC-G.

The administration was moving in the direction indicated by McFarlane in recent weeks—though not to the point of claiming the treaty "authorized and approved" the testing, which were in words McFarlane used Sunday. In administration discussions, sources said, the issue was whether the treaty could be interpreted as permitting such activities. A final decision was "not completely clear" even after McFarlane made his remarks on "Meet the Press," an official said.

One official said the still-secret negotiating record of the ABM treaty is "ambiguous" on the point in question and subject to "a well justified disagreement" within the government. However, this view is disputed by Smith and John Rhinelander, legal counsel to the U.S. delegation that negotiated the ABM treaty.

The nub of the issue is whether an "agreed statement D" between the U.S. and Soviet delegations at the time of the treaty signing on May 26, 1972, gives a broad exemption from the restrictions of the treaty for future types of ABM systems "based on other physical principles" such as lasers and directed-energy weapons. Many elements of the administration's Star Wars research program are based on such exotic technology.

The purpose of agreed statement D, it said, was "to insure fulfillment of the obligation not to deploy ABM systems and their components except as provided in Article III of the treaty," which originally allowed both countries to maintain two conventional ABM systems, based on antimissile missiles.

The agreed statement said that if new ABM systems "based on the other physical principles" are created in the future, "specific limitations on such systems and their components would be subject to discussion . . . and agreement in accordance with Article XIV of the treaty"—the article explaining how the treaty could be formally amended.

Until the administration's recent change of mind, that had been interpreted to mean that testing and development of exotic technologies were not legal, except possibly for new versions of fixed, land-based systems that the treaty allowed. Article V of the treaty formally precluded any testing or deployment of "ABM systems or components which are sea-based, air-based, space-based or mobile land-based."

Previously the administration's plans for tests of elements of Star Wars have been justified as complying with the ABM treaty on completely different grounds: that these projects were of such low quality, power or reliability that they did not qualify as "components" of an ABM system, or that they could be modified so as not to appear to be part of an illegal system.

Smith and Rhinelander said it was wrong to interpret the "agreed statement" as sanctioning testing of ABM systems or components that are flatly ruled out elsewhere in the treaty. "It is just impossible that an agreed statement supersedes a provision of the treaty," Smith said.

The administration's 1983, 1984 and 1985 Arms Control Impact Statements submitted to Congress by the Arms Control and Disarmament Agency took the position that the ABM treaty does put restrictions on ABM programs based on "directed energy technology" or other exotic technology "when such DE programs enter the field testing stage." The 1986 Arms Control Impact Statement, submitted this April, omitted that statement.

The senior official who confirmed the administration's current position said the Soviet Union had never accepted an interpretation of the treaty that banned "research, testing, development of systems based on other physical principles."

The official said there had been "unilateral statements" made that the treaty ought to limit such exotic systems but he added that "never have the Soviets bought that."

The proposed cutbacks in the new Soviet arms control offer are "inappropriately linked" to the demand that the United States stop its Star Wars program, the senior official told reporters yesterday. "It's a precondition that must be dropped," he said.

That the Soviets have made an offer of deep cuts is "a very good development," and a sign that Reagan's policies have paid off, the official said. U.S. negotiators will pursue the details in Geneva, he added.

Most of the White House presentation, though, was centered on objections to the Soviet proposal, especially inclusion of U.S. Euromissiles and "forward based systems" among the strategic weapons to be cut by half. This would produce "highly unequal" forces with great advantages to Moscow, the official said.

Those two categories, described as support for U.S. allies, were said to consumer 1,149 of the U.S. entitlement of 1,680 strategic nuclear delivery systems under the Soviet plan. The United States would thus have only 531 missiles or bombers left for deterrence against Soviet nuclear attack, and these would be threatened by a much larger number of Soviet weapons.

The White House also said the Soviet proposal might unfairly hamper U.S. military modernization and could have serious verification problems. These aspects of the Soviet proposal have yet to be fully presented in Geneva it said.

TRIBUTE TO JOHN W. SNYDER

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. SKELTON. Mr. Speaker, it is with heavy heart today that I rise to pay tribute to a man who played a major role in the reconstruction of America and the world after World War II. That man is the Honorable John W. Snyder who died at his home yesterday at the age of 90.

Mr. Snyder, who served President Truman as Secretary of the Treasury and confidant, helped develop the Marshall plan and Truman doctrine assistance programs. He also served as a member of the North Atlantic Treaty Organization Council from 1949 through 1953.

Secretary Snyder's close relationship with President Truman began after World War I when he returned from fighting in Europe and remained in the Army Reserve. Later, he moved to St. Louis, became active in banking and became regional director of the Reconstruction Finance Administration. His career included becoming the executive vice president and director of the Defense Planning Corp. and joining the First National Bank of St. Louis. As an early supporter of President Truman's bid for the Senate, Snyder helped him develop a committee to investigate the awarding of defense contracts, gaining national prominence and which positioned President Truman to accept the Vice Presidential nomination in 1944.

Under President Truman, Secretary Snyder served as Federal Loan Administrator, Director of the Office of War Mobilization and Reconversion, and finally, without consultation, was named Secretary of the Treasury. John W. Snyder served America well with what many called "good financing," providing surplus revenues and, when necessary, acquiring cheap debt. He and President Truman felt that financing the Federal Government was little different than financing a county in Missouri.

The Honorable John W. Snyder also served as an active chairman of the Truman Scholarship Foundation which he helped develop until last fall, and only recently, I had the pleasure of serving with him on the Truman Centennial Committee to commemorate the 100th birthday of our President. John W. Snyder played an active role on that committee and often talked with great fondness about the days of serving for the President.

I was fortunate to have known this great man and I know my colleagues join me in sending our condolences to his family.

CONTINUING VIGIL FOR HUMAN RIGHTS IN THE SOVIET UNION

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. WAXMAN. Mr. Speaker, with the summit meeting in Geneva between President Reagan and Soviet Premier Gorbachev drawing near, I am joining many of my colleagues in calling attention to the plight of Soviet Prisoners of Conscience. I have a special connection to one—Mark Otcheretyansky of Moscow—because my wife Janet has adopted him and is corresponding with him regularly.

Mark Otcheretyansky is only one of tens of Prisoners of Conscience in the Soviet Union. Mark and his family—wife, Olga and son, Alexander—first applied for an exit visa in May 1979. At the end of September 1979, Mark and his family received permission to emigrate to Israel; they sold all their belongings and paid for their visas. However, 1 week before collecting the passes, Mark was accused of "stealing state property" at his former place of work, a construction site. After an 8-month detention, he was brought to trial and accused of "abusing his position." Mark was sentenced to 1 year of hard labor, but was released after 3 months.

On March 23, 1981, he again applied to emigrate at OVIR headquarters in Moscow, and received a final refusal. On April 30, 1984, Mark was again arrested, this time for "violation of passport laws" since he had refused to reclaim the passport submitted for his original emigration application. His refusal to reclaim the document appeared to be a symbolic renunciation of Soviet citizenship, made to stress his desire to leave.

The story of this second imprisonment, ends happily—and thus is quite unusual. Unlike so many other prisoners of Conscience, Mark was released 3 months after his arrest. While we cannot be sure that my wife's adoption of Mark played a part in his release, we do know that the Soviets notice which prisoners attract high-level attention abroad, and we presume that it affects their treatment.

The Final Act of the Helsinki conference, which the Soviet Union signed, says that "everyone has a right to leave any country, including his own, and return to it." If this in fact is the right of every person in the Soviet Union, why have only a tiny proportion of the 400,000 Jews that have asked to emigrate been allowed to leave? I believe the Soviet Government should adhere to its obligations and we should help hold them to it.

My wife Janet anxiously awaits a response from Mr. Otcheretyansky to her most recent letter. Once his safety and well-being and that of his family are confirmed, Janet plans to adopt another Prisoner of Conscience. She will continue as long as necessary to be a voice of hope for these prisoners.

VIRGIN ISLANDS ENACTS LEGISLATION CONDEMNING RACIST POLICIES OF GOVERNMENT OF SOUTH AFRICA

HON. RON de LUGO

OF VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. DE LUGO. Mr. Speaker, I would like to bring to the attention of my colleagues in the House of Representatives, Resolution No. 1227 (bill No. 16–0202), passed by the Virgin Islands Legislature.

Bill No. 16–0202, sponsored by Senator Eric Dawson, vice president of the legislature and cosponsored by Senators Allan Paul Shatkin, Ruby M. Rouss, Lorraine Berry and Iver Stridiron, "condemns the racist policies of the Government of South Africa; supports Senate bill No. 635 which expressed the opposition of the United States to the system of apartheid in South Africa; and supports House bill No. 1460 which, among other things, would prohibit the importation of South African Krugerrands into the United States."

As a part of the world community that advocates freedom and democracy, the people of the Virgin Islands abhor the racist policies of the South African Government, and have long felt a sense of camaraderie with and brotherly affection for the people of South Africa. This was the motivation that led the Legislature of the Virgin Islands to enact this resolution. The resolution that we have before us today expresses our support for the people of South Africa in their struggle against a racist regime and urges the United States Government to abolish its policy of "constructive engagement" and bring greater pressures upon the South African Government to abolish its apartheid policy.

I am proud to have been one of those arrested outside the South African Embassy in January of this year. Although the arrest of those individuals who feel the moral outrage of apartheid, continues on a daily basis, much remains to be done.

I therefore urge my colleagues in the United States Senate to pass Senate bill No. 635, and represent the will of the American people by informing the South African Government in no uncertain terms, that we abhor apartheid and its racist policies, and will not support such a system.

AMENDMENTS TO FARMLAND PROTECTION POLICY ACT

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. JEFFORDS. Mr. Speaker, I am offering today an amendment to the Farmland Protection Policy Act [FPPA], a provision of the 1981 farm bill.

With passage of the FPPA, Congress intended to direct Federal agencies to consider the adverse impacts that their various projects may have on prime farmland. USDA was given the lead role in developing the necessary guidelines and in monitoring their implementation. The need for this act was indicated by the results of the then recently completed National Agricultural Lands Study. NALS identified over 90 Federal programs whose actions caused the irreversible conversion of some of our Nation's most highly productive cropland to nonagricultural use.

The 1985 farm bill is attempting to address several important resource conservation issues involving agriculture. It proposes to place 25 million acres of highly erodible cropland into a long-term conservation reserve. It requires farmers who wish to continue to receive Federal Farm Program benefits to farm their land in such a fashion that soil erosion will be controled. In both cases, the committee is dealing with land that should never have been brought into production, but was plowed out because of the Farm Program benefits that could be had by owners who added this kind of poor quality land to their cropland base. At the same time, Federal projects and incentives have destroyed millions of acres of prime agricultural land—the type of land which is not erosive and will produce high yields indefinitely if managed properly. We have, in effect, been destroying highly productive land and replacing it with land of poor quality. My amendment will round out the committee's conservation effort by getting the Federal government out of the farmland busting business.

The FPPA was designed to get the Federal Government out of the business of subsidizing the destruction of our best farmland. It is a simple and straightforward law. Nonetheless, USDA has not enthusiastically sought to implement it. The Agriculture Department took almost 3 years to issue the rules for other Federal Agencies to follow in implementing the act. This is unfortunate in light of the interest shown by the State and local governments in conserving their farmland. When the NALS was completed in 1981, about one dozen State governments had farmland conservation programs or policies and about 270 local governments had their own programs. This has grown dramatically in the last 4 years as the attached chart demonstrates. Now over 20 States have policies or programs and almost 600 local units of government have developed their own conservation programs. The reason for this tremendous growth at the State and local level can be traced to a number of factors. First of all, farmland conservation is an important element in strengthening agriculture at the local level. All good farmland conservation programs are designed to keep agriculture economically sound through the use of lowered real estate taxes, tax credits, protection from actions by eminant domain, purchase and transfer of development rights, and many other approaches. Increasingly, many local governments are noting that agriculture is really a composite of many industries ranging from those which provide input supplies and services required by production agriculture, to those which process, distribute, and market farm commodities through the food chain. Many businesses are not classified agricultural, but do a significant amount of business with farmers and the agricultural sector: insurance companies, utilities, trucking firms, and lenders. These relationships define the term "rural communities." Their importance is indicated by the serious economic difficulties that many of our agricultural communities are facing because of the serious financial difficulties their farmers are experiencing.

The same rural communities are also recognizing the exorbitant cost of sprawled development. Recent studies in a number of counties have shown that transportation, water, sewer, police and fire protection are much more costly to provide when development is scattered throughtout the farming areas of a county.

All of this points up the fact that the Federal Government ought not run roughshod over States and local communities which wish to protect the economic base that their agriculture represents. USDA's less than enthusiastic effort to implement the FPPA has prompted me to offer this amendment in order to protect the interests of communities which are trying to conserve their farmland base.

The amendment will do two things. First, it will require USDA to submit a report annually to the Congress, beginning in 1987, on its progress in implementing the FPPA. This will give us the opportunity to see if the various Federal agencies are complying with the intent of the law.

Second, the amendment will allow Governors of States which have local farmland conservation policies and programs to intervene in Federal court in those instances where Federal actions threaten to contravene local farmland conservation policies. This will allow those States which are interested in conserving their farmland to get the Federal Government's attention in those cases where a Federal project will destroy what the State considers to be an important part of its agricultural base.

The adoption of this amendment will improve the implementation of the FPPA. There is no cost to it.

The conservation of our prime agricultural land by the States is a long-range resource goal that the Federal Government should not obstruct. In the last decade we have seen the wasteful results of crop production on fragile land. The soil erosion that it has created has cost the taxpayer billions of dollars. The least we can do is to make sure that the Federal Government is not putting our most productive land under concrete when reasonable alternatives exist.

INCREASE IN THE NUMBER OF STATE AND LOCAL FARMLAND PROTECTION PROGRAMS SINCE 1980

Type of program	Number of programs in 1980		Number of current programs—1985	
	State	County (municipal)	State	County (municipal)
Statewide farmland protection policies (similar to Federal FPPA)	1		13	
Right to farm laws (farmer protection against nuisance suits and operating restrictions)	17		45	
Property and income tax incentives to keep land in agriculture	45		49	
Agricultural districting	4		7	
Purchase of development rights	4	5	7	17
Transfer of development rights		12		23
Agricultural zoning (22 States authorize ag. zoning)		270		552

Note.—Farmland acreage protected under these various programs has increased from 25,000,000 acres in 1980 to almost 80,000,000 acres in 1985.

Source: NALS.

DEDICATION OF POINT REYES WILDERNESS TO PHIL BURTON

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. MILLER of California. Mr. Speaker, I recently had the pleasure of attending the dedication of the Point Reyes Wilderness area to the memory of our late colleague, Philip Burton.

I would like to share with the Members of the House the remarks that were delivered by former State Senator Peter Behr. I think that they truly captured the spirit, the courage, and the essence of Phil.

For his widow, Congresswoman SALA BURTON, for his brothers, John and Bob, the dedication of this great wilderness area to Phil's memory and achievements is a wonderful tribute.

THE MEANING OF THE OCCASION

There is an inscription in London's St. Paul's Cathedral to honor its great architect, Sir Christopher Wren; which reads: "If you would see his monument look around."

As you enter our national parks or wilderness areas this inscription becomes a fitting tribute to Phillip Burton, for he was their greatest champion and benefactor.

The 1978 Omnibus Parks Act, nicknamed "The Burton Bill" by friends and foes alike was one of the most sweeping pieces of environmental legislation ever to pass the Congress. It more than doubled wilderness acreage in the National Parks system, created or expanded thirty-four parks eight scenic rivers and four national trails, and was the unique product of a superb legislative craftsman. As the New Republic said about Phil Burton:

"He worked, laughed, drank, smoked, swore, and politicked to excess." He could close the unlikely deal, build the unusual coalition, promote the appropriate spokesman, badger and bully the leadership, and whip the votes into line for ends he believed to be in the national interest."

Just one example: When canvassing his colleagues for land in their districts they wanted included for parks under his 1978 Omnibus Parks Bill, Phil ran up against a hostile Oklahoma member of the House from an oil-rich area.

"You've got nothing for me here", he was told. "The last thing I want is land taken out of production." A quick reply salvaged his vote, "That's a promise—no parks in your district."

Phillip Burton died of a heart attack on April 10, 1983, at the age of 56. He successfully defended the 2.3 million-acre California Wilderness Bill, H.R. 1437 against weaking amendments. On April 13, three days after his death, it was passed overwhelmingly as a final tribute to him by his colleagues in the House of Representatives.

There is little doubt that the compromise bill, enacted on September 17, 1984, which added an additional 1.4 million acres to California's National Park wilderness acres, was due in good measure to Phil Burton's earlier efforts. And many of us believe it would have contained more acres if Phil had been with us. Even in the United States Senate he was an elemental force.

His list of accomplishments in conserving California's environmental heritage are to a considerable degree the conservation history of our state in the past two decades, beginning when he entered Congress in 1964: The Point Reyes National Seashore, the Golden Gate National Recreation Area, the Santa Monica Mountains National Recreation Area, expansion of the Redwood National Park and the Protection of the Channel Islands and Lake Tahoe, to name some of the major ones.

Phil Burton, during his long career in Congress, put all his immense energy and know-how into the achieving of results he cared deeply about. He never went out of his way to seek press coverage or public recognition. He never received his due in this regard—and that was all right with him.

This was never more evident than the part he played in one of the greatest and most complex pieces of environmental legislation to become law in our generation, the Alaska National Interest Lands Conservation Act, signed into law on December 2, 1980.

Phillip Burton was the inspiration, the mentor, and the Master Legislative Mechanic for Representative John Seiberling, who chaired the special Alaska House Subcommittee which drafted the legislation.

At every point in the three year battle, when crucial decisions were being made, Phil Burton was there. He was involved; he was needed, and his advice was needed.

So today we also offer our thanks for the 100 million acres of parks, wildlife refuges and wilderness created by the Alaska Act, and the involvement of Phillip Burton in the legislative strategy and tactics that made it possible.

Phil Burton was a consummate politician, but he used his skills, his energy, and his passion for the best reasons: not only for the environment, but for social justice and for peace. To people in need or at risk, of all colors, tendencies, and backgrounds, he would often say, "You are in your mother's arms." And so were we, in the good years when he was with us.

I will read now from the 1983 Ansel Adams Conservation Award, given posthumously to Phillip Burton on May 24, 1983 by the Wilderness Society:

"To Phillip Burton, the strong voice in the wilderness, the great bear with the golden heart, because future generations will find your magnificient legacy in the wilderness, parks, trails, and wild rivers you left for them; because you will live as long as the green meadows and hills that stretch out from the Golden Gate and as long as the redwoods stand; because you believed enough to live it, you loved enough to fight for it, and because you gave it your all."

Like a great tree which falls in the forest, Phil Burton's passing has left "a lonely place against the sky." This encompasses much of the meaning of this ceremony for it is, after all, a time to remember, and a time to be grateful.

LINDERO CANYON MIDDLE SCHOOL RECEIVES COMMENDATION

HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Ms. FIEDLER. Mr. Speaker, I would like to take this opportunity to commend Lindero Canyon Middle School, located in Agoura Hills, CA, in my district, for receiving recognition in the Secondary School Recognition Program sponsored by the U.S. Department of Education. Out of a total of 42,000 public secondary schools nationwide, Lindero Canyon Middle School was one of only four middle schools in California to receive this commendation. The school has received a plaque and a special flag denoting "Excellence in Education."

The award program began 3 years ago, and its purpose is to recognize public and private secondary schools that have both achieved and maintained excellence in educational programming. Chief State school

officers nominated 509 schools from across the Nation. A portion of these schools were then recommended for 2 day site visits in order to see the educational programs in progress and get a feeling for the overall spirit of the school itself. Two 18 member panels then judged both the reports of the site visits and the written application based on several criteria.

Lindero Canyon Middle School was judged on several attributes and indicators of success set forth by the program. The attributes include rewards and incentives for both teachers and students; careful monitoring of student success; opportunities for student responsibility and participation; and community support and involvement. Lindero Canyon offers several programs to promote academic achievement, citizenship, and positive attitude. The school also promotes achievement in music, art, and drama. The faculty has had more teachers honored in the Teacher of the Month Program than any other school in the school district. Lindero Canyon has also been successful in monitoring the success of its students through written and oral reports, and by encouraging students who have mastered programs, to further challenge themselves. Students are also given the opportunity to participate in student government and school-related community activities.

Despite obstacles created by a decline in educational funds, Lindero Canyon Middle School, through the inspiration of its administration and professional dedication of the staff, has provided a high quality of instruction and constantly strives for professional growth and excellence.

Its success in the pursuit of a high quality of education has been clearly demonstrated by the fact that they have a 95-percent student attendance rate as well as a 96-percent teacher attendance rate; 95 percent of their students scored in the top two quartiles in math, 85 percent in reading, and 89 percent in languages on the C.T.B.S. tests.

Aside from indications of academic success, it has demonstrated success in its musical programs, received numerous music festival awards, and achieved a record number of students chosen to participate in the Southern California Honors Band. The faculty has proven their high standards through active involvement in school programs, and have received distinctions as outstanding educators. The students themselves have received numerous performance awards in math, spelling, and public speaking contests and honors in a wide variety of athletic events.

After having visited Lindero Canyon Middle School and having spoken to both students and educators during their trips to Washington, DC, I am convinced of the worthiness of this fine academic institution as a recipient of the Secondary School Recognition Program. I am happy to say that two graduates of Lindero Canyon Middle School are currently employed as members of my Washington staff. These two young women represent the high standard of excellence that Lindero Canyon Middle School has fostered and maintained.

COWLITZ TRIBE OF INDIANS COMPENSATION

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. BONKER. Mr. Speaker, I am today introducing legislation with my colleague, Congressman NORM DICKS, to provide for the disposition of funds appropriate to pay a judgment in favor of the Cowlitz Tribe of Indians in Indian Claims Commission Docket No. 218.

During the treaty-making period of our country, the United States entered into treaties with various Indian tribes whereby the tribes ceded their lands and certain attendant rights to the Government. In return, the Government generally agreed to make money payments to the tribes and set aside certain lands for their exclusive use (e.g., reservations). The Cowlitz Tribe of Indians never entered into a treaty with the United States and, thus, (1) never received money payments for their aboriginal lands, which nonetheless were taken by the Government, or (2) had lands set aside for their use.

On August 13, 1946, (25 U.S.C. 70, et seq., legislation was passed that established the Indian Claims Commission ["ICC"] which provided for the first time a systematic procedure whereby Indian tribes could seek monetary compensation for the taking of their aboriginal lands. The Cowlitz filed a claim pursuant to the act, which was docketed as ICC No. 218, Cowlitz Tribe of Indians versus United States.

The Cowlitz ICC litigation was conducted in two phases. The first was solely concerned with determining the data on which the Cowlitz aboriginal lands were taken, which date was fixed at March 20, 1863. The second phase dealt with valuing the lands as of the date of taking; phase II was concluded on April 12, 1973, with the execution of a compromise agreement fixing value at $1,550,000 for the taking of the Cowlitz aboriginal lands "without benefit of treaty or compensation." This sum of money was appropriated in the name of the Cowlitz Tribe by the act of July 1, 1973 (87 Stat. 99), and since that time the funds have remained on deposit with the U.S. Treasury. At this time, the judgment fund has grown to approximately $3,500,000.

Mr. Speaker, the bill we are now introducing would effect the release of these funds to the Cowlitz Tribe who have been waiting for over 12 years now. I am certain that the distribution plan contained herein has the full support of the Cowlitz Tribe and is and completely equitable to all concerned Cowlitz Tribe members.

THE ADMINISTRATION'S REDEFINITION OF ABM TREATY RESTRICTIONS UNDERMINE BOTH ARMS CONTROL AND OUR NATIONAL SECURITY

HON. NORMAN D. DICKS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. DICKS. Mr. Speaker, I rise to express my deepest concern with the action taken by the administration to unilaterally interpret the ABM Treaty out of existence. The recent statements by administration officials, designed to give a free rein to star wars testing are nothing short of irresponsible in my judgment.

The Reagan administration's new interpretation of the ABM Treaty undermines U.S. security. It accelerates erosion of the ABM Treaty instead of reversing it. It is contrary to assurances made by this administration to the Congress and our allies. It is contrary to the letter and the spirit of the ABM Treaty as explained by every previous administration—including this one. It enormously simplifies Soviet breakout from ABM Treaty constraints, and it destroys the United States case that the Soviets have violated the treaty by disingenously interpreting its provisions.

The administration's report to the Congress on the strategic defense initiative, submitted in March of this year, clearly states that there are three basic types of activity that are permitted in compliance with the ABM Treaty.

The first of these is conceptual design or laboratory testing. In the March 1985 report, the administration cited the testimony of Gerard Smith, chief negotiator of the treaty stating:

The prohibition on development contained in the ABM Treaty would start at that part of the development process where field testing is initiated on either a prototype or breadboard model. It was understood by both sides that the prohibition on "development" applies to activities involved after a component moves from the laboratory development and testing stage to field testing.

Smith went on to note in his cited testimony that the allowance of these early stages of the development process were the result of problems for verification by national technical means. These provisions apply to ABM systems or components based on other physical principles as well.

The second and third areas of permitted activity according to the earlier administration report were testing of devices that are not ABM components or prototypes of ABM components, and field testing of fixed land-based ABM components.

I strongly disagreed with the judgments made by the administration on whether particular planned tests would comply with these criteria, but at least they attempted to justify their program against the clear language and intent of the treaty. Now they are attempting to rewrite the treaty. The administration must have felt that because

such activities could not in fact be justified as ABM Treaty compliant on the merits, the only way they could go forward with them was to unilaterally redefine the treaty itself. We don't concede to the Soviets the right to redefine existing arms control agreements to their own liking and we should apply the same standards to our actions.

The conference report on the Fiscal Year 1986 Defense Authorization Act includes a provision expressing a sense of the Congress that funds approved for SDI do not express or imply an intention that the United States should abrogate, violate, or otherwise erode the ABM Treaty. It is increasingly clear that if congressional intent is to be preserved, we are going to have to be very specific in regard to how SDI funds can be used. If the administration thinks it can define the ABM Treaty out of existence it is going to be up to the Congress to make sure that the treaty's integrety is preserved and the previously stated policy of this and the last three administrations is continued.

ALIENAGE V. NATIONAL ORIGIN DISCRIMINATION: IS IT THE SAME?

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. TOWNS. Mr. Speaker, earlier in today's remarks I submitted the testimony of our colleague, ROBERT GARCIA on the employer sanctions provisions of the immigration bill, H.R. 3080. I believe that it is important that the House understand the difference between alienage discrimination and national origin discrimination. There is often a fine line between these two issues which could become a major civil rights issue if employer sanctions are enacted.

I found the testimony of the former Chairman of the U.S. Civil Rights Commission, Dr. Arthur Flemming, helpful in discussing the differences between the two kinds of discrimination and the protections against such discrimination which currently exist in the law. I want to stress that contrary to popular belief concerns about discrimination are not being offered merely as a means of opposing the bill. These concerns are real. For example, while legislation was not enacted last year, one State's EEOC office found that a company had asked only its Hispanic employees to verify that they were legal residents or U.S. citizens. This action was taken in anticipation of sanctions being enacted.

Consequently, I believe that we must seriously consider Dr. Flemming's warnings that the current provisions in the immigration bill are insufficient to protect against this kind of discrimination. He also indicates that current law is ineffective against employment discrimination which does not fit into the current limitations of EEOC coverage. Hopefully, his testimony, which I have submitted below, will serve as a further explanation of alienage versus national origin discrimination.

[The article follows:]

TESTIMONY OF DR. ARTHUR S. FLEMMING BEFORE THE HOUSE SUBCOMMITTEE ON IMMIGRATION, REFUGEES AND INTERNATIONAL LAW AND THE SENATE SUBCOMMITTEE ON IMMIGRATION AND REFUGEE POLICY, OCTOBER 9, 1985

Mr. Chairman, members of the Subcommittees, I am Arthur S. Flemming. I am pleased to testify before you today on the important issue of employer sanctions and employment discrimination against U.S. citizens, lawful permanent resident aliens, refugees and other persons authorized to reside and work in the United States. Accompanying me is Sonia Jarvis, Managing Attorney with the Center for National Policy Review.

The testimony I present today sets forth my personal views. These views are consistent with testimony I presented before the House Subcommittee in October, 1981 on behalf of the United States Commission on Civil Rights (the Commission), which I formerly chaired. That testimony is attached. As indicated in the attached letter to Representative Robert Garcia from Clarence M. Pendleton, Jr., in 1983 the Commission carefully reconsidered the implications of proposed employer sanctions, and reaffirmed the positions and recommendations contained in the Commission's report "The Tarnished Golden Door." As you may know, this report was prepared during my tenure as chairman and submitted to Congress and the President in September of 1980.

I. SUMMARY OF TESTIMONY

Today, as in the past, I recognize the seriousness of the overall problem of undocumented immigration which Congress seeks to address. I continue to stand by the Commission's strong recommendation, as set forth in "The Tarnished Golden Door," of a three-pronged approach to reduce the participation of undocumented workers in the domestic labor market, namely; 1) vigorous enforcement of the Fair Labor Standards Act and other labor laws; 2) strengthening the capacity of the Immigration and Naturalization Service (INS) to enforce current immigration law; and 3) vigorous efforts to foster bilateral or multi-lateral agreements with the major sending countries in order to reduce and regulate cross-border population flows.

Second, I continue to oppose employer sanctions proposals either with or without a compulsory system of verification of authorization to work. This position is consistent with that of a majority of the Commission which I chaired and which recommended against employer sanctions on the grounds that: (1) employer sanctions impose law enforcement duties on private persons and corporations with undesirable consequences for both the employer and job applicant; (2) employer sanctions would increase employment discrimination against United States citizens and lawful resident aliens who are racially or linguistically identifiable with major immigrant groups; and (3) proposals for the adoption of a compulsory work permit or other universal worker identifiers undermine civil liberties. As the majority of the Commission concluded in 1980, "the Commission does not believe that, serious as the adverse impact of the undocumented workers may be on the employment opportunities of some citizens and legal aliens, the nation is warranted in traveling a path which could result in depriving all citizens of civil liberties. The Commission does not believe that the ends that would be achieved justify the proposed means." ["Tarnished Golden Door," page 73.]

Third, if Congress should, however, adopt some form of employer sanctions, it is my judgment that it is essential to include provisions which provide all persons authorized to work in the United States strong and enforceable protection against employment discrimination based upon national origin or non-citizen status. To this end I strongly endorse the "Frank Amendment" which passed the House in 1984 by a vote of 404-9, and urge that those provisions be included in any immigration bill which includes employer sanctions. In this regard I am disappointed. S. 1200 does not include such protections, and HR. 3080 includes anti-discrimination provisions substantially weaker and less enforceable than the provisions of the House-passed "Frank Amendment". Employer sanctions will encourage discriminatory practices, which is why I oppose them. If they become law they must be countered by strong anti-discrimination provisions in the same law. That is why I favor a "Frank Amendment" that has not been weakened.

Fourth, given my deep concerns about the efficacy, discriminatory impact and threat to civil liberties which arise from employer sanctions, I endorse the concept of imposing a "sunset" provision on sanctions which would require Congress to reconsider the program in light of practical experience. Although I believe that the limited "sunset" which the Senate approve as an amendment to S. 1200 is a step in the right direction, I strongly recommend that an automatic termination be adopted which would eliminate employer sanctions from the laws of the United States at the end of three years unless Congress clearly and affirmatively reenacts them.

The balance of this testimony will focus on the ethical and constitutional basis for prohibiting employment discrimination based on non-citizen status, and the need for strong protection against this danger for all persons authorized to work in the United States.

II. THE ETHICAL AND CONSTITUTIONAL BASIS FOR PROTECTION AGAINST EMPLOYMENT DISCRIMINATION BASED ON NATIONAL ORIGIN AND NON-CITIZENS STATUS

Lawfully resident aliens have a constitutional right to work. They are "persons" entitled to the equal protection of the laws. In 1915, the United States Supreme Court recognized that lawfully resident aliens have a "right to work in the common occupations of the community," for such a right is the "very essence of personal freedom and opportunity that it was the purpose of [Fourteenth Amendment] to secure." *Truax* v. *Raich*, 239 U.S. 33, 42 (1915). Under a series of well known decisions, the Supreme Court has held that a State may not abridge a lawful non-citizen's right to work except on a showing that such abridgement is necessary to achieve a compelling State interest. This same standard applies to State laws that regulate employment in the private sector.*

These constitutional holdings establish as the law of the land the principle that all persons lawfully residing and authorized to work in the United States enjoy a fundamental right to work which cannot be abridged except for compelling reasons. The proposed employer sanctions included in S.

*Under more recent Supreme Court decisions, a less stringent constitutional standard may apply to State jobs "imbued with sovereign authority" such as State police or public school teachers. See *Foley* v. *Connelie*, 435 U.S. 291 (1978).

1200 and H.R. 3080 pose a serious threat to this principle. Whereas other federal laws have made it unlawful for an employer to deny employment to pesons because of certain personal characteristics, sanctions represent a unique effort to make it unlawful to give employment to persons because of certain characteristics, namely their lack of legal status in the United States. As such, employer sanctions contemplate radical changes in employment practices.

III. THE DANGER OF EMPLOYMENT DISCRIMINATION ARISING FROM EMPLOYER SANCTIONS

I am convinced that employer sanctions will increase employment discrimination on several levels, and that non-citizens authorized to be and work in the United States are especially vulnerable. Indeed, as other witnesses have testified, it appears that the mere prospect of employer sanctions, and the substantial publicity which has surrounded the Congressional debate, already have led certain employers to fire or deny employment to persons lawfully here for fear they may be undocumented or otherwise subject the employer to INS enforcement activities.

Even if all parties to the debate can today only speculate about the extent to which sanctions will increase employment discrimination, it is my judgment that Congress should provide protection against the danger. If discrimination does increase, as I believe is inevitable, such new protections will provide an opportunity for protection and redress not available under current law.

If, as their proponents assert, sanctions do not prove discriminary, such protections will at a minimum affirm Congress's commitment to the principle that all persons lawfully residing in the United States, citizen and non-citizens alike, have a protected right to work.

Consistent with the conclusions of the Commission as set forth in the "The Tarnished Golden Door," there are several reasons why I believe that employer sanctions will increase the potential for discrimination on the basis of national origin, race and non-citizen status.

First, the danger of employment discrimination is inherent in the basic character of employer sanctions, which impose upon the employer the obligation to ascertain the right to work of all persons hired. Employers would be mandated to distinguish between job applicants who are lawfully here and authorized to work, and those who are not. This requires employers, under threat of civil and criminal prosecution, to make very difficult judgments about persons seeking employment.

Accordingly, I believe that employer sanctions will foster the creation of a de facto "suspect classification" of persons who look or sound foreign, especially Hispanics, Asians, and other persons, regardless of race or ethnicity, whose appearance, language skills or other characteristics may raise questions about their immigration status. Because the problem of illegal immigration is perceived by many, albeit incorrectly, as a "Mexican problem" or a problem of Central Americans and Caribbeans, millions of citizens and lawful resident aliens who share a common appearance with persons from these regions will become especially suspect in the minds of the employers.

In short, some employers, acting in good faith in an effort to comply with sanctions or minimize the risk of investigation and prosecution, may adopt the simplistic solution of discriminatorily denying jobs to "foreign looking or sounding" persons.

Second, employer sanctions will encourage those who are inclined to discriminate to perceive sanctions as a pretext or excuse for denying employment on invidious grounds.

Third, the "optional verification" requirements of S. 1200, and the "mandatory verification" provisions of H.R. 3080 will not adequately address this potential for discimination, may indeed exacerbate it, and will give rise to serious threats to privacy and other civil liberties. Under both bills, employers are required to make a subjective determination of the validity of proffered documents. Given the ease with which such documents are forged, and the possible difficulties in assuring that an individual matches the document's description or picture, the easiest way out for employers who wish to comply with sanctions will be to refuse to hire foreign looking or sounding persons, or subject them to much closer scrutiny than others.

Finally, I am concerned that the adoption of employer sanctions, particularly as structured in S. 1200 and H.R. 3080, will result in some employers requiring job applicants to produce a passport or other proof of citizenship. Such practices, authorized under both bills as a means of complying with the verification requirements, would amount to a "citizens only" hiring policy.

This would impose extraordinary hardship on the approximately 8 million permanent resident aliens and refugees who reside lawfully in the United States and are authorized to work. These millions of people face the greatest new danger of employment discrimination if employer sanctions are adopted. As discussed below, current civil rights laws do not provide adequate protection against a "citizens only" hiring practice. It is for these reasons that I think it essential that if employer sanctions are included in any immigration law, the provisions of the "Frank Amendment" in the form in which it passed the House by a vote of 404-9 in 1984 must also be included.

IV. EXISTING EMPLOYMENT LAWS DO NOT PROVIDE ADEQUATE PROTECTION FOR NEW FORMS OF DISCRIMINATION ARISING FROM EMPLOYER SANCTIONS

In *Espinoza* vs. *Fara Manufacturing Co.*, 414 U.S. 86 (1973), the Supreme Court held that Title VII of the Civil Rights Act of 1964 does not bar discrimination based solely on alienage or non-citizen status. The Court also stated clearly that discrimination based on alienage is not the equivalent of national origin discrimination, which Title VII does prohibit.

While in some instances the non-citizen lawfully authorized to work might be able to assert a claim of national origin discrimination under Title VII, the facts of *Espinoza* itself—a Mexican resident alien denied employment on the basis of non-citizen status by a company which predominantly employed Mexican-Americans—demonstrate that Title VII's national origin prohibition fails to address the heart of the problem with which I am concerned.

I recognize that some courts and commentators have argued that Section 1981 of the Civil Rights Act of 1866 prohibits both public and private employers from discriminating against non-citizens solely on the basis of their non-citizen status. It is my understanding, however, that the Federal Circuit Courts have split on this issue, and that the Supreme Court has not resolved the question. Accordingly, Congress cannot reliably determine that Section 1981 provides adequate protection against discrimination based on noncitizen status which sanctions may engender.

To those who argue that Section 1981 does provide adequate protection, I would respond with two points: (1) that implicit in such a conclusion is support for the principle which I urge Congress to uphold, that all persons lawfully in the country, citizens and non-citizens alike, should have their right to work protected regardless of their immigration status; and (2) that given the sweeping character of employer sanctions, gaps in the coverage of Title VII, and practical difficulties in enforcing both Title VII and Section 1981, it is necessary to adopt the provisions of the original "Frank Amendment" to ensure vindication of the principle of non-discrimination because of non-citizen status.

V. THE NEED FOR PROTECTIONS SUCH AS THE HOUSE OF REPRESENTATIVES APPROVED IN 1984

In order to vindicate the principle that in this society the right to work is accorded to citizens, lawfully admitted resident aliens, and refugees alike, should Congress adopt employer sanctions it is essential that it also prohibit the type of employment discrimination which sanctions will engender. S. 1200 is inadequate in this regard. H.R. 3080 is preferable to S. 1200 and I commend Representatives Rodino and Mazzoli for their efforts to address this serious problem. But for several reasons, in my judgment, the best approach is represented by the "Frank Amendment" which the House of Representatives approved in 1984 by a vote of 404-9.

First, H.R. 3080 limits the protection against discrimination based on national origin or citizenship status to citizens or "intending citizens." The definition of "intending citizen" is limited to persons who complete a declaration of intention to become a citizen, and apply for naturalization within six months of when they become eligible, or within six months of the date of enactment, whichever occurs first.

I respectfully disagree with the "intending citizen" restriction. Protection of the right to work should be accorded to all persons lawfully in the United States, not only those who seek or pursue citizenship. The fundamental character of the right to work is undermined by the restricted scope of the anti-discrimination provisions of H.R. 3080, and a new "second class" category of residents would be established.

Second, I understand that the "Frank Amendment" authorized class actions, whereas H.R. 3080 may not. I think class actions should be allowed consistent with the rules of Federal Civil Procedure.

Finally, I am concerned that H.R. 3080 would limit a private right of action to "knowing and intentional" or a "pattern or practice" of discriminatory activity. These standards are extremely difficult to satisfy, and are unduly burdensome. I recommend that the Committee reconsider these provisions of H.R. 3080, and return to the approach of the "Frank Amendment" which passed the House overwhelmingly last year.

I again thank both Subcommittees for affording me the opportunity to testify on these important matters.

NOVA RO-II DEDICATION

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mrs. BOXER. Mr. Speaker, it is my great pleasure to bring this special recognition to an outstanding project of the Novato Rotary Club in Novato, CA, which I am proud to say is part of my district.

This month, Novato Rotary will dedicate its second senior citizens housing complex, Nova-Ro II, a 56-unit development built by members of this community service organization without one penny of Government funding.

Recognizing the critical need for affordable housing for senior citizens, Novato Rotary put together an innovative plan which produced a quality project at less than two-thirds of the normal cost—thereby enabling rents to be set significantly below market rates.

Members of Novato Rotary donated their professional skills in architecture, engineering, contracting, legal services, and skilled labor. Other Rotarians contributed nonskilled labor on evenings and weekends to keep costs down. The county of Marin donated the land, and the city of Novato waived construction fees in recognition of the project's benefit to the community. Standard mortgage financing was augmented by a $500,000 grant from the Beryl Buck Trust through the San Francisco Foundation to further reduce costs and keep the units permanently affordable.

Like Nova-Ro I, which is celebrating its 10th year, Nova-Ro II is an attractive, well-built complex designed especially for senior citizens. It is a minineighborhood where residents can easily and comfortably socialize with one another, yet enjoy the sense of privacy and dignity that comes with having their own apartments and furnishings.

It is particularly gratifying to see this kind of private sector initiative, with members of a local organization taking responsibility for helping to meet community needs in such a commendable way. On behalf of all of us whose mothers and fathers are thus able to live out their lives in an atmosphere of independence and well-being, I thank the members of Novato Rotary for making it possible with Nova-Ro II, and I invite my colleagues in Congress to visit this model program..

JOE GALAYDA

HON. DANIEL A. MICA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. MICA. Mr. Speaker, it is with great pleasure today that I rise to note the retirement of a man who dedicated his working life to the fine art of assisting discovery—to the art of teaching. His departure leaves a gap in the hearts of his students and fellow teachers which I believe will not soon be filled.

I met Joe Galayda when, as a young teaching intern, I was assigned to his tutelage at Boca Raton Elementary School in Boca Raton, FL. Like everyone on the first day of school—even aspiring teachers—I was nervous. Joe Galayda was perceptive enough to notice my anxiety, and smart enough to make no attempt whatsoever to dispel it. He was a master disciplinarian. He knew when to be tough and he knew when to be gentle.

The result was that Joe Galayda became a father to two generations of students. For 26 years, he worked his magic in the classroom. It is a rare teacher and a rare individual who can still inspire affection over more than a quarter century, who can make those who knew him continue to seek him out. This is such a man, Mr. Speaker.

Joe's contributions were not limited to the classroom, although what he did there would stand alone as an admirable life's work. For 20 years, he has coached volleyball teams and instilled the will to win in people of all ages. His great joy is the ocean, and he has acquired vast knowledge of sea life and a love of this great force.

Mr. Speaker, it has been said that a teacher affects eternity, no one can tell where his influence stops. For those of us who know and admire Joe Galayda, who have had the privilege to work with him and under him, his influence will never stop. Nor, we hope, will he.

H.R. 3530, THE FAIR LABOR STANDARDS AMENDMENTS OF 1985

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. MURPHY. Mr. Speaker, I am pleased to announce that the members of the Subcommittee on Labor Standards have introduced legislation this afternoon amending the Fair Labor Standards Act [FLSA] as it affects local government employees in the aftermath of the Supreme Court's decision in Garcia versus San Antonio Metropolitan Transit Authority.

This bill is a compromise solution. We believe that these amendments provide necessary protections to local public employees yet allows public employers the flexibility necessary to administer their personnel practice as they choose.

This legislation represents the considerable efforts of all the members of the subcommittee who have urged local government employers and their employees to work toward a mutually acceptable solution to the issue of FLSA compliance.

For several months the subcommittee has advocated compromise rather than confrontation between the parties to this controversy. We are gratified that this recommendation finally bore fruit when the local governmental associations and the representatives of public employee unions were able to work out their differences.

The majority and minority subcommittee staff have spent the last week reviewing the recommendations of labor and management. After refining some of the suggestions offered to the committee and of course individual recommendations from the members themselves, we have drafted a bill which enjoys broad bipartisan support.

H.R. 3530 provides for either compensatory time off or cash compensation for public employees working overtime, releasing local governments from liability for FLSA overtime violations until April 15, 1986 and clarification of the status of volunteers. There are, of course, many aspects of this bill which I would direct my colleagues to review in the section-by-section analysis which follows.

The subcommittee intends to report this bill tomorrow, October 10, and I expect full committee action in the very near future.

DR. WILLIAM A. STREAT, JR.: 35 YEARS OF SERVICE

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. TOWNS. Mr. Speaker, I would like to take this opportunity to achnowledge the work and accomplishments of my good friend, Prof. William A. Streat, Jr. as he retires after over 35 years of service to North Carolina Agricultural and Technical State University.

Mr. Streat, son of the late Williams Alfred Streat, Sr., and Marie Green Streat, was born in Clover, VA. He spent his childhood years in Lawrenceville, VA, on the campus of what is now St. Paul's College, and where his father and later his mother were teachers.

Professor Streat received a B.S. degree in building construction from Hampton Institute and a B.S. degree in architectural engineering from the University of Illinois. He later received a master's degree from the Massachusetts Institute of Technology in 1949 and completed additional study at Duke University, the University of California, and Columbia University.

Professor Streat is registered to practice architecture in the States of South Carolina, North Carolina, and Virginia, and was the only full-time faculty member of North Carolina A&T State University with architectural registration.

He has served on the Accreditation Board of Engineering and Technology [ABET] and is a member of the American Institute of Architects, the American Society for Engineering Education, the Association of Collegiate Schools of Architecture, the National Technical Association, and the Beta Kappa Chi Scientific Honor Society, to name only a few.

In addition, Professor Streat was the only North Carolina A&T State Univeristy faculty member certified by the U.S. Department of Defense as qualified to design buildings protected against natural and nuclear disasters.

Finally, Professor Streat is a member of the Episcopal Church of the Redeemer. He

has served our country during World War II in the Corps of Engineers and in the Army Air Corps as a B–25 twin engine bomber pilot.

He is married to the former Louise Guenveur of Charleston, SC, who was professor and chairperson of the department of home economics at Bennett College.

I am sure that my colleagues will want to join me in wishing Professor Streat best wishes as he retires after a long career of service and dedication to North Carolina A&T State University and the community around him.

DEFICIT REDUCTION PLAN

HON. THOMAS A. DASCHLE

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. DASCHLE. Mr. Speaker, the Senate has sent us a deficit reduction plan that is flawed, but suggests a truly fair and effective route to a balanced budget. The Senate, however unintentionally, has realized that we will never balance the Federal budget unless we force the President, the Senate, and the House to do so.

I urge that we Democrats in the House take what the Senate has given us and improve it. The current plan has two flaws. First, during its first 3 years, it may actually increase, not reduce, the deficit. Second, it is structured in a way that places a disproportionate burden for deficit reduction on domestic spending, such as farm programs, education, and housing. Defense spending escapes relatively unscratched. Such an imbalance is fundamentally unfair.

The House should move quickly to adopt a deficit reduction plan that corrects these two flaws. Our plan should begin to reduce deficits immediately, not in 3 years. It should insure that Pentagon spending is cut as much as all other programs are cut. And, it should seek to reduce the deficit partly by imposition of a minimum corporate tax on profitable companies that now pay no taxes whatsoever.

Such a plan would not sacrifice our commitment to the elderly, the young, and the needy. It would force the President to finally propose a budget that reduces the deficit. And, most importantly, it would finally bring about a balanced budget.

LEGISLATION TO RESOLVE DISPUTE BETWEEN COWLITZ INDIAN TRIBE AND THE DEPARTMENT OF THE INTERIOR

HON. NORMAN D. DICKS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. DICKS. Mr. Speaker, today, Representative DON BONKER and I are introducing a bill which is intended to resolve a long-standing dispute between the Cowlitz Indian Tribe of Washington and the Department of the Interior.

In 1973, funds were appropriated to compensate the Cowlitz Tribe for lands taken by the United States over 100 years ago, without benefit of treaty or compensation. These funds were placed in a judgment account, where they remain to this day. The legislation we are introducing today would provide for the final distribution of these funds and the interest they have accumulated.

Our bill would require that 100 percent of the judgment fund be used for lawful purposes authorized by the Cowlitz Tribal Council and for the purchase of land for the Cowlitz Tribe, with none of the funding distributed to individual tribal members on a per capita basis. This is consistent with current law, which requires that a minimum of 20 percent of the total of judgment funds be distributed to Indian tribes, rather than to their individual members. We believe this type of distribution allows funds to be better utilized for the benefit of the entire tribe.

The Interior Department has maintained that only per capita distribution is appropriate for tribes such as the Cowlitz which are not federally recognized. We do not agree with this interpretation of congressional intent, and have introduced this bill to ensure that the funds in Indian Claims Commission docket numbered 218 are distributed in the most effective method possible.

THE FARM BILL

HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. SYNAR. Mr. Speaker, we have heard a great deal in the last several months about the plight of the family farmer and the steady erosion of America's agricultural economy. I am seriously concerned about the future of U.S. agriculture.

The prices farmers are receiving for most commodities and livestock are at their lowest levels in several years. Worldwide overproduction and the high value of the dollar are expected to cause U.S. exports to drop to $30 billion this year. This will cause further reductions in farm income.

Despite the drop in income, the farmers' cost of production is rising through increases in seed, fertilizer, fuel, and equipment. It's not surprising that as much as half of the Nation's $214 billion farm debt may be uncollectable. In the Plains States, farm bankruptcies tripled from 1982 to 1984. Foreclosures and partial liquidations increased 30 percent in the same period. Land values have declined 12 percent in the last year. In Oklahoma, land values dropped 19 percent last year.

The elimination of family farmers would be devastating to our economy. Agriculture is the Nation's largest industry and the largest employer. Farming alone requires 3 million workers—more than the combined work forces of auto, steel, and transportation industries. Agriculture provides one out of every five jobs in the private sector. To quote William Jennings Bryant, "destroy our cities and they will spring up again as if by magic, but destroy our farms and the grass will grow over every city in the country."

Even though I had reservations over parts of the farm bill reported by the Agriculture Committee, I was prepared to support it because I felt it offered the best approach to deal with the problems facing agriculture today. It would have protected farmers' income, allowed them to repay their loans and remain on the farm. It also offered farmers a chance to decide if they wanted to institute a program of production controls in an attempt to bring up farm prices. At the same time the bill stayed within the budget targets and moved U.S. agriculture policy to a market-oriented approach.

It was not a perfect bill. But without the producer referendum and voluntary production control provisions and exemptions from cargo preference requirements for certain USDA export programs, the farm bill is a disaster. Consequently, I could not support it.

As it stands now, the farm bill will do nothing to end the problem of overproduction and as a result do nothing to increase farm prices. It provides little hope for today's family farmer who was counting on Congress to take bold new approaches to reverse the failed policies of the past.

It is true that controlling production may have caused an increase in the price of grain which would have been reflected in higher feed costs for the livestock industry and food for consumers. As a cattle rancher and a consumer I shared the concerns of those who opposed the production controls for this reason. However, I believe that these nominal increases would have been preferable to what will happen in farm country because we have not addressed the serious problem of overproduction and declining farm income.

Consumers and other sectors of the agriculture economy have benefitted from current farm policy which has encouraged overproduction and reduced prices. Food is cheaper in the United States. In fact, Americans spend less of their income on food than do consumers in any other country. Livestock producers now enjoy reduced feed prices. Implement dealers and other farm input industries have profited as planting has increased, However, all of these benefits have come at the expense of farmers who are the victims of a bad agriculture policy over which they have no control. A producer referendum to establish production controls is an idea whose time has come.

In addition, because attempts to restore the cargo preference exemption for certain USDA export programs were unsuccessful, the bill substantially undermines the effectiveness of the blended credit and intermediate credit programs. Both of these programs are intended to boost agriculture ex-

ports by providing interest free loans and credit guarantees which reduce the price of U.S. exports and make them more competitive on the world market. The fact that the administration has suspended these programs due to the cargo preference requirements cast serious doubts over whether these programs will ever work as they were intended.

I appreciate the intent of cargo preference requirements—to ensure there is a privately owned and operated merchant marine which can be used as a naval and military auxiliary in time of war or national emergency. However, I can't support subsidizing the shipping industry at the expense of American farmers. I don't buy the arguments that repeal of cargo preference requirements will threaten national security. Under the approach endorsed by the Agriculture Committee, cargo preference would have been required for all Food for Peace shipments.

Agriculture export trade has dropped from $43.8 billion in 1981 to an estimated $32 billion this year. U.S. farm product trade balances fell from $26.6 billion in 1981 to $12 billion this year. Agriculture trade was one of the brighter spots in an otherwise bleak American trade picture. Imposition of cargo preference requirements on all USDA export programs will add significantly to U.S. trade problems.

As I mentioned before, the bill was not perfect, but it was acceptable. The producer referendum was a positive step toward reducing the recordbreaking surpluses which have driven prices down. The cargo preference exemption would have ensured that USDA export programs would operate at their full potential to open up new markets for our farmers. Without these two provisions, the bill falls far short of what the Agriculture Committee set out to do in drafting farm legislation. I could not support the farm bill because I believe that Congress could have and should have done a better job to rewrite farm programs.

THE U.S. AND THE INTERNATIONAL COURT OF JUSTICE: WE MADE THE RIGHT DECISION

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. BROOMFIELD. Mr. Speaker, our Government made the correct decision to no longer accept the optional, compulsory jurisdiction of the International Court of Justice [ICJ]. Our country, however, will continue to respect our traditional commitment to international law and to the ICJ in carrying out its proper function.

Under the ICJ statutes, each state determines its relationship with the World Court. Each state can also either accept or reject the Court's compulsory jurisdiction on the principle of reciprocity.

After the founding of the World Court, the United States expected all countries to accept the optional compulsory jurisdiction of the Court. In fact, fewer than one-third of the world's nations have agreed to accept the Court's compulsory jurisdiction. The Soviet Union has never accepted the Court's compulsory jurisdiction, and in the judgment of our Government, neither has Nicaragua. One the other hand, the United Kingdom and the United States have, all along, accepted ICJ jurisdiction.

While the United States has never been able to bring other states before the Court, our country has been sued before that body on three occasions. Most nations are ignoring the Court's jurisdiction for obvious political ends. America's national interests are being threatened in the process. It is curious to note that the recent proceedings against the United States regarding Nicaragua are the first time that the Court has actually accepted jurisdiction over any political conflict involving ongoing hostilities.

I believe that our Nation's experience with optional, compulsory jurisdiction has been one sided, detrimental to our interests at best, and has not materially affected respect for the rule of law in the international community. For these reasons, is there any wonder that the President chose to do what he did?

It is obvious to me that the President made the right choice. I commend the following press statement and talking points on this decision to my colleagues.

PRESS STATEMENT

In accordance with the instructions of the President, on October 7, the Secretary of State deposited with the Secretary-General of the United Nations formal notice of termination of the United States declaration, deposited on August 26, 1946, accepting the optional compulsory jurisdiction of the International Court of Justice. This action will become effective 6 months after the deposit of that notice.

This decision is fully compatible with the Statute of the ICJ, which leaves it to the discretion of each state to determine its relationship with the World Court. That Statute also explicitly refers to the right to condition acceptance of the Court's compulsory jurisdiction on the principle of reciprocity.

When President Truman signed the U.S. declaration accepting the World Court's optional compulsory jurisdiction on August 14, 1946, this country expected that other states would soon act similarly. The essential underpinning of the U.N. system, of which the World Court is a part, is the principle of universality. Unfortunately, few other states have followed our example. Fewer than one-third of the world's states have accepted the Court's compulsory jurisdiction, and the Soviet Union and its allies have never been among them. Nor, in our judgment, has Nicaragua. Of the five Permanent Members of the U.N. Security Council only the U.S. and the United Kingdom have submitted to the Court's compulsory jurisdiction.

Our experience with compulsory jurisdiction has been deeply disappointing. We have never been able to use our acceptance of compulsory jurisdiction to bring other states before the Court, but have ourselves been sued three times. In 1946 we accepted the risks of our submitting to the Court's compulsory jurisdiction because we believed that the respect owed to the Court by other states and the Court's own appreciation of the need to adhere scrupulously to its proper judicial role, would prevent the Court's process from being abused for political ends. Those assumptions have now been proved wrong. As a result, the President has concluded that continuation of our acceptance of the Court's compulsory jurisdiction would be contrary to our commitment to the principle of the equal application of the law and would endanger our vital national interests.

On January 18 of this year we announced that the United States would no longer participate in the proceedings instituted against it by Nicaragua in the International Court of Justice. Neither the rule of law nor the search for peace in Central America would have been served by further United States participation. The objectives of the ICJ to which we subscribe—the peaceful adjudication of international disputes—were being subverted by the effort of Nicaragua and its Cuban and Soviet sponsors to use the Court as a political weapon. Indeed, the Court itself has never seen fit to accept jurisdiction over any other political conflict involving ongoing hostilities.

This action does not signify any diminution of our traditional commitment to international law and to the International Court of Justice in performing its proper functions. U.S. acceptance of the World Court's jurisdiction under article 36(1) of its Statute remains strong. We are committed to the proposition that the jurisdiction of the Court comprises all cases which the parties refer to it and all matters that are appropriate for the Court to handle pursuant to the United Nations Charter or treaties and conventions in force. We will continue to make use of the Court to resolve disputes whenever appropriate and will encourage others to do likewise. Indeed, as we have announced today, we have reached agreement in principle with Italy to take a longstanding dispute to the Court.

TALKING POINTS: COMPULSORY JURISDICTION OF THE ICJ

ICJ JURISDICTION

The Court's jurisdiction in all cases requires the consent of the states parties. There are two types of jurisdiction over cases. First, jurisdiction may exist when states accept the Court's optional, compulsory jurisdiction.

In accepting "compulsory jurisdiction," a state holds itself open to suits by any other state also accepting compulsory jurisdiction. Generally speaking, there is no way of knowing by whom, or on what issue, a suit may be filed.

Whether to accept compulsory jurisdiction is entirely optional.

When, in 1946, the U.S. accepted the Court's compulsory jurisdiction, it anticipated that most other states would do likewise. They did not and the Court has never enjoyed anything approaching universal acceptance as a vehicle for the peaceful resolution of disputes.

The number of states accepting compulsory jurisdiction has declined relatively and absolutely over the years. Only 45 of the 159 members of the U.N. accept the Court's compulsory jurisdiction. Only two Permanent Members of the Security Council—the U.S. and Britain—presently accept the Court's compulsory jurisdiction.

Termination of acceptance is not unusual and is fully compatible with the Statute of the ICJ, which leaves it to the discretion of each state to determine its relationship with the Court.

The second basis for the Court's jurisdiction is treaties or agreements providing for the Court's jurisdiction over a dispute involving just the parties to the agreement. Such agreements are common. The U.S. is party to over 60 such treaties or agreements providing for ICJ resolution of disputes arising under them.

Cases arising under treaties and specific agreements form by far the largest and most successful part of the Court's work. The President's decision has no effect in this area. The U.S. and Canada were involved in such a case last year and we have just reached agreement with Italy to have a long-standing dispute to the Court in the near future.

THE PRESIDENT'S DECISION

Our experience with compulsory jurisdiction has been deeply disappointing. Few states accept compulsory jurisdiction in any meaningful fashion. An accepting state can initiate proceedings only against another accepting state, yet can be sued without warning by any other state, which need only deposit an acceptance for the purpose of that single suit. The limited reservations that we attached to our acceptance in order precisely to define its scope have not protected us. Instead, they have been invoked on the basis of reciprocity to deprive the Court of jurisdiction over claims that we have sought to bring against other states. For these and other reasons, we have never been able to use our acceptance to bring other states before the Court, but have ourselves been sued twice.

We have hitherto accepted these risks because we believed that the respect owed the Court by other states, and the Court's own appreciation of its judicial function, would prevent the Court's process from being abused for political ends.

The Nicaragua case proved those assumptions wrong. For the first time, compulsory jurisdiction has been used as a springboard for the adjudication of political and security issues never before considered part of the Court's mandate. The effect has been to make our acceptance of compulsory jurisdiction a source of unacceptable risks.

THE ICJ'S PROPER FUNCTION AND THE IMPACT OF TERMINATION

Termination of the United States acceptance must also be seen in perspective. Compulsory jurisdiction has been the basis for only a minor part of the Court's work. Indeed, no compulsory jurisdiction case has been decided on the merits since 1962; the last such cases involving the United States ended in 1952. By far the larger, and overall more successful, portion of the Court's work has involved cases that the parties specially refer to it or matters otherwise assigned to the Court's jurisdiction by the U.N. Charter or treaties and conventions in force. Termination of our acceptance of compulsory jurisdiction has no legal effect on the Court's jurisdiction in any such case that may involve the United States.

The United States favors the Court's fulfilling its proper function. That is achieved where the parties specially consent to ICJ jurisdiction.

Our devotion to international law and the peaceful resolution of disputes, and the use of the ICJ in connection with this goal, is undiminished. Not only did the ICJ decide last year the U.S.-Canada boundary dispute, the U.S. has reached agreement with Italy to submit a dispute with another government to the Court.

WHY NOW

The U.S has terminated now in order to avoid future suits like the Nicaragua case. On April 6, 1984, the President amended our acceptance of compulsory jurisdiction to exclude for two years suits having to do with Central America. The 1946 Declaration accepting compulsory jurisdiction provides that termination takes effect six months from notice to the Secretary General. To avoid future Central American suits, termination has to become effective before the expiration of the two year exclusion of such suits on April 7, 1986.

Q: Why did the administration decide to submit its termination notice at this time?

A: Last January we announced the President's decision not to participate further in the proceedings brought by Nicaragua. We indicated at that time that the United States would be considering steps to address the concerns raised by the Court's unprecedented effort to extend its authority into areas of collective security and self-defense—subjects properly reserved by the UN Charter to resolution through political processes. That review has now been completed.

In addition, our 2-year suspension of jurisdiction for Central American disputes expires by its terms on April 6, 1986, 6 months from now. Because the notice of termination takes effect in 6 months, we thought it prudent to take action to avoid again being exposed to suits related to Central America.

Q: Why didn't the United States terminate its acceptance of the compulsory jurisdiction effective immediately?

A: We believe that under present law governing acceptances an immediate termination would be entitled to be given immediate effect. The Court's November 26 judgment in the Nicaragua case suggests that the Court would likely take another view, and we see no point in pushing the issue at this time.

Q: What effect do you think this decision will have on the Court's deliberations in the case of *Nicaragua* v. *U.S.*?

A: Our decision does not address the case before the Court and has no legal effect on that case. It is the Court's responsibility to not let it influence their decision. As we said in January, the Court lacks jurisdiction and competence over the case. Although we did not participate in the proceedings on the merits before the Court, we do not believe that Nicaragua has established its case before the Court. [If pressed: I would refer you to our Special Report of September 1985 "'Revolution Beyond Our Borders', Sandinista Intervention in Central America," and to the admissions of Nicaragua's witnesses before the Court, admissions that directly contradict the sworn affidavits of Foreign Minister D'Escoto.]

Q: Why aren't you modifying the 1946 declaration rather than terminating it?

A: We have concluded after an exhaustive review that no modification of the terms of our 1946 declaration would adequately protect the United States against further politically motivated suits like the Nicaragua case, and that therefore the continuation in force of the declaration presents, under current conditions, unacceptable risks to the foreign policy interests of the United States.

Q: If Kampuchea and Israel can accept the compulsory jurisdiction of the ICJ, why cannot the United States do the same, with a reservation excluding, for example, disputes regarding the use of force?

A: We do not rule out the possibility of someday submitting a new declaration if conditions make it in our interests at the time to do so. Under present conditions, however, we believe that to accept the Court's jurisdiction with that and other qualifications would be putting form ahead of substance. We could conceive of a substantial number of reservations which might arguably meet our interests but then our acceptance would be essentially illusory. But let me note that the overwhelming proportion of the Court's work historically has been to decide cases submitted by special agreement or treaty referring disputes to the ICJ, e.g. United States-Canada Gulf of Maine case and the Iran Hostages case.

Q: Doesn't today's decision to withdraw from the compulsory jurisdiction show contempt for the World Court generally?

A: No; we continue to support the Court as a means for peaceful settlement of the kinds of disputes it was intended to handle, such as the recent Gulf of Maine case between the United States and Canada, submitted by agreement and decided by a five-member Chamber of the Court, and the recent agreement in principle to submit a longstanding expropriation dispute with Italy to such a Chamber. We will use the Court whenever appropriate on issues properly before it.

Q: How can the United States square this action with its long-standing profession of support for peaceful settlement of disputes in general, for increased resort to the ICJ in particular and for the rule of law?

A: Of course we still support as a matter of principle the peaceful settlement of disputes. We also support recourse to the ICJ in appropriate cases. But we do not believe that all disputes are appropriate for judicial resolution. The Central American dispute, for example, is one that is not. One could compare the situation to cases involving the political question doctrine in our courts. When we argue that our courts should not rule on a case because it presents a political question, that certainly does not imply that we are opposed to judicial determinations in appropriate cases.

One should not equate acceptance of the compulsory jurisdiction with adherence to the rule of law. Are the Federal Republic of Germany, Italy or Spain less committed to the rule of law because they do not accept the Court's compulsory jurisdiction?

Q: Has any other respondent state walked out on an ICJ proceeding?

A: Yes; France, Iceland, and Turkey, among others, have all refused to participate in a case in recent years. Also, the UK, Canada, Australia, and others have modified the terms of their acceptances of the Court's jurisdiction to avoid the filing of imminent cases.

A SALUTE TO DAVE BRODY

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. GILMAN. Mr. Speaker, it is always a pleasure to see a friend receive public recognition for his accomplishments. Thus, I was happy to see a recent article in the highly respected National Journal in praise of my good friend, Dave Brody. Dave has gained the admiration and respect of hundreds of public officials and private citizens in his many years as the Washington

representative of the Anti-Defamation League of B'nai B'rith in Washington. The article pointed out one of Dave's most important characteristics—that he shares information on "who is doing what" here in Washington. Rather than holding such valuable information for himself, he trys to facilitate the work of his friends by sharing it with others.

So that my colleagues may be aware of the view of one reporter, after an extensive examination of Dave's special methods of operation and myriad accomplishments, I insert at this point in the RECORD the full text of the story to which I have referred:

[From the National Journal, Sept. 14, 1985]

MAKING MATCHES MEANS ACCESS

(By Dick Kirschten)

Most Washington lobbyists boast about having connections. David A. Brody takes pride in making them.

The veteran Washington representative of the B'nai B'rith Anti-Defamation League is an inveterate matchmaker who wends his way through the capital's power circles on the lookout for people who ought to know one another.

No sooner does his antennae pick up a nugget of conversational information about somebody's past or present interests than the next words out of his mouth are invariably, "I'd like to put you together with. . . ."

The very next day, if not later the same day, Brody will be on the telephone proposing a luncheon involving himself and the two people he wants to bring together. Invariably, they are people who would have gotten together on their own at some point but, as Brody said in an interview, he finds that it advances his long-term interests if he can be the "facilitator or catalytic force."

"I do it so that the two people will know each other, so they will not be strangers when they need to deal with one another. Both parties usually welcome it," he explained. Those involved may run the gamut from Members of Congress, White House aides and ambassadors to reporters, fund raisers and constituents.

Twenty years at his job has taught Brody that at some point, his gestures of good will are likely to be returned in some form. "It's not so much that people are beholden to me, as it's a matter of providing greater access for me," he said, stressing the golden word of the lobbyist's trade—access.

The autographed pictures on the wall of Brody's office attest to his success in gaining access at the very highest levels. They also attest to his skill at hearing what people say and sensing what makes them tick and what their current concerns are.

"In this town, so many people talk rather than listen," explained Brody, giving away a major secret of his success. It also helps to be quick-witted enough to put information to immediate use. "If I happen to be in a Member's office and a name comes up, we'll often set up a lunch right then."

Brody is constantly on the lookout for likely connections, two Members of Congress who haven't met each other yet, a reporter who is starting out on a project involving principals he hasn't met, new arrivals at the Israeli Embassy who need to meet the people they will be dealing with in Washington.

"It's just a matter of having almost an intuitive sense about people's needs," Brody said. "I guess it is just a matter of knowing how to relate to people. I will occasionally bring Members of Congress together whose views may be divergent. In bringing them together, they find that they are able to work together on other issues."

Those other issues, with luck, may turn out at some point to be the very ones upon which Brody is lobbying. And, even if their votes do not always go his way, Brody at least gets a chance to have his say. In 1981, when Congress approved the sale of military aircraft to Saudi Arabia, Brody recalled, "a number of good friends of mine voted for the sale, but I still had the opportunity to sit down and talk to the principal—to the man who cast the vote."

That statement is also revealing. In lobbying, as in matchmaking, the permanence of relationships is important. Accordingly, significance attaches to Brody's reference to "good friends" who voted against his position. They still are his good friends, and maybe next time they will be with him.

Besides putting his lunch hour to regular use, Brody and his wife, Bea, entertain at their home, throwing dinner parties that may bring anywhere from a dozen to three dozen Washington notables together to trade information and get to know one another better.

"From time to time, press people are invited to my parties at home as friends," Brody explained. What goes on is not intended for publication, Brody noted, but it is recognized "a reporter may pick something up at a party." But, he added, "the story won't be that I had that group of people to dinner."

Brody added that he has never hesitated to bring politicians and journalists together in a social setting. "I don't draw any lines," he said. "When I find it useful to play that catalytic role, I do it." With reference to the politicians, he observed, "I think they welcome the opportunity too, otherwise they wouldn't agree to it."

To the best of his recollection, Brody over the years has never become a matchmaker in the romantic sense. He says that he knows of no marriages that have resulted between people he has brought together and quickly adds in a businesslike tone that "if it has happened, that would not be the purpose that the meeting started out with."

There is more than a bit of a Horatio Alger aspect to Brody's career. The man who nows wines, dines and facilitates friendships among the high and mighty started out in life as the son of an immigrant garment worker who entered this country through Ellis Island. He grew up in Brooklyn, attended public schools and ended up studying law at Columbia University on a scholarship. He came to Washington in 1940 to work as a lawyer for the government and has been with the Anti-Defamation League since 1949.

Brody said he has developed his skills as a lobbyist-social connecter as he has gone along. "I like to say that the things I do, I never learned in law school." Nonetheless, the 69-year-old lobbyist makes it clear that he enjoys what he does. "I have no plans to retire," he said.

The matchmaker is obviously well matched to his calling.

EMPLOYER SANCTIONS: DISCRIMINATION STILL A CONCERN

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. TOWNS. Mr. Speaker, later this session we may have an opportunity to again consider the immigration reform legislation. While there are many issues which we must consider in this bill, none is more important than the possibility that employer sanctions may cause employment discrimination. Of particular concern, in this area, is whether alienage can be used as a defense by employers, as a cover for not hiring an employee, to avoid a charge of national origin discrimination. Alienage is currently not covered by any employment discrimination laws. Last year, the House adopted an amendment by BARNEY FRANK of Massachusetts to provide some legal protection for persons who might face this kind of discrimination as a result of employer sanctions. Certainly, one of the groups most concerned about this kind of discrimination is Hispanic Americans. Recently, our colleague Congressman ROBERT GARCIA of New York testified before the House Subcommittee on Immigration on this very issue. I believe that his testimony is illustrative of the concerns of Hispanics and others about the impact of employer sanctions. I have included his testimony for review by my colleagues; hopefully it will serve to help educate the House on this important civil righs concern.

The testimony follows:

TESTIMONY BEFORE THE IMMIGRATION, REFUGEES, AND INTERNATIONAL LAW SUBCOMMITTEE ON ANTIDISCRIMINATION PROVISIONS IN H.R. 3080

Congressman ROBERT GARCIA. Mr. Chairman, I want to thank you for the opportunity to testify before your subcommittee. I also want to commend you for holding these hearings on this most important legislation. It is my hope that during this Congress we will be able to come up with legislation that is both realistic and acceptable to all of us.

I have been asked to testify on the anti-discrimination provisions of H.R. 3080. I feel it is necessary, however, to state outright that I am against employer sanctions as a way to discourage undocumented immigration because sanctions would prove to be discriminatory, and I have doubts about their effectiveness.

That said, I hasten to add that since H.R. 3080 does have employer sanctions, its anti-discrimination provisions are absolutely necessary, and I commend the distinguished chairmen of the full committee and this subcommittee for living up to a commitment they made last year on the floor of the House during debate on H.R. 1510, the Simpson-Mazzoli Immigration Reform and Control Act. During the course of that debate both gentlemen stated that they would support the amendment offered by the gentleman from Massachusetts, Mr. Frank, which contained anti-discrimination provisions similar to those in H.R. 3080, in a House-Senate conference on H.R. 1510. They were true to their word.

Discrimination still exists in the United States, and that makes it necessary to protect those most often affected by discrimination: The Hispanic, black, and Asian people of this nation. Anyone of color is an easy mark for bigots, but there is really nothing we can do, here, to elimnate bigotry. What I am concerned about with employer sanctions is that we may be making employers who are not otherwise prone to such prejudice anxious about hiring someone who "looks a little different" or speaks with an "accent."

This fear of discrimination is not a figment of my imagination. It is very real, and while it is not my intention to offer a litany of cases concerning this discrimination, I would like to share with you a couple of examples that I think will help to emphasize my point.

A June 19, 1984 article by Laurie Beckland in the Los Angeles Times, published during the height of debate on H.R. 1510, discussed discrimination that was occurring in anticipation of the passage of the bill. I'd like to read to you an excerpt from Ms. Beckland's article, "Although it may be weeks before final congressional action on the Simpson-Mazzoli immigration bill, the proposed legislation is already prompting precautionary measures by some employers that, in some instances have aroused complaints of discrimination against Latinos in the Southwest." She goes on to say, "Some Latino leaders charge that confusion over the proposed bill already has led to cases of increased animosity toward Latinos in some areas of the Southwest."

Admittedly, throughout the article, Ms. Beckland, talks about prejudice against undocumented persons, but she also refers to other Hispanics, legally here; people like me, who are being lumped together with undocumented persons simply because of the way they look or talk. In addition, all of the uproar was, as I said, in anticipation of the passage of H.R. 1510. I have no doubt that the hysteria would be worse if such a bill were to pass.

I'm also certain that most of the employers in Ms. Beckland's article were not trying to be vindictive or discriminatory. They were simply trying to protect themselves. They aren't attorneys; they don't understand the details of the law. Many probably weren't even aware that the bill hadn't yet been put to a vote. These people have businesses to run, and their first instinct is not to worry about whether or not they are being discriminatory. They worry, instead, about fines that affect their profits.

That's why I am against sanctions. It's not the bigots that truly concern me; they will always find a way to discriminate. No, it's the ordinary small businesspersons who aren't going to want to take any chances. They can't afford to. But, if sanctions are to be, then the anti-discrimination provisions in this bill must remain. Those provisions at least offer some protection for members of my community who would, inevitably, be discriminated against if this bill becomes law.

I am going to cite one more example of the kind of almost unconscious prejudice that many people exhibit. I believe it will serve to underline my concern. This past March, the Texas House of Representatives Committee on Business and Commerce held hearings on legislation that would impose employer sanctions on employers who hire undocumented persons.

During the hearings, Mr. J.E. "Hank" Kastrop, a Texas businessman, testified before the committee in favor of sanctions. At one point Mr. Kastrop was questioned by State Rep. Hugo Berlanga (D-Corpus Christi) on whether or not he hired undocumented persons. Rep. Berlanga asked Mr. Kastrop how he determined whether or not an individual was undocumented. I'd like to read you an excerpt from the hearing transcript containing Mr. Kastrop's reply:

"Rep. BERLANGA. How did you make that determination? (that an individual was undocumented)

"Mr. KASTROP. We have very few of them apply. We have had blacks. We have had everything else you can think of. But, we have not had any of the illegal aliens apply that I know of.

"Rep. BERLANGA. How do you know that?

"Mr. KASTROP. We check the records. We check them out. Gentlemen, if you have a fellow come up to your office, and he can't speak English, and he is looking for a job, and he doesn't have many credit cards, and he lives with six other guys that are illegal aliens, you don't have to look twice to determine this guy shouldn't be in this country. And it gets me when they invade what we've built here and take advantage of what we've got, and I think that, if the State, can do something about it, they really ought to do it . . ."

You know my father spoke English with an accent, and he didn't have many credit cards. Yet, he was born a U.S. citizen. The real problem here is that Mr. Kastrop may not be a mean spirited person but neither is he atypical. I believe he is representative. There is a mounting fear that in this country that we are being invaded by hordes of "foreigners"—that is, those who are perceived to be foreign because of the way they look or speak. This fear is not based on reality or a clear assessment of the situation. It is, instead, a prejudice resulting largely from economic frustration. Our economic problems cannot be blamed on immigrants—undocumented or otherwise. That's scapegoating.

An editorial in the New York Times last year called Simpson Mazzoli "this generation's immigration bill." That may be so, but we—Hispanics—are this generation's immigrants, and despite the fact that many of us are citizens, we can't simply assume that we will not be discriminated against. We can't merely hope that employers will take time to distinguish between me and someone who may not be legally entitled to work. We, therefore, need the protection that this bill offers.

There is another very important reason that these protections are necessary. In order for the legalization program contained in this bill to work at all, those persons who are newly legalized must also be protected. They too must be given the opportunity to find employment and to become contributing members of society. Those individuals who take advantage of the legalization program, and are given "temporary residence status" will need the special protections provided by this bill. Many will come forward in good faith, believing that they have been offered an opportunity to work and become productive members of society. If we do not protect them, particularly in this interim status, the legislation program will not work. I'm certain that those who drafted this legislation want the legislation program to be as effective as possible. That will only be possible if adequate protection is offered to this newly legalized class of persons.

All of these reasons are the basis for my support for the anti-discrimination provision in this bill, but, and I seem to always have a but, I wish that this bill would have used the amendment that the gentleman from Massachusetts, Mr. Frank, introduced during House debate on H.R. 1510; incidentally, that amendment passed by an overwhelming margin of 404-9.

While I understand that the language contained in H.R. 3080 was written in much the same spirit as Mr. Frank's amendment, it, nonetheless, does not offer protection to long term legal permanent residents who do not apply or intend to apply to become citizens. Neither does it cover persons who are otherwise authorized to work by law but who may not fit, for one reason or another into the class on "intending citizens" as described in H.R. 3080.

I am not an attorney, and I am not here to debate the question of alienage discrimination and whether or not it should be covered in the framework of this legislation. My point is much simplier: Anyone who is here legally should be afforded the opportunity to work without fear of discriminating, whether or not that person is a citizen or permanent legal resident. If an individual pays taxes, obeys the law, and if called upon, serves in the U.S. armed forces, then in my mind, that individual should have every right to a job, and ought to be protected against possible or even probable discrimination.

I realize that not everyone sees this issue quite as simply as I do, but then maybe that's the problem. In any case, it is my hope that the subcommittee will adopt the Frank amendment in its "original" form as part of this bill.

One last point, the anti-discrimination provisions in this bill must be more than paper protections. These provisions must be actively and aggressively enforced. We need a special counsel that will look out for the thousands of individuals who will be discriminated against because of employer sanctions. We need to make certain that the protections provided by this bill will not become political pawns in a *Justice* v. *Congress* tug-of-war on civil rights.

The most distinguished chairman of this committee has stood as a symbol of civil rights since he first came to Congress in 1948. While I do not agree with him on employer sanctions, I am, nonetheless, certain that we both want to make sure that any discrimination that does occur as a result of sanctions will be minimized by the anti-discrimination provisions in this bill. I, therefore, ask that you send a message to the White House that this language is not for show. It is there, as I said, to be actively and aggressively enforced.

In conclusion, I would simply like to emphasize what I have said throughout my testimony: If employer sanctions must be a part of this bill, then there must be adequate protection against discrimination. The anti-discrimination provisions in H.R. 3080 come a long way toward addressing this problem, and at the very least, those provisions should be maintained. Thank you.

A TRIBUTE TO ELEANOR E. SEILING

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. TORRICELLI. Mr. Speaker, I rise today to honor Eleanor E. Seiling, founder and president of United Action for Animals, Inc., a national animal rights organization.

For more than 20 years Miss Seiling devoted her life to working for the replacement of live animals in research. Her pioneering work for the use of modern, sophisticated research and testing methods is known worldwide, and she was considered a leading authority on the subject.

Though her main work was on behalf of laboratory animals, she was very aware and concerned with all other abuses and exploitation of animals. She is credited with having inspired and influenced the entire spectrum of the humane movement. She will be missed.

Miss Seiling was 78 at the time of her death, August 7, 1985, in New York.

TEXTILE FORUM TO ADDRESS UNFAIR IMPORT COMPETITION

HON. MARILYN LLOYD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mrs. LLOYD. Mr. Speaker, On October 14, I am conducting an informal textile caucus forum in Chattanooga, TN, for the purpose of hearing textile/apparel employees and manufacturers alike tell how the textile import problem has harmfully affected their families, their friends, their communities and themselves. My colleagues from Georgia, Mr. JENKINS and Mr. DARDEN will be joining me.

Collectively we hope to send a clear signal to the President that we will not give up our uphill battle to gain fair treatment in our own marketplace.

It is no secret that the American fiber, textile, and apparel industry has been concerned for some time over the appalling rise of imports. These imports have doubled since 1980, averaging a 19-percent annual growth rate, and they now have a stranglehold on more than 50 percent of our market. For the first 8 months of 1985, the textile and apparel trade deficit has soared to a record $11.7 billion, and it is expected to peak at $20 billion for the entire year.

These numbers may sound like just a few unsettling Government statistics to some, but they are flesh-and-blood realities that boil down to 300,000 Americans losing their jobs to imports since 1980. So far in 1985 alone, some 66,000 hardworking American textile and apparel workers have stood by helplessly as their jobs got exported overseas.

If textile and apparel imports continue at their present unconstrained pace for a few more years, we won't have an American textile and apparel industry left. I can't believe our Government is allowing this to happen! Not only is the American textile industry absolutely essential to the efficient mobilization of our national defense in a crisis, but America's industrial base is the backbone of its economic strength.

As part of the congressional textile caucus, I have given my full support to passage and enactment of H.R. 1562, the Textile and Apparel Trade Enforcement Act of 1985, legislation designed to restore order and fairness to world textile and apparel trade. The President has indicated that regardless of the legislation's wide margin of success in Congress, he will veto it when it reaches his desk. We in the congressional textile caucus feel perplexed that such a rational solution to an increasingly complicated problem should get swept away in this fashion.

I have numbers to verify what the textile and apparel industry and its workers have proudly claimed for years—that it is indeed the most efficient, modern, competitive textile and apparel industry on Earth. It has increased its productivity by 4.5 percent annually since 1974, compared to a 2-percent annual productivity increase for all U.S. manufacturing. In terms of competitiveness, the U.S. textile and apparel industry spends close to $2 billion annually to modernize plants and specialize product lines in order to remain as efficient as possible. In spite of these extensive capital outlays, the American textile and apparel industry has kept rising prices on its goods down to a 90-percent growth rate since 1971, versus a 183-percent growth rate for all other U.S. manufacturing.

On the other hand, our trading partners are usually about half as efficient as we are. They get ahead through the help of their governments which allow and even encourage such tactics as direct subsidization, low- or no-interest loans and home market protection. These actions boost exports and slow or even prohibit imports. Top off these tactics with abysmally low third world labor wages of say, 18 cents an hour in the Peoples' Republic of China, and you have a severely unbalanced playing field where U.S. industry is penalized in more ways than one.

Sadly enough, the textile caucus has been criticized by opponents of H.R. 1562 who say Congress is not in the business of interfering in the area of trade except to ensure that our international trade laws are enforced properly. However, Congress has exhausted its resources trying to get these laws enforced in a meaningful way. It had to step in with a legislative remedy to unruly import growth as a last resort.

Our Nation must realize that it cannot be strong without its most vital and basic textile/apparel industry. Two million American workers' livelihoods depend upon our help.

ABA REVIEWS HALE INSTITUTE'S ACTIVE MEASURES STUDY

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. HYDE. Mr. Speaker, over the past week, I have been inserting in the RECORD excerpts of a book entitled "Active Measures, Quiet War and Two Socialist Revolutions" that was written by Laurence B. Sulc and published by the Nathan Hale Institute. Founded several years ago, the Hale Institute is an independent organization devoted to nonpartisan research in the area of domestic and foreign intelligence with particular emphasis on the role of intelligence operations in a free society.

Mr. Sulc is especially well qualified to discuss this subject as he served for more than 23 years as an intelligence operations officer for the Central Intelligence Agency, and more recently, as a Deputy Assistant Secretary in the Department of State's Bureau for Intelligence and Research.

With that as background, Mr. Speaker, I would like to call to my colleagues' attention a review of Mr. Sulc's timely work that appeared in a recent publication of the American Bar Association.

[From American Bar Association Intelligence Report, August 1985]

BOOK REVIEW: ACTIVE MEASURES, QUIET WAR AND TWO SOCIALIST REVOLUTIONS

Some time ago the chairman of the Standing Committee on Law and National Security, Professor John Norton Moore, addressed a letter to the author of the entitled book, Lawrence Sulc (deputy assistant secretary of state for departmental affairs), praising the content and requesting that your editor "give it a review." We do not take suggestions from our chairman lightly so we have not only read the book—we have studied it because it is a primer on Soviet aims, objectives, and practices.

It should be noted, first off, that the author is a professional intelligence officer turned diplomat (we need more such). He served for more than 23 years as an intelligence operations officer in the CIA and for six years on the staff of the Committee on Foreign Affairs in the House of Representatives (so he knows Capitol Hill too!) He is very modest in his preface to the work, disclaiming original research, but putting together a detailed definition and explanation of what he calls a "uniquely Soviet phenomenon, active measures, a kind of quiet war."

This small book (46 pages), full of meat, is really two books, the first one on "active measures" and the second one designed to dispel the Soviet-manufactured myth that there is a left/right dichotomy between communism and nazism.

The term "active measures" is a translation from the Russian "aktivnyye meropriyatiya." Would that some philologist, some phrase maker, could come up with a more descriptive term than "active measures" that would penetrate the consciousness of the average American audience. Without detailed and sometimes unbelievable (to them) explanation, the words go rattling incomprehensibly down the corri-

dors of the mind. Perhaps the author's simple equivalent, "quiet war," should always be substituted.

Secretary Sulc relies on an interagency intelligence study to break down the elements of the Soviet "quiet war." Those elements "consist of a wide range of activities, both overt and covert, including:

1. Manipulation or control of the media.
2. Written or oral disinformation.
3. Use of foreign communist parties and front organizations.
4. Manipulation of mass organizations.
5. Clandestine radio broadcasting.
6. Economic activities.
7. Military operations.
8. Other political influence operations."

Before the author dissects each one of these eight categories into understandable parts, he goes back to Soviet basics—that is, to Lenin's explanation (circa 1921) to the Soviet Commissar for Foreign Affairs, Georgy Chicherin, how the "deaf mutes" of the capitalist world can be lied to in a convincing and believable manner—how in fact those deaf mutes, who Lenin says "are blind as well," can be led to "work hard in order to prepare their own suicide."

The author then turns to what he calls "a reaffirmation of Lenin's dogma"—the Manifesto produced by the Congress of 81 Communist Parties in November 1960 (the last time such a meeting has been held), and Mr. Khruschev's famous follow-on explanatory speech of January 6, 1961. It so happens that those two basic communist documents were printed by a predecessor committee to the Standing Committee on Law and National Security of the ABA (the Special Committee on Communist Tactics, Strategy and Objectives) in May 1961. President Kennedy, suffering from the disastrous debacle of the Bay of Pigs and getting ready to meet Mr. Khruschev in Vienna, was persuaded to read the ABA publication. So impressed was he with these basic documents, we are told he ordered all his cabinet officers to read them. Now, Mr. Sulc brings them to mind again and quotes the defector, Anatoli Golitsyn, as stating in his book," New Lies for Old," that "these two basic documents have continued to determine the course of communist policy to the present day." Were such an all-national Communist Party Congress to be held again, as it is rumored Mr. Gorbachev is contemplating, it is unlikely there would be much deviation from the 1960 document.

Your editor has recommended to Chairman Moore that the committee reprint that early ABA report entitled, "Peaceful Co-Existence—A Blueprint for Disruption." Maybe then we can get the Reagan cabinet to read it—with Mr. Sulc's help! It would be nice if all Americans read it. Then we wouldn't have to explain "active measures" or the "quiet war" the Soviets continue to conduct.

In the "second book" the author concludes, after quoting many scholars and even Hitler himself:

"There it is then—communism, the most successful variant of fascism. Of course, the Soviets would want to hide the fact . . . they have worked so hard to give fascism a bad name, and rightly so. They have worked even harder to plant the banner of fascism on the far right, but wrongly so. It doesn't belong there; it belongs on the far left of the political spectrum, next to communism itself. Allowing for their differences, they were variants of the same awful thing: totalitarian revolutionary socialism."

Our chairman was right when he called this little book "first rate." The Nathan Hale Institute is to be congratulated for publishing it.

It wouldn't hurt for intellectually curious lawyers to refresh their understanding of the basics of communist aims, objectives, and practices. A former chairman of our committee, Morry Leibman (now chairman of the Advisory Committee), used to joke in a self depreciatory manner that when he became chairman in the 1960s there were perhaps a dozen lawyers in the ABA who fully understood the tactics, strategy, and objectives of world communism. Justice Lewis Powell (also a former chairman) was among the dozen. But, Morry would add, when he left as chairman after 12 years, he had increased the number to 30!

HOLOCAUST MEMORIAL AT TEMPLE SHOLOM IN QUEENS

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. ACKERMAN. Mr. Speaker, I rise today to call the attention of my colleagues to the dedication of the Holocaust Memorial at Temple Sholom of Floral Park, NY, on October 12, 1985.

A Torah that survived Nazi Germany and was rescued from the town of Kolin, Czechoslovakia, will be placed in the lobby of Temple Sholom as an eternal reminder of the horrors of the Third Reich. The desecration of Torah scrolls, cemeteries, and synagogues was typical of the hatred and inhumanity of the Nazis.

Mr. Speaker, it is appropriate that Temple Sholom has chosen a Torah saved from Hitler for a Holocaust memorial. The Torah symbolizes the continuity of the Jewish tradition, while the Nazis sought to smash the Jews into oblivion. For Jews, the Torah is a tree of life, while the Holocaust brought death. The Torah teaches love and toleration, but the Nazis preached hate.

Mr. Speaker, this particular Torah was originally collected by the Nazis for exhibition in a planned "Museum of Extinct Races." Instead, it will become a permanent memorial so that we will never forget Hitler's mad dreams. The scroll was obtained from the Westminster Synagogue in England, a repository for Torah scrolls that were salvaged from the ruins of European Jewry.

Forty years ago, 12 million people of all faiths suffered from the silence of those who claimed they did not know. It is our generation that would commit a terrible crime by letting them rest in a disturbed peace. Their memory must burn in the conscience of the world forever.

All Americans, Jews and non-Jews alike, need to find ways to remember the past; only through remembering the terror that Hitler brought to Europe can we prevent it from ever happening again. This Torah will be a fitting Memorial for all of Queens to the millions who were butchered in the Nazi death camps, and it will be dedicated in the hope that the blight of anti-Semitism and all hatred and bigotry can be banished forever from the face of the Earth.

Mr. Speaker, Kurt and Hannah Wehle, Holocaust survivors who are members of Temple Sholom, will participate with other speakers in the dedication ceremony. I would like to publicly acknowledge the hard work and commitment of Selma Rosen, chairman of the Holocaust Memorial Committee; the members of the committee: Robert Printz, Uriel Flax, Florence Ginsberg, and Gerty Wolf; and Maxine Baden, president of Temple Sholom. It was their dedication that has made this important Holocaust memorial a reality.

Mr. Speaker, I call on all of my colleagues in the U.S. House of Representatives to join me now in solidarity with the dedicated members of Temple Sholom of Floral Park as they prepare to dedicate this deeply meaningful Holocaust memorial.

TAX REFORM SHOULD PRESERVE DEDUCTION FOR STATE AND LOCAL TAXES

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. BEDELL. Mr. Speaker, I rise in opposition to President Reagan's proposal to eliminate the deduction for State and local taxes. I support tax reform that simplifies the tax code and ensures that everyone pays his fair share. However, eliminating the deduction for State and local taxes would violate founding principle of our Federal income tax, fall most heavily on the moderate income households, and cripple the ability of our State and local governments to meet important needs.

Our Constitution reserves for the sovereign States the authority to raise their own revenues, and the Federal Government should not abridge that authority. For this reason, the Federal Government has always granted a deduction for State and local taxes. Indeed, the States might not have ratified the 16th amendment, which permitted Congress to enact a permanent Federal income tax in 1913, were it not understood that the new Federal income tax would be imposed only on income remaining after payment of State and local taxes. Under the President's proposal, tax dollars paid to State and local governments would also be subject to Federal taxation. This is "double taxation."

The State and local tax deduction benefits taxpayers of all income levels, and its elimination would hurt moderate- and middle-income taxpayers. It would be a major blow to homeowners, families who send their children to public schools and all Americans who rely on essential State and local services. This would violate the principle of fairness that should be the basis of tax reform. Fifty-one percent of Federal taxpayers nationwide, and a 49.9 percent in Iowa, will deduct their State and local taxes for 1985. According to Internal Revenue Service statistics, 63 percent of households in the $20,000 to $40,000 income range take the deduction. Moreover, over

half—51 percent—of the 33 million households who use the deduction have incomes below $30,000. Only 13 percent of households that benefit from State and local tax deductibility have incomes above $50,000.

Finally, the Reagan administration has cut back on Federal assistance for many services and declared that those services are a State and local obligation. It is very unfair to propose at the same time to cripple the ability of State and local governments to raise revenues to meet these responsibilities. Repealing the deduction would generate enormous pressure on State and local governments to slash programs and services. According to the Congressional Research Service, eliminating the deduction for State and local taxes could cause those tax revenues to decline by as much as 15 percent. According to one estimate, revenues in the State of Iowa could decline by as much as $218 million. Revenues for Sioux City could decline by $4.3 million.

This would make it harder than ever for States and localities to meet critical needs: educating children, fighting crime, cleaning the environment, repairing roads, assisting the poor and elderly. This is why restrictions on deductibility would hurt nonitemizers as well as the many middle-class families who itemize. Furthermore, by hindering the revenue-raising ability of State and local governments, restrictions on deductibility would put downward pressure on bond credit ratings. This would increase the cost of State and local borrowing and curtail investment in infrastructure.

I do not support the compromise proposal that the Ways and Means Committee will use as its starting point for deliberations. For taxable years beginning after December 31, 1985, this proposal would disallow the deduction for sales taxes and personal property taxes—other than those incurred in a business or investment activity. It would allow partial deductibility for State and local income and real property taxes. For these two types of taxes, individuals would be permitted a deduction equal to the greater of $1,000—$500 for unmarried taxpayers—or the portion in excess of 5 percent of the individual's adjusted gross income.

Mr. Speaker, for all of these reasons, I believe that tax reform that is fair must preserve the deductibility of State and local taxes.

THE 30TH ANNIVERSARY OF FAIRLEIGH DICKINSON UNIVERSITY SCHOOL OF DENTISTRY

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. TORRICELLI. Mr. Speaker, I rise today to commemorate the 30th anniversary of the Fairleigh Dickinson University School of Dentistry in Hackensack, NJ. The university will be celebrating this milestone with a reception to be held on October 16, 1985. I could not allow this occassion to pass without officially going on record to honor the faculty, administrators and students associated with the School of Dentistry.

Since it opened with its first class in 1956, New Jersey's only private dental school has educated more than 1,500 students, many of whom practice in the State. Another 300 students, most of them State residents, have become specialists after earning postdoctoral degrees at the school.

Thousands of patients, including children, the handicapped and the elderly, have benefited from the school's clinical services. In addition to the 195 patient chairs that serve an urban school district, a prison, several hospitals and a physical and mental rehabilitation center.

On the occasion of the 30th anniversary of the school, I particularly wish to recognize the work of Dr. Ralph S. Kaslick, dean of the Dental School, Dr. Anthony Picozzi, director of Development and Professional Relations, and F.D.U. president, Robert H. Donaldson. I am proud to commend them for their many years of public service and am pleased to acknowledge their accomplishments on this special occasion.

It is important that we continue to support academic institutions such as the Fairleigh Dickinson University School of Dentistry in Hackensack. Their commitment to service and development should be an example to us all.

AGRICULTURAL CONCERNS ARE IMPORTANT

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. HUBBARD. Mr. Speaker, I have received hundreds of letters and telephone calls from my constituents in western Kentucky advising me about their concerns regarding the pending agricultural crisis that is confronting our Nation.

I have received an excellent letter from one of my constituents, Mr. Kenneth R. Rennison, manager of Crop Production Services in Fredonia, KY, which I would like to share with my colleagues.

Mr. Rennison highlights the conflicting signals the Federal Government has been sending to American farmers. It is precisely this mixed batch of signals that has led to confusion in one of the most efficient and effective American industries—agriculture.

I urge my colleagues to read Kenneth Rennison's timely and informative comments. His letter to me follows:

FREDONIA, KY,
August 16, 1985.

Hon. CARROLL HUBBARD, Jr.,
House of Representatives,
Washington, DC.

DEAR CONGRESSMAN HUBBARD: I am the manager of a small farm center (fertilizer plant) located in Western Kentucky. I am writing you concerning the upcoming new farm program. Since I work very closely with farmers and I feel that I know their needs and that of agricultural related businesses, I support a market-guided, full production, demand-oriented agricultural policy . . . one which ensures the lowest per-unit production costs for farmers. Congressional committees have adopted many efforts to expand farm product exports, but mounting commodity surpluses, low commodity prices, and unfair trading practices by our competitors may lead you to consider mandatory acreage reduction programs. That spells potential disaster for all agricultural input industries.

Agriculture cannot afford another acreage diversion PIK program! Congress must phase out acreage reduction programs which inhibit America's ability to compete internationally. In 1983, PIK idled 78 million acres while foreign nations increased plantings by 63 million acres!

Loan rates must be reduced to market-clearing levels. America's competitors benefit from an inflexible, high loan rate policy, because it prices U.S. farmers out of the world market. A reduced loan rate would help increase exports, reduce surpluses, and allow the market to guide the price . . . allowing a quicker return to a profitable agriculture.

Income protection should not be tied to commodity prices. If the U.S. adopts the above policy changes, temporary farmer income payments may be needed during this adjustment period. Temporarily lower domestic prices could result as supply and demand come into balance. As export markets are regained, prices should strengthen. Therefore, adjustment payments of cash or surplus commodities to farmers may be needed temporarily to protect their income.

I support a free market!

Sincerely,

KENNETH R. RENNISON,
Manager, Crop Production Services.

FARRAKHAN'S DOCTRINE PROFOUNDLY DISTURBING

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. WEISS. Mr. Speaker, on Monday night, October 7, in New York City, Louis Farrakhan ended a national speaking tour covering 14 cities with an address at Madison Square Garden. In the course of his speech, he threatened political figures who disagree with him with "disgraceful death," made reference to the "wickedness and sin" of Jews, and compared himself with Jesus.

Farrakhan's speech was not all venom—much of it dwelt on the economic concerns of the black community, an issue of great concern to many in his audience. With black unemployment nationwide at a staggering 15.3 percent—more than double the white unemployment rate of 6.1 percent—it is no surprise that Farrakhan has found people receptive to his message of black self-reliance and economic salvation.

Many black leaders preach a similar economic doctrine—one of self-help and greater independence from government assistance. In this regard, Farrakhan is not noteworthy. What differentiates Louis Farrakhan is that he has insidiously intertwined

his message of hope and progress with another one of hate, animosity, and vengeance.

During the past 18 months, Farrakhan has ridden to prominence on the power of his own bitterness and racism. To the many Americans of varied racial, religious, and ethnic backgrounds who have fought so long for racial equality, it seems both bizarre and hypocritical that someone would preach hate as a cure for hate, fear as a solution for fear, and racism as a cure for racism.

Farrakhan's doctrine is profoundly disturbing, too, because it ignores the common interests of Jews and blacks, the common struggles and histories of two peoples both subject to violence, racism, and oppression. It ignores the many civil rights battles that blacks and Jews have fought side by side, the countless times when one of the groups has come to the other's aid.

Instead, Farrakhan depicts a world of struggle and animosity between Muslims, Christians, and Jews, and between blacks and whites. Rather than seek to mend these rifts, Farrakhan incites his followers to greater divisiveness, exaggerated racial fragmentation, and pointless antipathy. Where great leaders seek to heal, Farrakhan seeks to injure; where great leaders create, Farrakhan destroys.

Farrakhan's closest international ally is Col. Mu'ammar el-Qadhafi of Libya, who has given Farrakhan a $5 million loan, which has financed Farrakhan's recent speaking tour. Although Farrakhan says he plans to use the money to establish an independent black corporation to produce soap and personal-care items, accepting money from the world's biggest financier of terrorists raises serious questions about Farrakhan's political orientation. Farrakhan explained Colonel Qadhafi's interest-free, long-term loan as help from "a fellow struggler in the cause of liberation of our people." If Qadhafi's attempts to "liberate" the sovereign countries of Chad, the Sudan, and Israel are any guide, we should be very nervous about what Farrakhan means when he speaks of liberation. It should also be noted that Colonel Qadhafi has offered to supply weapons to American blacks if they abandon the U.S. Armed Forces, form their own army, and fight for a separate state. Few people suffer from the illusion that Colonel Qadhafi has peaceful intentions. Louis Farrakhan's association with Qadhafi raises serious questions about his own ends, and the means he will use to achieve them.

Louis Farrakhan cannot, alone, divide the black and Jewish communities, whose relationship is built on many years of common struggle. But his repudiation of our shared history demands a clear response that can refute Farrakhan's demented diatribes. I urge my colleagues and all public figures alike to use their right to free speech as vigorously as Louis Farrakhan has used his, to answer his racism with reason and meet his foolish words with wise ones.

H.R. 3530, THE FAIR LABOR STANDARDS AMENDMENTS OF 1985

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. MURPHY. Mr. Speaker, I am pleased to announce that the members of the Subcommittee on Labor Standards have introduced legislation this afternoon amending the Fair Labor Standards Act [FLSA] as it affects local government employees in the aftermath of the Supreme Court's decision in Garcia against San Antonio Metropolitan Transit Authority.

This bill is a compromise solution. We believe that these amendments provide necessary protections to local public employees yet allows public employers the flexibility necessary to administer their personnel practice as they choose.

This legislation represents the considerable efforts of all the members of the subcommittee who have urged local government employers and their employees to work toward a mutually acceptable solution to the issue of FLSA compliance.

For several months the subcommittee has advocated compromise rather than confrontation between the parties to this controversy. We are gratified that this recommendation finally bore fruit when the local governmental associations and the representatives of public employee unions were able to work out their differences.

The majority and minority subcommittee staff have spent the last week reviewing the recommendations of labor and management. After refining some of the suggestions offered to the committee and, of course, individual recommendations from the members themselves, we have drafted a bill which enjoys broad bipartisan support.

H.R. 3530 provides for either compensatory time off or cash compensation for public employees working overtime, releasing local governments from liability for FLSA overtime violations until April 15, 1986, and clarification of the status of volunteers. There are, of course, many aspects of this bill which I would direct my colleagues to review in the copy of the bill and section-by-section analysis which follow.

The subcommittee intends to report this bill tomorrow, October 10, and I expect full committee action in the very near future.

FAIR LABOR STANDARDS AMENDMENTS OF 1985 (H.R. 3530)

INTRODUCED BY REPRESENTATIVES MURPHY, HAWKINS, JEFFORDS, PETRI, BARTLETT, WILLIAMS AND CLAY

A bill to amend the Fair Labor Standards Act of 1938 to authorize the provision of compensatory time in lieu of overtime compensation for employees of States, political subdivisions of States, and interstate governmental agencies, to clarify the application of the Act to volunteers, and for other purposes.

I. COMPENSATORY TIME

As of April 15, 1986, a public employer will be authorized to pay overtime in compensatory time at a rate of one-and-a-half the regular rate provided it is offered pursuant to a collective bargaining or other agreement, and the employee has not accrued compensatory time hours in excess of the appropriate cap on accumulated compensatory time. For employees whose jobs include seasonal, public safety or emergency work, banked compensatory time hours will be capped at 480 hours. For other employees, the cap would be set at 180 hours.

As of April 15, 1986, existing collective bargaining and similar agreements offering compensatory time will continue to be honored, except that compensatory time will be paid at time-and-one-half. An employer's pattern or practice of providing compensatory time would also continue provided it is at time-and-one-half.

II. LIABILITY

Public employers will not be liable for overtime and related paperwork violations of the Fair Labor Standards Act until April 15, 1986, for those "traditional" public employees affected by the *Garcia* decision. The bill is neutral with respect to current litigation on the question of whether an employee should be considered a traditional or non-traditional employee.

Public employees may defer overtime payment, whether in cash or compensatory time, until August 1, 1986.

III. SPECIAL DETAIL, OCCASIONAL, MUTUAL AID AND SUBSTITUTE EMPLOYMENT

Special detail, occasional, and mutual aid employment for a second employer or in a second capacity will not be considered as hours worked for the purposes of calculating overtime pay.

Public safety employees, with the consent of their employer, may substitute for one another without that substitution counting as hours worked.

IV. VOLUNTEERS

A person who volunteers to work for a public employer shall not be considered an employee of that employer for the purposes of the Fair Labor Standards Act provided he or she is employed by a different employer, or in a different job for the same employer. A volunteer may be provided reasonable benefits, expenses, a nominal fee or any combination thereof.

V. STATE AND LOCAL LEGISLATIVE STAFF

State and local legislative staff, with the exception of libarary employees, will be exempt from the Fair Labor Standards Act.

VI. DISCRIMINATION

An employee who has been discriminated against by an employer because of asserted coverage under the overtime provisions of the Fair Labor Standards Act since the *Garcia* decision may seek relief under section 16 of the Act.

H.R. 3530

A bill to amend the Fair Labor Standards Act of 1938 to authorize the provision of compensation for employees of States, political subdivisions of States, and interstate governmental agencies, to clarify the application of the Act to volunteers, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; REFERENCE TO ACT.

(a) SHORT TITLE.—This Act may be cited as the "Fair Labor Standards Amendments of 1985".

(b) REFERENCE TO ACT.—Whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be a reference to a section or other provision of the Fair Labor Standards Act of 1938.

SEC. 2. COMPENSATORY TIME.

(a) COMPENSATORY TIME AUTHORIZED.—Section 7 (29 U.S.C. 207) is amended by adding at the end the following:

"(o)1) Any public agency which is a State, a political subdivision of a State, or an interstate governmental agency and which is required to pay overtime compensation by this section may in lieu of paying such compensation provide compensatory time in accordance with paragraph (2).

"(2) (A) A public agency may provide compensatory time under paragraph (1)—

"(i) if it is authorized by a collective bargaining agreement, memorandum of understanding, or other agreement or understanding entered into by the public agency and its employees or their recognized representatives before the work for which the compensatory time is to be provided,

"(ii) if it is one and one-half hours for each hour of employment for which overtime compensation is required under this section, and

"(iii) to any employee who has not accrued compensatory time in excess of the limit applicable to the employee prescribed by subparagraph (B).

"(B) If the work of an employee for which compensatory time may be provided included work in a public safety activity, an emergency response activity, or a seasonal activity, the employee engaged in such work may accrue not more than 480 hours of compensatory time. If such work was any other work, the employee engaged in such work may accrue not more than 180 hours of compensatory time.

"(3) An employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency—

"(A) who has accrued compensatory time authorized to be provided under paragraph (1), and

"(B) who has requested the use of such compensatory time,

shall be permitted by the employee's employer to use such time within a reasonable period after making the request if the use of the compensatory time does not unduly disrupt the operations of the public agency.

"(4) An employee who has accrued compensatory time authorized to be provided under paragraph (1) shall, upon termination of employment, be paid for the unused compensatory time at a rate not less than the average rate received by such employee during the last 3 years of the employees' employment.

"(5)(A) For purposes of this subsection—

"(i) the term 'overtime compensation' means the compensation required by subsection (a), and

"(ii) the term 'compensatory time' means time during which an employee is not working and during which the employee is compensated at the regular rate provided for the employee's employment.

"(B) If a public agency had in effect on April 15, 1986, a pattern or practice of providing its employees compensatory time off in lieu of overtime compensation, the pattern or practice shall constitute an agreement or understanding which meets the requirements of paragraph (2)(A)(i).".

(b) EXISTING COLLECTIVE BARGAINING AGREEMENT.—A collective bargaining agreement which is in effect on April 15, 1986, and which permits overtime compensation in the form of compensatory time off at a rate of less than one and one-half hours for each hour of employment for which overtime compensation is required by section 7 of the Fair Labor Standards Act of 1938 shall remain in effect until its expiration date unless otherwise modified, except that compensatory time shall be provided after April 14, 1986 in accordance with section 7(o) of such Act (as added by subsection (a)).

(c) LIABILITY AND DEFERRED PAYMENT.—

(1) No State, political subdivision of a State, or interstate governmental agency shall be liable under section 15(a)(5) or 16 of the Fair Labor Standards Act of 1938 for a violation of section 7 or 11(c) of such Act occurring before April 15, 1986, with respect to any employee of the State, political subdivision, or agency who would not have been covered by such Act under the Secretary of Labor's special enforcement policy which was in effect on January 1, 1985, and published in sections 775.2 and 775.4 of title 29 the Code of Federal Regulations.

(2) A State, political subdivision of a State, or interstate governmental agency may defer until August 1, 1986, the payment of overtime compensation under section 7 of the Fair Labor Standards Act of 1938 for hours of employment after April 14, 1986.

SEC. 3. SPECIAL DETAILS, OCCASIONAL EMPLOYMENT, MUTUAL AID, AND SUBSTITUTION.

(a) SPECIAL DETAIL WORK FOR FIRE PROTECTION AND LAW ENFORCEMENT EMPLOYEES.—Section 7 (29 U.S.C. 207) is amended by adding after subsection (o) (added by section 1) the following:

"(p)(1)(A) If a person who is employed by a State, political subdivision of a State, or an interstate governmental agency in fire protection or law enforcement activities (including activities of security personnel in correctional institutions) and who, solely at such person's option agrees to be employed, on a special detail, by a separate or independent employer in fire protection, law enforcement, or related activities, the hours such person was employed by such separate and independment employer shall be excluded by the public agency employing such person in the calculation of the hours for which the employer is entitled to overtime compensation under this section.

"(B) If a public agency which is a State, political subdivision of a State, or a interstate governmental agency—

"(i) requires that its personnel engaged in fire protection, law enforcement, or security activities be hired by a separate and independent employer to perform such activities.

"(ii) facilitates the employment of such personnel by a separate and independent employer, or

"(iii) otherwise affects the condition of employment of such personnel by a separate and independent employer,

such action by such public agency shall not prevent the application of subparagraph (A) to its fire protection, law enforcement, and security personnel if such personnel meet the requirements of subparagraph (A).".

(b) OCCASIONAL EMPLOYMENT.—

(1) Section 7(p) (29 U.S.C. 207), as added by subsection (a), is amended by adding at the end the following:

"(2) If an employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency undertakes, on an occasional or sporadic basis and solely at the employee's option, part-time employment for the public agency which is in a substantially different capacity from the capacity in which the employee is regularly employed on a full-time basis with the public agency, the hours such employee was employed in performing the different employment shall be excluded by the public agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section.".

(2) Not later than March 15, 1986, the Secretary of Labor shall issue regulations under section 7(p)(2) (as added by paragraph (1))—

(A) defining when employment is done on an occasional or sporadic basis, and

(B) prescribing a standard for determining if employment is of a substantially different capacity than other employment.

(c) MUTUAL AID.—Section 7(p) (29 U.S.C. 207), as amended by subsection (b), is amended by adding at the end the following:

"(3) An employee of a public agency which is a State, political subdivision of a State, or an interstate governmental agency may volunteer to perform services for any other State, political subdivision, or interstate governmental agency, including a State, political subdivision or agency with which the employing State, political subdivision, or agency has a mutual aid agreement.".

(d) SUBSTITUTION.—

(1) Section 7(p) (29 U.S.C. 207), as amended by subsection (c), is amended by adding at the end the following:

"(4) A person who is employed by a public agency which is a State, political subdivision of a State, or an interstate governmental agency, who is employed in fire protection or law enforcement activities (including activities of security personnel in correctional institutions), and who, with the approval of the public agency and solely at the option of such person, agrees to substitute during scheduled work hours for another person who is employed by such agency in such activities, the hours such employee worked as a substitute shall be excluded by the public agency in the calculation of the hours for which the employee is entitled to overtime compensation under this section.".

(2) Section 11(c) (29 U.S.C. 211(c)) is amended by adding at the end the following: "The employer of an employee who performs substitute work described in section 7(p)(4) may not be required under this subsection to keep a record of the hours of the substitute work.".

SEC. 4. VOLUNTEERS.

(a) DEFINITION.—Section 3(e) (29 U.S.C. 203(e)) is amended—

(1) by striking out "paragraphs (2) and (3)" in paragraph (1) and inserting in lieu thereof "paragraphs (2), (3), and (4), and

(2) by adding at the end the following:

"(4) The term 'employee' does not include any individual who volunteers (A) to perform services for a public agency which is a State, a political subdivision of a State, or an interstate governmental agency, and (B) to perform such services without compensation or for a nominal fee, expenses, or reasonable benefits or for any combination of such fee, expenses, or benefits. If a person who is employed by a public agency which is a State, political subdivision of a State, or an interstate governmental agency volunteers to perform for such agency the same type of service which the person is em-

ployed to perform for such public agency, such person shall be considered an employee for purposes of this Act.".

(b) REGULATIONS.—Not later than March 15, 1986, the Secretary of Labor shall issue regulations under section 3(e)(4) (as amended by subsection (a)) to define nominal fees and reasonable benefits.

(c) CURRENT PRACTICE.—If before April 15, 1986, the practice of a public agency was to treat certain persons as volunteers, such person shall until April 15, 1986, be considered, for purposes of the Fair Labor Standards Act of 1938, as volunteers and not as employees.

(d) LIABILITY.—No public agency which is a State, a political subdivision of a State, or an interstate governmental agency shall be liable for a violation of section 6 occuring before April 15, 1986, with respect to services performed for the public agency by any individual who performed such services as a volunteer.

SEC. 4. STATE AND LOCAL LEGISLATIVE EMPLOYEES.

Clause (ii) of section 3(e)(2)(C) (29 U.S.C. 203(e)(2)(C)) is amended—

(1) by striking out "or" at the end of subclause (III),

(2) by striking out "who" in subclause (IV),

(3) by striking out the period at the end of subclause (IV) and inserting in lieu thereof ", or", and

(4) by adding after subclause (IV) the following:

"(V) is an employee in the legislative branch of that State, political subdivision, or agency and is not an employee in a library of the legislative branch.".

SEC. 5. EFFECTIVE DATE.

The amendments made by this Act shall take effect April 15, 1986, except that the Secretary of Labor may before such date promulgate such regulations as may be required to implement such amendments.

SEC. 6. EFFECT OF AMENDMENTS.

The amendments made by this Act are not to be construed to affect whether a public agency which is a State, political subdivision of a State, or an interstate governmental agency is liable under section 16 of the Fair Labor Standards Act for a violation of section 6, 7, or 11 of such Act occurring before April 15, 1986, with respect to any employee of such public agency who would have been covered by such Act under the Secretary of Labor's special enforcement policy which was in effect on January 1, 1985, and published in sections 775.2 and 775.4 of title 29 of the Code of Federal Regulations.

SEC. 7. DISCRIMINATION.

A public agency which is a State, political subdivision of a State, or an interstate governmental agency and which discriminates or has discriminated against an employee with respect to the employee's wages or other terms or conditions of employment because on or after February 19, 1985, the employee asserted coverage under section 7 of the Fair Labor Standards Act of 1938 shall be held to have violated section 15(a)(3) of such Act.

CONGRESSIONAL VIGIL FOR SOVIET JEWRY

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. LUKEN. Mr. Speaker, President Reagan's November summit meeting with Soviet Secretary General Mikhail Gorbachev is drawing near. But freedom for Jews in the Soviet Union remains as distant as ever as their plight continues to deteriorate.

I rise today to call on President Reagan to place the issue of human rights for Jews living in the Soviet Union high on his agenda for the summit.

Last year, only 896 Jews were permitted to leave the Soviet Union, a reduction of 30 percent over the number permitted to leave in 1983 and 98 percent fewer than the peak-year total of 51,000 in 1979.

We recently marked the 10th anniversary of the signing of the Helsinki Accords of 1975. As Americans, we recognize our moral and legal commitment to guarantee that basic human rights are respected. I believe the Soviets have a similar responsibility and, therefore, it is appropriate that President Reagan remind Mr. Gorbachev that the Soviets are obliged to keep their part of the bargain.

I would particularly like to raise the case of one refusenik, Dr. Yuri Tarnopolsky. In 1976, Dr. Tarnopolsky applied for an exit visa to Israel for his family. In 1979, his application was denied and he and his wife Olga were dismissed from their jobs. Yuri had been a linguist and researcher in organic chemistry. Olga was a teacher.

In Kharkov, where the family lives, Tarnopolsky was one of a small number of Jewish academics who organized an unofficial university for the sons and daughters of other refusenik families barred from continuing their formal education because they had applied to emigrate. In 1981, Soviet authorities clamped down on the university's activities.

In 1982, Tarnopolsky began a 40-day hunger strike to draw attention to the plight of Jewish refusenik families. He was arrested in March 1983 for allegedly slandering the Soviet State by writing letters about his ordeal to relatives abroad.

As a result of his alleged offense, Tarnopolsky was sentenced to 3 years in a labor camp near Chita, Siberia, more than 3,000 miles from the Tarnopolsky home in Kharkov. Earlier this year, he suffered a heart attack.

Yuri has now completed two-thirds of his sentence, and under Soviet law, is eligible for early release for health reasons. The Soviets should honor their own laws and release Yuri Tarnopolsky from prison now and permit the Tarnopolsky family to emigrate to Israel.

To draw attention to the plight of Yuri Tarnopolsky and his family, the Isaac M. Wise Temple in Cincinnati, OH, held an in-absentia Sabbath and Bat Mitzvah service several months ago for Irina Tarnopolsky, Yuri and Olga's 14-year-old daughter.

The service was arranged, composed, and directed by the Wise Temple Youth Group, which "adopted" Irina Tarnopolsky following a meeting with her mother in Moscow by Rabbi Alan Fuchs and Paul Ostand of Wise Temple during a visit to the Soviet Union a year ago last summer.

Members of the United States Congress must not stand idly by and bear witness to the persecution of Yuri Tarnopolsky and other Jews in the Soviet Union. We must raise our voices whenever we can to protest such gross violations of basic human rights.

President Reagan faces both a challenge and a unique opportunity next month at the Geneva summit. I urge him to utilize this opportunity to raise the plight of Soviet Jews, such as Yuri Tarnopolsky, with Mikhail Gorbachev and to convey to the Soviet leader that the plight of Soviet Jewry is a matter of international concern and specifically a matter of concern to all Americans.

Respect for the rights of Soviet Jews and relaxation of restrictions on their right to emigrate would go a long way toward improving the climate between our two countries, thereby enhancing peace and security throughout the world. I strongly urge President Reagan to convey that message to General Secretary Gorbachev at Geneva.

Prisoners of conscience in the Soviet Union look to us as their voice and seek out our help. We must not let them down.

FUND FOR MEXICAN SCHOOL AND HOSPITAL RECONSTRUCTION

HON. E de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. DE LA GARZA. Mr. Speaker, my friend Jack Gavin, our Ambassador to Mexico, has advised me that he was writing the Governors of our 50 States on the matter of the recent earthquake tragedy in Mexico.

Having traveled quickly to that country last month, I cannot yet forget what I saw. I don't think I will ever forget. Sometimes we think that visions of human suffering never reach an end point as the media brings tragedy after tragedy to our attention. But surely if a limit were to be reached, the Mexico City earthquake might touch that imaginary boundary.

So I was heartened to hear from Ambassador Gavin that the United States has established a "Fund for Mexican School and Hospital Reconstruction" since those two areas are of prime importance to the country as it rebuilds from the quake. It is an effort I had recommended some weeks ago.

The Ambassador has advised all Governors that any donations collected from their respective State constituents and groups can be forwarded to his office in Mexico City for use in the school and hos-

pital effort. Money is, as I've said, something Mexico needs in this effort.

The money will be administered by the American Chamber of Commerce in Mexico—and every rebuilt school and hospital will bear a plaque that identifies the U.S. State from which the generosity originated. I know my native Texas is among the list of benefactors.

All of us can contact our respective Governors about their State's participation in the rebuilding effort described in Ambassador Gavin's letter. I will tell my constituents in south Texas about it through my weekly letter back home.

Mexico's Ambassador to our country, the Honorable Jorge Espinosa de los Reyes, wrote me to express his profound appreciation for the United States House and Senate resolution of September 20 regarding the earthquake.

Ambassador de los Reyes said to me that the congressional resolution was an indication of the historic solidarity between our two nations, and that the United States Congress has enriched the bonds between us at a time when tragedy puts Mexico into mourning.

The words of Mr. de los Reyes ring warmly in this Chamber. I wanted to bring this to the attention of my colleagues because Mexico and its people, as neighbors, are friends. They don't live down the block from us—they live right across the street in the house we see from our own front porches. It is that kind of relationship that makes a neighbor special, and we in the United States have responded with outstanding generosity to the Mexican tragedy—as any good neighbor would.

I know this most recent school and hospital effort will be appreciated by our friends in that country. We have each taken one another into mutual care, and after going to Mexico City I can tell you there is not a voice in the streets that does not say, "Thank you, friends."

REASON WHY CONGRESS SHOULD REJECT H.R. 3008

HON. HOWARD C. NIELSON

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. NIELSON of Utah. Mr. Speaker, I was hoping that after the Ninth Circuit Court of Appeals issued its greatly anticipated decision rejecting the theory of comparable worth, we would be finished with this legislation and could get on with the business at hand. Unfortunately, this is not the case.

Even without the benefit of the excellent arguments the court provided in rejecting comparable worth, there are more than enough reasons why Congress should reject H.R. 3008, the Federal Equitable Pay Practices Act of 1985. I already outlined one of these reasons during the previous debate; I would like to offer another.

Proponents claim this legislation would establish a bipartisan commission that would hire and supervise an "independent" consultant to conduct the study. I guess this is true, if we define bipartisan in its simplest terms. What it would not do is create a balanced, objective commission, one that would approach this study with a collective open mind.

Of the 11 commissioners to be appointed, four must be the highest elected officials of the largest labor or employment organizations that represent some of the various groups that would benefit the most if comparable worth becomes public policy. Now if I'm not mistaken, these organizations have gone on record as being strongly in favor of implementing comparable worth throughout the public and private sectors. Could we possibly expect these highest elected officials to suddenly alter their positions? Score four votes for comparable worth.

Two more of the commissioners would be appointed by the President upon the recommendation of the Speaker of the House and the Senate Minority Leader. Is it unreasonable to expect that these two gentleman would also recommend individuals who are procomparable worth? Score two more four comparable worth.

That gives proponents at least 6 votes out of 11, already a simple majority. The bill goes on to outline the powers of this commission, which among other things includes the power to hire a director and three to five so-called experts, to hold hearings, issue subpoenas, and even to elect its own chair and vice chair. Since H.R. 3008 does not spell out under what set of rules this commission would operate, is it not fair to assume that a majority vote will decide this as well? Talk about a stacked deck. How could such a commission possibly approach a study based on the theory of comparable worth in a fair and objective manner?

Mr. Speaker, again I urge my colleagues to reject this misguided theory. Vote no on comparable worth. Vote no on H.R. 3008.

ROLLAND M. TEEL, A MAN OF VISION

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mrs. HOLT. Mr. Speaker, the Severn School, which has a long and distinguished tradition as one of the finer private academies of our Nation, will celebrate November as Founder's Month to honor the 100th anniversary of the birth of Rolland M. Teel.

Mr. Teel and his young wife, Susan Ashley Teel, came to Boone, MD (now Severna Park) in 1914 and established a country boarding school committed to the intellectual and moral discipline necessary to prepare young men for entrance into the U.S. Naval Academy.

Graduates of Severn School served with great honor and valor during the Second World War. It is likely that no other Maryland high school suffered a greater loss of alumni. Two Medal of Honor winners are graduates of the school. They are Admirals Herbert Schonland and Bruce McCandless, who last June received the first Rolland M. Teel Distinguished Alumni Awards.

Mr. Teel served as headmaster of Severn School for 41 years and then was chairman of the board of trustees for another 10 years. Through more than half a century of dedicated service, he also taught classes.

This remarkable man was a superb educator. He died in 1978 at the age of 92. The school he founded is no longer a Naval Acadmey prep school, but continues to flourish as a coeducational day school with very high academic standards.

I believe it is very appropriate to honor Mr. Teel for creation of a school whose graduates have contributed much to our Nation in peace and war.

As a neighbor of the Severn School, I am pleased to honor the Founder, Mr. Teel.

VIOLENCE BEGETS VIOLENCE

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. MILLER of California. Mr. Speaker, the tragic kidnaping of Ines Guadalupe Duarte Duran, daughter of President of El Salvador Jose Napoleon Duarte, has still not been resolved. I know that the Members of this House join me in wishing President Duarte and the Government of El Salvador strength and perseverance in their efforts to secure Ms. Duarte's prompt, safe release.

On September 12, 1985, the House of Representatives approved House Concurrent Resolution 187, condemning the unjustified and reprehensive kidnaping of President Duarte's daughter. I supported that resolution, as did 401 of my colleagues. The violation of human rights and the laws of war by the guerrillas, including the kidnaping of civilian mayors, the murder of U.S. marines and other citizens, the kidnaping of Ms. Duarte, and the killing of innocent civilians at Santa Cruz Loma last April, are matters of concern to us all, as they reflect guerrilla attacks against noncombatants in an increasingly brutal civil war.

We should also heed the admonition made by El Salvador's Archbishop Arturo Rivera y Damas when he said in a June 23 homily that we must not condemn guerrilla abuses while failing to criticize the actions of the armed forces in their conduct of the war. "It would be hypocritical to cry out only when terrorism comes from the extreme left and not from the extreme right or the armed forces," he said. "I hope that those who are vehement about this massive assassination (the murder of the marines) will not keep silent when there are other equally serious violations whose victims are humble Salvadorans. The Archbishop criticized the "bombardments, destruction of crops, burnings of farms, and forced ex-

oduses" that he said were caused by the army during a recent military operation.

What we are witnessing in El Salvador is that violence begets violence and brings us no closer to a solution that will bring to an end the suffering of the Salvadoran people. We must all redouble our efforts to find a peaceful solution to the tragic conflict there.

A TRIBUTE TO ROBERT L. POUST

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. GEKAS. Mr. Speaker, recently the U.S. Surgeon General, Dr. C. Everett Koop, noted that more than 3,000 people die from choking in the United States each year, mostly while eating. Koop also noted that "the best rescue technique in any choking situation is the Heimlich Maneuver."

Mr. Speaker, I am proud to announce to my colleagues in the U.S. Congress that a constituent of mine from Sunbury, PA, Mr. Robert L. Poust, performed the Heimlich Maneuver on Mr. Andrew Gavason while watching a softball game of the POW-MIA girls softball tournament.

Mr. Poust, a member of the Vietnam Veterans Chapter Post 201, observed Mr. Gavason having trouble breathing and grabbing at this throat. Mr. Poust displayed quick thinking and action by executing the Heimlich Maneuver in a perfect fashion, thus saving another man's life.

Mr. Speaker, we want to recognize Robert Poust of Sunbury, PA, for calmly executing the life-saving procedure called the Heimlich Maneuver, and we together as the House of Representatives issue our joint congratulations to him.

TRIBUTE TO A LEADER

HON. E. CLAY SHAW, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. SHAW. Mr. Speaker, I would like to take this opportunity to mark the loss of a great leader in my home district of Broward County, Florida, Mrs. Kathleen Wright.

Mrs. Wright was a deeply respected educator and public servant who earned the distinction of being the first black elected to a countywide office in Broward. She died after a long and brave battle to recover from injuries she suffered recently in the crash of Flight 191 in Dallas.

Mrs. Wright was an inspiration to all of us—black and white alike—in Broward. She was elected to the Broward County School Board and served as its chairman. She also served on the board of directors of the Broward Urban League and worked on the Minority Community Economic Development Corp.

She was valedictorian of Dillard High School in 1953, a bible school teacher, a teacher at Dillard High for 16 years, a professor of Nova University and the past regional director of Delta Theta Sorority, a national black public service sorority. She was on her way to a sorority convention when her plane crashed.

Mr. Speaker, the death of Kathleen Wright leaves a void for all of us in Broward and especially for her three children and her husband, Judge Zebedee Wright of the Broward County Court.

Her quiet strength and determination were an example for our community. Her life and the 135 other lives that were lost in that tragic crash can never be replaced. All of Broward is grieving for her and the other 40 Broward residents who died as a result of the Texas accident.

Mr. Speaker, it was an honor to have known Mrs. Wright. She will be deeply missed.

A TRIBUTE TO SISTER OLIVE LOUISE DALLAVIS

HON. ALAN WHEAT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. WHEAT. Mr. Speaker, an era is coming to an end this month at Avila College, a liberal arts school in my congressional district in Kansas City, MO. Sister Oliver Louise Dallavis is retiring after 25 years as the first and only president of the college.

To alumni, friends, and colleagues, Sister Olive Louise and Avila College share inseparable identities. Twenty-five years ago, cornfields dominated the landscape around 120th Street and Wornall Road. Today, a $16 million college campus accommodating 3,100 students stands in place of the cornfields as testimony to the tireless efforts and genuine talents of Sister Olive Louise.

A native of St. Louis, she had two childhood ambitions. One was to become a great actress and the other was to become a religious. At 17, she made her choice and entered the novitiate of the Sisters of St. Joseph of Carondelet in 1938. After completing her religious studies in 1941, she began teaching at a Catholic grade school in St. Louis. Eleven years later, she moved to Kansas City to teach music, Italian, and humanities courses at St. Teresa's Academy and the College of St. Teresa.

By 1961, Sister Olive Louise had become acting president of St. Teresa College and plans already were underway to expand the college and construct a new campus. Two years later, St. Teresa's was relocated and renamed Avila College in honor of the birthplace of St. Teresa. Sister Olive Louise was installed as president of the new college.

From the beginning, Sister Olive Louise has been a formidable fundraiser. Under her leadership, the college has remained almost free of debt while expanding its programs and constructing a nine-building campus in south Kansas City. She has steered the college through numerous changes and an era of upheaval in education. In 1969, Avila began admitting male students and currently the enrollment is about two-thirds women and one-third men. More than half the college's students are non-Catholic as the school has expanded its efforts to attract students in the highly competitive Kansas City area. A scholar and instructor of music, Italian and the humanities, Sister Olive Louise has helped define and shape the college's curriculum, which offers 41 bachelor's and 3 master's degrees in the professional and liberal arts.

Sister Olive Louise has received numerous awards and honors and two particular honors are noteworthy. She was the first woman religious to be named a Lady Commander of Merit, a title bestowed by Pope Paul VI and she was also honored as Kansas City Businesswoman of the Year.

Retirement will not slow down Sister Olive Louise. She will play an integral part in the college's 3-year development program started last year with the objective of raising $3 million. She plans to work on the fund drive until its completion, an example of her altrustic nature.

Mr. Speaker, Sister Olive Louise has touched the lives of the more than 7,000 students, including two members of my congressional staff, who have graduated from Avila College. As an educator, administrator, and friend, she has meant so much to so many young people. She will be missed, but she will not be forgotten. I join with her colleagues and friends and Avila College alumni in wishing Sister Olive Louise much success in her future endeavors.

FEDERAL PAY EQUITY

HON. TOM LEWIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, October 9, 1985

Mr. LEWIS of Florida. Mr. Speaker, today, the House of Representatives approved H.R. 3008, the Federal Pay Equity Study. I voted against this bill, not because I do not share with my colleagues their concerns regarding discrimination, but because I believe this bill leads us down the wrong avenue in eliminating this problem.

Currently, there are statutes and laws, which when properly enforced, provide the means to obtain due process. Rather than continuing to exhaust limited Federal funds, our efforts should be directed to enforcement of these existing laws.

Evidence available to us today indicates there may be discrimination in this Nation's work force. However, I believe these instances would be better addressed on their own merits, rather than expending our valuable resources in search of that which we already know.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, October 10, 1985, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

OCTOBER 15

10:00 a.m.
